The Department of Urban and Regional Planning offers graduate programs leading to the degrees of Master of Urban Planning and Doctor of Philosophy in Regional Planning. Students can also apply to obtain a joint degree with another graduate degree simultaneously. The most popular joint degrees are with Architecture, Landscape Architecture, Law and Agricultural and Applied Economics. Joint degrees with any related field are possible. In addition, a small number of the department's Bachelor of Arts in Urban Studies and Planning (B.A.U.S.P.) students participate in the highly selective 4+1 program (p. 924) to complete the B.A.U.S.P. and M.U.P. in five years.

Admission

We welcome applications from people from a wide variety of backgrounds who have demonstrated potential for extraordinary professional achievement. Students seeking a graduate degree in planning come from a diverse range of academic backgrounds. The most frequent are sociology, economics, political science, geography, environmental sciences, architecture, engineering, public administration, urban planning, and public policy, but the natural sciences, humanities, and other fields also provide excellent foundations for graduate study in planning. Prospective students must have a grade point average (GPA) of at least 3.0 computed from the last 60 hours of undergraduate work and any subsequent graduate study, but the average GPA of admitted students is considerably higher. International applicants must meet additional minimum requirements (http://www.grad.illinois.edu/admissions/countries/) based on their country of origin, including the Test of English as a Foreign Language (TOEFL).

We place particular emphasis on each applicant's statement of purpose. Applicants should use the statement to convey information about their backgrounds, professional and personal experience, and intellectual perspectives, in the context of articulating why a Master's in Urban Planning or Ph.D. in Regional Planning from the University of Illinois Urbana-Champaign will help them achieve their professional goals. We seek an applicant pool that represents a mix of racial and ethnic populations, a range of social and economic backgrounds, different philosophies and perspectives, and a variety of life experiences. We are especially interested in applicants with professional experience, though that experience need not be in planning or closely related fields.

Applicants to the Ph.D. program are admitted when they meet the standards of the Department and have a faculty member prepared to serve as their mentor and, if necessary, primary source of financial support. Students interested in pursuing a Ph.D. in Regional Planning should communicate with the Director of the Ph.D. Program and faculty most closely aligned with their interests, in addition to completing the formal application process.

Consult the M.U.P. admissions (https://urban.illinois.edu/programs-applying/master-urban-planning/) and Ph.D. admissions (https://urban.illinois.edu/programs-applying/phd-regional-planning/) web pages for more information.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the doctoral experience in this program and is strongly encouraged for those intending to pursue an academic career.

Faculty Research Interests

The mission of the Department of Urban and Regional Planning is to teach and conduct research to improve understanding of human settlements and of planning situations. The department’s faculty studies the ecological, economic, social, and institutional aspects of urban and regional development, and the theory and practice of planning processes. Planning is viewed as the achievement of outcomes based on interrelated actions over time and space, and close communication and collaboration with a wide range of disciplines and professions is inherent in the department’s approach. The basis of that collaboration is a faculty whose academic training and degrees are in architecture, economics, geography, history, law, political science, regional science, and zoology, in addition to planning. Planning faculty and doctoral students pursue interdisciplinary research and make scholarly contributions to planning and fields closely allied with planning.

Facilities and Resources

The Department of Urban and Regional Planning shares Temple Hoyne Buell Hall (TBH) with the Department of Landscape Architecture and the School of Architecture. The majority of urban planning classes are held in TBH. Doctoral student workspace is provided in the Architecture Building, near TBH.

The City Planning and Landscape Architecture Reference and Resource Center is located in Funk Library (http://www.library.uiuc.edu/agx/). The planning collection is one of the finest in the world, with books and reports gathered since the collection started over eighty years ago.

Financial Aid

Students compete for departmental and Graduate College fellowships and departmental teaching and research assistantships. Selection is based on the academic achievement and qualifications of the student.

for the degree of Doctor of Philosophy in Regional Planning

For additional details and requirements refer to the department's website (https://urban.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Doctor of Philosophy in Regional Planning

Student who complete a degree in the Department of Urban and Regional Planning will be able to:

1. Demonstrate a foundational knowledge of: planning history, theory, law and institutions; and theories, debates and practices surrounding current and past planning challenges.
2. Demonstrate expertise in chosen subject matter.
3. Be highly competent in research skills and have a deep understanding of a broad range of methodologies (including both quantitative and qualitative approaches).
4. Fully understand the research enterprise. This includes an ability to critique others' work and an ability to be a contributing scholar by producing original research.
5. Be prepared to teach courses and understand best practices for student engagement.
6. Be familiar with disciplinary norms and standards, including understanding issues related to ethical practices.

College of Fine & Applied Arts

Fine & Applied Arts (https://faa.illinois.edu)

Religion, MA

for the degree of Master of Arts in Religion

Admission
The Graduate College admission requirements apply. Applicants need not have an undergraduate major in the study of religion, but they must demonstrate a capacity to undertake advanced study in this area of inquiry. All applications for admission must be supported by three letters of recommendation from persons qualified to comment on the applicant's aptitude for graduate study in religion. Applicants are required to submit a sample of their written work. The Graduate Record Examination (GRE) is required. International applicants whose native language is not English must take the IELTS or the Test of English as a Foreign Language (TOEFL) and have their scores submitted to Institution Code #1836, Dept. #00. A score of at least 600 on the paper-based test (PBT), or 250 on the computer-based test (CBT), or 100 on the internet-based test (iBT) is required for admission to this program.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Facilities and Resources
The extraordinary University Library is the department's main research facility; within it, the History, Philosophy & Newspaper Library, the Rare Book Room, and the International and Area Studies Library all serve faculty and students with expert bibliographers and focused collections. Among other special collections that are likely to be useful to our students are Afro-Americana and Women's Studies; the library is also a major repository for government documents.

Financial Aid
Financial aid is available to many students in the form of fellowships or assistantships. More information is available on the Graduate College website (http://www.grad.illinois.edu/fellowship/finaid/).

Admissions
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Russian, East European, and Eurasian Studies, MA

for the degree of Master of Arts in Russian, East European, and Eurasian Studies

About the Major

Electives outside Russian, East European, and Eurasian Studies should complement the student's core courses, research, and professional interests. A master's thesis or major research paper is required, to be based on research using primary sources, including sources in the language used to meet the competency requirement.

Admission

Prospective graduate students should have completed at least two years of Russian or another language of Eastern Europe or Eurasia. Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, Graduate Record Examination (GRE) scores (verbal, quantitative, and written), three letters of reference, and a writing sample. International students must submit Test of English as a Foreign Language (TOEFL) scores. All applicants must meet the requirements of the Graduate College. Admission is ordinarily in the fall semester, but occasional exceptions are made for spring and summer admission.

Faculty Research Interests

The faculty (https://reeec.illinois.edu/people/groups/faculty/) affiliated with the Center represent a broad range of interests and methodological approaches in the social sciences and the humanities, as well as the professional schools.

Facilities and Resources

The Russian, East European, and Eurasian Center was founded in 1959 and designated a National Resource Center by the U.S. Department of Education. It serves as an intellectual and institutional hub for the University community and the public through conferences, lectures, colloquia, visiting scholars, study groups, exhibits, films, and other activities.

The annual Summer Research Laboratory on Russia, Eastern Europe, and Eurasia features special workshops, seminars, lectures, films, and other events, most of which are free and open to the public.

The International and Area Studies Library (https://www.library.illinois.edu/ias/) at the University of Illinois has one of the country's three outstanding Slavic library collections (https://www.library.illinois.edu/ias/spx/). The Slavic Reference Service (https://www.library.illinois.edu/ias/spx/srs/) serves all faculty and students with expert bibliographers.

Language training is provided by the Departments of Germanic Languages & Literatures (https://germanic.illinois.edu/), Linguistics (https://linguistics.illinois.edu/), and Slavic Languages & Literatures (https://slavic.illinois.edu/) in:

- Bulgarian
- Bosnian, Croatian, Serbian
- Czech
- Old Church Slavonic
- Polish
- Russian
- Turkish
- Ukrainian
- Yiddish

Financial Aid

Financial aid is awarded on an academic-year basis. All fellowships and assistantships include a stipend plus tuition and fee waiver. Qualified incoming students who are U.S. citizens or permanent residents should also apply for U.S. Department of Education Title VI Foreign Language and Area Studies (FLAS) fellowships (http://publish.illinois.edu/illinoisflas/) offered through REEEC or other FLAS-granting campus centers.

Qualified students may also be eligible for other fellowships at the campus or departmental level. A limited number of teaching and graduate assistantships, which include a tuition and fee waiver, may also be available to outstanding students through REEEC and other units. The Graduate

College maintains a list of available assistantships (https://grad.illinois.edu/clearinghouse/); additional information on need-based financial aid may be obtained from the Graduate College Fellowships Office (https://grad.illinois.edu/fellowships/about/).

for the degree of Master of Arts in Russian, East European, and Eurasian Studies

---

Electives outside Russian, East European, and Eurasian Studies should complement the student's core courses, research, and professional interests. A master's thesis or major research paper is required, to be based on research using primary sources, including sources in the language used to meet the competency requirement.

For additional details and requirements refer to the department's Graduate Programs (https://reeec.illinois.edu/academics/ma-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Arts in Russian, East European, and Eurasian Studies

---

The Master of Arts in Russian, East European, and Eurasian Studies (REEES) is a two-year program designed to prepare students for further academic study in a particular discipline or for careers in government, NGOs, business, the media, international law, private foundations, or cultural exchanges. The program provides broad exposure to the history, cultures, societies, and politics of the area as well as to the variety of disciplinary and interdisciplinary approaches to its study. For individuals planning non-academic careers, such study is essential in preparing to respond to the growing opportunities and challenges presented by this region. The program also provides students pursuing academic careers with necessary language skills, disciplinary exploration, and an expanded knowledge base about the REEE region.

By the end of our program, students will have:

1. An advanced understanding of the REEE region achieved through analyzing original scholarship and primary sources (or data) from Russia, East Europe, and Eurasia.
2. An interdisciplinary perspective on the REEES field achieved through required coursework in at least three disciplines, together with exposure to pertinent approaches, paradigms, forms of data and their interpretation, and regional issues and content.
3. An ability to begin to engage with REEES scholarship, cultures, and communities by achieving an intermediate-high proficiency (third-year competency)in at least one regional language.
4. Advanced research skills developed through expert rigorous regional bibliographic and research training.
5. Essential analytical writing skills developed through the production of a thesis or other extensive original research work mentored by a faculty expert.

Graduate Degree Programs in Russian, East European, and Eurasian Studies

The Russian, East European, and Eurasian Center offers a two-year program of language and area studies courses leading to an interdisciplinary Master of Arts degree. The program is designed to meet the needs of students proceeding to disciplinary-based doctoral work and those planning non-academic professional careers with area expertise. Programs offered by the Center:

- Russian, East European, and Eurasian Studies, MA (p. 1848)
- Russian, East European, and Eurasian Studies Minor (p. 2172)
- Balkan Studies Minor (p. 2135)
- Joint Degree in Russian, East European, & Eurasian Studies, MA and Library & Information Science, MS (p. 2228)

Admissions
Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Secondary Education, EdM

for the degree of Master of Education in Secondary Education with teaching licensure

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master's degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master's students wishing to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master's degree candidates who do not wish to become teachers, or who are already teachers, should apply to the major in Curriculum and Instruction.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program. Note: The master's with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction's TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test, and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score or evidence of spoken English language proficiency. Contact your proposed program of study office (http://www.grad.illinois.edu/admissions/depts/) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook English Proficiency Requirement for Admission (http://www.grad.illinois.edu/admissions/instructions/04c/).

Faculty Research Interests

For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

Facilities and Resources

Departmental resources consist of cooperation with Children's Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: *International Journal of Education & the Arts, Journal of Curriculum Studies*, and *American Educational Research Journal.* The department also has available resources and some workshops provided during the academic year. Program areas (including CREATE, DELTA, Language & Literacy, and MSE) offer discipline-specific resources.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on university resources can be found at the GradMAP pages website (http://www.grad.illinois.edu/current-students/).

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). **Please note: Graduate students employed as Staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Award or Scholarship.**

for the degree of Master of Education in Secondary Education with teaching licensure

Students interested in receiving licensure choose a concentration in English, Mathematics, Science, or Social Science: History.

Concentration/licensure requirements are separate from degree requirements, although they may count toward the degree as well.

Students may also select a concentration in Bilingual-Bicultural Education (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/) or Digital Learning (http://catalog.illinois.edu/graduate/education/concentration/digital-learning/).

Additional requirements can be found on the program's website, (https://education.illinois.edu/ci/programs-degrees/secondary-education-with-licensure/) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Science: Biology

Code	Title	Hours
A major in Biology or 32 semester hours in the sciences is required. In either instance, it must include coursework from the following:		
One year (2 semesters) introductory Biology		
Two advanced courses in biology or related fields, including one laboratory		
One course in Calculus		
Two courses in Chemistry		

One course in Physics	
One course in Earth Science	
One course in Astronomy	

Science: Chemistry

Code	Title	Hours
A major in Chemistry or 32 semester hours in the sciences is required. In either instance, it must include coursework from the following:		
one year (two semesters) of introductory college chemistry		
two courses in organic chemistry, including lab		
one course in analytical chemistry, including quantative analysis		
one course in physical chemistry		
one course in biochemistry or inorganic chemistry		
Related required coursework:		
two courses in calculus		
two courses in physics		
one course in biological science		
one course in earth science		
one course in astronomy		

Science: Earth and Space Science

Code	Title	Hours
A major in earth & space science or 32 semester hours in the sciences is required. Either option must include coursework from the following:		
One course in astronomy		
One course in atmospheric science or meteorology		
One year of introductory geology, including physical and historical (GEOL 107 and GEOL 208)		
One introductory course in history of life (GEOL 143) OR advanced course in paleontology		
One course in earth materials (GEOL 333 or GEOL 432) OR mineralogy & petrology (GEOL 436)		
One course in sedimentary geology (GEOL 440) OR sedimentology		
One course in structural geology (GEOL 411)		
Additional Science Required:		
One course in biology		
One course in calculus		
One course in chemistry		
One course in physics		

Science: Physics

Code	Title	Hours
A major in Physics or 32 semester hours in the sciences is required. In either instance, the coursework must include the following:		
One year introductory physics sequences similar to UIUC PHYS 211, PHYS 212, PHYS 213, PHYS 214 (this includes study in electricity and magnetism, mechanics, thermal, and quantum physics)		
Advanced course in classical mechanics		
Advanced course in electricity and magnetism		
Advanced course in quantum physics		
One course in advanced physics laboratory		
Related required coursework		
Two courses in calculus		
One course in chemistry, including lab		
At least one biological science course		
One course in earth science		
One course in astronomy

Admissions

College of Education Overview of Admissions & Requirements (https://education.illinois.edu/programs/grad/how-to-apply/?url=/programs/grad)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Slavic Languages & Literatures, MA

for the degree of Master of Arts in Slavic Languages & Literatures

Admission

Prospective graduate students of Slavic languages and literatures should have had the equivalent of at least three years of college study in the language of their proposed specialization and advanced coursework in that literature. Applicants should apply online (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/admissions/apply/) and submit a statement of purpose, three letters of recommendation and a writing sample. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are no longer required. If opting to submit the score, the applicant should ask the ETS to submit scores to institution 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/Admissions/instructions/04c/).

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is expected as part of the academic work of all Ph.D. candidates in this program. Non-native English speakers must first pass a test of their oral English ability (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/admissions/taengprof.htm).

Faculty Research Interests

The faculty represent a broad range of interests and methodological approaches, including:

- the intersections of literature and law, race and empire studies, and medicine
- Jewish Studies
- gender, sexuality, and the body
- Stalinist culture
- film history and theory
- Ukrainian, Russian, and Jewish modernism
- Czech revival culture
- nationalism and literature
- Polish modernism, postmodernism, and visual culture
- exilic and emigre literature
- East European pop culture
- former Yugoslavia and the Third world

Graduate courses are offered in:

- Russian
- Polish
- Ukrainian
- Bosnian/Serbian/Croatian
- Yiddish
- Czech
- Bulgarian

Facilities and Resources

The University of Illinois Urbana-Champaign has one of the country's three outstanding Slavic library collections (http://www.library.illinois.edu/spx/). The Illinois Summer Research Laboratory on Russia and Eastern Europe brings to the campus more than one hundred postdoctoral researchers from

all over the country every year to take advantage of the Slavic library resources. The University houses *Slavic Review*, the premier journal in Slavic studies.

There are also opportunities for part-time related work in the Slavic and East European Division of the University Library, *Slavic Review,* and elsewhere on campus.

Centers, Programs and Institutes

The federally-funded Russian, East European, and Eurasian Center (http://www.reeec.illinois.edu/) (established in 1959) is an important funding source for our graduate students and hosts a variety of conferences and speakers every year.

Financial Aid

Students may receive various forms of financial assistance, including university fellowships, Foreign Language and Area Studies (FLAS) Fellowships, teaching assistantships, and research assistantships. There are also opportunities for part-time related work in the Slavic and East European Division of the University Library and elsewhere on the campus, including editorial assistantships with *Slavic Review*. Most students are awarded multiple-year support packages that include a mixture of teaching and fellowship, conditional on satisfactory progress through the program.

for the degree of Master of Arts in Slavic Languages & Literatures

---

In addition to fulfilling the requirements of the Graduate College, candidates must pass written examinations, which are largely based on survey courses in the respective fields. All students must complete 32 graduate hours of advanced courses including at least 20 in Slavic Languages and Literatures. No master's thesis is required.

For additional details and requirements refer to the department's Graduate Programs Webpages (https://slavic.illinois.edu/academics/slavic-graduate-studies/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Arts in Slavic Languages & Literatures

---

1. Students will be capable of theoretically informed analytical engagement with the literature of their specialization (nineteenth-, twentieth-, and twenty-first-century Slavic literatures and cultures).
2. Students will be familiar with contemporary literary-historical and theoretical research methods in Slavic studies and able to produce major research output.
3. Students will advance in proficiency in the language of their major fields to the Superior level, enabling professional work in the language. Students will acquire some proficiency in a second relevant regional language.
4. Students will be introduced to current literature and language teaching methodologies and gain practical mentored experience in both.

5. Students will be savvy professionals, able to produce successful grant applications, negotiate in the job market, at professional conferences, and confidently pursue publication.

Most students are awarded multiple-year support packages that include a mixture of teaching and fellowship, conditional on satisfactory progress through the program.

for the degree of Doctor of Philosophy in Slavic Languages & Literatures

---

All candidates for the Ph.D. degree must fulfill the general requirements of the Graduate College and must have a reading knowledge of at least one non-Slavic, research related language, most often French or German. A student entering the program with a Master of Arts degree from another department or university must complete SLAV 576. In consultation with the graduate advisor, the Ph.D. student designs an individualized program of study that includes a major field in one Slavic-area literature (any national literature currently offered by the department), study in a second Slavic-area language, and a minor field. A Ph.D. preliminary examination, consisting of written and oral portions on both major and minor fields, is required. A thesis is required for the degree of Doctor of Philosophy.

For additional details and requirements refer to the department's Graduate Programs Webpages (https://slavic.illinois.edu/academics/slavic-graduate-studies/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Entering with approved M.S./M.A. degree

Students are admitted to the Ph.D. program after the successful completion of an M.S/M.A. degree in Slavic studies or a related field.

Code	Title	Hours

Social Work, MSW

for the degree of Master of Social Work in Social Work (on campus and online)

The MSW program is accredited by the Council on Social Work Education (CSWE). The MSW program offers courses on campus and online. (p. 1877)

The master's degree provides specialized study for advanced social work practice. Students take foundation and advanced courses in social work practice methods with individuals, families and organization, in policy and services, in research, and in human behavior and the social environment. Students are required to complete a one to two semester field placement/internship (minimum 900 hours) in an approved setting. A total of 44 -72 hours of graduate coursework is required for the M.S.W. degree. The determination of the number of hours needed within the range is determined on a case-by-case basis after considering each student's prior education, coursework and experience. The curriculum may be completed in 16 to 18 months of full-time study.

MSW students choose from one of these two concentrations:

- In the **Advanced Clinical Practice concentration**, students prepare for clinical practice with individuals, families and groups, and in one of the focus areas. These students' Methods coursework has a clinical focus.
- Students in the **Leadership & Social Change (LSC) concentration** prepare for advanced macro practice which focuses on work with communities and organizations rather than work with individuals and families. In the LSC concentration students are prepared to work in either leadership/ administration or advocacy/policy. Methods coursework for this concentration has a Macro focus.

Admission

MSW program applicants must meet the following minimum requirements:

1. a baccalaureate degree from an accredited college or university in the United States or from a recognized institution of higher learning abroad;
2. a grade point average of 3.0 (A = 4.0) or greater for the last 60 semester hours of undergraduate work;
3. 20 hours of completed coursework in a liberal arts core consisting of social and behavioral sciences, the humanities, and biological sciences
4. evidence of personal attributes that are suitable for the profession of social work;
5. a score of 103 or above on the TOEFL test;
6. provision of a written supplementary statement.

Advanced Standing MSW applicants who meet all above requirements who have earned a Bachelor of Social Work (BSW) degree from a CSWE-accredited program in the past seven years are considered for admission into the Advanced Standing MSW program. This is a three semester/44 hour program that may be completed in 12 months by most students.

for the degree of Master of Social Work in Social Work (on campus or online)

Students pursuing the Master of Social Work must apply to and complete a graduate concentration. The concentration selected determines the courses needed to fulfill the requirements below. Select a concentration in:

- Advanced Clinical Practice (p. 1870), or
- Leadership & Social Change (p. 1874) (LSC)

This program is available on campus or online.

The requirements below for the Master of Social Work will be met by choosing one of these graduate concentrations:
Advanced Clinical Practice (p. 1870), or
Leadership & Social Change (p. 1873) (LSC)

Advanced Student Learning Competencies

1. Demonstrate ethical and professional behavior. Students will demonstrate the ability to:
   a. Develop a self-awareness of ethical standards of practice, and identify situations in which personal values, legal standards, and professional expectations may conflict.
   b. Understand the principles identified in the NASW Code of Ethics such as: limiting practice to personal areas of competence, boundaries of sharing or withholding confidential information, and resolving ethical dilemmas arising from value conflicts.
2. Engage diversity and difference in practice. Students will demonstrate the ability to:
   a. Understand the importance of diversity and diverse perspectives on the development and impact of social policies and programs.
   b. Communicate the importance of diversity and diverse perspectives when conducting social change interventions, whether through advocacy, policy development, or leadership in social service agencies.
   c. Engage diverse populations in advocacy, organizational management, policy development, and coalition building.
3. Advance human rights and social, economic, and environmental justice. Students will demonstrate the ability to:
   a. Understand key rights and responsibilities embodied in the United Nations Universal Declaration of Human Rights, the United Nations Sustainable Development Goals, and the U.S. Constitution, and related documents that advocate for social, economic, and environmental justice.
   b. Apply social, economic, and environmental justice principles to the analysis and development of policies and programs.
4. Engage in practice-informed research and research-informed practice. Students will demonstrate the ability to:
   a. Assess and utilize research evidence and effective practice approaches related to social policy, administration, and advocacy.
   b. Apply needs assessments and other data in the conduct of policy analysis, community development, and program development.
   c. Be able to conduct social program evaluation studies and interpret findings to enhance both service delivery processes and service outcomes.
5. Engage in policy practice. Students will demonstrate the ability to:
   a. Understand leading societal trends that shape the agendas of governmental officials and others involved in policy development.
   b. Be able to critically assess legislative, regulatory, and judicial communications related to social policies.
   c. Develop skills in writing brief communications and longer reports on behalf of policy positions.
6. Engage with individuals, families, groups, organizations, and communities. Students will demonstrate the ability to:

a. Develop skills required to organize campaigns, build linkages, and develop coalitions with other stakeholders on behalf of social change efforts.
b. Use empathy, reflection and interpersonal communication skills to effectively engage diverse constituencies in advocacy, policy development, and leadership.

7. Assess individuals, families, groups, organizations, and communities. Students will demonstrate the ability to:
   a. Conduct needs assessments to inform policy advocacy and/or program development that address social needs of a group or community.
   b. Identify assessment strategies for improving supervisory and/or organizational effectiveness.
   c. Be able to assess the interests of various stakeholders needed to influence, policy, programs, and social change.
8. Intervene with individuals, families, groups, organizations, and communities. Students will demonstrate the ability to:
   a. Understand leadership strategies for effecting social change, whether through advocacy, policy development, or leadership strategies to affect social change.
   b. Develop entrepreneurial approaches to addressing social service needs of oppressed and marginalized groups.
   c. Demonstrate grant writing skills for accessing resources that support social change and program improvement.
9. Evaluate Practice with Individuals, Families, Groups, Organizations, and Communities
   a. Critically evaluate the effectiveness and impact of organizational management, human service programs, community development, social welfare policy, and/or social change interventions.
   b. Disseminate results of evaluation or research (such as written reports or presentations) in order to improve programs and influence policy.

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Social Work: Leadership & Social Change, MSW

for the degree of Master of Social Work in Social Work, Leadership & Social Change Concentration (on campus and online)

The Leadership and Social Change (LSC) concentration prepares social work students to further their careers by developing advanced skills in macro practice. Since the social work profession has a long tradition of working towards improving conditions of disadvantaged populations through advocacy efforts with political officials and others, this concentration will prepare students for macro-level advanced practice. These skills can lead to positions, such as, policy advocate, program director, executive director, political strategist, supervisor, administrator, public service leader, strategic planner, or consultant.

The MSW program is accredited by the Council on Social Work Education (CSWE). The MSW program offers courses on campus and online.

The master's degree provides specialized study for advanced social work practice. Students take foundation and advanced courses in social work practice methods with individuals, families and organization, in policy and services, in research, and in human behavior and the social environment.

Students are required to complete a one to two semester field placement/internship (minimum 900 hours) in an approved setting. A total of 44 -72 hours of graduate coursework is required for the M.S.W. degree. The determination of the number of hours needed within the range is determined on a case-by-case basis after considering each student's prior education, coursework and experience. The curriculum may be completed in 16 to 18 months of full-time study.

MSW students choose from one of these two concentrations:

- In the **Advanced Clinical Practice concentration**, students prepare for clinical practice with individuals, families and groups, and in one of the focus areas. These students' Methods coursework has a clinical focus.
- Students in the **Leadership & Social Change (LSC) concentration** prepare for advanced macro practice which focuses on work with communities and organizations rather than work with individuals and families. In the LSC concentration students are prepared to work in either leadership/ administration or advocacy/policy. Methods coursework for this concentration has a Macro focus.

Admission

MSW program applicants must meet the following minimum requirements:

1. a baccalaureate degree from an accredited college or university in the United States or from a recognized institution of higher learning abroad;
2. a grade point average of 3.0 (A = 4.0) or greater for the last 60 semester hours of undergraduate work;
3. 20 hours of completed coursework in a liberal arts core consisting of social and behavioral sciences, the humanities, and biological sciences
4. evidence of personal attributes that are suitable for the profession of social work;
5. a score of 103 or above on the TOEFL test;
6. provision of a written supplementary statement.

Advanced Standing MSW applicants who meet all above requirements who have earned a Bachelor of Social Work (BSW) degree from a CSWE-accredited program in the past seven years are considered for admission into the Advanced Standing MSW program. This is a three semester/44 hour program that may be completed in 12 months by most students.

Social Work, PhD

for the degree of Doctor of Philosophy in Social Work

The Ph.D. program is typically a 64 graduate hour program for students who enter with an MSW or other master's degree. The program is interdisciplinary and has a strong research emphasis. The Ph.D. program is organized around five curricular components: (1) seminars in social welfare policy, social work practice theories, and teaching; (2) research methodology and statistics; (3) an interdisciplinary area of study; (4) a qualifying exam; and (5) the dissertation. While the curriculum focuses on issues of relevance to social work and social welfare policy, students select courses not just in the School of Social Work but also from the full range of graduate courses offered, for example: educational psychology, human and community development, sociology, labor and industrial relations, psychology and anthropology. Candidates prepare for teaching, research, policy analysis, and leadership in social services.

Admission

Ph.D. program applicants must meet the following minimum requirements:

1. a master degree in social work or in related disciplines;
2. demonstrating a potential for research and other scholarly work;
3. aptitude for leadership in the field of social work

for the degree of Doctor of Philosophy in Social Work

For additional details and requirements refer to the department's Graduate Handbook (http://socialwork.illinois.edu/academics/doctoral-program-ph-d/degree-and-course-requirements/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Doctor of Philosophy in Social Work

1. Obtain knowledge of Social Work as a profession and discipline
    a. Graduates will be able to:
        i. Locate their work in the intellectual landscape of social work.
        ii. Understand the relations among social work education, research, and practice.
        iii. Understand how knowledge in social work is relevant to public issues, including promoting social justice and increasing equity.
        iv. Understand the role and importance of social work values and ethics in research and knowledge development.
        v. Develop expertise in at least one specialized area of knowledge.
2. Develop Core Quantitative and Qualitative Research Skills
    a. Graduates will be able to:
        i. Conceptualize significant, meaningful, and relevant social work research questions.
        ii. Understand both the technical aspects and conceptual underpinnings of a broad range of methodological and statistical techniques.
        iii. Demonstrate in-depth knowledge in the selection and application of the most rigorous, feasible, and appropriate methodological and data analyses for the research question(s) posed.
        iv. Design and implement appropriate procedures for sampling and data collection.
3. Engage in academic scholarship
    a. Graduates will be able to:
        i. Critically evaluate and review published work in students' areas of expertise.
        ii. Identify the strengths and limitations of their own research.
        iii. Conduct research that is guided by theory.
        iv. Proactively and consistently implementing plans for the responsible and ethical conduct of research.
        v. Widely disseminate knowledge that contributes to the advancement of social work research, practice, and policy, including writing publishable, peer-reviewed manuscripts; presenting at local, national and international conferences; and producing policy briefs /white papers.
4. Develop Teaching Skills
    a. Graduates will be able to:
        i. Understand and apply theories of adult learning.
        ii. Design and teach a course in a social work curriculum.
        iii. Create a learning culture and classroom climate that is inclusive of a diverse population of students and diverse learning styles.
        iv. Address ethical dilemmas that might arise in teaching.
        v. Understand the place of social work education within the larger context of higher education.
5. Develop analytical skills to critically assess social policy and social science theories
    a. Graduates will be able to:
        i. Critically analyze paradigms and methods for social work knowledge building.
        ii. Evaluate representative theories for and studies of social work practice.
        iii. Understand the current research on practice effectiveness and methods for integrating research and practice.
        iv. Understand theoretical approaches to analyzing social policy development and implementation.
        v. Understand selected theories and models that have been influential in the substantive development of broad-scale social policies and programs.
        vi. Develop skills in empirically assessing policy issues and trends.

Admissions

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Sociology, MA

for the degree of Master of Arts in Sociology

The master's degree is granted as an intermediate step on the way to the Ph.D. Students should ordinarily complete the requirements during their second year of residence.

Admission

The Graduate College admission requirements apply. Students applying for admission should have a background in one of the social sciences, preferably sociology. Applicants must submit Graduate Record Examination (GRE) scores on the tests of verbal ability, quantitative ability, and analytical ability. The advanced test in sociology is optional. A writing sample is required. Non-native English speakers must also submit Teaching of English as a Foreign Language (TOEFL) scores and the Test of Spoken English (TSE) scores. The department does not accept applications to the M.A. program.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial support is provided for most graduate students through teaching assistantships, research assistantships, tuition and fee waivers, fellowships, and other university and external financial support.

for the degree of Master of Arts in Sociology

For additional details and requirements refer to the department's graduate handbook (http://www.sociology.illinois.edu/grad/current/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
SOC 510	Professionalization Seminar (2 semesters)	4
SOC 500	Classical Sociological Theory	4
or SOC 501	Contemp Sociological Theory	
SOC 485	(or equivalent)	4
Select one of the following:		4
SOC 583	Qualitative Research Methods	
SOC 590	Individual Topics in Sociology	
Six additional courses at 400 or 500 level (at least 4 in SOC and 4 at the 500 level)		24
Total Hours		**40**

Other Requirements

Requirement	Description
Other requirements may overlap	
At least two semesters in residence and 5 UIUC courses minimum are required.	
A Master's paper is required.

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Sociology, PhD

for the degree of Doctor of Philosophy in Sociology

The graduate program is small and cohesive with a high faculty-student ratio. All students are required to take a small core of required courses in theory and methods. Each term that students are in residence, they participate in at least one of a series of professional development workshops. Doctoral candidates must pass specialty examinations and write and defend a dissertation proposal and final dissertation.

Admission
The Graduate College admission requirements apply. Students applying for admission should have a background in one of the social sciences, preferably sociology. Applicants must submit Graduate Record Examination (GRE) scores on the tests of verbal ability, quantitative ability, and analytical ability. The advanced test in sociology is optional. Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

South Asian & Middle Eastern Studies, MA

for the degree of Master of Arts in South Asian & Middle Eastern Studies

The Center for South Asian and Middle Eastern Studies (http://catalog.illinois.edu/graduate/las/south-asian-middle-eastern-studies-ma/www.csames.illinois.edu/program/ma/) offers an MA in South Asian Studies and an MA in Middle Eastern Studies. The MA program provides preparation in language and area studies for students intending either to pursue a Ph.D. in a related field or to enter a career requiring language and regional expertise, such as in government, an NGO, business, media, international law, private foundations, or cultural exchanges.

Admission

Applicants to the graduate program must submit an application for admission online (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/admissions/apply/) and submit a statement of purpose, three letters of reference completed by teachers, advisers, or recent employers, and a 10-20 page writing sample. Also required are original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed. Applicants are expected to have a strong background in at least one South Asian or Middle Eastern language; normally, this means a minimum of two years of formal study. Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 103 on the internet-based test (iBT) for admission with full standing; they must also pass the speaking sub-section of the iBT with a minimum score of 24 (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/Admissions/instructions/04c/). Applicants must have a BA or a BS degree to apply to the MA program. Applications are accepted for fall admission only.

Financial Aid

The Center makes every effort to assist graduate students in securing financial aid. Financial aid packages usually combine some form of fellowship support with teaching or research assistantships in a manner that allows for both teaching experience and timely completion of the degree. Financial aid may include: University Fellowships, Foreign Language and Area Studies (FLAS) Fellowships (http://catalog.illinois.edu/graduate/las/south-asian-middle-eastern-studies-ma/www.flas.illinois.edu/), Minority Academic Partnership Plan (MAPP) Fellowships, teaching assistantships, and research assistantships. All awards of financial aid are made following competitive application.

for the degree of Master of Arts in South Asian & Middle Eastern Studies

For additional details and requirements refer to the department's Graduate Programs (http://www.csames.illinois.edu/program/ma/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Three 500-level courses in the major field in area related courses		12
Elective hours (For a list of approved courses, see the SAME Master's Program course list) (https://csames.illinois.edu/academics/masters-program/masters-program-courses/)		20
Language Requirement: Third-year competency in South Asian or Middle Eastern language, demonstrated by satisfactory completion of appropriate coursework or by proficiency examination.		0
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall:	12
In their final semester, candidates take a comprehensive written exam and make an oral defense.	
Minimum GPA:	3.25

for the degree of Master of Arts in South Asian & Middle Eastern Studies

1. Interdisciplinary knowledge of South Asian (SA) or Middle Eastern (ME) area studies in terms of the cultures and societies of these regions in a broader international and global context

   a. Students should have a good understanding of the various historical, cultural, social, economic and political conditions that shaped the development of SA or ME region
   b. Students should be able to place their knowledge of SA or ME studies in a broader world context and from a multidisciplinary perspective.
2. Proficiency in SA or ME languages and knowledge of research methodologies
   a. Students should develop appropriate expertise in a region or country in SA or ME, acquire proficiency in a relevant language of that region or country, and equip themselves with a good understanding of the appropriate research tools to study that region/country.
3. Although international experience is not a requirement for the MA program, experience through study abroad is an integral part of the graduate experience, especially when fellowship opportunities for SA and ME language study are available. Students should demonstrate commitment to conduct fieldwork when opportunities for study abroad are available.
4. Students should demonstrate adequate research skills at MA level. Currently, this is tested through term papers and an MA Exam. We are in the process of replacing the Exam with a thesis or two research papers. Completion of such requirements, as well as courses that require research papers and participation in conferences are good indications that the student has acquired good research skills.

Spanish, MA

for the degree of Master of Arts in Spanish

The Department of Spanish and Portuguese offers work leading to the Master of Arts and Doctor of Philosophy in Spanish and Portuguese, and to a Concentration in Second Language Acquisition and Teacher Education (SLATE).

Fields of specialization are:

- Spanish linguistics
- Romance linguistics
- Spanish literature and cultural studies
- Latin American literature and cultural studies
- Brazilian Studies
- Luso-Brazilian literature and cultural studies

A graduate course in Catalan literature is also available. Additionally, the department is affiliated with the Latina/Latino Studies Program. Students in the area of Latina/Latino studies may be able to work with experts in the other disciplines in Latina/Latino studies such as anthropology, history, political science, sociology, and so forth in order to design and complete a program of studies in a particular area.

Admission
The normal prerequisite for a graduate major is an undergraduate major in the corresponding Romance language or consent of the department. Students doing graduate work for any advanced degree in Spanish or Portuguese must possess a command of the language. Applicants should apply online (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/admissions/apply/) and submit a statement of purpose, three letters of recommendation and a writing sample of approximately 10-20 pages in the form of one or two papers, at least one of which must be written in Spanish or Portuguese (as applicable). Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are recommended (although not required) of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 88 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/Admissions/instructions/04c/). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Centers, Programs, and Institutes
The option to pursue a concentration in SLATE (Second Language Acquisition and Teacher Education) is available to doctoral students in the department's programs in linguistics. Candidates selecting this option are required to complete courses in linguistics, psycholinguistics/sociolinguistics, second language studies, and research methodology in addition to advanced study in linguistics of the particular language. See information about SLATE (http://catalog.illinois.edu/graduate/las/spanish-phd/www.slate.illinois.edu).

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, this department requires degree candidates to teach as part of their academic work. Such experience is considered a vital part of the graduate program. Non-native English speakers must first pass a test of their oral English ability (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/admissions/taengprof.htm).

Financial Aid
The department offers financial aid (in the form of fellowships, teaching assistantships, and research assistantships) to all of the students it admits. Other kinds of fellowships and research support are also available on a competitive basis to qualified candidates; they include dissertation research and travel grants, conference travel grants, and summer fellowships.

Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

for the degree of Master of Arts in Spanish, Spanish Literatures & Cultures Concentration

1. Possess broad knowledge of a set of representative literary texts from all genres, different historical periods, and the different geographical contexts corresponding to the three major populations (Spain, U.S. Latino/a, Latin America) as it pertains to cultural production.
2. Possess general knowledge of critical theory and the ability to engage in the analysis of written, oral or visual texts; understand the writing and research tools of their particular disciplines including discriminate use of bibliographic sources and mechanics of style for research papers.
3. Be able to identify, analyze and discuss a text's formal configuration (e.g., tropes, rhetorical strategies, genres) as well as its historical context.
4. Students will acquire ability to communicate research findings in a variety of academic venues in spoken and written English and in Spanish.
5. Students will acquire knowledge of teaching methodologies and will be able to teach at the undergraduate level.

Admissions
Overview of Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Spanish, PhD

for the degree of Doctor of Philosophy in Spanish

The Department of Spanish and Portuguese offers work leading to the Master of Arts and Doctor of Philosophy in Spanish and Portuguese, and to a Concentration in Second Language Acquisition and Teacher Education (SLATE).

Fields of specialization are:

- Spanish linguistics
- Romance linguistics
- Spanish literature and cultural studies
- Latin American literature and cultural studies
- Brazilian Studies
- Luso-Brazilian literature and cultural studies

Additionally, the department is affiliated with the Latina/Latino Studies Program. Students in the area of Latina/Latino studies may be able to work with experts in the other disciplines in Latina/Latino studies such as anthropology, history, political science, sociology, and so forth in order to design and complete a program of studies in a particular area.

Admission

The normal prerequisite for a graduate major is an undergraduate major in the corresponding Romance language or consent of the department. Students doing graduate work for any advanced degree in Spanish or Portuguese must possess a command of the language. Applicants should apply online (https://www.grad.illinois.edu/admissions/apply-now/) and submit a statement of purpose, three letters of recommendation and a writing sample of approximately 10-20 pages in the form of one or two papers, at least one of which must be written in Spanish or Portuguese (as applicable). Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are recommended (although not required) of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 88 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (https://www.grad.illinois.edu/admissions/international-applicants/). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Centers, Programs, and Institutes

The option to pursue a concentration in SLATE (Second Language Acquisition and Teacher Education) is available to doctoral students in the department's programs in linguistics. Candidates selecting this option are required to complete courses in linguistics, psycholinguistics/sociolinguistics, second language studies, and research methodology in addition to advanced study in linguistics of the particular language. See information about SLATE (https://slate.illinois.edu/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, this department requires degree candidates to teach as part of their academic work. Such experience is considered a vital part of the graduate program. Non-native English speakers must first pass a test of their oral English ability (https://www.grad.illinois.edu/admissions/international-applicants/#english-proficiency-for-teaching-assistants).

Financial Aid

The department offers financial aid (in the form of fellowships, teaching assistantships, and research assistantships) to all of the students it admits. Other kinds of fellowships and research support are also available on a competitive basis to qualified candidates; they include dissertation research and travel grants, conference travel grants, and summer fellowships.

for the degree of Doctor of Philosophy in Spanish

For additional details and requirements refer to the department's guidelines for graduate students (http://www.spanport.illinois.edu/graduate/guidelines/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Special Education, EdM

for the degree of Master of Education in Special Education

The Department of Special Education offers several master's program areas of emphasis and licensure: Infancy and Early Childhood Special Education, Learning and Behavior Specialist I (LBS-I), and Learning and Behavior Specialist II (LBS-II).

- LBS-I prepares teachers for their initial teaching licensure.
- LBS-II is available for practicing teachers and other professionals interested in graduate studies to develop more specialized expertise and receive an endorsement as a "multiple disabilities specialist."
- ECSE is available for practicing teachers and other professionals interested in graduate studies to develop more specialized expertise. There is also a program option that allows students to receive licensure in early childhood education and a letter of approval in ECSE.
- Several of these programs can be completed on a full or part-time basis. In most cases, full-time students take two years to complete their program of studies.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation.

A 3.0 grade point average (A = 4.0) for the last two years of the undergraduate program and for any previous graduate work is a minimum requirement for admission.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Off-Campus Program

The Department of Special Education offers master's degree programs off-campus in coordination with federal personnel preparation grant awards. For information on currently available off-campus programs, please visit the Department's website (https://education.illinois.edu/sped/).

Licensure

The Council on Teacher Education (http://cote.illinois.edu/) functions as the all-University governance system for licensure. Graduate students who wish to qualify for the Council's recommendation for a teaching license must complete the appropriate graduate program. The Department of Special Education offers graduate-level licensure/endorsement programs in Learning and Behavior Specialist I (LBS-I) and Learning and Behavior Specialist II (LBS-II). Early Childhood Special Education (ECSE) master's degree students who already hold a Professional Educator License who went through an early childhood approved program qualify for the Illinois ECSE approval. Additionally, there is a program option that allows ECSE master's students to receive licensure in early childhood education and a letter of approval in ECSE.

Faculty Research Interests

The Department of Special Education faculty have a variety of research interests. To learn more about our faculty's research areas, current grants, and recent publications, please visit our Special Education | Illinois (https://education.illinois.edu/sped/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Facilities and Resources

The College of Education & the Department of Special Education has many resources to assist graduate students through their academic career. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

for the degree of Master of Education in Special Education

The Department of Special Education offers many programs leading to the degree of Master of Education (Ed.M.). A list of programs and additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search/programs/?degree=edm&department=sped) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education (p. 1998) or Digital Learning (p. 2011).

for the degree of Master of Education in Special Education

All students who complete a master's degree in the Department of Special Education will:

1. Students who complete a master's degree resulting in teacher certification (e.g., LBS I or LBS II) or endorsement/credential (ECSE/EI) will demonstrate the acquisition of the knowledge and skills required to be competent novice special education teachers by meeting the indicators addressed in several sets of standards. These indicators are embedded in coursework, field-based activities, and other related professional experiences.
2. Graduate students who complete the LBS II Multiple Disabilities or ECSE course sequence will demonstrate expertise and leadership in their respective areas of specialization by engaging in: a) collaborative leadership activities, b) mentoring other educators, c) practicing effective communication skills, d) acting as change agents, and e) advocating for learners with disabilities.
3. Graduate students will expand and deepen their attitudes, knowledge and skills about evidence-based practices that result in improved learning and successful outcomes for students with disabilities.
4. Graduate students will acquire the knowledge and skills to understand multiple research methodologies and how research is used to inform instructional practices with persons with disabilities by engaging in a capstone research project.
5. Graduate students will become reflective practitioners who problem solve and change their practice to improve services provided to individuals with disabilities and their families.

Special Education, PhD

for the degree of Doctor of Philosophy in Special Education

The Doctor of Philosophy (Ph.D.) degree is a research-focused degree and is tailored to the individual. Doctoral students work closely with their advisors to develop an integrated course of study reflecting their goals in the area of special education. All doctoral students must be involved in research, and typically have opportunities to also engage in university teaching and service to the field of special education. Doctoral students typically complete the program in four to five years of full-time resident study. Please see the Department of Special Education website (https://education.illinois.edu/sped/programs-degrees/phd-sped/) for more information about requirements and to view the Department of Special Education Doctoral Student Manual (https://education.illinois.edu/sped/programs-degrees/phd-sped/current-students/doctoral-student-manual/).

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

Applicants must have also maintained a 3.0 grade point average (A = 4.0) for the last two years of their undergraduate program and for any previous graduate work.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our Special Education | Illinois (https://education.illinois.edu/sped/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Speech & Hearing Science, MA

for the degree of Master of Arts in Speech & Hearing Science

The Department of Speech and Hearing Science offers graduate programs of study in speech-language pathology, audiology, and speech, language, and hearing science, including programs leading to the Master of Arts, Doctor of Audiology, and Doctor of Philosophy degrees, with specialization in various aspects of audiology and speech-language pathology. The department prepares scientists and professionals who specialize in the study of perception and production of spoken, written, signed, and alternative communication and communication disorders, as well as dysphagia. Graduate degrees are offered at the master's and doctoral levels.

See more information about the program (https://ahs.illinois.edu/master-of-arts-in-speech-%26-hearing-science-clinical/).

Admission

Although a B.A./B.S. in the field is not required for admission to the clinical M.A. program, recommended background includes undergraduate credit in the following areas or their equivalents: phonetics, anatomy and physiology of the speech and hearing mechanism, hearing science, speech science, speech pathology, audiology, and aural rehabilitation. The M.A. program begins in the fall only.

See more information about admissions (https://ahs.illinois.edu/shs-grad-admissions/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

for the degree of Master of Arts in Speech & Hearing Science

In the Master of Arts degree program, students learn about speech-language pathology in medical and educational settings, as well as speech, language and hearing science. This degree may be taken as either a terminal degree or as preparation for further graduate study, including a doctoral degree. For students seeking a terminal degree, the Master of Arts program may be designed with or without clinical practicum experience.

The clinical program ensures clinical competence in speech-language pathology necessary for employment in a healthcare and educational settings, private practice, or industry. Successful completion of this program ensures that the student has met the academic and clinical requirements for the American Speech-Language-Hearing Association (ASHA) certification and can choose to pursue the Illinois state certification required for speech-language pathology in the public schools. The program is accredited by the Council on Academic Accreditation in Speech-Language Pathology and Audiology. The clinical MA program requires a minimum of 54 graduate hours. All students in the clinical program are required to take the following courses:

For additional details and requirements refer to the department's graduate programs (https://ahs.illinois.edu/master-of-arts-in-speech-%26-hearing-science-clinical/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Arts in Speech & Hearing Science

---

1. The student will demonstrate knowledge of basic human communication and swallowing processes, including the appropriate biological, neurological, acoustic, psychological, developmental, and linguistic and cultural bases. The applicant must have demonstrated the ability to integrate information pertaining to normal and abnormal human development across the life span (ASHA Standard IV-B).
2. The student will demonstrate knowledge of communication and swallowing disorders and differences, including the appropriate etiologies, characteristics, anatomical/physiological, acoustic, psychological, developmental, and linguistic and cultural correlates in the following 9 areas: speech sound production; fluency; voice/resonance; receptive/expressive language in speaking, listening, reading, writing; hearing; swallowing;

cognitive aspects of communication; social aspects of communication; and augmentative and alternative communication modalities (Standard IV-C).

3. For each of the areas specified in #2, the student will demonstrate current knowledge of the principles and methods of prevention, assessment, and intervention for people with communication and swallowing disorders, including consideration of anatomical/physiological, psychological, developmental, and linguistic and cultural correlates (Standard IV-D, V-F).
4. The student will demonstrate knowledge of standards of ethical conduct and skills in adhering to the professional code of ethics and behaving professionally (Standard IV-E).
5. The student will demonstrate knowledge of processes used in research and skills in integrating research principles into evidence-based clinical practice (Standard IV-F).
6. The student will demonstrate knowledge and skills in applying contemporary professional issues in clinical practice (Standard IV-G).
7. The student will demonstrate knowledge of entry-level and advanced certifications, licensure, and other relevant professional credentials, as well as knowledge and skills in applying local, state, and national regulations and policies in clinical practice (Standard IV-H).
8. The student will demonstrate skills in oral and written communication, collaboration, and counseling, including the ability to complete administrative and reporting functions necessary to support evaluation and intervention (Standard V-A and V-B).

Speech & Hearing Science, PhD

for the degree of Doctor of Philosophy in Speech & Hearing Science

The department offers programs leading to the Master of Arts, Doctor of Audiology, and Doctor of Philosophy degrees, with specialization in various aspects of audiology and speech-language pathology. The Department of Speech and Hearing Science offers graduate programs of study in speech-language pathology, audiology, and speech, language, and hearing science. The department prepares scientists and professionals who specialize in the study of perception and production of spoken, written, signed, and alternative communication and communication disorders, as well as dysphagia. Graduate degrees are offered at the master's and doctoral levels.

See more information about the program (https://ahs.illinois.edu/speech-&-hearing-science/phd/).

Admission
Admission to the doctoral program requires completion of a bachelor's degree. The doctoral program is divided into three stages: Stage I, which includes the master's degree or its equivalent; Stage II, which is advanced course work and completion of all departmental requirements, with the exception of the dissertation defense and deposit; and Stage III, which is the conduct of the dissertation, its defense and deposit.

See more information about admissions (https://ahs.illinois.edu/shs-grad-admissions/).

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

for the degree of Doctor of Philosophy in Speech & Hearing Science

The program may be planned with specialization in many areas of audiology, speech-language pathology, and speech, language or hearing science. Individual programs of study will be tailored to the student's area of scholarly and research interests and are planned by the student and the advisor. The minimum academic course requirements for this degree are 64 graduate hours of course work beyond those required for a master's degree or equivalent, a qualifying exam, and a dissertation.

The first two to four years of the doctoral program are typically devoted to course work, including the completion of an Early Research Project (ERP), in the area of concentration selected by the student. For students entering with a M.A./M.S., the ERP occurs early in Stage II and must be completed before the Qualifying Exam. For students entering the PhD program directly from a B.A./B.S. degree, the ERP may be undertaken and completed in Stage I or Stage II. In the middle of Stage II, students will take a Qualifying Exam. Successful completion of the Qualifying Exam provides evidence of the student's satisfactory progress toward scholarly independence and indicates the student is then qualified to begin the planning stages of a dissertation proposal. A preliminary exam on the dissertation proposal occurs at the end of Stage II and marks the transition to Stage III. The doctoral program culminations with a Final Exam/Dissertation Defense, and oral examination over a written document.

For additional details and requirements refer to the department's graduate programs (https://ahs.illinois.edu/speech-%26-hearing-science/phd/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Entering with approved M.A./M.S. or Au.D. degree

Code	Title	Hours
3 courses in statistics-related areas		12
SHS 590	History of CSD	4
SHS 592	Prosem Spch & Hear Sci	2-4
SHS 594	PhD Early Research Project	8
One or two advanced 500-level seminars in SHS		4
Restricted elective hours, not including SHS 592, SHS 594, SHS 599		8-12
Restricted elective courses, requiring approval by the mentor with input from the advising committee, are identified to support students' individualized areas of study within the broad field of communication sciences and disorders. If minimum credits are completed in SHS 592/SHS 594, then the maximum of restricted electives are required. If maximum credits are taken in SHS 592/ SHS 594, then the minimum of restricted electives are required.		
SHS 599	Thesis Research (min/max applied toward degree)	24

Statistics, MS

for the degree of Master of Science in Statistics

The Master of Science (MS) degree in Statistics provides advanced training in mathematical and applied statistics, exposure to statistics in a consulting or collaborative research environment and specialized coursework in a number of areas of emphasis. The program is intended to prepare students for careers as practicing statisticians, to provide enhanced research expertise for students pursuing advanced degrees in other fields, and to strengthen the mathematical and statistical training of students preparing for PhD studies in statistics or a related field. The MS degree requires 32-36 hours (8 or 9 courses) beyond the prerequisites. There is no thesis requirement for this degree. The entire program must be approved by the Graduate Advisor before a degree can be awarded.

Statistics students in the MS program will:

1. Acquire a solid foundation in mathematical statistics and learn how it applies to data analysis;
2. Develop strong communication abilities in writing and orally that will allow them to work effectively in diverse teams;
3. Become skillful in statistical computing, data management, and statistical software;
4. Be knowledgeable of the most modern techniques in statistical methodology and data science, especially data analysis techniques associated with statistical learning and machine learning;
5. Develop an understanding and gain experience in applying methodology learned in the classroom to real problems in science and industry.

Statistics: Analytics Concentration, MS

for the degree of Master of Science in Statistics, Analytics Concentration

The Master of Science in Statistics, Analytics Concentration combines the mathematical and statistical training of the traditional MS in Statistics with enhanced computational and data analytic training for those planning careers in information intensive industries or research. The program includes fundamental training in mathematical and applied statistics as well as specialized training in data management, analysis, and model building with large datasets and databases. The specialized courses have an emphasis on statistical computing, data management, and statistical learning, which encompasses the more statistical topics that fall under the broader title of data mining. The degree requires 36-40 hours (9 or 10 courses). Students are encouraged to gain experience in a business or consulting environment as part of the program.

Statistics: Applied, MS

for the degree of Master of Science in Statistics, Applied Statistics Concentration

The Department of Statistics offers the Master of Science in Statistics with specialization in a variety of areas of application. The degree program consists of a core of statistics courses covering statistical theory, linear models, and statistical consulting, and further coursework in the field of application and in statistics. The program offers an additional degree for students earning an advanced degree in the area of application.

To be eligible for this program, students must be pursuing an advanced degree in a department other than Statistics at the Urbana-Champaign campus. Students interested in economic statistics should apply for the applied concentration. Full statements of degree requirements are available from the head of the unit offering a specialization or from the Graduate Advisor of the Department of Statistics.

Strategic Brand Communications, MS

for the degree of Master of Science in Strategic Brand Communication (online)

This Master of Science in Strategic Brand Communication (MS SBC) degree is an online program within the Charles H. Sandage Department of Advertising in the College of Media. Graduates from this program receive the MS SBC degree awarded by the Graduate College. Strategic Brand Communication (SBC) is a data-driven, purposeful conversation with a brand's stakeholders. SBC combines traditional advertising practices with contemporary business thinking that pertains to delivering consistent, meaningful messages to consumers. In so doing, SBC seeks to integrate multiple consumer contact points that occur through the purchase of commercial messages in paid, earned, and owned media to deliver persuasive and impactful statements about brands and companies.

This management process integrates all aspects of strategic brand marketing communications such as advertising, public relations, digital media, social media, promotion, and revenue development marketing. Such integration impacts a firm's business-to-business, marketing channel, customer-focused, and strategic integrated communications.

The MS SBC degree program is designed for working professionals. The online program is designed to be completed in 16 months. The curriculum will prepare students to: be strategic leaders in an ever-changing global media environment; be analytic and integrative thinkers; be effective brand communicators and managers; respond agilely to new technologies, emerging media, new demographics, and market trends; be team-oriented in their approach to management and communications; and be prepared to continue to learn as the media environment evolves.

Admission

To be admitted into this program, applicants are expected to have a minimum grade point average of at least 3.0 (A = 4.00) for the last two years of undergraduate study and a 3.0 for any previous graduate work completed. All applicants whose native language is not English must submit a minimum Test of English as a Foreign Language (TOEFL) score of at least 102 (iBT), 253 (CBT), or 610 (PBT); or minimum International English Language Testing System (IELTS) academic exam scores of 6.5 overall and 6.0 in all subsections. Prerequisite: course in Statistics or Calculus from an accredited institution. The admissions criteria will be based upon an evaluation of each applicant's academic and professional experience, GPA, English aptitude, and letters of recommendation. A minimum GPA of 2.75 is required for continued enrollment.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the degree of Master of Science in Strategic Brand Communication (online)

Students graduating with a Master of Science in Strategic Brand Communication will be able to:

1. Demonstrate strategic leadership in navigating and adapting to the evolving global media environment.
2. Employ analytic and integrative thinking to assess and solve complex brand communication challenges.
3. Exhibit proficiency in brand communication and management to effectively convey brand messages and maintain brand consistency.
4. Adapt quickly to new technologies, emerging media, demographic shifts, and market trends to innovate and stay competitive.
5. Work collaboratively within teams to manage and execute communications strategies effectively.
6. Commit to lifelong learning and continuous development to keep pace with changes in the media environment.

Sustainable Urban Design, MSUD

for the degree of Master of Sustainable Urban Design in Sustainable Urban Design

The Department of Landscape Architecture offers the Master of Landscape Architecture (MLA) degree, the Master of Sustainable Urban Design degree (MSUD), and the PhD degree. The programs enable students to gain fresh insights and to conduct new research pertaining to land and its use by people. Courses and faculty research activities range from on-site to regional scales, and include environmental planning and design as well as community design, cultural heritage, and history.

THE MSUD is a 11-month program completed in two semesters (fall and spring) plus one summer term, undertaken in that order. Matriculation is for fall semester only. The MSUD program can serve as a postprofessional degree (i.e., a degree that leads to licensure such as BLA, MLA, MARCH) or as an advanced degree to hone skills in sustainable design for those with degrees in other subject areas.

Code	Title	Hours
Minimum GPA:		2.75

for the degree of Master of Sustainable Urban Design in Sustainable Urban Design

1. Understand the basic structures and functions of urban systems.
2. Have a deep level of understanding of the fundamentals of sustainability and their functional links to urban systems.
3. Be proficient in applying various types of design software and spatial analysis techniques.

4. Be able to combine sustainability principles and urban design theory and practice to address urban landscape issues at local and global levels.
5. Be comfortable working in multidisciplinary teams to solve complex urban problems.

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Systems & Entrepreneurial Engineering, MS

For the degree of Master of Science in Systems & Entrepreneurial Engineering

The Department of Industrial & Enterprise Systems Engineering offers both an MS with thesis and an MS non-thesis program. Students in the MS with thesis program are required to have a research advisor and applicants are encouraged to contact department faculty (https://ise.illinois.edu/directory/faculty.html) in their areas of interest to inquire about possible research and funding opportunities.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Admission Requirements

Applicants who have completed degree requirements in an accredited engineering program or its equivalent are eligible to apply for admission. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required.

Based upon the previous preparation of the student for either program, prerequisite courses may be specified by the advisor, but the credit may not be applied toward a degree.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Qualified students may compete for financial assistance in the form of teaching/graduate/research assistantships, fellowships, grants, and tuition waiver scholarships. Under certain conditions, fellowships may be augmented by part-time assistantships.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the English Proficiency Interview (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) (EPI), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research

Faculty research by ISE faculty is pursued in the following fields:

- computer-aided design
- data analytics
- optimization
- design systems
- manufacturing systems
- nondestructive testing and evaluation
- system dynamics and simulation
- control
- robotics
- real-time decision making
- reliability engineering
- financial engineering
- operations research
- management science
- biomechanics
- human factors
- supply chain logistics

Members of the ISE Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department's research laboratories website (https://ise.illinois.edu/research/labs/).

For the degree of Master of Science in Systems & Entrepreneurial Engineering

For additional details and requirements refer to the department's Graduate Programs website (http://ise.illinois.edu/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Systems & Entrepreneurial Engineering, PhD

for the degree of Doctor of Philosophy in Systems & Entrepreneurial Engineering

The Department of Industrial & Enterprise Systems Engineering offers both a traditional doctoral program and a direct doctoral program. A Master's degree is not required for admission to the direct doctoral program. Students in both programs are required to have a research advisor and applicants are encouraged to contact department faculty (https://ise.illinois.edu/directory/faculty.html) in their areas of interest to inquire about possible research and funding opportunities.

Admission Requirements

Applicants who have completed degree requirements in an accredited engineering program or its equivalent are eligible to apply for admission. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required.

Scores on the Graduate Record Examination (GRE) (http://www.ets.org/) general test are recommended of all applicants. Based upon the previous preparation of the student for either program, prerequisite courses may be specified by the advisor, but the credit may not be applied toward a degree.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Qualified students may compete for financial assistance in the form of teaching/graduate/research assistantships, fellowships, grants, and tuition waiver scholarships. Under certain conditions, fellowships may be augmented by part-time assistantships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the English Proficiency Interview (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) (EPI), offered on campus. Teaching of Biological Science, MS

for the degree of Master of Science in Teaching of Biological Science (online)

The Online Master of Science Teaching Biology Program (OMST-Biology) is designed for certified biology/science teachers who wish to complete a Master of Science degree in Biology. Individuals who are already certified to teach science/biology at the middle school / high school level may enter the online program to earn the MS degree while taking online courses in both biology and education.

Admission

All Applicants must hold a baccalaureate degree (or equivalent) comparable in content and number of credit hours with that granted by the University of Illinois Urbana-Champaign. Applicants must have an overall grade-point average of 3.0 (A=4.0) for the last 2 years of undergraduate study. Applicants must have proof of teacher certification in Science/Biology.

Applicants whose native language is not English are required to submit TOEFL scores. International applicants must have a TOEFL score of at least 613 (paper-based test), 257 (computer-based test), or 103-104 (internet-based test) to be considered for admission. The TOEFL must be taken within two years of the proposed term of entry; older scores are not valid. Request that official TOEFL scores be sent directly to the University of Illinois Urbana-Champaign. The institution number is 1836.

See the Program Web Site for application deadlines, procedures, and more detailed application guidelines.

Financial Aid

Financial assistance in the form of full or partial waiver of tuition and fees is not available to online M.S. students (except statutory waivers).

for the degree of Master of Science in Teaching of Biological Science (online)

For additional details and requirements refer to the program requirements (http://omst.sib.illinois.edu/apply/graduation/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Applicants must be certified to teach science/biology. This master's program is only available online (http://omst.sib.illinois.edu/).

Graduation requirements for the OMST-Biology Program include a minimum of **32 credit hours** of coursework.

Code	Title	Hours
While specific courses are not required, previously certified candidates must complete a minimum of 8 hours of graduate-level courses offered by departments in the College of Education to be selected in consultation with the Biology advisor based on the student's interest.		8
Elective hours selected from either biology or education.		8
Hours Required within the unit (Biology IB or MCB)		16
Research/Project Hours (min/max applied toward degree)		0-4
Total Hours		**32**

Other Requirements

Requirement
Other requirements may overlap.
Courses taken "credit/no credit" may not be used toward degree requirements.
Deficiencies in undergraduate courses needed to satisfy the certification requirement must also be taken; these courses normally do not count toward the 32 or 51 graduate hours needed to complete the degree. Deficiencies are determined by an audit of transcripts conducted by the Teacher Certification Office.
500-level hours required overall in program: 12
Conferral of the MS degree is contingent upon the completion of all teacher certification requirements.
Qualification for teacher certification is contingent upon the completion of all MS degree requirements.
Minimum GPA: 3.0

for the degree of Master of Science in Teaching of Biological Science (online)

The Online Master of Science in Teaching of Biological Science (OMST) is designed to give practicing teachers the opportunity to earn a M.S. in teaching biological science or graduate credits in biology while living and teaching at home. Accordingly, we offer a comprehensive curriculum consisting of six Biology courses (OMST students must complete five of the six courses) and three Curriculum & Instruction courses (including a capstone project course). Through these courses we meet the needs of today's biology teachers, giving them the tools to help their own students think like a biologist and give the tools to lead the next wave of change. The fully online format enables in-service teachers to bring the latest advances in biology and evolving pedagogy directly to the classroom.

Online Master of Science in Teaching of Biological Science Program Learning Objectives:

1. Synthesize core knowledge in the fields of Biology and the Teaching of Biology.
2. Apply modern Biology knowledge into the Middle School or High School science classroom.
3. Design and implement an action research project which integrates pedagogical and science content ideas addressed in the program courses.
4. Acquire other professional skills such as recognizing legitimate science, citation management and science communication.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Teaching of Chemistry, MS

for the degree of Master of Science in Teaching of Chemistry

Admission

Graduate College requirements apply. Further, applicants should have a bachelor's degree or its equivalent from an accredited college or university in the U.S. or an approved institution of higher learning abroad, with at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), is required to be considered for admission to the graduate programs.. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis.

International students whose native language is not English are required to have a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 580 (237 on the computer-based test). In addition, teaching is a requirement in the chemistry graduate program, and there are special requirements for applicants whose native language is not English. The University requires a minimum Test of Spoken English (TSE) score of 50. Any applicant whose native language is not English is expected to provide TSE scores in order to receive full consideration for admission and financial aid.

Graduate Record Exam (GRE) scores (general or subject) are not required. Please do not submit them.

Students might be admitted without a degree from their current institution under exceptional circumstances that will need to be described in detail via a letter from the applicant and a separate statement from the department head of the student's current graduate program.

Contact chemistry graduate admissions for further information.

Financial Aid

Support for graduate students is available through fellowships and assistantships. All candidates are considered for these upon application. Graduate students making normal progress toward their degrees generally receive a tuition waiver as well as a stipend.

for the degree of Master of Science in Teaching of Chemistry

The Master of Science in the Teaching of Chemistry (MSTC) at the University of Illinois provides advanced studies for those interested in teaching chemistry at the secondary or community college level. The program serves two different audiences:

- Those who already have a teaching certificate or will teach in situations which do not require a certificate;
- Those who wish to obtain a master's degree and a teaching certificate simultaneously.

The MSTC degree (without certification) can be completed in one year. The MSTC degree (with certification) requires two years.

For additional details and requirements refer to the department's Graduate Programs (https://chemistry.illinois.edu/academics/graduate-studies/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Graduate hours in education		8
Graduate hours in chemistry		16
Graduate electives in either education or physical science		8
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
The courses in chemistry and the electives must be selected with the approval of the adviser.	
Minimum 500-level Hours Required Overall:	12 (8 in CHEM)
Minimum GPA:	3.0

for the degree of Master of Science in Teaching of Chemistry

Note: since this Learning Outcomes Assessment focuses solely on the Master of Science in Teaching of Chemistry program, we have only 3 learning outcomes (we have 7 for the PhD program).

1. To have a deep working knowledge of the principles and concepts of contemporary chemistry.
2. To be able to educate students interested in chemical sciences using state-of-the-art technology and pedagogy.
3. To be able to communicate clearly and effectively within and across disciplinary lines.

Teaching of English as a Second Language, MA

for the Master of Arts in the Teaching of English as a Second Language

Admission

Applicants to the MATESL and PhD programs in Linguistics must have completed a bachelor's degree.

For the PhD program in Linguistics, undergraduate preparation should include the study of at least one foreign language; a course equivalent to LING 400 on this campus; and a broad background in the humanities, social sciences, or mathematics.

For the MATESL program, an undergraduate major in linguistics, English, a foreign language, or education is generally recommended, though other majors are also acceptable. Applicants must present a grade point average of at least 3.0 (A = 4.0) for the last 60 hours of undergraduate work. Two years of coursework in a foreign language or the equivalent are also required.

Student may be admitted to the PhD program in Linguistics with or without a prior master's degree in linguistics or a related field. Depending on the student's prior preparation, they may be admitted either into Stage 1 of the PhD or into Stage 2 of the PhD. Students who who have completed a master's degree in linguistics or a closely related field may be considered for admission to Stage 2 of the PhD program. Students without an approved prior master's degree will only be considered for admission to Stage 1 of the PhD program. Students admitted to Stage 1 must complete 40 credit hours in the areas listed on the department website, maintain a GPA of 3.5 or better in all core courses, and earn a grade of High Pass on the qualifying examination in order to advance to Stage 2. Students who are admitted directly to Stage 2, but lack any of the core courses required for Stage 1, must complete Stage 1 requirements immediately on entry into the program; the courses will not count toward the 64 hours required for Stage 2 of the PhD.

Applicants to all Linguistics graduate programs should apply online (https://grad.illinois.edu/admissions/apply/) and submit a statement of purpose, three letters of recommendation and a writing sample of 10-20 pages in length. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are optional. The applicant should ask the ETS to submit scores to institution 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 88 (100 preferred) on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Financial Aid

The Linguistics department aims to provide financial aid for all graduate students in the Ph.D. program in Linguistics for up to five years, in the form of fellowships, teaching assistantships, research assistantships, or departmental assistantships. To hold a teaching assistantship non-native English speakers must first pass a test of their oral English ability (https://www.grad.illinois.edu/admissions/application-instructions/additional-instructions-international-applicants/#english-proficiency-for-teaching-assistants). Some students receive aid through other units in the University. New applicants receive automatic consideration for financial aid within the department, including teaching assistantships for the non-Western languages taught in its programs. For details and applications, write to the above address.

For students in the MATESL program, financial assistance is offered to as many qualified applicants as possible, but cannot be awarded to all. A record of extensive experience in teaching English as a second language enhances a candidate's chance of receiving financial assistance during one's first semester. A limited number of University fellowships are available for exceptionally qualified candidates. Teaching assistants (https://grad.illinois.edu/Admissions/instructions/04c/) teach students in the Division's ESL program and in the Intensive English Institute.

for the Master of Arts in the Teaching of English as a Second Language

The MATESL program offers two separate curricula or tracks. One track is designed for candidates whose principal interests are in language pedagogy and related research. The other track encourages candidates to concentrate more heavily on applied research in various aspects of English studies. A detailed description of the two tracks is available (https://linguistics.illinois.edu/academics/graduate-program/ma-teaching-english-speakers-other-languages-matesol/). Usually candidates can meet all degree requirements in two years.

For additional details and requirements refer to the department's graduate programs (http://www.linguistics.illinois.edu/students/grad/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
Thesis option is required for students in the research track, optional for students in the pedagogical track.		
Track Coursework: Students must select between the pedagogical track and the research track, and complete course requirements specified for the selected track		40
Language Requirement: Students who have not completed the equivalent of at least two years of study in a language other than their native language as an undergraduate must do so in order to complete the MATESL degree. These courses do not count toward the 40-hour total		
EIL 599	Thesis Research (min/max applied toward degree)	4-8
Total Hours		**40**

Other Requirements

Requirement	Description
Other requirements may overlap	
Courses that satisfy curriculum prerequisites may be taken, but do not count toward graduation requirements.

Teaching of Latin, MA

for the Master of Arts in Teaching of Latin

The Department of the Classics offers programs of study leading to the Master of Arts in Classics. Within the master's degree program, students may choose from three options: both Greek and Latin (= Classics), Greek, or Latin. In addition, the department offers the Master of Arts in the Teaching of Latin and the Doctor of Philosophy in Classical Philology. A further concentration in Medieval Studies is available to students pursuing graduate degrees in the Classics.

Graduate students in Classics at Illinois may concentrate at different stages of their study on various aspects of the Greek and Latin languages, literatures, and cultures; classical archaeology; ancient philosophy; or, in conjunction with the appropriate department, comparative literature, ancient history, or linguistics. Additional information is available on our department website (https://classics.illinois.edu/).

Graduate Degree Programs in Classics

- Classics, MA (p. 1243)
  - concentrations: Greek (p. 1246) | Latin (p. 1249) | Medieval Studies (p. 2042)
- Teaching of Latin, MA (p. 1932)
- Classical Philology, PhD (p. 1240)
  - concentration: Medieval Studies (p. 2042)

Admission

Applicants for admission to the MA in Classics (Greek and Latin) must ordinarily present a minimum of 20 semester hours in one of the two languages (Greek or Latin) and 15 semester hours in the other language; candidates for admission to the MA with specialization in either Greek or Latin, or the MAT in Latin, must ordinarily present at least 20 semester hours in the relevant language. Previous work in ancient history, ancient art and archaeology, philosophy, literary criticism, or linguistics is desirable.

Applicants should apply online (https://www.grad.illinois.edu/admissions/apply/) and submit a personal statement of 2-3 pages, a resume or CV, transcripts showing all undergraduate and graduate work completed, and a writing sample of approximately 20 pages (one or two papers) that showcases the applicant's ability to work in the original classical languages and incorporates relevant scholarship as appropriate. Three letters of recommendation are also required.

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (https://www.grad.illinois.edu/admissions/application-instructions/additional-instructions-international-applicants/). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services at slclgradservices@illinois.edu.

Licensure

Students wishing to add Illinois licensure in Latin to an MAT, M.A. in Latin, or Ph.D. must apply to the World Language Teacher Education Program (https://wlte.illinois.edu/).

In order to receive licensure, students must complete an M.A. in Classics with a concentration in Latin, an M.A. in Classics with a concentration in Greek and Latin, or an M.A. in the Teaching of Latin.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and almost all students teach. Non-native English speakers must first pass a test of their oral English ability (https://www.grad.illinois.edu/admissions/application-instructions/additional-instructions-international-applicants/#english-proficiency-for-teaching-assistants).

Faculty Research Interests

Greek and Latin literature of all periods; gender and sexuality; Latin poetry of the imperial period; Greek historiography and ethnography; Greek and Roman drama; reception of Classics, especially in film; animal studies; pedagogy. For further details see visit the Classics website (https://classics.illinois.edu/).

Facilities and Resources

We have a renowned university library which boasts the second largest number of volumes among US university libraries after Harvard. Housed within the main library building is our first-rate Classics collection (https://www.library.illinois.edu/litlang/classics/) with over 60,000 volumes on open shelves. The University of Illinois Library's Rare Book Room houses the Turyn Archive of Greek manuscript photographs and the American Center of the International Photographic Archive of Papyri. The Department of the Classics also publishes the widely circulating peer-reviewed journal *Illinois Classical Studies* and its Supplements. The Krannert Art Museum and the Spurlock Museum of World Cultures have outstanding collections of ancient vases and other artifacts.

Financial Aid

University fellowships are available for the academic year. Teaching assistantships are available for both the academic year and Summer Session II.

for the Master of Arts in Teaching of Latin

For additional details and requirements refer to the department's graduate program requirements (http://www.classics.illinois.edu/programs/graduate/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/). Certification Requirements can be found here (https://classics.illinois.edu/certification-requirements/).

Minimum GPA:	2.75

for the Master of Arts in Teaching of Latin

1. Students are able to read and translate classical Latin prose and poetry and have advanced knowledge of Latin grammar.
2. Students are familiar with methods of research in Classics and can use these to generate new ideas.
3. Students are broadly familiar with the history, art, and archaeology of the Greco-Roman world and demonstrate an understanding of ancient cultural differences.
4. Students are familiar with multiple approaches to teaching the Latin language and Roman culture.
5. As a result of practical, hands-on experience teaching the Latin language and/or Roman culture, students are ready for careers in K-12 teaching.

Teaching of Mathematics, MS

for the Master of Science in Teaching of Mathematics

The MS in the Teaching of Mathematics is intended for those who wish to teach at the high school or community college level. It does not lead to certification to teach in public schools. The program requires 32 credit hours and can normally be completed in 18 months. Applications are accepted for Fall semester.

A teaching assistantship and full tuition waiver (plus partial fee waiver) will be offered for three semesters to all admitted applicants who are native speakers of English or satisfy the English Proficiency Requirement for International Teaching Assistants (http://www.grad.illinois.edu/admissions/taengprof.htm).

for the Master of Science in Teaching of Mathematics

For additional details and requirements refer to the department's Guide to Graduate Studies (https://math.illinois.edu/academics/graduate-program/forms-guidebooks-handbooks-life-resources/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
A rigorous course in algebra at the level of MATH 417 or above		3 or 4
A rigorous course in analysis at the level of MATH 447 or above		3 or 4
Coursework from the College of Education in courses related to the teaching of mathematics at the secondary or college level, subject to the approval of the Director of Graduate Studies in Mathematics.		7-8
Total hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Specific course and sequence requirements must be met.	
Two semesters of teaching under the supervision of a mentor in two categories	
MATH 405, MATH 415, MATH 444, and MATH 499 cannot be counted toward this graduate degree.	
Minimum Hours Required Within the Unit:	24
Minimum 500-level Hours Required Overall:	12 (8 in Math)
Minimum GPA:	3.0

for the Master of Science in Teaching of Mathematics

1. Students will be able to explain central definitions and theorems of abstract algebra.

2. Students will be able to explain central definitions and theorems of either real or complex analysis.

3. Students will read and interpret scholarship on teaching and learning to influence teaching practice.

4. Students will plan and implement effective teaching and assess student learning.

Teaching of Physics, MS

for the degree of Master of Science in Teaching of Physics

The Department of Physics offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in Physics and Master of Science in Teaching Physics. The Department is actively developing a new paradigm for graduate physics education and research for the 21st century, aimed at enhancing interdisciplinary interactions and creating an integrated approach to educational and research training. Outstanding graduate research opportunities are available in many subdisciplines of physics, including condensed matter physics, high energy and nuclear physics, astrophysics, atomic physics, molecular and optical physics, complex systems, quantum information, biological physics, physics education research.

Students may select experimental, theoretical, or computational thesis projects. Multidisciplinary projects are especially encouraged, and, with the consent of other departments, students may earn master's degrees in areas such as materials science and engineering, or computer science, simultaneously with their PhD degrees in physics.

for the degree of Master of Science in Teaching of Physics

For additional details and requirements refer to the department's Degree Requirements (http://physics.illinois.edu/grad/degree-requirements.asp) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Requirements

Code	Title	Hours
At least 2 education courses selected in consultation with the Physics Advisor based on the student's interests		8
Elective courses (subject to Other Requirements and Conditions below)		24
Total Hours		**32**

Other Requirements and Conditions

Requirement	Description
Other Requirements and Conditions may overlap	
A minimum 16 PHYS credit hours, with 8 at the 500 level.	
A maximum of 8 hours of PHYS 597 (or other individual study) may be applied toward the elective course work requirement.	
A minimum of 12 500-level credit hours applied toward the degree.	
Minimum GPA:	2.75

for the degree of Master of Science in Teaching of Physics

Illinois Physics MS Teaching in Physics graduates will have:

1. a firm foundation in core physics, math, and current physics research topics;
2. an ability to work collaboratively with a diverse team;
3. an ability to teach and mentor others effectively;
4. an understanding of the student’s professional and scientific ethical responsibilities;
5. some exposure to modern educational methods;6) an ability to communicate—both orally and in writing—scientific topics effectively to specialists in the student’s research subfield, to scientifically literate non-specialists, and to the general public (outreach).

Technology Management, MS

for the Master of Science in Technology Management

The Master of Science in Technology Management is focused on understanding how to manage the dynamic environment found in a technology-based enterprise. The curriculum covers core business topics tailored to address the issues and challenges inherent in companies that depend on technology. The course work of this intensive 12-month long program includes product development, marketing, simulation and risk analysis, finance, and strategy, as well as managing processes, intellectual property, innovation, human resources, and an option of an internship or curricular practical training - all focusing on technology. This is an intensive program for those who use, deploy, shape, or create technology.

In addition to formal coursework, students participate in a series of management development seminars, which provide an overview of American business concepts and practices.

Students have the option of pursuing a concentration within the 40 hours of coursework in one of six areas: Accountancy (p. 1993), Business Data Analytics (p. 2000), Consumer-Centric Innovation and Design (p. 1942), Finance (p. 2024), Information Technology & Control (p. 2036), or Supply Chain Management (p. 2057). Students have the option of pursuing an internship in their first or third semester, depending on the track admitted to.

Admission

Admission to the MS in Technology Management program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, three letters of recommendation, and a statement of career goals. Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL), CBT, iBT or IELTS. Candidates must achieve the University minimum scores on these examinations (currently 550 on the paper-based TOEFL or 213 on the computer-based TOEFL or 79 on the iBT.

Faculty Research Interests

Faculty research interests are in the areas of marketing, organizational behavior, organization theory, decision sciences, information systems, strategic management, risk analysis, judgment under uncertainty, international business, production and operations management, accounting, economics, entrepreneurship, and finance. The Gies College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

Financial Aid

The M.S. in Business Administration, the M.S. in Management, the M.S. in Strategic Brand Communication, and the M.S. in Technology Management do not provide assistantships.

for the Master of Science in Technology Management

For additional details and requirements refer to the department's Program Curriculum (https://giesbusiness.illinois.edu/mstm/curriculum/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Technology Management: Consumer-Centric Innovation and Design, MS

for the Master of Science in Technology Management, Consumer-Centric Innovation and Design concentration

This concentration equips students with a robust combination of design, data, development, and branding skills that are essential for fostering innovation driven by consumer needs. By blending creative, analytical, and strategic approaches, students will be prepared to excel in industries where consumer satisfaction and engagement drive success.

This concentration requires twelve graduate hours. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Admission to the concentration requires enrollment in a specified Gies College of Business graduate program.

for the Master of Science in Technology Management, Consumer-Centric Innovation and Design concentration

Code	Title	Hours
Select 12 hours from the following		
BADM 525	New Product Development	4
BADM 526	Consumer Analytics: Theory and Practice	4
BADM 527	Brand Management	4
BADM 578	Human-Centered Design/Design Thinking/User Experience Design	4
Total hours		**12**

for the Master of Science in Technology Management, Consumer-Centric Innovation and Design concentration

Learning Outcomes

1. UI/UX Design:
   a. In today's digital age, user interface (UI) and user experience (UX) design are essential for creating intuitive, user-friendly products and services. This course equips students with the skills to understand better how design interfaces optimize consumer interactions and satisfaction. From apps to websites and physical products, UI/UX design is integral to making sure products meet the evolving needs of users – whether as consumers or active co-creators.
2. Consumer Analytics:
   a. Understanding consumer behavior through data is crucial for decision-making in modern businesses. Consumer Analytics provides students with the tools to gather, interpret, and apply consumer data to inform product development, marketing strategies, and brand positioning. This course empowers students to leverage data-driven insights to anticipate consumer needs and trends, thereby improving product-market fit and enhancing customer satisfaction.
3. New Product Development:
   a. The ability to develop innovative products that meet consumer demands is essential for business growth. This course focuses on the entire product development lifecycle, from idea generation to commercialization, with a focus on creating products that solve consumer problems or enhance their experiences. Students learn how to apply design thinking, collaborate across teams, and rapidly prototype solutions that reflect consumer-centric innovation.
4. Brand Management:
   a. A strong brand can differentiate products in a crowded marketplace and foster consumer loyalty. This course teaches students the strategies behind building and managing brands that resonate with target audiences. By understanding the emotional and psychological components of branding, students will be equipped to create brand narratives and identities that align with consumer values, enhancing both consumer trust and business success.

Overall, this concentration equips students with a robust combination of design, data, development, and branding skills that are essential for fostering innovation driven by consumer needs. By blending creative, analytical, and strategic approaches, students will be prepared to excel in industries where consumer satisfaction and engagement drive success.

for the Master of Science in Technology Management, Consumer-Centric Innovation and Design concentration

Theatre, MA

for the degree of Master of Arts in Theatre

A full-time student can complete this program in one academic year.

Admission

Candidates should apply to one of the ten graduate areas offered: Master of Fine Arts in Theatre with specialization in acting, costume design, costume technology, lighting design, scenic design, sound design and technology, stage management, or scenic technology; the Master of Arts in Theatre with specialization in theatre and performance research and dramaturgy; or the Doctor of Philosophy in Theatre with specialization in theatre and performance research. All applicants should present transcripts documenting undergraduate or graduate study of theatre practice, dramatic literature, and theatre history with a cumulative grade point average in these subjects of at least 3.0 (A = 4.0). Applicants whose first language is not English must submit recent Test of English as a Foreign Language (TOEFL) scores; the current minimum score for consideration is 550 on the paper-based test (213 on the computer-based version).

Candidates for the M.F.A. degree must demonstrate talent in theatrical performance or production by audition or by the presentation of a portfolio of their work to an admissions committee of the faculty, either on campus or at one of the regional University/Resident Theatre Association (U/RTA) audition sites. M.F.A. candidates are admitted in the fall term only. The M.F.A. acting program accepts applications only every three years; the next academic years in which applications will be accepted are 2024-25 for Fall 2025 admission.

Master's and doctoral candidates should present records of at least a 3.0 grade point average in all subjects studied at the undergraduate and graduate levels, supply 1-2 samples of their scholarly writing, and submitting recent Graduate Record Examination (GRE) scores is recommended. In addition to the Test of English as a Foreign Language (TOEFL) scores required of all foreign students, master's and doctoral candidates whose first language is not English are encouraged to submit scores of the Test of Written English (TWE). Ph.D. candidates should hold a master's degree in theatre or in a related field. Master's and doctoral candidates are normally admitted in the fall term.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

for the degree of Master of Arts in Theatre

All applicants should present transcripts documenting undergraduate or graduate study of theatre practice, dramatic literature, and theatre history with a cumulative grade point average in these subjects of at least 3.0 (A = 4.0). Applicants whose first language is not English must submit recent Test of English as a Foreign Language (TOEFL) scores; the current minimum score for consideration is 550 on the paper-based test (213 on the computer-based version).

Candidates for the M.F.A. degree must demonstrate talent in theatrical performance or production by audition or by the presentation of a portfolio of their work to an admissions committee of the faculty, either on campus or at one of the regional University/Resident Theatre Association (U/RTA) audition sites. M.F.A. candidates are admitted in the fall term only. The M.F.A. acting program accepts applications only every three years; the next academic years in which applications will be accepted are 2024-25 for Fall 2025 admission.

Master's and doctoral candidates should present records of at least a 3.0 grade point average in all subjects studied at the undergraduate and graduate levels, supply samples of their scholarly writing, and submit recent Graduate Record Examination (GRE) scores. In addition to the Test of English as a Foreign Language (TOEFL) scores required of all foreign students, master's and doctoral candidates whose first language is not English are encouraged to submit scores of the Test of Written English (TWE). Ph.D. candidates should hold a master's degree in theatre or in a related field. Master's and doctoral candidates are normally admitted in the fall term.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

for the degree of Master of Fine Arts in Theatre, Acting concentration

For additional details and requirements refer to the department's Graduate Programs and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Acting		48
Theatre History		4
Departmental approved electives		20
Total Hours		**72**

Other Requirements

Requirement	Description
Other requirements may overlap	
A concentration is not required	
Minimum 500-level Hours Required Overall:	12
Must be in residence six semesters	
Students in the MFA Program participate continuously in the production program of the Department of Theatre, which presents six to eight productions annually at Krannert Center for the Performing Arts.	
Minimum GPA:	3.0

The M.F.A. is a terminal degree in theatre practice. Approved areas of specialization include acting, costume design, costume technology, lighting design and technology, media design & technology, scenic design, scenic technology, sound design and technology, stage management, and properties design & management. Only full-time students will be admitted to the program. With departmental and Graduate College approval, up to two semesters of residency and 32 hours of coursework may be waived on the basis of the student's prior professional experience, although such cases are rare.

for the degree of Master of Fine Arts in Theatre, Acting concentration

By the end of the program, students will be able to:

1. Analyze, prepare, and rehearse dramatic material and to collaboratively engage in performance of works for the stage.
2. Speak clearly and expressively in communication of dramatic material and to develop practices of healthy voice and speech preparation.
3. Demonstrate acquisition of expressive movement skills, including stage combat techniques, and development of sustainable physical practices of performance.
4. Understand the expectations of auditioning for and working in professional live and screen performance.
5. Demonstrate an ability for instruction in acting and performance-related courses, including voice, speech, and movement.

for the degree of Master of Fine Arts in Theatre, Design & Technology concentration

---

The Design and Technology concentration has 9 specializations which students choose from:

Specialization in Costume Design

- Mastery of Process- Students will demonstrate advanced costume design skills, showcasing creativity and innovation through comprehensive character and script analysis. They will incorporate directorial concepts and dramaturgical insights into their designs.
- Research and Historical Context- Students will acquire the ability to conduct period research and apply historical and cultural knowledge to costume design and technology. This includes an understanding of historic patterns, fabrics, and color schemes. They will cultivate curiosity, sensitivity, and respect for diverse cultures and their customs.
- Storytelling and Conceptual Development- Students will enhance their storytelling abilities by creating compelling visual narratives that convey character identity and thematic elements. They will utilize a range of design aesthetics and techniques to support storytelling in both design and technology contexts.
- Technical Proficiency- Students will demonstrate proficiency in rendering and visualization techniques using both traditional and digital tools to effectively communicate design concepts.
- Leadership and Creative Collaboration- Students will cultivate leadership abilities in collaborative settings, effectively managing design and technology projects within diverse production teams, both locally and remotely. They will develop communication skills necessary for successful interaction with directors, other designers, actors, and production teams.
- Professional Preparedness and Industry Engagement- Students will prepare for professional practice by engaging in real-world production experiences, fostering project management skills, and understanding the workings of a professional costume shop, including health and safety protocols. They will build a professional portfolio, engage with industry networks, and participate in internships or residencies to gain real-world experience.
- Ethical and Sustainable Practices- Students will develop an understanding of ethical considerations and sustainable practices in costume design and technology. They will address environmental and social impacts while promoting responsible artistry, ensuring that both design and technology practices are aligned with sustainability goals.

Specialization in Costume Technology

- Mastery of Process- Students will exhibit mastery in costume construction techniques, demonstrating expertise in pattern drafting, draping, and tailoring. They will apply innovative solutions to technical challenges and integrate new technologies into costume production.

- Research and Historical Context- Students will acquire the ability to conduct period research and apply historical and cultural knowledge to costume design and technology. This includes an understanding of historic patterns, fabrics, and color schemes. They will cultivate curiosity, sensitivity, and respect for diverse cultures and their customs.
- Storytelling and Conceptual Development- Students will enhance their storytelling abilities by creating compelling visual narratives that convey character identity and thematic elements. They will utilize a range of design aesthetics and techniques to support storytelling in both design and technology contexts.
- Technical Proficiency- Students will gain a deep understanding of costume construction, fabric selection, and craft production. They will develop skills in advanced sewing techniques, fabric manipulation, and costume fitting, collaborating effectively with the costume design team
- Leadership and Creative Collaboration- Students will cultivate leadership abilities in collaborative settings, effectively managing design and technology projects within diverse production teams, both locally and remotely. They will develop communication skills necessary for successful interaction with directors, other designers, actors, and production teams.
- Professional Preparedness and Industry Engagement- Students will prepare for professional practice by engaging in real-world production experiences, fostering project management skills, and understanding the workings of a professional costume shop, including health and safety protocols. They will build a professional portfolio, engage with industry networks, and participate in internships or residencies to gain real-world experience.
- Ethical and Sustainable Practices- Students will develop an understanding of ethical considerations and sustainable practices in costume design and technology. They will address environmental and social impacts while promoting responsible artistry, ensuring that both design and technology practices are aligned with sustainability goals.

Specialization in Lighting Design and Technology

- Demonstrates the ability to analyze and interpret creative, critical, choreographic and theoretical works within the areas of theatre, dance, opera and other forms of live performance.
- Demonstrates the ability to communicate design and technical ideas through graphic skills, language and research to fellow collaborators including directors, choreographers, other designers and technicians in the industry.
- Demonstrates mastery in the area of practical application of learned methodologies, including the ability to effectively implement ideas, concepts, and requirements through the entire design, load-in and tech process in order to successfully fulfill a role related to lighting design for a stage production.
- Demonstrates working knowledge of professional practices across genres of theatre, musical theatre, opera, dance and non-traditional venues and styles of design.
- Demonstrates necessary skills and knowledge to acquire an entry-level position in the field of lighting design and technology including significant technical mastery, showing the capacity to produce work and solve problems independently.

Specialization in Media Design and Technology

- Demonstrates practical application of learned methodologies to successfully fulfill the role of media designer for stage production.
- Demonstrates a mature, effective ability to analyze, interpret, and discuss creative and theoretical works with a stage director and creative team.
- Demonstrates necessary skills and knowledge required by a media designer to communicate visual ideas and concepts to creative and technical collaborators.
- Demonstrates a working knowledge of professional practices across genres of theatre, musical theater, and opera with the capacity to produce work and solve problems independently.
- Demonstrates a strong understanding of historical periods and cultural influences with regard to theatre, dramatic literature, performance, design, art, and architecture.

Specialization in Scenic Design

- Demonstrates practical application of learned methodologies to successfully fulfill the role of scene designer and/or related fields for stage production.
- Demonstrates a mature, effective ability to analyze, interpret, and discuss creative and theoretical works with a stage director and creative team.
- Demonstrates necessary skills and knowledge required by a scene designer to communicate visual ideas and concepts to creative and technical collaborators.
- Demonstrates a working knowledge of professional practices across genres of theatre, musical theater, and opera with the capacity to produce work and solve problems independently.
- Demonstrates a strong understanding of historical periods and cultural influences with regard to theatre, dramatic literature, performance, design, art, architecture, and furniture.

Specialization in Scenic Technology

- Demonstrates practical application of learned methodologies to successfully fulfill leadership roles for stage productions.
- Demonstrate proficiency in technical, managerial and leadership skills required to attain professional, mid-level positions in Technical Direction or Project Management within the live entertainment industry.
- Demonstrate the ability to effectively communicate ideas, concepts and outcomes through the pre-production, build, load in, tech, and performance of a stage production.
- Demonstrate the ability to research and synthesize independently acquired knowledge through the successful execution of a thesis project.
- Demonstrates a working knowledge of professional practices across the genres of theatre, musical theatre, opera, and dance. Also displaying a strong understanding of historical periods with regard to architecture and styles of interior decor and theatrical paint techniques and processes.

Specialization in Sound Design and Technology

- Demonstrates a mature, effective ability to analyze, interpret, write critically and creatively, and discuss thoughtfully in the field of theatre and performance.
- Demonstrates ability to actively engage in the collaborative process in preparation, construction, and performance of works for the stage.
- Demonstrates practical application of learned methodologies including the ability to communicate ideas, concepts, and requirements in order to successfully fulfill a role related to sound design for a stage production.
- Demonstrates working knowledge of professional practices across genres of theatre, musical theatre, opera and dance.
- Demonstrates necessary skills and knowledge to acquire a masters level position in the field of sound design and technology including significant technical mastery, showing the capacity to produce work and solve problems independently.

Specialization in Stage Management

- Demonstrate the ability to analyze, interpret, write critically and creatively, and contribute to the body of knowledge in the field of theatre and performance.
- Demonstrate mastery of the concepts of professional production practices in rehearsal, design and performance as it relates to management across theatre, musical theatre, opera, and dance.
- Demonstrate practical application of learned methodologies including the ability to communicate ideas, concepts, and requirements in order to successfully fulfill a role related to the stage management of a production.
- Demonstrate necessary skills and knowledge to acquire a midlevel position in professional stage management.
- Demonstrate practical application of learned methodologies to successfully fulfill a leadership role or artistic proficiency for stage production.

Specialization in Properties Design and Management

- Demonstrate proficiency in creating and building hand props, furniture, set dressing, drapery, ephemera, and other related items using traditional and nontraditional materials.
- Demonstrate ability to analyze, interpret, and discuss creative work with a scenic designer or project designer/coordinator. Also, communicate effectively with all members of the creative and technical team.
- Demonstrate necessary skills and knowledge to acquire a mid-level position in the field of properties design or properties management, including mastery of craft techniques and methods as well as the capacity to produce work and solve problems independently.
- Demonstrate a working knowledge of professional practices across performance genres and between historical periods related to architecture and interior décor.
- Demonstrate a working knowledge of how to manage a staff of artisans, create projected outcomes for shop labor, and grow in their knowledge of time management related to the production process.

Theatre, PhD

for the degree of Doctor of Philosophy in Theatre

A comprehensive oral and written examination; an oral or written special-field examination; and defense of the dissertation before a committee of the graduate faculty is required. The program can be completed in two to three years beyond the master's degree.

Admission
Candidates should apply to one of the ten graduate areas offered: Master of Fine Arts in Theatre with specialization in acting, costume design, costume technology, lighting design, scenic design, sound design and technology, stage management, or scenic technology; the Master of Arts in Theatre with specialization in theatre and performance research and dramaturgy; or the Doctor of Philosophy in Theatre with specialization in theatre and performance research. All applicants should present transcripts documenting undergraduate or graduate study of theatre practice, dramatic literature, and theatre history with a cumulative grade point average in these subjects of at least 3.0 (A = 4.0). Applicants whose first language is not English must submit recent Test of English as a Foreign Language (TOEFL) scores; the current minimum score for consideration is 550 on the paper-based test (213 on the computer-based version).

Candidates for the M.F.A. degree must demonstrate talent in theatrical performance or production by audition or by the presentation of a portfolio of their work to an admissions committee of the faculty, either on campus or at one of the regional University/Resident Theatre Association (U/RTA) audition sites. M.F.A. candidates are admitted in the fall term only. The M.F.A. acting program accepts applications only every three years; the next academic years in which applications will be accepted are 2024-25 for Fall 2025 admission.

Master's and doctoral candidates should present records of at least a 3.0 grade point average in all subjects studied at the undergraduate and graduate levels, supply samples of their scholarly writing, and submitting recent Graduate Record Examination (GRE) scores is recommended. In addition to the Test of English as a Foreign Language (TOEFL) scores required of all foreign students, master's and doctoral candidates whose first language is not English are encouraged to submit scores of the Test of Written English (TWE). Ph.D. candidates should hold a master's degree in theatre or in a related field. Master's and doctoral candidates are normally admitted in the fall term.

for the degree of Doctor of Philosophy in Theatre

1. Students will engage the critical and aesthetic aspects of theatrical performance in a variety of historical periods and global contexts.
2. Students will develop projects within their own areas of specialization, drawing on dramatic literature and criticism, theatre history, performance theory, and performance research methods.
3. Students will combine theory and practice in the study and production of theatrical performance.
4. Students will be prepared to offer courses in theatre history, research methods, dramaturgy, and their areas of specialization.
5. Students will be prepared to participate in disciplinary debates through professional academic engagement and performance, including conference papers, book reviews, grant proposals, and creative research projects.

Theoretical & Applied Mechanics, MS

for the degree of Master of Science in Theoretical & Applied Mechanics

Prospective students planning to continue for the PhD should apply to the PhD program.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Admission Requirements

An applicant for admission to the Department of Mechanical Science and Engineering must:

1. Be a graduate of an institution awarding a baccalaureate degree equivalent to that granted by the University of Illinois at Urbana-Champaign;
2. Be adequately prepared for advanced study as demonstrated by his or her previous program of study and scholastic record; and
3. Be recommended for admission by the Department of Mechanical Science and Engineering. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required, and a minimum grade point average of 3.50 (A = 4.00) is required for any previous graduate work completed.

Currently the Graduate Record Examination (GRE) (http://www.ets.org/) is not required for the admissions application, but a student may elect to submit their scores.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

The Department of Mechanical Science and Engineering accepts MS applications for both Spring and Fall terms.

For detailed information, please see our admissions requirements webpage (https://mechse.illinois.edu/graduate/applying-mechse-graduate-programs/).

Financial Aid

Students admitted to the MS program are eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois. All applicants whose native language is not English, regardless of US citizenship, who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8.0 on the speaking subsection of the IELTS. Students who are already at Illinois may request to take the on-campus EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), for which the minimum passing score for TA eligibility is 4CP. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) prior to the start of their first semester as a teaching assistant.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in both the ME and TAM PhD programs. The TAM PhD requires that one semester of teaching assistantship be completed during the program.

Department Research

A new paradigm in research is being created in the department by integrating basic sciences such as biology, chemistry, applied mathematics, and applied physics with the traditional mechanical engineering and engineering mechanics disciplines of fluid mechanics/thermal sciences, solid mechanics/materials and controls/dynamics. This integration is fostering new directions and discoveries in nanomechanics, nanomanufacturing, biomechanics and computational science and engineering.

The goal of all research in the department is to address critical societal problems in the areas of health, security/defense, energy/environment, manufacturing, and transportation. While the basic function of departmental research is generation of new knowledge, a growing number of projects are prompted by current needs of the state of Illinois, the United States, and the world. For more information, see the department's research website (https://mechanical.illinois.edu/research/).

MechSE faculty are major participants in activities at the department, college, and university level via research centers and programs that are integral to the MechSE graduate program. For more information, see the department's research centers website (https://mechanical.illinois.edu/mechse-research-centers/).

MechSE's wealth of research laboratories allows faculty, graduate and undergraduate research assistants, and postdoctoral and visiting scholars to conduct theoretical and experimental investigations of phenomena related to materials behavior, combustion, micro- and nanomechanical systems, controls and dynamics, thermodynamics, biomechanics, and much more. For more information, see the department's research laboratories website (https://mechanical.illinois.edu/research/mechse-laboratories/).

for the degree of Master of Science in Theoretical & Applied Mechanics

---

A full-time student can usually complete the program requirements in one academic year of study. A student who has an assistantship can usually complete the requirements in one calendar year.

For additional details and requirements refer to the department's Graduate Program Website (https://mechse.illinois.edu/graduate/ms-programs/ms-theoretical-and-applied-mechanics/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
TAM 599	Thesis Research (min-max applied toward the degree)	4-8
TAM 500	Seminar (registration for 1 hour every term while in residence; credit does not apply toward the degree)	0

Total Hours		**32**

Other Requirements and Conditions

Requirement	Description
MSE 492 Lab Safety Fundamentals	
A minimum of 16 TAM credit hours, with 8 at the 500 level.	
A minimum of 12 500-level credit hours applied toward the degree	
No TAM 599 credit may be applied toward the elective course work requirement.	
A maximum of 4 hours of TAM 597 or ME 597 (or other approved independent study) may be applied toward the elective course work requirement.	
Other Requirements and Conditions may overlap	
Minimum GPA:	3.0

Non-Thesis Option

Code	Title	Hours
TAM 500	Seminar (registration for 1 hour every term while in residence; credit does not apply toward the degree)	0
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		36
Total Hours		**36**

Other Requirements and Conditions

Requirement	Description
Other Requirements and Conditions may overlap	
A minimum of 16 TAM credit hours, with 8 at the 500 level.	
A minimum of 12 500-level credit hours applied toward the degree	
A maximum of 4 hours of TAM 597 or ME 597 (or other approved independent study) may be applied toward the elective course work requirement.	
Departmental approval is required to pursue the non-thesis option.	
Minimum GPA:	3.0

for the degree of Master of Science in Theoretical & Applied Mechanics

Illinois MechSE TAM graduates will have:

1. A thorough understanding of the fundamentals of the engineering disciplines, namely, solid mechanics, fluid mechanics, and applied mathematics (core requirements). [MS/PhD]
2. A broad understanding of the various foundations of the engineering disciplines, including computational mechanics, mechanics of materials, biomechanics, dynamics, and nanomechanics (in the PhD program, breadth requirements). [MS/PhD]
3. Ability to identify relevant research subjects, outline strategies of inquiry, and demonstrate potential to bring the relevant research to completion. [MS/PhD]
4. Ability to communicate research results to scientific audience in conferences. [MS/PhD]
5. Ability to document research outcomes comprehensively for publication. [MS/PhD]

Theoretical & Applied Mechanics, PhD

for the degree of Doctor of Philosophy in Theoretical & Applied Mechanics

The PhD in Theoretical and Applied Mechanics (TAM) in the Department of Mechanical Science and Engineering is one of the only of its kind in the world, offering a rigorous curriculum with structured core and breadth required courses. These course requirements ensure all TAM graduate students develop a strong and broad foundation in mechanics as well as applied mathematics.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Admission Requirements

An applicant for admission to the Department of Mechanical Science and Engineering must:

1. Be a graduate of an institution awarding a baccalaureate degree equivalent to that granted by the University of Illinois Urbana-Champaign;
2. be adequately prepared for advanced study as demonstrated by his or her previous program of study and scholastic record; and
3. be recommended for admission by the Department of Mechanical Science and Engineering. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required, and a minimum grade point average of 3.50 (A = 4.00) is required for any previous graduate work completed.

Currently the Graduate Record Examination (GRE) (http://www.ets.org/) is not required for the admissions application, but a student may elect to submit their scores.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

The Department of Mechanical Science and Engineering accepts PhD applications for both Spring and Fall terms.

For detailed information, please see our admissions requirements webpage (https://mechse.illinois.edu/graduate/applying-mechse-graduate-programs/).

Financial Aid

Students admitted to the PhD program are eligible for Board of Trustees (BOT) tuition-waiver generating appointments at the University of Illinois, including research assistantships, teaching assistantships, and fellowships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants whose native language is not English, regardless of US citizenship, who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8.0 on the speaking subsection of the IELTS. Students who are already at Illinois may request to take the on-campus EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), for which the minimum passing score for TA eligibility is 4CP. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) prior to the start of their first semester as a teaching assistant.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in both the ME and TAM PhD programs. The TAM PhD requires that one semester of teaching assistantship be completed during the program.

Department Research

A new paradigm in research is being created in the department by integrating basic sciences such as biology, chemistry, applied mathematics, and applied physics with the traditional mechanical engineering and engineering mechanics disciplines of fluid mechanics/thermal sciences, solid mechanics/materials and controls/dynamics. This integration is fostering new directions and discoveries in nanomechanics, nanomanufacturing, biomechanics and computational science and engineering.

The goal of all research in the department is to address critical societal problems in the areas of health, security/defense, energy/environment, manufacturing, and transportation. While the basic function of departmental research is generation of new knowledge, a growing number of projects

are prompted by current needs of the state of Illinois, the United States, and the world. For more information, see the department's research website (https://mechanical.illinois.edu/research/).

MechSE faculty are major participants in activities at the department, college, and university level via research centers and programs that are integral to the MechSE graduate program. For more information, see the department's research centers website (https://mechanical.illinois.edu/mechse-research-centers/).

MechSE's wealth of research laboratories allows faculty, graduate and undergraduate research assistants, and postdoctoral and visiting scholars to conduct theoretical and experimental investigations of phenomena related to materials behavior, combustion, micro- and nanomechanical systems, controls and dynamics, thermodynamics, biomechanics, and much more. For more information, see the department's research laboratories website (https://mechanical.illinois.edu/research/mechse-laboratories/).

for the degree of Doctor of Philosophy in Theoretical & Applied Mechanics

---

Candidates for the Doctor of Philosophy degree are required to complete a minimum of 32 graduate hours of course work beyond the bachelor's degree with a minimum grade point average of 3.0.

Acceptance into the doctoral program requires good academic standing and successful completion of a Qualifying Examination (http://mechanical.illinois.edu/graduate/phd-programs/#PhDTAM), which is the defense of a scholarly work, such as a master's thesis. A student must also pass an oral preliminary examination based on the proposed thesis work.

For more details of the degree requirements for the Ph.D. program, visit the department's Graduate Program Website (http://mechanical.illinois.edu/graduate/mechse-graduate-degrees/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Requirements

Code	Title	Hours
TAM 599	Thesis Research (min-max applied toward the degree)	32-64
TAM 500	Seminar (registration for 1 hour every term while in residence; credit does not apply toward the degree)	0
Elective courses beyond core and breadth – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		0-32
Credit for minimum of 16 hours of TAM breadth courses from a departmental list, or equivalent as evaluated by the Associate Head for Mechanics.		
Course work is required from each of the following major areas, totaling 16 hrs: 2 courses total from applied mathematics, fluid mechanics, and solid mechanics, 1 course in mechanics of materials, and at least 1 course in either computational mechanics or experimental mechanics.		
Total Hours		**96**

Other Requirements and Conditions

Requirement	Description
Other Requirements and Conditions may overlap	
Credit for TAM 531 or 532, 541, 542, 551 or equivalent as evaluated by the Associate Head for Mechanics	
A 25% or more teaching assistantship for at least one semester.	
Continuous registration is required after the preliminary exam and until thesis deposit, while on campus and during semester of final defense.	
MSE 492 Lab Safety Fundamentals	
Ph.D. exam and dissertation requirements:	
Qualifying exam	
Preliminary exam	
Final exam or dissertation defense	
Dissertation deposit	
Minimum GPA:	3.0

for the degree of Doctor of Philosophy in Theoretical & Applied Mechanics

---

Illinois MechSE TAM graduates will have:

1. A thorough understanding of the fundamentals of the engineering disciplines, namely, solid mechanics, fluid mechanics, and applied mathematics (core requirements). [MS/PhD]
2. A broad understanding of the various foundations of the engineering disciplines, including computational mechanics, mechanics of materials, biomechanics, dynamics, and nanomechanics (in the PhD program, breadth requirements). [MS/PhD]
3. Ability to identify relevant research subjects, outline strategies of inquiry, and demonstrate potential to bring the relevant research to completion. [MS/PhD]
4. Ability to communicate research results to scientific audience in conferences. [MS/PhD]
5. Ability to document research outcomes comprehensively for publication. [MS/PhD]

Translation & Interpreting, MA

for the Master of Arts in Translation & Interpreting on campus or online

The Program in Translation and Interpreting Studies in the School of Literatures, Cultures and Linguistics offers a graduate program leading to the Master of Arts in Translation and Interpreting. Candidates for the master's degree may specialize in Translation for the Professions, Literary and Applied Literary Translation, Conference and Community Interpreting, or a combination of these areas. The MA program may be completed either on campus or online.

for the Master of Arts in Translation & Interpreting on campus or online

For general policies applying to graduate students, refer to the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; the requirements are listed below:

Code	Title	Hours
Core requirements		
TRST 407	Terminology	4
TRST 410	Translation and Interpreting Theory & Practice	4
TRST 500	Translation and Interpreting: Reflective Practice	4
TRST 540	Capstone	4
Specialization: Students must complete 8 hours in one specialization:		8
Specialization Course list on Program in Translation and Interpreting Studies webpage (https://translation.illinois.edu/academics/masters-program/)		
Elective courses		8
Elective Course list on Program in Translation and Interpreting Studies webpage (https://translation.illinois.edu/academics/masters-program/)		
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	2.75

for the Master of Arts in Translation & Interpreting on campus or online

1. Understanding of theories of and approaches to a variety of translation and interpreting fields
2. Awareness of cultural, ethical, and epistemological aspects of translation and interpreting practices
3. Understanding of and appreciation for language use as a cultural practice
4. Command of technical tools regularly used in translation or interpreting
5. Demonstrated skill in creation, management, and production of an individual project in a specialized subfield (interpreting, literary translation, technical and professional translation)

Urban Planning, MUP

for the degree of Master of Urban Planning in Urban Planning

The professionally accredited M.U.P. program prepares students for careers in planning practice. Such careers involve public service at all levels of government, in private consulting practice, in the nonprofit sector, and in a wide variety of organizations in need of planning services. The program also prepares students for advanced work leading to the Ph.D. degree and a career in teaching and research.

The M.U.P. curriculum consists of a focused set of core courses required of all students, concentration/elective courses, applied workshops, a recommended internship (reduces the hours needed to graduate by 4), and a capstone requirement. The program is purposely flexible so that students may design a program that builds their expertise in a concentration area of practice such as land use and environmental planning, transportation planning, community development for social justice, housing, sustainable design and development, local and regional economic development, and geographic information systems and analysis. The department also has an active international program designed to expose students to planning practices and challenges in Europe, Africa, Latin America, and Asia.

If a student has an undergraduate professional degree in urban planning, up to 16 hours may be waived by petition, and the student must take at least 30 hours of urban and regional planning courses at Illinois.

Please consult the department's website (https://urban.illinois.edu/programs-applying/master-urban-planning/) for additional information about the M.U.P. requirements.

The Department of Urban and Regional Planning offers graduate programs leading to the degrees of Master of Urban Planning and Doctor of Philosophy in Regional Planning. Students can also apply to obtain a joint degree with another graduate degree simultaneously. The most popular joint degrees are with Architecture, Landscape Architecture, Law and Agricultural and Applied Economics. Joint degrees with any related field are possible. In addition, a small number of the department's Bachelor of Arts in Urban Studies and Planning (B.A.U.S.P.) students participate in the highly selective 4+1 program (http://catalog.illinois.edu/undergraduate/faa/urban-studies-planning-ba-mup/) to complete the B.A.U.S.P. and M.U.P. in five years.

Admission

We welcome applications from people from a wide variety of backgrounds who have demonstrated potential for extraordinary professional achievement. Students seeking a graduate degree in planning come from a diverse range of academic backgrounds. The most frequent are sociology, economics, political science, geography, environmental sciences, architecture, engineering, public administration, urban planning, and public policy, but the natural sciences, humanities, and other fields also provide excellent foundations for graduate study in planning. Prospective students must have a grade point average (GPA) of at least 3.0 computed from the last 60 hours of undergraduate work and any subsequent graduate study, but the average GPA of admitted students is considerably higher. International applicants must meet additional minimum requirements (http://www.grad.illinois.edu/admissions/countries/) based on their country of origin, including the Test of English as a Foreign Language (TOEFL).

We place particular emphasis on each applicant's statement of purpose. Applicants should use the statement to convey information about their backgrounds, professional and personal experience, and intellectual perspectives, in the context of articulating why a Master's in Urban Planning or Ph.D. in Regional Planning from the University of Illinois Urbana-Champaign will help them achieve their professional goals. We seek an applicant pool that represents a mix of racial and ethnic populations, a range of social and economic backgrounds, different philosophies and perspectives, and a variety of life experiences. We are especially interested in applicants with professional experience, though that experience need not be in planning or closely related fields.

Applicants to the Ph.D. program are admitted when they meet the standards of the Department and have a faculty member prepared to serve as their mentor and, if necessary, primary source of financial support. Students interested in pursuing a Ph.D. in Regional Planning should communicate with the Director of the Ph.D. Program and faculty most closely aligned with their interests, in addition to completing the formal application process.

Consult the M.U.P. admissions (https://urban.illinois.edu/programs-applying/master-urban-planning/how-to-apply-mup/) and Ph.D. admissions (https://urban.illinois.edu/programs-applying/phd-regional-planning/how-to-apply-phd/) web pages for more information.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the doctoral experience in this program and is strongly encouraged for those intending to pursue an academic career.

Faculty Research Interests

The mission of the Department of Urban and Regional Planning is to teach and conduct research to improve understanding of human settlements and of planning situations. The department’s faculty studies the ecological, economic, social, and institutional aspects of urban and regional development, and the theory and practice of planning processes. Planning is viewed as the achievement of outcomes based on interrelated actions over time and space, and close communication and collaboration with a wide range of disciplines and professions is inherent in the department’s approach. The

basis of that collaboration is a faculty whose academic training and degrees are in architecture, economics, geography, history, law, political science, regional science, and zoology, in addition to planning. Planning faculty and doctoral students pursue interdisciplinary research and make scholarly contributions to planning and fields closely allied with planning.

Facilities and Resources

The Department of Urban and Regional Planning shares Temple Hoyne Buell Hall (TBH) with the Department of Landscape Architecture and the School of Architecture. The majority of urban planning classes are held in TBH. Doctoral student workspace is provided in the Architecture Building, near TBH.

The City Planning and Landscape Architecture Reference and Resource Center is located in Funk Library (http://www.library.uiuc.edu/agx/). The planning collection is one of the finest in the world, with books and reports gathered since the collection started over eighty years ago.

Financial Aid

Students compete for departmental and Graduate College fellowships and departmental teaching and research assistantships. Selection is based on the academic achievement and qualifications of the student.

for the degree of Master of Urban Planning in Urban Planning

Other requirements may overlap	
Minimum Hours Required Within the Unit:	40
Minimum 500-level Hours Required Overall:	16 (12 in UP)
Minimum GPA:	3.0

for the degree of Master of Urban Planning in Urban Planning

Students who complete a degree in the Department of Urban and Regional Planning will be able to:

1. Identify and understand the planners' role in:
   a. advocating for racial and economic equity;
   b. planning for the needs of disadvantaged groups;
   c. expanding choice and opportunity;
   d. reducing inequities through critical evaluation of systems and institutions;
   e. planning for sustainable communities;

f. reducing impacts of climate change; and
g. creating equitable and climate#adapted futures.

2. Demonstrate planning proficiency in a global context in the areas of:
   a. history, theory, law and institutions;
   b. the evolution of the practice of planning; and
   c. urban and regional development.
3. Build and put into practice a set of skills that are central to the planning profession, including skills specific to:
   a. communication, community engagement, and the planning process;
   b. research and critical thinking;
   c. mapping and data visualization; and
   d. data collection and analysis, and data analytics.
4. Illustrate professional leadership values including collaborative skills and ethical behavior in research, client representation and decision-making.

VMS - Comparative Biosciences, PhD

for the degree of Doctor of Philosophy in Veterinary Medical Science - Comparative Biosciences

Admission

Applicants for graduate study in Comparative Biosciences must have a minimum grade point average of 3.0 (A = 4.0). Grade point averages will be calculated on the last 60 hours of undergraduate studies for those without the D.V.M. degree and on the entire professional curriculum for those with the D.V.M. or equivalent degree. Applicants with a graduate degree or with some graduate coursework will be evaluated on the basis of their graduate work as well as their undergraduate or professional records. Qualifications of students must be approved by the department's Graduate Studies Committee.

The Graduate Record Examination (GRE) is optional.

Domestic and international applicants whose native language is not English must fulfill the language requirements as stated by the Graduate College (Refer to the guidelines of the Graduate College (https://grad.illinois.edu/admissions/instructions/04c/)). Those applicants who may gain admission based on their exceptionally high academic credentials but scored below the required Graduate College scores will be admitted on limited (or probational) status and are required to take the English Placement Test (EPT), administered by Illinois upon their arrival.

An applicant may be exempt from taking the language requirements if, within five years of the proposed date of enrollment in the University of Illinois Urbana-Champaign, they have successfully completed at least two academic semesters as a full-time study in a country where English is the primary language and in a school where English is the primary instructional language. The student will need to petition the Graduate Program for this exemption.

All students whose native language is not English and are interested in a Teaching Assistantship with contact with students must take the English Proficiency Interview (EPI) examination and pass.

Joint Degree Programs

Students accepted into the Veterinary Medical Scholars Program (https://vetmed.illinois.edu/education/doctor-veterinary-medicine-degree/research-opportunities-dvm-students/veterinary-medical-scholars-program/) can complete a D.V.M. and Ph.D. degree.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Faculty Research Interests

Experimental models range from stem cells to rodent models to domestic animals, and human patients. Exciting research is being conducted by CB faculty in the areas of:

- endocrine/reproductive biology
- developmental and stem cell research
- neurobiology
- comparative pharmacology and toxicology
- biochemistry

Training Programs, Centers, and Institutes

Our faculty provide graduate instruction in stem cell research, molecular genetics, pharmacology and toxicology. They also participate in interdisciplinary training programs including the NIEHS-funded Environmental Toxicology Training Program (http://vetmed.illinois.edu/cb/nihtox/), the Interdisciplinary Environmental Toxicology Training Program (https://vetmed.illinois.edu/ietp/), the Reproductive Biology Program (https://vetmed.illinois.edu/peer/), the Neuroscience Program (http://neuroscience.illinois.edu/), the Nutritional Sciences Division (https://nutrsci.illinois.edu/), Beckman Institute (http://www.beckman.uiuc.edu/), and the Institute for Genomic Biology (http://www.igb.illinois.edu/).

Financial Aid

A limited number of research and teaching assistantships or fellowship positions are available.

for the degree of Doctor of Philosophy in Veterinary Medical Science - Comparative Biosciences

For additional details and requirements refer to the department's degree programs information (https://vetmed.illinois.edu/intranet-cb/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
CB 590	Seminar (Thesis Defense seminar 1 hour and Prospectus Exam 1 hour)	2
CB 591	Biosciences Seminar Series (May be repeated for up to 4 hours of credit)	2

VMS - Pathobiology, MS

for the degree of Master of Science in Veterinary Medical Science - Pathobiology

---

In the Department of Pathobiology, you will address complex biomedical problems in human and animal health at the cellular, host, and population levels. Graduate education is centered around providing students with unique training experiences in preparation for careers in academics, industry, and public service. A minimum number of required courses creates flexibility for students to explore an individualized program of study. The graduate student experience goes beyond the classroom and research laboratory to include participation in career-building activities, such as the annual Pathobiology Graduate Student EXPO and the College of Veterinary Medicine's Research Day, among others. Students are also encouraged to participate in regional, national, and international conferences.

The Department of Pathobiology offers graduate programs leading to the Master of Science degree. Areas of specialization include bacteriology, cancer biology, computational biology, epidemiology, immunology, parasitology, and virology. Each specialty area has a core of required courses supplemented by other courses within the Department of Pathobiology and from other departments of the Graduate College. Adequate laboratory and animal holding space to conduct the research of the faculty and graduate students is provided in the Basic Sciences Building, Veterinary Teaching Hospitals, and the Veterinary Research Farm.

Admission

Graduated from a college or university approved by the Illinois and must have a minimum grade-point average of 3.0 (based on 4.0 = A), exclusive of required physical education and military training courses. Applicants with a grade-point average of 2.75 may be considered for admission with limited status. Applicants with a graduate degree or some graduate coursework will be evaluated based on their graduate work and their undergraduate or professional record. Applicants with a professional degree (DVM, MD, etc.) are not restricted to a minimum GPA of 3.0 for that professional degree. Submission of GRE scores is optional.

The department's Graduate Admissions Committee must approve admission of students.

All international degree-seeking applicants are required to submit the results of an accepted test as evidence of English proficiency unless they qualify for a waiver or exemption. Official scores are required to be submitted directly from the testing agency. All scores must be dated within two years of the beginning of the proposed admission term. The Graduate College Website lists specific requirements and waiver options (English proficiency requirements for graduate admission).

Faculty Research Interests

Expertise in the Department of Pathobiology spans bacteriology, cancer biology, computational biology, epidemiology, immunology, parasitology, and virology. Through its multidisciplinary approach, the department addresses complex problems in biomedical and veterinary sciences. Research focuses on multi-host disease systems to improve human and animal health at the individual and population levels in a broad social and environmental context. Specific areas of research interest include:

- Molecular mechanisms of infection, host-pathogen interactions, and immunity
- Strategies for vaccine design and disease control
- Molecular virology
- Bacteriology
- Cancer biology
- Spatial and contextual aspects of health and illness, combining human, animal, and ecosystem health
- Mathematical modeling of infectious diseases to promote disease control
- Foreign animal disease prevention, preparedness, and response

Training Programs, Centers and Institutes

Our faculty provides undergraduate and graduate instruction in molecular bacteriology, immunology, parasitology, and virology; cancer biology; and infectious disease epidemiology and surveillance. They also participate in interdisciplinary training programs including the Emergent Behaviors of Integrated Cellular Systems (EBICS) Center, the Division of Nutritional Sciences (https://nutrsci.illinois.edu/) , Beckman Institute (https://beckman.illinois.edu/), and the Institute for Genomic Biology (https://www.igb.illinois.edu/).

Financial Aid

A limited number of teaching and research assistantship positions are available.

for the degree of Master of Science in Veterinary Medical Science - Pathobiology

College of Veterinary Medicine Pathobiology Graduate Program students are expected to meet the following learning outcomes upon completing their degrees.

1. Communicate effectively in oral and written form.
2. Gather, assimilate, and process information to reach sound logical conclusions.
3. Apply scientific reasoning and evidence-based conclusions to problems in Pathobiology.
4. Demonstrate comprehensive knowledge of their chosen sub-discipline (virology, bacteriology, immunology, epidemiology, and parasitology) that forms the foundation of scientific study in infectious diseases of humans and animals.
5. Formulate ideas and concepts and perform hypothesis-driven research beyond the current boundary of knowledge to make substantive contributions to the field.
6. Demonstrate mastery in scientific techniques, methodology, critical analysis, and data analysis.
7. Be prepared to perform high-quality research in academia, industry, or government agencies ethically and professionally for the betterment of human and animal health.

Admissions

Karen Nichols (klp68@illinois.edu)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

VMS - Pathobiology, PhD

for the degree of Doctor of Philosophy in Veterinary Medical Science - Pathobiology

The Department of Pathobiology offers graduate programs leading to the degree of Master of Science. Areas of specialization include epidemiology, infectious diseases, immunology, virology, bacteriology, anatomic pathology, and clinical pathology. Each specialty area has a core of required courses supplemented by other courses within the Department of Pathobiology and from other departments of the Graduate College. Adequate laboratory and animal holding space to conduct the research of the faculty and graduate students is provided in the Basic Sciences Building, Veterinary Teaching Hospitals, and the Veterinary Research Farm.

Admission

Applicants for graduate study in the Department of Pathobiology must have a minimum grade point average of 3.0 (A = 4.0). Grade point averages will be calculated on the last 60 hours of undergraduate studies for those without the D.V.M. degree and on the entire professional curriculum for those with the D.V.M., or equivalent, degree. Applicants with a graduate degree or with some graduate coursework will be evaluated on the basis of their graduate work as well as their undergraduate or professional records. Qualifications of students must be approved by the department's Graduate Admissions Committee.

The Graduate Record Examination (GRE) is required and must have been taken within the last five years prior to application. Usually, successful candidates score an average in the 80th percentile or higher on each of the three portions of the GRE to be eligible for consideration.

International applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL). A score of at least 600 on the paper-based test, or 250 on the computer-based test, is required. Those applicants who gain admission on the basis of their academic credentials, but score below 600 on the TOEFL, will be admitted on limited status and required to take the English Placement Test (EPT) upon their arrival. Students are exempt from the TOEFL requirement if they have completed at least two academic years of full-time study at an institution where the language of instruction is English during the five-year period prior to the proposed date of enrollment. Students also need to take the Test of Spoken English (TSE) oral exam and score at least 50. We are not accepting applications for the M.S./D.V.M. program at this time.

Specialization in Infectious Diseases

The Department of Pathobiology offers an area of specialization in infectious diseases. The program is flexible and provides the student with proficiency in several areas of epidemiology, immunology, parasitology, virology, bacteriology and molecular pathogenesis of infectious disease and ecology of infectious diseases. Students electing this area should have completed coursework in basic genetics, biochemistry, and microbiology. The program of study for each student in the specialization is decided individually. Interested students should direct inquiries and applications to the department.

Specialization in Anatomic, Clinical and Zoo Pathology

The Department of Pathobiology offers an area of specialization in anatomic, clinical, and zoo pathology. These programs are residency programs available to qualified graduate veterinarians. Veterinarians entering this specialization will be specifically trained in pathology so they can function as competent and innovative professionals and assume leadership roles in academia, government, and industry. Students electing this area must have completed coursework in the D.V.M. curriculum. The program of study for each student in these specializations is decided individually. Interested students should direct inquiries and applications to the department. Students completing the specialization will be qualified to take the ACVP Board examinations during the program.

Joint Degree Program

Students accepted into the Veterinary Medical Scholars Program (https://vetmed.illinois.edu/education/dvm-phd-program/) can complete a D.V.M. and Ph.D. simultaneously.

Faculty Research Interests

Expertise in the Department of Pathobiology spans epidemiology, immunology, parasitology, virology, bacteriology and comparative pathology. Through its multidisciplinary approach, the department addresses complex problems in biomedical and veterinary sciences. Research emphasizes multi-host disease systems, with the goal of improving human and animal health at the individual and population levels in a broad social and environmental context. Specific areas of research interest include:

- Molecular mechanisms of infection, host-pathogen interactions, and immunity
- Strategies for vaccine design and disease control
- Experimental pathology
- Molecular virology

- Bacteriology
- Cancer biology
- Spatial and contextual aspects of health and illness, combining human, animal, and ecosystem health
- Mathematical modeling of infectious diseases to promote disease control
- Foreign animal disease prevention, preparedness, and response

Training Programs, Centers and Institutes

Our faculty provide undergraduate and graduate instruction in molecular virology, infectious diseases, epidemiology, bacteriology, parasitology and anatomic and clinical pathology. They also participate in interdisciplinary training programs including the Emergent Behaviors of Integrated Cellular Systems (EBICS) Center, the Division of Nutritional Sciences (http://www.nutrsci.illinois.edu/) , Beckman Institute (http://www.beckman.uiuc.edu/), and the Institute for Genomic Biology (http://www.igb.illinois.edu/). Pathobiology faculty also lead the Anatomical and Clinical Pathology Residency Program (http://vetmed.illinois.edu/cb/vcpharm.html), which prepares graduate veterinarians for the certifying examination of the American College of Veterinary Pathologists (ACVP).

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all M.S. candidates in this program.

Financial Aid

A limited number of teaching and research assistantships or associate positions are available.

VMS - Veterinary Clinical Medicine, MS

for the degree of Master of Science in Veterinary Medical Science - Veterinary Clinical Medicine

---

The Department of Veterinary Clinical Medicine offers a graduate program leading to the degree of Master of Science. The primary goal of graduate programs in veterinary clinical medicine is to prepare students for careers involving research and/or teaching in a specialty area. Graduate work in veterinary clinical medicine may be pursued in several areas, including:

- anesthesiology
- equine medicine and surgery
- equine theriogeneology
- farm animal reproduction (theriogenology)
- medicine
- surgery
- imaging/radiation therapy
- small animal medicine (emergency and critical care, internal medicine)
- small animal surgery
- specialty medicine (cardiology, dentistry, dermatology, oncology, ophthalmology)
- zoological medicine

The department, with the teaching hospital, has facilities and equipment for studying the health and diseases of animals.

After completing graduate work, the student will be able to conduct research both independently and as a team member. Adequate training in planning research projects and writing research proposals will give the student the ability to function with teams of scientists from various areas of the biomedical field. Experience in clinical teaching and literature study will form the basis for the student's development of teaching programs within his or her discipline.

A residency program, designed to train a veterinarian for specialty clinical practice, can be combined with the graduate program. While a graduate program can be accomplished in a shorter time period, the duration of combined programs is usually three years, reflecting the time required to satisfy the objective of each program. Details of the residency program can be obtained from the Program Secretary of the Department of Veterinary Clinical Medicine.

Admission

Admission requirements include a doctor of veterinary medicine (D.V.M.) degree or equivalent. By petition, non-D.V.M.s may be admitted. Applicants for graduate study in veterinary clinical medicine must have a minimum grade point average of 3.0 (A = 4.0). Admission averages are computed from the entire professional curriculum or from the last 60 hours of undergraduate studies for those without the D.V.M. degree. Applicants with a grade point average between 2.5 and 3.0 may be considered for admission on limited status on the basis of individual merit. Applicants who have a prior graduate degree or who have completed some graduate course work will be evaluated on the basis of their graduate work as well as their under-graduate or professional records. Acceptance of students must be approved by the department's Graduate Committee.

International applicants must submit evidence of satisfactory performance on TOEFL or other tests designed to test proficiency in English. International students must also submit evidence of financial support.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all M.S. candidates in this program.

Financial Aid

A limited number of research associate positions are available.

for the degree of Master of Science in Veterinary Medical Science - Veterinary Clinical Medicine

---

The requirements for this degree include completion of a thesis that conforms to the requirements of the Department of Veterinary Clinical Medicine. The non-thesis option requires departmental approval.

The candidate must complete all requirements of the department and the Graduate College and pass the stipulated examinations. The final M.S. examination consists of a presentation of the thesis in the form of a departmental seminar (VCM 590). The seminar is followed by an oral examination

administered by the candidate's committee and the department head. The student must demonstrate the ability to design and conduct independent research in order to be granted the M.S. degree.

For additional details and requirements refer to the department's graduate degree requirements and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed with or without a thesis, the requirements are listed below:

Code	Title	Hours
Thesis Option:		
Total Hours	Thesis Option	32
One statistics course		
VCM 590	Seminar	1
Graduate electives at the 400 or 500 level in consultation with your advisor		8
VCM 592	Special Problems (optional, max 12)	12
VCM 593	Adv Topics Vet Clin Med (optional, max 8)	8
VCM 599	Thesis Research (min/max applied toward degree)	0-12
Manuscript Based (Non-Thesis) Option		
VCM 590	Seminar	0 to 1
Graduate electives at the 400 or 500 level in consultation with your advisor		8
VCM 592	Special Problems	1 to 4
VCM 593	Adv Topics Vet Clin Med	1 to 4
VCM 598	Manuscript Research	0 to 12
Total Hours	Non-Thesis Option	32

Weather and Climate Risk and Analytics, MS

for the Master of Science in Weather and Climate Risk and Analytics, online

Students in the Master of Science degree program will focus specifically on Weather and Climate Risk and Analytics. This program is intended as a terminal degree for students already engaged in preparing for professional work in atmospheric science and related fields. It is delivered online and is designed to be completed within two years.

Admission

Applications for admission are encouraged from students with bachelor's degrees in atmospheric sciences, meteorology, physics, mathematics, computer science, geography, engineering, oceanography, and related fields. It is strongly recommended that students who intend to study for advanced degrees in atmospheric sciences know the fundamentals of classical physics and applied mathematics. Applicants whose native language is not English are required to take the English Placement Test if accepted. All applicants are required to submit three letters of reference.

Faculty Research Interests

The atmospheric science degree programs are designed for students interested in research and applications on a wide variety of atmospheric topics. Faculty areas of research include atmospheric chemistry and aerosols; climate modeling, processes, change, and assessments; cloud physics and radiative processes; convective-storm dynamics and modeling; extratropical cyclones and winter storms; precipitation and hydrometeorological processes; satellite and radar remote sensing; tropical meteorology and hurricanes; and weather and climate risk. This research is carried out in national field campaigns, in theoretical studies, and in numerical modeling efforts using a wide range of models.

Research Facilities

The Department maintains an extensive computing infrastructure, which is a vital component of all of its educational, research and outreach endeavors. A Departmental computer lab is available for hands-on class exercises. Computers and display projectors are provided in classroom areas, and wireless access exists throughout the buildings. The Department hosts a synoptic/GIS laboratory, a data visualization laboratory, and an instruments lab all within the Natural History Building. A high-capacity network connects these to various computing resources on campus as well as within the Department.

The cornerstone of the Department's research computing capabilities is the compute cluster *Keeling,* which currently is composed of several thousand CPU cores and TB of storage. *Keeling* allows for numerical simulation and analysis of atmospheric processes ranging from the formation of individual ice crystals to century long climate simulations over the globe and are used for storing, analyzing and visualizing the results. Our faculty research groups regularly take advantage of high-performance computing resources, including the Blue Waters Petascale computing facility, and the NCAR Supercomputing facility.

We receive and process a large quantity of real-time meteorological data and numerical forecasts from a variety of sources including NOAA, UCAR, peer institutions, and international vendors. These are analyzed and visualized with a variety of tools to aid in the understanding of current weather events and case studies of recent major events.

Finally, the Department has numerous capabilities for meteorological observations and measurement in teaching and research. This includes: a QuantAQ system, used to collect data on air quality; two iMET mobile sounding systems; a trailer-mounted, 915 MHz radar wind profiler, manufactured by Radiometrics; and SCAMP (System for Characterizing and Measuring Precipitation (SCAMP), which is designed to quantitatively characterize the vertical profile of precipitation particles, measure the particle size distributions and surface precipitation, and also document the scavenging of air particulates by the falling precipitation. SCAMP includes a Micro Rain Radar, an OTT Parsivel Optical Disdrometer, an MPS Particle Spectrometer, a Geonor T-200B Precipitation Gauge, a TSI Optical Particle Sizer, and a Lufft Ultrasonic Weather Station. All of these instruments can be mounted on a flatbed trailer, and transported by the Department's Ford Cargo Van.

Financial Aid

This online program is self-supporting and DOES NOT accept the following tuition and fee waivers (TFWs): Non-Academic waivers (including Illinois employees and employees of other state institutions), Academic waivers from Illinois, UIC and UIS employees, Related Agency waivers, waivers granted through fellowships/assistantships as governed by the Graduate College at Illinois, or Retiree waivers. Students in these programs are not eligible to hold a waiver generating graduate appointment (Assistantship or Fellowship). Full time employees may be admitted to these programs, but their employee waiver is not eligible for use towards this program. This program accepts statutory waivers (veteran grants, etc.)

for the Master of Science in Weather and Climate Risk and Analytics, online

Students in the Master of Science Degree program will focus specifically on *Weather and Climate Risk and Analytics*. A graduate concentration constitutes a coherent program of study requiring additional breadth or considerable depth of knowledge. A concentration may refer to a subfield within a discipline, or to an interdepartmental and/or interdisciplinary area of knowledge. Concentrations appear on academic transcripts.

Some concentrations (major-based) are only open to a student majoring in the offering department. Other concentrations (floating) are open to students in a broad range of majors. Both types are listed here, with the eligible programs listed below each concentration.

Accountancy Graduate Concentration

for the Graduate Concentration in Accountancy

The Accountancy concentration is available for:

- Finance, MS (p. 1442)
- Management, MS (p. 1639)
- Technology Management, MS (p. 1939)

Graduate Degree Programs in Accountancy

Graduate Majors:

- Accountancy, MAS (p. 1052)
  - with optional concentrations:
    - Corporate Governance & International Business (p. 2003)
    - Data Analytics in Accountancy (p. 2005)
    - Finance (p. 1442)
    - Information Technology & Control (p. 2036)
    - Real Estate (p. 2047)
    - Supply Chain Management (p. 2057)
    - Taxation (p. 1054)
- Accountancy, MS (p. 1056) (on campus & online)
  - with optional on campus concentrations:
    - Corporate Governance & International Business (p. 2003)
    - Data Analytics in Accountancy (p. 2005)
    - Information Technology & Control (p. 2036)
    - Supply Chain Management (p. 2057)
- Accountancy, PhD (p. 1060)

Graduate Minors:

- Accountancy (p. 2157)

Graduate Concentrations:

- Accountancy (p. 1993)
- Data Analytics in Accountancy (p. 2005)

Admission

Applicants will complete a Graduate Concentration in Accountancy application, signed by their graduate advisor and/or graduate program director. The Director of the MSA program will monitor the admission process.

Admission is limited and acceptance is on a competitive basis.

Faculty Research Interests

Faculty research interests are in the areas of marketing, organizational behavior, organization theory, decision sciences, information systems, strategic management, risk analysis, judgment under uncertainty, international business, production and operations management, accounting, economics, entrepreneurship, and finance. The Gies College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

This concentration requires twelve graduate hours of coursework. Admission to the concentration requires an application to the Department and admission to one of the following graduate programs:

- Finance, MS (MSF)
- Technology Management, MS (MSTM)
- Management, MS (MSM)

Admission is limited and acceptance is on a competitive basis.

for the Graduate Concentration in Accountancy

Code	Title	Hours
Choose three from this list:		
ACCY 501	Accounting Analysis I	4
ACCY 502	Accounting Analysis II	4
ACCY 503	Managerial Accounting	4
or ACCY 517	Financial Statement Analysis and Valuation	
Or, substitute graduate accountancy courses approved by the Accountancy MSA Academic Director		
Total Hours		**12**

Other Requirements

Requirement	Description
In addition to the concentration requirements, students must also complete the requirements of their major degree.

Advanced Analytics in Industrial & Enterprise Systems Engineering Concentration

for the Graduate Concentration in Advanced Analytics in Industrial & Enterprise Systems Engineering (on campus & online)

The Advanced Analytics in Industrial & Enterprise Systems Engineering Concentration prepares students to relate the application of engineering approaches and methods to the analysis and management of engineering and business processes which are data-oriented. Students will be able to provide companies and organizations with the ability to convert the massive amounts of data received into useful information that can help shape the decisions companies and organizations make.

Students must be enrolled in the Industrial Engineering MS (p. 1557) (thesis or non-thesis) or Financial Engineering MS (p. 1449) degree programs. After the first enrolled semester the student notifies the ISE Graduate Programs Office of their intention to enroll in the concentration and file a petition to add the Advanced Analytics Concentration with the Graduate College.

for the Graduate Concentration in Advanced Analytics in Industrial & Enterprise Systems Engineering (on campus & online)

The Advanced Analytics in Industrial & Enterprise Engineering Concentration is available and all 12 hours count towards completion of:

- **Industrial Engineering MS (p. 1557)**
- **Financial Engineering, MS (p. 1449)**

Code	Title	Hours
Advanced Analytics Core:		**8**
IE 434	Deep Learning: Mathematics and Applications (Deep Learning: Mathematics and Applications)	
IE 522	Statistical Methods in Finance	
IE 525	Stochastic Calculus & Numerical Models in Finance	
IE 529	Stats of Big Data & Clustering	
IE 531	Algorithms for Data Analytics	
IE 532	Analysis of Network Data	
IE 533	Big Graphs and Social Networks	
IE 534	Deep Learning	
Take an additional core course from above, or select one from list below		**4**
Advanced Analytics Secondary:		
IE 400	Design & Anlys of Experiments	
IE 410	Advanced Topics in Stochastic Processes & Applications	
IE 411	Optimization of Large Systems	
IE 510	Applied Nonlinear Programming	
IE 511	Integer Programming	
IE 514	Optimization Methods for Large-Scale, Network-Based Systems	
IE 521	Convex Optimization	
IE 523	Financial Computing	
SE 524	Data-Based Systems Modeling	
Total Hours		**12**

Other Requirements

Requirement	Description
Students to earn a B or better in each concentration course.

African American Studies Concentration

for the Graduate Concentration in African American Studies

Those wishing to apply for the concentration must submit three letters of recommendation, as well as a brief personal essay describing their background and career plans and explaining how a concentration in African American Studies enhances their primary program of study. Students must be accepted into the concentration. Students also would be expected to have a faculty member affiliated with the department on their doctoral committee. For admission to the concentration or for more information, please contact DAAS. A student's intent to pursue a graduate concentration must be approved by the student's adviser and graduate program director.

Graduate Programs in African American Studies

Bilingual-Bicultural Education Concentration

for the Graduate Concentration in Bilingual-Bicultural Education (on campus & online)

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, an updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/ci/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Facilities and Resources

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

This concentration is available for:

- Curriculum and Instruction, EdD (p. 1290)|Curriculum and Instruction, EdM (p. 1292)|Curriculum and Instruction, MA (p. 1298)|Curriculum and Instruction, MS (p. 1301)|Curriculum and Instruction, CAS (p. 1287)
- Early Childhood Education, EdM (p. 1311)|
- Educational Policy, Organization & Leadership, EdD (p. 1344)|Educational Policy, Organization & Leadership, EdM (p. 1337)|Educational Policy, Organization & Leadership, MA (p. 1340)|
- Educational Psychology, EdM (p. 1349)|Educational Psychology, MA (p. 1353)|Educational Psychology, MS (p. 1357)|
- Elementary Education, EdM (p. 1372)|
- Secondary Education, EdM (p. 1853)|
- Special Education, EdM (p. 1896)|

PhD students seeking a concentration should select the SLATE concentration offered by Linguistics instead.

Students may add the concentration to the Curriculum and Instruction online EdM program at the time of admission or petition to add the concentration during their degree program in the majors listed above.

for the Graduate Concentration in Bilingual-Bicultural Education (on campus & online)

For additional details and important requirements, please refer to the College of Education Graduate Handbook (https://education.illinois.edu/student-resources/graduate/coe-graduate-handbook/edm/) and the Graduate College Graduate Handbook (https://grad.illinois.edu/document/handbook/).

Students in the Curriculum and Instruction Ed.M. without licensure program will have a 32-hour program, including electives and foundations courses. All other Curriculum and Instruction programs allow this concentration to count toward the program hours.

Students pursuing this concentration in Educational Psychology or Special Education will be required to complete the required coursework (20 hours) in excess of their program of study.

Educational Policy, Organization & Leadership students will complete the required coursework (20 hours) in excess of their program of study unless they are in the Learning Design and Leadership concentration. CI 433 and CI 517 may be counted towards both the concentration and the degree.

The Department of Curriculum and Instruction offers a concentration in Bilingual-Bicultural Education. Students in the following graduate programs may take the concentration as part of their program of study:

• Curriculum & Instruction: EDM, MA, MS, CAS, EDD
• Early Childhood Education: EDM
• Elementary Education: EDM
• Secondary Education: EDM

Students pursuing this concentration in Educational Psychology, Special Education, or Education Policy, Organization and Leadership concentrations other than Learning Design and Leadership will be required to complete the required coursework (20 hours) in excess of their program of study.

PhD students seeking a concentration should select the SLATE concentration offered by Linguistics instead.

Students may add the concentration at the time of admission or petition to add the concentration during their degree program.

Business Data Analytics

for the Graduate Concentration in Business Data Analytics

The concentration in Business Data Analytics is designed to develop managers who understand how to leverage data to innovate and make decisions.

The concentration is open to students enrolled in:

- Management, MS (p. 1639)
- Technology Management, MS (p. 1939)

Admission

Admission to the concentration requires a Graduate Student Request Form submitted to the Department and Graduate College and enrollment in a Gies College of Business graduate program or other graduate approved for the concentration. Admission is limited, and acceptance is considered based on a student's academic standing and space availability.

for the Graduate Concentration in Business Data Analytics

This concentration requires twelve graduate hours of Business Data Analytics coursework. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Admission to the concentration requires the student to submit the appropriate form to the Department and Graduate College and enrollment in a Gies College of Business graduate program or other graduate approved for the concentration. Admission is limited, and acceptance is considered based on a student's academic standing and space availability.

Code	Title	Hours
BADM 554	Enterprise Database Management	4
BDI 513	Data Storytelling	4
FIN 550	Big Data Analytics in Finance for Predictive and Causal Analysis	4

Other Requirements

Requirement	Description
Minimum 500-level Hours Required Overall	4
Minimum GPA	2.75

for the Graduate Concentration in Business Data Analytics

1. Identify research questions to be answered by data
   a. Identify and frame the business situation
   b. Specify the problem/question/hypothesis
   c. Plan the analytics approach
2. Source Data
   a. Plan data sourcing activities
   b. Identify Data Sources
   c. Perform data setup, access and preparation
3. Analyze Data
   a. Perform exploratory analysis
   b. Select and apply causal and predictive models
   c. Evaluate and adjust analysis process to answer the research question
4. Interpret/Report Results
   a. Identify research questions to be answered by data
   b. Identify and frame the business situation
   c. Specify the problem/question/hypothesis
   d. Plan the analytics approach
   e. Derive insights from the analysis and create a narrative with visualizations to communicate the recommendations

Computational Science & Engineering Concentration

for the Graduate Concentration in Computational Science & Engineering

The heart of Computational Science and Engineering (CSE) is to develop innovative ways of solving engineering and scientific problems using computation as a tool. This new form of science compresses the development process in engineering and engenders knowledge discovery with a

new paradigm in many areas because it enables “virtual experiments” and helps focus physical experiments to reduce or eliminate trial-end-error laboratory-based approaches. Further, it teaches students to solve complex problems with prevailing computer technology.

The CSE graduate concentration is designed to provide graduate students at both the Masters and PhD levels with a solid base in problem-solving using computation as a major tool for modeling complicated problems in science and engineering. This concentration is not part of the MEng in Engineering degree program.

This concentration requires students to complete 16 graduate credit hours. Courses taken toward this concentration will count towards the student’s graduate degree for students enrolled in:

- Actuarial Science, MS (p. 1063)
- Aerospace Engineering, MS (p. 1068)|Aerospace Engineering, PhD (p. 1072)
- Agricultural & Biological Engineering, MS (p. 1086)|Agricultural & Biological Engineering, PhD (p. 1089)
- Applied Mathematics, MS (p. 1109)
- Astronomy, PhD (p. 1154)
- Atmospheric Sciences, MS (p. 1158)|Atmospheric Sciences, PhD (p. 1161)
- Bioengineering, PhD (p. 1178)
- Biophysics & Quantitative Biology, PhD (p. 1202)
- Chemical Engineering, PhD (p. 1227)
- Chemistry, PhD (p. 1231)
- Civil Engineering, MS (p. 1234)|Civil Engineering, PhD (p. 1237)
- Computer Science, MCS (p. 1270)|Computer Science, MS (p. 1272)|Computer Science, PhD (p. 1275)
- Electrical & Computer Engineering, MS (p. 1367)|Electrical & Computer Engineering, PhD (p. 1369)
- Entomology, MS (p. 1410)|Entomology, PhD (p. 1414)
- Environmental Engineering in Civil Engineering, MS (p. 1418)|Environmental Engineering in Civil Engineering, PhD (p. 1421)
- Financial Engineering, MS (p. 1449)
- Geography, MS (p. 1502)|Geography, PhD (p. 1508)
- Industrial Engineering, MS (p. 1557)
- Materials Science & Engineering, MS (p. 1644)|Materials Science & Engineering, PhD (p. 1647)
- Mathematics, MS (p. 1650)|Mathematics, PhD (p. 1652)
- Mechanical Engineering, MS (p. 1658)|Mechanical Engineering, PhD (p. 1661)
- Nuclear, Plasma, & Radiological Engineering, MS (p. 1764)|Nuclear, Plasma, & Radiological Engineering, PhD (p. 1767)
- Physics, PhD (p. 1785)
- Plant Biology, MS (p. 1789)|Plant Biology, PhD (p. 1792)
- Statistics, PhD (p. 1912)
- Systems & Entrepreneurial Engineering, MS (p. 1919)
- Teaching of Mathematics MS (p. 1935)
- Theoretical & Applied Mechanics, MS (p. 1954)|Theoretical & Applied Mechanics, PhD (p. 1957)

for the Graduate Concentration in Computational Science & Engineering

---

For more information regarding the CSE Graduate Concentration, visit the Computational Science and Engineering website (http://cse.illinois.edu/), contact the CSE Office at (217) 333-3247, or email us (cse@cse.illinois.edu).

Code	Title	Hours
Core Course Work: Complete two courses (4 hours each) from the list below.		8
CSE 401	Numerical Analysis	
CSE 402	Parallel Progrmg: Sci & Engrg	
CSE 408	Applied Parallel Programming	
CSE 510	Numerical Methods for PDEs	
CSE 527	Scientific Visualization	
Computing Elective		8
Complete two courses (4 hours each) from the approved list. The application coursework must be distinct from the core courses (no double-counting is allowed).		
Total Hours		**16**

Additional Requirement
M.S. and Ph.D. Thesis Requirement: The graduate thesis must have a significant computational component, and the thesis committee must include at least one CSE-affiliated faculty.
M.S., Non-thesis Requirement: Must complete a 4- hour independent study/Capstone Project course, where the project is supervised by a CSE-affiliated faculty. The independent study project must comprise sufficient computational work, to be designed in consultation with the faculty supervisor overseeing the independent study.

for the Graduate Concentration in Computational Science & Engineering

Admission

Students wishing to enroll in the Computational Science & Engineering Concentration should follow the enrollment procedure (https://cse.illinois.edu/cse-educational-programs/graduate-concentration/) on the program's website.

Corporate Governance & International Business

for the Graduate Concentration in Corporate Governance and International Business

This concentration is available for on campus students in these programs:

- Accountancy, MAS (p. 1052)
- Accountancy, MS (p. 1056)
- Business Administration, MBA (http://catalog.illinois.edu/graduate/bus/business-administration-ms/)
- Business Administration, MS (http://catalog.illinois.edu/graduate/bus/business-administration-mba/)
- Finance, MS (p. 1442)
- Management, MS (p. 1639)

The concentration in Corporate Governance and International Business is designed to develop leaders in various business fields who understand international business and corporate governance issues within the global economy. It specifically covers topics such as (1) how to create value for multinational partners, employees with diverse cultural backgrounds, and shareholders by designing better organizations and corporate governance structures; and (2) how managerial practices differ in various national/cultural contexts and why managers must be able to understand the strategic, financial, and economic implications of these differences in managing multinational corporations. The concentration will provide a strong foundation in the International Business and Governance area and can be tailored to fit the specific career needs of students.

Admission

Admission to the concentration requires a Graduate Student Request Form submitted to the Department and Graduate College and admission to one of the approved programs. Admission is limited, and acceptance is on a competitive basis.

for the Graduate Concentration in Corporate Governance and International Business

This concentration requires submission of twelve graduate hours of Corporate Governance and International Business related coursework. Successful completion of the concentration assumes certain knowledge of business and prior coursework.

Course substitutions may be approved by the Department after consultation with the IB & Business Law Area faculty.

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Data Analytics in Finance Graduate Concentration

for the Graduate Concentration in Data Analytics in Finance

The Data Analytics in Finance Concentration is open to students enrolled in:

- Finance, MS (p. 1442)
- Financial Engineering, MS (p. 1449)
- Business Analytics, MS (p. 1216)

The Data Analytics in Finance Concentration is designed to develop graduates who understand:

- how to apply data analytics in a variety of financial contexts including investment and policy decisions;
- critically solve business problems using data-intensive economic and financial information; and,
- synthesize and effectively communicate data-intensive information, findings, and conclusions to others, including supervisors, peers, and clients.

This concentration will not only provide a strong technical knowledge of data analytics topics, but also provide students multiple opportunities to apply this knowledge via experiential learning opportunities.

Admission

Candidates will apply to the Department of Finance for admission into the concentration. Students wishing to be admitted to the concentration should consult with their program advisor before applying.

Data Science & Engineering Concentration

for the Graduate Concentration in Data Science & Engineering

The Data Science & Engineering (DSE) Transcriptable Graduate Concentration is designed primarily for graduate students at the Ph.D. levels with an interest in data intensive computing. Data science plays a major role in many areas of computational science and engineering (CSE) — the DSE Concentration is open to domain scientists working in this area. This concentration requires students to complete 16 graduate credit hours spanning data science, from topics in mathematical foundations (MF), computational thinking (CT), statistical thinking (ST), as well as data management, description, and modeling (DX). Courses taken toward this concentration will count towards the student's graduate degree if permitted by the curriculum of their major, and the concentration will be listed on their transcript upon graduation.

To fulfill the requirements of the graduate concentration, students will take courses selected from an established list of core courses, along with a courses from a selection of elective courses that span a range of domain areas. Students may select any course in the list of electives, regardless of their enrolled degree program.

Additionally, understanding the ethical and societal implications of the application of data science is paramount, and CSE will integrate the latest topics to help educate future data scientists on appropriately developing and applying data science algorithms that impact society. To ensure that students in the Data Science & Engineering Graduate Concentration are exposed to current topics in this area and to highlight the how data science decisions can have real-world significance, CSE will (1) require that all DSE-seeking students attend at least one seminar on data science and social justice and (2) complete the self-paced Practical Data Ethics course developed by the UCSF Center for Applied Data Ethics. Students must affirm that they completed the course and will be required to report on their experience in order to receive the DSE Concentration. CSE will annually evaluate this requirement as additional on- and off-campus resources become available.

This graduate concentration is only available for students enrolled in these participating graduate degree programs:

- Aerospace Engineering, PhD (p. 1072)
- Agricultural & Biological Engineering, PhD (p. 1089)
- Astronomy, PhD (p. 1154)
- Bioengineering, PhD (p. 1178)
- Civil Engineering, PhD (p. 1237)
- Computer Science, PhD (p. 1275)
- Electrical & Computer Engineering, PhD (p. 1369)

for the Graduate Concentration in Data Science & Engineering

For more information regarding the Data Science & Engineering (DSE) Graduate Concentration, visit the Computational Science and Engineering website (http://cse.illinois.edu/), or contact the CSE Office at 217-333-3247 or by email (cse@cse.illinois.edu).

Code	Title	Hours
Core Coursework		**8**
Select at least one course from two of the three groups below.		
Mathematical Foundations (MF) &Statistical Thinking (ST)		
STAT 425	Statistical Modeling I	
STAT 432	Basics of Statistical Learning	
CSE 448	Advanced Data Analysis	
CS 441	Applied Machine Learning	

CS 446	Machine Learning	
Mathematical Foundations (MF) & Computational Thinking (CT)		
CS 450	Numerical Analysis	
CS 484	Parallel Programming	
CSE 428	Statistical Computing	
Data Description and Curation (DX) & Data Modeling (DX)		
STAT 480	Big Data Analytics	
CS 412	Introduction to Data Mining	
Elective Coursework		**8**
Complete two additional courses in consultation with the CSE Education Coordinator or CSE Director.		
Total Hours (Core + Elective):		**16**

Other Requirements

Requirement
At least 4 hours of coursework for the DSE concentration should be advanced (500-level courses)
For students enrolled in both the DSE concentration and the CSE concentration, at least 12 hours of coursework earned for the DSE concentration must be distinct from credit earned for the CSE concentration.

for the Graduate Concentration in Data Science & Engineering

The learning objectives of the concentration include satisfactory completion of the core coursework along with completion of the electives component. These are selected in consultation with the unit and based on the Strategic Plan Task Force report on Data Science Education at the University of Illinois Urbana-Champaign, which highlights key areas of data science in the curriculum, namely mathematical foundations, computational thinking, statistical thinking, data management, data description and curation, and data modeling.

for the Graduate Concentration in Data Science & Engineering

Design of Tall Buildings Graduate Concentration

for the Graduate Concentration in Design of Tall Buildings (on campus)

Students declaring the Design of Tall Buildings Concentration are required to submit, at the end of their first semester of study and not later than the first day of classes of the second semester, a planned schedule that outlines their coursework for the next three semesters. This plan must be signed by the student and the Advisor and submitted to the Chair of Design of Tall Buildings and the Director of Graduate Studies not later than the second week of classes in the student's second semester of study.

This Concentration can be completed within the normal time frame of the M.Arch or M.S. degree. The three courses required for the Tall Buildings concentration can overlap with the requirements for the M. Arch program. Students in the MS Architectural Studies may need to take additional courses to meet concentration requirements beyond what is required for their MS degree. Successful completion of the Concentration will be noted on the student's official transcript.

for the Graduate Concentration in Design of Tall Buildings (on campus)

Students who declare the Concentration must complete a minimum of 14 hours of coursework with a focus on tall buildings design.

Code	Title	Hours
ARCH 535	Design of Tall Buildings	4
ARCH 538	Integrative Design of Buildings	4
Select one of the following:		6
ARCH 573	Design: Technology and Performance	
ARCH 575	Integrative Architecture Design Studio	
Total Hours		**14**

for the Graduate Concentration in Design of Tall Buildings (on campus)

1. Develop broad knowledge of the integrated nature of design and construction of tall buildings.
2. Develop more in-depth knowledge on subjects specific to tall buildings including architectural design as well as design of structural, mechanical, lighting, and other building systems.
3. Learn the state-of-the-art in materials and methods of construction of tall buildings.
4. Learn the state-of-the-art from practitioner guest speakers the latest developments and trends in design and construction of tall buildings.

Digital Learning Concentration

for the Graduate Concentration in Digital Learning (on campus & online)

The Department of Curriculum and Instruction offers a concentration in Digital Learning that is available for students in the following graduate programs:

- Curriculum and Instruction, EdD (p. 1290)|Curriculum and Instruction, EdM (p. 1292)|Curriculum and Instruction, MA (p. 1298)|Curriculum and Instruction, MS (p. 1301)|Curriculum and Instruction, PhD (p. 1304)|
- Early Childhood Education, EdM (p. 1311)|
- Educational Policy, Organization & Leadership, EdD (p. 1344)|Educational Policy, Organization & Leadership, EdM (p. 1337)|Educational Policy, Organization & Leadership, MA (p. 1340)|Educational Policy, Organization & Leadership, PhD (p. 1347)|
- Educational Psychology, EdM (p. 1349)|Educational Psychology, MA (p. 1353)|Educational Psychology, MS (p. 1357)|Educational Psychology, PhD (p. 1361)|
- Elementary Education, EdM (p. 1372)|
- Secondary Education, EdM (p. 1853)|
- Special Education, EdM (p. 1896)|

Students may add the concentration at the time of admission or petition to add the concentration during their degree program.

Hours for this concentration will count towards the degree programs in Curriculum and Instruction. Students pursuing this concentration in programs outside of Curriculum and Instruction will be required to complete the required coursework in excess of their program of study.

for the Graduate Concentration in Digital Learning (on campus & online)

Hours for this concentration will count towards the degree programs in Curriculum and Instruction. Students pursuing this concentration in programs outside of Curriculum and Instruction will be required to complete the required coursework in excess of their program of study.

Select 12 hours from:

Code	Title	Hours

Total Hours		**12**

for the Graduate Concentration in Digital Learning (on campus & online)

Upon successful completion of a Graduate Concentration in Digital Learning, students will:

1. Acquire deep knowledge of content in the field of education.
2. Understand the complexities of digital learning and using technology within education and for learning.
3. Demonstrate a deep understanding of philosophical foundations of education.
4. Display a deep understanding of best pedagogical practices in K-12 classrooms, with attention to 21st century skills and practices.

Digital Marketing Graduate Concentration

for the Graduate Concentration in Digital Marketing (online)

This concentration is available for these programs:

Accountancy, MS (online) (p. 1056)

Business Administration, MBA (iMBA) (p. 1208)

Management, MS (online) (p. 1639)

The Digital Marketing Concentration is designed to develop leaders who (1) understand the foundations of the new digital marketing landscape and the application of marketing tools and strategies in the digital environment, (2) employ marketing analytics to visualize and use data, and (3) understand how digital channels are used in marketing. This concentration will not only provide a strong foundational knowledge of digital marketing, but also provide students multiple opportunities to apply this knowledge via experiential learning opportunities.

Exceptions to the required courses will not be permitted.

Admission
Admission to the concentration requires submitting a Curriculum Change Form to the Department and Graduate College and admission to one of the approved programs. Admission is limited, and acceptance is on a competitive basis.

Diversity & Equity in Education Concentration

for the Graduate Concentration in Diversity & Equity in Education

Diversity & Equity in Education (DE) is a social-justice oriented program that aims at providing educators with transformative approaches to issues related to diversity and equity in P-20 learning environments. Courses will help K-12, higher education, and organizational educators and leaders to understand how diversity and equity relates to learning theories, leadership, and pedagogy. Our interdisciplinary approach to diversity and equity will cover the intersections of disability, race, gender, sexual orientation, social class, and poverty and draws on interdisciplinary research in education.

This concentration is available for:

- **Education Policy, Organization and Leadership, EdM (p. 1337) (on campus & online)**
- **Education Policy, Organization and Leadership, EdD (p. 1344) (on campus & online)**
- **Education Policy, Organization and Leadership, PhD (p. 1347)**

for the Graduate Concentration in Diversity & Equity in Education

The graduate credit needed for this concentration fulfills general coursework requirements for:

- **Education Policy, Organization and Leadership, EdM (p. 1337) (on campus & online)**
- **Education Policy, Organization and Leadership, MA (p. 1340)**
- **Education Policy, Organization and Leadership, CAS (p. 1334) (on campus)**
- **Education Policy, Organization and Leadership, EdD (p. 1344) (on campus & online)**
- **Education Policy, Organization and Leadership, PhD (p. 1347)**

Code	Title	Hours
Required course:		**4**
EPOL 403	Historical and Social Barriers	
Select eight hours from the following courses:		**8**
EPOL 474	Diversity in the Workplace	
EPOL 515	Introduction to Diversity & Equity	
EPOL 517	Race, Gender and Sexuality Issues	
EPOL 531	Diversity, Leadership & Policy	
EPOL 562	Diversity in Higher Education	
SPED 514	Equity Issues in Special Education	
Total Hours		**12**

for the Graduate Concentration in Diversity & Equity in Education

1. Students will acquire deep knowledge of structural inequity and how diversity and equity have been and are conceptualized and operationalized in U.S. educational systems, from the Colonial era to the present.
2. Students will be able to develop transformative approaches to address issues related to diversity and equity in P-16 learning environments and in the workplace, grounded in the intersections of disability, race, gender, sexual orientation, social class, and poverty.
3. Students will be able to demonstrate oral and written communication skills relating to diversity and equity in academic and professional arenas.

Educational Administration & Leadership Concentration

for the Graduate Concentration in Educational Administration & Leadership

Educational Administration & Leadership (EAL) prepares outstanding social justice leaders and change agents who create organizational conditions that provide for equitable participation by all relevant stakeholders in school governance and ensures that all students experience high levels of academic performance.

Students that receive an EAL graduate degree embrace a broad array of leadership positions, including: teacher leaders, division and content area chairs, deans, principals, central office administrators, superintendents, and educational policymakers. Programs also prepare individuals for research and policy positions and for higher education faculty positions in PK-12 educational leadership and policy. The general EAL program is for non-licensure students.

The principal endorsement program follows a hybrid bookend model, with classes on campus in Champaign the first and last Saturday of each semester and the remainder of sessions held online. The superintendent endorsement program includes face-to-face courses in Champaign or the Chicago area as well as online courses.

This concentration is available for:

- Education Policy, Organization and Leadership, EdM (p. 1337) (on campus and off-campus)
- Education Policy, Organization and Leadership, MA (p. 1340)
- Education Policy, Organization and Leadership, CAS (p. 1334) (on campus and off-campus)
- Education Policy, Organization and Leadership, EdD (p. 1344) (on campus and off-campus)
- Education Policy, Organization and Leadership, PhD (p. 1347)

for the Graduate Concentration in Educational Administration & Leadership

The graduate credit needed for this concentration fulfills general coursework requirements for:

- Education Policy, Organization and Leadership, EdM (p. 1337) (on campus and off-campus)
- Education Policy, Organization and Leadership, MA (p. 1340)
- Education Policy, Organization and Leadership, CAS (p. 1334) (on campus and off-campus)

Entrepreneurship & Innovation

for the graduate concentration in Entrepreneurship & Innovation (on campus & online)

The Entrepreneurship and Innovation Concentration provides students with the skills, resources, and experiences necessary to become successful innovators, entrepreneurs, and leaders who tackle grand challenges to change the world.

The Entrepreneurship and Innovation Concentration requires students to complete 12 credit hours of core and elective courses. Participating departments will be responsible for defining how credits from this concentration apply to the student's graduate degree. Students must be enrolled in an eligible engineering graduate degree program from one of the participating departments.

Students must be enrolled in one of the following graduate degree programs:

- Aerospace Engineering, BS-MS
- Aerospace Engineering, MS (on campus & online)
- Aerospace Engineering, PhD
- Agricultural & Biological Engineering, MS
- Agricultural & Biological Engineering, PhD
- Bioengineering, MEng
- Bioengineering: Bioinstrumentation, MEng (on campus & online)
- Bioengineering: General Bioengineering, MEng (on campus & online)
- Bioengineering, PhD
- Bioengineering, MS
- Bioinformatics: Computer Science, MS
- Biomedical Image Computing, MS (on-campus and online)
- Chemical Engineering, MS
- Chemical Engineering, PhD
- Civil Engineering, MS (on campus & online)

- Systems & Entrepreneurial Engineering, PhD
- Teaching of Physics, MS

for the graduate concentration in Entrepreneurship & Innovation (on campus & online)

The concentration in Entrepreneurship and Innovation requires students to complete 12 credit hours from a list of select courses and to earn a B or higher in each course. Participating departments will be responsible for defining how credits from this concentration apply to the student's graduate degree.

Code	Title	Hours
Core Courses		**6**
TE 460	Lectures in Engineering Entrepreneurship	
TE 461	Technology Entrepreneurship	
TE 565	Technol Innovation & Strategy	
Elective Courses		**6**
Students may select a different elective course in consultation with their Advisor and the Technology Entrepreneur Center.		
TE 450	Startups: Incorporation, Funding, Contracts, & Intellectual Property	
TE 466	High-Tech Venture Marketing	
TE 510	Advanced Creativity	
TE 566	Finance for Engineering Mgmt	
TE 567	Venture Funded Startups	
Total Hours		**12**

Other Requirements

Requirement	Description
A minimum of 4 500-level credit hours.	
Minimum GPA:	3.0
Participating departments will be responsible for defining how credits from this concentration apply to the student's primary program of study.	

for the graduate concentration in Entrepreneurship & Innovation (on campus & online)

Learning objectives for the Graduate Concentration in Entrepreneurship and Innovation are designed to provide students in engineering graduate programs the skills and resources necessary to become successful innovators, entrepreneurs, and leaders in industry positions. This concentration will allow students to build a solid foundation of business practices and gain an entrepreneurial mindset.

By the end of this program, students will be able to:

- Demonstrate growth of their entrepreneurial mindset and ability to use various tools for innovation.
- Understand and evaluate various professional opportunities in innovation and entrepreneurship, including through new venture creation, within industry, and in research. Identify the critical importance of entrepreneurial endeavors to the world's economy (employment, technology advancement, societal development, etc.) and understand how experience in entrepreneurship can form a foundation for other career opportunities.
- Identify opportunities for innovative ideation and apply an entrepreneurial process to implement these ideas in order to create impact and provide value.
- Utilize critical factors necessary for the development of technology-based ventures including opportunity assessment, the entrepreneurial process, a business plan, funding, team formation, and ethical responsibility.
- Evaluate how firms create, commercialize, and capture value from technology-based products and services, and then sustain their success as technology changes and evolves around them.
- Effectively communicate technical problems and solutions as well as their value and impact to a variety of stakeholders and diverse audiences.

Global Challenges in Business Graduate Concentration

for the Graduate Concentration in Global Challenges in Business (online)

This concentration is available for these programs:

Accountancy, MS (online) (p. 1056)

Business Administration, MBA (iMBA) (p. 1208)

Management, MS (online) (p. 1639)

The Global Challenges in Business Concentration is designed to develop leaders who (1) understand how businesses function in the global marketplace, (2) consider ethical decisions to run a responsible business in the global marketplace, (3) understand the role of business in addressing global challenges such as poverty and the environment, (4) understand how business can pursue opportunities and confront challenges in the complex global marketplace. This concentration will not only provide a strong foundational knowledge of global business challenges, but also provide students multiple opportunities to apply this knowledge via experiential learning opportunities.

Exceptions to the required courses will not be permitted.

Admission
Admission to the concentration requires submitting a Curriculum Change Form to the Department and Graduate College and admission to one of the approved programs. Admission is limited, and acceptance is on a competitive basis.

Global Studies in Education Concentration

for the Graduate Concentration in Global Studies in Education

Global Studies in Education (GSE) engages students in scholarly explorations of education and global change from the perspectives of social justice and equity, global citizenship, and critical democracy. The program focuses on the globalization of policy, pedagogy, and practice in different contexts. Core programmatic topics include human rights, children and youth in global context, climate change and sustainability, the internationalization of schools and universities, global migration and mobility, and the impact of digital transformation on education and society. This interdisciplinary program prepares students with a diversity of backgrounds with the skill sets to become education leaders, innovators, and researchers for today's globalized world.

This concentration is available for:

- Education Policy, Organization and Leadership, EdM (p. 1337) (on campus & online)
- Education Policy, Organization and Leadership, EdD (p. 1344) (on campus & online)
- Education Policy, Organization and Leadership, PhD (p. 1347)

for the Graduate Concentration in Global Studies in Education

The graduate credit needed for this concentration fulfills general coursework requirements for:

- Education Policy, Organization and Leadership, EdM (p. 1337) (on campus & online)
- Education Policy, Organization and Leadership, MA (p. 1334)
- Education Policy, Organization and Leadership, CAS (p. 1334) (on campus)
- Education Policy, Organization and Leadership, EdD (p. 1344) (on campus & online)
- Education Policy, Organization and Leadership, PhD (p. 1347)

History, Theory and Preservation Concentration

for the Graduate Concentration in History, Theory and Preservation

Students declaring the History + Theory + Preservation concentration (HTP) Concentration are required to submit, at the end of their first semester of study and not later than the first day of classes of the second semester, a planned schedule that outlines their coursework for the next three semesters. This plan must be signed by the student and the Advisor and submitted to the Chair of HTP and the Director of Graduate Studies not later than the second week of classes in the student's second semester of study.

This Concentration can be completed within the normal time frame of the M.Arch or M.S. degree. The five courses required for the HTP concentration can overlap with the requirements for the M. Arch program. Students in the MS Architectural Studies may need to take additional courses to meet concentration requirements beyond what is required for their MS degree. Upon completion of the graduate concentration, students will submit a brief written self-assessment pertaining to history, theory, and preservation in architecture. Successful completion of the Concentration will be noted on the student's official transcript.

for the Graduate Concentration in History, Theory and Preservation

Students who declare the Concentration must complete a minimum of 16 hours of coursework with a focus on history, theory, and preservation in architecture.

Code	Title	Hours
Required		**10**
ARCH 419	Historic Building Preservation (if already completed in undergraduate, enroll in additional ARCH 5xx elective detailed below)	3
ARCH 517	Modern Architectural History, 1850-Present	3
ARCH 577	Theories of Architecture	4
Electives, select two (only one may be an independent study, if approved in advance by HTP advisor):		**6**
ARCH 500-level graduate seminar in architecture history, theory or preservation selected from a list approved by the program chair		
LA 500-level, with approval from the program chair		
Total Hours		**16**

for the Graduate Concentration in History, Theory and Preservation

1. Cultural Awareness and Sustainability. Acquire knowledge of theory and practice of architectural history and historic preservation and its links to architectural practice.
2. Social Awareness. Introduce historiographic and theoretical frameworks that allow navigation of differences in race, gender, indigeneity, sexuality, class, language, and disability.
3. Community Engagement. Understand policy and methodology for working with communities in support of their preservation goals.
4. Global and Local Action. Navigate global issues in heritage and preservation through local processes.
5. Research and Creativity. Link humanities-based scholarly research to creative problem solving in history and preservation.

for the Graduate Concentration in Marketing

- Make Confident Marketing Decisions in Uncertain Environments
  - Master the art of making informed marketing decisions even in ambiguous or uncertain market conditions. Learn to identify and leverage key insights to guide strategic actions with confidence.
- Maximize Synergies Across Marketing Disciplines
  - Gain a comprehensive understanding of how marketing elements— from strategy development to brand building and performance measurement—work together. Learn to create cohesive strategies that align and optimize these elements for greater impact.
- Craft and Measure High-Impact Marketing Strategies
  - Develop the skills to design effective, results-driven marketing strategies. Learn to implement and track the performance of these strategies to ensure they deliver measurable results and drive growth.
- Master Integrated Marketing Communications
  - Understand how to seamlessly integrate and manage various communication channels—mass media, digital platforms, and personal touchpoints—to create a unified and effective brand message that resonates across all customer interactions.

for the Graduate Concentration in Marketing

Medieval Studies Concentration

for the Graduate Concentration in Medieval Studies

Founded in 2001, the Program in Medieval Studies at Illinois was reconfigured in 2011 to encompass the entire medieval world (not just Europe and its Mediterranean neighbors). This wider vision, which our program was among the first to promote, recognizes the intense interconnectivity of Afro-Eurasia during a pivotal era, *circa* 400-1500, as well as the value of studying the global processes which affected all peoples and cultures in both hemispheres at a time of extraordinary innovation and change. The graduate concentration in Medieval Studies is available to students who are admitted for graduate study in degree-granting departments with affiliated faculty. Interested students may apply to the concentration by contacting the Director of the Program. The concentration features a flexible curriculum requiring a minimum of 24 hours of graduate-level coursework, including advanced training both in the various disciplines of medieval studies and in foundational languages and technical skills appropriate to the field. Students working toward the concentration are also eligible to apply for funding to cover the costs of research and conference travel, or to purchase books and special equipment. For complete information about the program and its offerings, see the program's website (https://medieval.illinois.edu/academics/graduate-program/).

Admission

Students who are admitted to participating graduate programs are eligible to enroll in the graduate concentration in Medieval Studies. They should contact the Director of the Program to express interest and discuss the requirements.

Faculty Research Interests

The mission of our faculty is to foster the interdisciplinary and collaborative study of the medieval globe throughout this long millennium, from approximately the fourth through the sixteenth centuries C.E., as well as their ancient antecedents and modern impacts. We sponsor seminars, conferences, symposia, and lectures open to all members of our campus community and to the general public, featuring contributions by our own faculty and student affiliates as well as by visiting scholars. The Program spans departments in the College of Liberal Arts & Sciences (http://www.las.illinois.edu/) and the College of Fine and Applied Arts (http://faa.illinois.edu/). Participating Departments in LAS include Anthropology, Classics, Comparative Literature, East Asian Languages and Cultures, English, French, Germanic Languages and Literatures, History, Philosophy, Religion, Slavic Languages and Literatures, Spanish, Italian & Portuguese, and Speech Communications; and, in FAA, Architectural History, Art History, Landscape Architecture, and Music; as well as the School of Information Sciences and the University Library. For more information, visit our faculty listings (https://medieval.illinois.edu/directory/faculty/).

Through this range of methods and perspectives, our program aims to create a diverse community of scholars within the University of Illinois with close connections to partner institutes and centers around the world. In keeping with our distinctive approach to the medieval past, Illinois is home to *The Medieval Globe*, the first academic journal to pioneer the global practice of medieval studies across all regions and disciplines. Launched in 2014, it is now entering its second decade as the premier journal of the medieval world.

Facilities and Resources

Illinois offers extraordinary academic resources and a thriving intellectual community of scholars to support graduate studies in any aspect of medieval studies around the world. These include:

- a pioneering approach to Medieval Studies embracing scholarship on global cultures during a broad span of time in and around the long millennium stretching from *circa* 400 to 1500 CE
- some 40 affiliated faculty (https://medieval.illinois.edu/directory/faculty/) in a range of departments across campus
- one of the world's finest academic libraries, with extensive print and electronic resources for Medieval Studies (https://medieval.illinois.edu/resources/student-resources/additional-library-resources/), diverse medieval manuscript holdings, and a superb Rare Book & Manuscript Library (http://www.library.illinois.edu/rbx/)
- a regular series of colloquia, an annual *Lex Veritatis* Lecture, and international symposia and conferences (https://medieval.illinois.edu/research/conferences-symposia/)
- sponsorship of a pathbreaking academic journal, The Medieval Globe *(*https://www.arc-humanities.org/journals/the-medieval-globe/*)*
- robust funding for graduate student research and travel, including summer travel abroad (to work in libraries or archives, visit medieval sites, or attend conferences or special seminars)
- advanced seminars across the spectrum of the field, including an annual Spring Seminar (https://medieval.illinois.edu/mdvl-500-past-graduate-spring-seminars/) (MDVL 500) on cross-disciplinary topics such as Animal Studies, Plants and Medicine, The Medieval Lyric, Manuscript Studies, and Medievalism.

Financial Aid

Students working toward the concentration in Medieval Studies are eligible to apply for funding to cover the costs of research and conference travel, or to purchase books and special equipment.

for the Graduate Concentration in Medieval Studies

For additional details and requirements refer to the department's graduate concentration program (https://medieval.illinois.edu/academics/graduate-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Two graduate courses at the 400- or 500-level in Medieval Studies selected by the student and approved by the Advisory Board of Medieval Studies		6-8
MDVL 500	Seminar in Medieval Studies	4
Reading knowledge of a major international medieval language essential to the student's field of specialization, as determined by the student in consultation with a faculty supervisor and with the approval of the Director, as demonstrated by completion of a college-level course with a grade of B or better. Note: Students who fulfill this requirement by taking courses at the 200- or 300-level may be required to take additional coursework at the 400- and 500-level to meet the requirement of 24 hours of graduate-level coursework.		3-4

Reading knowledge of another medieval language with a minimum grade of B, or completion of a one-semester introductory course in a medieval language (such as FR 531 or ENGL 507) with a minimum grade of B, or an equivalent approved by the Medieval Studies Advisory Committee.	4
Thesis Hours Required (min/max applied toward degree)	6-8
Total Hours	**24**

Other Requirements

Requirement	Description
Other requirements may overlap	
A dissertation or thesis in the area of Medieval Studies.	
A member of one of the cooperating departments external to the student's home department will be a member of the student's dissertation or thesis committee.	
In addition to the graduate concentration requirements, students must also complete the requirements of their major degree.	

for the Graduate Concentration in Medieval Studies

The Graduate Concentration in Medieval Studies enables students to demonstrate:

1. A working graduate-level knowledge of global premodern studies in addition to their primary field of study.
2. The ability to engage with scholarship across a range of disciplinary approaches.
3. The skills to conduct independent, original research that makes a contribution both to their major discipline and to the field of Medieval Studies, more broadly.

Philosophy of Education Concentration

for the Graduate Concentration in Philosophy of Education

The Philosophy of Education graduate concentration views philosophy as a critical and reflective activity central to sound educational policy, practice, and research. Drawing on diverse philosophical traditions, our students explore educational aims, concepts, and practices across a range of settings, including the nature of the teacher-student relationship, the possibilities and limitations of technology in education, liberal education, the ethics of teaching, critical thinking, aesthetic education, education and human rights, and what makes a public school public.

This concentration is available for:

- **Education Policy, Organization and Leadership, EdM (p. 1337) (on campus)**
- **Education Policy, Organization and Leadership, MA (p. 1340)**
- **Education Policy, Organization and Leadership, PhD (p. 1347)**

for the Graduate Concentration in Philosophy of Education

The graduate credit needed for this concentration fulfills general coursework requirements for:

- **Education Policy, Organization and Leadership, EdM (p. 1337) (on campus)**
- **Education Policy, Organization and Leadership, MA (p. 1340)**
- **Education Policy, Organization and Leadership, CAS (p. 1334) (on campus)**
- **Education Policy, Organization and Leadership, EdD (p. 1344) (on campus)**
- **Education Policy, Organization and Leadership, PhD (p. 1347)**

Code	Title	Hours
Select 12 hours from the following courses:		12
EPOL 405	School and Society	
EPOL 406	Professional Ethics in Education	
EPOL 407	Critical Thinking in Education	
EPOL 415	Theories of Justice in Education	
EPOL 480	Technology and Educational Reform	
EPOL 506	Contemporary Philosophy of Education	
EPOL 524	Education and Human Rights

ERAM 552	The Role of Theory in Educational Research	
ERAM 571	Traditions in Philosophy of Education	
ERAM 572	Case Studies in Educational Ethics	
Total Hours		**12**

for the Graduate Concentration in Philosophy of Education

Upon successful completion of a Graduate Concentration in Philosophy of Education, students will:

1. Acquire in-depth knowledge of historical traditions and contemporary perspectives in philosophy of education and their relationship to empirical research in education.
2. Develop deep understanding of core topics in the philosophy of education such as educational ethics, theories of justice in education, epistemology of education, philosophy of educational technology, and the nature of concepts like freedom, agency, responsibility, or identity in education.
3. Demonstrate skills in philosophical inquiry in education, including clear conceptual and normative analysis, rigorous argumentation, and adept engagement with educational research.

Professional Science Master's

for the Graduate Concentration in Professional Science Master's

Graduate Degree Program

The concentration in Professional Science Master's (PSM) provides masters students with a unique learning experience by combining traditional science, technology, or mathematics disciplines with an integrated professional curriculum focusing on core business knowledge and skills. Traditional depth in the disciplinary field coupled with business-related workplace skills and internship experience prepares graduates for careers in business, government, and not-for-profits. Programs are full-time, non-thesis, cohort-based and are designed to be completed in 16 months.

Admission

Candidates for admission to the concentration and associated Illinois M.S. degree must have a bachelor's degree from an accredited institution equivalent to those from the University of Illinois Urbana-Champaign. Minimum requirements include a grade point average of 3.0 or higher (A = 4.0) for the last 60 hours of undergraduate work and for any graduate study. Graduate Record Examination (GRE) scores are required of all applicants. Test of English as a Foreign Language (TOEFL) scores vary by program. Admission to one of the eligible degree programs listed above is required, and their admission requirements vary by program and may be more rigorous than the minimums presented here. Transfer credit may not be applied to this program due to the cohort nature of this program.

Financial Aid

Financial assistance in the form of full or partial waiver of tuition and fees – is rarely available to Illinois PSM students (except for statutory waivers). Departments providing assistance that includes waivers must pay Illinois PSM tuition and fees on students' behalf. Illinois PSM students may be eligible for student loans.

for the Graduate Concentration in Professional Science Master's

Specific requirements vary by major degree program, but all programs require a minimum total of 42 graduate hours of work in three areas: a scientific discipline (may include related interdisciplinary fields), business, and an internship.

PSM Concentration Requirements:

Code	Title	Hours
Business courses prescribed by the Illinois PSM program		**10**
PSM 501	PSM Industry Seminar I	0
PSM 502	PSM Industry Seminar II	0
PSM 503	PSM Industry Seminar III	0
PSM 555	PSM Internship	0

for the Graduate Concentration in Professional Science Master's

1. Industry experience that gives the students a realistic view of job opportunities and the hurdles faced by bioprocessing and bioenergy companies.
2. Ability to identify career interests, career path, goals to reach career aspirations, materials and knowledge for a successful internship & career search.
3. Ability to communicate science to a non-science audience; ability to work in a team.

for the Graduate Concentration in Professional Science Master's

The Professional Science Master's concentration is available in:

- Bioprocessing & Bioenergy, MS (p. 1206)
- Engineering Technology and Management for Agricultural Systems, MS (p. 1399)
- Food Science & Human Nutrition, MS (p. 1453)
- Geography: Geographic Information Science, MS (p. 1505)

Romance Linguistics Concentration

for the Romance Linguistics Concentration

The concentration in Romance Linguistic requires a minimum of 24 hours of graduate-level coursework and it is open to PhD students in the participating Departments.

Graduate Degree Programs in Romance Linguistics

Graduate Concentration:

- Romance Linguistics (p. 2049)
  - participating programs:
  - French, PhD (p. 1486)
  - Italian, PhD (p. 1578)
  - Linguistics, PhD (p. 1634)
  - Portuguese, PhD (p. 1805)
  - Spanish, PhD (p. 1893)

Admission

Ph.D. students in any of the participating Departments within the School of Literatures, Cultures and Linguistics are admitted into the program with the consent of their advisor and the director of the program.

for the Romance Linguistics Concentration

For additional details and requirements refer to the department's graduate concentration program (https://medieval.illinois.edu/academics/graduate-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
RMLG 435	Introduction to Romance Linguistics	4
RMLG 559	Sem Romance Ling (3 courses on different topics)	12
Two 400- or 500-level courses in the linguistics of other Romance languages and/or in general linguistics, as approved by the student's advisor		8
Language Requirement:		
Reading knowledge or completion of two semester language courses with a minimum grade of B in two Romance languages other than the student's major language, or an equivalent approved by the Romance Linguistics Advisory Committee. (Language courses taken to satisfy this requirement do not count towards the total number of hours.)		
Total Hours		**24**

Other Requirements

Requirement	Description
Other requirements may overlap	
A dissertation or thesis in the area of Romance Linguistics. It must include significant research on at least 2 Romance languages. Whether this requirement is satisfied is determined by the Romance Linguistics Advisory Committee. We expect that a member of one of the cooperating departments external to the student's home department will normally be a member of the student's dissertation committee.	

In addition to the graduate concentration requirements, students must also complete the requirements of their major degree. All hours taken to complete the Concentration in Romance Linguistics count toward the Ph.D.s in Linguistics, Spanish, Italian or Portuguese. Sixteen of the proposed twenty-four concentration hours will count towards coursework for the Ph.D. in French.

- Spanish, PhD (p. 1893)
- Speech and Hearing Science, PhD (p. 1904)

The concentration in SLATE requires a minimum of 28 hours of graduate-level coursework and is open to PhD students in the participating Departments.

Admission

PhD students in any of the participating Departments are admitted into the program with the consent of their advisor and the Director of the SLATE program. A coursework prerequisite (LING 400 - Introduction to Language Structure) is required, and either it or an equivalent course must be completed prior to admission. If a student believes they have completed an equivalent (or more advanced) course than the prerequisite, s/he may submit a petition to the Director of SLATE requesting that course to be substituted for LING 400. Petition forms and instructions, as well as an admission form, are located on the SLATE website (http://slate.illinois.edu/students/forms/).

1. Select one of the following:		4
LING 514	Design and Methodology in Linguistic Research	
EPSY 480	Educational Statistics (And one course from 2.)	
2. An advanced course in quantitative or qualitative research (selected in consultation with student's advisor) that is related to the student's research topic including (but not limited to) courses on the following list:		4
LING 514	Design and Methodology in Linguistic Research	
EPSY 590	Advanced Seminar in Educational Psychology (Section AE: "Theoretical and Methodological Issues in SLA Research")	
EPSY 578	Qualitative Inquiry Methods	
EPSY 584	Multivar Anlys in Psych and Ed	
EPSY 580	Statistical Inference in Education	

EPSY 582	Advanced Statistical Methods	
SPAN 588	Sem Second Lang Learn (EALC/FR/GER/ITAL/LING/PORT/SLS 588 -- some sections)	
For courses below, only some sections satisfy SLATE requirements. A list of the specific sections that will count toward satisfying SLATE course requirements will be posted at: www.slate.illinois.edu/students/courses (http://www.slate.illinois.edu/students/courses/)/.		
CI 509	Curriculum Research (some sections)	
EIL 587	Seminar in Second Lang Studies (some sections, e.g., "Language Assessment and Data Handling")	
And other courses as approved by the Director and the SLATE Executive Committee		
Language Requirement		
In order to earn a SLATE concentration, students must demonstrate competence in a second language. For native English speakers, a "second language" can be the second language of research/teaching, or, for those concentrating on ESL as the subject of research and teaching, any second language. For non-native speakers, the proficiency in English that is required for admission is considered more than adequate to fulfill this requirement. This requirement is designed to ensure the full appreciation and understanding of what it means to experience the learning of a second language. Second language competence is assessed in a variety of ways, to be determined by the student's advisor.		0
Total Hours		**28**

Other Requirements (may overlap)

Requirement	Description
A student may request that another course they have taken be substituted for one that is on any list.	
Courses applying toward fulfillment of the SLATE course requirements must be taken for a minimum of 3 graduate credit hours.	
At least 5 of the required courses must be taken in residence at UIUC. Students are advised to contact the SLATE Director with any request to have courses taken elsewhere accepted as equivalents for any of the UIUC courses on the list.	
Of the courses required for the SLATE concentration, at least four (4) must be at the 500-level.	
A single course may count toward only one requirement. For instance, LING 550: Sociolinguistics II could fulfill either the Psycholinguistics/Sociolinguistics requirement OR be counted as one of the courses toward the Linguistics/Language Structure requirement, but not both.	
In addition to the graduate concentration requirements, students must also complete the requirements of their major degree.	
In order to earn a SLATE concentration, the student's dissertation topic must be related to one or more aspects of second language studies. The SLATE Executive Committee verifies that the content qualifies.	

for the Graduate Concentration in Second Language Acquisition & Teacher Education

---

By the end of their Ph.D. in French, Second Language Acquisition, students will be able to demonstrate the following:

1. Language: students display Advanced-High to Superior proficiency in French and in English in all forms and modes of communication (oral, written; interpretive, presentational, interpersonal), as well as high intercultural competence and effectiveness, and Intermediate-Mid or above proficiency in a third language in all forms and modes of communication (oral, written; interpretive, presentational, interpersonal). See ACTFL guidelines.
2. Teaching: students are able to expertly teach French as a foreign language at the novice and intermediate levels, informed by updated research and grounded in principles of proficiency-oriented curriculum (e.g., setting learning objectives and appropriate lesson plans, distinguishing between teaching and learning, efficient and inclusive classroom and course management practices, valid and adaptive assessment methods, design and revision of syllabi, programmatic coordination and sequencing etc.)
3. Specialized knowledge in French studies: students can recall, relate, explain, discuss, and utilize specialized knowledge in at least two areas of French studies (e.g., translation; studies in Francophonie; 18th century literature, etc.)
4. Expert knowledge in applied linguistics: students demonstrate expert and timely knowledge of theories, concepts, and debates in areas of French applied linguistics, language curriculum and development, and both quantitative and qualitative research methods consistent with research in the field of French and Second Language Acquisition Teacher Education

5. Research: students are able to expertly evaluate, design, conduct, write about, present, publish, and defend research about French in Second Language Acquisition Teacher Education, primarily in the shape of a dissertation
6. Professionalism: students demonstrate ethical practices in teaching and researching French and Second Language Acquisition Teacher Education (e.g., ongoing professional development; commitment to diversity, equity, and inclusion; mentoring and/or supervising; collegial collaborations; outreach efforts, etc.), and preparedness to become competitive on the academic job market related to French and Second Language Acquisition Teacher Education (e.g., preparation to job interviews; CVs and cover letters; teaching/research/DEI statements; sample syllabi, etc.)

This concentration is available for these programs:

- Accountancy, MAS (p. 1056)
- Accountancy, MS (p. 1056) (on campus)
- Management, MS (p. 1639) (on campus)
- Technology Management, MS (p. 1939)

The concentration in Supply Chain Management is designed to develop leaders who understand (1) how to assess the trade-offs and make the decisions necessary to sustain high quality products and services at lower costs while maintaining the flexibility necessary to adapt and to respond to evolving market trends; and (2) how to coordinate and integrate supply chain solutions across various intra -organizational and inter -organizational interfaces in any business or organization. The minor or concentration not only will provide a strong foundation in supply chain management principles and practices, but also can be tailored to fit the specific needs of students interested in careers across a wide variety of industries. This minor or concentration requires submission of twelve graduate hours of Supply Chain Management coursework. Successful completion of the minor or concentration assumes certain knowledge of business and prior coursework.

Admission

Admission to the concentration requires submitting a Curriculum Change Form to the Department and Graduate College and admission to one of the approved programs. Admission is limited, and acceptance is on a competitive basis.

for the Graduate Concentration in Supply Chain Management

In addition to the concentration requirements, students must also complete the requirements of their major degree.

Code	Title	Hours
BADM 566	Supply Chain Management	2-4
BADM 567	Operations Management	2-4
Select from the following:		
BADM 561	Revenue Management	
BADM 564	Business Process Improvement	
BADM 565	Strategic Sourcing	
BADM 573	Decision Analytics	
BADM 575	Supply Chain Analytics	
BADM 589	Project Management	
Total Hours		**12**

for the Graduate Concentration in Supply Chain Management

1. Students will develop the ability to assess the trade-offs and make the decisions necessary to sustain high quality products and services at lower costs while maintaining the flexibility necessary to adapt and to respond to evolving market trends.
2. Students will be able to coordinate and integrate supply chain solutions across various intra -organizational and inter -organizational interfaces in any business or organization.

Taxation Graduate Concentration

for the Graduate Concentration in Taxation

The Taxation concentration is available for:

Accountancy, MAS (p. 1052)

Accountancy, MS (p. 1056) (on campus)

The MAS program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from a regionally accredited U.S. institution. The Concentration in Taxation is one of the core concentrations available within the MAS program.

Students in the Taxation concentration are also required to choose a secondary concentration. Elective concentration options include: Corporate Governance & International Business (p. 2003), Data Analytics in Accountancy (p. 2005), Finance (http://catalog.illinois.edu/graduate/bus/concentration/finance/finance/), Financial Reporting & Assurance (p. 1053), Information Technology & Control (p. 2036), Real Estate (p. 2047), and Supply Chain Management (p. 2057)

for the Graduate Concentration in Taxation

Code	Title	Hours
ACCY 551	Corporate Income Taxation	4
ACCY 552	Partnership Income Taxation	4
ACCY 556	Tax Research	4

Writing Studies Graduate Concentration

for the Writing Studies Graduate Concentration

The Center for Writing Studies (CWS) facilitates research and promotes graduate study in the areas of rhetoric, written composition, language, and literacy. CWS offers graduate students pursuing doctoral degrees in participating departments a program leading to a concentration in Writing Studies. Graduate students pursuing the concentration may be enrolled in the participating departments of English, Communication, Curriculum and Instruction, Educational Policy, Organization, and Leadership, Library and Information Science, or other departments from across campus with the approval of the student's home department.

Writing Studies Graduate Concentration

Participating Programs:

- Communication, PhD (p. 1254)
- Curriculum & Instruction, PhD (p. 1304)
- Educational Policy, Organization & Leadership, EdD (p. 1344)
- Educational Policy, Organization & Leadership, PhD (p. 1347)
- English, PhD (p. 1406)

Graduate students may elect to pursue a concentration in Writing Studies at the PhD level. Students take two foundational courses for the concentration to introduce them to the field, along with two methodology courses to ready them for their research. The first pair of required courses (ENGL 505/CI 563; and one of the following theme-focused courses: ENGL 506/CI 564, ENGL 583/CI 566, ENGL 584/CI 569 or a 500-level course approved for this requirement by the CWS Graduate Programs Committee) provides a historical background in Writing Studies while at the same time assuring knowledge of current issues through the reading and analysis of texts that mark the field. The second pair of required courses (ENGL 582/CI 565 and a second approved methodology course) introduces students in depth to strands of writing studies research -- historical, empirical, and theoretical. In addition, graduate students take two courses from across the university that focus on the study of writing but that also open up avenues for interdisciplinary inquiry, a key dimension of this area of study. English, Anthropology, Curriculum and Instruction, Information Sciences, Educational Policy Studies, Sociology, and Communication are among the departments from which students commonly select courses.

Admission

Students are admitted into graduate study through their home departments and the Graduate College. Students may petition to add the concentration at the point of admission or after they have begun graduate study. The petition to add the concentration must be approved by the Center for Writing Studies, the home department, and the Graduate College. (Please note that the Department of English offers separate MA and PhD tracks specializing in Writing Studies; see the Department of English for admission requirements to these degree programs.) Graduate students planning to concentrate in Writing Studies must fulfill the degree requirements of their home department in addition to the Writing Studies' graduate concentration requirements. In consultation with the home department, students determine whether the Writing Studies' graduate concentration is appropriate for their plan of study. Students should meet with a faculty advisor in their own department and also set up a meeting to discuss their program of concentration with the Director of the Center for Writing Studies.

Faculty Research Interests

Specific faculty interests include research in literacy studies, digital media, rhetorical studies, globalization and language, disability studies, cultural-historical activity theory, feminist theory and pedagogy, genre theory, technical communication and other areas of study related to the development of language and policy.

Facilities and Resources

CWS has a multidisciplinary group of core and affiliated faculty. It is home to the campus's Writing across the Curriculum Program and the Writers Workshop, a campus-wide tutorial facility; a sponsor of an electronic discussion group on writing across the curriculum, and a co-founder of the University of Illinois Writing Project (UIWP), a site of the National Writing Project.

Financial Aid

Graduate students may receive assistantships as consultants in the Writers Workshop, as teachers in the Writing Across Media courses, as assistant directors of CWS programs, and as research assistants to CWS faculty.

for the Writing Studies Graduate Concentration

For additional details and requirements refer to the department's concentration requirements (http://www.cws.illinois.edu/graduate/phd/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Theme-focused Writing Studies		**8**
ENGL 505 & ENGL 583	Writing Studies and Topics Writ Pedagogy & Design	
or ENGL 584	Topics Discourse and Writing	
Or 500-level course approved for this requirement by the CWS Graduate Programs Committee		
Methods Courses		**8**
ENGL 582	Topics Research and Writing	
& one other methods course approved by the Director of the Center for Writing Studies		
Elective hours from approved CWS list in consultation with your advisor		8

Other Requirements

Requirement	Description
Other requirements may overlap	
Students must prepare and deliver a lecture based on their research to faculty and students for the CWS Colloquium Series: Graduate Research Forum.	
The dissertation must demonstrably focus on Writing Studies (with a topic approved by the CWS Director) and be guided by CWS-affiliated faculty that serve on the dissertation committee.	

for the Writing Studies Graduate Concentration

---

1. **The completion of an original and in-depth research project (the dissertation) in a specific field of Writing Studies:** The dissertation (a book-length manuscript required for the doctoral degree) is the ultimate project of the MA/PhD program. The goal of the dissertation is the culmination of coursework and special fields work (see below), but it also goes beyond these preparatory steps. It demonstrates expertise and is composed of original research that is meant to contribute to the field of Writing Studies and to be a key source for additional publications (articles, chapters, and perhaps a book). The dissertation is necessary for tenure-track academic jobs, and is also valued by alternative-academic (alt-ac) employers as a sign of independent research skills.
2. **Preparation for teaching writing studies at the college level:** College-level teaching in English demands breadth across the field of study one is hired in, well beyond the expertise on display in the dissertation (e.g., literate practices in university classes), and it also requires preparation and practice in pedagogy and often writing program administration. The former is built out of the foundation of coursework, but is developed more assiduously in the Special Fields Exam which tasks students with reading scholarship in a field more broadly defined than the dissertation's focus. The Professional Seminar in the Teaching of Rhetoric and Composition offers Writing Studies graduate students both a resource for teaching and for doing professional development with writing teachers. Graduate students in Writing Studies typically teach in the Rhetoric program plus other programs (e.g., BTW in English, INFO/WRIT 303; the Writers Workshop).
3. **Generalist knowledge for the field of English Writing Studies:** Graduate coursework is divided into two parts: MA coursework and PhD coursework. While the dissertation and field exam prepares students to be experts in particular fields, the MA coursework introduces students to key and active areas of theory, research, pedagogy and practice in Writing Studies. Given the interdisciplinarity that marks Writing Studies, MA and PhD students typically take classes that reflect different areas of specialization in English and in other Rhetoric and Writing Studies programs on campus (e.g., Communication, Curriculum and Instruction, Educational Policy, Organization and Leadership). The MA students' preparation to pass from this stage into the PhD program is judged through the application to Stage II of the program, in which the students' portfolios are reviewed by the Graduate Studies Committee. The foreign language requirement is part of this training as well, and it is expected to be finished by application to Stage II.
4. **Professionalization:** The department has several modes of preparing students for both the professional demands of academia and for the job market for faculty positions. In coursework, students typically write seminar papers that match the demands of scholarly articles published in journals. On top of this, seminars routinely include practice in preparing and delivering conferences papers and presentations; researching and writing bibliographies of scholarship; doing original archival research; employing ethnographic and other situated research methods; and exploring different genres and media for disciplinary writing. Thus, students enter their dissertation years having had practice in common genres of academic writing. Students also get encouragement and financial support to attend up to two conferences per year. We regularly offer a summer ProSemon the topic of publication, in which student articles are workshopped with the final assignment to submit them to peer-reviewed journals. This Professional Seminar is taught as a Summer Session I seminar by faculty members who edit important journals. Graduate students

in Writing Studies often participate in writing program administration, getting experience in leadership roles in the Rhetoric and/or Professional Writing Programs in English or in the Center for Writing Studies in LAS.

Accounting Data Analytics, GCRT

for the Graduate Certificate in Accounting Data Analytics (online)

The Accounting Data Analytics Graduate Certificate is designed to develop leaders who understand (1) how to apply data analytics in a variety of accounting and business contexts, (2) critically solve business problems using data-intensive business and accounting information, and (3) synthesize and effectively communicate data-intensive information, findings, and conclusions to other environment-constituents, including supervisors, peers and subordinates, clients, and regulatory agencies. This Graduate Certificate will not only provide a strong foundational knowledge of data analytics, but also provide students multiple opportunities to apply this knowledge.

Students who have successfully completed this certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

12 hours of elective coursework requirements of the iMBA (p. 1208) degree program
12 hours of elective coursework requirements of the iMSM (p. 1639) degree program
12 hours of elective coursework requirements of the iMSA (p. 1056) degree program

Admissions

Accounting Foundations, GCRT

for the Graduate Certificate in Accounting Foundations (online)

The Accounting Foundations Graduate Certificate combines technical knowledge in financial and managerial accounting with professional competencies in critical thinking, communication, leadership, and strategic decision-making. Students will study the principles, concepts, and methods used to record and report the transactions and activities of a business entity, as well as the tools and processes to analyze accounting information. Students will also apply their knowledge to practical, real-world problems via experiential learning opportunities. Career opportunities for students who complete the Accounting Foundations Graduate Certificate include positions in audit and assurance services, corporate accounting, taxation, consulting and advisory services, and in governmental and not-for-profit entities.

Admission

Advanced Design Thinking, GCRT

for the Graduate Certificate in Advanced Design Thinking

Overview

The School of Art & Design and Industrial Design program are accepting applications for Fall 2026 admission to the graduate certificate in Advanced Design Thinking.

The Graduate Certificate in Advanced Design Thinking provides an intensive introduction to the application of state-of-the-art design thinking in human-centered design practice. Design thinking is now widely recognized as having application across a broad spectrum of professional, industrial, business, and community sectors.

The Graduate Certificate offers a project-based, practical experience in applying design thinking methodologies to investigate human needs and generate design proposals in response to identified opportunities. You will use a variety of research, analysis, ideation, prototyping, and communication techniques in these projects.

The program involves studying alongside students in the Master of Fine Arts in Art + Design, with a concentration in Industrial Design. Engagement with Industrial Design graduate students enables students who earn the Graduate Certificate in Advanced Design Thinking to apply credits earned in the certificate toward an MFA or MDes in ID or other graduate qualification in Industrial Design.

for the Graduate Certificate in Advanced Design Thinking

Graduation Requirements
Minimum Cumulative GPA: 2.75

Minimum hours required for certificate completion: 12 hours

Students who have successfully completed this certificate may use the certificate courses to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

12 hours of required studio coursework for the Master of Fine Arts in Art + Design, concentration in Industrial Design.

Code	Title	Hours
ARTD 501	Industrial Design I: From Inquiry to Ideation	6
ARTD 502	Industrial Design II: From Ideation to Implementation	6
Total Hours		**12**

for the Graduate Certificate in Advanced Design Thinking

At the end of the program, students should demonstrate the following at an initial postgraduate level:

1. **Research:** The ability to select and use appropriate research and experimental methods, to access existing data sources or to generate new data, to analyze and draw insights for future work, with particular emphasis on identifying human needs.
2. **Creative synthesis:** The ability to produce meaningful creative proposals from investigation, or in response to identified opportunities or requirements, using appropriate design thinking, modelling and making strategies, taking account of users, audience, market needs, makers, producers or exhibitors, reconciling diverse perspectives in coherent design solutions.
3. **Production:** The ability to select and use appropriate production processes in the design process with an understanding of the potential of new technologies and the critical importance of sustainability.
4. **Contextualization:** The ability to understand the multiple contexts of design practice, including the historical, theoretical, critical, social, professional, cultural, environmental and technological contexts.
5. **Communication:** The ability to use various forms of communication as appropriate during and on completion of the work process, to elicit information, to explain, to debate and persuade, adapting to audience and situations.
6. **Organization:** The ability to plan and implement action, identifying targets and organizing resources, effectively managing self and others, including team building and team working skills.
7. **Learning:** The ability to carry out independent learning as a basis for academic study, lifelong learning and for personal professional development, including the ability to reflect and independently evaluate your own practice, with the aim of improvement.

Business Analytics, GCRT

for the Graduate Certificate in Business Analytics (online)

The Graduate Certificate in Business Analytics is designed to develop leaders who are able to process data using a programming language (such as R) and understand the interaction between business principles and data analytics, have built an analytic mindset for approaching business problems, have developed the ability to appraise the value of datasets for addressing business problems using summary statistics and data visualizations, have competence in operating business analytic software applications for exploratory data analysis, and have established a foundation for using algorithmic models to understand relationships among variables, make forecasts, and add structure to data.

This Graduate Certificate will not only provide a strong foundational knowledge of data analytics but also provide learners multiple opportunities to apply this knowledge.

Learners who have successfully completed this certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

- 12 hours of elective coursework requirements of the iMBA (p. 1208) degree program.
- 12 hours of elective coursework requirements of the iMSM (p. 1639) degree program.
- 12 hours of elective coursework requirements of the iMSA (p. 1056) degree program.

for the Graduate Certificate in Business Analytics (online)

Learners who have successfully completed this certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

12 hours of elective coursework requirements of the iMBA degree program
12 hours of elective coursework requirements of the iMSM degree program
12 hours of elective coursework requirements of the iMSA degree program.

The required courses for this certificate are listed below.

Graduation Requirements
Minimum Cumulative GPA: 2.75
Minimum hours required for certificate completion: 12 hours

Code	Title	Hours
Graduate Certificate in Business Analytics Required Courses		
MBA 561	Introduction to Applied Business Analytics	
MBA 562	Introduction to Business Analytics: Communicating with Data	
MBA 563	Data Toolkit: Business Data Modeling & Predictive Analytics	
MBA 564	Data Analytics Applications in Business (must be repeated for 4 hours total.)	
Total Hours		**12**

for the Graduate Certificate in Business Analytics (online)

Learners who complete the Business Analytics Graduate Certificate will:

- Learn how to process data using programming languages (such as R) and understand the interaction between business principles and data analytics.
- Develop an analytic mindset for approaching business problems.
- Develop the ability to appraise the value of datasets for addressing business problems using summary statistics and data visualizations.
- Gain competence in operating business analytic software applications for exploratory data analysis.
- Establish a foundation for using algorithmic models to understand relationships among variables, make forecasts, and add structure to data.

Cancer Education Management in Underrepresented and Diverse Communities, GCRT

for the Graduate Certificate in Cancer Education Management in Underrepresented and Diverse Communities

---

The Cancer Education and Management in Underrepresented and Diverse Communities Certificate, requiring 16 credit hours of coursework, is designed to train cancer researchers, health care providers, and community stakeholders to design cancer education and management implementation solutions and conduct implementation studies that either assess naturalistic variability or measure change in response to cancer management intervention in underrepresented communities. The GCRT will also train students to identify factors, prominent in underrepresented and diverse communities, that impact application of cancer education and management innovations across multiple levels, including patient, provider, clinic, facility, organization, and often the broader community and policy environment. We anticipate the proposed GCRT to produce capable implementation practitioners and scientists to address disparities in cancer among underrepresented communities.

The Graduate Certificate programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

Admission

The Department of Education Policy, Organization and Leadership carefully considers all applicants for graduate study. Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/epol/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Facilities and Resources

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/epol/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

for the Graduate Certificate in Cancer Education Management in Underrepresented and Diverse Communities

The Cancer Education and Management in Underrepresented and Diverse Communities Graduate Certificate requires 16 credit hours (four courses) to complete upon admission. Students should follow the program of study below to meet the certificate coursework requirement. Students do not need to follow a specific sequence when completing these courses.

Graduation Requirements

Minimum Cumulative GPA: 3.0
Minimum hours required for certificate completion: 16 hours

Students who have successfully completed this 16-credit hour certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

- 4 hours of 500-level course required in Education for the EdM degree program at EPOL, and
- 12 hours of Concentration Courses or 400/500-level Courses approved by Advisor for the EdM degree program at EPOL

or

- 4 hours of 500-level course required in Education for the MA degree program at EPOL, and
- 12 hours of 400/500-level Courses approved by Advisor for the MA degree program at EPOL

or

- Up to 12 hours of Major Subject coursework (includes concentration courses) required in Education for the EdD degree program at EPOL, and
- Up to 12 hours of Elective Hours or 400/500-level courses approved by Advisor for the EdD degree program at EPOL

or

- Up to 16 hours of Major Subject coursework (includes concentration courses) required in Education approved by the Advisor for the PhD degree program at EPOL

or

- Up to 16 hours of 400/500-level Courses in Education approved by the Advisor for the CAS program at EPOL

Code	Title	Hours
EPOL 515	Introduction to Diversity & Equity	4
EPOL 517	Race, Gender and Sexuality Issues	4
EPOL 570	Organization Development	4
BIOE 598	Special Topics (Section: Cancer Biology and Disease)	4

Requirement	Description
Minimum GPA	3.0

for the Graduate Certificate in Cancer Education Management in Underrepresented and Diverse Communities

Upon completing the CERT, students will be able to:

1. Engage with underrepresented and diverse communities (URDC) to promote innovative cancer education and management interventions.
2. Assess needs of URDC for innovative cancer education and management interventions.
3. Design solutions to implement innovative cancer education and management interventions into URDC with sustainable efficacy.
4. Manage the implementation of innovative cancer education and management interventions for translational impacts.
5. Evaluate the outcomes of innovative cancer education and management interventions for continuous improvement on evidence-based practices.

Compensation Best Practices, GCRT

for the Graduate Certificate in Compensation Best Practices

Compensation Best Practices Certificate Overview:

Develop skills for the negotiation process as the interactive basis for union-management relations; conflict and conflict resolution as part of the negotiating process; wage and other effects of collective bargaining. Learn about hiring, promotion, evaluation, discrimination, raiding, job definition, pay schemes, benefits, and design of work.

The online certificate program consists of a variety of tracks and each track has three courses (12 credit hours total, four credit hours per course). Each course in the certificate program is either six or eight weeks long. You can choose to engage in one or more certificate program tracks. Once you have received one or more certificates, and decide you are interested in the full Master of Human Resources and Industrial Relations (MHRIR) program, you are able to apply for the online master's program.

Each certificate program track takes between 7 to 10 months to complete.

How do I know if the certificate program is for me?

Are you…

- working in HR with no HR background?
- employed by an organization that provides tuition reimbursement, but the reimbursement amount isn't equivalent to a full degree program?
- seeking to gain more knowledge in HR but either unable to or prefer not to attend graduate school?
- currently in HR and seeking to freshen-up your knowledge? This group may include, for example, individuals who started in HR, left HR for different reasons or even left the labor force.
- seeking to enter the HR field or change positions within your organization to HR, but do not want to commit/can't commit to a full degree?
- an individual who wants to know more about HR in general prior to embarking on a full degree program?

If you answered 'yes' to one or more of these questions, then this certificate program may be the perfect fit for you.

What is required to apply for one of these certificate programs?

Please note all applicants must have received a bachelor's degree prior to starting one of our certificate program tracks.

- Application
- Resume
- Official Transcripts
- English Proficiency Exam for international students

for the Graduate Certificate in Compensation Best Practices

Graduation Requirements

Minimum Cumulative GPA: 2.75

Minimum hours required for certificate completion: 12 hours

Students who have successfully completed the *Compensation Best Practices* certificate may use the certificate courses to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

- 8 to 12 hours of core coursework requirements and/or 4 elective course credits of the MHRIR degree program. Certificate may fulfill the following distribution requirements: Labor Markets and Employment, Union Management and Labor Relations Policy, and Human Resource Management and Organization Behavior

Students in the certificate program will choose three out of the five course options listed below. Students will need to complete 12 credit hours total to be awarded a certificate. The courses do not need to be taken in any particular order.

Code	Title	Hours
LER 561	Compensation Systems	4
LER 542	Collective Bargaining	4
LER 545	Economics of Human Resources	4
LER 543	Workplace Dispute Resolution	4
LER 535	Negotiation Principles in HR Context	4

for the Graduate Certificate in Compensation Best Practices

Below is a subset of learning outcomes from our MHRIR degree program. These outcomes are specific to the Compensation Best Practices Certificate. LER utilized HRCI's Human Resources Body of Knowledge to inform our learning objectives and has recently (January 2022) received "exceeds expectations" score from the Office of the Provost Learning Outcomes Assessment of its MHRIR degree program.

1. Students will apply Business Management and Strategy to shape immediate and long-term HR activities, practices, and policies. Students will critically examine the complex link between strategy and business practices, understand and apply workforce metrics to drive decision-making, and apply a strategic lens to international human resources.
2. Students will understand the structural elements of compensation system design and evaluate an organization's Compensation and Benefits structure relative to market forces, union agreements, and legal requirements.
3. Students will apply and adhere to statutory and legal requirements when administering HR policies and procedures and employ Risk Management strategies to protect the employer from loss and liability and comply with labor law.
4. To support Human Resource Development, students will support organizational priorities by managing employee performance through evaluating gaps between employee performance and the desired state, building programs to address these gaps, and designing strategies for motivating employees.
5. Students will be able to use critical thinking and problem-solving skills to act strategically when making decisions in business and in life.

Computing Fundamentals, GCRT

for the Graduate Certificate in Computing Fundamentals (on campus or online)

The Graduate Certificate in Computing Fundamentals provides students with Bachelor's degree or higher in a non-computing discipline with an accelerated foundation in computing fundamentals. The Graduate Certificate requires four bridging courses in fundamentals of computing and algorithms and two excursions in computing courses. To allow flexibility and gain deeper knowledge in a computing subject of interest, students are required to complete an independent study along with a graduate-level elective.

The Graduate Certificate in Computing Fundamentals requires a minimum of 20 credit hours distributed over eight courses as follows. A course cannot be used to satisfy more than one requirement within the certificate.

for the Graduate Certificate in Computing Fundamentals (on campus or online)

Graduation Requirements

Minimum Cumulative GPA: 2.75 (as required for awarding of the Campus Graduate Certificate)

Minimum hours required for certificate completion: 20 hours

Students who have successfully completed this certificate may use the certificate to satisfy the following degree requirements, subject to department approval, and provided they apply and are admitted to the degree program:

- 8 hours of breadth or elective course coursework for Master of Computer Science
- 8 hours of breadth or elective coursework for Master of Science in Computer Science
- 8 hours of required or elective coursework for Master of Science in Bioinformatics: Computer Science
- 8 hours of elective coursework for PhD in Computer Science

* The 8 credit hours of transferable coursework may not include the bridging courses: CS 400, CS 401, CS 402, and CS 403.

** A letter grade of B or above, or an S is required for transfer.

Coursework Requirements

Code	Title	Hours
Core Coursework		**17**
CS 400	Accelerated Fundamentals of Computing I	3
CS 401	Accelerated Fundamentals of Algorithms I	3
CS 402	Accelerated Fundamentals of Computing II	3
CS 403	Accelerated Fundamentals of Algorithms II	3
CS 491	Seminar (Section: Seminar – Excursions in Computing I)	1
CS 491	Seminar (Section: Seminar – Excursions in Computing II)	1
CS 597	Individual Study	3
Additional Coursework		**3**
Elective 400-level CS course		3
Total Hours		**20**

for the Graduate Certificate in Computing Fundamentals (on campus or online)

The learning objectives for the program are the following.

1. Exhibit proficiency in the design, implementation, and testing of software.
2. Demonstrate skills and experience working in small teams in order to solve problems; design, implement, and test code; and learn from one another.
3. Apply algorithmic and theoretical computer science principles to solve computing problems from a variety of application areas.

4. Demonstrate the ability to learn and develop competencies in specialized or emerging computer science fields.
5. Demonstrate the ability to read, analyze, and discuss research papers.

Students will be assigned letter grades appropriate to the course subject.

for the Graduate Certificate in Computing Fundamentals (on campus or online)

Admission Requirements

The iCAN program is a broadening participation program designed for college graduates without a background in computer science. Successful completion of the iCAN program results in a student receiving a Computing Fundamentals Certificate. Below are the admission requirements for the iCAN program (https://cs.illinois.edu/academics/graduate/ican/application-process/).

- A baccalaureate degree (or higher) in any field other than computer science.
- College algebra
- Overall GPA of 3.0 or above.
- Unofficial transcripts are accepted for application review.
- Test scores: A GRE score is not required for admission into the iCAN program.

Financial Aid

The department offers tuition scholarships for the iCAN program based on financial need and application materials.

CPA Pathways, GCRT

for the Graduate Certificate in CPA Pathways (online)

The CPA Pathways Graduate Certificate combines advanced technical knowledge in financial accounting, taxation, and data analytics with professional competencies in critical thinking, communication, leadership, and strategic decision-making. Students will study advanced principles, concepts, and methods used to record and report the transactions and taxation of a business entity, as well as the data analytics tools and processes to analyze accounting information. Students will also apply their knowledge in practical, real-world settings via experiential learning opportunities. Career opportunities for students who complete the CPA Pathways Graduate Certificate include positions in audit and assurance services, corporate accounting, taxation, consulting and advisory services, and in governmental and not-for-profit entities.

Admission

To learn more about this graduate certificate, including details about the admissions process, visit the CPA Pathways Graduate Certificate (https://giesonline.illinois.edu/credential/cpa-pathways-graduate-certificate/) website.

Graduation Requirements
Minimum Cumulative GPA: 2.75
Minimum hours required for certificate completion: 12 hours
Students who have successfully completed the *CPA Pathways* certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

12 hours of elective coursework requirements of the iMBA degree program
12 hours of elective coursework requirements of the iMSM degree program
12 hours of elective coursework requirements of the iMSA degree program

Code	Title	Hours
Required:		
ACCY 569	Data Driven Decisions in Accounting	2
ACCY 576	Data Preparation for Accounting	2
Select at least 2 credit hours from the following list:		
ACCY 504	Auditing	2 or 4
ACCY 506	Advanced Topics in Accounting	4
ACCY 507	Taxation of Business Entities	2 or 4
ACCY 516	Professional Responsibility and Ethics for Accountants	3 or 4
ACCY 517	Financial Statement Analysis and Valuation	2 or 4
Select the balance of 12 credit hours from the list above or the list below:		
ACCY 577	Machine Learning for Accounting	2
ACCY 578	Accounting Analytics Applications	1
BADM 403	Corporate & Commercial Law	4
MBA 563	Data Toolkit: Business Data Modeling & Predictive Analytics	4
MBA 564	Data Analytics Applications in Business	2
MBA 565	Infonomics	4
Total Hours		**12**

for the Graduate Certificate in CPA Pathways (online)

The learning objectives primarily include the ability to understand and evaluate:

1. The courses in the CPA Pathways Graduate Certificate can be used to meet the educational requirements for the Uniform CPA Exam.
2. Accounting for mergers and acquisitions: investment accounting, preparation of consolidated financial statements, business combination achieved in stages, divestitures and deconsolidations, segment reporting, goodwill / allocation impairment, and variable interest entities.

3. The U.S. federal income tax treatment of corporations and pass-through entities, including Subchapter S corporations, partnerships, and limited liability companies;
4. A variety of tools to break apart financial reports into meaningful units for analysis, forecast financial statements, and value a firm and the models necessary to analyze, interpret, understand, and use financial information in a valuation setting.
5. Methods to (i) apply data analytics in a variety of accounting and business contexts, (ii) critically solve business problems using data-intensive business and accounting information, and (iii) synthesize and effectively communicate data-intensive information, findings, and conclusions to other environment-constituents, including supervisors, peers and subordinates, clients, and regulatory agencies.

Dairy Nutrition for Udder Success, GCRT

for the Graduate Certificate in Dairy Nutrition for Udder Success (online)

The Dairy Nutrition for Udder Success Graduate Certificate will provide students with practical knowledge about dairy nutrition and management, and equip them with technical skills needed to optimize the health, nutrition, and milk quality of dairy livestock. Through a unique blend of theoretical knowledge, hands-on training, and cutting-edge technology applications, participants will demonstrate the skills to formulate a feed ration that meets dietary and production needs, use artificial intelligence to optimize animal health, and investigate milk composition and its nutritional impact. Graduates of this certificate will be able to create well-balanced diets that elevate the overall well-being and productivity of dairy herds.

for the Graduate Certificate in Dairy Nutrition for Udder Success (online)

Graduation Requirements

Minimum Cumulative GPA: 2.75
Minimum hours required for certificate completion: 12 hours
Students who have successfully completed this certificate may use the certificate courses to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

12 hours of elective course requirements of the Animal Sciences, MANSC degree

The required courses for this certificate are listed below.

Code	Title	Hours
ANSC 500	Feeds in Dairy Nutrition and Diet Formulation	4
ANSC 501	Nutritional Impact on Cow Health and Disorders	4
ANSC 502	What is Milk and Milk Quality	4
Total Hours		**12**

for the Graduate Certificate in Dairy Nutrition for Udder Success (online)

As a result of this program, students will be able to:

1. Identify most common feedstuffs based on physical appearance and chemical analysis and understand their role in a typical dairy ration.
2. Describe the basics of forage growth, harvest, ensilation, and storage connecting these principles to dairy nutrition.
3. Compare and contrast common cereal grains and oilseed meals used in dairy rations and understand key factors driving economic value of feedstuffs.
4. Describe common feed processing techniques and the nutritional value of resulting byproducts incorporated in dairy rations.
5. Formulate diets for dairy cows and young stock.
6. Use artificial intelligence to improve health and nutrition of dairy animals.
7. Identify, list, and explain the nutrients in milk and dietary nutrients that can foster improved milk quality in dairy herds.
8. Reliably demonstrate the ability to formulate a diet for dairy cows and understand its impact on health, fertility, and milk quality.

Food Regulations, Nutrition Policy, and Personalized Nutrition, GCRT (online)

for the Graduate Certificate in Food Regulations, Nutrition Policy, and Personalized Nutrition (online)

The Food Regulations, Nutrition Policy, and Personalized Nutrition Graduate Certificate provides knowledge of food regulations and nutritional policies in the emerging field of personalized nutrition. Learners will explore the complex regulations for the development of food products and food ingredients; discuss the economic, social, and cultural factors that influence U.S. food & nutrition policies and their impact on food systems and population health; examine key aspects of individual genetic variation and the external factors that underlie the field of personalized nutrition. Lastly, learners will investigate research evidence and analyze the emerging personalized nutrition trends, innovations, and regulatory challenges.

Graduation Requirements

Minimum Cumulative GPA: 2.75
Minimum hours required for certificate completion: 12 hours
At this time these certificate courses do not satisfy degree requirements for any graduate programs.

Code	Title	Hours
NUTR 581	US Food Regulations	4
NUTR 582	Personalized Nutrition	4
NUTR 583	Nutrition Policy	4
Total Credit Hours		**12**

for the Graduate Certificate in Food Regulations, Nutrition Policy, and Personalized Nutrition (online)

As a result of this program, students will be able to:

1. Develop an awareness and appreciation of the complex regulations that must be followed for development of a new food ingredient or new food product in the US market.
2. Explain the economic, political, social & cultural factors that influence U.S. food & nutrition policies.
3. Examine the impact of economic, political, social & cultural factors on national food systems and population health.
4. Discuss the key aspects of individual genetic variations, the epigenome, the microbiome, and the exposome that underlie the field of personalized nutrition and contribute to individualized responses to dietary intakes.
5. Examine the current research evidence of personalized nutrition.
6. Analyze the emerging personalized nutrition trends, innovations, and regulatory challenges.

Fundamentals of Human Resources, GCRT

for the Graduate Certificate in Fundamentals of Human Resources

Fundamentals of Human Resources Certificate Overview:

Obtain a framework for the analysis of employment relationships including human resources management strategies and practices. Learn about the theoretical and practical issues surrounding the design of effective compensation systems and the practice of identifying and recruiting a diverse workforce.

The online certificate program consists of a variety of tracks and each track has three courses (12 credit hours total, four credit hours per course). Each course in the certificate program is either six or eight weeks long. You can choose to engage in one or more certificate program tracks. Once you have received one or more certificates, and decide you are interested in the full Master of Human Resources and Industrial Relations (MHRIR) program, you are able to apply for the online master's program.

Each certificate program track takes between 7 to 10 months to complete.

How do I know if the certificate program is for me?

Are you...

- working in HR with no HR background?
- employed by an organization that provides tuition reimbursement, but the reimbursement amount isn't equivalent to a full degree program?
- seeking to gain more knowledge in HR but either unable to or prefer not to attend graduate school?
- currently in HR and seeking to freshen-up your knowledge? This group may include, for example, individuals who started in HR, left HR for different reasons or even left the labor force.
- seeking to enter the HR field or change positions within your organization to HR, but do not want to commit/can't commit to a full degree?
- an individual who wants to know more about HR in general prior to embarking on a full degree program?

If you answered 'yes' to one or more of these questions, then this certificate program may be the perfect fit for you.

What is required to apply for one of these certificate programs?

Please note all applicants must have received a bachelor's degree prior to starting one of our certificate program tracks.

- Resume
- Official Transcripts
- English Proficiency Exam for international students

for the Graduate Certificate in Fundamentals of Human Resources

Graduation Requirements

Minimum Cumulative GPA: 2.75

Minimum hours required for certificate completion: 12 hours

Students who have successfully completed the *Fundamentals of Human Resources* certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

- 8 to 12 hours of core and/or 4+ hours of elective coursework requirements of the MHRIR degree program (12 hours total). Certificate may fulfill the International Human Resource Management and Human Resource Management and Organization Behavior distribution requirements as well as another required course (LER 591)

Students in the certificate program will choose three out of the six course options listed below. Students will need to complete 12 credit hours total to be awarded a certificate. The courses do not need to be taken in any particular order.

Code	Title	Hours
LER 591	Employment Relations Systems	4
LER 561	Compensation Systems	4
LER 595	Managing Diversity Globally	4
LER 566	International HR Management	4
LER 539	Talent Management	4
LER 522	Employment Law for HR Managers: Discrimination, Compensation, and Privacy	4
Total Hours		12

for the Graduate Certificate in Fundamentals of Human Resources

---

Below is a subset of learning outcomes from our MHRIR degree program. These outcomes are specific to the Fundamentals of Human Resources Certificate. LER utilized HRCI's Human Resources Body of Knowledge to inform our learning objectives and has recently (January 2022) received "exceeds expectations" score from the Office of the Provost Learning Outcomes Assessment of its MHRIR degree program.

1. Students will lead Employee and Labor Relations by managing workforce relationships, developing inclusive and respectful company culture, and building communication systems.
2. Students will understand the structural elements of compensation system design and evaluate an organization's Compensation and Benefits structure relative to market forces, union agreements, and legal requirements.
3. Students will be able to integrate, synthesize, and apply knowledge of ethical dilemmas and solutions in Human Resources. Students will apply strategies for realizing the benefits of diversity and inclusion and employ practices that contribute to healthy, safe, and secure workplaces, communities, and societies as part of the organization's corporate social responsibility.
4. Students will be able to use critical thinking and problem-solving skills to act strategically when making decisions in business and in life.
5. Students will be effective leaders of change and apply interpersonal skills to work well in cross-functional teams.

Health and Well-being for Designed Environments, GCRT

for the Graduate Certificate in Health and Well-being for Designed Environments (online)

The Health and Well-being for Designed Environments Graduate Certificate at the University of Illinois Urbana-Champaign is designed to provide environmental design professionals with an in-depth understanding of the relationship between conditions in the built environment and individual performance and population health, well-being, and quality of life. This Graduate Certificate not only provides strong foundational knowledge of built environment and health and new tools for design in this area, but also offers students multiple opportunities to apply this knowledge and skill in on-going projects.

Graduate Certificate coursework enables students to develop expertise in research and strategies for environmental design to improve human health and wellbeing outcomes through design solutions and interventions in diverse environment types and contexts, at a range of scales. Responding to an unmet need in the profession, students completing the certificate will be prepared to work on interdisciplinary teams addressing complex societal problems involving the built environment's critical role in human health and wellbeing in the US and internationally.

for the Graduate Certificate in Health and Well-being for Designed Environments (online)

The Health and Well-being for Designed Environments Certificate requires 12 credit hours (three courses) to complete upon admission. Students should follow the program of study below to meet the certificate coursework requirement. Students should complete ARCH 521 and ARCH 563, offered in fall semester, before enrolling in ARCH 525, offered in spring semester.

Graduation Requirements

Minimum Cumulative GPA: 2.75
Minimum hours required for certificate completion: 12 hours

Students who have successfully completed this certificate may use the certificate courses to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

-12 hours of Health and Well-being Concentration Courses in the MARCH degree in the School of Architecture.
-12 hours of elective coursework in the MS in Architectural Studies degree in the School of Architecture.

Code	Title	Hours
Certificate Requirements		
ARCH 521	Applications in the Built Environment, Architecture and Global Health and Well-Being	4
ARCH 563	Human-centric Research for Designed Environments	4
ARCH 525	Project-scale Health Impact Assessment	4
Total Hours		**12**

for the Graduate Certificate in Health and Well-being for Designed Environments (online)

At the completion of the Health and Well-being for Designed Environments Certificate Program, you should demonstrate the following at a level useful and applicable in professional environmental design practice:

1. **Knowledge** – awareness of foundational theories and studies linking built environment qualities and characteristics to the mental and physical health of occupants and members of surrounding communities.
2. **Organization** – ability to identify appropriate target projects, plan and implement a design and health focused strategy throughout the arc of these environmental design projects, organize resources, and effectively manage an interdisciplinary project team.
3. **Research** – ability to locate, select, and apply appropriate research literature; identify suitable sources of health data or devise methods to collect relevant data; analyze data to understand the relationship between a design project and occupant and community health; develop strategies for post-occupancy collection of applicable human-centric data.
4. **Application** – demonstrate skill in applying findings of environment-and-health-related analysis to a variety of architectural project types through the pre-, schematic-, design-development, construction, and post-occupancy phases of a project with the aim of improving occupant and public health outcomes.
5. **Communication**– ability to use various and appropriate forms of communication during and on completion of the design process, to elicit information, explain, dialogue and persuade, adapting to multiple professional, client, and community audiences and situations.

Healthcare Innovation, Design, and Entrepreneurship, GCRT

for the Graduate Certificate in Healthcare Innovation, Design, and Entrepreneurship

The Healthcare Innovation, Design, and Entrepreneurship Graduate Certificate integrates key concepts from new product development, data analytics, design thinking, and entrepreneurship in healthcare to provide learners with a comprehensive foundation in the healthcare innovation process. Through this program, learners will be able to identify healthcare challenges and design innovative solutions that have a higher likelihood of success. Moreover, they will learn to make informed decisions grounded in data analysis and inferences, while also cultivating design thinking skills.

for the Graduate Certificate in Healthcare Innovation, Design, and Entrepreneurship

Learners who have successfully completed this certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

- 12 hours of elective coursework requirements for the iMBA degree program.
- 12 hours of elective coursework requirements for the iMSM degree program.
- 12 hours of elective coursework requirements for the iMSA degree program.

The required courses for this certificate are listed below.

Graduation Requirements

Minimum Cumulative GPA: 2.75
Minimum hours required for certificate completion: 12 hours

Course substitutions may be approved by the Department of Business Administration and the Carle Illinois College of Medicine.

Code	Title	Hours
MBA/HBSE 571	Identify—Healthcare Ecosystem and Need Identification	4
MBA/HBSE 572	Innovate—Healthcare Innovation Process	4
MBA/HBSE 573	Implement—Healthcare Business Strategy and New Venture Implementation	4
Total Hours		**12**

for the Graduate Certificate in Healthcare Innovation, Design, and Entrepreneurship

Upon completion of the certificate, students will be able to:

1. Recognize key principles of the healthcare innovation ecosystem, including applicable concepts from new product development processes, data analytics, design thinking, and entrepreneurship.
2. Identify opportunities for healthcare innovation design and development through qualitative, design thinking, and data analytics approaches.
3. Apply business and design thinking principles and strategies to develop and evaluate new products and processes for healthcare innovation.
4. Apply business and design thinking principles and strategies to develop and evaluate new products and processes for healthcare innovation.
5. Analyze emerging trends, technologies, practices, and forthcoming advancements in the healthcare domain.
6. Develop a user-centered, entrepreneurial, and analytical mindset that can be employed to solve problems in the healthcare system, develop new products, and improve processes.

Inclusive by Design in Recreation, Sport, and Tourism, GCRT

for the Graduate Certificate in Inclusive by Design in Recreation, Sport, and Tourism (online)

The Department of Recreation, Sport and Tourism offers a Graduate Certificate in Inclusive by Design in RST. The fully online certificate provides students and professionals needed educational modules and content focusing on the fundamental principles of inclusive design in contemporary society as related to recreation, sport and tourism; critical issues in parks and recreation management, sport, or tourism; and planning and design of parks or management of RST organizations. The certificate allows students and professionals to surpass the minimum requirements as mandated by accessibility laws via the Americans with Disabilities Act (ADA) and provides them with the necessary knowledge to increase health and wellbeing, social participation, and performance among diverse user groups.

Admission

The admission requirements are a minimum grade point average of 3.0 (A = 4.0) for the last two years of undergraduate work and any graduate work completed. International applicants must receive a minimum score on the TOEFL of 103 and on the IELTS a minimum score of 7.5. Students are also required to provide an academic statement of purpose and three letters of reference (at least one should be an academic reference). While RST 501 is listed as a pre-requisite, this requirement will be waived if the student has not taken this course. Certificate students may be admitted for the fall, spring, or summer semesters.

for the Graduate Certificate in Inclusive by Design in Recreation, Sport, and Tourism (online)

The graduate certificate in Inclusive by Design in RST provides students and professionals needed educational modules and content focusing on the fundamental principles of inclusive design in contemporary society as related to recreation, sport and tourism; critical issues in parks and recreation management, sport, or tourism; and planning and design of parks or management of RST organizations. The certificate allows students and professionals to surpass the minimum requirements as mandated by accessibility laws via the Americans with Disabilities Act (ADA) and provides them with the necessary knowledge to increase health and wellbeing, social participation, and performance among diverse user groups.

Graduation Requirements
Minimum Cumulative GPA: 3.0 **Credit transfer: Not applicable** (the students cannot transfer courses from other programs and institutions to count as a part of the certificate requirements) **Minimum hours required for certificate completion: 12**

Students who have successfully completed this certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

12 hours of required or supporting coursework of the RST MS degree program.

Code	Title	Hours
Core Coursework:		
RST 585	Inclusive by Design in RST	4
Select one Critical Issues Course from:		
RST 502	Critical Issues Recreation Mgt	
RST 520	Critical Issues Sport Mgt	
RST 530	Critical Issues Tourism Mgt	
Select one Option Area Course from:		
RST 588	Park Planning and Design	
RST 512	Managing Recreation, Sport & Tourism Organizations	
Total Credit Hours		**12**

for the Graduate Certificate in Inclusive by Design in Recreation, Sport, and Tourism (online)

At the completion of the Inclusive by Design in RST Certificate, students will demonstrate the following:

1. Understand and explore the fundamental differences between accessibility, universal design, and inclusive design.
2. Learn about and expand knowledge of universal design as it relates to an all-inclusive approach to various management and design areas in recreation, sport, and tourism (i.e., facility design, adaptive equipment, programming/events, laws and standards, policies and procedures, communication methods and workplace culture).
3. Explore the varying types of identities involved in the management of and participation in recreation, sport, and tourism (e.g., user identities spanning across different religious backgrounds, varying levels of visible and invisible [dis]ability, age, different race/ethnicity and cultural backgrounds, gender identities, sexual orientations, body sizes, and veteran experiences).
4. Critically analyze adaptive plans and resources of recreation, sport, and tourism organizations.
5. Critique components of inclusive design of recreation, sport, and tourism organizations.
6. Understand the importance of staff training and development to foster inclusive facility and programming.
7. Examine professional protocol and staff attitudes for inclusivity, including adapting planning processes and ongoing development of inclusive principles.
8. Identify and analyze major issues and trends facing professionals in the field of parks, recreation, sport, and tourism.
9. Better understand causes (e.g., social, political, economic, environmental) and consequences of trends and issues in the field of recreation, sport, and tourism.
10. Synthesize park design theory and real-world applications.
11. Develop skills in conducting critical case analyses pertaining to the management of RST organizations.
12. Appreciate and understand how to lead organizational change and its value to the management of RST organizations.

Instructional System Design Management and Leadership, GCRT

for the Graduate Certificate in Instructional System Design Management and Leadership

Instructional System Design Management and Leadership (ISDML) Graduate Certificate requires 16 credit hours to complete. The ISDML CERT is designed to train individuals to aspire to design and develop technology-enriched and -enabled learning systems for broadly defined learning and performance goals in workplace contexts. The ISDML CERT equips students in foundational knowledge and competencies in instructional system design and learning technology integration for practical application purposes in workplace settings. In addition, the coursework will help learners develop skills in various topical areas (e.g., project management, program evaluation, consulting with organizations). We anticipate the proposed CERT to produce capable instructional designers who can lead efforts to meet many increasing needs of workplaces and workforce development to expand learning and development modalities from face-to-face to virtual settings, in response to changing organizational needs as well as major systemic changes. Upon completing the CERT, students will be able to:

- Modify existing learning systems and solutions for remote and online delivery.
- Design scalable learning systems and solutions for developing working professionals' capabilities in the workplace.
- Develop learning systems and solutions for broadly defined learning and performance outcomes in the workplace across industries.
- Facilitate adoptions of innovations in broadly defined learning and performance contexts in the workplace.
- Evaluate the impact of learning systems and solutions in the workplace.
- Manage the processes and resources involved in instructional system design.

The Graduate Certificate programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

Admission

The Department of Education Policy, Organization and Leadership carefully considers all applicants for graduate study. Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Facilities and Resources

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/epol/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

for the Graduate Certificate in Instructional System Design Management and Leadership

Instructional System Design Management and Leadership (ISDML) Graduate Certificate requires 16 credit hours (four courses) to complete upon admission. Students should follow the program of study below to meet the certificate coursework requirement. Students do not need to follow a specific sequence when completing the courses below.

Graduation Requirements

Minimum Cumulative GPA: 3.0

Minimum hours required for certificate completion: 16 hours

Students who have successfully completed this 16-credit hour certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

- 4 hours of 500-level course required in Education for the EdM degree program at EPOL, and
- 12 hours of Concentration Courses or 400/500-level Courses approved by Advisor for the EdM degree program at EPOL

or

- 4 hours of 500-level course required in Education for the MA degree program at EPOL, and
- 12 hours of 400/500-level Courses approved by Advisor for the MA degree program at EPOL

or

- Up to 12 hours of Major Subject coursework (includes concentration courses) required in Education for the EdD degree program at EPOL, and
- Up to 12 hours of Elective Hours or 400/500-level courses approved by Advisor for the EdD degree program at EPOL

or

- Up to 16 hours of Major Subject coursework (includes concentration courses) required in Education approved by the Advisor for the PhD degree program at EPOL

or

- Up to 16 hours of 400/500-level Courses in Education approved by the Advisor for the CAS program at EPOL

Code	Title	Hours
EPOL 472	Instructional and Training System Design	4
EPOL 476	Project Management Principles and Applications	4

International Education Administration and Leadership, GCRT

for the Graduate Certificate in International Education Administration and Leadership

International Education Administration & Leadership certificate, requiring 12 credit hours of coursework, trains professionals to lead, develop, implement and evaluate international programming and internationalization activities in business/industry and education sectors, including postsecondary settings, in both private and public sectors. Students may choose from among the courses listed to specialize in any of the areas of internationalization, and may elect a global education abroad program and/or an internship in order to develop expertise in a particular region or skill set. The institution has a long history of training international education specialists through Global Studies in Education and other related programs. Indeed, the institution itself is renowned for its own international education programing and leads the world in innovation in this field. The GCRT allows students to document specific expertise for employers by highlighting participation in skill building and practitioner focused coursework. Upon completing the GCRT, students will be able to:

- Critically and effectively engage in international program administration and leadership.
- Lead institutions in a changing, complex global environment through well-informed international policy and practice.
- Excel in international education careers across multiple sectors of the international education field, including programming and administration, managing study abroad programs, administering international student services, directing student services in ESL and intensive language programs, and directing government or private programs that support international education and engagement.
- Face emerging challenges within internationalization development.
- Respond to various challenges, including shifting political dynamics, increased health and safety issues, and imperatives to expand learning modalities from face-to-face to virtual settings.
- Facilitate and manage internationalization efforts in business, nonprofit, and education sectors, including postsecondary education.

The Graduate Certificate programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

Land, Agriculture and Alternative Investing, GCRT

for the Graduate Certificate in Land, Agriculture and Alternative Investing

The Land, Agriculture and Alternative Investing Graduate Certificate equips students with the specialized knowledge and skills needed to navigate the realm of land, agriculture and alternative assets. Through a blend of theoretical exploration and practical applications, students will critically evaluate cost structures, compensation elements, and the potential impact of leverage on wealth management and investment strategies, ensuring a comprehensive grasp of financial complexities. Furthermore, the program equips students with essential tax strategies specific to investing in land, agriculture, and alternative assets.

for the Graduate Certificate in Land, Agriculture and Alternative Investing

Graduation Requirements

Minimum Cumulative GPA: 2.75
Minimum hours required for certificate completion: 12 hours
Students who have successfully completed this certificate may use the certificate courses to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

12 hours of Field Specialization coursework requirements of the Agricultural and Applied Economics, MAAE degree program

The required courses for this certificate are listed below.

Code	Title	Hours
ACE 580	Taxation and Regulation of Alternative Investments	4
ACE 581	Financial Lifecycles and Alternative Investments	4
ACE 582	Theory and Portfolio Dynamics of Alternative Investments	4
Total Hours		**12**

for the Graduate Certificate in Land, Agriculture and Alternative Investing

As a result of this programs, students will be able to:

1. Describe the types and uses of alternative investments.
2. Explore the significance of alternative investments in the financial market.
3. Examine basic regulatory frameworks of governance.
4. Analyze the intricacies of financial planning across the consumer lifecycle emphasizing the role of alternative investments.
5. Acquire a comprehensive understanding of alternative investment strategies.
6. Develop due diligence frameworks for successful investment decisions.

Learning Design and Leadership, GCRT

for the Graduate Certificate in Learning Design and Leadership

The Certificate in Learning Design and Leadership, requiring 12 credit hours of coursework, explores innovative approaches to learning, with a focus on e-learning and technology-mediated knowledge communities. It is designed for educators and aspiring leaders in education at all levels, community educators, ed-tech developers, education writers, curriculum resource developers, instructional designers, trainers or anyone with a professional or personal interest in learning. Upon completing the CERT, students will be able to:

- Design and develop efficient, effective, and engaging learning systems and environments.
- Become autonomous knowledge creators and sharers to advance the practice of learning design.
- Implement alternative forms of assessment.
- Innovate teaching and learning through sound evaluations.

The Graduate Certificate programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

Managerial Economics & Business Analysis, GCRT

for the Graduate Certificate in Managerial Economics & Business Analysis (online)

The Managerial Economics and Business Analysis Graduate Certificate is designed to develop leaders who (1) have a solid understanding of the operation of markets, (2) understand how to assess the macro-economic environment with examples of real-world events, and (3) have developed an analytical framework to combine the power of theory and data to make effective business decisions. This Graduate Certificate will not only provide a strong foundational knowledge of market characteristics and economic environments and how these factors impact business management and operation, but also provide students multiple opportunities to apply this knowledge.

Students who have successfully completed this certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

- 12 hours of core coursework requirements of the iMBA (p. 1208) degree program.
- 12 hours of elective coursework requirements of the iMSM (p. 1639) degree program.
- 12 hours of elective coursework requirements of the iMSA (p. 1056) degree program.

Admission

To learn more about this graduate certificate, including details about the admissions process, visit the Managerial Economics & Business Analysis Graduate Certificate (https://giesonline.illinois.edu/credential/managerial-economics--business-analysis-graduate-certificate/) page.

Middle Grades Education, GCRT

for the Graduate Certificate in Middle Grades Education

The University of Illinois Urbana-Champaign offers a Graduate Certificate (GCRT) in Middle Grades Education, requiring 33 credit hours of coursework. This GCRT prepares professionals holding a bachelor's degree to teach in grades 5-8. The program meets the needs of non-licensed paraprofessionals who are working in classrooms to become licensed teachers. The online program, offered summers and evenings, combines foundational knowledge and practical experiences to fill the need for outstanding teachers at the middle grades level throughout the state of Illinois. The Middle Grades Education (GCRT) program will be offered with endorsements in two areas (Literacy and Science), but candidates may choose to concentrate in one area alone. The coursework leads to licensure to teach in grades 5-8. Upon completing the GCRT, students will be able to:

- Utilize content and general teaching methods.
- Apply an understanding of adolescent development in teaching methods.

- Pursue teaching positions in middle schools in Illinois.
- Teach in subject areas of literacy and science depending on concentration selections.

Admission

The Department of Curriculum and Instruction carefully considers all applicants for graduate study. Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). The quality of the applicant's undergraduate and graduate training and grade point average are primary considerations. Other important factors evaluated include the three letters of recommendation and statement of purpose. International applicants must submit a TOEFL score.

Faculty Research Interests

For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

Facilities and Resources

Departmental resources consist of cooperation with Children's Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: *International Journal of Education & the Arts, Journal of Curriculum Studies*, and *American Educational Research Journal.* The department also has available resources and some workshops provided during the academic year. Program areas (including CREATE, DELTA, Language & Literacy, and MSE) offer discipline-specific resources.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on university resources can be found at the GradMap pages website (https://www.grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/).

Financial Aid

Please contact University of Illinois Student Financial Aid directly at (217) 333-0100 or finaid@illinois.edu for any questions you may have related to financial aid.

for the Graduate Certificate in Middle Grades Education

Graduation Requirements
Minimum Cumulative GPA: 3.0
Minimum hours required for certificate completion: 33 hours
Students who pursue an EDM in Curriculum and Instruction following completion of this certificate can use these certificate courses to satisfy most degree requirements for the Masters program. Students pursuing that route will still need to satisfy requirements for foundations courses and a total of 12 credit hours of 500 level coursework.

Strategic Leadership & Management, GCRT

for the Graduate Certificate in Strategic Leadership & Management (online)

The Strategic Leadership and Management Graduate Certificate is designed to develop leaders who (1) understand how to effectively work with and manage people individually and in teams, (2) understand how organizations are designed and managed, and (3) analyze business situations and formulate and implement strategies to gain and sustain competitive advantage This Graduate Certificate will not only provide a strong foundational knowledge of team and organizational leadership and strategy, but also provide students multiple opportunities to apply this knowledge.

Students who have successfully completed this certificate may use the certificate to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

- 12 hours of core coursework requirements of the iMBA (p. 1208) degree program
- 8 hours of core and 4 hours of elective coursework requirements of the iMSM (p. 1639) degree program
- 12 hours of elective coursework requirements of the iMSA (p. 1056) degree program

Admission

To learn more about this graduate certificate, including details about the admissions process, visit the Strategic Leadership & Management Graduate Certificate (https://giesonline.illinois.edu/credential/strategic-leadership-and-management-graduate-certificate/) website.

Wetland Science and Conservation, GCRT

for the Graduate Certificate in Wetland Science and Conservation (online)

The Wetland Science and Conservation Graduate Certificate provides students with an in-depth understanding of wetland ecosystems by examining their biological, chemical, and physical aspects. Students will explore the impact of U.S. regulations on wetlands, assess the consequences of human activities on wetland ecosystem services, and master techniques for wetland delineation and restoration planning. The curriculum extends its focus beyond national borders, delving into global wetland conservation through exploration of international agreements, non-governmental organizations, and national regulations. Finally, students will gain insight into the diverse stakeholder landscape that influences successful wetland management, enabling them to make informed decisions that balance ecological preservation and human needs.

for the Graduate Certificate in Wetland Science and Conservation (online)

Graduation Requirements

Minimum Cumulative GPA: 3.0
Minimum hours required for certificate completion: 12 hours
Students who have successfully completed this certificate may use the certificate courses to satisfy the following degree requirements, provided they apply and are admitted to the degree program:

12 hours of elective coursework requirements of the Natural Resources & Environmental Sciences, MS (non-thesis) degree program

The required courses for this certificate are listed below.

Code	Title	Hours
NRES 417	Principles of Wetland Science and Conservation	4
NRES 517	Advanced Wetland Theory and Techniques	4
NRES 527	Wetland Science and Conservation in Context	4
Total Hours		**12**

for the Graduate Certificate in Wetland Science and Conservation (online)

As a result of this program, students will be able to:

1. Assess the biological, chemical, and physical components of wetlands.
2. Explain how current U.S. laws and regulations govern human impacts to wetlands.
3. Evaluate the impact that human activity has on wetland ecosystem services and functions.
4. Identify wetlands and delineate wetland boundaries based on vegetation, soil, and hydrological indicators.
5. Create a wetland restoration plan capable of restoring/replacing ecosystem services and functions.
6. Apply ecosystem stewardship concepts and technological tools to wetland restoration and conservation.
7. Evaluate the role of national regulations, international agreements, and non-governmental organizations in global wetland conservation.
8. Assess the impact that different stakeholder groups can have on successful wetland management.

Accountancy Graduate Minor

for the Graduate Minor in Accountancy

For additional details and requirements refer to the department's program information and the Graduate College Handbook *(*http://www.grad.illinois.edu/gradhandbook/*).*

The minor in Accountancy seeks to develop business leaders who understand the role of accountancy and accounting in the conduct of business and the allocation of resources within society.

This minor requires twelve graduate hours of coursework.

Note: Students within the major cannot minor in the same program.

Admission

Admission to the minor requires an application to the Department and admission to one of the M.S. programs in the College of Business. Admission is limited and acceptance is on a competitive basis.

Note: Students within the major cannot minor in the same program.

African Studies Graduate Minor

for the Graduate Minor in African Studies

The interdisciplinary graduate minor in African Studies promotes training in African Studies for masters and doctoral students in other disciplines interested in complementing their degree program with an interdisciplinary perspective on Africa.

Note: Students within the major cannot minor in the same program.

Admissions

The Center for African Studies admits students in the fall term only. Applicants to the Masters degree in African Studies should hold at least a Bachelor's degree from an accredited college or university in the United States or from a recognized institution of higher education abroad. All graduate college admission requirements also apply. The Center does not require the Graduate Record Examination (GRE) scores, but it is highly recommended for students applying for the Foreign Language and Area Studies (FLAS) fellowship. Successful applicants should have a grade point average of at least 3.0 (4.0=A) calculated for the last 60 semester hours of undergraduate course work. International applicants or applicants whose native language is not English must have a minimum TOEFL score of 550 on the paper-based test (PBT) -- 213 on the computer-based test (CBT) or 79 on the internet-based test (IBT). For information about the application process and to access both domestic and international student applications, start here (https://grad.illinois.edu/admissions/apply/).

For more information about the Center's admission requirements and procedures, and deadlines please visit our website (https://afrst.illinois.edu/academics/graduate-programs/how-apply/).

Students interested in the graduate minor in African Studies must be in good standing in a graduate program, have permission from the major program, and demonstrate an interest in African Studies. For more information, contact Dr. Maimouna Barro (barro@illinois.edu).

Faculty Research

The Center for African Studies' has both core and affiliate faculty represented in over 34 units across campus encompassing various disciplines in the humanities and social sciences, as well as in professional schools. The faculty is the backbone of the Center and constitutes the most critical element of the graduate experience. They excel in teaching at all levels and have a strong commitment to innovative research. Both Center faculty and teaching assistants have received numerous college and campus teaching awards. For more information about the Center faculty, please visit our website (https://afrst.illinois.edu/directory/faculty/).

Facilities and Resources

Established since 1970, the Center for African Studies is one the largest and most dynamic African National resource Centers in the country. The Center promotes excellence in research and teaching on Africa in all disciplines. The Center also exists to increase and disseminate knowledge about Africa to the larger community through various outreach activities to colleges, schools, community groups and businesses. At a time when the university of Illinois is expanding its international dimension, the Center for African Studies is dedicated to promoting a vibrant African Studies program and to fostering an understanding of Africa and African peoples through research, teaching and various Africa-related programs and events. The Center organizes a wide range of activities including conferences, lectures, film festivals, art exhibits, language institutes, workshops, and symposia. In addition, the Center regularly hosts visitors from the United States and abroad, namely Africa, and is strongly committed to developing linkages with individuals and institutions based in the African continent.

In 2012, the University of Illinois Library reorganized its international and area studies units into one large International and Area Studies Library (IASL) in an excellent renovated space. This new unit includes the African Studies library and other world areas library collections. The University Library has supported a full-time African Studies Bibliographer since 1969, and has provided the necessary acquisitions, cataloging, and processing staff since then.

The African Studies collection include over 354,000 items in all formats, with more than 300,000 in printed volumes and in English and French and a smaller number in Portuguese, German and other European languages. The Library adds about 900 items written in African languages each year. About 16,000 volumes written in Arabic deal with topics related to Africa, and more than 7000 are in Amharic, Bamana, Hausa, Lingala, Swahili, Tigrinya, Wolof, and Zulu. There are roughly 2,900 serials and 46,000 maps, of which 2849 have been digitized, as well as 12,000 microforms, and more than 800 audio-visual materials. The collection covers all African countries and includes materials in about 80 African languages. Priority countries for collecting include: Burkina Faso, Côte d'Ivoire, Democratic Republic of the Congo, Egypt, Eritrea, Ethiopia, Gambia, Kenya, Morocco, Mozambique, Nigeria, Senegal, South Sudan, South Africa, Tanzania, Tunisia, Zambia, and Zimbabwe. The collection is interdisciplinary and concentrated mainly in the humanities, social sciences, human rights and law, and agriculture. Our large collection of primary source materials, covering all of Africa, includes 120,000 pages of Arabic manuscripts and thousands of United States, United Kingdom, and African government documents. The Africana film collection is one of the finest in the US, and our African film database provides access to more than 800 films from or about Africa. UI's rich museum collections include the Krannert Art Museum and the Spurlock Museum and hold over 10,000 African artifacts. The museums present interesting exhibits and host African performances. Teacher kits on various African topics are also provided by the Krannert Art Museum.

The African studies bibliographer runs the Africana library and teaches IS 530, one of the Center's core courses and plays a key role in the Center's graduate program. For further information about the Africana library, please visit the library website (http://www.library.illinois.edu/ias/africana/).

Financial Aid

Students must apply and be admitted according to the set deadlines to be considered for assistantships and fellowships. The Center evaluates and ranks entering students on the basis of academic promise. This ranking becomes part of the basis for financial aid decisions. Funding is generally awarded to cover the fall and spring semesters and occasionally on a semester-by-semester basis. Multiple years of funding cannot be guaranteed, but the Center considers it a priority to fund students and see them through the program. Continued funding is based on academic (in the case of Foreign Language and Area Studies Fellowships) and job performance (in the case of assistantships), the availability of positions, and the Center's budget in a given year or US Department of Education Title VI funding cycle.

Students are encouraged to check the Graduate College's website (http://www.grad.illinois.edu/) for funding opportunities--whether they are fellowships or assistantships.

For information about available awards and application deadlines, visit this website (https://afrst.illinois.edu/academics/financial-aid/).

for the Graduate Minor in African Studies

For additional details and requirements refer to the department's Graduate Programs (https://afrst.illinois.edu/academics/graduate-programs/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
AFST 522	Development of African Studies	4
Electives hours that relate to Africa that are outside the student's major department. At least four hours must be at the 500 level.		8
A minimum of four semesters of college level study of an African language. NOTE: Hours for language cannot be applied toward minor requirements.		
Total Hours		**12**

Other Requirements

Requirement	Description
If the student's thesis deals in whole or in part with Africa, it is strongly recommended that a faculty member from the Center be a formal member of the student's committee.

American Indian & Indigenous Studies Graduate Minor

for the Graduate Minor in American Indian & Indigenous Studies

The American Indian and Indigenous Studies graduate minor is grounded by a strong commitment to the worlds, histories, representations, and political struggles of indigenous peoples internationally, and uses interdisciplinary methods of critical inquiry as a means through which students engage research and scholarship in their major.

Admission

Applicants to the graduate minor must be in good standing in a masters or doctoral program at the University of Illinois Urbana-Champaign. Applications must include a statement of purpose that describes how the student's graduate work and/or research interests intersect with American Indian and Indigenous studies. The intent to pursue the graduate minor must be approved by the student's major advisor and graduate program director in their home department.

for the Graduate Minor in American Indian & Indigenous Studies

The student must successfully petition the Graduate College to add the American Indian and Indigenous Studies graduate minor to their academic records and transcripts.

For additional details and requirements refer to the department's program information online (http://www.ais.illinois.edu/programs/grad/minor/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Art History Graduate Minor

for the Graduate Minor in Art History

The Graduate Minor in Art History is designed to provide UIUC graduate students, both at the master's and doctoral levels from any discipline, a foundation in the histories, theories and methods of art history and visual cultures. The Minor is taken in conjunction with, and is intended to complement the student's work in their primary disciplines.

In addition to the minor requirements, students must also complete the requirements of their major degree. Students interested in the Art History Graduate Minor should contact the Graduate Advisor in Art History.

Admission

On a rolling basis, and after talking to the Graduate Studies Advisor in Art History.

for the Graduate Minor in Art History

For additional details and requirements refer to the department's Graduate Program's Web page (https://art.illinois.edu/index.php/prospective/academics/graduate-programs/art-history-minor/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Asian American Studies Graduate Minor

for the Graduate Minor in Asian American Studies

Graduate Degree Programs in Asian American Studies

Graduate Minor in Asian American Studies (p. 2133)

The Asian American Studies Program offers a graduate minor in Asian American Studies that is interdisciplinary in nature. The graduate minor is designed to complement the graduate work of the students' area of concentration.

Admission

Students must be in good academic standing in a graduate or professional program at the University of Illinois Urbana-Champaign and demonstrate an interest in Asian American Studies. Those wishing to apply to the minor must submit a written statement indicating why they wish to pursue the minor, demonstrate successful completion of one course in Asian American Studies at the undergraduate or graduate level, and provide written approval to pursue the minor from their graduate advisor and graduate program director. The written statement should specifically discuss how the student's prior academic training and/or work experiences are related to Asian American Studies, how a graduate minor in Asian American Studies fits into their major academic program on campus, as well as how the minor would contribute to future professional development. The written statement and other supporting material must be submitted to the Director of the Asian American Studies Program.

for the Graduate Minor in Asian American Studies

For the Graduate Minor in Asian American Studies to appear on the academic transcript, the student must successfully petition the Graduate College to add the Graduate Minor in Asian American Studies to their academic records.

For additional details and requirements refer to the department's Graduate Program's webpage (https://asianam.illinois.edu/academics/graduate-minor/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the Graduate Minor in Asian American Studies

1. Theoretical Approaches: Graduate students acquire proficiency in the field and area of Asian American Studies, and more generally the field of Ethnic Studies. This includes knowledge based in intersectional, comparative, and interdisciplinary approaches and critical theories. While largely based in an area approach to the United States, Asian American Studies is also deeply concerned with transnational, diasporic, and global studies. Students learn the theories and methods of the social sciences and humanistic approaches toward the graduate concentration in Asian American Studies.
2. Critical Inquiry and Discovery: Applying theories in Asian American Studies, students develop skills of critical inquiry that draw on intersectional and comparative approaches. As a mode of discovery students exercise their skills using methods of the social sciences and humanities through verbal communication in the classroom and written research projects. Students are asked to apply their critical modes of learning in original and unique projects of discovery through advanced research in a professional concentration.
3. Effective Teaching and Community Engagement: Graduate students study analytical concepts and models of community engagement related to the history of Asian American Studies. Reflection based on these approaches provides a context from which to understand the role of classroom learning and the application of theories of social change in community engagement.
4. Social Awareness and Cultural Understanding: Graduate students learn the dimensions and breadth of intersectional analysis. This includes the social, cultural, economic, and political issues concerning Asian Americans, and in relation to other social groups. The different social theories of power are examined to understand the categories of analysis such as race, gender, sexuality, class, ethnicity, religion, and disability, to name a few.
5. Intersectional Analysis and Interdisciplinary Methods: Graduate students gain an understanding of the global dimensions of intersectional approaches in a broad range of fields and disciplines including literary, historical, cultural and ethnographic methods. Through the study of migration and diaspora, the broad understanding of individual and collective dynamics are observed, analyzed, and theorized. Students are

presented with comparative frameworks to understand how race, gender, and sexuality, for example, are thought of from a number of vantage points. Students are introduced to the practice of interdisciplinary methodologies that emerge out of Asian American Studies and related fields.

Balkan Studies Graduate Minor

for the Graduate Minor in Balkan Studies

About the Minor

The Balkan Studies graduate minor is designed for M.A. or Ph.D. students in other disciplines who wish to complement their degree program with interdisciplinary study of the Balkans. Students interested in pursuing the minor must have a minimum of two years of college-level study of a language of the region: e.g., Albanian, BCS (Bosnian, Croatian, Serbian), Bulgarian, modern Greek, Hungarian, Macedonian, Romani, Romanian, Sloveneian, Turkish, Yiddish. A program of study can be tailored to the needs and interests of the individual student in consultation with Center staff; for admission to the program contact the Center.

Graduate Degree Programs in Russian, East European, and Eurasian Studies

The Russian, East European, and Eurasian Center offers a two-year program of language and area studies courses leading to an interdisciplinary Master of Arts degree. The program is designed to meet the needs of students proceeding to disciplinary-based doctoral work and those planning non-academic professional careers with area expertise. Programs offered by the Center:

- Russian, East European, and Eurasian Studies, MA (p. 1848)
- Russian, East European, and Eurasian Studies Minor (p. 2172)
- Balkan Studies Minor (p. 2135)
- Joint Degree in Russian, East European, & Eurasian Studies, MA and Library & Information Science, MS (p. 2228)

Admission

Prospective graduate students should have completed at least two years of Russian or another language of Eastern Europe or Eurasia. Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, Graduate Record Examination (GRE) scores (verbal, quantitative, and written), three letters of reference, and a writing sample. International students must submit Test of English as a Foreign Language (TOEFL) scores. All applicants must meet the requirements of the Graduate College. Admission is ordinarily in the fall semester, but occasional exceptions are made for spring and summer admission.

Faculty Research Interests

The faculty (https://reeec.illinois.edu/directory/faculty/) affiliated with the Center represent a broad range of interests and methodological approaches in the social sciences and the humanities, as well as the professional schools.

Facilities and Resources

The Russian, East European, and Eurasian Center was founded in 1959 and designated a National Resource Center by the U.S. Department of Education. It serves as an intellectual and institutional hub for the University community and the public through conferences, lectures, colloquia, visiting scholars, study groups, exhibits, films, and other activities.

The annual Summer Research Laboratory on Russia, Eastern Europe, and Eurasia features special workshops, seminars, lectures, films, and other events, most of which are free and open to the public.

The International and Area Studies Library (https://www.library.illinois.edu/ias/) at the University of Illinois has one of the country's three outstanding Slavic library collections (https://www.library.illinois.edu/ias/spx/). The Slavic Reference Service (https://www.library.illinois.edu/ias/spx/srs/) serves all faculty and students with expert bibliographers.

Language training is provided by the Departments of Germanic Languages & Literatures (https://germanic.illinois.edu/), Linguistics (https://linguistics.illinois.edu/), and Slavic Languages & Literatures (https://slavic.illinois.edu/) in:

- Bulgarian
- Bosnian, Croatian, Serbian
- Czech
- Old Church Slavonic
- Polish
- Russian
- Turkish
- Ukrainian
- Yiddish

Financial Aid

Financial aid is awarded on an academic-year basis. All fellowships and assistantships include a stipend plus tuition and fee waiver. Qualified incoming students who are U.S. citizens or permanent residents should also apply for U.S. Department of Education Title VI Foreign Language and Area Studies (FLAS) fellowships (http://publish.illinois.edu/illinoisflas/) offered through REEEC or other FLAS-granting campus centers.

Qualified students may also be eligible for other fellowships at the campus or departmental level. A limited number of teaching and graduate assistantships, which include a tuition and fee waiver, may also be available to outstanding students through REEEC and other units.The Graduate College maintains a list of available assistantships (https://grad.illinois.edu/clearinghouse/); additional information on need-based financial aid may be obtained from the Graduate College Fellowships Office (https://grad.illinois.edu/fellowships/about/).

for the Graduate Minor in Balkan Studies

For additional details and requirements refer to the department's Graduate Programs (https://reeec.illinois.edu/academics/ma-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
IS 530	Collection Development (Section C: REEES Bibliog Research Methods)	4
or REES 550	Seminar in REEE Studies	
Electives (4 hours at the 500 level) At least 8 graduate hours that relate to the Balkans chosen from the list of approved courses maintained by REEEC and taken outside the student's enrolling department.		8
Language Requirement: A minimum of two years college-level study of a language of the area or equivalent, including but not limited to Albanian, BCS (Bosnian, Croatian, Serbian), Bulgarian, modern Greek, Hungarian, Macedonian, Romani, Romanian, Slovenian, Turkish, and Yiddish. For professional work in the region or scholarly research on area topics at least three years of relevant language study are recommended.		
Students must also submit a research paper primarily on the region.		
Total Hours		**12**

Other Requirements

Requirement
Other requirements may overlap
If students take both IS 530C and REES 550, credit for one may be applied to the elective requirement.
A research paper primarily on the Balkans is required. Typically this paper is written in a research seminar in a disciplinary department. A master's thesis or doctoral dissertation can be submitted in lieu of the research paper, if it deals primarily with the region. Students are encouraged to present their work in a public forum at the University, such as the REEEC Noontime Scholars lecture series.

Cinema Studies Graduate Minor

for the Graduate Minor in Cinema Studies

The Graduate Minor in Cinema Studies promotes the graduate-level study of cinema and related screen media and their cultural and institutional contexts and offers formal recognition of such work, undertaken alongside and in conjunction with Illinois graduate students' primary fields of study.

Admission

Applicants to the Graduate Minor program must be in residence and in good standing in a qualifying master's or doctoral program at Illinois and must designate Cinema Studies as a field/area of concentration for the master's or the doctoral degree and have that designation formally accepted by the student's home department.

Applications to the department head are accepted on a rolling basis. The Department Head will monitor students' advancement toward completion of the minor.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the Graduate Minor in Cinema Studies

For additional details and requirements refer to the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
MACS 503	Historiography of Cinema	4
MACS 504	Theories of Cinema	4
Two graduate courses in cinema or related media, chosen with the prior approval of the Minor Advisor. (One of the two electives may be satisfied by an independent study course or by an approved graduate-level course taken at another institution.)		6-8
Total Hours		**14-16**

Other Requirements

Requirement	Description
The student's master's examination (if applicable) or preliminary / qualifying examination must include a Cinema Studies topic.	
If the student's master's thesis or doctoral dissertation deals in whole or in part with a Cinema Studies or related screen media topic, a member of the Department of Media and Cinema Studies must be a formal member of the student's committee.

College Teaching Graduate Minor

for the Graduate Minor in College Teaching

The Department of Education Policy, Organization and Leadership (EPOL) offers a Graduate Minor in College Teaching. The minor provides students with the opportunity to explore the scholarly literature on and practice of teaching and learning in postsecondary settings. Students in good standing in the Illinois Graduate College are eligible to apply for the minor. For additional information, please contact EPOL.

Students within the EPOL major cannot minor in the same program.

Graduate Degree Programs

Degree programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

Admission

The Department of Education Policy, Organization and Leadership carefully considers all applicants for graduate study. Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Facilities and Resources

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/epol/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

Corporate Governance and International Business Graduate Minor

for the Graduate Minor in Corporate Governance and International Business

The minor in Corporate Governance and International Business is designed to develop leaders in various business fields who understand international business and corporate governance issues within the global economy. It specifically covers topics such as:

1. how to create value for multinational partners, employees with diverse cultural backgrounds, and shareholders by designing better organizations and corporate governance; and
2. how managerial practices differ in various national/cultural contexts and why manages must be able to understand the strategic, financial, and economic implications of these differences in managing multinational corporations.

The minor will provide not only a strong foundation in the International Business and Governance area but could be tailored to fit the specific career needs of our students.

Admission

Admission to the minor requires an application to the Department and admission to one of the M.S. programs in the Gies College of Business or a graduate program in a related discipline approved by the Department. Admission is limited and acceptance is on a competitive basis.

for the Graduate Minor in Corporate Governance and International Business

This minor requires twelve graduate hours of related coursework.

For additional details and requirements refer to the department's Programs of Study (https://giesbusiness.illinois.edu/business-administration/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Dance Graduate Minor

for the Graduate Minor in Dance

The Graduate Minor in Dance offers physical, creative, and theoretical engagement with contemporary dance and performance. The program of study presents interested graduate students the chance to endow their major graduate degree studies with interdisciplinary ideas and presents an alternate pedagogic window into research through the body. Prospective graduate minor students will be required to have successfully completed one of the required Dance Graduate Minor courses prior to official admission to the program. In addition, they will have to be interviewed by the MFA in Dance Program Director, and they will have to provide a letter of endorsement from their home department advisor that is co-signed by their home department Graduate Program Director.

For additional information, please contact dance@illinois.edu.

Graduate Degree Programs in Dance

- Dance, MFA (p. 1308)
- Graduate Minor in Dance (p. 2142)

The Department of Dance offers a graduate program leading to the Master of Fine Arts degree. The mission of the MFA Program is to foster substantive choreographic research that posits dance as a force in contemporary culture. The program embraces a wide spectrum of individual movement research and embodied practice to create a dynamic learning atmosphere for critical engagement with choreographic process.

The Dance Department expects MFA candidates to conduct a creative inquiry that leads to the development of a sophisticated sense of self-definition. Individual research and analysis should culminate in the development of a personal artistic process and mission and should be evident in the following contexts:

- Choreographing- Candidates will develop a distinctive choreographic research methodology and demonstrate its skillful application in a performative context. This ideology must establish solid foundation for ongoing research and engagement that contributes to the global dialogue about dance and contemporary culture.
- Communicating- Candidates will develop the ability to express their choreographic vision and process in verbal and written language that is clear, cogent, and convincing and demonstrates clear analytic skill, critical thinking, awareness of historical context, and knowledge of contemporary culture.
- Moving- Candidates will demonstrate a commitment to movement investigation and practice that defines, advances, and sustains their choreographic vision.
- Teaching-Candidates will apply their research vision in clear pedagogic principles while fostering a stimulating teaching/ learning environment.
- Career Planning-Candidates are assessed on their ability to develop innovative career strategies in order to advance their artistic mission in the field and demonstrate the capacity to implement these plans with professionalism in all the above contexts.

Admission Requirements

Prerequisites for admission to the MFA program are:

1. An undergraduate degree and significant experience in dance is required.
2. Demonstrated choreographic achievement and potential to make innovative contributions to the field.
3. Demonstrated potential to engage in critical thinking and writing.
4. A minimum grade point average of 3.0 on a 4 point scale, computed from the last 60 hours of undergraduate work and any graduate work completed.

International students must be eligible for full status admission. International students who receive a TOEFL score greater than 103 on the internet-based test, 257 on the computer-based test, or 613 on the paper test are eligible for full status admission. Students with these scores are exempt from the English as a Second Language Placement Test. The GRE is not required.

Faculty Research Interests

An extraordinary faculty of artists, researchers and scholars has gathered at Illinois, who are creating new paradigms for interactions between the professional arena and the academic training ground. Our group of professional artists includes Jan Erkert, Sara Hook, Philip Johnston, Linda Lehovec,

Jennifer Monson, Kemal Nance, Rebecca Nettl-Fiol, Tere O'Connor, Cynthia Oliver, Kirstie Simson, Endalyn Taylor, John Toenjes, and Abby Zbikowski, all of whom share a commitment to teaching and preparing students for leadership roles in the field of dance.

Financial Aid

Two forms of financial aid are offered to graduate students by the Department of Dance:

- Teaching and administration assistantships are available to graduate students. Assistantships of 25% or greater qualify the student for a tuition waiver. All students are required to apply for Federal Work Study.
- A variety of Fellowships are available through The Graduate College each year, including: (A full listing of Fellowships can be found at: www.grad.illinois.edu/fellowships (http://www.grad.illinois.edu/fellowships/))
  - The Creative and Performing Arts Fellowship, which may include stipends up to a maximum of $6,000 for a student demonstrating outstanding choreographic and performance talent.
  - The Graduate College Fellowship for Underrepresented Students provides fellowships in the amount of $8,000 and are available to outstanding minority students.

Prospective MFA candidates are encouraged to apply for financial assistance through the Office of Student Financial Aid, 420 Student Services Bldg., University of Illinois Urbana-Champaign, Champaign, IL 61820. (217) 333-0100.

European Union Studies Graduate Minor

for the Graduate Minor in European Union Studies

The graduate minor in European Union Studies complements PhD programs in many departments and provides an opportunity for students to pursue an area studies program as well as their primary field. Graduate students may also come from professional schools, such as law, business, and education, and departments with professional degree programs, such as urban and regional planning.

Graduate students seeking admission to the graduate minor in European Union Studies program should check with an academic advisor in their major degree-granting school or department to confirm eligibility prior to pursuing an application. Students must submit a graduate minor application, available from the Center, and if approved, a petition to the Graduate College requesting to add the European Union Studies minor.

Graduate Degree Programs in European Union Studies

European Union Studies, MA (p. 1429)

European Union Studies Minor (p. 2144)

Admission

Applicants for admission to the Master of Arts program should have completed at least two years of a language of the European Union and hold a bachelor's degree from an accredited institution of higher education. The Graduate Record Examination (GRE), or another post-secondary examination such as the LSAT, GMAT, MCAT, is required and international students are required to take the Test of English as a Foreign Language (TOEFL), with minimum scores set by the Graduate College. All admission requirements of the Graduate College also apply.

Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, Graduate Record Examination (GRE) scores (verbal quantitative, and written) or other post-secondary examination scores, a writing sample, and three letters of reference." Applicants must also submit to the European Union Center a statement of purpose showing how the M.A. degree in European Union Studies fits into their educational and career plans. This statement must show that the interdisciplinary nature of the MA in EU Studies will serve the student better than a disciplinary degree. Admission is ordinarily limited to the fall semester, but exceptions are made for spring and summer admission.

for the Graduate Minor in European Union Studies

Students in the European Union Studies graduate minor program must earn at least 16 hours of graduate credit in approved courses in at least two departments. Two of the courses must be EURO 501 and EURO 502. The graduate minor requires that students demonstrate the equivalent of two years of college-level study of a language of the European Union other than English, to support development of a technical vocabulary in fields such as business, law, and agriculture. A list of courses fulfilling the minor is available from the Center.

For additional details and requirements refer to the department's graduate degree requirements (http://euc.illinois.edu/academic/graduate.html) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Note: Students within the major can not minor in the same program.

Finance Graduate Minor

for the Graduate Minor in Finance

The graduate minor in Finance is reserved for students admitted to the Master of Accounting Science program. Accountants with expertise in finance are increasingly highly valued by many employers. The graduate minor in Finance is designed to allow students in the MAS program to demonstrate substantive competency in the field of Finance. Counting the prerequisite requirement, the graduate minor is the equivalent of four graduate courses. Admission is limited and acceptance is on a competitive basis.

Admission to the Minor

Admitted MAS students should first consult with the MAS Program Advisor to determine if the minor is appropriate for the student. Information on how to apply will be available through the MAS Program Advisor. Students admitted to the MAS program may also email finance@illinois.edu for more information on the Finance Minor.

Prerequisites for the Minor

Admission to the minor requires the completion of either FIN 221 and FIN 300 or FIN 520 as a prerequisite. All courses must have been taken for a grade.

Advising Notes

The graduate minor can only be completed within the Fall semester of the fifth year of the MAS program. The three required graduate courses are not available in the Spring semester. Students who drop any of the three required courses in Fall will be treated as having dropped the minor.

Students should have already completed FIN 300 before enrolling in the graduate minor. Students may apply while enrolled in FIN 300; however, the application decision may be deferred until successful completion of FIN 300. FIN 300 must be taken on this campus. Students who plan to take the graduate minor SHOULD NOT register for FIN 321, FIN 411, or FIN 412 as undergraduates. Students who have completed any of the following courses are not eligible to pursue the minor: FIN 411, FIN 321, or FIN 412.

Note: Students within the major can not minor in the same program.

Game Studies Graduate Minor

for the Graduate Minor in Game Studies

The Game Studies Graduate Minor serves students whose graduate research or professional interests intersect with the study and design of games, gaming, game design, digital narratives and storytelling, and the digital, VR/XR and AI technologies involved with the crafting of interactive systems and interfaces relevant to the game, film, education, and media industries, and a range of other emerging professions. The minor will foster critical thinking and research on the history, cultural meaning, social impact, ethics, educational uses, theoretical basis, and increasingly significant role of games, gaming, and interactive media in an inclusive and diverse society, as well as advanced methodological, computational, aesthetic, and design aspects of games broadly defined. This versatile minor is intended to offer interdisciplinary support for game-related research being done within students' primary disciplines. Students whose work is unrelated to games will also benefit from this minor, since it offers training in and experience with cutting edge technologies and design processes as well as a critical lens through which to understand these new technologies.

GSD 500	Colloquium in Game Studies & Design	
Students are required to take this course only once for credit. In subsequent semesters students will be encouraged to sit in, as will affiliated Game Studies faculty from across campus. Graduate students enrolled in the Graduate Minor will be expected to return to the seminar at least once, towards the end of their program, to share their work. This transformation in role from student to speaker will serve to provide community, continuity, mentorship, and professional development for Graduate Minor degree students.

Gender & Women's Studies Graduate Minor

for the Graduate Minor in Gender & Women's Studies

Graduate Degree Programs in Gender & Women's Studies

- Gender and Women's Studies Graduate Minor (p. 2151)
- Queer Studies Graduate Minor (p. 2169)

The graduate minor in Gender & Women's Studies offers sophisticated training in feminist theory and methodology to graduate students who want to incorporate gender & women's studies into their degree work. Because gender has become a central category of analysis in many disciplines and fields, the graduate minor strengthens students' formal credentials and offers a versatile area of specialization. Please see the Department of Gender & Women's Studies website (https://gws.illinois.edu/academics/graduate-minors/) for more information.

The graduate minor in Queer Studies offers students the opportunity to gain expertise in queer theory and methodology as part of their graduate degree work. The graduate minor in queer studies offers students a versatile interdisciplinary framework to complement and strengthen their research and pedagogy in their chosen field of study. Please see our website for more information, Department of Gender & Women's Studies website (https://gws.illinois.edu/academics/graduate-minors/).

Admission

Applicants must be in good standing in a graduate or professional program at the University of Illinois Urbana-Champaign. The Department required a formal application, including a personal statement about how the student's graduate work and/or research interests intersect with gender and women's studies. Students must also have signed approval of the graduate director of their program.

for the Graduate Minor in Gender & Women's Studies

For additional details and requirements refer to the department's Graduate Minor (http://www.gws.illinois.edu/student/grad/minor/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Global Studies Graduate Minor

for the Graduate Minor in Global Studies

Graduate Program in Global Studies

The Center for Global Studies, with the assistance of an all-campus Faculty Advisory Committee, administers an interdisciplinary and inter-professional Graduate Minor in Global Studies in cooperation with 25 units across 8 colleges as well as the School of Labor and Employment Relations and the Graduate School of Library and Information Science. The Minor develops awareness and knowledge of globalization and the relevance of this process to student degree programs and career objectives. It is intended to serve three constituencies of students: those seeking to integrate their specialized skills within the broader intellectual and public policy demands of a global society; those proceeding to disciplinary or professionally-based doctoral work; and those for whom the Minor enhances their disciplinary and professional credentials in seeking public or private employment for posts relevant to global studies and policy-making.

for the Graduate Minor in Global Studies

For additional details and requirements refer to the unit's website (https://cgs.illinois.edu/academics/graduate-minor/), and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

Code	Title	Hours
GLBL 500	Global Society	4
or GLBL 501	Perspectives on Global Studies	
Two courses relevant to a student's proposed minor as approved by the Director of the Center for Global Studies. At least of one the courses must be at the 500-level and only one can be from the student's home department.		8
Total Hours		**12**

for the Graduate Minor in Global Studies

Global Studies graduate minors will be able to:

1. Gain a deeper understanding of the processes of globalization.
   a. Draw on the literature to develop an understanding of globalization and the framework of Global Studies.
   b. Think critically about how globalization impacts global order, welfare, and legitimacy.
   c. Identify different perspectives on globalization and transnational social relations and contribute to key debates about global issues.
2. Build on their disciplinary and professional knowledge base, and the conceptual frameworks, analytic tools, and methodologies derived from their particular programs of studies.
   a. Apply the concepts and methods of Global Studies to their academic discipline.
   b. Employ Global Studies concepts in a practical way that broadens their approach to working in their field.
3. Integrate their specialized skills within the broader interdisciplinary, intellectual, and public policy demands of the challenges confronting the world's populations.
   a. Identify Global Studies concepts, problems, and approaches in national and international policy.
   b. Conduct research and writing that is accessible for a broad global studies audience.

Heritage Studies and Preservation Minor

for the Graduate Minor in Heritage Studies and Preservation

The Heritage Studies and Preservation Minor (HSM) is pursued at the graduate level in a student's home department through completion of four courses, two selected from a list of four core courses and two selected from a broad range of electives that may change each year. A minimum of 13 hours is required to complete the Minor.

Admission to the Heritage Studies and Preservation minor is open to all students admitted to a graduate program of an academic department. To enroll, students will submit an intent to enroll form through the Graduate College graduate petition/curriculum change request (https://grad.illinois.edu/academics/curriculum-changes-and-transferring-credit/).

There are no prerequisites for admission to the HSM other than admission to a university graduate program. The HSM does not require prior practical experience in heritage work for admission. However, the HSM will encourage students to obtain such practical experience during their graduate work at the University of Illinois Urbana-Champaign.

Admission

Admission for the Heritage Studies and Preservation Minor (HSM) is contingent upon the approval of the home department. Students are admitted to the graduate program of the particular academic department in which they will pursue their Master's or PhD degree. A student interested in the HSM should clearly indicate this in the application statement to the university and, upon matriculation, should inform the HSM Committee of the intent to pursue the Minor and begin planning how to satisfy the requirements. The HSM Steering Committee reviews student progress in consultation with the student's academic advisor. Students must be admitted to the graduate program of an academic department in order to participate in the HSM. Students already enrolled in one of the University of Illinois Urbana-Champaign graduate programs may also apply for admission to the HSM at any time, but are advised to do so in their first year of study.

Faculty Research Interests

The HSM courses offer broad coverage of different approaches to heritage theory and practice, including interdisciplinary perspectives from Anthropology, Landscape Architecture, Urban and Regional Planning, Architecture, History, Geography, Education, and other fields. Faculty work collaboratively with each other and across the globe, focusing on a range of cultures and time periods from prehistoric to contemporary.

Financial Aid

The Minor itself does not provide financial aid. Financial aid may be requested from the admitting graduate program of the particular academic department.

for the Graduate Minor in Heritage Studies and Preservation

For additional details and requirements refer to the program information online (https://landarch.illinois.edu/graduate-minor-in-heritage-studies/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Heritage Studies and Preservation – Graduate Minor

Code	Title	Hours
Take two from the following list:		
ANTH 420	Case Studies Global Heritage	4
ARCH 419	Historic Building Preservation	3
LA 594	Cultural Heritage	4
RST 570	Cultural Aspects of Tourism	4
UP 420	Plng for Historic Preservation	4
Take two additional course(s) from either list above or other standard offerings listed on the Heritage Studies and Preservation program web page. Other course offerings may be considered as a course substitution with approval from the Chair of the minor.		6
Total Minimum Hours		**13**

for the Graduate Minor in Heritage Studies and Preservation

- **Cultural Awareness and Sustainability:** Acquire deep knowledge of theory and practice of heritage studies and/or historic preservation and its links to sustaining place-based tangible and intangible heritage.
- **Social Awareness:** Develop frameworks that allow navigation of differences in race, gender, indigeneity, sexuality, class, language, and disability.
- **Community Engagement:** Emphasize strategies for working with communities in support of their heritage and preservation goals.
- **Global and Local Action:** Navigate global issues in heritage and preservation through local processes.
- **Research and Creativity:** Link research and investigation to creative problem solving related to issues in heritage and preservation.

Information Technology & Control Graduate Minor

for the Graduate Minor in Information Technology and Control

The minor in Information Technology and Control is designed to develop leaders in various business fields who understand:

1. how to leverage information technology to create value for customers, external partners, and shareholders by designing better information systems to improve business processes and controls; and
2. how managers can assess the strategic, financial, and economic benefits of investing in advanced information systems.

The minor will provide not only a strong foundation in IS/IT area but could be tailored to fit the specific career needs of our students.

Admission

Admission to the minor requires an application to the Department of Business Administration and admission to one of the MS programs in the College of Business or a graduate program in a related discipline approved by the department. Admission is limited and acceptance is on a competitive basis.

for the Graduate Minor in Information Technology and Control

This minor requires submission of twelve graduate hours of information technology coursework on the digital transformation of organizations. Successful completion of the concentration assumes certain knowledge of business and prior coursework. In addition to the concentration requirements, students must also complete the requirements of their major degree.

Course substitutions may be approved by the Department after consultation with the relevant faculty.

Please contact your department for more information regarding the addition of a minor to your program of study.

For additional details and requirements refer to the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Latin American & Caribbean Studies Graduate Minor

for the Graduate Minor in Latin American & Caribbean Studies

Including classroom and online courses in Quechua, the most spoken native language in the American continent.

The graduate minor in Latin American and Caribbean Studies promotes training for Master's and Doctoral students in other disciplines interested in complementing their degree program with an interdisciplinary perspective on Latin America and the Caribbean region. There are no prerequisites for the graduate minor. The Center will provide an online admission form to be submitted to the student's advisor for review. The form will require the student's graduate advisor and program director approval. Applicants must be in good standing in a graduate program at the University of Illinois and should demonstrate an interest in Latin American Studies.

Note: Students within the major cannot minor in the same program.

Graduate Degree Programs in Latin American & Caribbean Studies

Latin American Studies, MA (p. 1595)

Graduate Minor in Latin American & Caribbean Studies (p. 2159)

The Center for Latin American and Caribbean Studies administers a program of language and area courses leading to an interdisciplinary Master of Arts degree. The master's program facilitates studies in the languages, cultures, and affairs of the region for three constituencies of students: those seeking to match area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those for whom the degree would stand on its own. The center also administers graduate specializations in Latin American and Caribbean Studies with various departments. The center is a Title VI National Resource Center. The center houses the Lemann Institute for Brazilian Studies.

Language Instruction

The Center offers 3 levels of Quechua, the most spoken language in the American continent, with approximately 13 million of speakers in 6 countries. The Center also offers Quechua online courses and free access to the publication Correo de Linguistica Andina and free exercises on Quechua. Visit www.clacs.illinois.edu/quechua/ (http://www.clacs.illinois.edu/quechua/).

Other languages in the University that fulfill the M.A. requirements are Spanish and Portuguese, both offered at the School Literatures, Cultures, and Linguistics.

Faculty Research Interests

More than 100 faculty throughout the University are currently affiliated with the Center. The Center's faculty devote all or a portion of their teaching and research to Latin American subjects, from agriculture to politics, culture and linguistics. Their expertise spans every important discipline and sub-region of Latin America and the Caribbean, with particular strength in the Andean countries, the Caribbean, lowland South America, Mexico, and Brazil.

For a complete list of our affiliated faculty and their research and teaching interests check our people page at http://www.clacs.illinois.edu/about/people/faculty.aspx.

Facilities and Resources

Latin American Library Collection (LALC)

The Center assist the Latin American Collection (http://www.library.illinois.edu/lat/) at the University Library in purchasing teaching and research materials to develop a strong collection that supports teaching and research in those programs sponsored and coordinated by the Center as well as interdisciplinary courses with Latin American subject matter offered by other departments.

The LACL collection ranks among the six largest in the country and is the largest collection in the Midwest region in purchasing teaching and research materials to develop a strong collection that supports teaching and research in those programs sponsored and coordinated by the Center as well as interdisciplinary courses with Latin American subject matter offered by other departments. It is located in the third floor of the main UIUC library in room 324 and while the Library itself does not house a circulating collection, our knowledgeable staff is available to help locate relevant materials, answer reference questions, and assist you in developing effective searching strategies.

The Latin American and Caribbean Library collection includes:

- More than 400,000 monograph titles;
- Newspapers and magazines from over 20 Latin American and Caribbean countries;
- A strong collection of journals in the humanities and social sciences, as well as publications of professional associations, government agencies, central banks, and non-governmental organizations;
- Access to HAPI Online (Hispanic American Periodicals Index), the Handbook of Latin American Studies (http://lcweb2.loc.gov/hlas/), and other online databases;
- An extensive collection of videos available at the Media Center in the Undergraduate Library;
- over 32,000 maps of Latin America (housed in the Map and Geography Library);
- comprehensive holdings of Brazilian and Andean materials;
- Extensive holdings by and about Gabriel Garcia Marquez;
- Publications from the Archivo General de la Nacion de Mexico; and
- A comprehensive Latin American music collection.

List-serv

The Center administers a listserv with more than 500 subscribers. Weekly mass messages "CALCS/Lemann Institute this Week" contain information on activities in campus related to Latin America and the Caribbean region (conferences, workshops, movies), new courses and job positions as well as future conferences in other Universities. To subscribe contact: Angelina Cotler (cotler@illinois.edu).

CLACS Brownbags

Every Thursday at Noon in Room 101 International Studies Building (910 S. Fifth Street in Champaign) CLACS presents a lecture offered by a faculty, graduate student or outside faculty on topics relevant to the region. These are open and free brownbag lectures. For complete list of presentations during the semester visit our website on the events section.

Opportunities and Events

The Center keeps update a complete list of jobs, grants, conferences, and fellowships in the U.S. and abroad for graduate students and faculty. Check it at http://www.clacs.illinois.edu/news/opportunities.aspx.

Outreach Program (http://www.clacs.illinois.edu/outreach/default.aspx)

One of the goals of our mission is to increase knowledge and awareness of Latin America and the Caribbean in the educational community and the general public by promoting language and area studies in their broadest sense. Outreach at CLACS is a service-oriented program funded through a Title VI Federal Area Studies grant. It is designed to increase public knowledge about Latin America and the Caribbean and Latin American and Caribbean peoples and cultures. All our services are free!
Services include

- Speakers Bureau composed by graduate students and faculty for presentations in schools on Latin American topics.
- Outreach Library for k-14 teachers and instructors that includes books and DVDs.
- Collaborates with the Illinois International Review, the University of Illinois' new international publication; produces CLACS this Week, a weekly Calendar of Events; and an annual newsletter on Quechua instruction, Correo de Linguistica Andina.
- Publishes several curriculum development workbooks including: Columbus: Beyond the Myth, A Teacher's Workbook on Tropical Rain Forests, and Historia Oral: The Latina/o Experience in the United States.
- Organizes the Latin American Brownbag Colloquium, a weekly series of noon seminars in which faculty, students, and visiting scholars present current research and speak on topics of special interest. Additionally, the Center sponsors many cultural events, such as Latin American music and dance ensembles, and art exhibitions.
- Maintains links to Web based curriculum-related materials on its outreach Web pages as a means of facilitating access to curriculum resources and research materials on Latin America and the Caribbean.

For more information visit http://www.clacs.illinois.edu/outreach/default.aspx.

Links

Links to local museums, units and clubs that offer Latin American and Caribbean services as well as external links to institutions abroad and in the U.S. www.clacs.illinois.edu/resources/ (http://www.clacs.illinois.edu/resources/).

Financial Aid

The Center is a recipient of Federal Government Title VI Foreign Language and Area Studies (FLAS) Fellowships for Graduate Studies in any discipline that includes a specialization in Latin American Studies and an intensive program of language instruction. Academic year language courses and summer fellowships for intensive language courses abroad or in the United States are available. Information on how to apply, requirements and datelines are posted in http://publish.illinois.edu/illinoisflas/.

The Center offers Tinker Summer Fellowship Research Grants for graduate students in any department wishing to do research during the summer in Latin America, the Caribbean and the Iberian Peninsula. Both these programs depend on outside funding and thus cannot be guaranteed in any given year. Information on how to apply, requirements and datelines are posted in http://www.clacs.illinois.edu/academics/fellowships/tinker.aspx.

for the Graduate Minor in Latin American & Caribbean Studies

The graduate minor in Latin American and Caribbean Studies promotes training for Master's and Doctoral students in other disciplines interested in complementing their degree program with an interdisciplinary perspective on Latin America and the Caribbean region. There are no prerequisites for the graduate minor. The Center will provide an online admission form to be submitted to the student's advisor for review. The form will require the student's graduate advisor and program director approval. Applicants must be in good standing in a graduate program at the University of Illinois and should demonstrate an interest in Latin American Studies.

Latina/Latino Studies Graduate Minor

for the Graduate Minor in Latina/Latino Studies

The graduate minor offers a comprehensive program of study in Latina/Latino Studies research, theories and methodologies to graduate students who wish to structurally incorporate Latina/Latino Studies into their degree work. As U.S. Latina/os have become a central category of analysis in theories of ethnicity, race, gender, sexuality, and class in many disciplines and fields, the graduate minor strengthens students' formal credentials and offers a versatile area of specialization. The graduate minor provides students with a theoretical and methodological foundation and a firm background in the history and culture of Latinas and Latinos in the United States from the perspective of the humanities, the social sciences, and other fields. The program will allow students to assess how historical and cultural processes affect U.S. Latina/os in contemporary society. Furthermore, the transdisciplinary and transnational nature of the program will provide students, whether or not they focus their graduate studies on Latina/o Studies, with the breadth of research and approaches taken by scholars in the field.

Admission

Applicants must be in good academic standing in a graduate or professional program at the University of Illinois Urbana-Champaign and demonstrate a proven interest and commitment in Latina/Latino Studies. Interested students must submit an application to the Department of Latina/Latino Studies and receive approval to pursue the minor from their graduate or professional program. Application materials can be obtained at the Latina/Latino Studies Department office and at the Program's website (https://lls.illinois.edu/academics/graduate-minor/).

for the Graduate Minor in Latina/Latino Studies

For additional details and requirements refer to the department's program information (http://www.lls.illinois.edu/education/graduate/)and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Minoritarian Aesthetics Graduate Minor

for the Graduate Minor in Minoritarian Aesthetics

The Minoritarian Aesthetics graduate minor is committed to how aesthetics and politics equally provide a blueprint for transformative world–making possibilities. The minor pays close attention to aesthetic practices across minor voices and experiences by working across media, genre, discipline, and practice-based pedagogy. Working alongside artists, scholars, pedagogues, cultural workers and art building initiatives across form, the minor will follow the traditions of a performance studies analytic to place pressure on conventional constructions of difference.

Minoritarian Aesthetics Graduate Minor

Code	Title	Hours
Select 12 hours from the following:		
FAA 594	Writing the Minor - Minoritarian Aesthetics	4
FAA 596	Experiments in Minoritarian Aesthetics	4
FAA 495	Minoritarian Aesthetics Practicum	4
FAA 490	Minoritarian Aesthetics Independent Study (1 to 4 hours, repeatable for no more than 4 hours towards the minor)	4
Total Hours		**12**

for the Graduate Minor in Minoritarian Aesthetics

1. Students will understand the foundational texts and theories underpinning minoritarian aesthetics.
2. Using these concepts, students will create professional and publishable essays, and presentations based in the field's discourse concerning interactions between aesthetics, performance, politics, and identity.
3. Students will learn to work collaboratively, focusing on communicating and sharing ideas together, both to foster community as well as establish the importance of these skills to professional academia.

Museum Studies

for the Graduate Minor in Museum Studies

The Graduate Minor in Museum Studies is designed for MA and PhD students who wish to complement their degree program with interdisciplinary study of the theory, organization and management of museums and museum collections. The program offers broad coverage of different disciplines' approaches to museum theory, and practice, including interdisciplinary perspectives from Anthropology, Art History, Landscape Architecture, History, Education, and Library and Information Sciences. The program also focuses on the collaborative, international and multicultural nature of museum work in curating, researching and communicating the tangible and intangible evidence of people and their environment. Students acquire the applied theory required to successfully work on, with or in museums. Students may tailor the minor to their career goals by choosing among electives that emphasize different theoretical and technical aspects of museum studies.

Graduate Degree Programs in Anthropology

- Anthropology, MA (p. 1103)
- Anthropology, PhD (p. 1105)
  - optional concentration: Second Language Acquisition and Teacher Education (p. 2051)
- Museum Studies Graduate Minor (p. 2164)

Admission

Students without the equivalent of the department's undergraduate concentration may be admitted to either degree program, but they may be required to make up any deficiencies in their anthropological backgrounds. In addition to the Graduate College admission requirements, students are required to submit Graduate Record Examination (GRE) scores. Students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) (http://www.grad.illinois.edu/admissions/instructions/04c/), with minimum scores set by the Graduate College. Students are admitted for the fall term only.

Students wishing to pursue the minor in Museum Studies must be in good standing in the graduate program of an academic department, and must apply for acceptance into the minor. Admission to the minor is contingent upon approval of the student's home department and the Museum Studies Steering Committee. Students may apply to the minor during the first week of the fall and spring semesters in any academic year, and should contact the Museum Studies Program Coordinator for application instructions or more information.

Degree Requirements

Each subfield (Archaeology, Biological Anthropology, and Sociocultural/Linguistic Anthropology) requires a specific set of courses for graduation. Achieving doctoral candidacy in all three subfields entails passing (a) language (and/or skill) exam(s), (b) passing a set of preliminary examinations, and (c) successfully submitting a predissertation paper, and/or a doctoral proposal, all to be defended in an oral examination. For specific details and requirements for admission to and navigation of the Ph.D. program, please refer to the Illinois Anthropology Graduate Program Handbook (https://anthro.illinois.edu/resources/graduate-handbook/) and the University of Illinois Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, the Anthropology Department recognizes the importance of teaching experience as part of a graduate education. Most Anthropology graduate students will have the opportunity to work as teaching assistants, to learn to design their own classes, and possibly teach their own classes.

Faculty Research Interests and Facilities

Courses and individualized study provide broad coverage of sociocultural, linguistic, archaeological, and physical anthropology. The department provides special emphases in the analyses of state ideologies and cultural transformations; complex societies in transition; kinship and gender relations; politics, economics, and business studies; social movements and youth; border studies, criminalities, violence, and security; religion, race, and ethnicity; democracy, governance, and policing; social classification; performance and embodiment; food and environment; language and culture; discourse and narrative analysis; transnationalism and diasporas; human evolution; agricultural origins and development; landscape histories and heritage; hunter-gatherer adaptations; climate change and sustainability; diet and nutrition; paleoecology and paleobiology; evolutionary genetics; population genetics; peopling of the Americas; ancient DNA; biomechanics of locomotion; exercise and neurobiology; functional morphology; comparative and analytical osteology; forensics; demography; immunology; evolutionary medicine; microbe-host interaction; reproductive ecology; female reproductive physiology; conservation; and nonhuman primate evolution, morphology, behavior, and ecology. The department's research

facilities include laboratories for archaeology, GIS and spatial computing, faunal analysis, casting, stable-isotope analysis, ethnography, ancient DNA, skeletal biology, locomotion and motion analysis, and endocrinology.

Departmental funds and a grant from the National Science Foundation, as well as from area studies centers, are available for graduate students' summer field research. An archaeology field school is held at various locations in Illinois and outside of the US (location varies from year to year). Graduate student programs are enriched by close departmental relationships with the various interdisciplinary units, including area studies centers on campus (African, East Asian and Pacific, European Union, Latin America and Caribbean, Russian and East European; South Asian and Middle Eastern Studies), the ethnic and gender studies units (the American Indian Studies Program and the departments of African-American Studies, Asian American Studies, Gender and Women's Studies, and Latina/Latino Studies), along with the Women and Gender in Global Perspectives Program, Spurlock Museum, the Museum of Natural History, Krannert Art Museum, the Institute for Genomic Biology, and the Program in Ancient Technologies and Archaeological Materials.

Agreements between the university and various governments and institutes facilitate research in many nations. Training is available in various languages (some with funding available), including Arabic, Bengali, Burmese, Chinese, Hausa, Hebrew, Hindi, Indonesian, Japanese, Korean, Portuguese, Quechua, Lingala, Russian, Shona, Swahili, Thai, and Urdu. Students have ready access to the extensive computer facilities of the university and to the department's facilities.

Financial Aid

University fellowships, Graduate College fellowships for under-represented minorities, and teaching and research assistantships provide variable levels of funding for most graduate students who do not hold external awards. Tuition and service fee waivers accompany most fellowships and assistantships. Foreign Language and Area Studies (FLAS) fellowships are available through various area centers. University of Illinois public archaeology programs, including the Illinois State Archaeological Survey and the Public Service Archaeology and Architecture Program, have provided support and research employment for graduate students in the past, as has the U.S. Army Construction Engineering Research Laboratory in Champaign.

for the Graduate Minor in Museum Studies

Music and Sound Studies Graduate Minor

for the Graduate Minor in Music and Sound Studies

The Music and Sound Studies Minor is designed for graduate students interested in expanding their knowledge of music as a scholarly discipline that encompasses the entire sonic landscape. It is intended in particular for students in fields outside of music who intend to engage with music and sound in their research, teaching, and learning. Courses in the minor cannot be taken for credit/no credit.

Prospective students should contact the Musicology Area Chair, who will schedule an interview and/or email exchange with the prospective student to gauge interest level, reasons for applying, and goals. No audition or formal application is required. More information about the minor, including contact information, can be found on the School Of Music's website (https://music.illinois.edu/admissions/non-major-offerings/minors/).

for the Graduate Minor in Music and Sound Studies

The minor requires students to earn 12 credits from the menu below.

Code	Title	Hours
Music and Sound Studies Required Courses		**4**
MUS 511	Foundations and Methods of Musicology I	
or MUS 512	Fdns/Methods of Musicology II	

Code	Title	Hours
Music and Sound Studies Elective Courses		**8**
Two (2) 500-level Musicology courses to be chosen from MUS 513-MUS 524 (course titles listed below)		
Graduate students in this Minor may take these courses with the consent of instructor, as noted in the course descriptions.		
MUS 513	Topics in Opera History	4
MUS 514	Musicology and Pedagogy	4
MUS 515	Topics in Vocal Music	4
MUS 516	Fieldwork and Ethnography	4

MUS 523	Seminar in Musicology	4
MUS 524	Seminar in Works of Select Composer	4
Total Hours		**12**

for the Graduate Minor in Music and Sound Studies

Learning Outcomes

1. To understand the nature and history of the disciplines of musicology, historical and ethnographic, and sound studies in humanistic and/or social scientific contexts.
2. To apply critical thinking and listening to a variety of musical and sonic phenomena.
3. To develop, complete, and present original research in the field.

Queer Studies Graduate Minor

for the Graduate Minor in Queer Studies

Graduate Degree Programs in Gender & Women's Studies

- Gender and Women's Studies Graduate Minor (p. 2151)
- Queer Studies Graduate Minor (p. 2169)

The graduate minor in Gender & Women's Studies offers sophisticated training in feminist theory and methodology to graduate students who want to incorporate gender & women's studies into their degree work. Because gender has become a central category of analysis in many disciplines and fields, the graduate minor strengthens students' formal credentials and offers a versatile area of specialization. Please see our website for more information, https://gws.illinois.edu/academics/graduate-minors.

The graduate minor in Queer Studies offers students the opportunity to gain expertise in queer theory and methodology as part of their graduate degree work. The graduate minor in queer studies offers students a versatile interdisciplinary framework to complement and strengthen their research and pedagogy in their chosen field of study. Please see our website for more information, https://gws.illinois.edu/academics/graduate-minors.

Admission

Applicants must be in good standing in a graduate or professional program at the University of Illinois Urbana-Champaign. The Department required a formal application, including a personal statement about how the student's graduate work and/or research interests intersect with gender and women's studies. Students must also have signed approval of the graduate director of their program.

for the Graduate Minor in Queer Studies

For additional details and requirements refer to the department's Graduate Minor (http://www.gws.illinois.edu/student/grad/queer-studies-minor/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Religion Graduate Minor

for the Graduate Minor in Religion

Graduate Degree Programs in Religion

Religion, MA (p. 1845)

Graduate Minor: Religion (p. 2170)

Admission

The Graduate College admission requirements apply. Applicants need not have an undergraduate major in the study of religion, but they must demonstrate a capacity to undertake advanced study in this area of inquiry. All applications for admission must be supported by three letters of recommendation from persons qualified to comment on the applicant's aptitude for graduate study in religion. Applicants are required to submit a sample of their written work. The Graduate Record Examination (GRE) is required. International applicants whose native language is not English must take the IELTS or the Test of English as a Foreign Language (TOEFL) and have their scores submitted to Institution Code #1836, Dept. #00. A score of at least 600 on the paper-based test (PBT), or 250 on the computer-based test (CBT), or 100 on the internet-based test (iBT) is required for admission to this program.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Facilities and Resources

The extraordinary University Library is the department's main research facility; within it, the History, Philosophy & Newspaper Library, the Rare Book Room, and the International and Area Studies Library all serve faculty and students with expert bibliographers and focused collections. Among other special collections that are likely to be useful to our students are Afro-Americana and Women's Studies; the library is also a major repository for government documents.

Financial Aid

Financial aid is available to many students in the form of fellowships or assistantships. More information is available on the Graduate College web site, http://www.grad.illinois.edu/fellowship/finaid (http://www.grad.illinois.edu/fellowship/finaid/).

for the Graduate Minor in Religion

The graduate minor in Religion is designed for graduate or professional students in other disciplines who desire to complement their degree program with a study of Religion. The Minor will consist of any coherent set of at least 12 graduate hours of courses that is approved by the Director of Graduate Studies in the Department of Religion. It will include at least one graduate seminar in the Department of Religion. The successful completion of a minor is noted on the student's transcript. For admission to the program contact the department.

For additional details and requirements refer to the department's graduate degree requirements and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Russian, East European, & Eurasian Studies Graduate Minor

for the Graduate Minor in Russian, East European, and Eurasian Studies

About the Minor

The Russian, East European, and Eurasian Studies graduate minor is designed for M.A. or Ph.D. students in other disciplines who wish to complement their degree program with interdisciplinary study of Russia, Eastern Europe, and Eurasia. A program of study can be tailored to the needs and interests of the individual student in consultation with Center staff; for admission to the program contact the Center.

Graduate Degree Programs in Russian, East European, and Eurasian Studies

The Russian, East European, and Eurasian Center offers a two-year program of language and area studies courses leading to an interdisciplinary Master of Arts degree. The program is designed to meet the needs of students proceeding to disciplinary-based doctoral work and those planning non-academic professional careers with area expertise. Programs offered by the Center:

Russian, East European, and Eurasian Studies, MA (p. 1848)

Russian, East European, and Eurasian Studies Minor (p. 2172)

Balkan Studies Minor (p. 2135)

Joint Degree in Russian, East European, & Eurasian Studies, MA and Library & Information Science, MS (p. 2228)

Admission

Prospective graduate students should have completed at least two years of Russian or another language of Eastern Europe or Eurasia. Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, Graduate Record Examination (GRE) scores (verbal, quantitative, and written), three letters of reference, and a writing sample. International students must submit Test of English as a Foreign Language (TOEFL) scores. All applicants must meet the requirements of the Graduate College. Admission is ordinarily in the fall semester, but occasional exceptions are made for spring and summer admission.

Faculty Research Interests

The faculty (https://reeec.illinois.edu/people/groups/faculty/) affiliated with the Center represent a broad range of interests and methodological approaches in the social sciences and the humanities, as well as the professional schools.

Facilities and Resources

The Russian, East European, and Eurasian Center was founded in 1959 and designated a National Resource Center by the U.S. Department of Education. It serves as an intellectual and institutional hub for the University community and the public through conferences, lectures, colloquia, visiting scholars, study groups, exhibits, films, and other activities.

The annual Summer Research Laboratory on Russia, Eastern Europe, and Eurasia features special workshops, seminars, lectures, films, and other events, most of which are free and open to the public.

The International and Area Studies Library (https://www.library.illinois.edu/ias/) at the University of Illinois has one of the country's three outstanding Slavic library collections (https://www.library.illinois.edu/ias/spx/). The Slavic Reference Service (https://www.library.illinois.edu/ias/spx/srs/) serves all faculty and students with expert bibliographers.

Language training is provided by the Departments of Germanic Languages & Literatures (https://germanic.illinois.edu/), Linguistics (https://linguistics.illinois.edu/), and Slavic Languages & Literatures (https://slavic.illinois.edu/) in:

- Bulgarian
- Bosnian, Croatian, Serbian
- Czech

- Old Church Slavonic
- Polish
- Russian
- Turkish
- Ukrainian
- Yiddish

Financial Aid

Financial aid is awarded on an academic-year basis. All fellowships and assistantships include a stipend plus tuition and fee waiver. Qualified incoming students who are U.S. citizens or permanent residents should also apply for U.S. Department of Education Title VI Foreign Language and Area Studies (FLAS) fellowships (http://publish.illinois.edu/illinoisflas/) offered through REEEC or other FLAS-granting campus centers.

Qualified students may also be eligible for other fellowships at the campus or departmental level. A limited number of teaching and graduate assistantships, which include a tuition and fee waiver, may also be available to outstanding students through REEEC and other units.The Graduate College maintains a list of available assistantships (https://grad.illinois.edu/clearinghouse/); additional information on need-based financial aid may be obtained from the Graduate College Fellowships Office (https://grad.illinois.edu/fellowships/about/).

for the Graduate Minor in Russian, East European, and Eurasian Studies

For additional details and requirements refer to the department's Graduate Programs (https://reeec.illinois.edu/academics/ma-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
IS 530	Collection Development (Section C: REEES Bibliog Research Methods)	4
or REES 550	Seminar in REEE Studies	
Electives (4 hours at the 500 level) At least 8 graduate hours that relate to Russia, Eastern Europe, or Eurasia chosen from the list of approved courses maintained by REEEC and taken outside the student's enrolling department.		8
Language Requirement: A minimum of two years or equivalent college-level study of a language of the area. For professional work in the region or scholarly research on area topics at least three years of relevant language study are recommended.		
Students must also submit a research paper primarily on the region.		
Total Hours		**12**

Other Requirements

Requirement	Description
Other requirements may overlap	
If students take both IS 530C and REES 550, credit for one may be applied to the elective requirement.	
A research paper primarily on the region. Typically this paper is written in a research seminar in a disciplinary department. A master's thesis or doctoral dissertation can be submitted in lieu of the research paper, if it deals primarily with the region. Students are encouraged to present their work in a public forum at the University, such as the REEEC Noontime Scholars lecture series.

Statistics Graduate Minor

for the Graduate Minor in Statistics

The Graduate Minor in Statistics is designed for doctoral students pursuing degrees in other fields who wish to enhance their statistical knowledge and credentials. Students within the major cannot minor in the same program. The Minor is taken in conjunction with, and is intended to complement the student's work in their primary disciplines. Admission to the minor requires an application to the Department and admission to a PhD program (MS track to PhD cannot apply until they are in the PhD program) in another field at the University of Illinois Urbana-Champaign. Applications for the Minor are submitted upon completion of the required courses. Approval is contingent on having grade point average of 3.0 or better in the Minor. A total of three courses, constituting 12 graduate credit hours, are required for the minor in Statistics degree. At least 8 credit hours must be taken at the 500 level. No course substitutions allowed.

Supply Chain Management Graduate Minor

for the Graduate Minor in Supply Chain Management

This minor is available for these programs:

- Accountancy, MAS (p. 1939)
- Accountancy, MS (p. 1056)
- Business Administration, MBA (Online iMBA) (p. 1208)
- Technology Management, MS (p. 1939)

The minor in Supply Chain Management is designed to develop leaders who understand (1) how to assess the trade-offs and make the decisions necessary to sustain high quality products and services at lower costs while maintaining the flexibility necessary to adapt and to respond to evolving market trends; and (2) how to coordinate and integrate supply chain solutions across various intra -organizational and inter -organizational interfaces in any business or organization. The minor or concentration not only will provide a strong foundation in supply chain management principles and practices, but also can be tailored to fit the specific needs of students interested in careers across a wide variety of industries. This minor or concentration requires submission of twelve graduate hours of Supply Chain Management coursework. Successful completion of the minor or concentration assumes certain knowledge of business and prior coursework.

Admission

Admission to the minor or concentration requires submitting a Curriculum Change Form to the Department and Graduate College and admission to one of the approved programs. Admission is limited, and acceptance is on a competitive basis.

for the Graduate Minor in Supply Chain Management

In addition to the minor requirements, students must also complete the requirements of their major degree.

Please contact your department for more information regarding the addition of a minor to your program of study.

Translation & Interpreting Studies Graduate Minor

for the Graduate Minor in Translation & Interpreting Studies

Students completing the 16-hour Graduate Minor in Translation and Interpreting Studies will have a firm grasp of the theoretical concepts and debates in the Translation and Interpreting field, as well as an exposure to the conventions of the profession and a solid basis for any further desired professional preparation. The Minor allows UIUC graduate students to choose to gain a wider understanding of the general field's practices and theories by taking elective courses in more than one area; or to develop more in-depth expertise by taking both elective courses in the same subfield. In order to enroll in the Graduate Minor, you must have completed at least six college-level semesters of study in a language other than English; or show evidence of equivalent competence.

for the Graduate Minor in Translation & Interpreting Studies

Code	Title	Hours

Overview of Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Graduate Joint Degree Programs

Joint degree programs allow students to pursue two graduate degrees simultaneously, where the total time for the two degrees is decreased. A student who wishes to enter a joint degree program must be admitted separately to each program as a joint degree candidate. Find out more about joint degree programs at the Graduate College (http://www.grad.illinois.edu/gradhandbook/).

These degrees listed can be earned jointly with any one listed below it:

Accountancy

- Accountancy, MS (iMSA) & Business Administration, MBA (iMBA) (p. 2182)

African Studies

- African Studies, MA and Library & Information Science, MS (p. 2185)

Architecture

- Architecture, MARCH & Architectural Studies, MS (p. 2187)
- Architecture, MARCH & Civil Engineering, MS (p. 2188)
- Architecture, MARCH & Computer Science, MCS (p. 2189)
- Architecture, MARCH & Urban Planning, MUP (p. 2190)

Architectural Studies

- Architecture, MARCH & Architectural Studies, MS (p. 2187)

Business Administration

- Business Administration, MBA (iMBA) & Accountancy, MS (iMSA) (p. 2182)

Civil Engineering

- Civil Engineering, MS & Architecture, MARCH (p. 2188)

Community Health

- Community Health, PhD & Public Health, MPH (p. 2219)

Computer Science

- Computer Science, MCS & Architecture, MARCH (p. 2189)
- Computer Science, MCS & Law, JD (p. 2194)

Food Science & Human Nutrition

- Food Science & Human Nutrition, PhD & Public Health, MPH (p. 2195)

History

- History, MA & Library and Information Science, MS (p. 2198)

Human Resources & Industrial Relations

- Human Resources & Industrial Relations, MHRIR & Law, JD (p. 2200)

Journalism

- Journalism, MS & Law, JD (p. 2202)

Kinesiology

- Kinesiology, PhD & Public Health, MPH (p. 2221)

Landscape Architecture

- Landscape Architecture, MLA & Urban Planning, MUP (p. 2203)

Law

- Law, JD & Computer Science, MCS (p. 2194)
- Law, JD & Human Resources & Industrial Relations, MHRIR (p. 2200)
- Law, JD & Journalism, MS (p. 2202)
- Law, JD & Library and Information Science, MS (p. 2208)
- Law, JD & Natural Resources and Environmental Sciences, MS (p. 2210)
- Law, JD & Political Science: Civic Leadership Concentration, MA (p. 2218)
- Law, JD & Political Science, PhD (p. 2217)
- Law, JD & Urban Planning, MUP (p. 2231)

Library and Information Science, MS

- African Studies, MA & Library and Information Science, MS (p. 2185)
- History, MA & Library and Information Science, MS (p. 2198)
- Library and Information Science, MS & Law, JD (p. 2208)
- Library and Information Science, MS & (p. 2228) Russian, East European, and Eurasian Studies, MA (http://catalog.illinois.edu/graduate/graduate-majors/russ-east-euro-studies/ma-rees-ms-lis/)

Medical Scholars Program

- MD & any PhD program offered on campus (http://catalog.illinois.edu/professional-programs/medical-scholars-program/)

Natural Resources & Environmental Sciences

- Natural Resources and Environmental Sciences, MS & Law, JD (p. 2210)

Nutritional Science

- Nutritional Science, PhD & Public Health, MPH (p. 2214)

Political Science

- Law, JD & Political Science, PhD (p. 2217)
- Law, JD & Political Science: Civic Leadership Concentration, MA (p. 2218)

Public Health

- Public Health, MPH & Community Health, PhD (p. 2219)
- Public Health, MPH & Food Science & Human Nutrition, PhD (p. 2195)
- Public Health, MPH & Kinesiology, PhD (p. 2221)
- Public Health, MPH & Nutritional Science, PhD (p. 2214)
- Public Health, MPH (p. 2223) & Social Work, PhD (p. 2223)
- Public Health, MPH & Urban Planning, MUP (p. 2225)

Russian, East European, and Eurasian Studies

- Russian, East European, and Eurasian, MA & Library and Information Science, MS (p. 2228)

Social Work

- Social Work, MSW & Social Work, PhD (p. 2231)
- Social Work, PhD & Public Health, MPH (p. 2223)

Urban Planning

- Urban Planning, MUP & Architecture, MARCH (p. 2190)
- Urban Planning, MUP & Landscape Architecture, MLA (p. 2203)
- Urban Planning, MUP & Law, JD (p. 2231)
- Urban Planning, MUP & Public Health, MPH (p. 2225)
- Urban Planning, MUP & Related majors, MS (p. 2235)

Veterinary Medicine

- Veterinary Medicine, DVM & VMS - Comparative Biosciences, PhD (p. 2237)
- Veterinary Medicine, DVM & VMS - Pathobiology, PhD (p. 2237)

Accountancy, MS (iMSA) and Business Administration, MBA (iMBA)

for the joint degrees of Master of Science in Accountancy and Master of Business Administration in Business Administration (online)

The Joint Degrees in Master of Science in Accountancy and Master of Business Administration in Business Administration can be completed online.

This fully online joint master's degree provides students with a broad, deep knowledge in business and accounting. Students will build and master skills in the following areas: technical accounting, business management, data analytics, finance, leadership, marketing, and strategy. The joint degree delivers a high-quality program that is accessible to a global audience. The highly-engaging delivery format and our world-renowned faculty provide students with a handson,practice-oriented, and team-based learning experience. It caters to learners who need flexibility and convenience in order to balance work with academic life. The residential MBA can be earned jointly with most on-campus master's or PhD programs. The joint iMBA/iMSA program is a new option that will be available for students enrolled in Gies College of Business' online programs.

The degree allows students to minimize time and cost by earning both degrees simultaneously. It also provides students both a well-rounded business education and the accounting knowledge needed to prepare for the Uniform CPA exam. The joint degree requires 92 credit hours divided between iMBA and iMSA courses (60 for iMBA and 32 for iMSA). A minimum GPA of 3.0 must be maintained in order to remain in good standing.

Students who do not meet the requirements for the joint degree can petition to switch to one of the two individual programs, and then they would complete the degree requirements of either the iMSA or the iMBA program. Any credits already earned toward the stand-alone degree can be counted toward degree completion. Any remaining credits can be either counted toward completion of an iMBA or iMSA specialization – a series of related courses – if those credits are aligned with an existing specialization, or transferred to another program or university which accepts transfer credits.

Admission

Students interested in the joint iMBA/iMSA degree program can initially apply to either program. Students entering the joint degree through the iMBA program must first complete the ACCY 500 course at a grade B or higher. They must also have been enrolled in the iMBA program for three consecutive semesters with a minimum cumulative GPA of 3.0 in order to become eligible to petition for the Department of Accountancy's approval to officially become a joint-degree student. A potential joint-degree student entering through the iMSA program must complete 20 semester credits of required accountancy coursework in the iMSA program at a minimum cumulative GPA of 3.0. At that point, they would become eligible to petition for the iMBA program's approval to officially become a joint-degree student.

Minimum GPA:		3.0
Maximum Hours From Outside Gies College of Business:		12

for the joint degrees of Master of Science in Accountancy and Master of Business Administration in Business Administration (online)

iMSA Learning Outcomes:

1. Students should demonstrate competency in financial accounting.
2. Students should demonstrate competency in cost accounting.
3. Students should demonstrate competency in auditing.
4. Students should demonstrate competency in federal income tax.
5. Students should be able to communicate with others regarding technical accounting topics.
6. Students should demonstrate the ability to collaborate as an effective team member in varying roles in a diverse group and in diverse tasks.

iMBA Learning Outcomes:

1. Students employ appropriate analytical models and apply reasoning to evaluate evidence, select among alternatives, and generate creative solutions for real-world business problems.
2. Students are able to work well in teams and to assess the contributions made by themselves and by their peers.
3. Students will apply leadership skills to organize and engage others, to work more effectively together, and to set and achieve organizational goals.
4. Students will apply management tools, techniques, and behaviors to demonstrate effective management skills.
5. Students should be able to demonstrate the ability to listen and to read attentively, and to express ideas with clarity in both oral and written communications, and to communicate effectively in diverse business settings.

Architecture, MARCH & Architectural Studies, MS

for the degrees of Master of Architecture in Architecture and Master of Science in Architectural Studies

---

We offer a joint degree program between the M.Arch (https://arch.illinois.edu/programs-applying/graduate-degrees/master-of-architecture/) (https://arch.illinois.edu/programs-applying/graduate-degrees/master-of-architecture/)and M.S. in Architectural Studies (https://arch.illinois.edu/programs-applying/graduate-degrees/master-of-science/) (https://arch.illinois.edu/programs-applying/graduate-degrees/master-of-science/)with a concentration in Structures. Successful completion of this joint degree program leads to two degrees as well as record of Structures as a concentration on the student's transcript.

Prerequisite subjects include the following: calculus I and II; statics and dynamics; mechanics of materials; one course in structural steel design and one course in reinforced concrete design. Students without these prerequisites may enter the Structures concentration upon completion of their prerequisite courses.

Students interested in participating must be admitted to the School of Architecture's M.Arch. and M.S. degree programs, register their intent to enter the Structures concentration with the School's Graduate Office prior to completing their second semester in their degree program, and complete 27 graduate credit hours of architectural structures courses.

Please email with inquiries. (arch-grad@illinois.edu)

for the degrees of Master of Architecture in Architecture and Master of Science in Architectural Studies

---

Students interested in participating in the joint M.Arch./MS in AS degree program must complete a minimum of 82 credit hours of graduate work.

The total credit hours required for obtaining the two degrees separately is 94 hours. The Graduate College guidelines on joint degree programs allow for sharing of a maximum of 12 hours in a joint degree program. Therefore, the proposed joint degree program requires a total graduate credit hours of 82 credits. Twelve credit hours of Arch-57X (design studios) will be considered as the hours counting toward both degrees. Minimum GPA required is 2.75.

Students with no undergraduate degrees in architecture and participating in the M.Arch. 2+ degree program may petition to enter the joint M.Arch./MS in AS degree program upon completion of their required undergraduate courses.

The MS in AS degree is not a NAAB accredited program. The M.Arch. degree is a professional degree accredited by the National Architectural Accreditation Board (NAAB) and has the STEM designation.

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Architecture, MARCH & Civil Engineering, MS

for the degrees of Master of Science in Civil Engineering and Master of Architecture in Architecture

Civil Engineering, MS and Architecture, MARCH

This joint degree program offers qualified applicants the opportunity to develop competence in a career that combines the disciplines of architecture and civil engineering, focusing either on construction management or on structural engineering. For entry into these programs, applicants must satisfy the admission and performance requirements of each academic unit. Application for admission should be made to the School of Architecture. Admission to the other unit may be sought after the first semester of graduate study in architecture.

for the degrees of Master of Science in Civil Engineering and Master of Architecture in Architecture

Candidates entering the program with a four-year baccalaureate in architectural studies must complete at least 78 (32 in Civil Engineering and 46 in Architecture) hours of graduate work and, if admitted with full status, may complete the program in five semesters. Candidates entering the program with a five-year Bachelor of Architecture degree must complete 64 (32 in Civil Engineering and 32 in Architecture) hours of graduate work and, if admitted with full status, may complete the program in four semesters.

Architecture, MARCH & Urban Planning, MUP

for the degrees of Master of Architecture in Architecture and Master of Urban Planning in Urban Planning

This joint degree program enables students to gain two separate, concurrent degrees: the Master of Architecture (https://arch.illinois.edu/programs-applying/graduate-degrees/master-of-architecture/) and the Master of Urban Planning (https://urban.illinois.edu/programs-applying/master-urban-planning/), offered by the Department of Urban and Regional Planning. Each degree is under the control of its granting unit with its own advisor.

Students can apply initially to both programs at the same time, with one application fee. Alternatively, students may apply to the MUP once they have enrolled in the M. Arch program. While a graduate candidate must meet the requirements for each degree, application and admission to both units need not be simultaneous.

MASTER OF URBAN PLANNING

To be consistent with our accreditation requirements, we are using the Knowledge, Skills, and Values identified by the Planning Accreditation Board (PAB) as desired outcomes for planning education.

1. A.1. General planning knowledge:
   a. Purpose and Meaning of Planning:
   b. Planning Theory:
   c. Planning Law:
   d. Human Settlements and History of Planning:

   e. The Future:
   f. Global Dimensions of Planning:
2. A.2. Planning skills:
   a. Research, Written, Oral and Graphic Communication:
   b. Quantitative and Qualitative Methods:
   c. Plan Creation and Implementation: is able to use Planning Process Methods:
   d. Leadership:
3. A.3. Values and ethics
   a. Professional Ethics and Responsibility:
   b. Governance and Participation:
   c. Sustainability and Environmental Quality:
   d. Growth and Development: Social Justice:

MASTER OF ARCHITECTURE

1. Apply Specialized Knowledge
   a. Engage in the practice of architecture in its many forms.
   b. Employ design processes to understand, conceive, and create the many facets of built environments.
   c. Utilize the interplay of form and space to create compelling experiences in the built environment.
   d. Address environmental, social, political, cultural, and economic challenges through the application of design inquiry.
   e. Apply advanced documentation, research, analysis, and design techniques to create innovative design solutions to pressing global challenges.
2. Apply Broad and Integrative Knowledge
   a. Solve complex problems through the use of advanced design techniques.
   b. Communicate complex ideas and concepts through a mastery of graphic, verbal, physical, and digital means.
   c. Integrate community voices, cultural perspectives, and participatory practices into design solutions.
   d. Employ an understanding of the complex intersections between design and environmental, social, economic, political, and cultural phenomena in historical and contemporary contexts.
   e. Use scholarly inquiry to answer questions in support of design solutions.
3. Utilize Differentiated Modes of Thinking
   a. Understand, differentiate, and apply analytical, critical, and conceptual thinking to the design challenges of the twenty-first century.
   b. Evaluate and apply theories of the built environment to understand their impacts on global ecology, human experience, and wellbeing.
   c. Research and critically analyze historic and contemporary humanistic conditions related to the built environment in local, regional, and global geographies.
4. Collaborate Successfully
   a. Foster teamwork and consensus decision-making.
   b. Lead and steer complex processes to completion.
   c. Value and integrate interdisciplinarity as well as diverse disciplinary approaches in the realm of design,
5. Contributing to Community, Civic, and Global Equity
   a. Demonstrate the ability to make empathic and ethical decisions throughout the design process.
   b. Work toward a more inclusive profession that welcomes practitioners of all genders, abilities, races, ethnicities, and ages.
   c. Foreground social, environmental, and economic justice in the design of the environment to contribute to greater equity, diversity, and inclusion.

Computer Science, MCS & Law, JD

for the degrees of Master of Computer Science in Computer Science, and the Doctor of the Science of Law in Law

for the degrees of Master of Computer Science in Computer Science, and the Doctor of the Science of Law in Law

Specific graduate hours of credit for each degree are required: 32 hours for the MCS in Computer Science (p. 1270) and 90 hours for the JD in Law (http://catalog.illinois.edu/graduate/graduate-majors/law/). However, some credits used in each program may apply to the other, allowing students to earn both degrees in a shorter time. For the MCS degree

1. at least 12 credit hours must be law course work relating to legal protections for intellectual property or in related business law fields and
2. at least 6 credit hours must be from approved law courses as determined by the College of Law.

For the JD degree, 12 credit hours may be computer science or other scientific course work leading to the MCS degree.

Admissions

Computer Science Admissions & Requirements (https://cs.illinois.edu/admissions/graduate/)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)
College of Law Overview of Admissions & Requirements (https://law.illinois.edu/admissions/jd-admissions/)

Food Science & Human Nutrition, PhD and Public Health, MPH

for the joint program Doctor of Philosophy in Food Science & Human Nutrition and Master of Public Health in Public Health

The M.P.H. can be earned jointly with the Ph.D. in Food Science & Human Nutrition. In the joint program, up to 12 hours of coursework may be applied to both degrees, and the degrees are conferred simultaneously at the completion of the program.

Research Areas

In addition to receiving training in the general field of food science or human nutrition, students have the opportunity to conduct research in the following areas of specialization:

- Food processing, engineering, and biotechnology
- Food ingredients, properties, and interactions
- Food microstructures, micro-carriers, and nanotechnology
- Food chemistry
- Food microbiology and biomass conversion
- Food safety and security
- Sensory sciences
- Dietary quality and food and nutrition patterns for optimal health
- Nutrition and disease interactions, including cancer, metabolic disorders, and gastrointestinal health
- Nutrition across the life span
- Biochemical and molecular nutrition
- Clinical nutrition
- Community nutrition

Admission

In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose.

You can review all Food Science and Human Nutrition Admission requirements (https://fshn.illinois.edu/future-students/admissions/graduate-admissions/) online.

International Applicants

Please visit the Illinois Graduate College resources for further admission requirements.

Admission requirements by country (https://grad.illinois.edu/admissions/countries/)

Applicants whose native language is not English (https://grad.illinois.edu/admissions/instructions/04c/)

The Food Science and Human Nutrition PHD are STEM-designated program.

Internship in Dietetics

The Department of Food Science and Human Nutrition offers a dietetic internship for master's and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program, please contact Ms. Jessica Madson (jamadson@illinois.edu).

Graduate Teaching Experience

Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid

Financial aid for thesis track graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application.

for the joint program Doctor of Philosophy in Food Science & Human Nutrition and Master of Public Health in Public Health

The M.P.H. can be earned jointly with the Ph.D. in Food Science & Human Nutrition. In the joint program, up to 12 hours of coursework may be applied to both degrees, and the degrees are conferred simultaneously at the completion of the program.

For additional details and requirements refer to the department's graduate handbook (https://fshn.illinois.edu/academics/graduate-degrees/graduate-student-resources/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

History, MA and Library & Information Science, MS

for the degrees of Master of Arts in History and Master of Science in Library & Information Science

This joint interdisciplinary master's degree program includes a program of courses leading to a Master of Arts degree in History as well as a Master of Science in Library and Information Science. The joint degree program matches expertise in historical research and writing with professional education, and prepares students for professional careers in archives, libraries, museums, historical societies, corporations, and government agencies.

The joint degree program requires 56 credit hours divided between History and iSchool courses.

for the degrees of Master of Arts in History and Master of Science in Library & Information Science

This joint interdisciplinary master's degree program includes a program of courses leading to a Master of Arts degree in History as well as a Master of Science in Library and Information Science. The joint degree program matches expertise in historical research and writing with professional education, and prepares students for professional careers in archives, libraries, museums, historical societies, corporations, and government agencies.

The joint degree program requires 56 credit hours divided between History and iSchool courses.

Code	Title	Hours
IS 505	Information Organization and Access	4
IS 510	Libraries, Information and Society	4
Elective IS courses, selected in consultation with an advisor who is a member of the iSchool faculty. Electives may include:		20-22
IS 591	Advanced Topics in Information Services (2 hours, satisfactory/unsatisfactory)	
IS 592	Advanced Topics In Information Organizations (up to 4 hours)	
HIST 593	Approaches to History	4
HIST 594	Intro Historical Writing	4
HIST coursework in one of the graduate fields of specialization offered by the department or a constructed field approved by the department, 4 of which must be at the 500-level and 4 of which must be taken as a research seminar.		8
Electives selected in consultation with an advisor who is a member of the History Department. These may include up to 8 hours for thesis research (HIST 599).		12
Total Hours:		**56**

Other Requirements

Requirement	Description
Language Requirement: Students must demonstrate competency in one foreign language appropriate to the main field of study. Credit hours from language courses do not count towards the degree.	
Students must be enrolled in each program for at least one semester, and must be in residence for at least two semesters	
Minimum GPA:	3.25

for the degrees of Master of Arts in History and Master of Science in Library & Information Science

1. Field expertise: Broad, deep, and critical knowledge of key areas of chosen study, in both selected chronological-geographic fields and comparative thematic fields.
2. Methodological knowledge: Understanding and mastery of disciplinary and interdisciplinary methods and concepts.
3. Research, writing, and dissemination: Experience and accomplishment in scholarly research based on primary sources, analytical writing, and presenting this work in print and oral presentation.
4. Professional development: Preparation for the diverse career expectations and possibilities at the intersection of history and librarianship/ information science.

Human Resources & Industrial Relations, MHRIR and Law, JD

for the degrees of Master of Human Resources & Industrial Relations in Human Resources & Industrial Relations and Juris Doctor in Law

This joint degree program with the College of Law is usually completed in three-and-one-half years. Students must apply to both the College of Law and the School of Labor and Employment Relations, and must be accepted by both units. The degrees are awarded simultaneously upon successful completion of all joint degree requirements. Students must spend five semesters in law and two semesters in LER.

Other Requirements for Joint MLA and MUP degrees

Requirement	Description
Other requirements may overlap	
Enrollment in each program at least 2 semesters	
Minimum 400-500 level hours within LA	24
Minimum 500-level hours required overall for MLA	18
Minimum hours within UP	40
Minimum 500-level hours required overall for MUP	16 (12 in UP)
Up to 8 hours of UP coursework will be applied to the LA degree.	
The MUP capstone requirement may be waived for a thesis completed in Landscape Architecture provided faculty from both programs participate on the thesis committee.	
If pursuing the MLA thesis option, the thesis committee chair must be full-time in Landscape Architecture and one committee member must be from Urban Planning.	
Minimum GPA	3.0

Code	Title	Hours
Total Minimum Hours		**80**

Landscape Architecture will count up to 8 hours of Urban Planning courses as electives in meeting its 48 credit hours of degree requirements as long as the student is required to take no fewer than 40 additional hours in Landscape Architecture. The two programs must total a minimum of the sum of 40 Urban Planning hours plus 40 hours for the Master of Landscape Architecture.

for the degrees of Master of Landscape Architecture in Landscape Architecture and the Master of Urban Planning in Urban Planning.

MASTER OF URBAN PLANNING

To be consistent with our accreditation requirements, we are using the Knowledge, Skills, and Values identified by the Planning Accreditation Board (PAB) as desired outcomes for planning education.

A.1. General planning knowledge:

1. Purpose and Meaning of Planning:
2. Planning Theory:
3. Planning Law:
4. Human Settlements and History of Planning:
5. The Future:
6. Global Dimensions of Planning

A.2. Planning skills:

1. Research Written, Oral and Graphic Communication:
2. Quantitative and Qualitative Methods:
3. Plan Creation and Implementation: is able to use Planning Process Methods:
4. Leadership

A.3. Values and ethics

1. Professional Ethics and Responsibility:
2. Governance and Participation:
3. Sustainability and Environmental Quality:
4. Growth and Development: Social Justice

MASTER OF LANDSCAPE ARCHITECTURE

This can be substituted with the learning outcomes of the LAAB Accreditation.

Master of Landscape Architecture students will have:

1. Knowledge and skills in process, principles, and theories of design in landscape architecture
2. Knowledge of histories and theories of the art and science of landscape architecture
3. Knowledge of plants, ecosystems, and climate science
4. Knowledge of resilience and landscape performance
5. Knowledge of the legal context of the landscape architecture profession
6. Knowledge of professional practice
7. Skills in the application of assessment and analysis of site context and suitability of program, data, and other criteria in site design and planning
8. Skills in developing design concepts, material detailing, and construction, including accessibility
9. Skills in design communication with diverse audiences, including verbal, visual, and written forms
10. Knowledge of construction materials and methods, including the use of specifications, construction techniques, material selections, and preparation of relevant documents
11. Knowledge and skills of landform, engineering, and green infrastructure to facilitate ecological design, safety, and accessibility
12. Knowledge of landscape performance, including the quantifiable assessment of benefits of landscape design
13. Skills in collaboration, including interdisciplinary teams, and application of knowledge from different disciplines into design
14. Knowledge and skills in research theories and methods, research ethics, and the understanding of research as it affects the current and future practice of the profession

Law, JD and Library and Information Science, MS

for the degree of Master of Science in Library & Information Science (on campus & online) and the Juris Doctor in Law (on campus)

The J.D./M.S.L.I.S. program allows students who are interested in a career in law librarianship to simultaneously pursue a Juris Doctor degree and a Master of Science in Library Information Science degree. Others interested in the practice of law specializing in information policy or intellectual property law may find this program to be of use.
The program requires:
1. Ninety hours of Law course work, up to 12 hours of which may be fulfilled by course work taken in the School of Information Sciences or otherwise pursuant to a course of study leading to the M.S. degree.
2. Forty hours of Library and Information Science course work, up to 12 hours of which may be fulfilled by course work taken in Law relating to legal research, copyright or related intellectual property law fields, or information and idea dissemination and related fields in the law.

The minimum number of credit hours for the joint degree is 118. The core requirements and total number of hours to obtain a degree in each existing program remain unchanged. The essence of this proposal is the cross-counting of relevant courses in each program toward the total number of hours or units required in the other. The program is structured to allow students to earn both degrees in less time than is required to earn each degree separately. Students interested in either of these programs must apply to both schools separately.

for the degree of Master of Science in Library & Information Science (on campus & online) and the Juris Doctor in Law (on campus)

The MSLIS degree program can be completed with or without a thesis, either on campus or online; the Law, JD is an on campus program.

Thesis Option

Code	Title	Hours
IS 505	Information Organization and Access	4
IS 510	Libraries, Information and Society	4
Research/Project/Independent Study Hours (4 max applied toward degree)		4
IS 599	Thesis Research	8
Total Hours MSLIS		**28-40**
Total Hours Law		**78-90**

Non-Thesis Option

Code	Title	Hours
IS 505	Information Organization and Access	4
IS 510	Libraries, Information and Society	4
Research/Project/Independent Study Hours (4 max applied toward degree)		4
Total Hours MSLIS		**28-40**
Total Hours Law		**78-90**

Other Requirements for both Thesis and Non-Thesis

Requirement	Description

Natural Resources & Environmental Sciences, MS and Law, JD

for the degrees of Master of Science in Natural Resources & Environmental Sciences and Juris Doctor in Law

Prospective students interested in specializing in environmental or natural resource law are invited to explore our joint degree program. This unique program is offered through a collaboration between the College of Law and the Department of Natural Resources and Environmental Sciences. Many law schools have responded to public concern about the environment by offering more courses in natural resources and environmental law. The University of Illinois Urbana-Champaign goes one step further, however, allowing students to supplement a law program with training in a related scientific field.

The Department of Natural Resources and Environmental Sciences is a broad and diverse department offering flexible M.S. and Ph.D. degrees. The mission of the department is to establish and implement research and educational programs that enhance environmental stewardship in the management and use of natural, agricultural, and urban systems in a socially responsible manner. The department is composed of approximately 24 faculty, 60 affiliates, and 160 graduate students. Offering education and research in a variety of disciplines, the department provides a systems-level perspective that few other departments can offer. Further illustrating the breadth of natural resources and environmental sciences, research areas include but are not limited to:

- agronomy/agroecology
- aquatic chemistry
- conservation ecology
- ecosystem science
- environmental education
- fish and wildlife ecology and management
- forest ecology
- humans dimensions of the environment
- landscape ecology
- microbial ecology
- natural resource economics
- natural resource policy
- plant ecology
- physiology and genetics
- restoration ecology
- quantitative and spatial analysis
- soil science and conservation
- sustainability

Admission

Applicants wishing to pursue the joint J.D./M.S. Program must apply to both the Illinois College of Law and the NRES graduate program for the same semester. NRES graduate advisers are seeking students with strong letters of reference, evident motivation to undertake graduate study, relevant experience, and good preparation in prerequisite courses. Graduate applicants must have an undergraduate grade point average (GPA) of 3.0 (A = 4.0) calculated on the last 2 years of undergraduate coursework to be admitted with full status. Ph.D. applicants must have earned an M.S. (or expect to be awarded the degree before beginning the NRES program) with a grade point average of at least 3.5. Applicants should have adequate preparation in the fundamental sciences and courses appropriate to their proposed field of study (applicants should talk with prospective advisers about the background they expect). Those without the necessary prerequisites may be accepted conditionally, and the undergraduate courses must be completed before the degree will be awarded. Students whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official scores are required to be submitted directly from TOEFL/ETS or IELTS to the university. Minimum English test scores and other information for international applicants can be found online (https://grad.illinois.edu/admissions/instructions/04c/). Applicants who are not U.S. citizens must also submit evidence that they have sufficient financial support for their program of study. Prospective graduate students are urged to apply for admission to the degree program as early as possible, preferably six to ten months before the beginning of the semester in which they expect to enroll. Prospective students must review important application information (https://nres.illinois.edu/apply/). Applicants to the campus programs wishing to be considered for a university-level fellowship must apply for admission to the fall semester by December 15th, and, to be considered for any college or departmental funding, the application deadline is January 1st.

Graduate Teaching Experience

Although teaching is not a Graduate College requirement, experience in teaching is considered an important part of this graduate program, particularly for Ph.D. students.

Faculty Research Interests

Graduate degree programs in NRES are informed by the major areas of faculty research, which include:

- agronomy/agroecology
- conservation ecology
- ecosystem science
- fish and wildlife ecology and management
- forest ecology
- global environmental change
- human dimensions of natural resources and ecology
- landscape ecology
- microbial ecosystems
- natural resource policy
- plant ecology
- physiology and genetics
- quantitative and spatial methods
- restoration ecology
- soil science and conservation
- sustainability
- water/biogeochemistry
- wetland ecology

Financial Aid

Several sources of financial aid are available within the department for the semesters in which the joint degree student has NRES as the primary curriculum:

- research assistantships, supported by federal and grant funds made available to the natural resources and environmental sciences faculty
- teaching assistantships
- departmental fellowships
- university fellowships
- College of Agricultural, Consumer and Environmental Sciences Jonathan Baldwin Turner Fellowships
- waivers of tuition and fees

Most NRES graduate students with financial support have a research assistantship provided by the adviser. Appointments as research and teaching assistants and fellows provide a stipend and waive tuition and some fees.

Financial aid is granted on a competitive basis. Applicants are judged for academic potential based on past performance, experience, motivation, dedication to the designated area of interest and, where applicable, the potential to satisfy the objectives of a donor. Fellowships have minimum GPA and GRE score requirements. Information about the current availability of financial aid can be obtained from the graduate coordinator or, in the case of research assistantships, directly from faculty members working in the area of interest.

Admissions

Department of Natural Resources & Environmental Sciences Overview of Admissions & Requirements (https://nres.illinois.edu/graduate/apply/)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Nutritional Science, PhD and Public Health, MPH

for the Master of Public Health in Public Health and the Doctor of Philosophy in Nutritional Science

The M.P.H. can be earned jointly with the Ph.D. in Nutritional Science. In the joint program up to 12 hours of coursework may be applied to both degrees, and the degrees are conferred simultaneously at the completion of the program.

The Division of Nutritional Sciences is the interdisciplinary program for graduate education in nutrition at the University of Illinois Urbana-Champaign. More than 60 faculty, representing 15 different departments in seven colleges on the Urbana and Chicago campuses, are members of the Division. The Division is a comprehensive program of study leading to the M.S. and Ph.D. degrees, alone or in combination with either the M.D. or M.P.H. degrees or the registration in dietetics (R.D.). Flexible graduate programs of study enable students to individualize their coursework and professional training. In addition, extensive research opportunities are available that address the spectrum from research at the level of the genome and proteome to clinical and population-based intervention studies. Specialties are classified into six broad theme areas in which our faculty and students are most active (see Research Interests (http://nutrsci.illinois.edu/research/)). These themes best reflect the areas of nutrition research for which the Division is recognized both nationally and internationally.

Admission

Applicants are expected to have an admission grade point average of 3.0 (A = 4.0) for the last two years of coursework and basic courses in chemistry, biology and mathematics. Deficiencies in these subjects must be removed during the first year of graduate study. The Graduate Record Examination (GRE) is required. Applicants whose native language is not English must achieve a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 550, 213 on the computer-based test or 79 on the iBT TOEFL. Admission in the fall, spring or summer will be considered.

Internship in Dietetics

Students in the Division of Nutritional Sciences can participate in an Academy of Nutrition and Dietetics (AND) accredited graduate dietetic internship program administered through the Department of Food Science and Human Nutrition. The program includes defined graduate course requirements and a six-month dietetic clinical internship. In order to be eligible for the graduate internship program, students must complete all undergraduate course competencies required by the AND for the Registration in Dietetics (R.D.). Students are accepted into the internship by computer matching through the standard dietetic internship application process. More information on the graduate dietetic internship program can be obtained on our website (https://fshn.illinois.edu/academics/graduate-degrees/dietetics-internship/) or from the Department of Food Science and Human Nutrition (260 Bevier Hall; (217)-244-4498).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

The Division is composed of faculty whose research interests cover many disciplines within nutrition. Descriptions of faculty research interests and a listing of recent publications are available at the Division website. Six broad theme areas are:

- Animal Nutrition
- Biochemical and Molecular Nutrition
- Community Nutrition, Nutrition Education and Consumer Acceptance
- Dietary Bioactive Components
- Food Safety and Toxicology
- Human and Clinical Nutrition

Facilities and Resources

The Division (http://www.nutrsci.illinois.edu/) office is located in room 240 Edward R. Madigan Laboratory. Office and research laboratory facilities utilized by graduate students in Nutritional Sciences are administered by the home department of the student's adviser.

Financial Aid

Financial assistance is available in the form of assistantships, scholarships and fellowships. Applicants seeking fall admission and expecting to be considered for financial assistance should file their applications before the preceding December 15th. Later applications may be considered, depending on the space and support available.

for the Master of Public Health in Public Health and the Doctor of Philosophy in Nutritional Science

The M.P.H. can be earned jointly with the Ph.D. in Nutritional Science. In the joint program up to 12 hours of coursework may be applied to both degrees, and the degrees are conferred simultaneously at the completion of the program.

For additional details and requirements refer to the department's Graduate Programs information (http://nutrsci.illinois.edu/about_us/program_description/degree_types/) and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

Political Science, PhD & Law, JD

for the joint degrees in Juris Doctor of Law and Doctor of Philosophy in Political Science

A joint J.D. and Ph.D. in International Relations is an option for students. Students must be admitted separately to each program as a joint degree candidate. To receive the joint J.D./Ph.D. in International Relations, students must satisfy all existing requirements for the Ph.D. in Political Science, including major and minor field course requirements, scope and methods sequence, tools, qualifying examinations, dissertation design seminar, and dissertation project. Joint degree students would be allowed to count 16 hours of law credit toward their Ph.D. Joint degree students would elect International Relations as their major area, and up to 8 hours of law school course credit would count toward this area. In addition, joint degree students will be permitted to select "Law" as their minor field, using 8 hours of law credit to satisfy minimum course requirements, provided such credit is from course outside the international law subfield (e.g., American constitutional law); this presents a new option for international relations students who otherwise would have to select American politics, comparative politics, or political theory as a minor field. This program allows an exception to the simultaneous conferral rule in that the J.D. may be conferred prior to completion of the Ph.D. degree.

Political Science: Civic Leadership, MA & Law, JD

for the joint degree of Juris Doctor in Law and the Master of Arts in Political Science, Civic Leadership Concentration

The M.A./J.D. joint degree program is a track in the Civic Leadership Program that provides qualified students with the opportunity to complete both degrees in just three years of post-baccalaureate study. Illinois students who have been named Civic Leadership Fellows in the fall of their junior year of undergraduate study, and who have taken the LSAT by the time they are selected as a fellow, are eligible for early admission into the College of Law. Students must fulfill the requirements for the M.A. in Political Science with a concentration in Civic Leadership as detailed above. The College of Law will recognize up to 12 hours of credit taken in fulfillment of the Civic Leadership Program M.A. requirements. In addition, a minimum of 78 hours of Law courses will be required to meet the 90 hours required for the J.D. degree. For information contact the Director, Civic Leadership Program, Department of Political Science.

Public Health, MPH & Urban Planning, MUP

for the degrees of Master of Public Health in Public Health and Master of Urban Planning in Urban Planning

In the joint program, up to 12 hours of coursework may be applied to both degrees, and the degrees are conferred simultaneously at the completion of the program.

Electives from PhD departmental list may be met by MPH core courses. Additionally, the fourth MPH concentration course and elective course may be met by PhD core courses.

Students enrolled in the joint degree program must meet with academic advisors from both the programs to determine the exact plan of study throughout the joint degree program.

Candidates may propose joint programs combining the M.U.P. with other Illinois master's degrees (for example, but not limited to, African Studies, Agriculture and Applied Economics, Civil and Environmental Engineering, Public Health (p. 1831), Economics, Landscape Architecture, Latin American Studies, Library and Information Sciences, Natural Resources and Environmental Sciences, and Recreation, Sports and Tourism). For joint programs, at least 40 hours must be in Urban Planning, including all core courses and capstone requirements. The two programs must total a minimum of (a) 80 hours, or (b) the sum of 40 Urban Planning hours plus the required number of hours for the second degree, whichever is greater. (In the latter case, the other program may at its discretion count up to 8 hours of Urban Planning courses as electives in meeting its degree requirements as long as students are required to take no fewer than 40 additional hours in that program.) The MUP capstone requirement may be waived for a thesis completed in another program provided faculty from both programs participate on the thesis committee. Students must be in residence in Urban Planning for at least two semesters.

Consult the department's M.U.P. website (https://urban.illinois.edu/) for more information about the admissions process (https://urban.illinois.edu/programs-applying/master-urban-planning/how-to-apply-mup/) and joint degree requirements. (https://web.faa.illinois.edu/app/uploads/sites/2/2021/11/MUP-Program-Handbook-2021-2022-1.pdf) joint degree requirements. For additional guidance, please contact the Director of the M.U.P. Program.

for the degrees of Master of Public Health in Public Health and Master of Urban Planning in Urban Planning

For additional details and requirements refer to the Department of Urban and Regional Planning website (https://urban.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

For joint programs, at least 40 hours must be in Urban Planning, including all core courses and capstone requirements. The two programs must total a minimum of the sum of 40 Urban Planning hours plus 48 hours for the Master of Public Health. The Master of Public Health may at its discretion count up to 8 hours of Urban Planning courses as electives in meeting its degree requirements as long as students are required to take no fewer than 40 additional hours in that program. The MUP capstone requirement may be waived for a thesis completed in another program provided faculty from both programs participate on the thesis committee. Students must be in residence in Urban Planning for at least two semesters.

for the degree of Master of Public Health in Public Health

The MPH degree program requires a minimum of 48 hours. The program includes:

1. six required core courses in basic content areas of public health
2. three required courses in the Health Behavior and Promotion concentration, as well as one additional concentration course from an approved list
3. an applied practice experience
4. an integrative learning experience
5. seminars and electives

MPH students must complete all core coursework before enrolling in the MPH applied practice experience. It is highly preferable for the applied practice experience to occur during summer term. The integrative learning experience must be completed in the last term of study. There is no thesis requirement. A pre-requisite for applying to the MPH program is a college level course in mathematics, statistics, biostatistics, or epidemiology. Applications for the Master of Public Health (MPH) are only accepted for Fall admission, and are accepted until **April 1**. The program generally takes 1.5 to 2 years to complete.

College of Fine & Applied Arts

Fine & Applied Arts (https://faa.illinois.edu)

Russian, East European, & Eurasian Studies, MA and Library & Information Science, MS

for the degrees of Master of Arts in Russian, East European, and Eurasian Studies & Master of Science in Library and Information Science

About the Joint Degree

This joint master's degree includes a program of language and area studies courses leading to an interdisciplinary Master of Arts degree in Russian, East European, and Eurasian Studies, as well as a program of study leading to the Master of Science in Library and Information Science. The joint degree matches area expertise with professional education, and prepares students for professional careers in all types of information organizations, including libraries.

Admission

Prospective graduate students should have completed at least two years of Russian or another language of Eastern Europe or Eurasia. Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, Graduate Record Examination (GRE) scores (verbal, quantitative, and written), three letters of reference, and a writing sample. International students must submit Test of English as a Foreign Language (TOEFL) scores. All applicants must meet the requirements of the Graduate College. Admission is ordinarily in the fall semester, but occasional exceptions are made for spring and summer admission.

Faculty Research Interests

The faculty (https://reeec.illinois.edu/directory/faculty/) affiliated with the Center represent a broad range of interests and methodological approaches in the social sciences and the humanities, as well as the professional schools.

Facilities and Resources

The Russian, East European, and Eurasian Center was founded in 1959 and designated a National Resource Center by the U.S. Department of Education. It serves as an intellectual and institutional hub for the University community and the public through conferences, lectures, colloquia, visiting scholars, study groups, exhibits, films, and other activities.

The annual Summer Research Laboratory on Russia, Eastern Europe, and Eurasia features special workshops, seminars, lectures, films, and other events, most of which are free and open to the public.

The International and Area Studies Library (https://www.library.illinois.edu/ias/) at the University of Illinois has one of the country's three outstanding Slavic library collections (https://www.library.illinois.edu/ias/spx/). The Slavic Reference Service (https://www.library.illinois.edu/ias/spx/srs/) serves all faculty and students with expert bibliographers.

Language training is provided by the Departments of Germanic Languages & Literatures (https://germanic.illinois.edu/), Linguistics (https://linguistics.illinois.edu/), and Slavic Languages & Literatures (https://slavic.illinois.edu/) in:

- Bulgarian
- Bosnian, Croatian, Serbian
- Czech
- Old Church Slavonic
- Polish
- Russian
- Turkish
- Ukrainian
- Yiddish

Financial Aid

Financial aid is awarded on an academic-year basis. All fellowships and assistantships include a stipend plus tuition and fee waiver. Qualified incoming students who are U.S. citizens or permanent residents should also apply for U.S. Department of Education Title VI Foreign Language and Area Studies (FLAS) fellowships (http://publish.illinois.edu/illinoisflas/) offered through REEEC or other FLAS-granting campus centers.

Qualified students may also be eligible for other fellowships at the campus or departmental level. A limited number of teaching and graduate assistantships, which include a tuition and fee waiver, may also be available to outstanding students through REEEC and other units.The Graduate College maintains a list of available assistantships (https://grad.illinois.edu/clearinghouse/); additional information on need-based financial aid may be obtained from the Graduate College Fellowships Office (https://grad.illinois.edu/fellowships/about/).

for the degrees of Master of Arts in Russian, East European, and Eurasian Studies & Master of Science in Library and Information Science

---

The joint degree requires 56 credit hours divided between REEES and iSchool courses. A master's thesis or major research paper is required, to be based on research using primary sources, including sources in the language used to meet the competency requirement. A minimum GPA of 3.25 must be maintained throughout in order to remain in good academic standing.

For additional details and requirements refer to the department's Graduate Programs (https://reeec.illinois.edu/academics/ma-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
REES 550	Seminar in REEE Studies	4
IS 505	Information Organization and Access	4
IS 510	Libraries, Information and Society	4
IS 530	Collection Development (Section C: REEES Bibliography & Research Methods)	4
Core courses in Russian, East European, or Eurasian Studies, including the thesis option.		**24**
These credits must be earned in at least three different disciplines outside of REEES, with at least one course at the 500-level in addition to the thesis. Hours for the thesis, REES 599, may be included up to a maximum of 8; these hours cannot be counted towards the IS electives described below.		
Elective IS courses, at least 12 hours of which must be at the 500-level.		**16-18**
These credits should be selected in consultation with an advisor who is a member of the iSchool faculty.		
Electives may include:		
IS 585	Bibliographic Metadata	
IS 591	Advanced Topics in Information Services	
IS 592	Advanced Topics In Information Organizations	
Total Credit Hours:		**56**

Other Requirements

Requirement	Description
Language Requirement: Third-year competency in Russian or another language of Eastern Europe or Eurasia. Credit hours from language courses do not count towards the degree.	
Students in the joint degree must be registered in each program for at least one semester.	
Minimum GPA:	3.25

Graduate Degree Programs in Russian, East European, and Eurasian Studies

The Russian, East European, and Eurasian Center offers a two-year program of language and area studies courses leading to an interdisciplinary Master of Arts degree. The program is designed to meet the needs of students proceeding to disciplinary-based doctoral work and those planning non-academic professional careers with area expertise. Programs offered by the Center:

- Russian, East European, and Eurasian Studies, MA (p. 1848)
- Russian, East European, and Eurasian Studies Minor (p. 2172)
- Balkan Studies Minor (p. 2135)
- Joint Degree in Russian, East European, & Eurasian Studies, MA and Library & Information Science, MS (p. 2228)

---

Students who complete a degree in the Department of Urban and Regional Planning will be able to:

1. Identify and understand the planners' role in:
   a. advocating for racial and economic equity;
   b. planning for the needs of disadvantaged groups;
   c. expanding choice and opportunity;
   d. reducing inequities through critical evaluation of systems and institutions;
   e. planning for sustainable communities;
   f. reducing impacts of climate change; and
   g. creating equitable and climate-adapted futures.
2. Demonstrate planning proficiency in a global context in the areas of:
   a. history, theory, law and institutions;
   b. the evolution of the practice of planning; and
   c. urban and regional development.
3. Build and put into practice a set of skills that are central to the planning profession, including skills specific to:
   a. communication, community engagement, and the planning process;
   b. research and critical thinking;
   c. mapping and data visualization; and
   d. data collection and analysis, and data analytics.
4. Illustrate professional leadership values including collaborative skills and ethical behavior in research, client representation and decision-making.

JURIS DOCTORATE IN LAW

1. Demonstrate basic knowledge of American substantive and procedural law. This requires:
   a. The foundational rules governing liability for civil and criminal wrongdoing.
   b. The foundational rules that regulate the transaction of business among individuals and the ownership of property.
   c. The constitutional rules that shape the American legal system.
   d. The procedural rules that govern court adjudication.
   e. Several advanced areas of substantive or procedural law or both.
2. Use legal reasoning and legal analysis in advising and representing clients. This requires:
   a. The ability to identify, formulate, and apply legal rules.
   b. The ability to read and analyze judicial opinions.
   c. The ability to parse and interpret statutes, regulations, contracts, and other similar legal texts.
   d. The ability to construct legal arguments and evaluate critically one's own and others' legal arguments.
   e. The ability to identify and evaluate the practical consequences of various legal rules and to formulate policy arguments for and against those rules.
3. Bring practical legal skills to bear in resolving clients' legal problems. This requires:
   a. The ability to write clearly and effectively in a wide range of legal contexts and for various audiences, including courts, clients, and opposing counsel.
   b. The ability to articulate one's thoughts verbally in a clear and effective manner.
   c. Knowledge of and ability to use tools of legal research.
   d. The ability to identify and gather factual information relevant to the application of legal rules.

e. The ability to work collaboratively with others, including others with opposing interests.
f. Knowledge and understanding of practical aspects of the legal profession and market for legal services.

4. Conduct himself or herself professionally and in keeping with the highest standards of civic virtue. This requires:
   a. Knowledge and appreciation of the ethical rules governing legal practice.
   b. The ability to learn and grow professionally through self-reflection and continuing education.
   c. An understanding of the lawyer's distinctive role in society and of the lawyer's concomitant responsibility to contribute to society through public service and pro bono representation.
   d. The self-awareness and empathy necessary to understand and be understood across various social, economic, cultural, political, national, racial, gender, and ethnic backgrounds.

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Veterinary Medical Scholars - DVM & VMS PhD Joint Programs

for the degrees of Doctor of Veterinary Medicine in Veterinary Medicine and Doctor of Philosophy in Veterinary Medical Science - Comparative Biosciences or Doctor of Philosophy in Veterinary Medical Science - Pathobiology

Graduate Degree Programs in the Veterinary Medical Scholars Program

DVM and VMS - Comparative Biosciences, PhD
DVM and VMS - Pathobiology, PhD

Students accepted into the Veterinary Medical Scholars Program (https://vetmed.illinois.edu/education/dvm-phd-program/) can complete a D.V.M. and Ph.D. simultaneously.

for the degrees of Doctor of Veterinary Medicine in Veterinary Medicine and Doctor of Philosophy in Veterinary Medical Science - Comparative Biosciences or Doctor of Philosophy in Veterinary Medical Science - Pathobiology

Graduates of the College of Veterinary Medicine professional program shall:

1. Demonstrate knowledge of the basic sciences that form the foundation of veterinary practice.
2. Understand the principles of scientific inquiry and shall be able to apply those principles to solve problems by posing questions, forming hypotheses, and obtaining and evaluating data relevant to the practice of veterinary medicine.
3. Demonstrate knowledge of the clinical conditions that form the foundation of veterinary practice.
4. Be able to apply their knowledge, skills, and the principles of scientific inquiry to analyze, evaluate, and solve veterinary problems and synthesize diagnostic, therapeutic, and preventative plans.
5. Possess technical skills essential for success in the practice of veterinary medicine and surgery(i.e., they shall be “practice ready” with Day 1 clinical skills).

PROFESSIONAL PROGRAMS INDEX

Degree Programs (emphasis)	School/College	Professional
Law	LAW	JD (p. 2243)
Medicine	CI MED	MD (p. 2245), MD/PhD (p. 2266)
Veterinary Medicine	VETMED	DVM (p. 2243)

Programs Legend

DVM	Doctor of Veterinary Medicine
JD	Juris Doctor
MD	Doctor of Medicine

DVM- Doctor of Veterinary Medicine

the Doctor of Veterinary Medicine in Veterinary Medicine

Our innovative curriculum produces broadly trained, clinically prepared graduates equipped to enter a wide range of veterinary fields.

Among the many benefits of an Illinois veterinary education are:

- Hands-on clinical rotations throughout the curriculum, beginning the first semester
- Courses that integrate subject matter across disciplines and species
- World-class Clinical Skills Learning Center
- DVM-Master's in Public Health joint degree program with the University of Illinois-Chicago
- Structured and informal research opportunities for students
- A wide array of elective courses and student organizations to delve into areas of interest outside the core curriculum
- "Professional development" course that allows students to tailor their six weeks just before graduation, with guidance from a faculty advisor
- Robust shelter medicine program that allows students to perform as many as 50 surgeries in a two-week rotation
- Outstanding hands-on opportunities for students interested in wildlife medicine and epidemiology

Learning Outcomes for the Doctor of Veterinary Medicine in Veterinary Medicine

Graduates of the College of Veterinary Medicine professional program shall:

1. Demonstrate knowledge of the basic sciences that form the foundation of veterinary practice.
2. Understand the principles of scientific inquiry and shall be able to apply those principles to solve problems by posing questions, forming hypotheses, and obtaining and evaluating data relevant to the practice of veterinary medicine.
3. Demonstrate knowledge of the clinical conditions that form the foundation of veterinary practice.
4. Be able to apply their knowledge, skills, and the principles of scientific inquiry to analyze, evaluate, and solve veterinary problems and synthesize diagnostic, therapeutic, and preventative plans.
5. Possess technical skills essential for success in the practice of veterinary medicine and surgery(i.e., they shall be "practice ready" with Day 1 clinical skills).

Juris Doctor

for the degree of Juris Doctor

The 3-year JD program at Illinois Law provides students with a first-rate legal education. The curriculum is both timely and robust, exposing students to a healthy blend of doctrinal law, theoretical perspectives, and real-world skills.

JD Program (https://law.illinois.edu/academics/degree-programs/jd-program/)

for the degree of Juris Doctor

Code	Title	Hours
LAW 601	Contracts	4
LAW 602	Property	4
LAW 603	Torts	4
LAW 604	Criminal Law	4
LAW 606	Constitutional Law I	4
LAW 607	Civil Procedure	4
LAW 609	Legal Writing & Analysis	2
LAW 610	Introduction to Advocacy	3
LAW 627	Legal Research	1
LAW 792	Current Legal Problems (Fundamentals of Legal Practice)	1
Professional Responsibility Requirement courses:		**2-3**
LAW 680	Professional Responsibility	
Please consult the Registration Guide each semester for other courses approved by the College of Law.		
Experiential Credit Requirement		**6**
Courses fulfilling the Experiential Credit requirement vary with section offerings. Please consult Course Counseling Handbook or Registration Guide for more information.		
Upper-Level Writing Requirement		
This requirement may only be satisfied after the student successfully completes the first-year legal writing curriculum (Legal Research, Legal Writing & Analysis, and Introduction to Advocacy). Please consult the Academic Policy Handbook for more information.		

Credit Hour Limits

Requirement	Description
Experiential and Upper Level Writing courses may not double count in requirements	
Regularly Scheduled Credit Hours. Please consult the Course Counseling Handbook for more information.	64
Maximum Externship Credit Hours	9
Maximum Credit Hours allowed in a semester	18
Maximum hours offered by the College of Law not on the UIUC campus	16
Maximum Study Abroad/International Credit	30

Other Graduation Requirements

Requirement	Description
No pending I or DFR grades	
Minimum months to graduation	24
Maximum months to graduation	84
Minimum CGPA	2.33
Minimum Total Hours to Graduate	90

for the degree of Juris Doctor

1. Demonstrate basic knowledge of American substantive and procedural law. This requires:
   a. The foundational rules governing liability for civil and criminal wrongdoing.
   b. The foundational rules that regulate the transaction of business among individuals and the ownership of property.
   c. The constitutional rules that shape the American legal system.
   d. The procedural rules that govern court adjudication.
   e. Several advanced areas of substantive or procedural law or both.
2. Use legal reasoning and legal analysis in advising and representing clients. This requires:
   a. The ability to identify, formulate, and apply legal rules.
   b. The ability to read and analyze judicial opinions.
   c. The ability to parse and interpret statutes, regulations, contracts, and other similar legal texts.
   d. The ability to construct legal arguments and evaluate critically one's own and others' legal arguments.
   e. The ability to identify and evaluate the practical consequences of various legal rules and to formulate policy arguments for and against those rules.
3. Bring practical legal skills to bear in resolving clients' legal problems. This requires:
   a. The ability to write clearly and effectively in a wide range of legal contexts and for various audiences, including courts, clients, and opposing counsel.
   b. The ability to articulate one's thoughts verbally in a clear and effective manner.
   c. Knowledge of and ability to use tools of legal research.
   d. The ability to identify and gather factual information relevant to the application of legal rules.
   e. The ability to work collaboratively with others, including others with opposing interests.
   f. Knowledge and understanding of practical aspects of the legal profession and market for legal services.
4. Conduct himself or herself professionally and in keeping with the highest standards of civic virtue. This requires:
   a. Knowledge and appreciation of the ethical rules governing legal practice.
   b. The ability to learn and grow professionally through self-reflection and continuing education.
   c. An understanding of the lawyer's distinctive role in society and of the lawyer's concomitant responsibility to contribute to society through public service and pro bono representation.
   d. The self-awareness and empathy necessary to understand and be understood across various social, economic, cultural, political, national, racial, gender, and ethnic backgrounds.

MD - Doctor of Medicine

for the Doctor of Medicine in Medicine - Carle Illinois College of Medicine

The University of Illinois Urbana-Champaign Doctor of Medicine (MD) program is conducted on the Urbana Campus in the Carle Illinois College of Medicine. The college offers a professional, four-year MD degree program that integrates engineering concepts with the traditional pillars of medicine, namely the basic health sciences and clinical training, and prepares students for postgraduate medical education programs. This curriculum produces students who are trained and equipped to incorporate analytical and quantitative techniques, modeling and computation, innovation, and human systems approaches to advancing and delivering high quality healthcare. The curriculum emphasizes professional, compassionate, and ethical care and the utilization of team-based approaches to transform healthcare delivery and improve healthcare outcomes through the continuum of care: preventive medicine through acute care. In addition to required courses, elective rotations provide opportunities for students to explore specialized

areas of interest. The educational program spans four (4) years. Students are exposed to extensive clinical training, professional development and scientific and engineering education through a case-driven active learning curriculum.

for the Doctor of Medicine in Medicine - Carle Illinois College of Medicine

The Education Program Objectives (EPO) are the principle guiding document for the development of the curriculum. The curriculum structure was designed as a logical sequence to allow students to achieve the education program objectives as each phase progressively builds on the previous content. The development of each individual course and clerkship is guided primarily by the education program objectives. The initial development of the course and clerkship learning objectives was completed after the education program objectives were finalized.

CI MED's EPOs are guided by the AAMC (American Association of Medical Colleges) and GME (Graduate Medical Education) requirements for competencies of medical students and residents. We have 6 outcomes, each with several sub-outcomes that are more measurable.

1. **Outcome 1:** Altruism - the practice of selfless concern for the well-being of others.
   a. Describe the theories and principles that govern ethical decision making in medicine, particularly those decisions that arise at the beginning and end of life.
   b. Demonstrate compassionate treatment of patients, and respect for their privacy and dignity.
   c. Demonstrate honesty and integrity in all interactions with patients, their families, colleagues, and others with whom physicians must interact in their professional lives.
   d. Demonstrate an understanding of, and respect for, the roles of other health care professionals, and of the need to work in collaborative healthcare teams in caring for individual patients and in promoting the health of defined populations.
   e. Advocate for the interests of one's patients over one's own interests, at all times.
   f. Exhibit an understanding of the threats to medical professionalism posed by the conflicts of interest inherent in the practice of medicine.
   g. Recognize and accept limitations in one's knowledge, skills, attitudes, and behaviors, and continuously improve these attributes.
2. **Outcome 2:** Medical Knowledge - the knowledge necessary for medical practice and skills to expand understanding.
   a. Describe the normal structure and function of the body (as a whole) and of each of its major organ systems.
   b. Describe the molecular, biochemical, and cellular mechanisms that are important in maintaining the body's homeostasis.
   c. Describe the various causes (genetic, developmental, metabolic, toxic, microbiologic, autoimmune, neoplastic, degenerative, and traumatic) of disease conditions and the ways in which they operate on the body.
   d. Describe the altered structure and function (pathology and pathophysiology) of the body and its major organ systems that are seen in various diseases and conditions.
   e. Demonstrate an understanding of the power of the scientific method in basic, translational, clinical, and engineering research.
   f. Demonstrate an interest in and commitment to lifelong learning to stay abreast of relevant scientific advances.
3. **Outcome 3:** Skill - the ability to perform skills needed for medical practice, analyze results of tests, solve clinical problems, and communicate solutions to multiple audiences.
   a. Obtain an accurate and complete medical history.
   b. Perform complete and organ-system specific examinations, including a mental status examination.
   c. Perform routine clinical procedures.
   d. Recommend and interpret the results of commonly used diagnostic procedures and tests.
   e. Describe the most frequent clinical, laboratory, imaging, and pathologic manifestations of common disease states.
   f. Reason deductively in solving clinical problems.
   g. Design and explain the basis for appropriate management strategies (preventive, diagnostic and therapeutic) for common acute and chronic conditions.
   h. Recognize patients with immediately life-threatening or serious conditions requiring critical care and institute appropriate initial therapy.
   i. Demonstrate knowledge of pain management.
   j. Communicate effectively, orally and in writing, with patients, their families, and professionals in health and other fields with whom physicians must exchange information in carrying out their responsibilities.
4. **Outcome 4:** Duty - a holistic view of healthcare system and understanding of population health.
   a. Demonstrate knowledge of the important non-biological determinants of poor health and of the socioeconomic, behavioral, psychological, and cultural factors that contribute to the development and/or continuation of health and disease.
   b. Demonstrate knowledge of the epidemiology of health and disease within a defined population, and the systematic approaches useful in reducing the incidence and prevalence of those diseases.
   c. Identify risk factors for disease or injury, select appropriate tests for detecting patients at risk for or in the early stage of specific diseases, and determine strategies for responding appropriately including prevention strategies.
   d. Retrieve biomedical information from appropriate resources and manage and utilize it within a quantitative and statistical framework to solve clinical problems and make decisions.
   e. Demonstrate knowledge of the organization, financing, and delivery of health care.
   f. Demonstrate cultural competency and a commitment to overcome health disparities by providing care to all patients and advocating for access to health care for underserved populations.
5. **Outcome 5:** Innovation - the ability to identify opportunities in societal and technical spaces, create solutions, and have a positive impact on health care delivery.
   a. Identify unexpected opportunities to provide extraordinary value for patients, populations, and health systems.
   b. Apply systems-based and creative thinking to complex, uncertain diagnoses or other healthcare problems.
   c. Evaluate the feasibility of innovative healthcare solutions to address patient, societal, population, and global health needs.
6. **Outcome 6:** Engineering - Skills necessary to create technical solutions and make technology-related decisions to improve healthcare.
   a. Integrate information from many sources to gain insight into patient care.
   b. Identify, formulate, and solve healthcare problems by applying principles of engineering, science, medicine, and mathematics.
   c. Apply analysis and synthesis to the engineering design process, resulting in designs that address identified healthcare challenges.

d. Conduct relevant healthcare and engineering research and apply quantitative skills and medical judgment to implement solutions.
e. Communicate data-based costs, risks, and benefits of engineering solutions to healthcare teams, health systems, medical device manufacturers, and other health industry stakeholders.

for the Doctor of Medicine in Medicine - Carle Illinois College of Medicine

Admissions

The college selects applicants with the best combination of academic and extracurricular achievement, maturity, integrity, and motivation. Selection of students is based on an assessment of all available data and an evaluation of skills and aptitude. The quality of work in all subject areas is considered, with an emphasis on quantitative methods, breath of education, and experiences that demonstrate initiative, creativity and interest in compassionate patient care.

For more information about the University of Illinois Urbana-Champaign MD program, including Admissions, Financial Aid, and the Curriculum, please consult the college website (https://medicine.illinois.edu/).

for the Doctor of Medicine in Medicine - Carle Illinois College of Medicine

Carle Illinois College of Medicine website (http://catalog.illinois.edu/undergraduate/preprofessional/rotc/#airforcerequirementstext)

Carle Illinois College of Medicine Faculty (https://medicine.illinois.edu/about/directory/faculty/)

BSE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/BSE/)

Biomedical Sciences Engr Courses

BSE 600 Global One Health credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/BSE/600/)
Same as VCM 547. See VCM 547.

BSE 602 Public Health Clinical Applications credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/602/)
The Public Health Clinical Applications rotation was developed in 2006 for veterinary students. However, this rotation is applicable for medical students with an interest in public health that want to expand on concepts of study design, surveillance, sampling, sample handling, field epidemiology and biostatistics. The rotation will integrate medical and veterinary medical students around epidemiology to understand components affecting health from food safety and production to obesity to water systems at the interface of human, animal and ecosystem health. Additionally, students will work in close contact with local and state health departments, gain an understanding of the scope of activities in which local and state health departments are involved, study major and current health threats to humans, animals and the ecosystem and consider policy initiatives to address those threats. Day long field trips and one overnight trip within the state are possible. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 8 hours. Prerequisite: Students must be professional student in the Carle Illinois College of Medicine.

BSE 603 Architecture and Medicine credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/603/)
Same as ARCH 523. See ARCH 523.

BSE 612 Foundations credit: 1 to 11 Hours. (https://courses.illinois.edu/schedule/terms/BSE/612/)
This course is designed with the larger goal of enabling incoming students to achieve similar baseline levels of understanding of the fundamentals of the major topic areas, Foundational concepts for the following disciplines will be covered: genetics, behavioral health, biochemistry, molecular biology, cellular biology and histology, physiology, microbiology, immunology, pathology, pharmacology, anatomy and embryology and epidemiology/ biostatistics. For each of these areas, there is integration of relevant clinical contexts to prepare students for their subsequent organ-system based courses. 1 TO 11 professional hours. Approved for S/U grading only. May be repeated in separate terms to a maximum of 13 professional credits. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 631 Cardiovascular credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/631/)
Topics include ischemic heart Dx, cardiomyopathy/CHF, aortic stenosis, atrial fibrillation, peripheral vascular disease, pediatric ASD. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters for a total of 12 credit hours with approval from the Student Progress and Promotions Committee. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 632 Respiratory credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/BSE/632/)
Topics include Asthma, Chronic Obstructive Pulmonary Disease (COPD), Pulmonary Fibrosis, Respiratory Failure, and Pulmonary Vasculitis. 3 professional hours. Approved for S/U grading only. May be repeated in separate semesters for a total of 9 credit hours with approval from the Student Progress and Promotions Committee. Prerequisite: Restricted to students enrolled in the MD or MD/PhD program at Carle Illinois College of Medicine.

BSE 633 Renal credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/BSE/633/)
Topics include Urinary Tract Infection (UTI) with Pyelonephritis, Urinary Obstruction-Benign Prostatic Hyperplasia (BPH), Acute Renal Failure - toxic, Chronic Renal Failure - Diabetes Mellitus (DM), and Polycystic Renal Disease- pediatrics. 3 professional hours. Approved for S/U grading only. May be repeated in separate semesters for a total of 9 credit hours with approval from the Student Progress and Promotions Committee. Prerequisite: Restricted to students enrolled in the MD or MD/PhD program at Carle Illinois College of Medicine.

BSE 634 Clinical Neuroscience credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/BSE/634/)
Topics include neurovascular disorders, seizures, brain injury, dementia, tumors of the brain, disorders involving neuroinflammation, psychotic disorders, affective disorders, anxiety disorders, as well as disorders of the peripheral nervous system and neuromuscular junction. 5 professional hours. Approved for S/U grading only. May be repeated in separate semesters, for a total of 15 credit hours with approval from the Student Progress and Promotions Committee. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 635 Musculoskeletal and Integumentary System credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/635/)
Topics include primary inflammatory diseases such as rheumatoid arthritis, lupus, polymyalgia rheumatica and associated disorders, degenerative diseases of the joints such as osteoarthritis, primary diseases of muscle, primary diseases of bone such as osteoporosis and osteogenesis imperfecta as well as mechanical trauma to bone leading to fracture. The course will also cover disorders of the integumentary system. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters for a total of 12 credit hours with approval from the Student Progress and Promotions Committee. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 636 Digestion, Nutrition, & Metabolism credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/BSE/636/)
Topics include malabsorption syndrome, vitamin D deficiency, G6PD deficiency, TPN, obesity, GERD with stricture/Barretts, Crohn's disease, peptic ulcer disease with hemorrhage, chronic diarrhea, pyloric stenosis – peds hepatitis C, and colonic polyposis. 1 to 5 professional hours. Approved for S/U grading only. May be repeated in separate semesters for a total of 15 credit hours with approval from the Student Progress and Promotions Committee. Available for honors grade. Prerequisite: Participation in ongoing study of the digestive system. Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 638 Human Development and Reproductive Health credit: 8 Hours. (https://courses.illinois.edu/schedule/terms/BSE/638/)
Builds upon the clinical, basic science, and engineering fundamentals of genetics, the reproductive endocrine system, human development through the life cycle, and sexual and reproductive health. The CI MED curricular threads, namely bioethics and medical humanities, leadership, lifespan health, health systems science, and the social and structural determinants of health will be appropriately interwoven. 8 professional hours. Approved for S/U grading only. May be repeated in separate semesters for a total of 24 professional hours. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 642 Hematology, Oncology, Infection, and Immunity credit: 1 to 6 Hours. (https://courses.illinois.edu/schedule/terms/BSE/642/)
Topics include lung cancer, colon cancer, breast cancer, renal cancer, prostate cancer, pancreatic cancer, iron deficiency anemia, sickle cell anemia, lymphoma- non-Hodgkin, acute myelocytic leukemia, chronic lymphocytic leukemia, idiopathic thrombocytopenia, pneumonia, sepsis UTI – pyelonephritis, cellulitis, HIV anaphylaxis, allergic dermatitis, and myocarditis encephalitis. 1 to 6 professional hours. Approved for S/U grading only. May be repeated in separate semesters for a total of 24 credit hours with approval from the Student Progress and Promotions Committee. Available for honors grade. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 644 Multisystem Conditions credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/644/)
The Multisystem Conditions course is a required course for students in Phase 1 of the Carle Illinois College of Medicine Curriculum. In this course, students work in small groups to approach complex diseases and conditions they may see in the clinical environment. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Restricted to students enrolled in Phase 1 of the Carle Illinois College of Medicine curriculum.

BSE 645 Synthesis & Summary credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/BSE/645/)
This course will review critical concepts in the areas of Behavioral Science, Biochemistry, Cells and Tissues, Human Development and Genetics, Microbiology, Immunology, Pathology, and Pharmacology, Population Health. The course will be organized around the major organ systems: Blood and Lymphoreticular System, Cardiovascular, Endocrine, Gastrointestinal, Hematology and Oncology, Musculoskeletal, Neurology, Psychiatry, Renal, Reproductive, Respiratory, Skin and Subcutaneous Tissue. 6 professional hours. Approved for S/U grading only. Prerequisite: This course is restricted to Carle Illinois College of Medicine Students.

BSE 655 Research Elective credit: 1 to 16 Hours. (https://courses.illinois.edu/schedule/terms/BSE/655/)
The goal of this course is to introduce the students to the foundations of selected multi-disciplinary research in medical/engineering field. Students will learn about the purpose for research; identifying researchable issues; finding, evaluating, and using sources effectively; recognizing methods associated with different types of data and disciplines; and writing a literature review. 1 to 16 professional hours. Approved for S/U grading only. May be repeated up to 16 hours in the same semester, to a maximum of 64 hours in separate semesters. Prerequisite: This course is restricted to Carle Illinois College of Medicine students.

BSE 660 Self-Designed Study credit: 1 to 16 Hours. (https://courses.illinois.edu/schedule/terms/BSE/660/)
Students will develop skills and gain experience working collaboratively with other professional through a self-designed study. Develop a self-guided study when students have an interest in an intellectual issue that is best studied through an integrative approach based in multiple academic disciplines. This course will introduce the student to a selected multi-disciplinary study or project in the medical/engineering field, addresses appropriate methodology, provides opportunities for advanced level research or other creative projects, and culminates in an integrative experience. It must be arranged between the student and an individual faculty member or external collaborator, and subsequently approved by the dean of Academic Affairs. 1 to 16 professional hours. Approved for S/U grading only. May be repeated up to 16 hours in the same semester to a maximum of 32 hours over separate semesters. Prerequisite: This course is restricted to Carle Illinois College of Medicine students.

BSE 666 Academic Progress I (Longitudinal) credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/BSE/666/)
Provides students with an opportunity to demonstrate core medical skills. The course includes assessment of students' understanding of clinical skills, professionalism, anatomy, and medical knowledge. Areas covered in the course include: cardiovascular, respiratory, renal, neurology, musculoskeletal, digestive, nutrition, metabolism, endocrine, genitourinary, oncology, hematology, infection, and immunity. 0 professional hours. Approved for S/U grading only. May be repeated in separate semesters. Prerequisite: Restricted to Carle Illinois College of Medicine students.

BSE 680 Innovation, Design, Engineering and Analysis Projects (Longitudinal) credit: 0 to 6 Hours. (https://courses.illinois.edu/schedule/terms/BSE/680/)
IDEA—Innovation, Design, Engineering, and Analysis—is a required course designed to integrate medicine and innovation starting in the preclerkship year (Year 1) through the clinical immersion year (Year 3), giving students the knowledge and opportunities needed to create novel solutions that advance patient care. The course prepares students to identify unmet needs and apply systematic, innovation-driven methods to create effective and meaningful solutions in healthcare. 0 to 6 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 15 hours. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 685 Medicine - Capstone Project (Longitudinal) credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/685/)
Selecting one of the clinical challenges investigated during the Innovation, Design, Engineering and Analysis Projects (Longitudinal), students will work to potentially translate new approaches, technologies, and treatments in healthcare. 2 to 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 professional hours. Prerequisite: Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine curriculum.

BSE 686 Medicine - Data Science Project (Longitudinal) credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/686/)
Develop skills in data science for health care through the Data Science Project. Identify an exciting data-driven question, find data sources to address the question, and access and utilize those data to improve clinical care. Students will interact with databases, utilize tools for analyzing clinical or molecular data, and learn about the immense potential of medical data science while familiarizing themselves with the issues of human subject's protection and privacy regulations around data. 2 to 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine curriculum.

BSE 700 Innovations in Problem Based Learning credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/700/)
This elective will provide students multiple opportunities to identify compassionate innovation through problem-based learning facilitation. The students will learn how to facilitate a PBL session and how to identify moments in cases where compassionate innovation can be furthered. This will be done through creating additional probes or tasks in the cases to be used by future facilitators. Students will also have the opportunity to create notes and evaluations on first year students. These notes/evaluation will be reviewed by Carle Illinois facilitators. The overall goal of this is not only to improve cases for current PBL students, but to assist students participating in the elective in ideation and entrepreneurship. This will help students as they create IDEA projects in the clerkships as well as preparing them for Capstone and potentially Data Science projects. Based on student interest, certain areas of this elective may be emphasized to achieve student goals. 4 professional hours. Approved for S/U grading only. Prerequisite: Students must be in Phase 2 or Phase 3 of the curriculum. Restricted to students enrolled in the MD or MD/PhD program at Carle Illinois College of Medicine.

BSE 701 Introduction to Telemedicine credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/701/)
This introduction to telemedicine will help students understand the role of telemedicine in various contexts such as in primary care, for underserved or rural patients, during times of crisis (disasters, pandemics) and more. Considerations include benefits & limitations, tools & technology, patient interactions & follow-up, insurance considerations, legal and regulatory issues, and research. Students will have an opportunity to research an area of telemedicine and present what they have learned. This could be new uses of telemedicine, new tools, policy/legal considerations, expanding the reach of telemedicine, or any other issue related to telemedicine. Outputs could include a literature review, program plan, roadmap, white paper or other presentation medium. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 702 Medical Spanish credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/702/)
Carle Illinois College of Medicine strives to support physicians who want to serve diverse populations. To that end, students may enroll in a medical Spanish course. This hybrid online course allows students to increase their proficiency in Spanish, while also practicing with a standardized patient. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 703 Medical Informatics credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/703/)
A detailed overview of biomedical and health informatics for medical students. The course provides up-to-date details on the informatics field, which includes: electronic health records, data standards and interoperability, clinical decision support, healthcare data analytics, population health, patient engagement, and telemedicine. It also describes and sets the context for new technologies, such as SMART on FHIR, machine learning, artificial intelligence, and wearables. 2 professional hours. Approved for S/U grading only. Available for honors grades. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 704 Medicine in Literature credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/704/)
The medical encounter between patients and physicians has been represented in literary texts such as poems, short stories and novels for centuries. In this elective, students will be given the opportunity to reflect on the medical experience through an analysis of literary texts from various time periods and cultural contexts. Particular attention will be paid to the difference in perspective by patients, physicians and other actors in the healthcare setting. Our reading of literature will be complemented by texts from the field of narrative medicine, which uses the tools of literary analysis and close reading to understand patients' histories and fine-tunes awareness of the cultural and social determinants of health. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 705 Race in Medicine credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/705/)
This elective provides an opportunity to explore the topics of unconscious bias, history of race in medicine and effects on systemic racism in medicine. The goal is to give time to grow in personal insight and development in this area to progress to become a compassionate and unbiased health care provider. Progress towards this goal will be made through the personal journey of completing a 21 day equity challenge and reflection paper, participation in online discussion boards, and group projects looking at the history and current state of racism and social determinants of health in medicine. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois college of Medicine curriculum. The course is only available during the Discovery Learning timeframe.

BSE 706 Literature Reviews in Pathology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/706/)
Pathology is a multidisciplinary science that connects theory (basic sciences) with practice (clinical sciences). This elective provides students with opportunities to explore the role of pathology in medical education. This course might be of particular interest to those who are generally interested in medical education and/or pathology as a future specialty. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 8 hours. Prerequisite: Restricted to students enrolled at the Carle Illinois College of Medicine.

BSE 707 Interreligious Perspectives on Health and Medicine credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/707/)
Explores and develops an appreciation for the many ways in which religion and religious identities are present in, and absent from, medical spaces in the United States. This course is intended to support physicians-in-training develop the background, vocabulary, and experiences necessary to practice medicine thoughtfully and sensitively in a religiously diverse society. 4 professional hours. Approved for S/U grading only.

BSE 708 Social Medicine and the Normative Body credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/708/)
Examines the intersection of intergenerational, socio-historical depictions, and articulations of the standardized human body or the normalized body and how its legitimization shaped the practice of medicine and public health. Particular attention will be placed on gendered, abled, racialized, cognitive, and/or socio-economic dichotomies that become attached to the normalized body and sifted through inequitable medical practices and socio-medical stigma. An examination of these histories and historiographies relative to contemporary society will help students better assess the processes by which medical inequities have been erroneously validated and constructed. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 709 Microbiomes Matter: The Path to Regenerative Systems of Farm, Food and Health in the Age of Climate credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/709/)
Through this elective, students will expand their understanding of food systems, the production, processing, consumption, and disposal of food products. This will allow students to draw parallels between the microbiome in the human gut and soil and the impacts of these relationships on human health. Students will engage with a multidisciplinary team of professionals, to understand the connection between regenerative agriculture, food, nutrition, and human and planetary health through the microbiome. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 710 Computational Genomics credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/710/)
The first week of this elective is an intensive course for scientists and clinicians covers the basics of computational genomics, while integrating the latest technologies and computational methodologies. University of Illinois faculty and Mayo Clinic scientists teach lectures and lead hands-on lab exercises in a variety of subject areas including genome sequencing and assembly, polymorphism and variant analysis, epigenomics, and systems biology. The second week is an in-depth independent study that focuses on a project using the skills from the first week. 2 professional hours. Approved for S/U grading only. Prerequisite: This course is restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 711 Climate Change, Planetary Health and Sustainability credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/711/)
Medical students should learn how to practice medicine in the context of the current health impacts of climate change. Throughout the U.S. and globally, climate change contributes to increasing morbidity and mortality, including heat illness, respiratory and cardiovascular disease from air pollution, vector and water borne diseases, food and water insecurity, mental stress, and injuries. We highlight health threats, policies, and actions for physicians, engineering/medical researchers, and medical students. 2 professional hours. Approved for S/U grading only. Available for honor grades. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 712 Artificial Intelligence in Health credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/712/)
Artificial Intelligence (AI) has been proposed to address a variety of challenges in health, both within a clinical setting and beyond the direct patient-physician interaction. The goal of this course is to critically engage with readings on timely topics in AI and health. The strengths and weaknesses of each paper will be discussed both from an AI and evidence-based medicine perspective. Those constructive debates will inform the student's final project that will propose a computational intervention that is more likely to successfully improve health. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled at Carle Illinois College of Medicine.

BSE 720 Advanced Anatomy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/720/)
Provides a focused concentration on gross anatomy via literature review and intensive cadaver dissection related to the student's specific clinical interest. Topics will emphasize clinical conditions that have clear anatomic correlates. Key topics will include the 3D relationships of gross anatomical structures, foundational anatomical knowledge required to interpret results of different imaging modalities, and the application of anatomical knowledge in carrying out surgical, diagnostic, or therapeutic clinical procedures. 4 professional hours. Approved for S/U grading only. Available for honors grades. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

BSE 721 Neurocardiology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/721/)
Introduces students to the fields of scientific and clinical Neurocardiology. Involves a thorough overview of the interplays between the nervous and cardiovascular systems at the basic science and clinical levels. Course instruction will include lectures, invited research talks, and an extensive review and discussion of the medical/scientific literature in the field. Additionally, students will develop a research idea related to neurocardiology and receive formal training and guidance on how to write an NIH grant. The project will culminate with a completed modified F30 research proposal by the end of the elective. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

BSE 730 Introduction to Deep Learning on Healthcare Data credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/730/)
Covers deep learning methods, healthcare data and applications using deep learning methods. Includes activities such as online lectures or video lectures, programming labs, literature review, and individual or group presentations. The overall goal is to understand basic data science workflow for healthcare data such as electronic health records, clinical notes, and medical images, to learn basic deep learning models, and to learn the structure of data science projects. 2 professional hours. Approved for S/U grading only. Prerequisite: Experience with Python programming, basic machine learning, and Jupyter notebooks. Restricted to students enrolled in the Carle Illinois College of Medicine curriculum.

BSE 732 Healthcare Process Management credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/732/)
In this elective we will apply principles and tools of operations management to explore improvement opportunities in the design, delivery, and management of the health care value chain. We will be examining the health care operation from the perspective of operations metrics such as: cost, quality, time (access), and variety/customization. 4 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of the Carle Illinois College of Medicine Phase 1 curriculum. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

BSE 733 Introduction to Research credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/733/)
This elective course offers a comprehensive understanding of research fundamentals at Carle Illinois and the University of Illinois. Students will learn study design, literature searches, hypothesis generation, and research methodologies. They will also gain skills in statistics, outcome assessment, budgeting, ethics, safety protocols, mentorship, collaboration, and securing funding. Upon completion, students will have a solid foundation and skills to excel academically and professionally in research. 1 professional hour. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 734 Medical Chinese credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/734/)
Medical students with basic conversational Chinese skills will be provided opportunities to learn phrases commonly used in the patient interview as well as practice patient interviews in Mandarin. Students will also be introduced to basic concepts of Traditional Chinese Medicine in the context of patient interaction. The goal is to equip students with basic Medical Chinese needed to provide care and advocate for the Chinese community. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine curriculum.

BSE 735 Leadership in PBL I credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/735/)
Students will delve into the world of Project-Based Learning (PBL) from the perspective of a facilitator. Through training, participants will gain a comprehensive understanding of leadership characteristics and the correct implementation of PBL principles. The course aims to equip interested students with the necessary background and context to become student leaders in PBL sessions. Students may engage in the student leader role by enrolling in the second part of this two-part elective series. 1 professional hour. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 736 Leadership in PBL II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/736/)
Students are expected to participate in PBL sessions as student leaders, equipping them with skills essential for leadership in whichever domain they choose including clinical, research, entrepreneurial, and engineering fields. The overall goal of this elective is to provide opportunities for leadership and near-peer PBL facilitation. 4 professional hours. Approved for S/U grading only. Prerequisite: Completion of all clerkships and Leadership in PBL I. Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 737 Exploring Anatomy through the Virtual Reality Lens credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/737/)
In this immersive elective, students have the opportunity to better understand and visualize the 3D view of several complex anatomical areas and their related clinical/surgical applications. Integrating this technology into anatomy won't only allow students to practice hands-on dissection of a complex anatomical area of their choice, after consultation with the anatomy faculty, but also give them a chance to use VR to dive deeper and enhance their understanding of the human body. 1 professional hour. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 738 Advanced Anatomy for Teaching credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/738/)
Advanced Anatomy for Teaching is an elective course designed to enhance regional anatomy knowledge and teaching skills. Through one-on-one and small group lab instruction, students will learn best practices in anatomy education, reflect on their teaching principles, and create educational resources. Students will create either an educational resource to be used for teaching anatomy or an in-depth literature review of medical education pedagogy. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled beyond Phase 1 of the Carle Illinois College of Medicine.

BSE 739 Medical Device Product Development credit: 1 to 16 Hours. (https://courses.illinois.edu/schedule/terms/BSE/739/)
Covers the foundational principles for developing medical devices, clinical diagnostic systems, medical decision-making tools. The pathway from device innovation through clinical development to product approval will be the focus. Content for the course includes best practices in industry, regulation guidance for developing products, and case studies. 1 TO 16 professional hours. Approved for S/U grading only. Students may repeat the course in separate semesters up to 16 credit hours total. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 740 Artificial Intelligence in Medicine credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/740/)
This course offers a comprehensive exploration of AI's impact on healthcare. Healthcare professionals will gain a conceptual understanding of AI applications through medical case studies and machine learning models. The course empowers participants to confidently read AI literature, make data-driven decisions, identify AI tools, and actively participate in the selection and deployment of AI-based medical software. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Care Illinois College of Medicine.

BSE 741 Gamified Learning in Broadly Defined Medical Education credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/BSE/741/)
This course surveys existing research on the design and evaluation of gamified learning strategies situated in the context of health sciences and medical education. Upon completing the course, students will be able to understand design principles and implications of gamified learning strategies in delivering pertinent knowledge, skills, and abilities to intended audience groups in broadly defined medical education contexts via formal and informal learning processes. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 742 Network Science for Health and Social Care credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/742/)
Network science studies complex systems with networks, borrowing theories and methods from a wide range of disciplines, including mathematics, statistical mechanics, data mining, and information visualization. Network science impacts every domain of scientific inquiry, including domains that describe and explore structural and relational aspects important for the health and social care professional. The introductory course provides hands-on experiences with network construction, visualization and analysis using online lectures, visualization labs, student presentations and individual/group research projects. 1 professional hour. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 743 Introduction to Health Systems Science credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/743/)
Health Systems Science is a cornerstone for aspiring physician innovators. It equips students with the tools to navigate and improve healthcare systems, emphasizing the integration of health systems science with professional identity development. Through modules and reflective case studies, students become prepared to lead and innovate within the healthcare landscape by applying key concepts to real-world scenarios and enhancing their roles as system-aware physicians. 1 professional hour. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 744 Simulation I credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/744/)
Simulation I is an immersive, dynamic, two-week introduction to medical simulation activities, providing a gateway to a profound understanding of medical scenarios and their management through simulation techniques. Functioning as supervised participants, students will actively engage in diverse day-to-day simulation activities, collaborating with a team of educators and facilitators. This hands-on experience will culminate in a simulation experience with reports, and self-reflection of needs within the community/medical curriculum to drive the development of their simulation. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 745 Medical Ethics at the Beginning and End of Life credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/745/)
We will examine issues in medical ethics at the beginning and end of life, namely, those pertaining to abortion, the treatment of newborns, dementia, physician assisted suicide, and euthanasia. We will discuss, among other things, ethics-based versus policy-based arguments, different types of patient interests (short-term experiential interests vs. long-term critical interests), and various prima facie rights (the right to life, the right over one's body, and the right to die). 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois Collage of Medicine.

BSE 746 Medical Hindi credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/746/)
Students will complete specific modules of readings and videos daily and practice medical vocabulary in Hindi/Urdu as a group virtually twice weekly. The group meeting will allow for reviewing module content and practicing patient interview skills in Hindi/Urdu with a focus on recognizing cultural differences that are specific to the South Asia healthcare system. The goal is to encourage medical students to provide more culturally sensitive care and advocate for the local Hindi-speaking patient population. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 747 Survey of Health Systems Science credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/747/)
Survey of Health Systems is a follow-up elective to Introduction to Health Systems Science. The goal is for students to shadow administrators at various healthcare practices to compare and contrast. The focus will be on understanding common threads and differences between types of practices and deepening understanding of practicing high-value care. 2 professional hours. Approved for S/U grading only. Due to the coordination of many faculty to arrange for this elective, at least 1 month is needed to arrange shadowing times before the elective starts and it is strongly encouraged to not drop the elective within 2 weeks of the start date. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 748 Residency-Ready: Writing A Review Paper on Medical Innovations in Your Chosen Specialty credit: 8 Hours. (https://courses.illinois.edu/schedule/terms/BSE/748/)
Third- and fourth-year medical students will be empowered with the skills and knowledge necessary to become physician-innovators in their chosen clinical specialties as they prepare for residency. Participants will explore cutting-edge breakthroughs, refine critical thinking, and enhance scientific writing and problem-solving skills. By strengthening residency applications, this course positions students as standout candidates ready to make a meaningful impact in their future clinical field. 8 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students who completed the second year of the Carle Illinois College of Medicine program.

BSE 749 Comprehensive Immunology Course-Level 1 credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/749/)
Immunology is a cornerstone of modern medicine, impacting all clinical specialties. The elective is designed to provide M2-M4 students, with an in-depth understanding of immunological principles, to address gaps in their M1 immunology education. It provides a detailed exploration of the immune system, reinforcing key concepts in both innate and adaptive immunity through focused, comprehensive content. 1 professional hour. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 750 Clinical Pharmacology and Therapeutics credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/750/)
This is self-directed learning in pharmacology, where students review drug classes, covering mechanisms of action, side effects, therapeutic uses, and contraindications. Weekly case-based session integrate pharmacological principles with clinical decision-making. 1 professional hour. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Completion of the first year. Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 751 Contribution of Freestanding Clinics to Patient Care credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/751/)
This will serve to facilitate medical student application of their knowledge of healthcare systems and resources to optimize high-quality care for patients, communities, and populations. The course will provide the opportunity to understand services standalone clinics provide, why patients choose to visit such clinics, and cost-benefit analyses between inpatient and outpatient clinics of hospital systems. 1 professional hour. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Family Medicine Clerkship. Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 752 Community Service Learning credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/BSE/752/)
Students will, in partnership with a community service partner, and through cultural humility training provided by University Extension, understand and apply public and community health principles, bridging the gap between individual patient care and population health. Students will design or propose a community innovation to present to the community partner leadership and faculty at the end of the course. 2 professional hours. Approved for S/U grading only. Prerequisite: Completion of the first year. Restricted to students enrolled in Carle Illinois College of Medicine.

BSE 753 Essential Social, Emotional, Behavioral Skills for Medicine credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/BSE/753/)
Social, emotional, and behavioral skills (SEB skills) help us to implement medical skills more effectively. This course provides opportunities to help understand and develop SEB skills through assessments, readings, and hands-on activities. We intend to cover techniques for improving interpersonal, leadership, teamwork, task management, emotion regulation, and innovation skills. Students will work with the instructor to identify areas they would like to enhance and then design a personalized or small group approach to training. 1 professional hour. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 770 Service Learning Elective credit: 1 to 16 Hours. (https://courses.illinois.edu/schedule/terms/BSE/770/)
Service Learning offers educational experiences that involve students providing non-clinical service to the community in response to identified community needs. Through this course, Carle Illinois students have the opportunity to engage in service-learning activities, collaborate with diverse community members, and develop essential skills for independent and continuous learning throughout their lives. Students will reflect on the connections between their participation in these activities, their medical school curriculum, and their responsibilities as both citizens and future medical professionals. 1 TO 16 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

BSE 799 Advanced Non-Clinical Electives credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/BSE/799/)
Third- and fourth-year students are eligible to participate in short-term elective opportunities that can enhance their medical education. The AAMC Visiting Student Learning Opportunities program enables eligible students to pursue these opportunities other than at their home institutions. They offer clinical, clinical and research, non-clinical, hybrid, and research experiences in the U.S. and globally at teaching hospitals, community clinics, and urban or rural sites. Eligibility and availability are determined by the host institution. 0 to 8 professional hours. Approved for S/U grading only. May be repeated up to 20 hours in the same semester if topics vary, and separate semesters to a maximum of 32 hours. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/CLE/)

Clinical Sciences Engr Courses

CLE 610 Faith, Medicine, and End-of-Life Care credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/610/)
Helps students to develop their skills in taking a spiritual history and addressing issues relating to faith; skills in end-of-life care; and understanding of whole person care. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 4 hours. Prerequisite: Restricted to students enrolled in the Carle Illinois Doctor of Medicine (MD) program.

CLE 613 Introduction to Clinical Practice (Longitudinal) credit: 0 to 5 Hours. (https://courses.illinois.edu/schedule/terms/CLE/613/)
Examines and exposes to the fundamentals of clinical work including office support with basic history, vitals, understanding the team, communicating with patients, observing health care roles and processes. Additionally, this course addresses concepts of history and physical assessment, includes H&P, preoperative assessment, routine physicals. 0 to 5 professional hours. Approved for S/U grading only. May be repeated to a maximum of 15 credit hours across all semesters. SU (2), FA (5), SP (4), SU (2), FA (2) Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE 614 Introduction to Clinical Practice – M2 credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/614/)
This is a longitudinal course, spanning the beginning of the second year, which covers the fundamentals of medical science while incorporating the skills of history and physical assessments. Topics to be covered include performing comprehensive physical exams, conducting and H&P (History and Physical), routine physicals, and interviewing patients. 2 professional hours. Approved for S/U grading only. Prerequisite: CLE 613. Restricted to second year students enrolled in the Carle Illinois College of Medicine.

CLE 631 Clinical Elective credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/631/)
Exposes the students to a clinical specialty to learn more about treatment of disorders, lifestyle of the physicians and the experiences of the patients. Students will learn about interpersonal communication skills, gain a deeper understanding of the environment in which medical devices are used, observe therapeutic treatment in real time, and strengthen the clinical skills. 1 to 4 professional hours. Approved for S/U grading only. May be repeated up to 16 hours in the same semester to a maximum of 40 hours over separate semesters. Prerequisite: This course is restricted to Carle Illinois College of Medicine students.

CLE 640 Family Medicine Clerkship credit: 1 to 10 Hours. (https://courses.illinois.edu/schedule/terms/CLE/640/)
This longitudinal clerkship provides an exciting opportunity for students to have clinical experiences within their own student clinic, as well as ambulatory practices in disciplines such as psychiatry, pediatrics, and family medicine. Students will learn the core skills and knowledge essential to the practice of primary care: diagnosis and treatment of common outpatient complaints, management of chronic medical conditions, and strategies for health promotion and disease prevention. 1 to 10 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 10 hours. Available for honors grade. Prerequisite: This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 645 Internal Medicine Clerkship credit: 10 Hours. (https://courses.illinois.edu/schedule/terms/CLE/645/)
The medicine clerkship is a ten-week rotation. This clerkship emphasizes the integration and application of pathophysiology to the diagnosis and management of patients in addition to the skills of history-taking, physical examination, and case presentation. The course is an apprenticeship focusing on the bedside care of patients. Students work closely with house staff members and ward attendings making daily rounds, admitting new patients, and caring for them with the team. 10 professional hours. Approved for S/U grading only. Available for honor grades. Prerequisite: This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 650 Neurology Clerkship credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/CLE/650/)
The neurology clerkship is a four-week introduction to clinical neurology, the specialty of medicine devoted to patients with diseases of the nervous system. The clerkship emphasizes the basic clinical methods of bedside neurology: Based on the history and examination, students develop skills at neuroanatomical localization and clinical reasoning. Students learn to interpret clinical findings, develop a differential diagnosis, and formulate a plan of evaluation. 5 professional hours. Approved for S/U grading only. Available for honor grades. Prerequisite: This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 655 Psychiatry Clerkship credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/CLE/655/)
The Psychiatry Clerkship is a four week rotation. All students evaluate and follow patients on inpatient and outpatient services, participating in their patients' care with close attending and resident supervision. The acquisition of clinical skills is emphasized: conducting an interview to obtain a psychiatric history and mental status examination; organizing, recording, and presenting the findings to generate a differential diagnosis; and formulating a treatment plan in accordance with the biopsychosocial model. 5 professional hours. Approved for S/U grading only. Available for honor grades. Prerequisite: This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 660 Obstetrics & Gynecology Clerkship credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/CLE/660/)
The obstetrics and gynecology clerkship is a five-week rotation. The main objective is to familiarize students with the signs and symptoms of normal and abnormal reproductive function and to teach the basic examinations in obstetrics and gynecology. The course will emphasize and reinforce skills for taking an appropriate history, performing a physical and pelvic examination, formulating a differential diagnosis as well as a treatment plan, and properly managing patients. 5 professional hours. Approved for S/U grading only. Available for honor grades. Prerequisite: This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 665 Pediatrics Clerkship credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/CLE/665/)
The Pediatrics Clerkship is a five week rotation. The rotation is divided between inpatient and outpatient experiences. The emphasis is on learning to care for children and families in a variety of patient care settings and developing the clinical skills, diagnostic reasoning, and basic management strategies core to the practice of pediatrics. Attending physicians emphasize normal child development as well as the role illness plays in the lives of children and families. 5 professional hours. Approved for S/U grading only. Available for honor grades. Prerequisite: This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 670 Surgery Clerkship credit: 10 Hours. (https://courses.illinois.edu/schedule/terms/CLE/670/)
The Surgery Clerkship is a ten-week rotation. The clerkship is designed to provide clinical experience that improves skills in overall patient care as students apply their knowledge of the basic sciences and expand their knowledge base through exposure to the wide variety of patients and procedures that fall into the realm of general surgery. Students become a valued member of the team as they assume responsibility for the overall care of their patients preoperatively and postoperatively and assist in the operating room. 10 professional hours. Approved for S/U grading only. Available for honor grades. Prerequisite: This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 675 Adult Reconstruction - Hip and Knee credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/675/)
The student will be involved in the daily activities of caring for patients with hip and knee degenerative conditions, as well as potential hip or knee injuries such as hip fractures or periprosthetic fracture. The student will work 1:1 with primary faculty in both clinic and the OR. In clinic, the student will have increasing autonomy to perform history and physical exams on this adult population as appropriate. This begins with shadowing and builds to independent H&P taking with evaluation of pertinent studies. The OR experience begins with scrubbing and shadowing, but will go on to include patient positioning, assisting with draping, application of dressings, and other activities the faculty feels appropriate based on the student knowledge and performance. 4 professional hours. Approved for S/U grading only. May be repeated in separate terms up to a maximum 8 hours. Prerequisite: Completion of Phase 1 and OR Orientation class. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 680 Family Medicine Continuity Clinic credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/CLE/680/)
The Family Medicine Clinic is a required course for students in Phase 2 of the Carle Illinois College of Medicine curriculum. The Family Medicine Clinic is structured to prioritize longitudinal relationships for continuous management of chronic disease. With graduated responsibility, medical students perform the functions of a primary care physician for their patient panel. Students are assigned to the clinic one evening per week. 1 to 3 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 8 hours. Prerequisite: Family Medicine Clerkship. Restricted to students enrolled in Phase 2 of the Carle Illinois College of Medicine curriculum.

CLE 681 General Surgery Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/681/)
Carle Illinois students are required to complete at least one Sub-Internship rotation during their fourth year. In the General Surgery Sub-Internship, students will work with faculty in advanced clinical application of their medical knowledge gained from their core surgery clerkship. 4 professional hours. Approved for S/U grading only. May be repeated to a maximum of 8 hours. Prerequisite: Successful completion of the Carle Illinois core clinical clerkships. Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 683 Pediatrics Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/683/)
The four-week sub-internship in Pediatrics provides Phase 3 students supervised responsibility for patient care in general pediatric inpatient, pediatric intensive care, and neonatal intensive care. Each sub-intern will gain an awareness of the advanced knowledge, skills, values and attitudes the hospitalists/intensivists and ER physicians strive to acquire and maintain throughout their professional lives. 4 professional hours. Approved for S/U grading only. May be repeated for a maximum of 8 hours. Prerequisite: Completion of Carle Illinois core clerkships. Restricted to students enrolled in Phase 2 or 3 of the Carle Illinois College of Medicine curriculum.

CLE 684 Internal Medicine Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/684/)
Carle Illinois students are required to complete at least one Sub-Internship rotation during their fourth year. In the Internal Medicine Sub-Internship, students will work with faculty in advanced clinical application of their medical knowledge gained from their core Medicine clerkship. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 8 hours. Prerequisite: Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 685 Anesthesiology Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/685/)
Provides a more in-depth experience and preparation for the knowledge and procedures performed when working with patients who require sedation anesthesia and pain management for various reasons. Anesthesia fellowships typically encompass experiences in perioperative/periprocedural locations. This experience will thus aim to provide the student with exposure to these areas where anesthesiologists typically work. It will be an opportunity to build trust with providers over the four weeks so that they may possibly recommend the student for future work in this field. The experience will teach the student how to interact with patients undergoing anesthesia, allowing practice in communicating treatment plans, and discussing concerns with the patients undergoing such procedures. Additionally, it will be a chance for the student to gain more experience in some of the more advanced skill sets required for work in these fields. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 8 hours. Prerequisite: Successful complete of all Carle Illinois Core Clerkships. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 686 Neurology Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/686/)
Illustrates the advanced responsibilities and activities that students are expected to demonstrate and participate as an integral member of a neurology team during this advanced clinical rotation. The overall goal for the Neurology Sub-Internship is to give further depth exposure to neurology, with the goal of treating the student on this rotation as more like a resident. Students will conduct further, in depth on EEGs, imaging interpretation, and differential diagnosis. This experience is to provide students with advanced clinical skills necessary for their future role as a resident and be exposed to activities that continue their development according to the Core Entrustable Professional Activities (EPAs) for entering Residency related to Neurology. 4 professional hours. Approved for S/U grading only. May be repeated in separate terms to a maximum of 8 hours. Prerequisite: Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 687 Obstetrics and Gynecology Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/687/)
The overall goal for the Obstetrics and Gynecology Sub-Internship is to give further in-depth exposure to obstetrics, with the goal of treating the student on this rotation as more of a resident, carrying more patients. This rotation will give further in-depth exposure to obstetrics and gynecology, with the goal of students performing as acting interns. Students will increase their ability to assess patients, develop differential diagnoses and treatment options. They will also increase their exposure to procedural cases. This experience is to provide students with advanced clinical skills necessary for their future role as a resident and be exposed to activities that continue their development according to the Core Entrustable Professional Activities (EPAs) for entering Residency related to Obstetrics and Gynecology. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 8 hours. Prerequisite: Completion of all core Carle Illinois College of Medicine clerkships. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 688 Urology Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/688/)
This sub-internship in urology provides students supervised responsibility of patient care. This rotation provides an opportunity to function at the level of an intern with close one-on-one attending supervision and support staff interaction. Sub interns will gain a more in depth understanding of principle urologic domains of knowledge as well as working competence in ambulatory evaluation and surgical treatment of the urologic patient. The sub intern will be exposed to all major disciplines in urology, including but not limited to, open and minimally invasive oncology, trauma/reconstructive procedures, voiding dysfunction, infertility and erectile dysfunction, robotic and minimally invasive procedures, and stones. Sub-interns will be involved in all aspects of urologic patient care: from initial presentation and work-up to discharge planning and follow-up. The sub intern will participate in operative cases under the direct supervision of an attending. Participation levels will vary depending on the procedure, the patient's clinical condition, and the experience level of the student. 4 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 8 hours. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum. Prerequisite: All Carle Illinois College of Medicine core clerkships; the 1-week urology elective during the surgery rotation or CLE 786 Introduction to Urology elective.

CLE 689 Family Medicine Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/689/)
An advanced clinical rotation offered in the final phase of medical school. It aims to provide students with advanced training in the knowledge, skills, and attitudes that are foundational to family medicine. By the end of the sub-i, students should be ready to assume the role of a family medicine intern. Emphasis is placed on the learner's experience of, "the provision of integrated, accessible health care services by clinicians who are accountable for addressing a large majority of personal health care needs, developing a sustained partnership with patients, and practicing in the context of family and community." Experiences in multiple different areas will be completed during this sub-i, including obstetrical, gynecologic procedures, inpatient services, minor procedures (if available) including skin biopsies, cyst removals, incision and drainage, joint injections, implantable birth control insertion and removal, colposcopies, and outpatient care. 4 professional hours. Approved for S/U grading only. Prerequisite: All Carle Illinois core clerkships. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 690 Clinical Research credit: 1 to 8 Hours. (https://courses.illinois.edu/schedule/terms/CLE/690/)
Carle Illinois students are encouraged to participate in research in order to enhance their scientific reasoning, and fulfill the college's mission of developing "Physician Innovators". This course will allow students to engage in a broad spectrum of research experiences. Students will work closely with a research mentor at the University of Illinois at Urbana-Champaign to develop their ideas and generate a list of research outcomes. 1 to 8 professional hours. Approved for S/U grading only. May be repeated in separate terms to a maximum of 16 hours. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE 692 Advanced Clinical and Professional Identity credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/692/)
Provide students and clinicians a chance to meet, in a non-classroom environment, to discuss in topics that impact clinical practice. Examples of these topics include: Domestic Violence, Burnout, Cultural Competence, and Legal Issues in Medicine. Students will be given readings, websites, and videos prior to each session. In addition,students will write brief essays on these topics based on their experience during their clerkships and other electives. Each session, over a dinner, will last approximately two hours. 2 professional hours. Approved for S/U grading only. Prerequisite: Students must be in Phase 2 of the curriculum. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 693 Self-designed Clinical Elective credit: 1 to 16 Hours. (https://courses.illinois.edu/schedule/terms/CLE/693/)
This elective will allow students to develop clinical skills and gain clinical experience under close supervision of clinical faculty through modifying a standing clinical elective to better match their interests or customize a clinical experience. It must be arranged between the student and an individual faculty member or external collaborator, and subsequently approved by the Assistant Dean for Curriculum. 1 to 16 professional hours. Approved for S/U grading only. May be repeated up to 16 hours in the same semester to a maximum of 32 hours over separate semesters. Prerequisite: This course is restricted to Carle Illinois College of Medicine students.

CLE 694 Career Boot Camp credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/CLE/694/)
A preparatory course which helps prepare graduating students to transition to residency. The course utilizes a series of interactive lectures, hands-on workshops, a variety of simulation methods for skills training in procedures and clinical scenarios. Besides topics that span the practice of medicine and caring for patients, there will also be an emphasis on career planning and life outside of work. 5 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 10 hours. Prerequisite: Completion of Phase 2. Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine.

CLE 695 Inpatient Psychiatry Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/695/)
A medical student will act in the role of a sub-intern, or acting intern, for approximately 40 hours per week as part of an interdisciplinary inpatient team. The student will be responsible for a patient panel commensurate with a sub-intern status and follow them throughout their hospital stay. The sub-intern will interview patients, present on rounds, write admission psychiatry evaluations, perform physicals as appropriate, write daily progress notes, and be exposed to the discharge summary process. In addition, the sub-intern will work with consulting services to provide handoffs, collect collateral information, and coordinate after-care. The student will be required to participate in one full weekend call. 4 professional hours. Approved for S/U grading only. Prerequisite: Carle Illinois core clerkships. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 696 Psychiatry Consult and Liaison Sub-Internship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/696/)
This sub-internship/acting internship provides advanced medical students with hands-on experience in the consult and liaison psychiatric setting. Students will learn to conduct psychiatric evaluations and provide treatment for medically ill patients in a hospital setting. They will gain proficiency in ruling out primary medical diagnoses, managing co-morbid medical conditions, and synthesizing the knowledge and skills acquired during the Psychiatry Clerkship. 4 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of all core clerkships within the Carle Illinois College of Medicine curriculum. Restricted to students enrolled in Phase 2 or 3 at Carle Illinois College of Medicine.

CLE 697 Current Concepts in Obesity and Metabolic Syndrome credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/697/)
This elective provides exposure to the challenges of obesity and overweight, as major contributors to poor health outcomes. Over the two weeks, students will gain experience in investigating better measures of obesity, strategies to counter stigma and mismanagement, best practices for intervention, alternatives of chronic weight management, and the inequity of care. This elective involves attendance at an outpatient clinic and community events related to obesity or obesity-related comorbidities. 2 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of the Family Medicine Clerkship. Restricted to students in Carle Illinois College of Medicine.

CLE 698 Advanced Clinical Medical Spanish II credit: 2 to 5 Hours. (https://courses.illinois.edu/schedule/terms/CLE/698/)
The course will increase medical student comfort with Spanish-language interviews, examinations, and patient education with Standardized Patient (SP) and interactions with community members. It will provide ample experience in live and simulated SP interviews, supervision of interview styles and Spanish-language skills, discussion of common diagnosis, procedural consent, treatment plans, and patient education in Spanish to empower medical students to practice medicine with the nationally growing monolingual Spanish-speaking patient population. 2 TO 5 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE 702 Anesthesiology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/702/)
The student will be introduced to various anesthesia techniques, including management of the patient's airway. The student will gain experience in administration of anesthetic drugs, management of critical life functions such as hemodynamics monitoring, blood and fluid therapy and acute pain management (both postoperatively and in Obstetrics). A pre-test will be given to assess student's existing knowledge of anesthesia and other clinical material. This will help the student understand the scope of study during the rotation. 2 professional hours. Approved for S/U grading only. Prerequisite: Surgery Clerkship. Restricted to students enrolled in the MD program at Carle Illinois College of Medicine. Students must be in Phase 2 or Phase 3 of the curriculum.

CLE 704 Dermatology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/704/)
The student is exposed to the private and clinical practice of general dermatology and is instructed in diagnosis and treatment. Emphasis is placed on the care of the patient and the student is expected to function as a member of the office team. 2 professional hours. Approved for S/U grading only. Prerequisite: Completion of the Carle Illinois Internal Medicine Clerkship. Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 705 Spiritual Integration in Healthcare credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/CLE/705/)
Students will research the relationship between patient satisfaction and spiritual care. Students will explore their own understanding of spirituality. They will examine how their spiritual traditions may impact their care. Students will examine how patients utilize their faith to guide their healthcare decisions. Students will observe the Interdisciplinary Team connections of chaplains, specifically with hospice and social work. They will participate in Spiritual Screenings and observe the role of chaplains in traumas. 1 professional hour. Approved for S/U grading only. May be repeated in separate terms up to 2 professional hours. Prerequisite: Completion of years 1 and 2. Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE 706 Emergency Medicine credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/706/)
This elective is to provide exposure to the specialty of emergency medicine. The student will gain experience through the process of assessing a patient by history taking, physical exam and diagnostics. By the end of the 4 week elective the student should be able to obtain a complaint based history with review of system, complete a physical exam and start to formulate a differential diagnosis based upon the chief complaint. Stress will be placed on the development of the differential diagnosis. The experience will include learning appropriate laboratory and radiographic testing as well as treatment options for illnesses/disease that most commonly present to the emergency department. The student will commonly get exposure to patients with chest pain, abdominal pain, neurological disorders, undifferentiated malaise, early pregnancy complaints, STI, sepsis and trauma. 4 professional hours. Approved for S/U grading only. Prerequisite: Internal Medicine or Surgery Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois Curriculum.

CLE 707 Emergency Medical Services credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/707/)
Students will participate in EMS ride alongs with EMS units (e.g. ground transport and air transport) or with the EMS Medical Director in their dedicated Physician Response vehicle. Students will have the opportunity to join fire simulations, regional drills, training courses, tactical calls, and sporting events with Illini Emergency Medical Services. First-hand experience with paramedics and dispatchers will teach students about critical patient management in the pre-hospital setting in both the field and the dispatching center. A portion of this course may be tailored to the student's interests in EMS in areas such as event medicine, mass gatherings, medical simulation, and wilderness medicine. 2 professional hours. Approved for S/U grading only. Prerequisite: Completion of all Carle Illinois core clerkships. Completion of CLE 706 is strongly encouraged. Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine.

CLE 708 Advanced Cardiovascular Life Support Simulation and Clinical Immersion credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/708/)
Students will attain their Advanced Cardiovascular Life Support (ACLS) certification and observe/participate in codes during this elective. ACLS certification and simulations will provide a foundation for students to understand what happens during codes in the hospital environment. Students will be expected to participate when asked but will not lead codes. Typical involvement includes providing compressions. Students will be assigned to ICU codes or the rapid response team. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE 710 Advanced Gynecology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/710/)
This elective is for the student interested in a career in women's health. It will provide in-depth exposure to office gynecology, office gynecologic procedures, and gynecologic related surgeries in the operating room. Clinical exposure will include healthcare across the lifespan with appropriate screenings. Additional clinical exposure will be provided and include contraceptive counseling and infertility counseling. 2 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of the Carle Illinois Obstetrics and Gynecology Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 713 Palliative Care - Introduction credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/713/)
Healthcare providers must be able to provide compassionate patient-centered care that optimizes well-being and alleviates suffering. Students will gain experiences caring for patients with advanced, chronic, and progressive illness that may be facing high symptom burden, complex treatment decisions, or may be near the end of life. The student will gain experience in the sub-specialty of Palliative Care through seeing patients on the inpatient consult services, outpatient primary palliative care clinic, embedded sub-specialty clinics, nursing home visits, and home visits. Student will participate in interdisciplinary rounds and work in a multidisciplinary team to optimize patient care. 2 professional hours. Approved for S/U grading only. Prerequisite: Internal Medicine Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois curriculum.

CLE 714 Ambulatory Cardiology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/714/)
The student will be exposed to the outpatient management of common cardiovascular disorders including coronary artery disease, valvular heart disease, vascular disease, heart failure, and atrial fibrillation as well as to the work-up of common referrals in an ambulatory setting such as chest pain, shortness of breath, edema, palpitations, dizziness, syncope, abnormal ECG, and preoperative risk assessment. The student will also learn basic ECG interpretation and have the opportunity to observe stress testing, nuclear imaging, and echocardiography. The goal is that the student develops his or her history taking and physical exam skills as it relates to the cardiovascular system by integrating the basic sciences with the art of medicine. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted Carle Illinois students in Phase 2 or Phase 3 of the curriculum.

CLE 715 Adult Intensive Care credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/715/)
The goal of this elective is to expand the student's knowledge and understanding of intensive care issues affecting hospitalized patients, primarily focusing on appropriate diagnostic and therapeutic interventions and to provide the opportunity for the student to assume a more primary role in the responsibility of directing care of a patient in a team setting. Inherent in this experience is an opportunity for in-depth learning in the areas of professionalism and systems-based practice. The elective will encompass the learning of integrative skills, procedures and how to handle basic clinical scenarios including codes. The student will partner with their attending to develop the diagnostic and therapeutic plans for his or her patients, the student will engage in a formative experience designed to prepare him/her for the future care of patients in critical care. 4 professional hours. Approved for S/U grading only. Prerequisite: Internal Medicine Clerkship, General Surgery Clerkship, or Neurology Clerkship. Restricted to students enrolled in Carle Illinois College of Medicine. Students must be in Phase 2 or Phase 3 of the curriculum.

CLE 716 Hematology/Oncology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/716/)
The goal of this elective to serve as an introduction to the internal medicine subspecialty of hematology and oncology. In the outpatient setting, the students will be exposed to various hematological and oncological conditions which are managed primarily as an outpatient and exposure to infusion center etc. where chemotherapy is administered. They will be asked to attend tumor board conferences whenever possible to understand the multidisciplinary management of an oncological problem. They will also get some inpatient experience where they will be introduced to management of oncological complications when patients present to the hospital. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Phase 2 or 3 of the Carle Illinois College of Medicine curriculum.

CLE 717 Infectious Disease credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/717/)
The goal of this elective is to give students exposure to the field of infectious disease, including differential diagnosis, treatment options, and management strategies. Students should be able to manage 1-2 patients and independently devise plans for new consults. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Carle Illinois Internal Medicine core clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 718 Introduction to the HIV Epidemic: A Clinical and Social Medicine Elective credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/718/)
Will provide students with a brief introduction to the HIV epidemic and will cover modes of transmission, the virus life cycle, prevention/education, and treatment strategies. We will also discuss the social history of the early epidemic, within the US and on a global scale, and will cover current and continued social issues. 2 professional hours. Approved for S/U grading only. Prerequisite: Carle Illinois College of Medicine Internal Medicine Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 719 Inpatient Cardiology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/719/)
This clinical elective is designed to expose students to a broad range of cardiovascular diseases in an inpatient setting. This includes, but is not limited to, acute coronary disease, heart failures, arrhythmias and valvular disease. Students will also gain knowledge in echocardiography (ECG), stress testing, electrophysiology, and catheterization. 2 professional hours. Approved for S/U grading only. Prerequisite: Completion of the Carle Illinois College of Medicine Internal Medicine Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 720 Gastroenterology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/720/)
Students will attend procedures, perform consultations, and review cases with attending Gastroenterologists. Students will be given library and learning assignments related to patient cases presented in the office and hospital. Students will be an active participant in clinic seeing patients under direct physician supervision. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 4 credit hours. Prerequisite: Successful completion of the Carle Illinois Internal Medicine Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 721 Introduction to Ambulatory Cardiology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/721/)
Students will be exposed to the outpatient management of common cardiovascular disorders including coronary artery disease, hypertension, valvular heart disease, heart failure, and atrial fibrillation. Additionally, the work-up of common referrals in an ambulatory setting such as chest pain, shortness of breath, edema, palpitations, coronary calcification, syncope, abnormal ECG, and preoperative risk assessment can be expected. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 4 credit hours. Prerequisite: Successful completion of Phase 1 of the Carle Illinois College of Medicine curriculum.

CLE 730 Clinical Genetics credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/730/)
This elective course introduces medical students to the diverse practice of clinical genetics. The focus is on basic and applied genetics, genetic risk assessment, and genetic counseling as they relate to prevention, diagnosis, treatment, and management of disease. The course will serve as the basis for the healthcare professional to holistically integrate genetic/genomics, epigenetics, and scientific concepts into personalized health care. 2 professional hours. Approved for S/U grading only. May be repeated for a maximum of 4 hours. Prerequisite: Completion of Internal Medicine Clerkship, Pediatric Clerkship, or Family Medicine Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 731 Health Systems Leadership credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/731/)
In this elective, students will be embedded with senior, operational, and academic leaders throughout Carle and Carle Illinois to understand the challenges that are presented to leadership. Students will use their relationships and knowledge to work on a real-world challenge and present an I.D.E.A.-like report. Students will build relationships to help them understand the nature of Health Systems and leadership skills. 4 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of all Carle Illinois core clerkships. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 732 Neurosurgery I credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/732/)
Designed to provide an introduction into different subspecialties of neurosurgery. It forms the basis for a strong foundation of knowledge of neurological diseases and how they are managed both surgically and non-surgically. Students will be immersed in day-to-day service, functioning essentially as a supervised intern, while working closely with our cohesive group of mid-level providers and attendings in the inpatient, outpatient and operating room settings. The goal of this neurosurgery elective is designed to familiarize students with the essential elements of neurosurgical evaluation and care so that they are able to provide exceptional frontline management. 2 professional hours. Approved for S/U grading only. Available for honors grades. Prerequisite: Restricted to students enrolled in the MD program at Carle Illinois College of Medicine who are in Phase 2 or 3 of the curriculum.

CLE 733 Neurosurgery II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/733/)
Designed to provide an in-depth experience into different subspecialties of neurosurgery. It builds on the the foundation of knowledge of neurological diseases and how they are managed both surgically and non-surgically from CLE 732. Students will be immersed in day-to-day service, functioning essentially as a supervised intern, while working closely with our cohesive group of mid-level providers and attendings in the inpatient, outpatient and operating room settings. Students will be responsible for composing an oral presentation on a patient encountered during their elective and research assignment assigned by faculty of neurosurgery. 4 professional hours. Approved for S/U grading only. Available for honors grades. Prerequisite: CLE 732: Neurosurgery I. Restricted to students enrolled in the MD program at Carle Illinois College of Medicine who are in Phase 2 or 3 of the curriculum.

CLE 736 Urogynecology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/736/)
This elective is for students interested in pursuing the field of obstetrics and gynecology who seek deeper knowledge and responsibility in the field of urogynecology. This will provide students a more complete experience in the clinical practice of urogynecology, surgery, urodynamics and clinical assessment of pelvic floor disorders. 2 professional hours. Approved for S/U grading only. May be repeated to a maximum of 12 hours.

CLE 737 Gynecologic Oncology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/737/)
This elective is for students interested in the field of Obstetrics and Gynecology and/or medical surgical oncology. The experience is for students who seek deeper knowledge and responsibility in the field of gynecologic oncology. The rotation will provide the student with a complete exposure to the clinical practice of gynecologic oncology. Students will perform initial workup and evaluation and staging of patients presenting with malignancy. Working with a provider, they will determine candidacy for surgery and assist with surgical procedures. Students will also follow patients during recovery and surveillance. 2 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of CLE 660. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 738 Reproductive Medicine credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/738/)
This rotation is designed for the Phase 3 medical student who is well versed in Obstetrics and Gynecology and is possibly interested in pursuing a residency in OB/GYN. Activities will revolve around the workup of the infertile couple and the monitoring and management and treatment of reproductive problems. Time will be spent in the office setting, with office ultrasounds, consultations as well as management of ovulation induction cycles and monitoring of ovarian hyperstimulation for IVF. Observation of IVF procedures and assisting in other surgeries would be expected. Additional time in the andrology and IVF labs observing may be available. 2 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of Phase 2 clerkships. Restricted to students enrolled in Phase 2 or 3 of the Carle Illinois College of Medicine.

CLE 739 Advanced Obstetrics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/739/)
This rotation is designed for the Phase 3 medical student who is well versed in Obstetrics and Gynecology and is possibly interested in pursuing a residency in OB/GYN. Activities will revolve around the work up of pregnancy and pregnancy-related complications. Time will be spent on Labor and Delivery, Antepartum, the Outpatient Maternal Fetal Medicine clinic, and the Outpatient Midwifery Clinic. 4 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of all Phase 2 clerkships. Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 740 Introduction to Ophthalmology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/740/)
This course is an introduction in which students will gain a better understanding of the structure and function of the human eye, including an introduction to tools and testing for proper diagnosis and treatments. Students will also learn about various ocular diseases including co-management of ocular and systemic diseases. This will include an understanding of when and why to refer to other specialties. 2 professional hours. Approved for S/U grading only. Students may repeat this course up to 4 hours in separate semesters. Prerequisite: Restricted to students enrolled in Carle Illinois College of Medicine.

CLE 741 Advanced Ophthalmology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/741/)
This 4-week course gives students a deep dive into the field of Ophthalmology. This includes a deeper understanding of the structure and function of the human eye including both common and uncommon disease states. Students will be instructed on how to use tools for diagnosing common diseases. After diagnosis, students will create and propose a treatment plan, including possible referrals, to their preceptor. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students who have completed the Family Medicine and Surgery Clerkships in the Carle Illinois College of Medicine.

CLE 742 Plastic and Reconstructive Surgery credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/742/)
Each four-week rotation will consist of familiarization with general plastic and reconstructive surgery. Emphasis will depend upon the current office and surgical case load. The student will assist in all facets of the practice and have an opportunity to view a wide range of cosmetic plastic surgery. The clinical and surgical experience will provide a solid foundation for innovative ideas in plastic and reconstructive surgery. 4 professional hours. Approved for S/U grading only. Prerequisite: Surgery Clerkship. Restricted to students in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 743 Orthopedic Trauma credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/743/)
An advanced clinical elective focusing on the management of patients sustaining major orthopedic injuries and their sequelae. Students will be involved in all aspects of the continuum of care, including initial emergency management, non-operative and surgical treatment of injuries, inpatient care, and the outpatient management of patients sustaining fractures and dislocations of the extremities and pelvis. Students will work with faculty daily and are expected to have direct participation in all activities. The application of basic science foundations in anatomy, cell biology/systems physiology, and fundamental biomechanical principles will be emphasized as they relate to the treatment of fractures and optimizing fracture healing. Students may, with approval of faculty director, create a proposed innovated solution to an orthopedic trauma situation. 4 professional hours. Approved for S/U grading only. Prerequisite: Surgery Core Clerkship. Restricted to students enrolled in Phase 2 or 3 of the Carle Illinois College of Medicine.

CLE 744 Oral & Maxillofacial Surgery I credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/744/)
Provides exposure to the field of Oral & Maxillofacial surgery. Students will gain experience in the full scope of this surgical specialty including traditional outpatient ambulatory surgery, craniomaxillofacial trauma, orthognathic/reconstructive surgery, cleft lip and palate surgery, and maxillofacial oncology. The student will gain experience in head and neck surgical anatomy, imaging, and principles of management of these subspecialty areas. Additionally, students will gain exposure in the application of technology to these clinical problems such as the role virtual surgical planning. 2 professional hours. Approved for S/U grading only. Available for honors grading. Prerequisite: CLE 670: Surgery Clerkship. Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 745 Oral & Maxillofacial Surgery II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/745/)
Provides exposure to the field of Oral & Maxillofacial surgery. Students will gain experience in the full scope of this surgical specialty including traditional outpatient ambulatory surgery, craniomaxillofacial trauma, orthognathic/reconstructive surgery, cleft lip and palate surgery, and maxillofacial oncology. The student will gain experience in head and neck surgical anatomy, imaging, and principles of management of these subspecialty areas. This advanced course will allow for increased involvement in the day to day management of patients in the clinic, emergency room, in-patient setting, and the operating room. 4 professional hours. Approved for S/U grading only. Available for honors grading. Prerequisite: CLE 670: Surgery Clerkship. Restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 746 Otolaryngology - ENT credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/746/)
This elective is designed for the student seriously considering a career in otolaryngology or seeking a deeper knowledge of ENT. Emphasis on diagnosis and treatment of common head and neck disorders. Students will experience ENT patients in ambulatory, surgery, and in-patient settings. 2 professional hours. Approved for S/U grading only. Prerequisite: Family Med and OR Orientation. Restricted to students enrolled in the MD program at Carle Illinois College of Medicine in Phase 2 or Phase 3 of the curriculum.

CLE 748 Surgical Pathophysiology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/748/)
Underlying modern diagnosis and treatment of complex surgical disease is a fascinating and complex pathophysiology. In the context of current practitioner training, it has become challenging to address these fundamental concepts in detail that is sufficient to initiate long-term interest in the scientific underpinnings of surgical science. This rotation allows student a 'deep dive' into the underlying physiology and medical history of modern diagnosis and treatment. Students will meet surgical patients, whose disease will initiate investigations of the historical and basic science underpinnings of modern surgical care. Potential areas of investigation may include classic medical physiology such as the treatment of hyperkalemia in a surgical patient with particular attention to the associated cellular processes and electrophysiology, the mechanisms of non-cytotoxic systemic cancer therapy such as immunotherapy and gene or protein directed therapy or the physiology of systemic inflammatory response and the (largely failed) attempts to intervene in that pathologic process on the cellular level. 4 professional hours. Approved for S/U grading only. Prerequisite: Students must be in Phase 2 or Phase 3 of the curriculum. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 750 Developmental Pediatrics credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/750/)
This clinical rotation is designed to provide a student with a comprehensive preview of the commonplace developmental and behavioral problems experienced by up to 15% of children in our community. 2 professional hours. Approved for S/U grading only. Prerequisite: Students must be in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum. This course is restricted to Carle Illinois College of Medicine students.

CLE 751 Neonatal Intensive Care credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/751/)
The student enrolled in this elective will be exposed to caring for neonates in the Carle Neonatal Intensive Care Unit (NICU). Students will participate and present in daily rounds, attend deliveries, and assist with procedures. Students will learn basic principles of neonatal care, as well as the diagnosis and management of common neonatal pathology. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 752 Pediatric Pulmonology & Sleep Medicine credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/752/)
The goals of the Pediatric Pulmonology & Pediatric Sleep Medicine elective rotation are to delve into common pediatric pulmonary and sleep diagnoses (asthma, cystic fibrosis, insomnia, snoring) and become familiar with less common conditions. Students will learn to further develop the differential diagnosis and use it to generate a plan of care. In addition, pharmacology, physiology, radiographic imaging, pulmonary function testing, and polysomnography will be discussed as they relate to the various pulmonary and sleep diagnoses. 4 professional hours. Approved for S/U grading only. May be repeated in separate terms up to a maximum 8 hours. Prerequisite: Restricted to students enrolled in Phase 2 or 3 or the Carle Illinois Curriculum.

CLE 753 Pediatric Hematology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/753/)
Many of the important problems in Pediatric Hematology are encountered in an outpatient setting. The major goals of this elective are to gain exposure to diagnostic challenges, the evaluation of anemia, easy bruising and bleeding abnormalities, lymphadenopathy, neutropenia, thrombocytopenia, autoimmune, and other immunologic disorders. Additionally, students will gain exposure to patients with sickle cell disease, bleeding disorders, and clotting disorders. Finally, management of families facing major challenges, with attention to medical and psychosocial factors and provision of care in a multi-disciplinary team setting will be presented. 2 professional hours. Approved for S/U grading only. Prerequisite: Completion of the Carle Illinois Pediatrics Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 764 Physical Medicine and Rehabilitation credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/764/)
Provide students with an introduction to in-patient physical medicine and rehabilitation. Students will consult with patients in the hospital for possible admission, admit the patient, perform a history and physical, and round daily with attending physicians. Student will learn about different types of care provided through the physical medicine and rehabilitation service including: Rehabilitation, electrodiagnosis, general outpatient and musculoskeletal rehabilitation, and non-healing wound care rehab. Students will have an opportunity to work with a physician, to determine the goals and objectives of patient rehabilitation. Students will have the opportunity to observe and interact with other rehabilitation team members including physical and occupational therapists, speech-language pathologists, rehabilitation social work, case management, nutrition, and psychology. Outpatients are seen for musculoskeletal problems. 2 professional hours. Approved for S/U grading only. Prerequisite: Family Medicine. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 765 Orthopedic Sports Medicine credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/765/)
The student participating in this elective will gain initial exposure to Orthopedic Sports Medicine both in the clinic setting and in the operating room. The student will work one-on-one with the faculty in the operating room and clinic in the care of orthopedic sports medicine patients. This elective can be tailored to the individual student's needs, interest, and educational level. 2 professional hours. Approved for S/U grading only.

CLE 767 Internal Medicine – Interprofessional Practice credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/767/)
This is a supervised rotation for advanced medical students, to hone their skills with efficient, coordinated, safe and high-value patient-centered care. It is delivered in small work groups recognized as having a collective identity and shared responsibility for a patient or group of patients (e.g., treatment team, rapid response team, palliative care team, and therapy team). In inpatient and ambulatory settings, students will be practicing members of the non-physician healthcare provider team. 4 professional hours. Approved for S/U grading only. Prerequisite: Completion of Carle Illinois Internal Medicine Clerkship and Neurology Clerkship. Restricted to students enrolled in Carle Illinois College of Medicine.

CLE 768 Neurology Sub-I ED rotation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/768/)
This sub-internship is designed for fourth-year students interested in Neurology who want intensive, hands-on experience at CI MED. Students will work in the busy ED performing neurology consultations, serving as the first point of contact for many patients each day. The rotation emphasizes developing confidence in the neurological exam, sharpening diagnostic reasoning, managing patient sign-outs, and gaining proficiency in clinical documentation. This experience will prepare students for residency by offering high-volume exposure and meaningful responsibility. 4 professional hours. Approved for S/U grading only. Prerequisite: Completion of years 1 - 3 of the CI MED curriculum. Restricted to students enrolled in CI MED.

CLE 770 Service Learning Clinical Elective credit: 1 to 16 Hours. (https://courses.illinois.edu/schedule/terms/CLE/770/)
Service Learning is a set of educational experiences that involve service to the community in activities that respond to community-identified concerns, student preparation, and student reflection on the relationships among their participation in the activity, their medical school curriculum, and their roles as citizens and medical professionals. Carle Illinois students are eligible to participate in service-learning opportunities to work with a variety of patients and community members and to develop skills for self-directed, life-long learning. 1 TO 16 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE 771 Addiction Medicine credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/771/)
This unique elective offers students direct access to the rapidly developing field of addiction medicine. Students will take part in direct patient care at an outpatient addiction specialty clinic with a multidisciplinary team of providers. They will also have the opportunity to attend a drug court in Champaign County and participate in a needle exchange program through the Champaign County Public Health Department. On satisfactory completion, students will have gained a better understanding of the evidence-based treatment options of individuals living with substance use disorders. They will also have firsthand experience combating one of the greatest challenges facing modern medicine - the opioid epidemic. 2 professional hours. Approved for S/U grading only. Prerequisite: This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 772 Outpatient Psychiatry credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/772/)
Students interested in pursuing a Psychiatry residency will manage both adult outpatient psychiatric care and child/adolescent outpatient psychiatric care in this elective. Students will learn in-depth evaluation, diagnosis, and safe management of psychiatric patients in an ambulatory setting. Students will work one-on-one with an attending psychiatrist or supervisor to achieve these goals. In addition, students will attend relevant departmental meetings, professional development sessions, and didactics. The student may also participate in care coordination meetings. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 4 hours. Prerequisite: Successful completion of the Carle Illinois College of Medicine Psychiatry Clerkship. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 773 Radiation Oncology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/773/)
Radiotherapy is an integral part modern multidisciplinary cancer care. This clinical elective is designed to introduce students to the field of Radiation Oncology and use of radiotherapy. We will provide direct experience with evaluation and management of patients with malignant disease, as well as occasional benign conditions regarding radiotherapy. Students will learn epidemiology, pathophysiology, and staging of cancer patients, and then utilize evidence-based approaches for their treatment. This will include opportunities to learn basic information about radiobiology and physics to inform their understanding of radiotherapy planning and treatment delivery. Students will augment direct patient care interactions with attendance of multidisciplinary tumor conferences with other oncologic specialties, as well as departmental quality assurance rounds. 2 professional hours. Approved for S/U grading only. Prerequisite: Medicine Core Clerkship. Restricted to students enrolled in Phase 2 or 3 of Carle Illinois College of Medicine.

CLE 774 Simulated Clinical Ultrasound credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/774/)
The Simulated Ultrasound elective enables students to develop skills related to clinical ultrasound. Utilizing a SonoSim and the associated online modules, students will have the opportunity to enhance their understanding of this imaging tool, and prepare for clinical environments that could benefit from point-of-care ultrasound. Students will learn ultrasound principles and acquisition skills through an online self-paced module. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE 775 Point of Care Ultrasound credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/775/)
The Clinical Ultrasound elective enables students to explore specialties where point-of-care ultrasound can be utilized. Students will learn ultrasound principles and acquisition skills through an online self-paced module. Students will further learn through observing sonographers, providing students with opportunity to refine their skills through observation and questions. Students will work with attending providers (up to four) in different inpatient specialties to assess and care for patients, identifying cases where ultrasound imaging may be useful. 4 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students in Phase 2 or Phase 3 of the Carle Illinois curriculum.

CLE 776 Diagnostic Radiology and Non-Cardiac Nuclear Medicine credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/776/)
Students will observe both acquisition and interpretation of diagnostic exams.These will include, but are not limited to, plain film, fluoroscopy, computerized axial tomography and magnetic resonance imaging. In addition, the student will observe both ultrasonography and nuclear medicine procedures including ultrasound of thyroid and abdominal structures. Nuclear Medicine interpretations will include bone scans, thyroid scans, PET/CT. Students will review films correlated to their clinical experiences and future residency plans, read assigned material dealing with basic diagnostic and fundamental radiology, and attend conferences related to the imaging service. Students will observe invasive diagnostic procedures occurring in the Imaging Department. 2 professional hours. Approved for S/U grading only. Prerequisite: Student must be in Phase 2 or Phase 3 of the curriculum. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 777 Vascular and Interventional Radiology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/777/)
Students will observe and work with the Vascular and Interventional radiology team at Carle foundation Hospital. Students will observe and participate in clinical management of patient with a disease and pathophysiology involving the entire human body and all organ systems. Student will learn basic imaging principles and how they are applied to the management and treatment of disease with special attention to minimally invasive, imaging guided techniques. 2 professional hours. Approved for S/U grading only. Prerequisite: Students must be in Phase 2 or Phase 3 of the curriculum. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 778 Imaging in Critical Care credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/778/)
This elective focuses on remote learning of imaging in the ICU. The primary focus will be interpretation of chest x-ray and chest CT. This starting point will allow students to pursue individual learning goals regarding critical care such as infectious disease, pulmonology, cardiology, and physics. Students will be given a chance to “follow” the patients through their time in the ICU by viewing their images and all other records. This will allow students to become facile with the electronic medical record system. 2 professional hours. Approved for S/U grading only. Prerequisite: Family Medicine Clerkship. Restricted to students in Phase 2 or Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 779 Bariatric Surgery credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/779/)
The goal of this rotation is to recognize the importance of obesity as a disease and the strong impact it has in patients’health, also to describe the management of obesity and understand the pathophysiology of obesity. It will mainly focus on the pre-op assessment of bariatric patients by a multidisciplinary team, surgical procedures to treat obesity as well as the postoperative care of bariatric patients. 4 professional hours. Approved for S/U grading only. Prerequisite: Students must be in Phase 2 or Phase 3 of the curriculum. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 780 Hand Surgery credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/780/)
The student participating in this elective will gain initial exposure to Orthopedic Hand Surgery both in the clinic setting and in the operating room. The student will work 1:1 with the faculty in the operating room and clinic in the care of Hand Surgery patients. This elective can be tailored to the individual student’s needs, interest, and educational level. 2 professional hours. Approved for S/U grading only. Prerequisite: Surgery Clerkship. Student must be in Phase 2 or Phase 3 of the curriculum. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 781 Vascular Surgery credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/781/)
This rotation seeks to expose the medical student to the specifics of evaluation and diagnosis of surgical vascular disease, and surgical interventions for vascular disease. Students will be involved and evaluate patients in both the inpatient and outpatient settings. Emphasis will be placed on history, physical and diagnostic results, a rich discussion of noninvasive vascular studies including venous duplex, arterial doppler, and arterial duplex, as well as advanced imaging results. The student will participate in the operating room and scrub into cases to assist with the surgical team. This rotation is designed to expose and educate medical students about the breath of vascular surgery interventions and develop an understanding of a global assessment of a patient with vascular disease. 4 professional hours. Approved for S/U grading only. Prerequisite: General Surgery Clerkship. Students must be in Phase 2 or Phase 3 of the curriculum. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 782 Rural Surgery credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/782/)
The rotation in Rural surgery is designed to provide the student with exposure to the practice of general surgery in a rural setting at a smaller community hospital. The practice includes the evaluation and management of common general surgical conditions as well as significant exposure to flexible endoscopy – both EGD and colonoscopy. The students will be responsible for seeing new consults, writing a history and physical note, and presenting them to the preceptor. They will round on our patients daily. They will assist in all procedures. Additionally, the student will be exposed to the unique environment of a small community hospital, including the decision-making process regarding types of procedures which can be effectively completed versus those which require transfer. During this rotation, student will work one-on-one with the faculty preceptor and be provided with graded responsibility. 4 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of the Carle Illinois Surgery Clerkship. Restricted to students in Phase 2 or Phase 3 in the Carle Illinois curriculum.

CLE 783 Colon and Rectal Surgery credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/CLE/783/)
This is an advanced surgical elective focused on surgical disorders of the lower gastrointestinal tract. Students will become part of our team as we care for inpatients and outpatients with colon, rectal, and anal disorders. The student will have the opportunity to evaluate patients in the hospital, office, endoscopy suite, operating theater, and participate in several multidisciplinary conferences. 4 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of the Carle Illinois Surgery Clerkship. Restricted to students in Phase 2 or Phase 3 in the Carle Illinois curriculum.

CLE 784 Pediatric Surgery credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/784/)
Pediatric surgeons care for children (birth to age 18) with surgical concerns. These can be either congenital problems (birth defects such as anorectal malformations, Hirschprungs disease, intestinal atresias, etc) or acquired conditions that present during childhood (pyloric stenosis, hernias, appendicitis). Care is provided in both the inpatient and outpatient settings and involves both planned and emergent procedures. The student will participate in the operating room, scrubbing into cases to assist with the surgical team. Students will be active participants in both inpatient and outpatient care and will also have 1 on 1 lectures to learn about surgical care and common pediatric surgical conditions. 2 professional hours. Approved for S/U grading only. Prerequisite: Successful completion of the Carle Illinois Surgery Clerkship. Restricted to Carle Illinois College of Medicine students. Students must be in Phase 2 or Phase 3 of the curriculum.

CLE 786 Introduction to Urology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/786/)
Participation in the outpatient and inpatient management of urological problems. These include urological neoplasms (prostate, bladder, renal, and testicular), urinary calculi, and management of urinary incontinence. The student will actively examine patients in the office and assist with surgery. 2 professional hours. Approved for S/U grading only. Prerequisite: Students must be in Phase 2 or Phase 3 of the curriculum. This course is restricted to students enrolled in the MD program at Carle Illinois College of Medicine.

CLE 788 Introduction to Anatomic Pathology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/788/)
This two-week elective is designed to introduce the student to the venue of anatomic pathology and its role in patient care. Areas that may be covered in Anatomic Pathology include gastrointestinal, gynecologic, genitourinary, pulmonary, head and neck, endocrine, neuropathology, and cytopathology. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Completion of Phase 1. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 789 Introduction to Clinical Pathology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/789/)
This two-week elective is designed to introduce the student to the various sections of the clinical laboratory and its role in patient care. The goal of this two-week educational experience is to gain basic knowledge of laboratory organization, workflow, specimen adequacy, testing methodology and test interpretation. Students will rotate through the four major disciplines in Clinical Pathology: Blood Bank/Transfusion Medicine, Clinical Chemistry, Hematology, and Microbiology. After a review of the general processes in each discipline, the pathologist in charge of the section will discuss a particular patient event or situation with the student and examine the clinical relevance of the testing in progress. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Completion of Phase 1. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 790 Advanced Focus in Clinical Pathology credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/790/)
This two-week elective is designed to offer the student a more in-depth experience in a specific section of clinical pathology and its role in patient care. Areas that can be covered in Advanced Focus in Clinical Pathology include clinical chemistry, hematology, microbiology, and transfusion medicine. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 12 hours. Prerequisite: Completion of Phase 1. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 793 Quality Improvement & Patient Safety credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/793/)
In this elective, students will gain experience with the various aspects of health care quality and patient safety. This could include participation in continuous quality improvement plans (CQI), literature reviews to inform hospital practice, policy and protocol development, and collaborating with health care administrators to respond to community health issues. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

CLE 794 Values in the Physician-Patient Relationship credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/794/)
Constant changes in healthcare settings, coupled with rapid advancements in technology, lead to increasingly complicated ethical dilemmas: Who decides what—patients, doctors, or family members—and on what basis? Should patients' autonomy always be respected, or can physicians act paternalistically towards their patients? What are the ends and norms of the medical profession and how are they determined? Can physicians deviate from these ends and norms and refuse to provide treatment, for example, for conscientious reasons? In this course, we will attempt to answer these (and other) pressing normative questions. In doing so, we will attain an understanding of the complicated network of values at play in the physician-patient relationship. 2 professional hours. Approved for S/U grading only. Prerequisite: Restricted to students enrolled in Phase 2 or 3 of the Carle Illinois College of Medicine.

CLE 795 Consultation-Liaison Psychiatry credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/795/)
Students will perform consultation-liaison psychiatry as well as manage patients in the outpatient setting as part of the Bridge Clinic. Students will work one-on-one with an attending psychiatrist to learn in-depth evaluation, diagnosis, and safe management of patients in consultation-liaison psychiatry and outpatient settings. In addition, student will attend relevant departmental meetings and professional development sessions. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 4 hours. Prerequisite: Successful completion of the Carle Illinois College of Medicine Psychiatry Clerkship course. Restricted to students enrolled in Phase 3 of the Carle Illinois College of Medicine curriculum.

CLE 796 Consultation-Liaison with Outpatient Psychiatry credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/796/)
In this elective, students will perform consultation and liaison psychiatry as well as manage patients in the outpatient setting. The goal of this rotation is to learn in-depth evaluation, diagnosis, and safe management of patients in C-L and outpatient settings. Student will work one-on-one with an attending psychiatrist, other physicians, and non-physician mentors to achieve these goals. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 4 hours. Prerequisite: Successful completion of the Carle Illinois College of Medicine Psychiatry Clerkship course. Restricted to students enrolled in Phase 2 or Phase 3 of the Carle Illinois College of Medicine.

CLE 797 Inpatient Psychiatry credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/797/)
This is a two-week elective in which the student will perform in-depth inpatient psychiatry. The goal of this rotation is to learn in-depth evaluation, diagnosis, and safe management of patients in the inpatient setting. The student will work one-on-one with an attending psychiatrist to achieve these goals. In addition, the student will attend relevant didactics, departmental meetings, and professional development sessions. 2 professional hours. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 4 hours. Prerequisite: Successful completion of the Carle Illinois College of Medicine Psychiatry Clerkship. Restricted to students enrolled in Phase 2 or 3 at Carle Illinois College of Medicine.

CLE 798 Family Medicine Continuity Clinic Course – Beginning credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/CLE/798/)
This will serve as the initiation to CLE 680. The clinic, located at Carle Champaign on Curtis, is structured to prioritize longitudinal patient-physician relationships for continuous management of chronic disease and acute care needs. Students will maintain involvement in the clinic and under direct supervision perform the functions of a primary care physician for a combined patient panel to build their clinical skills before they enroll in the immersion clerkships. 2 professional hours. Approved for S/U grading only. Prerequisite: Completion of CLE 613.

CLE 799 Advanced Clinical Electives credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/CLE/799/)
Phase 2 and Phase 3 students are eligible to participate in short-term elective opportunities that can enhance their medical education. These electives include clinical opportunities, away rotations, away electives, clinical rotations, and visiting opportunities. Each elective is offered by participating host institutions in the U.S. and around the world. Elective opportunities are available in teaching hospitals, community clinics, and urban or rural sites and are open to clinical or final-year students, as determined by the host institution. 0 to 8 professional hours. Approved for S/U grading only. May be repeated up to 20 hours in the same semester if topics vary, and separate semesters to a maximum of 32 hours. Prerequisite: Restricted to students enrolled in the Carle Illinois College of Medicine.

Medical Scholars

for the joint degrees of Medical Doctor and Doctor of Philosophy

---

This program combines the MD with any PhD program available from the University of Illinois Urbana-Champaign.

Graduate Degree Programs

The Medical Scholars Program enables students to combine the study of medicine leading to the MD with graduate study in a second field leading to the PhD. The program seeks to produce leaders uniquely qualified and motivated to address the issues shaping modern medical practice, including health care systems, biomedical research, advances in science and technology, and pressures arising from socioeconomic forces.

Admission

To enter the Medical Scholars Program (MSP), applicants must meet the admission requirements of, and be accepted by, both the Carle Illinois College of Medicine (CI MED) and the Graduate College. Prospective students must demonstrate a potential for creativity and original research, a sense of social awareness and service, academic excellence, competence in leadership and interpersonal relationships, and an appropriate rationale for their interest in combined study. Students apply to CI MED via the American Medical College Application Service (https://students-residents.aamc.org/applying-medical-school/applying-medical-school-process/applying-medical-school-amcas/)® (AMCAS®) (See the Carle Illinois College of Medicine website (https://medicine.illinois.edu/admissions/)). Only U.S. citizens and permanent residents are eligible to apply. State residency is not a factor. Applicants will NOT need to designate themselves as MD/PhD applicants in the AMCAS application. Over the first year of medical school, students will receive advising from the MSP and be able to explore different PhD programs and potential advisors. Near the end of the first year, interested students will complete an MD/PhD application to be reviewed by an MSP Admissions Sub-Committee. Upon conditional acceptance to the MSP track, students must apply for admission to a graduate program and the Graduate College. The Medical College Admissions Test (MCAT) is required for admission to medical school; most graduate programs accept the MCAT in lieu of the GRE.

Approved Areas of Specialization

The university offers graduate study in more than 100 fields in which MSP applicants may propose combined degree study. Indeed, MSP students can pursue graduate study leading to a PhD in any discipline offered on campus. In addition to the traditional biomedical sciences, students may pursue graduate study in engineering, the physical sciences, humanities and social sciences.

Requirements

Students in the Medical Scholars Program are expected to fulfill all the degree requirements of both the Carle Illinois College of Medicine and the graduate PhD program. At their discretion, graduate programs allow medical school classes to count toward completion of a portion of the graduate degree. Faculty advisors from the medical school and from the graduate unit help students set realistic long-term study plans that integrate the two curricula.

Financial Aid

All medical students are responsible for their tuition during the first phase of medical school. Students accepted into the MSP will be funded by their respective graduate program during their PhD studies. This includes a tuition waiver and stipend in the form of a research assistantship, teaching assistantship, or fellowship. Upon completion of the PhD and return to the medical school curriculum, MSP students will receive a CI MED tuition scholarship to complete Phase 2 and Phase 3. Students are highly encouraged to apply for fellowship support from the National Institutes of Health that could fund a portion of the graduate work and last two years of medical school.

for the joint degrees of Medical Doctor and Doctor of Philosophy

---

The PhD program can count up to 12 credit hours of medical school coursework toward completion of the PhD course requirements. The individual graduate programs will decide how much credit can be used to fulfill their requirements.

Upon completion of the PhD and depending on the nature of the thesis work, the CI MED may waive the MD requirement for the capstone project or the data science project. Alternatively, on a case-by-case basis, the required number of weeks of electives could be reduced for MD/PhD students.

Students must be enrolled in the term that they defend their PhD. MSP students can be enrolled in either graduate school or medical school the semester they defend. The individual degrees will be awarded upon completion of the respective requirements.

for the joint degrees of Medical Doctor and Doctor of Philosophy

Carle Illinois College of Medicine

Carle Illinois College of Medicine website

Carle Illinois College of Medicine Faculty

The University of Illinois Urbana-Champaign Doctor of Medicine (MD) program is conducted on the Urbana Campus in the Carle Illinois College of Medicine. The college offers a professional, four-year MD degree program that integrates engineering concepts with the traditional pillars of medicine, namely the basic health sciences and clinical training, and prepares students for postgraduate medical education programs. This curriculum produces students who are trained and equipped to incorporate analytical and quantitative techniques, modeling and computation, innovation, and human systems approaches to advancing and delivering high quality healthcare. The curriculum emphasizes professional, compassionate, and ethical care and the utilization of team-based approaches to transform healthcare delivery and improve healthcare outcomes through the continuum of care: preventive medicine through acute care. In addition to required courses, elective rotations provide opportunities for students to explore specialized areas of interest. The educational program spans four (4) years. Students are exposed to extensive clinical training, professional development and scientific and engineering education through a case-driven active learning curriculum.

The college selects applicants with the best combination of academic and extracurricular achievement, maturity, integrity, and motivation. Selection of students is based on an assessment of all available data and an evaluation of skills and aptitude. The quality of work in all subject areas is considered, with an emphasis on quantitative methods, breath of education, and experiences that demonstrate initiative, creativity and interest in compassionate patient care.

For more information about the University of Illinois Urbana-Champaign MD program, including Admissions, Financial Aid, and the Curriculum, please consult the college website (https://medicine.illinois.edu/).

College of Agricultural, Consumer & Environmental Sciences

College of Agricultural, Consumer & Environmental Sciences (https://aces.illinois.edu)

The College of Agricultural, Consumer & Environmental Sciences plays a key role in national and international research initiatives in biological, physical, social, and economic sciences. The scope of the College has broadened dramatically since its founding in 1867, while its purpose remains focused on advancing scientific knowledge that makes life better, healthier, safer, and more profitable for people in Illinois and around the globe.

The ACES College enrolls more than 2,700 undergraduate students, leading to a Bachelor of Science degree. Students can select from majors and concentrations that direct the focus of study to their specific interests.

Teaching, research, and outreach opportunities are supported by excellent resources. The College of ACES Library and Information Center houses the college's collection of educational resources, computing facility and the College of ACES career development and placement office, which assists students in personal and career development through internships and placement after graduation. The Family Resiliency Center, Institute for Genomic Biology, Child Development Laboratory and extensive research centers in Champaign-Urbana and across the state are other examples of unique and excellent college resources. For instance, the Morrow Plots, a national historic landmark established in 1876, are the oldest agronomic research plots in the United States. The Morrow Plots are located on campus next to the undergraduate library.

The ACES James Scholar Honors Program and the Jonathan Baldwin Turner Undergraduate Research Program offer excellent opportunities for students to be involved in cutting edge research and solving contemporary challenges. Research is conducted in the broad areas of consumer behavior, biotechnology, environmental quality and protection, financial planning, food science, human nutrition, natural resource systems, and individual and family well-being.

Increasing the international knowledge and experience of students and faculty helps meet the growing demand for graduates who are internationally literate and able to work effectively in different countries, in different languages and with people of different cultures. The academic programs office provides initiative and focus to College international study abroad programs as well as integrating an international dimension to the educational experience.

The distinguished faculty, innovative programs, and pioneering achievements in teaching, research, and outreach activities, together with an enthusiastic and competitive student body, place the College of ACES among the top institutions in the country in a survey of peers.

Departments and Curricula

The Department of Agricultural and Biological Engineering offers two majors: Agricultural & Biological Engineering/Agricultural Engineering Sciences and Engineering Technology and Management for Agricultural Systems. Students in the Agricultural and Biological Engineering major earn that degree from the College of Engineering and have the option of a second degree in Agricultural Engineering Sciences. This major is designed to produce graduates who have a basic engineering education for careers of engineering service to the agricultural, environmental, and biofuels industries. The intent of the program is to provide a combination of engineering theory and applications courses to permit students to pursue goals in academia, government or industry. The graduates are expected to provide engineering solutions in agricultural production, bioprocesses and product utilization, natural resources conservation, and are exposed to current social and cultural concepts and ideas. The Engineering Technology and Management for Agricultural Systems major is designed to prepare students for careers requiring the application, management, and marketing of engineering technologies. Students study technological systems, business and economics (including organization, operations, management, marketing, and sales), and oral and written communications. Graduates of the ETMAS program accept positions of employment at highly competitive salaries.

The Department of Agricultural and Consumer Economics offers programs designed to prepare students for business- or policy-related fields with special emphasis on agriculture, consumers, and environmental protection. Students' study is concentrated in one of the following areas: agri-accounting; finance in agribusiness; agribusiness markets and management; consumer economics and finance; environmental economics and policy; farm management; financial planning; policy, international trade and development; and public policy and law.

The Department of Animal Sciences has two majors of Animal Sciences with three concentrations of pre-vet medicine, companion animal and nutrition and food animal production & management and Computer Science + Animal Science. This department offers undergraduate students unique opportunities to conduct research projects with faculty. In addition, many students gain animal experience by working part-time at the U of I Farms. Internships and field study trips are additional avenues of gaining knowledge and experience. Study Abroad experiences are also strongly encouraged. Areas of concentration are companion animal and equine science; science, pre-veterinary and medical; and food animal production and management.

The Department of Crop Sciences offers a major in Computer Science and Crop Sciences, Plant Biotechnology, Agronomy, and a major in Crop Sciences with concentrations of study in crop agribusiness, agroecology, horticultural food systems, and crops. In each of these majors, students receive a strong grounding in science and can apply that knowledge through internship experiences with a wide range of agricultural employers. Each area of study can lead to employment immediately after completion of the B.S. degree, or to graduate or professional study.

The Department of Food Science and Human Nutrition offers majors of study in dietetics and nutrition, food science, hospitality management, and nutrition and health. Courses in the department include the applications of biology, engineering, chemistry, physics, and microbiology to the processing, formulation, packaging, and distribution of food.

The Department of Human Development and Family Studies' major prepares students for graduate education or employment in areas such as child care services, family life education, social work, human services, marriage and family counseling, pediatric services in hospitals, cooperative extension work or business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, or family studies, such as the marital relationship, parent-child interaction, family change or conflict and conflict management in the family. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender.

The Department of Natural Resources and Environmental Sciences provides students the opportunity to study ecosystem stewardship & restoration ecology, environmental science & management, environmental social sciences, and fish, wildlife & conservation biology. NRES is an interdisciplinary program that brings biological, physical, and social scientists together to teach and discover techniques to improve the health and integrity of urban and natural ecosystems.

Bachelor's of Science in Agricultural Leadership, Education, and Communications which can be tailored to fit each student's individual interests by selecting one of our degree concentrations in either Agricultural Communications, Agricultural Education or Organizational and Community Leadership.

Sustainability Food & Environmental Systems major is focused on feeding the world's future population in a fashion that sustainably promotes environmental and human health is the most pressing problem facing the planet and its inhabitants. In response to this challenge, local food systems have become a fast emerging sector of agricultural and food science in major urban areas with entrepreneurship, investment, and an increasing job market following the movement.

The College also offers a program for undeclared students which allows them to explore the many areas of ACES, working with a college advisor to find the right major for their specific interests.

Admission Requirements

Freshman applicants must meet general course pattern admission requirements of the University. Detailed information on the admission process may be obtained from the Office of Undergraduate Admissions.

Transfer applicants are evaluated on the basis of their transfer grade point averages and completion of core course requisites. Transfer applicants to the Dietetics and Human Nutrition major must have a grade point average of at least 3.0 (A = 4.0); applicants to Agricultural and Consumer Economics

and Agricultural Science Education need a minimum GPA of 2.75, and all other curricula require at least a grade point average of 2.5. Applicants are encouraged to consult the Office of Undergraduate Admissions for specific course requirements.

Graduation Requirements

The minimum number of hours required for graduation varies between 126 for all curricula within the college. Included in the total must be all courses prescribed in the given curriculum and a sufficient number of electives to obtain the total number.

Each candidate for graduation must have a grade point average of not less than 2.0 (A = 4.0), including grades in courses transferred from other institutions, and a grade point average of not less than 2.0 in all courses taken at the University of Illinois Urbana-Champaign.

Scholarship Information

A number of scholarships for undergraduate students enrolled in the College of ACES are made available through the generous support of alumni and friends of the College. Incoming and currently enrolled ACES students are eligible for consideration for merit-based awards that are awarded annually by the College. Additional information on scholarships for ACES students can be found on our Financial Aid & Scholarships page (https://aces.illinois.edu/admissions/financial-aid-scholarships/).

University of Illinois Urbana-Champaign Undergrad Admissions (https://admissions.illinois.edu/myillini-apply/)

The programs in the College of Applied Health Sciences provide students with a holistic understanding of health and human behavior. Drawing on the expertise of our faculty and industry partners, we equip students to design, develop and implement initiatives that enhance health and well-being. **Students with an interest in health professions, administration, environmental stewardship, social and economic development of communities, education and advocacy or public policy can find a program of study that will match their interest in the College of Applied Health Sciences.**

As America's approach to health and wellness changes, health care is no longer limited to the traditional practice of doctors and nurses. As a result, the growth market lies in areas related to prevention, quality of life, changing leisure needs, health planning, and therapeutic intervention. As society struggles with these issues, the College and its graduates will continue to play an important role in shaping the future. A degree from the College of Applied Health Sciences allows graduates to pursue a wide array of scientific and professional careers.

Students in the College of Applied Health Sciences enjoy many advantages: high quality degree programs, small classes, an emphasis on student-faculty interaction, active research programs, the opportunity to participate in professional student organizations, the availability of internships, and the largest separate college library in our field.

Along with the relationships they establish with faculty, students work closely with an academic adviser. The College of Applied Health Sciences requires students to meet with advisers to develop a relationship that will guide their studies and experiences while on campus. A solid network of student services available at the University of Illinois Urbana-Champaign enhances the advising experience.

We offer degree programs in five academic areas: Community Health, Interdisciplinary Health Sciences, Kinesiology, Recreation, Sport and Tourism, and Speech and Hearing Science.

- Advising services are available to assist with career information and the development of appropriate courses of study.
- Honors programs are available for outstanding students at the college and campus level.
- Internship experiences are required with most departmental curricula. Quality placements are available throughout the United States and around the world in specific degree programs.
- Study abroad programs are available around the world.
- Students have access to the nation's third largest academic library, including an excellent college library, reference service, inter library loan system, and term-paper counseling system.
- Students engage with College of Applied Health Sciences faculty as early as their freshman year including the opportunity to participate in world-class research.

Honors at Graduation

Graduation from the College of Applied Health Sciences with any honors designation requires that a student must have attained at the University of Illinois Urbana-Champaign a specific minimum cumulative grade point average based on a minimum of 55 semester hours in residence.

- Bronze Tablet (see Honors section (https://ahs.illinois.edu/undergrad-honors-at-graduation/))
- Dean's List (see Honors section (https://ahs.illinois.edu/undergrad-deans-list/))
- Highest Honors: 3.75 to 4.0
- High Honors: 3.5 to 3.74
- Honors: 3.25 to 3.49

James Scholars

The James Scholar Program is a University-wide honors program established to encourage undergraduate research and independent study and to foster scholarly endeavors (see James Scholar Honors Program (http://ahs.illinois.edu/james-scholar/)).

Departments

- **Undergraduate Admissions**
- **Intercollegiate Transfer**
- **Undergraduate Advising**

The College of Education at the University of Illinois Urbana-Champaign offers undergraduate degree programs in the following areas:

Majors with Teaching Licensure

- Computer Science + Education, Concentration: Secondary Education, BS
- Early Childhood Education, BS
- Early Childhood Education: Professional Education - Licensure, BS
- Elementary Education, BS
- Middle Grades Education, BS
- Secondary Education: Mathematics, BS
- Special Education: Learning & Behavior Specialist I, BS

Majors Without Teaching Licensure

- Computer Science + Education, Concentration: Learning Sciences, BS
- Early Childhood Education: Professional Education - Non-Licensure, BS
- Learning & Education Studies, BS

Teacher Education Minor

- Teacher Education Minor in Secondary School Teaching

A distinguishing hallmark of the College of Education is its commitment to diversity. Faculty members engage in research, teaching, and service activities developed to ensure that all children, including those who are racially, ethnically, linguistically, and economically different, as well as people with different abilities and disabilities, are provided with educational opportunities.

Requirements

Admission

Admission to the College of Education at any level (first-year, transfer, and intercollegiate transfer) is competitive.

General Education

In order to meet the University's current requirements in General Education, each candidate for a degree from the College of Education must complete the campus General Education requirements and the Language Other Than English through the third level. In most teacher education curricula,

specific coursework within the General Education areas must be taken. Also, in some teacher education curricula, additional credit in the General Education areas is required. For more information on required general education coursework, contact a College of Education academic adviser. Students must select their courses for General Education from the campus General Education course list (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Graduation

Undergraduate students in the College of Education must meet the University requirements for graduation. For those in a major leading to licensure, the requirements of the Council on Teacher Education (http://cote.illinois.edu/) for licensure must also be met. Students in all curricula must meet the course and academic credit requirements of their curricula with satisfactory scholastic averages. Student teaching is required of all undergraduates in a licensure major and must be completed through the University of Illinois Urbana-Champaign.

Students in need of additional information concerning regulations and degree requirements of the College of Education should consult their academic advisers or the Assistant Dean for Academic Affairs in the College of Education, University of Illinois Urbana-Champaign, 110 Education Building, 1310 South Sixth Street, Champaign, IL 61820.

Faculty Directory (https://education.illinois.edu/faculty-finder/)

College of Fine & Applied Arts

The College of Fine and Applied Arts prepares students for professional work in architecture, art and design, dance, landscape architecture, music, sustainable design, theatre, and urban and regional planning. First-year and transfer students may apply for admission. In each curriculum specific course requirements and general education requirements must be completed to qualify for the specific baccalaureate degree offered.

Graduate degrees are offered in many areas of study through the Graduate College.

The College of Fine and Applied Arts offers introductory courses designed to increase aesthetic appreciation and development, and to portray the role of the arts in civilization for all students who are attending the University of Illinois Urbana-Champaign. Participation in the many bands, choruses, and orchestras on campus, as well as private instruction on most instruments and in voice, is available to students in all colleges by audition.

To serve the total academic community and all citizens in the state of Illinois, the college features the arts in exhibitions, concerts, lectures, performances, demonstrations, and conferences. Many outstanding professionals and works in these fields are brought to the University campus. All departments in the College of Fine and Applied Arts reserve the right to retain, exhibit, and reproduce the works submitted by students for credit in any course.

In addition to the teaching divisions, the College of Fine and Applied Arts includes the Krannert Center for the Performing Arts, the Krannert Art Museum, Japan House, and the Smart Energy Design Assistance Center.

Departments, Schools, and Curricula

The College of Fine and Applied Arts consists of the Departments of Dance, Landscape Architecture, Theatre, and Urban and Regional Planning; the Schools of Architecture, Art and Design, and Music. Additionally, the College hosts an interdisciplinary, undergraduate major in Sustainable Design. The specific functions of each department or school and the undergraduate curricula are described on the following pages. Visit our college website (https://faa.illinois.edu/) to view additional information regarding our Units & Programs and Student Resources.

Special Programs

Study Abroad

International study can be a life transforming experience. The college provides the opportunity for students to obtain campus credit for study and/or travel abroad for a summer session, one semester, or an academic year. Students in FAA have a range of opportunities for study abroad. They can pick from programs developed specifically for FAA students by major through FAA International Programs (https://faa.illinois.edu/student-resources/current-students/study-abroad/) (e.g., year abroad in Barcelona for Architecture students) or from the many programs available across campus (http://www.studyabroad.illinois.edu/).

Prior to departure students are required to submit a study plan for review by their advisor and the college. Students with approved study plans retain their status as University of Illinois Urbana-Champaign students and may continue their student health insurance while abroad. Participation in an approved Illinois program also counts as time in residence at Illinois.

Graduation Honors

The College awards outstanding students honors at graduation. To be eligible, students must have completed a minimum of four semesters of work and 60 hours of credit in residence at the Urbana-Champaign campus. More information on specifics may be found at FAA Honors at Graduation. (https://faa.illinois.edu/student-resources/current-students/honors/#honors-grad)

Dean's List

Each semester students are recognized by the College for academic excellence through the Dean's List. Eligible students must successfully complete at least 12 academic hours, taken for a letter grade (A through F), and earn a grade-point average that places them in the top 20 percent (approximately) of the College. Students who are registered with the Center for Wounded Veterans (CWV) or with Disability Resources and Educational Services (DRES) who are enrolled in less than 12 but a minimum of nine graded semester hours who are in the approximate top 20 percent are also eligible. Such students must sign a release with CWV or DRES indicating their consent for consideration for Dean's List eligibility and have submitted that consent to their home unit's academic affairs office no later than Reading Day in the semester in which they wish to be considered for Dean's List. These consent forms are valid only for the semester in which they are issued, and students must submit by the deadline updated consent forms for each semester in which they wish to be considered for Dean's List.

Students with grades that are incomplete or deferred are not considered for the Dean's List until letter grades have been submitted for those courses. The GPA level necessary to be placed on the Dean's List is revised annually and is posted at Honors (https://faa.illinois.edu/student-resources/current-students/honors/) on the college website.

James Scholar Honors Program

The College of Fine and Applied Arts James Scholar Honors Program (https://faa.illinois.edu/student-resources/current-students/honors/#james-scholar) creates an opportunity for FAA students to develop knowledge independently under the guidance of their instructors and advisors. Students will complete a set of requirements designed to provide challenging, engaging, and diverse experiences. These requirements emphasize the value of research, community engagement, professional development, leadership, and collaboration and will prepare our James Scholars for a successful academic or professional future.

Requirements

Admission

All incoming students hoping to enroll in the College of Fine and Applied Arts as undergraduates must first complete the application for admission through myIllini or the Common App. Several programs within the college (majors in Art & Design, Dance, Music and Theatre) require talent as part of the admissions process, which may include an audition, interview, and/or portfolio. All application materials must be received by the deadline in order to be reviewed for admission.

Graduation

Students who meet the general University requirements with reference to registration, residence, scholarship, fees, and general education requirements, and who maintain the minimum grade-point average required in their degree program, receive degrees appropriate to the curriculum completed. Refer to the specific unit and curricular requirements listed in the following sections. In addition, students must complete the required senior courses in their major field of study in residence at the Urbana campus.

General Education

The Campus Senate, the faculty General Education Board, and the colleges have developed campus wide common general education requirements. Students are advised that some general education requirements may be fulfilled by courses required in the major. All FAA curricula require students to meet the minimum campus general education requirements for graduation. Some programs require additional general education courses. See the individual programs of study for each curriculum.

The College of Fine & Applied Arts consists of:

- The Departments of:
  - Dance (http://dance.illinois.edu/)
  - Landscape Architecture (https://landarch.illinois.edu/)
  - Theatre (https://theatre.illinois.edu)
  - Urban & Regional Planning (http://www.urban.illinois.edu)
- and The Schools of:
  - Architecture (https://arch.illinois.edu/)
  - Art and Design (https://art.illinois.edu/)
  - Music (https://music.illinois.edu/)

The specific functions of each department or school and the undergraduate curricula are described on the following pages. Consult the college website for specific academic policies and procedures for students and faculty in the college.

Majors

- Architectural Studies, BS (p. 113)
- Art & Art History, BFA (p. 116)
- Art Education, BFA (p. 119)
- Art History, BALAS (p. 122)

Graduate Minors

- Art History (p. 2132)
- Dance (p. 2142)
- Heritage Studies and Preservation (p. 2155)
- Minoritarian Aesthetics (p. 2163)
- Music and Sound Studies (p. 2167)

Facilities

Career Services Office

Career Services in the College of Fine and Applied Arts recognizes the unique career needs of students in creative fields, and provides specialized resources to cultivate skills needed for professional success. The office provides career events, workshops, and individual appointments to support students as they explore career options and become career-ready.

Krannert Art Museum

Krannert Art Museum (http://www.kam.uiuc.edu/) is an accredited art museum with a global collection of over 11,000 objects, ranging from antiquity to the present day. Its outstanding permanent collection and exhibition program places it among the top tier of university art museums in the nation. But the space is used as more than an art museum by students at Illinois. Here they can gather to hear improvised music played by international artists, witness the work of performance artists, and participate in an open mic hip-hop cafe. Come and experience a space that allows for simultaneous interplay among artistic forms.

Krannert Center for the Performing Arts

The Krannert Center for the Performing Arts (http://www.krannertcenter.illinois.edu) is a remarkable four-theatre performing arts complex with spaces for instruction, rehearsal, and performance in theatre, opera, dance, and music. The Foellinger Great Hall, seating 2,200, is designed for large-scale musical events. The Tryon Festival Theatre, with 1,000 seats, is for opera, dance, and other musical stage productions. The Colwell Playhouse seats 700 and is the home of the Department of Theatre. The Studio Theatre, seating 150, is for experimental productions. An outdoor amphitheater, rehearsal rooms, offices, dressing rooms, technical shops, and underground parking on two levels for 650 cars complete this monumental facility.

Japan House

The study of Japanese culture began at the University of Illinois Urbana-Champaign in 1900, with the arrival of the first Japanese student. Throughout the last century, the University's role as a leader in Japanese studies began to take form. Major themes of Japan House (http://japanhouse.art.illinois.edu/en/) are the four principles of the Way of Tea — harmony, respect, purity and tranquility. The heart of Japan House is sharing the Japanese Way of tea in its three authentic tea rooms to the community and through academic classes. The grounds feature a Japanese tea garden, strolling garden, and Zen-style rock garden.

SEDAC – Smart Energy Design Assistance Center

The Smart Energy Design Assistance Center (https://smartenergy.illinois.edu/) provides advice and analyses enabling private and public facilities in the State of Illinois to increase their economic viability through the efficient use of energy resources.

University Music Performance Organizations

The School of Music offers credit for all students enrolled in its many performance organizations. You do not need to be a music major to participate in our ensembles. Performance opportunities in the Bands area include five concert bands, two athletic pep bands (basketball and volleyball), clarinet choir, and the world-famous Marching Illini. The Choral area offers singers the opportunity to perform in Chamber Singers, Black Chorus, Men's and Women's Glee Clubs, University Chorus, and Oratorio Society. Our orchestras include the University Symphony, Philharmonia, and Illini Strings. In addition, we invite students to perform in one of our many jazz bands and/or jazz combos, gamelan ensemble, or one of our other groups specializing in contemporary music, world music, chamber music, improvisation, and early music.

To learn more about ensemble opportunities, visit our website (https://music.illinois.edu/perform/).

Libraries

Students in the college have at their disposal outstanding library resources. In addition to the University Library, one of this country's great university collections, there are specialized libraries serving the needs of specific fields. The Ricker Library of Architecture and Art collections contain more than 150,000 volumes (some housed in the Main University library), 40,000 journals and publications, the Ricker Materials collection (an object library of textiles, woods, and more), 33,000 photographs, 9,400 clippings, and vault materials that include historical documents, artists' books, and other rare visual resources.

The City Planning and Landscape Architecture collection comprises about 25,000 volumes of current interest housed in the Funk ACES library, along with more than 120,000 additional volumes covering closely related disciplines. The Music and Performing Arts Library, located in the Music Building, contains over 400,000 items. These include introductory, instructive, research, and reference materials including books, music, recordings, manuscripts, microfilm, and other materials. They also provide numerous digital full text and audiovisual streaming resources from across the arts to campus. Illinois Library (https://library.illinois.edu) digital collections are also available, such as ARTstor which provides access to images and other visual formats.

Graduate Degree Programs

The LL.M. and J.S.D. programs of graduate study in law are designed for foreign law graduates who wish to pursue advanced study and conduct independent research under the direction of the College of Law faculty. Two advanced degrees are conferred by the College of Law: the Master of Laws (LL.M.) degree and the Doctor of Science of Law (J.S.D.). Overall coordination of the graduate program is the responsibility of the Office of Graduate and International Programs, and individual inquiries should be addressed to this office. The Master of Studies in Law (M.S.L.) is a one-year, nonprofessional, terminal degree program designed for those who have had no legal training and who do not desire a professional law degree.

Admission

The Graduate College admission requirements (http://www.grad.illinois.edu/admissions/apply/) and English language proficiency requirements (http://www.grad.illinois.edu/admissions/instructions/04c/) apply. In addition for the LL.M. program, the Test of English as a Foreign Language (TOEFL) requirement is 80 internet-based. Students are not required to take the general Graduate Record Examination (GRE). Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. Admission is generally made for the fall semester only.

Financial Aid

Applicants to the College of Law graduate programs are welcome to apply for scholarship assistance. Scholarships typically are awarded to applicants with a combination of excellent academic and professional credentials and proven financial need. Awards usually provide part of tuition and do not cover living expenses. There are always more qualified applicants than there are funds available. Therefore, applicants are strongly encouraged to explore alternative sources of funding.

Graduate Programs:

- **Majors**
  - Master of Laws, LLM (p. 1602)
    - optional concentrations for LLM only
      - Corporate Law, Commercial Law, & Trade (http://catalog.illinois.edu/graduate/graduate-majors/law/corp-commercial-law-concentration/)
      - Criminal Law (http://catalog.illinois.edu/graduate/llm_law/criminal-law/)
      - Intellectual Property & Technology Law (http://catalog.illinois.edu/graduate/graduate-majors/law/intel-prop-tech-concentration/)
      - International & Comparative Law (p. 1612)
      - Justice, Democracy, & Legal Rights (http://catalog.illinois.edu/graduate/graduate-majors/law/justice-democracy-legal-rights-concentration/)
      - Regulation, Sustainability, & Compliance (http://catalog.illinois.edu/graduate/graduate-majors/law/regulation-sustainability-compliance-concentration/)
      - US Legal Practice Skills (p. 1621)
  - Master of Studies in Law (p. 1623)
  - Doctor of the Science of Law (p. 1599)

Juris Doctor Program

The 3-year JD program at Illinois Law provides students with a first-rate legal education. The curriculum is both timely and robust, exposing students to a healthy blend of doctrinal law, theoretical perspectives, and real-world skills.

- JD Program (http://catalog.illinois.edu//law.illinois.edu/academics/degree-programs/jd-program/)

The professional J.D. in Law can be earned jointly with the following graduate degrees:

-
- Computer Science, M.C.S. (p. 1270)
- Human Resources & Industrial Relations, MHRIR (http://catalog.illinois.edu/graduate/joint-degree-programs/mhrir-jd/)
- Journalism, M.S. (p. 2202)
- Library and Information Science, MS (p. 2208)
- Natural Resources and Environmental Sciences, M.S. (p. 2210)
- Political Science, M.A. with Civic Leadership Concentration (p. 2218)
- Political Science, Ph.D. (p. 2217)
- Urban Planning, M.U.P. (p. 2231)

College of Liberal Arts & Sciences

- College of Liberal Arts & Sciences (https://las.illinois.edu)
- LAS academics information (https://www.las.illinois.edu/students/)
- FAQs (https://las.illinois.edu/admissions/admittedfaq/)
- LAS admissions information (https://www.las.illinois.edu/prospective/)

The College of Liberal Arts and Sciences (LAS) has four missions: scholarly inquiry and the generation of knowledge, preparation of individuals for an array of careers and professions, service to the public, and the provision of the intellectual core of the University. The college shares the first three missions with professional schools and other colleges on this campus, but the last mission is uniquely the responsibility of the College of Liberal Arts and Sciences. By fulfilling this responsibility, the college helps develop broadly educated individuals who are committed to or characterized by open inquiry, critical thinking, effective communication, and responsiveness to the needs of individuals and society.

Students in the college are expected to understand the content of and to develop skills in areas that reflect the overall purpose of the college: fluency and facility in English; literacy in at least one additional language; broad exposure to a number of different disciplines; and intensive study in one discipline (or an interdisciplinary program). The student has a wide choice of courses to satisfy these requirements; however, ultimately he or she must plan a diverse and intensive program of study, prepare for an occupational, professional and intellectual future, and develop that clarity and range of mind that is the goal of educated people.

The following is a list of undergraduate degree-granting academic units in the College of Liberal Arts and Sciences.

- African American Studies (https://afro.illinois.edu/)

College of Media

The College of Media is committed to meeting the evolving demands of an increasingly connected global society through agile media education, cutting-edge scholarship, and professional synergies, all devoted to facilitating enlightened public decision making; fair, accurate, balanced, and contextual representation of all groups in our society; and the preparation of a new generation of leadership in advertising, communications research, journalism, media and cinema studies, and public media.

The College offers Bachelor of Science degrees in Advertising, Computer Science + Advertising, Journalism, and Media & Cinema Studies, as well as an online Bachelor of Arts degree in Media. Students have opportunities to become leaders in cutting-edge media, study with leading professionals and scholars, and learn using the latest equipment and facilities. Included are laboratories for reporting, editing, design, and multimedia-journalism; editing suites for radio, television, and film production; and a television studio.

The College includes Illinois Public Media, which operates the local PBS and NPR stations WILL-AM, FM, TV and online.

The College of Media has a rich past and a bright future. It traces its history to 1902, when instruction in journalism began. A school of journalism was established in 1927. In 1950 it became the School of Journalism and Communications. In 1957 the school was elevated to college status and the name College of Communications was adopted in 1968. To better reflect the College's emphasis on mediated communication, the name College of Media was adopted in 2008 becoming one of the first Colleges of Media in the country.

The College also offers minors in Advertising, Cinema Studies, Critical Film Production, Journalism, Media, and Public Relations.

The Department of Advertising offers the Master of Science degree in Advertising and Strategic Brand Communications. The Department of Journalism has a graduate program leading to the Master of Science (MS) in Journalism. The Department of Media and Cinema Studies offers a graduate minor in Cinema Studies. The College also offers an interdisciplinary program leading to a Doctor of Philosophy degree in communications and media through the Institute of Communications Research.

Admission Requirements

High school students and prospective transfer students from another institution should contact the Office of Undergraduate Admissions (https://www.admissions.illinois.edu/) for admission requirements and application deadlines for a specific term.

Current University of Illinois students who will have completed at least one year on the Urbana-Champaign campus should apply during the a designated Intercollegiate Transfer (ICT) period. Successful applicants will be admitted for the following semester. Applications and deadlines can be found on the College of Media website (https://media.illinois.edu/inter-college-transfers/).

Students currently enrolled in other colleges on campus are accepted on the condition that by the time they join the College they must:

- Have completed at least two semesters in the University of Illinois Urbana-Champaign academic unit to which they were admitted, if admitted as a first-year student or one semester if admitted as a transfer student.
- Be in good academic standing.
- Have completed approximately one-fourth (if sophomores) or one-half (if juniors) or more of the total credit hours required to satisfy the university's General Education requirements.

Students seeking to transfer from another university may apply early in the spring semester provided they will have completed at least 30 transferable hours by the end of the spring semester. Hours planned during upcoming summer semesters are not considered.

First Year students may apply to Advertising, Computer Science + Advertising, Journalism, or Media & Cinema Studies. Transfer students and re-entry (students who have previously attended Illinois) may apply to Advertising, Computer Science +Advertising, Journalism, Media & Cinema Studies, or Media (online). Students enrolled in the Bachelor of Arts in Media program can only take online courses. College of Media students may not complete double majors within the College. Students majoring in Journalism may not pursue a Journalism minor. Students majoring in Advertising and CS + Advertising may not pursue an Advertising minor. College of Media students are not eligible to pursue the general Media minor.

Students who would require more than nine total semesters of overall college or university enrollment to complete their degree will not be admitted. Students admitted to all programs except the Bachelor of Arts in Media (online) program must complete their College of Media degree within seven semesters of joining the College as sophomores or within five semesters of joining the College as juniors. Students are not admitted to the College of Media for the purpose of pursuing second undergraduate degrees.

Most required courses in Advertising, Computer Science + Advertising, Journalism, and Media & Cinema Studies must be completed at the University of Illinois Urbana-Champaign. Students completing first year and sophomore studies at institutions other than the University of Illinois Urbana-Champaign may test their interest in the media field. However, a maximum of nine hours of transferable Media courses are allowed toward major requirements for all programs except the Bachelor of Arts in Media.

Graduation Requirements

To graduate, students must satisfy all university requirements for residency and must complete the university's general education requirements. All students also must fulfill these general requirements of the College of Media:

- Complete a total of 124 semester hours of course credit of which no more than 8 hours total may be in Kinesiology activity courses numbered KIN 100-111. Students in the Bachelor of Arts in Media are required to complete a total of 120 hours.
- Independent study courses additionally must be approved by the College to ensure that credit is given only for academic work directly supervised by a faculty member. The College encourages its students to have appropriate professional internships and to participate in professional activities. While it does not allow academic credit for such experience, one credit hour is possible through an academic course or independent study supervised by a College of Media faculty member and taken in conjunction with an internship.
- Advertising majors must complete at least 20 hours in courses numbered 200 or above outside the College of Media and not cross-listed in the College of Media, regardless of the rubric under which they are taken. At least 9 of the 20 hours must be in courses numbered 300 and above.
- Complete the specific requirements of one of the five degree programs offered by the College.
- Earn a cumulative grade point average of 2.00 (A = 4.00) in all courses presented for the degree and a cumulative 2.00 grade point average for all courses taken in the College.

Credit/No Credit Grading Option

The College follows credit-no credit provisions described in Article 3-105 (https://studentcode.illinois.edu/article3/part1/3-105/) of the *Student Code*.

All courses listed or cross-listed with departments in the college, or specifically required by one of those departments for its majors or used to fulfill University General Education requirements, must be taken for a traditional letter grade. For Advertising majors, this means these courses outside the College must be taken for a grade: STAT 100 (or any of the allowed substitutes), ECON 102, ECON 103, and two out of the three courses SOC 100, PSYC 100 and ANTH 103. For all majors, courses taken to fulfill the College's advanced hour requirement (20 hours outside the College in courses numbered 200 and above) also must be taken for traditional letter grades.

Dean's List

To be eligible for Dean's List recognition for any semester, students must rank in the top 20 percent of the College in grade point average and must complete at least 12 hours taken for a letter grade (A through F) on the Urbana-Champaign campus. Transfer, study abroad, and guided individual study coursework is excluded.

Students who are registered with the Chez Veterans Center or with Disability Resources and Educational Services (DRES) who are enrolled in less than 12 but at least 9 graded semester hours who are in the top 20 percent of the College are also eligible. Such students must sign a release with the Chez Veteran Center or DRES indicating their consent for consideration for Dean's List eligibility and have submitted that consent to their home unit's academic affairs office no later than Reading Day in the semester in which they wish to be considered for Dean's List. These consent forms are valid only for the semester in which they are issued, and students must submit by the deadline updated consent forms for each semester in which they wish to be considered for the Dean's List.

The specific grade point average necessary to achieve Dean's List recognition may vary.

Dean's List recognition is determined before the start of the ensuing semester. Students who are not initially selected but who believe they might qualify because of the late resolution of incomplete, deferred or missing grades may petition before the end of the next semester for retroactive addition to the list.

Honors at Graduation

For graduation with honors, a student must rank in the top 20 percent of their graduating class in overall grade point average. For graduation with high honors, a student must additionally rank in the top 10 percent. For graduation with highest honors, a student must additionally rank in the top 5 percent.

For purposes of this award, "graduating class" means all students listed as receiving or as being candidates for receiving bachelor's degrees in all College of Media majors at the College's annual convocation each May. This includes students who graduated in the previous December and those who are candidates for graduation in May and August. Grade point averages are computed through the fall semester immediately preceding the annual convocation and include all transfer courses and other grades posted as of that date.

Transfer students, in addition to meeting the general requirement, must have cumulative University of Illinois Urbana-Champaign grade-point averages as high as the lowest ones listed for students who qualify on the basis of having completed all of their work at the University of Illinois Urbana-Champaign and must have earned 40 or more semester hours at the University of Illinois Urbana-Champaign through the fall semester immediately preceding the annual convocation.

Kappa Tau Alpha

Each year, scholastically high-ranking graduating juniors and seniors in the College of Media are considered for membership in Kappa Tau Alpha, the seventh oldest national honorary society, founded to recognize and promote academic excellence and scholarship in journalism and mass communication.

Students must rank in the top 10 percent of their class, must have completed at least 5 semesters of degree work and must have completed at least 9 semester hours in professional skills courses, as defined by the national society.

James Scholars

The James Scholar Program, named for the University of Illinois' fourth president, Edmund J. James, focuses on giving high-achieving students the opportunity to gain additional knowledge by working closely with instructors.

To remain in good standing as a James Scholar in the College of Media, students must maintain semester and cumulative GPAs of 3.5 and higher and complete at least 12 credit hours for traditional letter grades each semester. Students must complete five honors activities during their time in the College of Media, with at least one activity being completed each academic year. Students will choose from the pre-approved honors activity list as provided by the honors dean to complete the honors requirement. Students who study abroad will be exempt from the GPA and credit hour requirements during the semester(s) they are abroad. The honors requirement should be completed the semester the student is on campus.

James Scholars' academic records are reviewed after fall and spring semesters. After the fall semester, students will be reviewed to ensure they completed 12 graded hours and earned a 3.5 semester and overall GPA. A more comprehensive review will occur after spring semester. This will include a review of GPAs as well as completion of at least one honors project during the academic year. If a student has met the stated requirements, they will be certified as a James Scholar for the next academic year and the James Scholar designation will be added to their transcripts for that academic year. Any student who does not fulfill the requirements will be removed from the James Scholars program.

Students entering the College of Media as freshmen are invited to join the James Scholars program at the time of admission if they rank in the top 20 percent of the College's incoming class, as determined by the Office of Admissions standard that combines factors such as high school GPA, standardized test scores (if submitted), application essays, and related involvement.

Students already in the College of Media are invited to become James Scholars for the upcoming fall semester if they have completed fewer than 75 hours, have at least a 3.5 overall GPA and were included on the Dean's List for the spring semester. If a student loses the James Scholar status, he or she must sit out of the program for at least one academic year before becoming eligible for reinstatement. A student may only be reinstated by making the College's spring Dean's List.

Students who transfer into the College of Media from another college on the Urbana-Champaign campus are invited to participate in the James Scholar program immediately if they were a James Scholar in their previous college. Students who transfer to the College from another institution may request to participate if they have a transfer GPA of at least 3.7.

See complete policies and procedures (https://media.illinois.edu/james-scholars/) for more information.

- Media & Cinema Studies (https://media.illinois.edu/media-cinema-studies/)
- Institute of Communications Research (https://media.illinois.edu/icr/)

Curricula:

ADVERTISING

ADVERTISING (ADV), offers students the opportunity to learn and think about advertising as a way of modeling the mind, as a material reflection of social structure, as a fundamentally modern phenomenon, as an art form and even as a basis for community, by drawing on insights from psychology, sociology, history, literature, and anthropology. This program will thoroughly infuse the understanding of consumer behavior and message knowledge base and, therefore, provide a better and longer-lasting education for students.

COMPUTER SCIENCE + ADVERTISING

COMPUTER SCIENCE + ADVERTISING, sponsored jointly by the Sibel School of Computing and Data Science and the Charles H. Sandage Department of Advertising. This is a program for students who plan to pursue careers in the advertising field that have a technology focus. Cloud computing, the availability and ubiquity of data, and the rapid and pervasive adoption of mobile technology have created a paradigm shift in the advertising industry. Projected areas of growth in advertising and communications will be in Search Engine Optimization, web analytics, Computational Advertising, and

other emerging areas of technology/media. The degree will prepare students for advanced study at the graduate level as well as immediate entry into the workforce at advertising agencies, businesses with in-house advertising and marketing divisions, and technology companies.

JOURNALISM

JOURNALISM (JOUR), prepares students for exciting and fulfilling careers in broadcast journalism, news-editorial journalism, and emerging media. The primary professional aim is to train students as public affairs and enterprise journalists. The Journalism Department seeks to prepare broadly educated professionals who will assume decision-making and leadership roles in a variety of media organizations.

MEDIA AND CINEMA STUDIES

MEDIA AND CINEMA STUDIES (MACS), prepares students with dynamic skills for careers in media, information, creative, and visual industries, as well as informed interaction with everyday media technologies. Majors have the opportunity to participate in original research, mixed media production, internships, study abroad, and public engagement through a transformative learning environment. MACS offers an undergraduate and graduate minor in CINEMA STUDIES.

Bachelor of Arts in MEDIA

The Bachelor of Arts in MEDIA is a completely online degree program offered by the College of Media. This program is open to students who have earned some college credit but have not completed a degree. The curriculum is built to provide both a broad understanding of the media landscape and the flexibility to pursue specific interests. Students will engage with world-class faculty and a diverse student body, building a strong foundation in advertising, journalism, and media and cinema studies before tailoring your degree with advanced electives.

INSTITUTE OF COMMUNICATIONS RESEARCH

The College also houses the INSTITUTE OF COMMUNICATIONS RESEARCH, an internationally recognized center for interdisciplinary education, scholarship and public engagement in communications and culture in a global economy. Drawing broadly on the social sciences and humanities, the Institute develops new directions in research and has been home to some of the most famous scholars in media and communications.

College of Veterinary Medicine

Transforming animal, human, and environmental health.

Biomedical science. The human-animal bond. Clinical care. Emerging infectious disease. Public health. Food safety. Food productivity. Environmental toxins. Specialized medicine.

It's all connected.

Through rigorous multi-species study, the College of Veterinary Medicine is uniquely positioned to explore **critical connections** among animal and human health, the environment, and agriculture. Through outreach programs and direct services, we touch the lives of thousands of animals and their owners. And through innovative education, we're preparing the next generation of veterinary scientists.

Division of Exploratory Studies

The Division of Exploratory Studies assists students with the process of exploring and declaring majors at the University of Illinois Urbana-Champaign by providing holistic, developmental academic advising. Exploratory Studies offers students the ability to connect with academic advisors who are committed to their success.

The Division of Exploratory Studies helps students:

- Clarify their academic, personal, and career goals;
- Identify their strengths, skills, interests, and values;
- Understand the process of exploring majors at Illinois;
- Identify the programs of study available at Illinois;
- Understand specific programmatic and degree requirements;
- Understand the Intercollegiate Transfer (ICT) process at Illinois;
- Recognize the significance of and their responsibility in the academic advising relationship;
- Learn about and connect with appropriate campus resources and services;
- Learn about the educational opportunities available at the University of Illinois including undergraduate research, study abroad, tutoring, leadership development, involvement in student organizations, volunteer experiences, and connections with faculty.

Students may be enrolled in the Division of Exploratory Studies for up to four semesters before being required to declare a major in one of the undergraduate colleges at Illinois.

Please see the Division of Exploratory Studies website (https://dgs.illinois.edu/) for more specific information about our services and support for students.

Gies College of Business

undergrads@business.illinois.edu

The purpose of the Gies College of Business is to provide an educational experience that will help students develop their potential for leadership and service in business, government, teaching, and research. The undergraduate curricula provide a study of the basic aspects of business and preparation for careers in fields such as accounting, business management, banking, insurance, and marketing.

The curricula, leading to the Bachelor of Science degrees in the various degree programs in business, are based on 124 hours of college work. Students are required to elect courses in other colleges of the university, including mathematics, rhetoric, humanities and the arts, speech, and natural and behavioral sciences, and to secure as liberal an education as possible to avoid the narrowing effects of overspecialization.

The Gies College of Business offers graduate and professional programs in business areas. Detailed information on graduate programs may be obtained from the Graduate College or visit our website (https://giesbusiness.illinois.edu/).

Requirements

Admission

Applicants must meet general university requirements as well as those specified by the Gies College of Business.

Students transferring from other institutions must have met the requirements specified by the college. See our website (https://giesbusiness.illinois.edu/) and the Illinois Office of Undergraduate Admissions (http://admissions.illinois.edu/) for further information.

Mathematics Placement Test

The ALEKS Math Placement Exam is used to place the students in the appropriate math course. The results of the test are used to place students in or to exempt them from algebra and allow them to enroll in a mathematics course required for graduation (see below).

Graduation

Students in the Gies College of Business who meet the university's requirements with reference to registration, residence, and fees and who maintain satisfactory scholastic records in the college are awarded degrees appropriate to their curricula.

Each candidate for a degree must have a 2.0 (A = 4.0) grade point average or above for all courses counted toward graduation, a 2.0 grade point average or above for all courses taken at this university, a 2.0 grade point average or above for all courses taken in the major or field of concentration, and a 2.0 grade point average or above for courses taken in the major or field of concentration at this university.

Students are responsible for meeting the requirements for graduation. Therefore, students should familiarize themselves with the requirements listed in this catalog and other information in the Office of Undergraduate Affairs, 1055 Business Instructional Facility, and should refer to them each time they plan their programs. The Gies College of Business requires that undergraduate degrees be completed in nine semesters or less. If you need assistance with course planning, consult the Office of Undergraduate Affairs.

Mathematics Requirement

Any one of the MATH courses described below meets the Gies College of Business requirement. The most appropriate mathematics course depends on the student's background, interest, motivation, and objectives. Background can be evaluated in terms of mathematics courses already completed and the student's score on the ALEKS Math Placement Exam. Interest, motivation, and objectives must be determined by the student. Courses include MATH 115, MATH 220, MATH 221, MATH 231, MATH 234 (recommended for all students with an ALEKS score of 65 or higher), and STAT 100.

Language Other Than English

Completion of the third semester or equivalent of a language other than English is required. Completion of three years of a single language in high school satisfies this requirement.

Residency

Students must earn no fewer than 60 semester hours of University of Illinois Urbana-Champaign coursework applicable to their degree, including at least 21 credit hours of advanced coursework.

Special Programs

Honors at Graduation

Honors, designated on diplomas, are awarded to superior students as follows: for graduation with honors, a minimum grade point average of 3.5 (A = 4.0) in all courses accepted toward the student's degree; for graduation with high honors, a minimum grade point average of 3.75 in all courses accepted toward the degree; and for graduation with highest honors, a minimum grade point average of 3.90 in all courses accepted toward the degree. To qualify for graduation honors, transfer students' University of Illinois Urbana-Champaign and total cumulative grade point averages both must qualify.

Curricula

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course should be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French, no credit is awarded below FR 102.

Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Departments

Undergraduate instruction in the Gies College of Business is organized under the Departments of Accountancy, Business Administration, and Finance. Each of these departments offers courses that provide one or more curricula that a student may elect. These curricula lead to Bachelor of Science degrees in the various fields of study in the college and are designed to encourage each student to fully realize his or her intellectual promise. There can be changes to curricular requirements and new course offerings.

For the most current information, visit our advisors in 1055 Business Instructional Facility, our website (https://giesbusiness.illinois.edu/) and department pages:

- Accountancy (https://giesbusiness.illinois.edu/accountancy/)
- Business Administration (https://giesbusiness.illinois.edu/business-administration/)
- Finance (https://giesbusiness.illinois.edu/finance/)

Majors

- Accountancy (p. 12)
- Accountancy + Data Science, BS (p. 14)
- Business + Data Science, BS (p. 151)
- Business Undeclared (p. 153)
- Finance (p. 357)
- Finance + Data Science, BS (p. 359)
- Information Systems (p. 446)
- Management (p. 535)
- Marketing (p. 537)
- Operations Management (p. 672)
- Strategy, Innovation, and Entrepreneurship, BS (p. 782)
- Supply Chain Management (p. 812)

Minors

- Business Analytics (p. 946)
- Business for Non-Business Majors (p. 946)
- Technology & Management (p. 1028)

Graduate Degree Programs in Accountancy

- Majors
  - Accountancy, MAS (p. 1052)
    - optional concentrations
      - Corporate Governance & International Business (p. 2003)
      - Data Analytics in Accountancy (p. 2005)
      - Finance (p. 2024)
      - Financial Reporting & Assurance (p. 1053)
      - Information Technology & Control (p. 2036)
      - Leadership and Organizational Management (p. 2038)
      - Marketing (p. 2041)
      - Real Estate (p. 2047)
      - Supply Chain Management (p. 2057)
      - Taxation (p. 2059)
  - Accountancy, MS (p. 1056) (on campus & online)
    - optional concentrations
      - Accountancy Analytics (p. 1058) (online)
      - Corporate Governance & International Business (p. 2003)
      - Data Analytics in Accountancy (p. 2005)
      - Digital Marketing (p. 2013)
      - Entrepreneurship & Strategic Innovation (p. 2020)
      - Finance (p. 2024)
      - Global Challenges in Business (p. 2026)
      - Information Technology & Control (p. 2036)
      - Supply Chain Management (p. 2057)
      - Taxation (p. 2059)
  - Accountancy, PhD (p. 1060)
- Minors
  - Accountancy (p. 2125)
- Certificates
  - Accounting Data Analytics, GCRT (p. 2064) (online)
  - Accounting Foundations, GCRT (p. 2066) (online)
  - CPA Pathways, GCRT (p. 2079) (online)
  - Taxation, GCRT (p. 2118) (online)

Graduate Degree Programs in Business Administration

- Majors
  - Business Administration, MBA (http://catalog.illinois.edu/graduate/bus/business-administration-mba/) (Full-Time)
    - optional concentrations
      - Accountancy (p. 1993)
      - Corporate Governance & International Business (p. 2003)
      - Information Technology & Control (p. 2036)
      - Real Estate (p. 2047)
      - Supply Chain Management (p. 2057)
  - Business Administration, MBA (p. 1208) (online-iMBA)
  - Business Administration, MS (http://catalog.illinois.edu/graduate/bus/business-administration-ms/)
    - optional concentrations
      - Accountancy (p. 1993)
      - Corporate Governance & International Business (p. 2003)
      - Supply Chain Management (p. 2057)
  - Management, MS (p. 1639)

    - Technology Management, MS (p. 1939)
        - optional concentrations
            - Accountancy (p. 1993)
            - Business Data Analytics (p. 2000)
            - Consumer-Centric Innovation and Design (p. 1942)
            - Finance (p. 2024)
            - Information Technology & Control (p. 2036)
            - Supply Chain Management (p. 2057)
    - Business Administration, PhD (p. 1212)
- Minors:
    - Information Technology & Control (p. 2157)
    - Corporate Governance & International Business (p. 2140)
    - Supply Chain Management (p. 2176)
- Concentrations:
    - Business Data Analytics (p. 2000)
    - Corporate Governance & International Business (p. 2003)
    - Information Technology & Control (p. 2036)
    - Leadership and Organizational Management (p. 2038)
    - Marketing (p. 2041)
    - Supply Chain Management (p. 2057)
- Certificates
    - Digital Marketing, GCRT (p. 2083) (online)
    - Entrepreneurship & Strategic Innovation, GCRT (p. 2085) (online)
    - Financial Management, GCRT (p. 2087) (online)
    - Global Challenges in Business, GCRT (p. 2092) (online)
    - Healthcare Innovation, Design, and Entrepreneurship, GCRT
    - Managerial Economics & Business Analysis, GCRT (p. 2113) (online)
    - Mergers & Acquisitions GCRT (p. 2115)(online)
    - Strategic Leadership Management, GCRT (p. 2118) (online)
    - Value Chain Management, GCRT (p. 2120) (online)

Graduate Degree Programs in Finance

- Majors
    - Financial Engineering, MS (p. 1449) (administered by Finance and (https://msfe.illinois.edu/)Industrial & Enterprise Systems Engineering)
    - Finance, MS (p. 1442)
        - optional concentrations
            - Accountancy (p. 1993)
            - Corporate Governance & International Business (p. 2003)
            - Information Technology & Control (p. 2036)
            - Quantitative Finance (p. 1444)
    - Finance, PhD (p. 1446)
- Minors
    - Finance (p. 2146)
- Concentrations
    - Finance (p. 2024)
    - Real Estate (p. 2047)

Grainger College of Engineering

As one of the world's top-ranked engineering institutions, the University of Illinois Urbana-Champaign's Grainger College of Engineering is a leader in engineering education, research, and public engagement. Our diverse, tight-knit community of faculty, students, and alumni set the standard for excellence in engineering, driving innovation in the economy and bringing revolutionary ideas to the world. Collectively, we are thinking and designing to solve the world's greatest challenges, every day.

Academic Departments (https://grainger.illinois.edu/about/departments/)

- Aerospace Engineering (https://aerospace.illinois.edu/)
- Agricultural & Biological Engineering (https://abe.illinois.edu/)
- Bioengineering (https://bioengineering.illinois.edu/)
- Chemical and Biomolecular Engineering (https://chbe.illinois.edu/)
- Civil & Environmental Engineering (https://cee.illinois.edu/)
- Siebel School of Computing and Data Science (https://cs.illinois.edu/)
- Electrical & Computer Engineering (https://ece.illinois.edu/)
- Industrial & Enterprise Systems Engineering (https://ise.illinois.edu/)
- Materials Science & Engineering (https://matse.illinois.edu/)
- Mechanical Science & Engineering (https://mechse.illinois.edu/)
- Nuclear, Plasma & Radiological Engineering (https://npre.illinois.edu/)
- Physics (https://physics.illinois.edu/)

Interdisciplinary Units

- Computational Science and Engineering (https://cse.illinois.edu/)
- Technology Entrepreneur Center (https://tec.illinois.edu/)

Grainger Research Institutes and Centers (https://grainger.illinois.edu/research/institutes-centers/)

- Coordinated Science Laboratory (https://csl.illinois.edu/)
- Holonyak Micro & Nanotechnology Lab
- Materials Research Laboratory (https://mrl.illinois.edu/)

Majors

- Aerospace Engineering, BS (p. 21)
- Aerospace Engineering, BS-MS (p. 875)
- Agricultural & Biological Engineering, BS (p. 28)
  - Bioprocess Engineering and Industrial Biotechnology Concentration (p. 30)
  - Off-Highway Vehicle and Equipment Engineering Concentration (p. 33)
  - Renewable Energy Systems Engineering Concentration (p. 35)
  - Soil and Water Resources Engineering Concentration (p. 38)
  - Sustainable Ecological and Environmental Systems Engineering Concentration (p. 41)
  - Synthetic Biological Engineering Concentration (p. 43)
- Agricultural & Biological Engineering, BS and Agricultural & Biological Engineering, BSAG (p. 47) (Dual Degree Program)
- Bioengineering, BS (p. 144)
- Civil Engineering, BS (p. 176)
- Computer Engineering, BS (p. 218)
- Computer Science, BS (p. 225)
- Computer Science, BS-MCS (p. 888)
- Computer Science, BS-MS (p. 891)

- Computer Science + Bioengineering, BS (p. 237)
- Computer Science + Physics, BS (p. 266)
- Electrical Engineering, BS (p. 311)
- Engineering Mechanics, BS (p. 321)
- Environmental Engineering, BS (p. 354)
- Industrial Engineering, BS (p. 439)
- Innovation, Leadership & Engineering Entrepreneurship, BS (p. 449) (ILEE)
- Materials Science Engineering, BS (p. 539)
- Materials Science & Engineering + Data Science, BS (p. 543)
- Mechanical Engineering, BS (p. 561)
- Neural Engineering, BS (p. 647)
- Nuclear, Plasma, & Radiological Engineering, BS (p. 652)
  - Nuclear, Plasma, and Radiological Engineering: Plasma & Fusion Science & Engineering, BS (p. 655)
  - Nuclear, Plasma, and Radiological Engineering: Power, Safety & Environment, BS (p. 659)
  - Nuclear, Plasma, and Radiological Engineering: Radiological, Medical & Instrumentation Applications, BS (p. 662)
- Nuclear, Plasma, and Radiological Engineering + Data Science, BS (p. 667)
- Physics, BS (p. 677)
- Systems Engineering and Design, BS (p. 819)

Minors

- Bioengineering (p. 945)
- Computational Science & Engineering (p. 952)
- Computer Science (http://catalog.illinois.edu/undergraduate/minors/cs/)
- Electrical & Computer Engineering (p. 963)
- International Minor in Engineering (p. 964)
- Materials Science & Engineering (p. 1000)
- Physics (p. 1008)
- Semiconductor Engineering (p. 1016)
- Technology & Management (p. 1028)

Graduate Degree Programs

Informatics Programs

Informatics Programs at the University of Illinois offers a Ph.D. in Informatics (p. 1563), Undergraduate minors in Informatics (p. 987), and Game Studies & Design (p. 970). Informatics also manages the campus-wide Master of Science in Bioinformatics (p. 1181). All are interdisciplinary programs with many participating departments. Students can earn the Master of Science in Bioinformatics with a concentration in one of the following departments: Animal Sciences, Crop Sciences, Information Sciences, or Computer Science. The program is overseen by Informatics Programs, but students are members of the department of their concentration. Students can earn the Ph.D. in Informatics with specializations in Bioinformatics; Health and Medical Informatics; Spatial Informatics; Art and Cultural Informatics; Design, Technology, and Society; Data Analytics and Information Visualization; Cognitive Science and Language Processing.

GSD Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/GSD/)

Game Studies Design Courses

GSD 101 Introduction to Game Studies and Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/101/)
This broad survey course will provide students across campus an introduction to interdisciplinary game studies, covering both historical/social perspectives and game design. It will explore humanities, social science understandings of play, and the social contexts from which our games and gaming practices arise, as well as the development and consequences of gaming cultures. This course will serve as a broad introduction to issues covered in greater depth in upper-level courses available for students pursuing an Undergraduate Minor in Game Studies & Design.

GSD 102 Introduction to the Videogame Industry credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/102/)
Designed to introduce individuals to the Video Game Industry, its history, current status, processes and future. It includes a survey of the positions and information about how to prepare to enter the Industry.

GSD 103 The Basics of Game Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/103/)
Will introduce you to the tools and principles of game design, as well as the history of game studies and the maker movement. You will learn some of the introductory tools and techniques for rapid prototyping along with exploring games, their history, impacts, and design.

GSD 190 Explorations in Games credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/190/)
Exploratory study or skills-based instruction in an emerging or special topic related to Game Studies and Design not covered in normal course offerings. Approved for Letter and S/U grading. May be repeated if topics vary. Prerequisite: Consent of instructor. Other prerequisites as specified for each topic offering. See Class Schedule.

GSD 199 Individual Study credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/199/)
Individual study in a subject related to game studies & design not covered in normal course offerings. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of Instructor. Restricted to Freshmen and Sophomores.

GSD 202 Let's Play: Understanding the Role of Play in Life and Art credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/202/)
Explores the ways that play is integrated into our socio-cultural fabric. Students will develop a broad understanding of play in different contexts: its history, play and nature, play in human development, learning, play spaces, games, art, and in futurist thinking. Chief among the goals for the course is an emphasis on play as a fundamental and enriching force for people of all ages, and something to cultivate in life and in art.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

GSD 204 Gender in Gaming credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/204/)
Examines the history of gender in videogames, focusing on how the embodied elements of play as well as the spatial logics of games function to promote and resist representation, as well as how games designed by women and people of color are transforming how and why we play games. Same as ENGL 277, GWS 204, and MACS 204.

GSD 282 VRchaeology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/282/)
Introduces concepts and methodologies used in archaeological field research. VRchaeology will focus on critical thinking and problem-solving skills through participation in virtual excavation, artifact recovery, analysis, and interpretation. VRchaeology will include weekly activities in virtual reality (VR) where students will use empirical evidence to uncover and reconstruct pieces of the past. Students must be willing and able to use the Meta Quest3 VR system.

GSD 325 Theatrical Tabletop Role-Playing Game Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/325/)
Same as THEA 385. See THEA 385.

GSD 390 Special Topics in Game Studies & Design credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/390/)
Advanced study or skills-based instruction in an emerging or special topic related to Game Studies and Design not covered in normal course offerings. Approved for both Letter and S/U grading. May be repeated if topics vary.

GSD 399 Advanced Individual Study credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/399/)
Advanced individual study in a subject related to game studies & design not covered in normal course offerings. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of Instructor. Restricted to Juniors and Seniors.

GSD 403 An Introduction to Top Down Video Game Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/403/)
The emphasis of this course is on developing an understanding of top down video game design using the various design methodologies and tools introduced in class. Students will form small groups (4-6) and work on their own design within a selected genre (to be determined at the beginning of the semester). Areas of focus include high level design vision, audience evaluation, User Interface and its impact on the design, iteration of a series of design documents (high, medium and low level) and the team dynamics of communication, critique and integration. The goal of the class is to have the small teams use the concepts and the tools taught in class to create a complete design document that will be cataloged for later use. 3 undergraduate hours. 3 graduate hours.

GSD 405 Introduction to the Video Game Development Process credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/GSD/405/)
The emphasis of this course is understanding the video game development process as seen in current Game Studios. The course will focus on key elements of the process including the development timeline, scheduling, prototyping, iteration, QA, game builds and player research. The goal will be to take a design document from a catalog of designs that have already been created and implement one or more of them using the game development process. 3 undergraduate hours. 3 graduate hours. Credit is not given for GSD 405 and INFO 490 DC "The Video Game Dev Process" sections.

GSD 409 Design & Programming of Narrative Games & Simulations credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/409/)
Introduction to the narrative design process for the authoring of text-based digital games and simulations. You will become proficient in Inform 7, a programming language and design system for parser-based interactive fiction (IF). By the end of the semester you will have developed a game or literary work of IF and made a substantive contribution to a collaborative project. No prior programming knowledge is required for students to be successful in the course. Students will be expected to bring a laptop to class. Please note that this course teaches design and programming techniques for "parser-based" interactive fiction, and does not cover Twine, or other hyper-text based interactive narrative systems. 3 undergraduate hours. 4 graduate hours. Credit is not given for GSD 409 and INFO 490 JP, JPU or JPG "Design & Prog Text Based Games" sections.

GSD 411 Interactive Fiction with Twine credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/411/)
This studio course explores the intersection of interactivity and the written word—encompassing fiction, nonfiction, and poetry. Although many of the works examined in the course contain gameplay mechanics, the course's focus is on the expressive possibilities of interactive storytelling. Students will create hypertext narratives using Twine software. No prior programming experience is assumed. 3 undergraduate hours. 4 graduate hours.

GSD 419 The stu/dio Capstone Course credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/419/)
An experiential learning project-based course built within the framework of a game or interactive media development project. The framework will be provided by the instructor, with the support of The stu/dio (a student-run game development studio) leads. Students will work in teams, and be guided in learning the fundamentals of one or more of the game development disciplines (Programming, Design, Art/Audio, Production/Project Management) to develop and/or produce a part of the overall project. 4 undergraduate hours. No graduate credit. May be repeated in the same term up to 8 undergraduate hours or in separate terms up to 16 undergraduate hours. Prerequisite: Any one of the following: GSD 403 and GSD 405, or by consent of instructor.

GSD 490 Advanced Special Topics in Game Studies & Design credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/490/)
Topics of current interest. Advanced study in an emerging or special topic related to Game Studies and Design not covered in normal course offerings. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated if topics vary. Prerequisite: Consent of instructor. Other prerequisites as specified for each topic offering. See Class Schedule.

GSD 500 Colloquium in Game Studies & Design credit: 0 to 1 Hours. (https://courses.illinois.edu/schedule/terms/GSD/500/)
This once weekly orientation to graduate study in games studies and game design at the University of Illinois will be offered in fall semesters and will feature presentations of research and professional activities by faculty, advanced graduate students, and staff who will share their game-related research and design projects and provide students with a broad introduction to critical, theoretical and methodological approaches to the field. Some sessions will meet in labs and makerspaces around campus, familiarizing students with facilities and support services available to them for their own research and design projects. Students are required to take this course once for credit. Graduate students enrolled in the Graduate Minor will be expected to return to the seminar as a guest speaker near the end of their program, to share their work. Approved for S/U grading only. May be repeated for 1 credit only once, or for 0 credit multiple times.

GSD 502 Seminar in Game Studies credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/502/)
An in-depth interdisciplinary exploration of significant areas of social, psychological, historical, and critical inquiry in game studies. Course readings and guest speakers will help to stimulate discussion on theoretical approaches, methodological issues and other aspects of contemporary game studies research to provide an intellectual community for students across academic disciplines. Students will have the opportunity to share their work, and their particular disciplinary approaches to game studies during the semester.

GSD 503 Seminar in Game Design credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/503/)
This team-taught seminar provides students an in-depth exploration of game design methodologies across a range of modalities (board games, interactive narrative games, role-playing games, video games, escape rooms). This course is meant to create an intellectual community for game studies minors whose main interest is in the design and development of games, either by themselves, or with applications in their own disciplinary areas. Guest speakers from participating units across campus will present their work as it pertains to game design and development. Graduate level readings will address contemporary game design challenges. Students who take this course as part of their minor degree will be expected to return to the seminar as a guest speaker near the end of their program, to share their game design accomplishments or ongoing work.

GSD 511 Game Development I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/511/)
The focus of this course is on implementing professional studio business practices into the planning of interactive projects. Areas of focus include high level design vision, audience evaluation, User Interface and its impact on the design, iteration of a series of design documents (high, medium and low level) and the team dynamics of communication, critique and integration.#Students will create work plans, development documents, and a prototype for a collaborative game project.

GSD 512 Game Development II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/512/)
The emphasis of this course is understanding the video game development process, emphasizing key elements of the process including the development timeline, scheduling, prototyping, iteration, QA, game builds and player research. Students will implement a pre-existing design document: Creating work plans, development documents, and collaborate on a final game. This course guides students in incorporating professional studio business practice, including contemporary remote collaborative tools, managing asynchronous communication, and cross-cultural work skills. Prerequisite: GSD 511.

GSD 513 Practicum in Game Development I credit: 8 Hours. (https://courses.illinois.edu/schedule/terms/GSD/513/)
Students enrolled in this course receive credit for remote participation on a project in our student-run, campus-based studio (the Stu/dio) providing professional training and experience within their concentration. Students will work with department heads to create assigned set pieces, production tools, and other assets that will be incorporated into campus-based client projects for learning and research. Practicum experiences will be supervised by an in-studio affiliated faculty member. May be repeated in separate terms up to 32 hours. Prerequisite: GSD 511 and GSD 512.

GSD 514 Practicum in Game Development II credit: 4 to 8 Hours. (https://courses.illinois.edu/schedule/terms/GSD/514/)
Students enrolled in this course receive credit for their internship in a partner game industry studio providing professional training and experience within their concentration. Students will work with department heads to create assigned set pieces, production tools, and other assets specific to their concentration that will be incorporated into a studio based project within the industry. Students' practicum experiences will be supervised by a GSD affiliated faculty member and by the GSD internship coordinator. May be repeated in separate terms up to 32 hours.

GSD 515 Professionalization Seminar: Portfolio Production & Personal Branding credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/515/)
The focus of this course is on preparing students to professionally present themselves and their work. Students will research ways in which perception affects perceived employability. Social concepts such as professional presentation, personal boundaries, cultural expression, and workplace culture will be explored. Students will create social media profiles, websites, and published portfolios which will be reviewed by in-class peers as well as industry professionals. Students will culminate their experience by applying for a studio position. Prerequisite: At least 4 GSD 500-level courses in the Master's program.

GSD 519 The stu/dio Immersive Experience Capstone Course credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/519/)
An experiential learning project-based course to develop a virtual or extended reality experience within the framework of a real-world game or interactive media development project. Students will apply knowledge gained in previous courses to research development methods and build their own processes that support the overall development effort. Students are expected to adhere to a development cycle including meeting with clients to determine specifications, design proposals, prototype development, testing/feedback and revision. May be repeated in the same term up to 16 Graduate hours or in separate terms for unlimited Graduate hours.

GSD 520 Tools and Techniques of Game Art credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/520/)
Allows for affiliated Game Studies & Design faculty to propose and offer new courses on emerging and special game art topics of immediate interest. Students will experience an in-depth exploration of significant and emerging tools, methods, and concepts of game art and design. 1 TO 4 graduate hours. 1 TO 4 professional hours. May be repeated up to 8 hours in same semester or up to 12 hours in separate semesters, if topics vary. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 521 Tools & Techniques: Contemporary Techniques for 2D Art for Games credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/521/)
In-depth survey of tools and techniques for creating 2D art assets for games. The course is designed to develop students' skills and knowledge of creating visually appealing and functional 2D game art, including characters, environments, and UI elements. Students are expected to have prior experience and training in 2D art. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 522 Tools & Techniques: Contemporary Techniques of 3D Art for Games credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/522/)
Advanced techniques for exploring modern 3D artistry for game development. From characters to environments, students will gain a comprehensive skillset in creating immersive game visuals, equipping them with 3D modeling and design to craft captivating game assets, building a strong foundation for Game Art Development. Blender, a powerful 3D creation software used by game development and special effects studios, will be used; students are expected to be familiar with Blender's interface, navigation, and tools. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 523 Tools & Techniques: Contemporary Techniques of 3D Animation for Games credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/523/)
The principles and techniques of creating 3D animation. Students will develop basic skills and knowledge in 3D modeling and rigging, as well as the fundamentals of animation principles. The course will utilize Blender to create a variety of animation projects. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 529 The Art of Games credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/529/)
Allows for affiliated Game Studies & Design faculty to propose and offer new courses on emerging and special game art topics of immediate interest. Students will study concepts of game art and design in the context of one or more game genres. May be repeated up to 8 hours in same semester or up to 12 hours in separate semesters, if topics vary. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 530 Tools & Techniques of Game Design credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/530/)
Allows for affiliated Game Studies & Design faculty to propose and offer new courses on emerging and special game design topics of immediate interest. Students will experience an in-depth exploration of significant and emerging tools, methods, and concepts of game design and game development. May be repeated up to 8 hours in same semester or up to 12 hours in separate semesters, if topics vary. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 531 Tools & Techniques: Contemporary Techniques in Game Design credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/531/)
Examination of key elements of high and mid-level design and how they are used in games. Students will critically examine a series of games looking for how the key elements of design are used or not used. Games will be examined for positive and negative design aspects. Consideration will be given to different genres, time periods (early games will be included), acclaim (via ratings and sales) and platform. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 540 Tools & Techniques of Game Production credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/540/)
Allows for affiliated Game Studies & Design faculty to propose and offer new courses on emerging and special game production topics of immediate interest. Students will experience an in-depth exploration of significant and emerging tools, methods, and concepts of game production and development. May be repeated up to 8 hours in same semester or up to 12 hours in separate semesters, if topics vary. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 541 Tools & Techniques: Contemporary Techniques of Game Production credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/541/)
The phases of the video game production process, how they are managed, and the potential for issues that can arise in the development cycle. Students will work as schedulers and team managers within a simulation of the development cycle for a major video game. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 550 Tools & Techniques of Game Programming credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/550/)
Allows for affiliated Game Studies & Design faculty to propose and offer new courses on emerging and special game programming topics of immediate interest. Students will experience an in-depth exploration of significant and emerging tools, methods, and concepts of game programming and development. May be repeated up to 8 hours in same semester or up to 12 hours in separate semesters, if topics vary. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 551 Tools & Techniques: Contemporary Techniques for Programming of Games credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/551/)
Special systems and techniques used by programmers in video game development. Students will learn and apply the tools and algorithms that are key to developing video games in the current and coming marketplace. Prerequisite: Credit or concurrent enrollment in GSD 511 or consent of instructor.

GSD 560 Tools & Techniques of Game Narrative credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/560/)
Allows for affiliated Game Studies & Design faculty to propose and offer new courses on emerging and special game narrative topics of immediate interest. Students will experience an in-depth exploration of significant and emerging tools, methods, and concepts of game narrative. May be repeated up to 8 hours in same semester or up to 12 hours in separate semesters, if topics vary. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 561 Tools & Techniques of Game Narrative: Contemporary Techniques in Writing for Games credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/561/)
Introduction to writing for games. The purpose of this course is to help writers with experience in other media to understand the nuances of writing for games. Video games writers have the responsibility to incorporate the “reader”/player into the writing in ways that other media does not. They must not only incorporate story elements, but also puzzles, organizational principles, and the consideration of multiple branches and scenarios. This course will help traditional writers become more dynamic, and interactive writers will learn to hone their craft. Prerequisite: Credit or concurrent enrollment in GSD 511, or consent of instructor.

GSD 590 Special Topics in Game Studies & Design credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/590/)
Allows for affiliated Game Studies & Design faculty to propose and offer new courses on emerging and special topics of immediate interest. Students will experience an in-depth exploration of significant and emerging areas of social, psychological, historical, and critical game studies, focusing on theoretical approaches, methodological issues and aspects of contemporary game studies research and/or design. Approved for Letter and S/U grading. May be repeated up to 8 hours in same or separate semester to a total of 24 hours as topics vary.

GSD 597 Independent Study in Game Studies & Design credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/GSD/597/)
Advanced individual study in a subject related to Game Studies and Design not covered in normal course offerings. Project examples include comprehensive literature reviews on a topic of special or emerging interest, small research projects (e.g. surveys or play-testing experiments), development projects (e.g. building a game based on a design developed as part of another course), or other study approved by the instructor. Pre-approval is required and an approved advisor must commit to supervise the independent study. Approved for Letter and S/U grading. May be repeated in separate semesters to a total of 12 hours.

INFO Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/INFO/)

Informatics Courses

INFO 102 Little Bits to Big Ideas credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/102/)
Broad introduction to the nature, capabilities, and limitations of computing. Topics range from the way data is represented and stored, to the way today's computers work, to the general ideas of algorithms and computational efficiency, to the future of computing. Covers "Great Ideas" across various areas of the field, including, for example, cryptography and internet security, problem solving, modeling and simulation, and artificial intelligence. Same as CS 102.

INFO 199 Undergraduate Open Seminar credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/199/)
May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of instructor.

INFO 202 Social Aspects Info Tech credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/202/)
Same as IS 202 and MACS 202. See IS 202.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

INFO 303 Writing Across Media credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/303/)
The ability to communicate effectively in multiple types of media is a crucial part of literacy in our society. In this course, students will explore the intersections of various media: print, film, images, sound, etc. Students will consider the ways in which writing--as an object and as a practice--is shaped by multimodal interactions. Also integrates practical activities with broader theoretical issues in order to provide effective strategies for designing multimedia presentations, projects, and texts that integrate photography, video, and sound. Same as WRIT 303.
This course satisfies the General Education Criteria for:
Advanced Composition

INFO 310 Computing in the Humanities credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/310/)
Same as IS 310. See IS 310.

INFO 326 New Media, Culture & Society credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/326/)
Same as MACS 326. See MACS 326.

INFO 333 User Experience Design In Action credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/333/)
Introduction to principles and techniques of user experience design. Explore UX from different angles, including visual and sensory components, infrastructure and data, and social science evaluation and research methods. Hands-on assignments relate to tried-and-true methods like rapid prototyping, usability or multimodal communication, and emergent areas such as AI-based generation or interactive data visualization. Prerequisite: Restricted to sophomore standing or above.

INFO 345 Digital & Gender Cultures credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/345/)
Same as GWS 345, MACS 345, and SOC 345. See MACS 345.

INFO 390 Special Topics credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/390/)
Explores a variety of informatics topics. Topics and prerequisites vary by section; see current Class Schedule for details. May be repeated up to 6 hours if topics vary.

INFO 399 Individual Study credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/399/)
Individual study in a subject related to informatics not covered in normal course offerings. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of instructor.

INFO 407 Introduction to Programming Python for Data Science credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/407/)
For students who want to learn about solving problems common in data sciences but have little or no programming experience. The class is asynchronous (students can access material on-line but within specified timeframes) and taught online. Data Science lies at the intersection of statistics and computer science and focuses on extracting information from data. This class will immerse students on topics of software construction, design, programming paradigms and the semantic and syntax of the Python language and then focus on some of the necessary workflows to move raw data into information. The class will explore common Python modules (libraries) used in data science, natural language processing, statistics, mathematics, data management (acquiring, cleaning, reshaping, organizing, persisting) and visualizations. 3 undergraduate hours. 3 graduate hours. Credit is not given toward graduation for BOTH INFO 407 and INFO 490 MH "Intro to Prog for the Data Science" sections.

INFO 415 Makerspace: Open Studio credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/415/)
Introduces learners to a variety of rapid prototyping and fabrication techniques in collaboration with the CU Community Fab Lab. Weekly class lecture will introduce students to trends and ideas in Makerspaces, Peer-to-Peer learning, design processes, creativity, computational thinking, and practicing makers. Each week students will be provided a general project prompt and set to work with a tool area in response to a simple design exploration challenge. Over the course of the semester they will have an opportunity to become familiar with the basics of several advanced small-scale manufacturing tools, such as 3D printers, laser engravers, digital embroidery machines, graphic drawing tablets and small board electronics. The class will have both group and independent work and make use of an online portal for assignment hand-in and peer-feedback. Please note that this course will emphasize self-guided learning and time management, students will need to rely on online tutorials and information resources to explore methods and complete much of the work in a rapid-response fashion; students will need to come into FabLab open hours outside of normal lab times to complete projects. Projects will be small and contained, in order to allow for exposure to several tools and mediums. Students who have taken a different Makerspace course at the FabLab previously are eligible to participate in this class, but it is also not a requirement. Graduate students will have an additional documentation project component emphasizing digital literacy. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. Credit is not given for INFO 415 and INFO 490 ALU/ALG "Makerspace: Open Studio" sections.

INFO 416 Makerspace: Game Studies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/416/)
A foray into game studies via makerspace production mediums. Students will study the role of play, tinkering and gaming in design, research and innovation and be challenged to learn a variety of makerspace production tools and techniques to create games. This course will include three major components (1) physical board game design, (2) introductory computer game design and (3) investigation into the narrative themes, artistic production, interaction mechanics and culture that make games engaging. During the course, students will prototype both playable board and video games, followed by iterating through to a final version of a game of their choice. Class will meet in the CU Community Fab Lab in Art Annex II. Students who have taken a different makerspace class before are encouraged to enroll. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. Credit is not given for INFO 416 and INFO 490 A/AG "Makerspace: Game Studies" sections.

INFO 418 Makerspace: Escape Rooms credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/418/)
This course will explore the intersection of storytelling, interaction design, and user experience through the design of escape rooms. In the past couple years escape rooms have been on the rise, changing from simple locked boxes in an open room to complex adventures spanning multiple rooms involving electronics, sound design, storytelling, and even live actors. This class will be primarily focusing on the manufacturing and electronics work that goes into making an immersive escape room experience. Over the span of the course, students will become familiar with the basics of several advanced small-scale manufacturing tools, such as laser engravers, electronic cutters, and 3D printers/scanners. They will also learn how to program small-board electronics (Arduinos and IoT boards, servos, electronic locks, and/or lights), and incorporate them meaningfully into puzzles in order to achieve client's goals. Students will design, prototype, playtest, and iterate collaboratively on the puzzles and interactive elements. 3 undergraduate hours. 4 graduate hours. Credit is not given for INFO 418 and INFO 490 B, BG, ERU or ERG "Makerspace: Escape rooms" sections.

INFO 419 Makerspace: Learning in Community credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/419/)
Explores the history and function of community and education-oriented makerspaces. Students will evaluate emergent makerspace curricula for learning in formal environments (e.g., schools), and informal settings (e.g., libraries). Includes community site visits to observe informal STEAM programs. A final project will involve the development of a makerspace workshop activity to be used at a community event. Students will be familiarized with several methods of teaching and learning rapid prototyping and iterative design techniques. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. Prerequisite: INFO 415 strongly encouraged, either prior to taking INFO 419, or with concurrent enrollment.

INFO 424 Musical Informatics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/424/)
A 21st century approach to music theory: fundamental elements of music illustrated through logical and mathematical concepts, unencumbered by stylistic considerations. Defines the internal structure of sounds and presents a few general methods of organizing them into complex compositions. Intended for musicians having limited familiarity with mathematics, as well as scientifically inclined students with little musical background. 3 undergraduate hours. 4 graduate hours.

INFO 427 Data, Machines and the Python credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/INFO/427/)
A continuation to the introductory course on Data Science (INFO 407). This advanced course on Data Science is completely taught online and scheduled asynchronously (you decide where it best fits in your week). The course consists of several tracks including Machine learning and advanced Python skills. There will be lessons that guide you to learn advanced techniques in data science and you will also be introduced to machine learning algorithms. In addition, there will be a few lessons that help you advance your Python knowledge and software development skills. This course can mainly be considered as an applied course where you will learn by doing. In many cases, you will first write a reduced implementation before using an established library. The second half of the course will be focused on data driven individual projects along with weekly lessons. 3 undergraduate hours. 3 graduate hours. Credit is not given for INFO 427 and INFO 490 MH2 "Data, Machines and the Python" sections. Prerequisite: Students should have either taken INFO 407; OR Have at least 1 year of programming experience using Python; OR Be comfortable with NumPy, Pandas, Matplotlib, NLTK; OR Have a strong ability and passion for learning. Junior, Senior or Graduate standing.

INFO 448 Computer Music credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/448/)
Introduction to the multiple ways computers are used in music, with an emphasis on digital sounds synthesis and composition. Elements of acoustics, psychoacoustics, and programming are introduced in order to allow students to use and modify the existing software DISSCO/Sound Maker developed at UIUC. 3 undergraduate hours. 4 graduate hours.

INFO 490 Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/490/)
Topics of current interest. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated if topics vary. Prerequisite: Consent of instructor. Other prerequisites as specified for each topic offering. See Class Schedule.

INFO 491 Ugrad Bioinformatics Seminar credit: 0 to 2 Hours. (https://courses.illinois.edu/schedule/terms/INFO/491/)
Introduces the field of bioinformatics and computational biology. Same as CPSC 491. 0 to 2 undergraduate hours. No graduate credit. Approved for Letter and S/U grading. May be repeated in separate terms to maximum of 2 undergraduate hours. Prerequisite: Consent of instructor.

INFO 500 Orientation Seminar credit: 0 or 1 Hours. (https://courses.illinois.edu/schedule/terms/INFO/500/)
A broad introduction to faculty research in each Informatics Area. Consists of weekly presentations by Informatics faculty highlighting their recent research, practice, and related concepts. Approved for S/U grading only. May be repeated in separate terms to a maximum of 2 hours. Prerequisite: Graduate standing in any field.

INFO 510 Research Practicum credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/510/)
A one semester directed research project supervised by a member of the informatics faculty in the student's area of specialization or closely related area. These are intended to be practical research, not just literature surveys, and must have a definite output such as a paper or demonstration project. The research should be relevant to the thesis work or preparatory work to support the thesis. Informatics students must take two semesters, usually each semester should be under a different Informatics faculty member, but with the concurrence of their advising committee both may be taken under a single faculty member. Approved for S/U grading only. May be repeated in separate terms to a maximum of 8 hours. Prerequisite: Graduate standing in any Informatics.

INFO 555 Advanced Educational Technologies for Engagement and Interactive Learning credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/555/)
Same as CI 555 and EPSY 555. See EPSY 555.

INFO 590 Advanced Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/590/)
Subject offerings of new and developing areas of knowledge in Informatics, intended to augment existing curriculum. See Class Schedule for specific topics and prerequisites. May be repeated if topics vary. Prerequisite: Graduate Student Standing.

INFO 591 Grad Bioinformatics Seminar credit: 0 to 2 Hours. (https://courses.illinois.edu/schedule/terms/INFO/591/)
This seminar series focuses on research in the field of bioinformatics and computational biology. Same as ANSC 591 and CPSC 591. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Consent of instructor.

INFO 597 Individual Study credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/INFO/597/)
Individual study in a subject related to informatics not covered in normal course offerings. May be repeated in same term for a maximum of 8 hours or separate terms for a maximum of 16 hours if topics vary. Prerequisite: Consent of instructor.

INFO 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/INFO/599/)
Research for Ph.D. thesis. Approved for S/U grading only. May be repeated in separate terms. Prerequisite: Instructor approval required.

School of Social Work

School of Social Work
Dean: Benjamin Lough

Undergraduate Programs:
major: Social Work, BSW (http://catalog.illinois.edu/undergraduate/bs_socw/)
minor: Social Work (p. 1019)

Overview of Curriculum and Requirements
The purpose of undergraduate social work education at the School of Social Work is to provide a comprehensive educational experience for students that is grounded in a liberal arts tradition and prepares graduates for excellence in the areas of social work practice, policy, social engagement, and leadership.

Upon degree completion, graduates will be prepared for entry into generalist social work practice, advanced standing in graduate social work education, and a multitude of career opportunities. These can include careers in communications, corrections, education, government, healthcare, human resources, law, non-profit organizations, religious studies, and public service. Obtaining an undergraduate degree in Social Work gives students the opportunity to pursue a License of Social Work (LSW). A BSW degree allows students to pursue Advanced Standing status in many Master of Social Work (MSW) programs. The advanced standing status enables BSW graduates to receive an MSW in only one year.

The focus of undergraduate curriculum delivery is through a student-centered strengths-based educational model that fosters student understanding by providing a challenging, yet supportive environment of high expectations that encourage the development of well-informed and engaged citizens.

Experiential Learning Fee
The University of Illinois Board of Trustees approved an experiential learning fee in 2010 that is assessed to all Bachelor of Social Work majors to help cover part of the extensive faculty resources required to provide enriched social work learning opportunities. **A one-time fee of $900 will be charged to BSW students once the student has earned 60-89.9 progress hours, including transfer hours.**

  - concentration required:
    - Advanced Clinical Practice (p. 1870)
    - Leadership & Social Change (p. 1873)
- Social Work, PhD (p. 1877)
- **joint degree:** S (http://catalog.illinois.edu/graduate/joint-degree-programs/msw-phd_social-work/)ocial Work, MSW and Social Work, PhD (p. 2231)
- **joint degree:** Public Health, MPH and Social Work, PhD (http://catalog.illinois.edu/graduate/joint-degree-programs/mph-phd_social-work/)

Graduate Degree Programs

The School of Social Work offers programs leading to the Master of Social Work (MSW) and the Doctor of Philosophy (Ph.D.) degrees. The MSW program is accredited by the Council on Social Work Education (CSWE). The MSW program offers courses on the Urbana campus and off-campus through its iMSW Outreach program.

Admission

MSW program applicants must meet the following minimum requirements:

1. a baccalaureate degree from an accredited college or university in the United States or from a recognized institution of higher learning abroad;
2. a grade point average of 3.0 (A = 4.0) or greater for the last 60 semester hours of undergraduate work;
3. 20 hours of completed coursework in a liberal arts core consisting of social and behavioral sciences, the humanities, and biological sciences
4. evidence of personal attributes that are suitable for the profession of social work;
5. a score of 103 or above on the TOEFL test;
6. provision of a written supplementary statement.

Advanced Standing MSW applicants who meet all above requirements who have earned a Bachelor of Social Work (BSW) degree from a CSWE-accredited program in the past seven years are considered for admission into the Advanced Standing MSW program.

Ph.D. program applicants must meet the following minimum requirements:

1. a master degree in social work or in related disciplines;
2. a GRE score within the last 5 years;
3. demonstrating a potential for research and other scholarly work;
4. aptitude for leadership in the field of social work.

Advanced Standing MSW

Students with a Bachelors degree in Social Work (BSW) within the past seven years from a social work program accredited by the Council on Social Work Education (CSWE) and a GPA of 3.0 (A = 4.0) or greater for the last 60 semester hours of undergraduate work are eligible for the advanced standing program. This is a three semester/44 hour program that may be completed in 12 months by most students.

iMSW Program

Designed for the working professional who cannot attend a graduate program on the University of Illinois campus, the iMSW Program allows students to remain in their home community while pursuing a graduate degree. The School offers a three-year part-time program of study through its iMSW Outreach. This program is offered across the state and for students in adjoining states. Classes are offered in on-line and hybrid/blended learning formats. Face to face class sessions are offered on weekends. In their third year students complete complete two concentration courses on campus. After completing their coursework students do an internship/field placement back in their home communities. Students complete the same course requirements as students in the on-campus MSW program (see above). iMSW students who qualify for the Advanced Standing program may complete a shorter two-year course of study (see above).

Post-MSW Certification Program

The School offers the Illinois Professional Educator License (PEL) with Endorsement in School Social Work. Individuals with an MSW from an accredited School of Social Work are eligible to apply for the endorsement program. Individuals enrolled in the PEL program take two School Social Work courses and complete a one semester internship in a public school. Students whose MSW did not have sufficient clinical coursework may be required to complete additional coursework to meet ISBE criteria. Upon completion of the program students are eligible for the School Social Worker on an Illinois Professional Educator License from the Illinois State Board of Education (ISBE).

SOCW Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/SOCW/)

Social Work Courses

SOCW 101 SOCW Orientation Seminar credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/101/)
Informational orientation seminar for Social Work majors to enhance their understanding of college life and social work as a profession.

SOCW 199 Undergraduate Open Seminar credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/199/)
Approved for letter and S/U grading. May be repeated.

SOCW 200 Introduction to Social Work credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/200/)
Broad survey of the field of social work; introduction to social services, social welfare organizations, major social problems and target population groups, and the methods used in working with individuals, groups, and communities; includes the range of personnel and skills in social work agencies, and the means of education and training for social work professionals.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOCW 220 Technology and Social Issues credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/220/)
Equips you to evaluate whether technology is good, bad, or neutral. Using case studies and real-world examples, we will apply social and racial justice lenses and ethical frameworks to answer these critical questions. You will learn how to assess, advocate for, or oppose technology for social good. This will equip you as friction-creators to amplify empathy and advocate that technologies be transparent, ethical, and safe.

SOCW 225 Social Work Statistics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/225/)
Introduction of basic concepts in statistics with emphasis on the application of statistical methods in social work research. Topics include: descriptive statistics, probability theory and distributions, point and interval estimation, hypothesis testing, central tendency, variability, independence, contrasts, correlation and regression, non-parametrics, concepts of levels of measurements, and statistical vs. practical significance. Priority will be given to Social Work majors. Credit is not given for SOCW 225 if credit for a college level introductory statistics course has already been earned.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

SOCW 235 The Science of Youth Violence Prevention credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/235/)
Introduction to the scientific research and practices of preventing youth violence. Topics include conceptual and theoretical models of violence, principles of prevention science and evaluation methods, and the assessments, data, programs, and research across forms of youth violence (bullying, dating violence/intimate partner violence, sexual violence, community violence). Students will learn how to critically evaluate research and evidence-based practices to assess the development and impact of violence prevention efforts. Prerequisite: Any Quantitative Reasoning I course.
This course satisfies the General Education Criteria for:
Quantitative Reasoning II

SOCW 240 Death & Dying credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/240/)
This course will focus on various aspects of death and dying. Content will examine different types of death, impact of death throughout the lifespan, cultural beliefs and practices regarding death and dying, grief, healing after loss, legal and ethical issues related to death, and the roll of social workers at the end of life. Students will be encouraged to examine their own thoughts, values, feeling, and beliefs about death and dying.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOCW 245 Doing Good through the Nonprofit Sector credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/245/)
Study of the nonprofit sector theory, activity and structures in the US and abroad. Challenges students to think critically about the role and value of the nonprofit/voluntary sector in society, to understand ethical principles and values that guide nonprofit work, and to assess research evidence about effectiveness and impact. Helps inform students' thinking about future career choices and/or volunteer activities in the "third sector".
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

SOCW 297 Asian Families in America credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/297/)
Offers a comparative analysis of Asian families as they cope and adapt to American society. Examines: 1) how families from four major Asian-American groups (Chinese, Indian, Japanese and Korean) function in American society; 2) how these families compare to families in their country of origin; and 3) how these families are similar to or different from the 'typical American' family. Includes visits to Asian cultural institutions and with Asian families. Same as AAS 297 and HDFS 221.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

SOCW 298 Social Work Experiential Learning Fees credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/298/)
This is a shell course to assess fees to support the cost of providing student learning experiences in social work practice settings. Additional fees may apply. See Class Schedule. Approved for S/U grading only. Prerequisite: The SOCW Admissions and Records Officer will manually add this course to student schedules.

SOCW 299 Study Abroad credit: 0 to 18 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/299/)
Lectures, seminars, and practical work in an approved study-abroad program in Social Work appropriate to the student's course of study. Approved for Letter and S/U grading.

SOCW 300 Diversity: Identities & Issues credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/300/)
This introductory course explores multiple dimensions of diversity in a pluralistic and increasingly globalized society. Using a social work strengths perspective as well as historical, constructivist, and critical conceptual frameworks; the course examines issues of identity, culture, privilege stigma, prejudice, and discrimination. The social construction and implications of race, class, gender, sexual orientation, and other dimensions of difference is examined at individual, interpersonal, and systems levels. Students are expected to use the course material to explore their personal values, biases, family backgrounds, culture, and formative experiences in order to deepen their self-awareness and develop interpersonal skills in bridging differences. Finally, students apply learning from the course to identify characteristics of effective social work and other health and human service provision among people culturally different themselves; and to identify opportunities for change contributing to prejudice reduction and cross-cultural acceptance at home, work and in society.
This course satisfies the General Education Criteria for:
Advanced Composition
Cultural Studies - US Minority

SOCW 310 UG Research Assistance credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/310/)
Assist departmental faculty in on-going research. Topics and nature of assistance vary. Capstone paper required. Approved for Letter and S/U grading. May be repeated in separate terms up to 12 hours. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head.

SOCW 315 Social Work Services for Older Adults credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/315/)
Focus on the aging process, special needs of older adults, and the role of social work in addressing these needs. All levels of social work intervention are considered, direct practice with older persons and their families, service delivery systems in local communities, and state and national policies. Special attention is given to the needs of caregivers, person-centered care, diverse vulnerable populations and resources for older adults to age in place.

SOCW 321 Social Entre & Social Change credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/321/)
Intended for undergraduates who have an interest in creating programs and products that have social values for communities. Features social entrepreneurship as an approach to social development and will consider its application and related change strategies to a wide array of social problems. Social entrepreneurship has emerged as a change approach that features the application of entrepreneurial practices to social ventures. Social entrepreneurship is similar to business entrepreneurship in its emphasis on selected program development and management principles and processes, but social entrepreneurs have the primary goal of creating social value in communities rather than personal or shareholder wealth. The initial part of the class will emphasize instructing students in broad concepts and principles related to entrepreneurship, while the latter portion of the course will feature students working on teams to design social projects.

SOCW 322 Sexual Health and Social Work credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/322/)
Examination of sexuality topics from social work perspectives, embracing sexuality as a human right using the reproductive justice framework. We will learn how to incorporate a sex positive and strengths-based perspective with a focus on the application of social work skills, theories, and values to integrate sexuality into the practice of social work. Prerequisite: SOCW 200 is recommended.

SOCW 325 International Development with Grassroots Organizations credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/325/)
This course engages students to think critically about international aid and development by cultivating an awareness of moral and ethical dilemmas that often go unconsidered by young professionals. It intends to help students develop greater cultural awareness and humility by recognizing differences in equity and global social, economic, and political structures. The course is a second eight-week offering and uses a blended learning approach with asynchronous online content combined with in-person classroom educational activities. Students apply the knowledge learned through the course by working directly with an international grassroots social organization during a 4-8 week immersion experience abroad. Course is an 8 week pre-departure training is required. Students complete a service learning placement in summer with an international grassroots organization.

SOCW 330 International Perspectives credit: 3 to 6 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/330/)
This course provides cross-cultural learning experiences within the context of international community-based service learning. Students will explore human service delivery through direct involvement with international social service institutions. This cultural immersion course is a collaborative partnership between the University of Illinois School of Social Work and selected international universities. Countries visited, varies by semester. May be repeated in separate terms up to 12 undergrad hours if topics vary.

SOCW 335 Cities and Immigrants credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/335/)
Same as UP 335. See UP 335.

SOCW 360 Social Work and the Military credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/360/)
This course provides an overview of military social work practice including: military culture, issues and needs of soldiers and their families, ethical considerations, and the roll of social workers. Prerequisite: For majors only.

SOCW 370 Social Work and Disability Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/370/)
This course provides a foundation for generalist practice and promotes social justice, inclusion, and ability when working with all people. Skills and knowledge will be gained to help empower individuals with disabilities and to intervene in various systems to ameliorate bias. The course examines key policies, historic legislation, service delivery, education, and social issues that impact individuals with disabilities. Through projects and assignments completed in-class and in the community, students will learn about the varying abilities and strengths of people with a variety of different needs. Applications of social work values and ethics are stressed in relation to working with people with disabilities.

SOCW 380 Current Topics in Social Work credit: 3 to 6 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/380/)
Presents and analyzes special topics related to current social work practice, policy and research. Topics vary; see Class Schedule for current offering. May be repeated in the same or separate terms.

SOCW 400 Generalist SW Practice Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/400/)
Foundation methods course that is a prerequisite for all advanced methods courses. Overview of generalist social work practice and intervention with individuals, groups, organizations and communities; introduction to core concepts, value base and ethical principles of the profession. Emphasis is given to the bio-ecological framework, person-in-environment and systems theory. Skills in developing beginning professional relationships are addressed via a skills lab component. Students begin the process of professional self-awareness to begin to identify how the personal values and beliefs they hold impact upon their interactions. 4 undergraduate hours. 4 graduate hours. Prerequisite: Admission to MSW program.

SOCW 401 Practice I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/401/)
Overview of generalist social work practice with individuals, families, groups, organizations, and communities. Designed to introduce core concepts, values, and ethical principles of the profession as well as to provide basic skills, and knowledge related to generalist social work practice with a broad array of client systems. Emphasis is give to the biological-psychological-social-spiritual framework, person-in-environment, strengths perspective, and system theory. Skills in developing beginning professional relationships, which are characterized by mutuality, collaboration, empowerment, and client self determination within the problem-solving process are addressed. 3 undergraduate hours. No graduate credit. Prerequisite: SOCW 200.

SOCW 402 Practice II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/402/)
Provides students with culturally responsive, micro-level skills development for working with and on behalf of individuals, families, and groups. Builds on the basic helping skills learned in SOCW 401 and offers further practice on interviewing skills, more emphasis on ethical decision-making, assessment, and intervention, evaluation applied to individuals, families, and groups. 3 undergraduate hours. No graduate credit. Prerequisite: SOCW 401.

SOCW 403 Practice III credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/403/)
Provides knowledge and skills about the theory and practice of planned change in communities and organizations using a generalist model of social work practice. Builds on the foundation knowledge and skills gained in SOCW 401 with emphasis on assessment, planning, intervention, and evaluation skills for macro-level practice. 3 undergraduate hours. No graduate credit. Prerequisite: SOCW 401.

SOCW 404 Social Work Case Management Practice credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/404/)
This course builds upon and extends generalist social work theories, knowledge and clinical skills required for case management practice. Content focuses on inter-professional collaborative team-based approaches for patient/client assessment, care planning, service delivery coordination, and evaluating outcomes. Emphasis is on organizational context, theoretical models, social work roles, culturally sensitive approaches, biopsychosocial assessments, triage, advocacy, interdisciplinary and inter-organizational collaboration and record keeping. 3 undergraduate hours. No graduate credit. Prerequisite: SOCW 401. Restricted to Social Work majors only.

SOCW 410 Social Welfare Pol and Svcs credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/410/)
Examination of social welfare within a historical context, addressing the economic, political, social and ideological influences that have shaped the social welfare system and programs. Critical study of the income maintenance system in the United States as a response to the problems of inequality of opportunity and income, poverty, and income security; consideration of alternative approaches with discussion of the social worker's role in the system. 3 undergraduate hours. 4 graduate hours.

SOCW 412 Social Work with Latine credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/412/)
Students will gain cross-cultural knowledge and awareness of the diversity of cultures within the Latine population, as well as the issues that impact these communities, including historical patterns of immigration and oppression, socioeconomic disparities, documented status, and complex racial and ethnic identities. Students will also learn about models and theoretical principles of social work practice with Latine and explore the challenges and opportunities in providing social services to Latine individuals, families, and communities. For graduate credit, students must participate in a community service-learning project, supporting a community organization that serves Latine clients to gain hands-on experience and contribute to community betterment. Same as LLS 412. 3 undergraduate hours. 4 graduate hours. Prerequisite: Restricted to Sophomore standing or higher.

SOCW 416 Child Welfare Issues & Trends credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/416/)
This course examines theoretical and programmatic aspects for child welfare practice. Emphasis is placed on the roles and functions of child welfare workers, including engagement, assessment, intervention and permanency planning. 4 undergraduate hours. 4 graduate hours. Prerequisite: SOCW major. For majors only.

SOCW 417 Dementia Care for Older Adults credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/417/)
This course will equip students with a body of knowledge to supervise, participate in, and facilitate care for persons with dementia throughout the lifespan. Upon completion of the course, students will be eligible for certification as approved dementia trained practitioners. The course will introduce and develop social work practice skills on all levels and choices of dementia care interventions and assessments. Special attention is given to practice skills for working with vulnerable populations and their caregivers through service learning site opportunities and assignments. The course uses an integrated health and person-center care approach with special attention to multi-cultural backgrounds and new family lifestyles related to dementia care. 3 undergraduate hours. 4 graduate hours. Prerequisite: Prior completion of SOCW 315 or other Introduction to Aging course is strongly recommended. BSW majors and MSW students only.

SOCW 418 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/418/)
Independent study of a topic of special interest in the field of social work. 1 to 3 undergraduate hours. 4 graduate hours. May be repeated only by undergraduates in separate terms up to 12 hours. Prerequisite: Consent of instructor.

SOCW 420 Subst Use in Social Context credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/420/)
Introduces students to the problem of substance use and its impact on society. Examines the physiological, psychological, social, and cultural aspects of substance use. At the individual and familial levels, the course examines the causes, development, prevention, and treatment of substance use disorders. At the societal level, the course examines public policy efforts to regular and control substance use disorders from both historical and contemporary perspective. Implications for social and economic justice are also examined. 3 undergraduate hours. No graduate credit.

SOCW 425 Queer Visibility credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/425/)
This seminar examines a broad scope of key LGBTQ topics from a social science perspective, and addresses such themes as identity development, critical social movements, community characteristics, sub -cultures, public policy, resilience, and health disparities within queer communities.
The course applies a social justice, sex - positive, and health promotion lens to the topics addressed. This course also explores issues related to intersectional identities (i.e., the overlap of multiple [often marginalized] group membership, such as race/ethnicity, gender identity, age, ability, sexual orientation, etc.) within this population. Students will learn the ways in which the helping professions (e.g. social work, public health, etc.) engage with the LGBTQ community using both research and practice, in order to promote the health and wellbeing of LGBTQ persons. 3 undergraduate hours. 4 graduate hours. Credit is not given towards graduation for SOCW 425 and SOCW 210.

SOCW 427 Social Work Research Methods credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/427/)
Basic principles of social science research and importance for social work practice: overview of research principles including the stages of a research project, design of research; quantitative and qualitative methodologies, design of questionnaires, methods of data collection and preparation of reports. Introduction to various research designs such as the survey, program evaluation, single subject design, quasi-experiments, and experimental design. Enrollment preference given to students in the MSW program. 3 undergraduate hours. 4 graduate hours.

SOCW 436 Intl SW & Development credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/436/)
This online course introduces students to policy and practice issues associated with international social work. It emphasizes ethical dilemmas, with the goal of sensitizing students to the importance of culturally sensitive practice for marginalized populations in global contexts. Weekly online discussion sessions use the Blackboard Online Platform. Students must have high speed internet connection and headset with microphone for course interaction. 3 undergraduate hours. 4 graduate hours.

SOCW 445 Social Enterprise Lab credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/445/)
Enables students to launch and scale social ventures—firms, nonprofits, programs, or products that address social problems. It couples structure with deliverables particular to each venture's needs. Topics include: incorporation and corporate forms; financing; business planning; organizational governance; monitoring and evaluation; liability and risk management; and marketing, branding, and identity. Alongside the structured modules and deliverables, students discuss and troubleshoot their startup challenges and opportunities. The course develops entrepreneurial skill sets and broader understanding of social issues through deep engagement with entrepreneurial action. 3 undergraduate hours. 4 graduate hours. Credit is not given toward graduation for SOC 445 and SOCW 375. Prerequisite: SOCW 321 recommended.

SOCW 451 HBSE I: Human Development credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/451/)
Examination of the major theories that inform social work's understanding of human behavior in a variety of social contexts. A bio-ecological systems framework, together with a developmental approach in understanding the ways in which individuals, families, groups, organizations, institutions, and communities interact, is presented. Issues of gender, race, ethnicity, socioeconomic status, disability and sexual orientation are introduced so students can gain understanding of how these components affect and influence development across the lifespan. 3 undergraduate hours. 4 graduate hours.

SOCW 455 Social Work with Women credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/455/)
Focuses on women and now cultural belief systems related to gender are instantiated through the differential treatment of females and males in our education, mental health, social welfare and health care systems; and the consequences of such practices through the lifespan. Includes consideration of policies and practices that support women emphasizing issues of special concern to women of color, lesbians, older women, impoverished women and disabled women. Same as GWS 454. 3 undergraduate hours. 4 graduate hours.

SOCW 456 Philanthropy & Social Justice credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/456/)
Explores the important dimensions of human service organization fundraising, grant writing, and philanthropy relevant to social work leadership and critically examines these topics in relation to social change, power, privilege, and social movements. Students will practice the skills and approaches necessary to fulfill the fundraising responsibilities of a nonprofit leader or services provider, including grant writing, data mining, storytelling, donor cultivation, and legal requirements and ethical considerations. 3 undergraduate hours. 4 graduate hours. Prerequisite: SOCW 321 for undergraduate students. Restricted to Social Work, BSW or Social Work, MSW students or by consent of instructor.

SOCW 461 Professional Practice Seminar I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/461/)
The goal of this course is to begin the process of integrating all the foundation knowledge of generalist social work that students have learned and begin applying it to real life situations. Students will complete a portfolio and a service learning experience that will help them being to make the connection between the core competencies, theories and applications to real life experiences. During this course students will begin the process of being matched with the agency where they will serve their internship during the last semester of their senior year. 4 undergraduate hours. No graduate credit. Prerequisite: SOCW 401.

SOCW 470 Field Practicum & Professional Seminar II credit: 7 to 15 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/470/)
A supervised field practice experience and seminar where students apply knowledge and skills in social work engagement, assessment, planning and interventions to individuals, groups, families, organizations, and communities. Students are expected to promote sustainable social change through planned problem solving and empowerment to enhance the well-being of others. 7 to 15 undergraduate hours. No graduate credit. May be repeated in separate terms to a maximum of 15 undergraduate hours. Prerequisite: SOCW 461. Instructor approval required for repeating. SOCW majors only.

SOCW 473 Immigration, Health & Society credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/473/)
Same as LLS 473, and SOC 473. See LLS 473.

SOCW 475 Undergraduate Research Abroad credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/475/)
Students assist in research under faculty supervision at a location outside of the United States. Topics and type of assistance vary. 1 to 4 undergraduate hours. No graduate credit. May be repeated in separate terms up to 6 hours. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work (who will have examined the proposed research plan); and approval of department. Not available to freshman.

SOCW 480 UG Research Project credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/480/)
Conduct research study under the supervision of a departmental faculty member. Topics and nature of assistance vary. Capstone paper required. 0 to 3 undergraduate hours. No graduate credit. Approved for letter and S/U grading. May be repeated in separate terms up to 6 hours. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head. Majors only. Not available to freshman and sophomores.

SOCW 500 SW Practice with Indiv and Fam credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/500/)
Systematically and critically examines the theory, procedures, and techniques of selected practice models within four main approaches to social work: cognitive-behavioral, systemic (family and ecological systems; crisis intervention), task-centered, and radical-structural (structural; feminist). Uses selected criteria to analyze and assess those models, examines outcome research, and identifies current practice issues. Prerequisite: SOCW 400.

SOCW 501 SW Practice with Groups credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/501/)
Social work practice theory in social group work through comparative study of various practice approaches and research about those approaches, including the use of group work method in contemporary social work practice, practice principles, and the use of group process as applied in the student's area of specialization. Looks at group work for children, adolescents, and adults considering developmental and environmental issues; also includes investigation of practice strategies and models of group therapy and task group leadership across diverse populations. Prerequisite: SOCW 400.

SOCW 502 Brief Motivational Interventions for Substance Use credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/502/)
This course prepares social workers to deliver brief interventions that build motivation for change among individuals that use substances. Students participate in hands-on skill development activities for two empirically supported treatments, Screening Brief Intervention and Referral to Treatment (SBIRT) and Motivational Interviewing. Students are expected to reach beginning competency in delivering these two clinical models. Prerequisite: SOCW 400. MSW: Social Work - UIUC.

SOCW 503 Trauma Informed Social Work with Children and Adolescents credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/503/)
This course uses a case study and inquiry based approach to foster student learning of the core concepts of trauma (theory and foundational knowledge) and evidence-based practice interventions effective in treating children, youth, and families that experience trauma. Cases discussed include children, youth, and families exposed to traumatic events (i.e. abuse, neglect, domestic violence, community violence and natural disasters). Strength-based practice interventions that build on existing child and family strengths that enhance growth and resiliency after trauma are studied. Prerequisite: SOCW 400.

SOCW 504 SUD Treatment in S W credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/504/)
Introduces selected counseling approaches for substance use disorders. Begins with an overview of the causes of substance use disorders, assessment, diagnosis, and treatment planning. Focuses on treatment theories and techniques applied to counseling substance abusers. Selected theories include 12 Step approaches, cognitive and behavioral theories, family systems theory, harm reduction, and motivational interviewing. Special attention is devoted to apply substance abuse treatment models with diverse populations. Prerequisite: SOCW 400.

SOCW 505 Behav and Cogn Methods for SW credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/505/)
Students are introduced to brief behavioral and cognitive methods for treating a wide range of human problems, crises, and mental disorders. Content includes: (1) conceptualizing and assessing client problems; (2) identifying appropriate treatment goals; (3) developing comprehensive and differential treatment plans; (4) conducting brief interventions; and (5) evaluating client outcomes using research, consultation, and supervision. Prerequisite: SOCW 400.

SOCW 506 SW Practice with Child/Adol credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/506/)
Examination and critical evaluation of selected methods/approaches of intervention; research on their effectiveness and application to specific problems of children and adolescents that come to the attention of social workers and other helping professionals; attention given to remediation and prevention. The course provides opportunities for students to develop skills through participation in a service learning project. Prerequisite: SOCW 400.

SOCW 507 School Social Work Practice credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/507/)
Examination of the design and delivery of school social work interventions with special emphasis given to students with physical/mental disabilities and vulnerable populations. Course content provides a foundation for the development of a comprehensive and in-depth understanding of an ecological systems approach to social work practice based upon a foundation of professional values and ethics. Prerequisite: SOCW 400.

SOCW 508 Family Therapy Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/508/)
Advanced seminar providing in-depth exposure to the principles, values, ethics, issues and practice of family therapy in social work. Focuses on family therapy process, the practitioner role, issues in assessment, intervention and evaluation; how discrimination and oppression impact intervention strategies; skills that advance social and economic justice; presentation of cases; use of supervision and consultation, and family therapy with diverse populations. Combines lecture/discussion with taped observations of noted family therapists and participation in a family therapy practicum. Prerequisite: SOCW 400.

SOCW 509 Adv Clin Assess & Interviewing credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/509/)
Advanced practice class designed to enhance students' understanding of clinical assessment and interviewing methods. Includes methods for therapeutically intervening with clients who are highly distressed, angry or agitated, resistant or involuntarily mandated for treatment, experiencing severe symptoms, or who have unique and complex problems. Clinical interviewing skills taught in this class will build upon knowledge and skills acquired in previous direct practice classes. Prerequisite: SOCW 400 and SOCW 552.

SOCW 510 Theories of Diversity, Inequality, and Social Change credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/510/)
Explores important dimensions of social justice and social change relevant to social work leadership. The first phase of the course focuses on theories of diversity, social identity and social justice. The second phase focuses on theories of social change and stasis. Students will develop their own working models of these theories. They will also understand how issues of diversity and social justice should inform social work practice at micro, meso and macro-social work levels. Implications for social work leadership will also be explored. Same as RST 583. Prerequisite: Restricted to Social Work MSW students.

SOCW 513 Delivery of Health Care credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/513/)
Delivery of health care in the United States is examined from a multidisciplinary perspective including social, cultural, political, economic, ethical and legal issues. Health care services are described in relation to various definitions of health, health status and access to care. Current problems and issues in health care including government responsibility and source of authority, policy development and analysis, proposals for reforms, and financing and cost containment are discussed and analyzed. Prerequisite: Admission to MSW program or consent of instructor.

SOCW 514 Mental Health Pol and Svcs credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/514/)
Examination of comprehensive community mental health services as they evolve from definitions of the problems and changes in federal and state social policy; the concept of normalization and its criteria for program evaluation; and changing roles of mental health professionals, paraprofessionals, and consumers in policy making and service delivery. Presents the history of mental health policy and services in the U.S.; current policies and activities of the mental health delivery system are critically analyzed. Prerequisite: SOCW 410.

SOCW 515 Integrated Health Care Policy and Services credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/515/)
Integrated Health Care Policy and Services is examined from a multidisciplinary perspective including social, cultural, political, economic, ethical and legal issues. Integrated health care services are described in relation to various definitions of health and mental health conditions and access to care. Current problems and issues in integrated health care including government responsibility and source of authority, policy development and analysis, proposals for reforms, and financing and cost containment are discussed and analyzed. Prerequisite: Admission to MSW program or consent of instructor. Restricted to those in the MSW and iMSW program.

SOCW 516 Child, Youth and Family Svcs credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/516/)
Examines a range of direct service and public policy issues that social workers encounter when working with vulnerable children, adolescents, and families. Focuses particular attention on the families involved with child protection. Addresses the following questions: What factors help explain the etiology of violence and neglect in the family home? Once vulnerable families are identified and become involved with social service agencies, what interventions are most effective with regard to decreasing risks and strengthening protective factors? How can social service systems best prepare vulnerable adolescent for the transition to adulthood? Prerequisite: SOCW 410.

SOCW 519 Public School Policy/Services credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/519/)
Presents content on children with physical and mental disabilities, educational policies related to vulnerable populations, and federal and state legislation, with particular emphasis given to the Individuals with Disabilities Act (IDEA). The following topics are highlighted: eligibility requirements, general characteristics of the disabling conditions, education as a continuum from early childhood to adulthood, school finance, and current educational issues. Content is presented pertaining to meeting the needs of exceptional children, students with other special needs, and their families in public schools and the community. Prerequisite: SOCW 410.

SOCW 520 Social Welfare Planning credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/520/)
Introduces students to the theory and practice of social welfare planning. The course is designed to help students apply concepts and methods to their specific social work fields of interest. Content includes a review of policy analysis, needs assessment, establishing goals and objectives, program design, budgeting, management information systems, and program evaluation. Prerequisite: Admission to MSW program or consent of instructor.

SOCW 521 Leadership and Social Change credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/521/)
Introduces MSW students to a broad range of strategies for creating social change. Several overarching concepts that are useful in undertaking a wide range of social change efforts are introduced. These concepts are applied to different change strategies. This includes attention to the role of leadership in social change, as the quality of leadership is critical to the success of most social change efforts. The importance of policy or social entrepreneurs in creating social change will also be examined. These entrepreneurs play critical roles by both identifying and implementing new ideas and by diffusing them on a wider scale after initial experimentation. Finally, social workers often tend to be uninformed about sound business practices as they engage in social change efforts, yet knowledge of basic business concepts can be critical to the success or failure of a social venture. Therefore, the course addresses issues such as opportunity recognition and risk assessment, sustainability and scalability of projects, and attention to both fiscal management and outcome accountability. Prerequisite: SOCW 400 or by consent of instructor for non Social Work majors.

SOCW 522 SW Practice with Communities credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/522/)
Examines principles and methods that characterize identifiable approaches used in community organization practice at neighborhood, community, state, and other levels. This course is an in-depth study of how citizens can organize. Questions discussed include: What institutions aid communities in their organizing and self-improvement efforts? What circumstances encourage the erosion of civil society, civic involvement, and community institutions? What role should the social worker and the human service or social service agency play in organizing communities? Prerequisite: SOCW 400.

SOCW 525 Supervision/Staff Development credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/525/)
Course focuses on the acquisition of the essential knowledge and skills needed to work with people to achieve desired client outcomes. Includes management and organizational theories, and research and theory regarding the practice of supervision. Addresses understanding of the agency context and purposes, interpersonal insights and skills, the importance of procedural and technical expertise, communication skills, mastery of the functions of management and leadership ability. Examines supervisory process in terms of interpersonal sensitivity and interaction skills including influence techniques. Prerequisite: Admission to MSW program or consent of instructor.

SOCW 526 Managing Human Service Orgs credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/526/)
Focus on the design, administration and management of social programs from a social work perspective. Content includes: principles and process of administration and management, history of social welfare administration and how this relates to the design of current programs, review of administration Organizational and leadership theories, policy formulation, agency structure, staff organization, budgeting and evaluation of management practice. Prerequisite: SOCW 400 or by consent of instructor for non Social Work majors.

SOCW 531 Field Practicum and Integrative Seminar I credit: 8 to 12 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/531/)
This course is comprised of a field practicum and integrative seminar. The field practicum is educationally directed and supervised by an approved field instructor. The seminar component assists students with the integration of knowledge, skills, values and attitudes of social work practice acquired in the classroom with the hands-on practice experience in the field practicum setting. Learning experiences emphasize the application of knowledge and practice in the areas of ethical and professional behavior, diversity and difference, human rights and social, economic and environmental justice, research informed practice, policy practice, and engagement, assessment, intervention and evaluation with individuals, families, groups, organizations and communities. May be repeated in separate terms.

SOCW 532 Field Practicum and Integrative Seminar II credit: 8 to 12 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/532/)
This course builds on the learning of SOCW 531 and is comprised of a field practicum and integrative seminar. Learning is directed at the development and demonstration of advanced competency skills. The field practicum is educationally directed and supervised by an approved field instructor. The seminar component assists students with the integration of advanced knowledge, skills, values and attitudes of social work practice acquired in the classroom with the hands-on practice experience in the field practicum setting. The advanced learning experiences emphasize the application of knowledge and practice in the areas of ethical and professional behavior, diversity and difference, human rights and social, economic and environmental justice, research informed practice, policy practice, and engagement, assessment, intervention and evaluation with individuals, families, groups, organizations and communities. May be repeated in separate terms. Prerequisite: Successful Completion of SOCW 531.

SOCW 533 Field Practicum III credit: 2 to 6 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/533/)
Learning is directed at the development and demonstration of advanced competency skills. The part-time field practicum is educationally directed and supervised by an approved field instructor. The advanced learning experiences emphasize the application of knowledge and practice in the areas of ethical and professional behavior; diversity and difference; human rights; social, economic and environmental justice; research informed practice; policy practice; and engagement, assessment, intervention and evaluation with individuals, families, groups, organizations and communities. Approved for S/U grading only. May be repeated in separate terms up to 6 hours. Prerequisite: Successful completion of SOCW 532. Restricted to Master of Social Work students.

SOCW 541 Clinical Research Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/541/)
Develops skills for assessing effectiveness of social work interventions using research methods. The course assumes students have had prior courses in research methods and statistical analysis. Building on these courses, this course will focus on the use of research methods in examining important aspects of social work interventions. Students will also develop skills necessary to evaluate social work research practice and practice evidence, as well as skills in grant writing and data analysis. Prerequisite: SOCW 427 or equivalent.

SOCW 542 Program Evaluation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/542/)
An advanced research course that develops skills for evaluating social service programs. The course assumes students have had prior courses in research methods and statistical analysis. This course provides an understanding of theoretical concepts, techniques, and research findings for evaluating a specific program, its implementation, and its effectiveness. It systematically analyzes program evaluation models and critically examines application of these models in the context of social work practice and social welfare policy. Prerequisite: SOCW 427 and a college level statistics course.

SOCW 552 HBSE II: Mental Disorders credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/552/)
Interrelationship of biological, emotional, learning and social aspects of mental disorders, and implications for the patient/client, family, and community. Focus on diagnostic assessment and biopsychosocial treatment methods including psychosocial treatment methods, medications, and social work interventions. Students also learn to recognize the potential for bias that can result when assessments are applied across cultural, ethnic, racial, socioeconomic, gender and other groups. Prerequisite: SOCW 451.

SOCW 553 Integrated Behavorial Health & Health Care credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/553/)
Students will learn therapeutic approaches, brief interventions and bioethical frameworks to help patients/family navigate illness, disability, and healthcare systems and promote health and wellness. Students will learn roles and functions of clinical social workers in healthcare settings with special attention to Integrated Care models and roles of the behavioral health consultant/provider and medical social worker on healthcare teams. Holistic biopsychosocial models that are patient/family centered, team-based, collaborative, and that integrate physical and behavioral health care to address social determinants of health and health equity will be emphasized. Common chronic and acute health conditions and medical terminology are discussed as well as evidence-based psychosocial interventions in hospital, primary care, and other outpatient settings. Prerequisite: Admission to MSW program.

SOCW 554 Inequalities In A Diverse Society credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/554/)
In contemporary American society, not all inequality leads to inequity. In this course, we will explore structural and cultural disparities that proceed from race, ethnicity, and class. Such critical inquiry enables students to understand the factors that contribute to the creation and implementation of public policy and guide the delivery of social goods such as adequate housing, safe communities, efficient transportation, affordable health care, quality education, and other public services. Therefore, we emphasize processes of analysis and the application of social entrepreneurial principles as important tools to generate policies and interventions that lead to a more equitable society. Same as HDFS 541 and LLS 554. Prerequisite: SOCW 451 or consent of instructor for non Social Work majors.

SOCW 561 Special Studies in Soc Work I credit: 1 to 8 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/561/)
Independent or group study in areas of special interest; application of social work principles to special problems or settings. May be repeated in the same or subsequent terms as topics vary. Prerequisite: Consent of instructor.

SOCW 562 Special Studies in Soc Work II credit: 2 to 8 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/562/)
Independent or group study in areas of special interest; application of social work principles to special problems or settings. Prerequisite: Consent of instructor.

SOCW 575 Social Work Teaching Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/575/)
Doctoral seminar on social work education and the pedagogy of college teaching. Topics include history of social work education, competencies for social work education, course development, principles of active learning, use of diverse instructional methods for teaching and assessing learning, and the scholarship of teaching and learning. The course has a required practicum component where students receive structured mentoring in some aspect of teaching in a social work class.

SOCW 576 Teaching Practicum credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/576/)
This course is designed to provide doctoral students with supervised, hands-on teaching training and experience with a faculty member after they complete the required Social Work Teaching Seminar. The primary objective of the teaching practicum is to strengthen the students' teaching ability and experiences for their entry into the job market. The purpose is for students to be involved in as many aspects of the teaching process as possible (e.g. syllabus development, class preparation, classroom time, office hours, assignment review/grading, meetings with faculty supervisor and any other relevant activities). Approved for S/U grading only.Prerequisite: SOCW 575.

SOCW 579 Social Work Practice Theories credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/579/)
Presents theories for social work interventions with individuals, families, groups, and communities and organizations; critically analyzes different theoretical frameworks for such interventions; and examines the conceptual links between theory, process, outcome, and evaluations. This course is intended for students in the Ph.D. program in Social Work.

SOCW 580 Advanced Child Welfare credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/580/)
Examines laws, scientific concepts, ethical dilemmas, and new practice directions with respect to protecting children, preserving families, regulating foster care, achieving family permanency, and assisting foster youth in transitioning to independence. Review of legislative, court, and administrative frameworks for promoting these outcomes at the city, state, and federal levels. The course analyzes and critiques historical and contemporary social science, public policy, community organization, and legal advocacy perspectives on child protection and child welfare. Contemporary topics and issues are discussed and debated. Prerequisite: SOCW 516 or consent of instructor.

SOCW 581 Gender Relations & International Development credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/581/)
Same as CGGE 581 and GWS 512. See CGGE 581.

SOCW 584 Policy Practice and Advocacy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/584/)
Examines approaches for analyzing social policy development, implementation and advocacy in the United States; and development of skills to become effective policy practitioners. Involves ability to formulate viable policy options as well as skills in advocating for adoption of desired policies. Content includes knowledge about the political processes associated with policy development, the technologies needed to develop policies, communication skills need for policy advocacy, and knowledge in a specialized area. Course builds on policy material presented in SOCW 410. Prerequisite: SOCW 410 or consent of MSW Program Director.

SOCW 585 National Social Welfare Policy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/585/)
This seminar focuses on social policy development, implementation, evaluation, and research. The class will analyze theories of governmental policy intervention, both from substantive and procedural standpoints. Because the social policy arena is heavily politicized, political factors affecting policy development and implementation will be stressed. In addition, policy implementation discussions will attend both to program administration and intergovernmental relations issues. The growing importance of globalization in social policy development also will receive attention, as will selected issues in the evaluation of social policy interventions. 4 graduate hours. No professional hours.

SOCW 589 Social Work and the Law credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/589/)
Legal procedures and issues of special relevance to social work practice; includes legal provisions related to poverty, family development and crises, racial and ethnic minorities, institutionalized persons, crime and delinquency, legal authority of social agencies, and regulation of the profession. Prerequisite: Admission to the MSW program or consent of instructor.

SOCW 593 Applied Qualitative Research credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/593/)
Provides a doctoral level overview of contemporary qualitative research with an emphasis on applications. Through readings, discussions, and assignments students will be introduced to: the history and philosophical underpinnings of qualitative research; research designs, methods and analysis used in qualitative research; criteria for rigor in qualitative research; the application of qualitative research to addressing contemporary social issues; technical and professional issues including the use of computer programs in qualitative research and grant writing. Students will begin to elaborate their own research interests through critical reading, discussion and various applied and written assignments. Prerequisite: Admission to Ph.D. program.

SOCW 594 Individual Research credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/594/)
Course is designed to enhance the research skills of Doctoral students in social work through research collaboration with a faculty member. May be repeated to a maximum of 8 hours. Prerequisite: SOCW 593.

SOCW 595 Quantitative Research Designs credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/595/)
Provides a doctoral level overview of quantitative designs and conceptual issues in social work research. It presents a framework for structuring the statistical analysis and systematic evaluation of the efficacy and effectiveness of social interventions in achieving desired outcomes for diverse populations. Although the purpose is not to emphasize statistical training, the course will reinforce the learning of basic concepts, mathematical foundations, and assumptions underlying advanced applications of statistical description and causal inference. Prerequisite: Admission to the Ph.D. program.

SOCW 599 Dissertation Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/SOCW/599/)
Research and writing of doctoral thesis in social work. Approved for S/U grading only. May be repeated in the same term or in separate terms.

WGGP Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/WGGP/)

School of Information Sciences

A destination for success

The School of Information Sciences (iSchool) at Illinois leads the way in shaping the future of information. This success is the result of a commitment to research, education, and engagement and a long history of innovation. Our School consistently earns recognition as one of the best destinations—both on campus and online—for professional studies in the information sciences.

Our programs and research address contemporary information issues in data science, human computer interaction, digital libraries, privacy, artificial intelligence, cybersecurity, bio- and health-informatics, information literacy, cultural analytics, youth literature and services, and more.

The iSchool offers graduate and undergraduate programs. Detailed information on our degree programs may be obtained from the iSchool website (https://ischool.illinois.edu/academics/).

iSchool Deans

- **Interim Dean:** Emily Knox
- **Executive Associate Dean:** J. Stephen Downie
- **Interim Associate Dean for Academic Affairs:** Brandon Batzloff
- **Interim Associate Dean for Faculty Affairs:** Michael Twidale

iSchool Dean's Cabinet

Undergraduate Programs

Majors:

- Information Sciences, BS (http://catalog.illinois.edu/undergraduate/bs_info_sci/)
- Information Sciences + Data Science, BS (p. 444)

Minors:

- Informatics, UG
- Game Studies & Design Minor, UG (p. 970)

Visit our Undergraduate Programs (https://ischool.illinois.edu/degrees-programs/undergraduate/) page for information on our programs, admissions and more.

Graduate Degree Programs

Masters

- Bioinformatics: Information Sciences, MS (p. 1190)
- Game Development, MS (p. 1490)
  - Art (p. 1492)
  - Design (p. 1493)
  - Narrative (p. 1494)
  - Production (p. 1495)
  - Programming (p. 1497)
- Information Management, MS (p. 1567) (on-campus)
- Library & Information Science, MS (p. 1629) (on-campus & online)

Doctoral

- Information Sciences, PhD (p. 1569)
  - Writing Studies (p. 2060) - optional concentration

Joint Degree Programs

- Library & Information Science, MS and African Studies, MA (p. 2185)
- Library & Information Science, MS and History, MA (p. 2198)

- Library & Information Science, MS and Law, JD (p. 2208)
- Library & Information Science, MS and Russian, East European, & Eurasian Studies, MA (p. 2228)

Certificate and Licensure Programs

- Library & Information Science, CAS (p. 1626) (on-campus & online)
- School Librarian Licensure (https://ischool.illinois.edu/degrees-programs/graduate/ms-library-and-information-science/school-librarian-licensure/)
  - Available in conjunction with the MS in LIS and Certificate of Advanced Study (CAS) in LIS

Non-Degree Graduate Courses

- Overview of Non-Degree Programs (https://ischool.illinois.edu/degrees-programs/graduate/non-degree-programs/)

The iSchool allows students to enroll as non-degree students. You don't have to be formally admitted to the University of Illinois to take iSchool graduate courses, you just need to have earned a bachelor's degree. Our program allows you to experience our courses before you apply to our degree programs—and if you decide to join, you can apply up to 12 graduate credit hours toward our degree requirements.

For more information on our graduate programs, visit Graduate Programs (https://ischool.illinois.edu/degrees-programs/graduate/) page.

Website: School of Information Sciences (https://ischool.illinois.edu)

IS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/IS/)

Courses

IS 100 Exploring the iSchool with a Human-Centered Lens credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/IS/100/)
This course introduces students to the School of Information Sciences (iSchool). Students will explore career and professional development within information sciences, building their leadership and collaborative skills, and building a network within and beyond the iSchool. Through a human centered design project focused on an information science problem, students will gain experience and a better understanding of the process to develop an innovative solution addressing a societal need. Prerequisite: Restricted to Majors Only; First Semester Freshman, Intercollegiate and Off-Campus Transfer Students Only.

IS 101 Introduction to Information Sciences credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/101/)
This course provides an introduction to the field of information science and the major. It offers both historical and contemporary context for understanding the role of information in society. Focus is placed upon critical analysis of information problems as well as understanding the creation, use, and distribution of information in business, policy, education, government, health, and other sectors.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

IS 107 Data Science Discovery credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/107/)
Same as CS 107 and STAT 107. See STAT 107.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

IS 142 Social History of Games and Gaming credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/142/)
A survey of the history of gaming from the ancient world through the twentieth century, and its impact on science, society, and culture.

IS 145 Mapping Inequalities credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/145/)
Immerses students in the history of Inequality in the United States through mapping the geographic, historical, and/or social movement of minority cultures using quantitative and social science methods. Topics vary by section, but each section emphasizes experiential learning through community-engaged scholarship, field-trips, or computer programming projects. No previous computer programming experience is required. No previous computer programming experience is required. Prerequisite: This course is intended for first and second year students.
This course satisfies the General Education Criteria for:
Quantitative Reasoning II
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

IS 189 Independent Study credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/189/)
Individual study in a subject related to information sciences not covered in normal course offerings. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of instructor. Submission of "Request to Enroll in IS Independent Study".

IS 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/IS/199/)
Undergraduate Open Seminar. Additional fees may apply. See Class Schedule. May be repeated.

IS 200 Professional Skills in Information Science credit: 1 or 2 Hours. (https://courses.illinois.edu/schedule/terms/IS/200/)
Provides in-depth career exploration and skill development. Focused on connecting students with various speakers and concepts, the topics aim to help students build a strong foundation of essential skills and knowledge in information science. This course will help prepare students for experiential learning courses and internships, and is relevant for undergraduate students at all stages of their academic career. May be repeated (limit of 3 experiential hours count towards IS electives). Prerequisite: For Information Science Majors Only.

IS 202 Social Aspects Info Tech credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/202/)
Explores the way in which information technologies have and are transforming society and how these affect a range of social, political and economic issues from the individual to societal levels. Same as INFO 202 and MACS 202.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

IS 203 Analytical Foundations for Information Problems credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/203/)
A survey of mathematical topics for students in information sciences. Provides an introduction to sets, relations, graphs, grammars, probability, and propositional and predicate logic. These topics relate to applications in information modeling, representation and expression. Prerequisite: MATH 112 or Required ALEKS Score.
This course satisfies the General Education Criteria for:
Quantitative Reasoning II

IS 204 Research Design for Information Sciences credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/204/)
This course provides an introduction to different approaches to research in the information sciences, including social science methods, data and text mining, digital humanities, historical approaches, and others. Topics include methods for evaluating research, developing research questions, selecting research methods, conducting research ethically, and communicating findings clearly and effectively through words, graphics, and other visualizations.

IS 205 Programming for Information Problems credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/205/)
Covers common data processing methods and computing concepts used in the information sciences. Evaluates strengths and weaknesses of the techniques in the context of our discipline. No prior programming background is assumed. Course will use the Python programming language.

IS 206 Introduction to Database Concepts & Applications credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/206/)
Introduction to database technology concepts and architecture. Explore data types and reading/writing database layout descriptions. Discussion of database ethics and privacy concerns. Comparison of different database systems a user might encounter including RDBMS, XML/RDF/JSON, NOSQL, and Graph database systems. Labs involving common database tools and exercises in SQL. Prerequisite: Some basic programming experience recommended.

IS 226 Introduction to HCI credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/226/)
This course introduces students to fundamental theories and techniques in Human-Computer Interaction (HCI). This course presents basic tools and methods for creating, designing, prototyping, and evaluating user interfaces to computing applications and web sites. Students will explore course content by conducting individual and group hands-on projects. Assignments involving prototyping can be implemented by self-selected solutions, e.g. Axure, JavaScript. Students from all backgrounds are welcomed.

IS 229 Web Design Fundamentals credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/229/)
In this course students will learn the principles and methodologies of modern Web design and development, while also becoming familiar with the history of the Web. Students will develop useful practical skills through hands-on engagement with open-source tools, platforms, and resources, while also acquiring a critical understanding of current challenges around such topics as web-standards, security, and accessibility. Students will also become familiar with philosophical models and practical frameworks for creating human-centered systems and will apply such constructively critical understandings in their own web design projects.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

IS 234 Introduction to Risk and Cybersecurity credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/234/)
Cyber risk, cybersecurity and related concepts create a foundation for exploring the importance of threat awareness, intelligence and identification to personal and organizational security postures. Topics including password hygiene, threat actors, data collection, use and sharing and the CIA Triad, Cyber Kill Chain, Attack Vectors and Attack Surfaces are explored. The role of governments, human behavior, frameworks, standards, systems and compliance requirements all inform security decisions while creating significant career options for those interested.

IS 236 User Research & Evaluation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/236/)
This course will teach students about user research and evaluation. They will learn to apply various user research methods, gather and understand user requirements and needs for a wide range of user populations, especially those that are under-served (e.g., children, older adults, people with disabilities), conduct user evaluations of prototypes and interactive systems, and communicate effectively about the research insights and make actionable design suggestions. Prerequisite: IS 204, or IS 226, or equivalent course.

IS 249 BSIS Practicum credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/249/)
A professional field experience program designed to provide the student with the opportunity to work in a professional environment under the supervision of an experienced information professional with the guidance of a faculty advisor. This opportunity allows students to integrate the theory and knowledge of course content with the application of principles and practices in a work environment, including these specific objectives Approved for S/U grading only. Prerequisite: IS 101 or IS 202. Restricted to BSIS students only.

IS 265 Innovation Illinois: From Accessible Design to Supercomputing Cultures credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/265/)
Same as CS 265 and MACS 265. See MACS 265.

IS 266 Community Innovation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/266/)
How do communities contribute to transformative, world-changing innovations? Why is their participation indispensable for fostering change? And what makes change ultimately transformative across diverse spaces and time? Community Innovation explores how engagement with interdisciplinary communities and collaborations, as well as histories of globally-changing local innovations from the Illinois were critical to fostering and sustaining new social and technical practices across space and time. Same as CS 266 and MACS 266.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

IS 269 BSIS Internship credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/IS/269/)
Designed to provide students an opportunity to apply the skills and concepts learned in Information Sciences classes to a work environment. Students will complete internships of their choosing under supervision and will be expected to complete activities online including a reflective paper and presentation. The goal of this course is to provide an experience that will form a connection between a student's academic career and career goals for the future. Approved for S/U grading only. May be repeated. Prerequisite: IS 101 or IS 202. Restricted to BSIS students only.

IS 299 Information Science Study Abroad credit: 0 to 18 Hours. (https://courses.illinois.edu/schedule/terms/IS/299/)
Provides campus credit toward the undergraduate degree for study at accredited foreign institutions or approved overseas programs. Final determination of credit and its application toward the degree is made by the School of Information Sciences (iSchool) office after a review of the student's work abroad. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 44 hours. Maximum of 18 hours per regular term. Summer session, 0 to 8 hours. Prerequisite: One academic year (or one semester in the case of transfer students) of full-time residence at UIUC, good academic standing, and prior approval of the School of Information Sciences. Consent of major department, school, and Study Abroad Office.

IS 304 Advanced Research Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/304/)
This course is a practical, hands-on class in social science research methods in the field of information sciences. Students will learn both qualitative and quantitative methods, including survey design, interview techniques, and observation strategies. Examples and practical exercises will be geared towards future work as information professionals and will enable students to design and apply research strategies that help them understand the intersections between people, information, and technologies. Prerequisite: IS 204, or IS 236, or similar research course.

IS 305 Programming for Information Problems II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/305/)
Continuing coverage of common data processing and computing methods in the information sciences. Building on programming skills from IS 205, additional programming patterns will be explored, and additional tools like the command line and version control will be explored in the context of information problems. Course will be in Python. Some Python review will be provided, but students without prior experience in Python should contact the school or instructor for review material. Prerequisite: IS 205, or CS 101, or CS 105, or CS 125, or ECE 120, or equivalent. Basic programming (Python) proficiency required.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

IS 308 Race, Gender, and Information Technology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/308/)
In this course we will critically examine the ways in which information and communication technologies (ICTs) are shaped by – and help to shape – social relations of race and gender; and we will extend our review to other categories of identity and exclusion as well, such as age, ability, geography and ethnicity. We will also explore the various benefits and burdens of the information society and how these are socially distributed, and conduct case-studies of policies, practices, and programs designed to enhance opportunities and/or mitigate disadvantages through the creative or disruptive use of ICTs. Directed and supervised investigation of selected topics in information studies that may include among others computers and culture; information policy; community information systems; production, retrieval and evaluation of scientific or social science knowledge; computer-mediated communication; and computer-supported cooperative work. Prerequisite: IS 202 Highly recommended. Sophomore standing.

IS 309 Computers and Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/309/)
This course explores cultural ideas about computers, including hopes and fears about the effects of computers on our lives. We will analyze images of computers in fiction and movies. The course will also discuss hackers, online subcultures, and other computer-related subcultures, and the integration of computers into various cultural practices. The course will also explore the different uses of digital media. Prerequisite: IS 202 Highly recommended.

IS 310 Computing in the Humanities credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/310/)
Explores use and application of technology to scholarly activity in the humanities, including projects that put classic texts on the web or create multimedia application on humanities topics. Same as INFO 310. Prerequisite: Sophomore standing.

IS 311 History and Foundations of the Information Society credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/311/)
Today's information society bespeaks a long history, exhibiting marked continuities with the past as well as some sharply defined new features. Yet the historical foundations of the information society remain poorly understood. This course develops such a framework, by examining emergent information institutions and practices from early modern Europe to the later 20th century. It examines the historical development of the information society through a number of important conceptual lenses, including: modernity and post-modernity; Fordist and post-Fordist capitalism; social class and information poverty; social and technological determinism; utopianism and dystopianism; and empire and globalization. Prerequisite: IS 202 Highly recommended.

IS 312 Reading and Writing Data credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/312/)
Explores how we tell stories and make arguments in the age of the internet and "big data." We will explore both creative and scholarly works that experiment with the forms of expression that digital and online media make possible, and others that question the cultural, political, and social consequences of computational media and data. Students will develop skills for writing _about data_ and writing _with data_ through a variety of media.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Lit Arts

IS 316 The Design of Usable Information Interfaces credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/316/)
Examines issues of Human Computer Interaction and the design of better computer interfaces. Prerequisite: Sophomore standing.

IS 324 Social Network Analysis credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/324/)
Introduces theories of social networks (how they form, and how they influence thoughts, feelings, and behaviors), while also providing hands-on experience with some powerful tools and methods for analyzing networks on various scales, ranging from small groups, to communities, to populations. It will also explore the use of network analysis to reveal patterns in large-scale data from the humanities such as periods of literary narrative, or character development across vast narratives with multiple interweaving plot lines. Same as SOC 324.

IS 327 Concepts of Machine Learning credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/327/)
A dramatic increase in computing power has enabled new areas of data science to develop in statistical modeling and artificial intelligence, often called Machine Learning. Machine learning covers predictive and descriptive learning, and bridges theoretical and empirical ideas across disciplines. We will focus on concepts and methods for predictive learning: estimating models from data to predict unknown outcomes. Model types will include decision trees, linear models, nearest neighbor methods, and others as time permits. We will cover classification and regression using these models, as well as methods needed to handle large datasets. Lastly, we will discuss deep neural networks and other methods at the forefront of machine learning. We situate the course components in the "data science life cycle" as part of the larger set of practices in the discovery and communication of scientific findings. The course will include lectures, readings, homework assignments, exams, and a class project. Most of the course activities will use Python with the Pandas library, which students should already be proficient using. Students will learn how to use the scikit-learn Python library for machine learning during this course. Prerequisite: Students should be familiar with the concepts of tabular data (tables) and data types (categorical, ordinal, continuous, etc.) and be able to implement these concepts in Python using Pandas. Either STAT/CS/IS 107, IS 205, INFO 407, or at least 1 semester of programming experience using Python and Pandas is recommended as a prerequisite. Students should also be comfortable with basic geometry concepts such as points, lines, and distances. Restricted to Sophomore, Junior, or Senior standing.

IS 334 Usable Privacy and Security credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/334/)
From passwords to email encryption to privacy settings on social media services, it is widely recognized that human factors, usability or user experience play a crucial role in effective privacy and security solutions. Designers of privacy and security solutions need to understand how people might use, interact or appropriate the mechanisms they develop. This course introduces various aspects of user experience (e.g., usability problems, user interface designs, conflicting needs) related to privacy and security systems. It is also designed to provide students with knowledge and opportunities to analyze and evaluate user experience of privacy and security systems. This course is suitable for students who are interested in privacy and security, or user experience, or both!.

IS 340 Project Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/340/)
Focuses on project management methodology that will allow you to initiate and manage projects efficiently and effectively. You will learn key project management skills and strategies, and you will have the opportunity to apply this knowledge through assignments.

IS 357 Introduction to Data Storytelling credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/357/)
Storytelling thinking, introducing students to the philosophical, social, and relational dynamics of "story" in information organizations of all sizes. Students are exposed to a range of opportunities to apply storytelling thinking as a tool to identify the audience, design means to communicate with them, and develop dynamic triangle of people sharing stories, engaging in constructive dialogs and reinterpreting etc.

IS 364 Privacy and Information Technology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/364/)
Designed to be an introduction to data privacy to a wide audience who wants to learn how data privacy has evolved as a compelling concern to public and private organizations as well as individuals. It will provide an overview of privacy theories and the challenges that information technology innovations pose to privacy. Course content will focus on enhancing information professionals' knowledge of privacy threats and protections in the digital age.

IS 368 Youth Community Engagement credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/368/)
This course examines youth services by surveying how youth serving organizations meet young people's developmental, informational, social, personal, and cultural needs through programs and services. The course will provide both practical experience and theoretical knowledge for understanding the value and impact of youth services programs; strategies, techniques, and resources for developing these programs; approaches for ensuring programs are relevant to service communities; and methods for assessment and evaluation of program success.

IS 370 Concepts of Information Behavior Theory credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/370/)
This course will introduce students to the relationships between users and the information they encounter. Students will become familiar with the concepts of understanding the information needs and information behavior of users, as well as the methods of accessing and assimilating information employed by users. The course will also introduce a range of the major models and theories employed in exploring information needs and behavior. Prerequisite: IS 204, or equivalent course.

IS 378 Information Technology Services for Youth credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/378/)
This course examines the intersections between youth, information, and technology from a socio-technical perspective. This course will provide both practical experience and theoretical knowledge for understanding the ways youth engage with information via technology, as well as various developmental, social, personal, and cultural contexts that inform those interactions. Students will evaluate examples of youth information and communication technology use and analyze factors including identities, educational and social structures, opportunities and risks, learning and literacy, and potential futures in these areas. Prerequisite: IS 358 Highly recommended.

IS 380 Consulting for Information Professionals credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/380/)
Designed to provide fundamental knowledge and innovative approaches to consulting practices. Information professionals are increasingly being challenged to provide actionable insights and recommendations based that are critical for strategic decision making. Using methodologies widely adopted by professional firms and researchers, this course covers the basics of data-driven consulting including framing research problems, developing deliverables, and presenting professionally.

IS 381 Introduction to Literacies for Youth credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/381/)
An overview of youth literacies covering: popular literacy myths, censorship, cognitive processes behind reading, visual and digital literacies, contemporary youth practices, government policies, and literacy education in schools. Course readings include fictional works and scholarship from the fields of education, library science, history, media studies, critical race studies, and literary and cultural studies. Students learn the history of marginalized youth in America in order to understand how literacies are defined, promoted, or stigmatized today.

IS 389 Independent Study credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/389/)
Advanced individual study in a subject related to Information Sciences not covered in normal course offerings. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Consent of instructor. "Request to Enroll in IS Independent Study". Restricted to students with Junior level standing or above.

IS 390 Special Topics in Information Studies credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/IS/390/)
Directed and supervised investigation of selected topics in information studies that may include among others computers and culture; information policy; community information systems; production, retrieval and evaluation of scientific or social science knowledge; computer-mediated communication; and computer-supported cooperative work. May be repeated. Prerequisite: Sophomore standing.

IS 400 Colloquium credit: 0 or 1 Hours. (https://courses.illinois.edu/schedule/terms/IS/400/)
Venue for presentation and discussion of research and professional activities by faculty, students, staff, and guest speakers. 0 or 1 undergraduate hours. 0 or 1 graduate hours. Approved for Letter and S/U grading. May be repeated in separate semesters.

IS 401 Introduction to Network Information Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/401/)
This course provides a deep hands-on sociotechnical dive into technology including electronics, software, and networks culminating in a holistic understanding of networked information systems. The course also explores the methodological landscape of networked information systems including theoretical assumptions, research methods, and research techniques. Throughout, students will be introduced to, and make active use of, skillsets, frameworks, and standards employed by a wide range of information professionals in selecting, co-designing, appropriating, and innovating-in-use networked information systems. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 403 Children's Materials credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/403/)
Evaluation, selection and use of books and other resources for children (ages 0-14) in public libraries and school media centers; explores standard selection criteria for print and nonprint materials in all formats and develops the ability to evaluate and promote materials according to their various uses (personal and curricular) and according to children's various needs (intellectual, emotional, social and physical). 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: For undergraduates, junior or senior standing and consent of instructor.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 406 Cognition in the Wild credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/406/)
Designed as a foundation for students who are interested in learning how to design human-centered information technologies. Students will learn basic principles in human cognition and behavior, and how these principles influence how we interact with information technologies. The course will prepare students to translate theories in human cognition and behavior to analyze, evaluate and rethink everyday design examples. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 407 Introduction to Data Science credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/407/)
This course introduces students to data science approaches that have emerged from recent advances in programming and computing technology. They will learn to collect and use data from a variety of sources, including the web, in a modern statistical inference and visualization paradigm. The course will be based in the programming language R, but will also use HTML, regular expressions, basic unix tools, XML, and SQL. Supervised and unsupervised statistical learning techniques made possible by recent advances in computing power will also be covered. 4 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 409 Web Technologies & Techniques credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/409/)
This course provides an introduction to the technologies behind the Web. Topics covered include: hypertext, hypermedia, the history of the Web, the role of Web standards and their impact on the development of Web resources. The course introduces principles of Web design and usability. Students will gain an understanding how the Web works and how to design, construct, evaluate, and maintain Web-based materials. 3 undergraduate hours. 4 graduate hours. Priority is given to students pursuing a transfer into the BS/IS degree (http://go.ischool.illinois.edu/BSIS).
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 410 Storytelling credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/410/)
Fundamental principles of the art of storytelling including techniques of adaptation and presentation; content and sources of materials; methods of learning; practice in storytelling; planning the story hour for school and public libraries and other public information settings; and audio, video, and digital media. 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: For undergraduates, junior or senior standing and consent of instructor.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 411 Information Systems Analysis credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/411/)
This is an introductory course to Information Systems Analysis. Information Systems Analysts are typically involved in an entire information systems development life cycle from initial planning to final assessment. Several different approaches have been used. Students will gain experience in several aspects of Information Systems Analysis, including business process modeling, requirements gathering, data flow diagramming, and database design. This is a hands-on course with in-class exercises and group practical assignments. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 413 Teen Materials credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/413/)
Evaluation, selection and use of books and other resources for young adults (ages 12-18) in public libraries and school media centers; explores standard selection criteria for print and nonprint materials in all formats and develops the ability to evaluate and promote materials according to their various uses (personal and curricular) and according to young adults' various needs (intellectual, emotional, social and physical). 3 undergraduate hours. 2 or 4 graduate hours. Prerequisite: For undergraduates, junior or senior standing and consent of instructor.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 416 Adaptive Minds and Computers credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/416/)
Given the rapid changes in information environments, emerging research has shown how human adapts to the complex information environments through different self-regulated processes. This course will discuss the evolving theories of human performance in the contemporary information environments, including how people select, search, make sense and make decisions among a huge amount of information; how information environments shape individual and collective human performance; and how people adapt to information environments for forming coupling cognitive systems. 3 undergraduate hours. 4 graduate hours. Prerequisite: IS 406.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 417 Data Science in the Humanities credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/417/)
Human culture provides an ideal testbed for students exploring data science, because the interpretive challenges that lurk beneath the surface in other domains become starkly visible here. For instance, cultural materials usually come to analysts as unstructured texts, images, or sound files, forcing explicit decisions about data modeling and feature extraction. Cultural questions also highlight the importance of interpreting statistical models in relation to a social context. Last but not least: songs, poems, and stories confront us with vivid problems that are inherently fun to explore. This course will start by reviewing descriptive and inferential statistics, and build up to applications of supervised and unsupervised machine learning. We will apply those methods to a range of cultural materials using them to model the pace of stylistic change in popular music, for instance, and the representation of gender in fiction. 3 undergraduate hours. 4 graduate hours. Prerequisite: One semester of experience programming, for example, STAT 107 or IS 430 - or any analogous course.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 418 Community Engagement credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/418/)
Community engagement refers to the multiple ways that information professionals in libraries and other settings learn about, collaborate with, and provide service and outreach to community members. Provides an introduction to, and overview of, community engagement theory and practice. A significant portion of coursework will take the form of service learning or community-based research via approved projects that match students' interests. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 419 Entrepreneurial Information Technology Design credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/419/)
Introduces students to a range of rapid prototyping techniques and methods to analyze needs, opportunities and design spaces. Students will work in teams to develop ideas for novel computational devices or applications to meet identified needs. Covers the interlinked entrepreneurial skills of identifying an unmet need, exploiting technological opportunities, exploring a design space to refine an idea, and communicating a design vision through demonstrations with prototypes and proofs of concept. This enables developers to show how their envisaged working interactive technology will be used productively in a particular real-life context. Communicating the vision of computational devices is a challenge because dynamic use in context is hard for people other than the device's developers to imagine. The ability to produce convincing, clear, powerful demonstrations even at the early stages of a project is a highly valuable entrepreneurial skill, and also highly applicable within an organization. Directed and supervised investigation of selected topics in information studies that may include among others the social, political, and historical contexts of information creation and dissemination; computers and culture; information policy; community information systems; production, retrieval and evaluation of knowledge; computer-mediated communication. 3 undergraduate hours. 4 graduate hours. Prerequisite: Undergraduate students: Priority is given to students pursuing a transfer into the BS/IS degree (http://go.ischool.illinois.edu/BSIS).
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 420 Community Informatics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/420/)
Surveys an emerging field that studies how local, historical communities are using information and communications technologies. Key principles and hands-on experience equip students for contributing to the non-profit/public sector as people harness new technologies and media– be they individuals, students, families, community organizations, or other. Prepares future professionals and researchers to understand and master this environment, whatever their technology background. Especially useful for those interested in public or community libraries, youth services, social work, education, and anyone interested in working with or studying underserved communities. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 423 Early Literacy credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/IS/423/)
Librarians fill a key role in the literacy development of young children with opportunities for interaction both in the library and through outreach programs. Key skills center on developing literacy-rich library environments, classroom instructional support, intentional embedding of essentials skills and practices within daily activities and lessons, resources about early literacy strategies to share with families and caregivers. Practitioners will understand the importance of integration of technology to meet the diverse developmental, cultural, social and linguistic needs of children to ensure they are able to create meaning from text. 2 undergraduate hours. 2 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 424 Social Computing credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/424/)
This interdisciplinary course introduces students to fundamental theories, methods, technologies and applications of social computing. Students learn about this emerging discipline from two perspectives: First, basic principles of collective information production and processing, and methods for studying these principles. Topics include prediction markets, games with a purpose, open source software development, social media, social networks, information visualization, and online games. Second, socio-technical aspects of the design and usage of respective technologies. This includes participation, privacy and security. Students learn how to solve problems in social computing in a systematic and rigorous fashion. At the end of the course, students will be able to design, manage and execute social computing projects for scholarly and commercial use, and to critically assess work in this area. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 426 Museum Informatics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/426/)
The course examines various ways that information technologies are and might be used in museums and other cultural heritage settings. Museum websites, visitor apps, interactive exhibits, and uses of digitized and federated collections are explored. Students gain an introduction to Design Thinking by working on a final project that involves the development of a novel computational resource. Students are encouraged to approach class topics from their individual backgrounds in the humanities, sciences, or social sciences. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior or senior standing and consent of instructor for undergraduates; consent of instructor for non-iSchool graduate students for on-campus sections.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 427 Mathematical Foundations for Data Analytics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/427/)
An introduction to topics and techniques in transformational geometry, linear algebra, and calculus most relevant for the study of multivariate analysis, and demonstrates their roles as bases for solving data analytic problems in the information sciences. 3 undergraduate hours. 4 graduate hours. Prerequisite: Recommended IS 203; or IS 205; or IS 206; or equivalent course.

IS 429 Web Content Strategy and Management credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/429/)
Focuses on the basics of web site design, content development, constructing web pages with standard HTML and CSS. We will also cover usability and accessibility, content management system options, multi-media and interactivity in the context of standard HTML and CSS, procedures and policies for organizations, with a concentration on public, academic and special libraries. Students will investigate, design, and draft a representative site. Students may work with non-profit and library clients in constructing and redesigning their web sites or design and construct their own personal professional pages. In this course we will learn how to design and deploy flexible websites that serve dynamically changing content, focusing in particular on the needs of public-service organizations such as libraries, associations, and other not-for-profit entities. 4 undergraduate hours. 4 graduate hours. Prerequisite: Laptop Required.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 430 Foundations of Information Processing credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/430/)
Covers common data, document processing, and programming constructs and concepts. Focuses on problem solving and abstraction with a programming language. By the end of the course students will be able to design, develop and test a moderately complex computer program to manage full text, bibliographic records or multimedia. The course prepares students for working with applications in data analytics, data science, digital libraries, text mining and knowledge management. No prior programming background is assumed. 4 undergraduate hours. 2 or 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 436 Playful Design Methods credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/436/)
In this immersive and experiential course, students consider "playfulness" as a key aspect of design methodologies and practices. Looking closely at the philosophical, social, and relational dynamics of play, we will explore how playful approaches to design thinking, game design, and other gameful methodologies can encourage collaboration, engagement, and emergent, transformative solutions to a range of challenges that face us in our rapidly-changing, information-based culture. The course aims to build student competency in design methods through a sequence of game design experiences arising from a broad consideration of play. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 439 Web Development Using Application Framework credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/439/)
A course in the use and evaluation of Web application frameworks for system architects, designers, and developers. Experience in creating static Web sites using HTML and CSS. 3 undergraduate hours. 4 graduate hours. Prerequisite: Experience in Python programming (IS 430 or equivalent). Experience in creating static Web sites using HTML and CSS. Experience in creating dynamic Web sites using tools like PHP is helpful but not required. Experience in using relational databases is helpful but not required.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 440 Community Informatics Studio credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/440/)
Studio-based learning methods, which are common in art and architectural education, are used to help students address a real-world problem or 'case'. Working in teams and mentored by the instructor and experts, students will learn how to 'be a professional' in an environment in which process is as important as project. During the term, students will participate in a cyclical process of design creation, presentation and critique culminating in a final presentation during the final day(s) of class of the finished proposal/design of how to address the case. Assumes experience in community engagement within a social justice framework. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 441 Strategic Communication credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/441/)
This course introduces students to collaborative approaches to strategic communication designed to persuade, influence and cause action through free and informed choices. There are many methods and tools at the disposal of the strategic communicator. This course will focus on the ethics, forms, techniques and practices of data storytelling as the centerpiece of strategic communications that are appropriate and effective for the information professional. Students learn to coordinate multiple aspects of human-centered information solutions such as information visualizations. Serving diverse information needs and ensuring those needs are met, future information professionals are expected to understand, support, and innovate dynamism of the relationships between people, information and technology. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 444 Legal Aspects of Information Systems credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/444/)
This course is intended to introduce students to principles, fundamental ideas, and cases in the Legal Aspects of Information Systems, with an emphasis on Intellectual Property Law and using scholarship as an exemplar information system, which is considered broadly. This course will be conducted in a seminar format and survey the literature and case law including copyright and open licensing, patents, and trademark law. We will discuss recent policy changes and their impact on the Intellectual Property rights. Where appropriate we will compare American jurisprudence to international Intellectual Property Law. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 445 Data Visualization credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/445/)
Data visualization is crucial to conveying information drawn from models, observations or investigations. This course will provide an overview of historical and modern techniques for visualizing data, drawing on quantitative, statistical, and network-focused datasets. Topics will include construction of communicative visualizations, the modern software ecosystem of visualization, and techniques for aggregation and interpretation of data through visualization. Particular attention will be paid to the Python ecosystem and multi-dimensional quantitative datasets. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 446 Systems Analysis and Design credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/446/)
Covers how to evaluate, select and manage information systems that will be used in the daily operation of libraries and information centers. Includes the systems used by technical staff and the information consumers. Course will focus on information as a product. Attention is given to the operation of an organization as a whole and the impact of change on the integration of resources, work flow and usability. Formal methods for modeling systems, and industry practice techniques of analysis are used to address these problems and opportunities. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 449 Web Application Development credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/449/)
This course focuses on concepts and skills needed to build full stack web applications. Topics include Model-View-Controller architecture, database access, business logic implementation, advanced client-side scripting, authentication, and application security. Students will use popular client-side and server-side web application frameworks, such as React.js and Django, to study how these concepts are implemented in practice and to apply design/development principles to build realistic web applications. 3 undergraduate hours. 4 graduate hours. Prerequisite: IS 205, IS 206, and IS 229.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 451 Bibliography of Africa credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/451/)
We will focus on the identification and evaluation of African studies reference sources and library techniques as a foundation for in-depth research. Sources covered will be in all formats, including print, microform and electronic resources. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 453 Information Books and Resources for Youth credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/453/)
Evaluation, selection and use of information books and other resources for young people (ages 0-18) in public libraries and school media centers; explores standard selection criteria for factual print and nonprint materials in all formats and develops the ability to evaluate and promote nonfiction books and resources according to their various uses (personal and curricular) and according to young people's various needs (intellectual, emotional, social and physical). 3 undergraduate hours. 2 or 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 455 Database Design and Prototyping credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/455/)
The course provides students with both theoretical and practical training in good database design. By the end of the course students will create a conceptual data model using entity-relationship diagrams, understand the importance of referential integrity and how to enforce data integrity constraints when creating a database. Students will be proficient in writing basic queries in the structured query language (SQL) and have a general understanding of relational database theory including normalization. 4 undergraduate hours. 4 graduate hours. Prerequisite: Junior Standing required.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 456 Information Storage and Retrieval credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/456/)
Introduces problems of document representation, information need specification, and query processing. Describes the theories, models, and current research aimed at solving those problems. Primary focus is on bibliographic, text, and multimedia records. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 457 Data Storytelling credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/457/)
An introduction to understanding data as a source for storytelling and to telling stories based on data. This process will include understanding and analyzing data sets to find informative aspects, changes, or contrasts that will provide the basic information for developing stories. Course participants will learn storytelling concepts, narrative theories, and performance techniques and develop stories in a collaborative workshop style. Students will work with data visualization toolkits, which will involve variable levels of coding and skill. By using storytelling techniques with data, students can develop, and tell well-evidenced stories, organizations can make better data-driven decisions. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 459 Mobile Applications credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/459/)
This course introduces students to the fundamental concepts, cutting edge technologies and state-of-the-art research in Human Computer Interaction areas of mobile computing and ubiquitous computing. The course presents major mobile application domains systems design challenges, and design opportunities. Students' understanding will be reinforced through practical work in mobile system design, e.g., applying a video prototyping tool to design and evaluate a mobile system. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 461 Russian, East European, and Eurasian Bibliography & Research Methods credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/461/)
With a focus on Russia, Eastern Europe, and Eurasia, students will investigate this fascinating part of the world, how it has been studied and represented by generations of scholars, scientists, writers, artists, government officials, and others, and how the many fruits of their labors are (or are not) accessible to us today. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 464 Information Assurance credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/464/)
The course provides an introduction to the concepts, technologies, practices and challenges of Information Assurance. It takes a broad view of Information Security and Privacy and covers the essential principles for the protection of information systems; the relevant technologies; organizational concerns; policies, human aspects; legal approaches; criminology; and ethical issues. Students will gain an appreciation for the difficulty of designing, developing, deploying and maintaining information systems, services and software products that are secure and comply with expectations of security and privacy. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 466 Accessible and Inclusive Technologies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/466/)
This course introduces students to various technology challenges and needs of under-served populations (e.g., people with disabilities). We will examine various accessible and inclusive technologies to understand how they were built to serve specific under-served user groups but can also benefit a wider range of users. This course will also cover various design frameworks, guidelines and processes to create more inclusive designs and technologies. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 467 Ethics and Policy for Data Science credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/467/)
The course will address common ethical challenges related to data including privacy, bias, and data access. These challenges will be explored through real-world cases of corporate settings, non-profits, governments, academic research, and healthcare. The course emphasizes the complexity of ethical decision-making and that trade-offs between priorities are often necessary. The course also considers how the burdens of addressing ethical concerns should be distributed among stakeholders. Students will be introduced to a range of relevant policy responses at the organizational, institutional, governmental,and supranational levels. 3 undergraduate hours. 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 471 Instructional Strategies and Techniques for Information Professionals credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/471/)
Provides an introduction to learning theories and instructional methods used in a variety of information settings, including libraries, archives, museums, online, and educational environments. Includes an overview of theoretical and applied research and discusses relevant issues and concepts. Students will have an opportunity to design and present an instructional program. 3 undergraduate hours. 2 or 4 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 477 Data Management, Curation & Reproducibility credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/477/)
Addresses issues in Data Management, Curation & Reproducibility from a Data Science perspective. We discuss definitions of data science, and then introduce and use the Data Science Life Cycle as an intellectual foundation. Topics include Research Artifact Identification and Management, Metadata, Repositories, Economics of Artifact Preservation and Sustainability, and Data Management Plans. We use the case study to ground our discussions in both data sets and in specific data science research. This course requires a final project that applies course knowledge to a data science experiment and creates a data management plan for that experiment. 3 undergraduate hours. 4 graduate hours. Prerequisite: IS 205 or STAT 207 or equivalent programming experience.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 490 Topics in Info Foundations credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/490/)
Directed and supervised investigation of selected topics in information studies that may include among others the social, political, and historical contexts of information creation and dissemination; computers and culture; information policy; community information systems; production, retrieval and evaluation of knowledge; computer-mediated communication. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. Approved for Letter and S/U grading. May be repeated. Prerequisite: For undergraduates, junior standing and IS 202, or consent of instructor.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 491 Topics in Information Services credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/491/)
Variety of newly developed and current topics courses within the field of information services, intended to augment the existing Information Sciences curricula. 3 undergraduate hours. 2 to 4 graduate hours. May be repeated if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 492 Topics in Information Organizations & Social Contexts credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/492/)
Variety of newly developed and current topics courses within the field of information organizations and social contexts, intended to augment the existing Information Sciences curricula. 3 undergraduate hours. 2 to 4 graduate hours. May be repeated if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 493 Topics in Cultural Heritage, Collection Management & Preservation credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/493/)
Variety of newly developed and current topics courses within the field of information cultural heritage, collection management and preservation, intended to augment the existing Information Sciences curricula. 3 undergraduate hours. 2 to 4 graduate hours. May be repeated if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 494 Topics in Management, Ethics & Policy credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/494/)
Variety of newly developed and current topics courses within the field of management ethics and policy, intended to augment the existing Information Sciences curricula. 3 undergraduate hours. 2 to 4 graduate hours. May be repeated if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 495 Topics in Organization & Representation credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/495/)
Variety of newly developed and current topics courses within the field of information organizations and representation, intended to augment the existing Information Sciences curricula. 3 undergraduate hours. 2 to 4 graduate hours. May be repeated if topics vary.

IS 496 Topics in Human-Centered Design & Systems credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/496/)
Variety of newly developed and current topics courses within the field of human-centered design and systems, intended to augment the existing Information Sciences curricula. 3 undergraduate hours. 2 to 4 graduate hours. May be repeated if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 497 Topics in Data Analytics & Data Science credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/497/)
Variety of newly developed and topics courses within Data Analytics & Data Science, intended to augment the existing Information Sciences curricula. Additional fees may apply. See Class Schedule. 2 to 4 undergraduate hours. 2 to 4 graduate hours. May be repeated if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 499 Topics in Web Design & Development credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/499/)
Variety of newly developed and current topics courses within Web Design & Development, intended to augment the existing Information Sciences curricula. 3 undergraduate hours. 2 to 4 graduate hours. May be repeated if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 500 Introduction to the iSchool credit: 0 to 2 Hours. (https://courses.illinois.edu/schedule/terms/IS/500/)
Introduces graduate students to the School of Information Sciences (the iSchool). Students will learn best practices for success in their program. They will also learn about resources and support provided by the School and the University while building community among their peers, faculty, staff and alumni. Various sections address different graduate student audiences and needs. Approved for Letter and S/U grading.

IS 501 Reference and Information Services credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/501/)
Explores reference and information services in a variety of settings, introduces widely used print and online sources, and develops question negotiation skills and search strategies.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 503 History of Children's Lit credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/503/)
Interpretation of children's literature from the earliest times, including the impact of changing social and cultural patterns on books for children; attention to early printers and publishers of children's books and to magazines for children.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 504 Sociotechnical Information Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/504/)
The character, success, and costs/benefits of information technologies are socio-technical matters. Because of this, best practice for IT design and integration relies on participants' ability to understand and create for the totality of those settings, including social and technical dimensions. This course provides students with analytic tools for examining socio-technical settings and experience in applying that knowledge in IT modeling, design and management.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 505 Information Organization and Access credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/505/)
Emphasizes information organization and access in settings and systems of different kinds. Traces the information transfer process from the generation of knowledge through its storage and use in both print and non-print formats. Consideration will be given to the creation of information systems: the principles and practice of selection and preservation, methods of organizing information for retrieval and display, the operation of organizations that provide information services, and the information service needs of various user communities.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 506 Human-Centered Information Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/506/)
This course provides students the fundamental theory and skills necessary to design, develop, and evaluate human centered information systems. By the end of the course students will be able to gather user needs in light of existing sociotechnical systems, design effective human centered interfaces, implement interactive prototypes, and conduct unit testing and user studies of software. The course will employ lectures, mini projects and in-class hands-on activities to reinforce the ideas presented.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 507 Data, Statistical Models and Information credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/507/)
An introduction to statistical and probabilistic models as they pertain to quantifying information, assessing information quality, and principled application of information to decision making, with focus on model selection and gauging model quality. The course reviews relevant results from probability theory, parametric and non-parametric predictive models, as well as extensions of these models for unsupervised learning. Applications of statistical and probabilistic models to tasks in information management (e.g. prediction, ranking, and data reduction) are emphasized. Prerequisite: Graduate standing.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 508 Seminar in Information Foundations credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/508/)
This seminar course will offer an advanced graduate survey of research in areas related to information foundations, across a wide range of topics. This course is designed to incorporate multiple guest lectures. Weekly class meetings will be composed of both lectures and discussions. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 509 History and Foundations of Information Science credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/509/)
Provides an introduction to the historical foundations of IS. Examinations of the interactions of socio-cultural, technological and professional factors underlying the emergence of IS provide a basis for exploring more recent developments in theory and practice. Required IS Ph.D. course.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 510 Libraries, Information and Society credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/510/)
Explores major issues in the library and information science professions as they involve their communities of users and sponsors. Analyzes specific situations that reflect the professional agenda of these fields, including intellectual freedom, community service, professional ethics, social responsibilities, intellectual property, literacy, historical and international models, the socio-cultural role of libraries and information agencies and professionalism in general, focusing in particular on the interrelationships among these issues. Prerequisite: Required M.S. in library and information science degree core course.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 511 Scholarly Communications credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/511/)
A basic level of scholarly communication literacy and sophistication is an increasing requirement of academic librarians, both to inform their work and to make those librarians effective partners in the scholarly enterprise. This course is designed to cultivate and develop that literacy. It will address topics such as: the established modes of scholarly communication and the emergence of alternatives influenced by the growth of social media and other forms of networked communication; the divide between formal and informal modes of scholarly communication and the current state of flux as that divide begins to collapse; the varying economies of scholarship (the reputation and prestige economy, the financial economy both in the market and in the mission-driven research academy, and the economic impact of scholarly communication decisions upon library budgets); modes of credentialing scholarship and their impact upon professional advancement, with special attention to peer review and its (current?) discontents; scholarship as intellectual property and the most effective ways to manage that property and achieve scholarly goals; and issues in access and preservation as they relate to ensuring the future of the scholarly conversation.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 514 Applied Business Research credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/514/)
As an experiential learning class, this course covers advanced techniques of business research with an emphasis on managing real-world client projects. Students will be assigned to teams and work with clients to identify research requirements and construct recommendations. Students will acquire critical skills in creating professional deliverables through client engagements. Students will build professional research portfolios at the conclusion of their projects. May be repeated in separate terms up to 8 hours if topics vary. Prerequisite: Instructor approval required.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 515 Information Modeling credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/515/)
Information modeling is critical to all information systems and analysis. This course introduces students to foundational frameworks (set theory and logics) and basic underlying objects (entities, attributes, and relations) of information modeling. A variety of modeling approaches (use case modeling, relational database design, first-order predicate logic, and semantic web technologies) are considered, and recent developments (non-relational databases and knowledge graphs) are reviewed. Modeling strategies are assessed by their expressiveness and reasoning capabilities.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 516 Scalable Information Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/516/)
Focuses on large-scale information systems and analyzes the design and development principles and infrastructures that make them scalable and reliable. Topics include issues in scalability and availability, distributed system design, virtualization, scalability testing, and popular frameworks and platforms, such as Hadoop/MapReduce, Apache Spark, Amazon Web Services. Real-world, large-scale information systems, such as those developed by Google, Amazon, and Facebook, etc., are discussed and analyzed as use cases.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 517 Methods of Data Science credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/517/)
A dramatic increase in computing power has enabled new areas of data science to develop in statistical modeling and analysis. These areas cover predictive and descriptive learning and bridge between ideas and theory in statistics, computer science, and artificial intelligence. We will cover methods including predictive learning: estimating models from data to predict future outcomes. Regression topics include linear regression with recent advances using large numbers of variables, smoothing techniques, additive models, and local regression. Classification topics include linear regression, regularization, logistic regression, discriminant analysis, splines, support vector machines, generalized additive models, naive Bayes, mixture models and nearest neighbor methods as time permits. Lastly we develop neural networks and deep learning techniques, bridging the theory introduced in the earlier parts of the class to purely empirical methods. We situate the course components in the "data science lifecycle" as part of the larger set of practices in the discovery and communication of scientific findings. Prerequisite: IS 507 or equivalent (e.g. intro probability/stats STAT 100, CS 361, or ECON 202); and IS 490 IDS/CS 398 ID/STAT 490 or CS101 or equivalent; or consent of the instructor. Linear Algebra recommended at the level of MATH 125; Calculus recommended at the level of MATH 220.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 518 Seminar in Information Services credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/518/)
Offers an advanced graduate survey of research in areas related to information services, across a wide range of topics. Designed to benefit from guest lectures. Composed of both lectures and discussions. May be repeated in the same or separate terms for a maximum of 16 hours if the topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 519 Research Design in Information Science credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/519/)
Provides an introduction to the design of IS research, beginning with an in-depth consideration of the philosophical and logical underpinnings of research. A brief survey of different methods used in IS research is followed by an exploration of research design issues through comparative hands-on exercises. Throughout the course, the emphasis will be on research design choices, especially the connections between research questions and research methods. Required IS Ph.D. course.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 521 Digital Libraries credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/521/)
A comprehensive examination of the history and state-of-the-art in digital library research and practice. Focuses upon the theoretical, technological, human factors and evaluative components of digital library research and practice. Course includes an intensive reading of the literature, review of existing technologies and proof-of-concepts implementation projects. Students should have access to a personal computer on which they can experiment on their own with downloaded software tools. Students must be competent in basic computing including the installation and configuration of software packages. Prerequisite: IS 505 (formerly IS 501, SP 20 and before) or consent of instructor; previous or concurrent enrollment in IS 430 (formerly IS 452, SU 20 and before) (either the 2 credit hours or the 4 credit hours of Foundations Info Processing are acceptable), or proof of competency in programming.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 522 Library Buildings credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/522/)
Studies the library's physical plant in the light of changing concepts and patterns of library service; analyzes present-day library buildings (both new and remodeled), and their comparison with each other as well as with buildings of the past; examines the interrelationship of staff, collections, users, and physical plant; discussion supplemented by visits to new libraries and conference with their staffs. A two-day field trip is required. Additional fees may apply. See Class Schedule.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 523 Preserving Info Resources credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/523/)
Covers the broad range of library preservation and conservation for book and nonbook materials relating these efforts to the total library environment; emphasizes how the preservation of collections affects collection management and development, technical services, access to materials and service to users.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 524 Data Governance credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/524/)
The course will address issues of data governance, including data ethics, and design and implementation of policy responses and best practices. Topics include privacy, discrimination, data sharing, data quality, and building a diverse workforce. These topics will be explored through real-world cases in corporate settings, libraries, non-profits, healthcare, governments, and academe. The course will also cover principles and frameworks for analyzing and responding to issues. The course is suitable for anyone planning to work in a professional setting that will involve handling data or building information systems, or seeking a grounding for future study of data and information ethics.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 525 Data Warehousing and Business Intelligence credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/525/)
This course examines the construction of a data warehouse and business intelligence system. It will review the roles and requirements of building the system, including data modelling and business intelligence product design. This course will explore real-world case studies of data warehouse and business intelligence projects through hands-on experience with data modelling, Business Objects, Power BI and Tableau. The course culminates with a final project to design a solution for a business case.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 526 Building Advanced Interactive Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/526/)
This course will teach students about building inclusive interactive systems. They will learn to gather and understand user requirements and needs for a wide range of user populations, especially those that are under-served (e.g., children, older adults, people with disabilities), apply inclusive design frameworks and principles, and design, develop, evaluate and improve interactive prototypes in an iterative manner.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 527 Network Analysis credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/527/)
Network Analysis has become a widely adopted method for studying the interactions between social agents, information and infrastructures. The strong demand for expertise in network analysis has been fueled by the widespread acknowledgement that everything is connected and the popularity of social networking services. This interdisciplinary course introduces students to fundamental theories, concepts, methods and applications of network analysis in a practical manner. Students learn and practice hands-on skills in collecting, analyzing and visualizing network data.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 528 Seminar in Information Organizations & Social Contexts credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/528/)
This seminar course will offer an advanced graduate survey of research in areas related to information in Information Organizations & Social Contexts, across a wide range of topics. This course is designed to incorporate multiple guest lectures. Weekly class meetings will be composed of both lectures and discussions. May be repeated in the same or separate terms for a maximum of 16 hours if the topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 529 Doctoral ProSeminar credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/IS/529/)
A core course for all first year Information Science PhD students. The seminar serves as a venue for the development of a variety of skills and capacities to succeed as a scholar. Throughout the term, students will engage in a series of tasks designed as an initiation to the academic profession. The seminar offers a mix of sessions on progression through the Ph.D. degree program, the research process, guidance on the academic profession, and written and oral presentation of scholarly research. While students will receive feedback from the instructor, this is a seminar, meaning that active student participation and peer feedback is crucial. Approved for S/U grading only. May be repeated in separate semesters to a maximum of 4 hours. Prerequisite: PhD Students in Information Sciences.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 530 Collection Development credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/530/)
Examines issues affecting the development and management of collections for academic, public, special, and school libraries: collection development policies, collection assessment, the marketplace, publishing, legal issues, and budget allocation; document delivery; collaboration and cooperation. Prerequisite: IS 505 - Information, Organization and Access (formerly IS 501 prior to FA 20), or concurrent enrollment in IS 505 and IS 530.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 532 School Library Management credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/532/)
School Library Information Specialists serve children and young adults (ages 5-18) in K-12 school library media centers. Students will acquire specific knowledge, skills and competencies needed to design, develop, integrate and assess curriculum and instruction with an emphasis on the information needs of K-12 students. Readings and projects provide students with opportunities to apply the practical knowledge and skills they have learned about building reading literacy, teaching information literacy skills, collaborating with teachers and integrating resources into teaching and learning.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 533 Oral History Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/533/)
This methods seminar engages with the theory and practice of oral history through reading, discussion, and practice. Students will: gain hands-on experience with interviewing and transcription, be prepared to work with Institutional Review Boards, understand how to design consent and legal release forms, and will engage with relevant ethical and theoretical issues.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 534 Information Consulting credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/534/)
This course is designed to provide fundamental knowledge in providing research services and also introduce the latest trends and innovative approaches in research services. Information professionals are increasingly being challenged to provide not just data but insights and recommendations that are critical for strategic decision making. Using methodologies widely adopted by professional firms and researchers, this course will cover basics of research consulting including framing research problems, developing deliverables, and presenting professionally.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 537 Theory & Practice of Data Cleaning credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/537/)
Data cleaning (also: cleansing) is the process of assessing and improving data quality for later analysis and use, and is a crucial part of data curation and analysis. This course identifies data quality issues throughout the data lifecycle, and reviews specific techniques and approaches for checking and improving data quality. Techniques are drawn primarily from the database community, using schema-level and instance-level information, and from different scientific communities, which are developing practical tools for data pre-processing and cleaning. Same as CS 513.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 538 Seminar in Cultural Heritage, Collection Management, & Preservation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/538/)
Offers an advanced graduate survey of research in areas related to research in Cultural Heritage, Collection Management, & Preservation, across a wide range of topics. Designed to incorporate multiple guest lectures. Weekly class meetings will be composed of both lectures and discussions. May be repeated in the same or separate terms for a maximum of 16 hours if the topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 540 Social Justice in the Information Professions credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/540/)
Intended to provide a historic and contemporary overview of social justice and advocacy work in librarianship. The course will be primarily focused on activities in the United States, though international movements and perspectives will be addressed. Topics include: desegregation of libraries and professional associations; recruitment and retention of library workers from traditionally underrepresented populations; library outreach; intellectual freedom; and emerging critical theories and issues in the field. Prerequisite: Graduate student.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 541 Copyright for Information Professions credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/541/)
Copyright is a complicated legal concept that affects all information institutions, including corporations, libraries, archives, and museums whether they are online or off. This course will explore copyright from both a legal and information management perspective to demystify the concept and provide practical tools for working with copyrighted material. Topics discussed include the Constitutional underpinnings of copyright, copyright basics, copyright exceptions, fair use, the open access movement, licensing, data and copyright, and educational issues relating to copyright including issues related to K-12 teaching. This course is designed for students with a variety of backgrounds and interests.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 542 Research and Inquiry for Youth credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/542/)
This course is designed to prepare school librarians to serve as instructional leaders in their learning communities, positioned to transform teaching and learning in order to ensure students are college, career, and community ready. Participants will develop strategies and practices to support the school's curriculum through the roles of instructional partner, information specialist, and teacher. The school librarian has a leadership role in designing authentic learning activities in research and guided inquiry to prepare students in both the process and attitudes necessary to identify and meet their own lifelong information needs.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 543 Digital Preservation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/543/)
Examines current problems with and approaches to digital preservation that are fundamental to the long-term accessibility of digital materials. Examines the range of current research problems, along with emerging methods and tools, and assesses a variety of organizational scenarios to plan and implement a preservation plan. Topics include basic information theory, preservation of complex digital objects; standards and specifications; sustainability and risk assessment; authenticity, integrity, quality control, and certification; and management of preservation activities.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 544 Administration & Management of Libraries and Information Centers credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/544/)
Designed to explore the principles that govern how organizations and institutions work, this course provides a foundation for and introduction to the theories, practices and procedures involved in the management and administration of libraries and information centers.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 545 Advanced Data Visualization credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/545/)
This seminar-style course will cover advanced topics in visualization techniques. This will cover topics such as the history of visualization techniques, the perception and understanding of visual information, and new frontiers in displaying quantitative information. We will explore the modern technical stack for creating and sharing visualizations, including topics in javascript, python, and reactive frameworks.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 547 Foundations of Data Curation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/547/)
Data curation is the active and on-going management of data through its lifecycle of interest and usefulness to scholarship, science, and education; curation activities and policies enable data discovery and retrieval, maintain data quality and add value, and provide for re-use over time. This course provides an overview of a broad range of theoretical and practical problems in the emerging field, examining issues related to appraisal and selection, long-lived data collections, research lifecycles, workflows, metadata, and legal and intellectual property issues.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 548 Seminar in Management, Ethics, & Policy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/548/)
Offers an advanced graduate survey of research in areas related to research in management, ethics, & policy, across a wide range of topics. Designed to incorporate multiple guest lectures. Weekly class meetings will be composed of both lectures and discussions. May be repeated in the same or separate terms for a maximum of 16 hours if the topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 549 Practicum credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/IS/549/)
Supervised field experience of professional-level duties in an approved library or information center. Approved for S/U grading only. A maximum of 2 hours may be applied toward a degree program. Prerequisite: Completion of 12 graduate hours of information sciences courses; submission of Practicum forms.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 550 Theories of Information credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/550/)
A theory of information attempts to articulate clearly and precisely what information is, and what it means to become informed. Theories of information can contribute to the scientific foundations for many important research and practice activities in IS, including data curation, information modeling, information access, digital preservation, and informatics support for science and scholarship. This course, Theories of Information -- A, takes a logic-based approach to investigating the nature of information. Methodologically we draw from a family of methods that might be called formal methods, in contrast to the empirical methods of social and nature science. Formal methods typically make use of concepts from logic, set theory, and discrete mathematics to construct and explore formal systems. Formal methods are widely used in linguistics, mathematics, philosophy, and computer science. Within the general area of formal methods our approach in this course might be more specifically referred to as conceptual analysis, as it takes the form of a systematic analysis of a concept, namely information. Most of the prior work that is relevant to our analysis is from analytic philosophy, linguistics (especially formal semantics), and computer science (especially knowledge representation and AI). Prerequisite: Some familiarity with formal logic would be useful, but is not required. Some familiarity with conceptual modeling (ER or UML diagrams, or RDF/S for instance) would also be useful, but not required.

IS 551 Youth Services Librarianship credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/551/)
Theory and techniques in planning, implementing and evaluating library programs/services for youth (age 0-18) in public and school libraries/media centers; the knowledge base, skills, and competencies needed by the library media professional in the development of all aspects of young people's reading/viewing/listening and information literacy skills.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 555 Naming and Power credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/555/)
An advanced topics seminar in subject description and access that focuses upon representation in race, gender, sexuality and other contested categories. Critical intersections of bias, exclusion, and marginalization will be explored through a variety of case studies. Implications for how we construct search and discovery systems (e.g databases, archival and museum finding aids, taxonomies and catalogues), and other tools, are crucial considerations for those engaging in cultural heritage work. Open to masters and doctoral students.

IS 556 Internet of Things credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/556/)
Relying primarily on case studies, this course will help develop the students' understanding of how the IoT enables Business Data Analytics. Lectures and readings will be focused on the impact to a company's business model created by IoT data and analytics. Because of the disruptive nature of IoT sensors or data, IT Innovation will also be discussed. While the course will reflect a practitioner's view, the material will be presented on a solid academic under-pinning.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 557 Applied Machine Learning: Team Projects credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/557/)
A comprehensive exploration of the applied machine learning workflow from inspiration to delivery of a machine learning solution broadly defined (i.e., from analytic finding to embedded machine learning application). This course is firmly grounded in a "learning-by-doing" teaching philosophy with pedagogical priority clearly placed on the application of machine learning to real-world data and problems. Ongoing and intense practical experiences in team-based project management and work are another cornerstone of this course. This course includes student-led reviews of existing data sources and machine learning technologies along with several team-based fact-finding and proof-of-concept implementation projects. This course is designed for students wishing to engage seriously in the practical world of machine learning implementation. Prerequisite: Students should have demonstrated ability, and must have taken one of the following courses, IS 577 (formerly IS 590 DT), IS 517 (formerly IS 590 MD), CS 412, CS 446 or a course demonstrably equivalent.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 558 Seminar in Organization & Representation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/558/)
Offers an advanced graduate survey of research in areas related to research in Organization and Representation, across a wide range of topics. Designed to incorporate multiple guest lectures. Weekly class meetings will be composed of both lectures and discussions. May be repeated in the same or separate terms, to a maximum of 16 hours, if topics vary.

IS 559 CAS Project credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/IS/559/)
Individual study of a problem in library and information science; forms the culmination of the Certificate of Advanced Study program. Approved for S/U grading only. May be repeated. Only eight hours will apply to the Certificate of Advanced Study. Prerequisite: Admission to Certificate of Advanced Study program in library and information science; submission of "Request to Enroll in IS 559 - CAS Project" form.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 560 Social Science Research in Library and Information Science credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/560/)
Introduces students to the fundamentals of doing social science research in LIS. Students will learn how to frame a research problem, choose an appropriate research method, apply it, and write up the research for presentation and publication.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 561 Use and Users of Information credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/561/)
Explores information needs and uses at a general level, addressing formal and informal information channels, barriers to information, issues of value, and impacts of technology. Examines information seeking practices of particular communities and within various environments, introducing recent approaches to user-centered system design and digital library development. Provides an overview of methods that can be used to study information needs, information seeking behavior, and related phenomena. Prerequisite: IS 505.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 562 Administration and Use of Archival Materials credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/562/)
Administration of archives and manuscript collections in various types of institutions. Theoretical principles and archival practices of appraisal, acquisition, accessioning, arrangement, description, preservation, and reference services. Topics will include: records management programs, collecting archives programs/special collections, legal and ethical issues, public programming and advocacy, and the impact of new information technologies for preservation and access. Lectures, discussion, internet demonstration, and field trips to the Special Collections Department and University Archives.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 563 Advanced Topics in Literature, Media and Materials credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/563/)
Variety of newly developed and advanced topics courses within Literature, Media and Materials, intended to augment the existing Information Sciences curricula. May be repeated in the same or separate terms, to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 565 Cataloging for School Libraries credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/IS/565/)
This course will introduce the student to the principles, practices and standards for information representation and organization in school media centers. Course content will include an introduction to original cataloging of non-standard materials (such as realia and audiovisual materials), evaluation of bibliographic records, exposure to authority control and subject access systems with a special focus on the Dewey Decimal System and Sears Subject Headings. The course will also provide an overview and exploration of different library systems/OPACS.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 567 Text Mining credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/567/)
The goal of this project-based course is to provide students with first-hand experience with how to create a well-formed text mining problem and how to select, transform, and mine a collection of text. Prior programming knowledge (in any language) is required. As students work on their own project, they will draw from key concepts in text mining using perspectives from both the knowledge discovery and natural language processing research communities.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 568 Seminar in Human-Centered Design & Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/568/)
Offers an advanced graduate survey of research in areas related to research in human-centered design and systems, across a wide range of topics. Designed to incorporate multiple guest lectures. Weekly class meetings will be composed of both lectures and discussions. May be repeated in the same or separate terms, to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 569 Internship credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/IS/569/)
Supervised field experience designed for learning professional-level duties in an approved information-related organization or institution. Approved for S/U grading only. May be repeated in separate terms.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 571 Advanced Topics in Use and Users of Information credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/571/)
Variety of newly developed and advanced topics courses within the field of Use and Users of Information, intended to augment the existing Information Sciences curricula. May be repeated in the same or separate terms, to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 573 Advanced Topics in Collections credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/573/)
Variety of newly developed and advanced topics courses within the field of Collections, intended to augment the existing Information Sciences curricula. Additional fees may apply. See Class Schedule. May be repeated in the same or separate terms, to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 575 Metadata in Theory & Practice credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/575/)
Combines theoretical examination of the design of metadata schema with their practical application in a variety of settings. Hands-on experience in the creation of descriptive, administrative, and structural metadata, along with their application in systems such as OAI harvesting, OpenURL resolution systems, metasearch systems and digital repositories, will help students develop a thorough understanding of current metadata standards as well as such issues as crosswalking, metadata schema, metadata's use in information retrieval and data management applications, and the role of standards bodies in metadata schema development. Prerequisite: IS 505 - Information, Organization and Access (formerly IS 501 prior to FA 20) or consent of the instructor.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 577 Data Mining credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/577/)
Data mining refers to the process of exploring large datasets with the goal of uncovering interesting patterns. This process usually involves a number of tasks such as data collection, pre-processing, & characterization; model fitting, selection, & evaluation; classification, clustering, & prediction. Although data mining has its roots in database management, it has grown into a discipline that focuses on algorithm design (to ensure computational feasibility) & statistical modeling (to separate the signal from the noise). It draws heavily upon a variety of other disciplines including statistics, machine learning, operations research, & information retrieval. Will cover the major data mining concepts, principles, & techniques that every information scientist should know about. Lectures will introduce & discuss the major approaches to data mining; computer lab sessions coupled w/assignments will provide hands-on experience with these approaches; term projects offer the opportunity to use data mining in a novel way. Mathematical detail will be left to the students who are so inclined.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 578 Seminar in Research Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/578/)
Offers an advanced graduate survey of research in areas related to research in research methods, across a wide range of topics. Designed to incorporate multiple guest lectures. May be repeated in the same or separate terms, to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 579 Guided Research Experience credit: 0 or 1 Hours. (https://courses.illinois.edu/schedule/terms/IS/579/)
Supervised participation in information science research. Students assist in and /or conduct research under faculty or staff supervision on an information science project. The topics and nature of the work will vary. Approved for S/U grading only. Course may be repeated in separate terms, up to 2 graduate credit hours, if topics vary. Additional research must be completed for the 0 credit option. Prerequisite: Completion of either one semester or 12 credits of information sciences courses. Completion of a research participation agreement. Restricted to IS graduate students.

IS 580 Information History credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/580/)
Drawing on research in varied historical specializations, information history has become a vibrant area of study, one that improves our understanding, moreover, of today's information universe. Information history covers diverse institutions and practices -- from libraries and the book to the telegraph and postal systems, from surveillance to cartography, from documentary culture to statistical surveys -- seeking to connect them with the major developmental processes of human history. Framed in a succession of major historical epochs, topics and trends, from Antiquity to the twentieth century, this course revises our sense of the historical record by situating information explicitly within it.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 581 Advanced Topics in Youth Services credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/581/)
Variety of newly developed and advanced topics courses within the field of Youth Services, intended to augment the existing Information Sciences curricula. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 582 Advanced Topics in Librarianship credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/582/)
Variety of newly developed and advanced topics courses within the field of Librarianship, intended to augment the existing Information Sciences curricula. Additional fees may apply. See Class Schedule. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.

This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 583 Advanced Topics in Book History credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/583/)
Variety of newly developed and advanced topics courses within the field of Book History, intended to augment the existing Information Sciences curricula. Additional fees may apply. See Class Schedule. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.

This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 584 Advanced Topics in Ethics and Privacy credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/584/)
Variety of newly developed and advanced topics courses within the field of ethics and privacy, intended to augment the existing Information Sciences curricula. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 585 Bibliographic Metadata credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/585/)
Introduction to basic principles and concepts of descriptive and subject cataloging in the context of information service needs for various user communities. Explores principles, structures, standards, technologies and practices relating to organizing and creating access to print and non-print media. Includes coverage of subject analysis and descriptive practices. Introduces controlled vocabularies. Prerequisite: Information Organization and Access; IS 505 for Fall 2020 (previously IS 501).
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 586 Usability Engineering credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/586/)
The course provides an introduction to: issues in Human Computer Interaction; analysis of interfaces and their use; the interface design process as an engineering activity; designing usable interfaces under constraints; and the rapid prototyping and evaluation cycle. The course covers interface design in multiple contexts including websites, web-based applications, smartphone apps, regular computer apps and new contexts of interacting with computers. Elective course for the CAS in Digital Libraries concentration.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 587 Seminar in Data Analytics and Data Science credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/587/)
Offers an advanced graduate survey of data analytics and data science in the information fields, across a wide range of topics. Designed to incorporate multiple guest lectures. May be repeated in the same or separate terms, to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 588 Data Consulting Capstone credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/588/)
This course will help to prepare students for a competitive job market in data consulting. They will build a portfolio including evidence of effective consulting abilities, database design, and knowledge of applying data to solve real world problems. Portfolios will demonstrate theoretical and practical understandings of areas such as entity-relationship modeling, creating tables, writing queries in SQL, and data analysis for decision making.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 589 Independent Study credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/589/)
Permits the intermediate or advanced student opportunity to undertake the study of a topic not otherwise offered in the curriculum or to pursue a topic beyond or in greater depth than is possible within the context of a regular course. May be repeated by MS students to a maximum of 4 graduate hours. May be repeated by CAS students to a maximum of 8 graduate hours. May be repeated by PhD students to a maximum of 16 graduate hours.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 590 Advanced Topics in Information Foundations credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/590/)
Variety of newly developed and advanced topics courses within the field of information foundations, intended to augment the existing Information Sciences curricula. Additional fees may apply. See Class Schedule. May be repeated.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 591 Advanced Topics in Information Services credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/591/)
Variety of newly developed and advanced topics courses within the fields of Information Services, intended to augment the existing Information Sciences curricula. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 592 Advanced Topics In Information Organizations credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/592/)
Variety of newly developed and advanced topics courses within the fields of Information Organization, intended to augment the existing Information Sciences curricula. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 593 Advanced Topics in Preservation & Tech Services credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/593/)
Variety of newly developed and advanced topics courses within the fields of Preservation & Tech Services, intended to augment the existing Information Sciences curricula. Additional fees may apply. See Class Schedule. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 594 Advanced Topics in Management and Policy credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/594/)
Variety of newly developed and advanced topics courses within the fields of Management and Policy, intended to augment the existing Information Sciences curricula. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 595 Advanced Topics in Organization & Representation credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/595/)
Variety of newly developed and advanced topics courses within the fields of Organization & Representation, intended to augment the existing Information Sciences curricula. Approved for Letter and S/U grading. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 596 Advanced Topics in Human-Centered Design & Systems credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/596/)
Variety of newly developed and advanced topics courses within the field of Human-Centered Design & Systems, intended to augment the existing Information Sciences curricula. Approved for Letter and S/U grading. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 597 Advanced Topics in Data Analytics & Data Science credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/IS/597/)
Variety of newly developed and advanced topics courses within the fields of Data Analytics & Data Science, intended to augment the existing Information Sciences curricula. Approved for Letter and S/U grading. May be repeated in the same or separate semesters to a maximum of 16 hours, if topics vary.
This course satisfies the General Education Criteria for:
ONL Info Science rate

IS 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/IS/599/)
Individual study and research. M.S. candidates, 0 to 8 hours. Doctoral candidates, 0 to 16 hours. Approved for S/U grading only. May be repeated in the same term or in separate terms. Prerequisite: MS students must submit a "Request to Enroll in IS 599 - Master's Thesis" form.
This course satisfies the General Education Criteria for:
ONL Info Science rate

LER Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/LER/)

Courses

LER 100 Introduction to Labor Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/100/)
Provides an overview of workers and unions in American society. Looks at economic, political, and workplace issues facing working people, why and how workers join unions, how unions are structured and function, and how unions and management bargain a contract. Provides a historical overview of the American labor movement, and discusses the contemporary struggles workers and unions face in a rapidly changing global economy.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

LER 110 Labor and Social Movements credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/110/)
Explores the role of labor unions in American society. Discusses the role of labor unions in initiating actions on social issues that impact the U.S. working class, the economy, public policy, and politics. Analyzes the labor movement's interaction with the civil rights, women's, student, global justice, and living wage movements.

LER 120 Contemporary Labor Problems credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/120/)
Focuses on problems and challenges facing American workers and the U.S. labor movement. Topics include the deterioration of the labor-management "social contract" in recent decades; a review of labor and employment law; the health care crisis; globalization and cross-border union alliances; and union democracy.

LER 130 Intro Labr Wrkng Class History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/130/)
Do working people have a history worth studying? What does the history of the U.S. look like when viewed from the point of view of those who built the country? Introduces U.S. labor and working class history. Examines the conditions of life and work of the various groups of working people: enslaved, indentured, small farmers, but especially wage workers and their families from the civil War to the present. Studies the main collective actions workers have taken to protect and improve their lives and the organizations and social movements they created to do this. Students who complete LER 130 and want a more in-depth look at the subject should enroll in HIST 480.

LER 182 Introduction to Human Resource credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/182/)
Familiarizes students to the study and profession of human resources and trends in human resources management in today's workforce. Students will learn an overview of key concepts in HR including employment law; talent recruitment and selection, training and development; employee performance and evaluation; compensation structures and strategies; role and impact of labor relations and collective bargaining. Credit is not given toward graduation for: LER 199 HR and LER 182.

LER 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/LER/199/)
May be repeated.

LER 200 Globalization and Workers credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/200/)
Is globalization good for working people in the United States and around the world? Globalization is the driving force in the world economy but it is also provoking tremendous debate and popular resistance. Students will learn the basics about globalization and its institutions from the perspective of workers' right in the U.S. and the Third World. Analyzes the debate over free trade and sweatshops, trade agreements such as the North American Free Trade Agreement, and institutions such as the World Trade Organization and the International Monetary Fund. Closely examines working conditions in several Third World countries, and explores the role of the global justice movement.

LER 210 Images of Labor in Film credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/210/)
Uses feature-length film to take an in-depth look at key labor strikes and organizing drives from the 1910s through the 1980s. Students will view some of the most powerful films on worker and labor themes ever produced. Studies the work lives and labor unions of miners; railroad porters; packinghouse workers; textile workers; and farm workers. Discusses the meaning of the events depicted in the films by situating them in historical context with detailed readings; engage the debates raised in the films about labor organizing methods and strike strategies that are relevant to today's labor movement; reflect on issues of race, gender, class consciousness, working conditions, union goals, anti-communism, and labor-management relations raised in the films and readings; analyze how effectively the films, and Hollywood in general, portray workers and unions; and compare and contrast the films.

LER 220 The Media, Workers, and Unions credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/220/)
Workers, unions, and how the news media tells their stories. Looks at the past, the present and future. Analyzes how these stories are told in the mainstream and independent news media in the U.S., and examines the Internet's explosion and impact on these stories. Looks at how blogs, online videos, citizen journalism, and the fast changing world of Internet communication has given voice to workers and their issues. Compares the print and online media with the work done in documentaries and the cinema. Looks at the global telling of these stories. Lastly, examines the ways that unions can better tell their stories.

LER 225 Labor Issues in Sports credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/225/)
Examines major labor issues in sports. How do players' unions work? Why are there so many work stoppages in sports? How do teams evaluate and develop talent? Should college athletes be considered employees? How do labor issues in sports intersect with broader structures of social inequality? Readings, films, discussions, and writing assignments equip students to be informed participants in the sports world, whether in their careers or in their lives as fans.

LER 228 Human Resources Career Development credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/228/)
Students will engage in an in-depth exploration of HR careers and career development in today's dynamic workplace. The course combines examination of career theories with practical application, equipping students to approach HR careers from both the individual career planning and organizational perspective (i.e., organizational talent management). Students will learn how organizations design strategies to foster employee growth, enhance career pipelines, and retain talent, as well as how individuals actively shape and navigate their own career journeys.

LER 240 China's Labor Relations credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/240/)
This course analyzes how China is reshaping the world economy, labor markets, unions, forms of worker resistance, and the lives of workers around the globe. We will examine China's transition from socialism to state capitalism; working conditions facing Chinese workers; evolving labor and employment relations; the role and function of the All-China Federation of Trade Unions; and worker protests and strikes demanding improved conditions.

LER 290 Introduction to Employment Law credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/290/)
Addresses and critiques the content, interpretation, and applications of the laws that govern employer-employee relations in the American workplace. Explores the historical sources, underlying ideology, and current content of anti-discrimination and civil rights laws, of laws that seek to guarantee a safe and healthy workplace for all Americans, of laws that guarantee minimum wages and overtime pay, of legal protections of privacy on the job, of unemployment insurance and workers' compensation laws, and of laws that guarantee workers the right to collective action and collective bargaining.

LER 300 Workers, Unions, and Politics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/300/)
What is the meaning and impact of politics seen from the perspective of those at the bottom of the pyramid of political power rather than from the usual focus on the actions and perceptions of political elites? In what ways do workers become involved in politics? Under what circumstances are they likely to be successful in bringing about change? This course addresses these questions by exploring political power, political participation, and political change from a broad historical and cross-cultural perspective, but always focusing on a view of politics from the bottom up. The course analyzes the political economy of labor, and the labor movement's political influence in politics.

LER 320 Gender, Race, Class and Work credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/320/)
Provides a historical and contemporary overview of the impact and interplay of gender, race, class and other issues of identity in the workplace. Topics include: pay gap, occupational segregation, workplace harassment, low wage work, and employment discrimination laws. The response of labor unions to identity issues will also be examined. Prerequisite: LER 100, LER 110 or one course that covers race or gender issues is required.

LER 330 Comparative Labor Relations credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/LER/330/)
Designed as an overview of comparative labor movements and labor relation systems. Develops a framework for understanding union formation and the development of industrial relations system in a variety of countries around the world. An emphasis will be placed on each country's interaction between unions and political organizations, national labor policies, the machinery for the resolution of workplace problems, the level of shop floor disturbances, bargaining coverage of employees, and the issues of workers' control. Also addresses how globalization has transformed the capacity of any nation's labor relations' system to respond to economic challenge and workplace conflicts. Examines the possibility of developing transnational union.

LER 410 Labor and the European Union credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/410/)
Addresses the formation of European Union (EU) labor policy; the role of trade unions in EU member nations; worker immigration in the EU; diversity issues in the EU labor market and a comparative analysis of industrial relations in Europe. Same as EURO 410. 4 undergraduate hours. 4 graduate hours. Prerequisite: Consent of the instructor.

LER 440 Economics of Labor Markets credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/440/)
Same as ECON 440. See ECON 440.

LER 480 US Work Class Hist Since 1780 credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/480/)
Same as HIST 480. See HIST 480.

LER 510 HR Analytics: Methods & Data-Driven Prediction credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/510/)
Expands your data-analytic toolkit for addressing HR problems. Topics include introductory data handling in the free software R, predictive modeling (multiple regression and logistic regression, for staffing and turnover), factor analysis and reliability (for employee surveys), research design (for training and program evaluation), and mediation and moderation analyses (for understanding training and diversity/test fairness). Assignments include weekly labs worked on in class, plus open-notes quizzes. This hands-on course develops practical, concrete skills in data analysis. 4 graduate hours. No professional credit. Prerequisite: LER 593 completion or concurrent enrollment. Restricted to the MHRIR program.

LER 521 Employment Law for HR Managers: Separations, Worker's Compensation, and Safety credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/521/)
Examines laws and court rulings that relate to the erosion of employment at will, including wrongful discharge; post-employment, non-compete covenants and trade secrets; plant closings; employee claims in Chapter 11 bankruptcy; pension plan terminations; unemployment insurance; ERISA's fiduciary duties; retirement issues; worker's compensation issues; and OSHA duties. Students will learn about employer liability related to these laws. Prerequisite: Restricted to students in the MHRIR degree program.

LER 522 Employment Law for HR Managers: Discrimination, Compensation, and Privacy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/522/)
Examines federal and state laws, court rulings, and administrative regulations that relate to discrimination on the basis of race, color, religion, sex, pregnancy, sexual identity, national origin, age, disability, and genetic information; and wage and hour laws; employee privacy rights; employer use criminal records; negligent hiring; family and medical leave; and emerging laws and regulations. Students will learn about employer liability related to these laws. Prerequisite: Restricted to students in the MHRIR program.

LER 523 Org Fundamentals for HR credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/523/)
Increases students' effectiveness in analyzing and understanding organizations and the organizational context. It relies on the case method and focuses a number of important themes such as organization design; strategy; decision-making; and culture. In order to prepare students for the various transformations that they will experience in their careers, it examines many of these topics in the context of organizational change. Exposes students to basic ideas about key organizational topic - as well as a number of applications of these ideas - in order to give them a framework for organizing past experience. The topics covered do not offer a recipe for what to do in all situations, but rather give students a set of skills and different ways of thinking that can help them address novel problems they will face throughout their lives.

LER 526 Machine Learning Applications in HR credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/526/)
The primary goal of this course is to equip human resources management professionals with a comprehensive understanding of how machine learning and big data analytics can be integrated into various HR functions. This includes developing a deep appreciation for the opportunities and challenges associated with applying these technologies in areas such as hiring, resume screening, performance appraisal, and worker safety. The course aims to foster critical thinking about the ethical implications and strategic decision-making involved in deploying AI and machine learning solutions in HR contexts. Discussion of potential biases in AI/machine-learning implementation will be integrated throughout the course. Prerequisite: LER 593 completion or concurrent enrollment is required. Restricted to the MHRIR program.

LER 527 Applied HR Topics: Spreadsheet & Visualization Analysis credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/527/)
Focusing on analysis of human resource metrics and their interpretation, this course emphasizes the use of spreadsheets and data visualization software to inform evidence-based human resource management decisions. Topics for these data driven decisions include (1) recruitment and hiring, (2) performance evaluation, (3) executive compensation, (4) training and skill development, and (5) diversity, inclusion, and equity. 4 graduate hours. No professional credit. Prerequisite: LER 593 completion or concurrent enrollment is required. Restricted to the MHRIR program.

LER 530 Found of Ind Org Psych credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/530/)
Same as PSYC 530. See PSYC 530.

LER 531 Workforce Analytics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/531/)
Each day, HR / ER professionals face myriad issues with employees and the organizations that they support. Many times, these professionals rely on their intuition, "gut instincts" and years of experience to create resolutions and interventions to solve these issues. Although done with good intentions, these interventions often lack analytical rigor and forethought about unintended consequences and the root cause of the issue. This class will allow students the opportunity to learn real-world analytical techniques and critical thinking skills that students can use in any HR / ER role in any industry. Prerequisite: Restricted to students in the online MHRIR program (10KS0364MHRU).

LER 532 Successful Change Management for HR Professionals credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/532/)
Introduces students to methodologies and practices for successful change management within any size organization. In addition, this course is intended to guide students through the role that HR professionals play in change management and to apply these concepts in practical ways to changes. Prerequisite: Restricted to students in the online MHRIR program (10KS0364MHRU).

LER 533 Fundamentals of Business Management credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/533/)
Provides an overview to several areas of management that influence the role of HR professionals in any organization. Specifically, we address 6 business management topics: (1) Strategic Management, (2) Organizational Structure & Control, (3) Power & Politics, (4) Groups & Teams, (5) Decision Making, and (6) Corporate Governance. Knowing more about these areas of management should help aspiring HR professionals understand what their employers are trying to achieve and how human resource management can add value to any organization. We will discuss the connection between general management topics and human resource management implications each and every class session with special emphasis on this question in part of our last session. The course will include lectures, readings, case studies, simulations, exercises, class discussions, and writing assignments. Prerequisite: Restricted to students in the online MHRIR program (10KS0364MHRU).

LER 534 Leadership and Employee Engagement credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/534/)
Strong leadership and employee engagement are fundamental to achieving positive organizational results. This course explores the relationship between leadership, employee engagement, and business outcomes. Rooted in organizational effectiveness capabilities, we will cover topics in the context of driving change and supporting strategic outcomes for the enterprise. We will explore theoretical models, specific methodologies and tactics that drive engagement. As a Human Resource leader, you will build skills in defining strong leadership, clarifying leadership expectations and building 'visible and felt leadership.' You will explore how to measure employee engagement and diagnose common barriers to effective engagement. Students will utilize 'gap assessments' to be able to prioritize and recommend specific actions that will be supported with tools and techniques that 'build' employee ownership. Core concepts will include motivational constructs, employee engagement surveys, leadership interventions, visible and felt leadership, large group engagement, metrics, management review, process mapping, WorkOut/Kaizen, Appreciative Inquiry and other practical applications. Prerequisite: Restricted to students in the online MHRIR program (10KS0364MHRU).

LER 535 Negotiation Principles in HR Context credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/535/)
Develop your negotiation skills through practice and an improved understanding of the factors that underlie successful negotiations. In this course, you will not only learn what strategies work, but why they work, so that you can generalize these strategies to new situations. The typical format of the course sessions includes discussing what happened in the pre-class negotiation exercise and tying your experiences to course concepts. Credit is not given toward graduation for LER 535 and LER 567. Prerequisite: Restricted to students in the MHRIR programs.

LER 536 Management of Workplace Gender Issues credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/536/)
Topics covered include stereotypes, workplace discrimination, leadership, work-life balance & career, LGBTQ, gender-inclusive climates, etc. This course will consist of lectures, discussions, case analyses, and students will conduct a project to facilitate an in-depth understanding of a gender issue and ways to address it in organizations. Students will gain knowledge of scientific literature to better understand the nature of workplace gender issues and obtain insights as to how to manage and address them in organizations. Prerequisite: Restricted to students in the MHRIR program.

LER 537 Employee Stress, Well-Being, & Safety credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/537/)
Uses the "organizational psychology" approach focusing on important psychosocial factors that affect employee stress, well-being, and safety. This focus helps students see the importance of good people management. The class will include lectures, in-class learning activities, and a group project. In this course, students will obtain fundamental and up-to-date knowledge of prevention and intervention strategies for minimizing the impact of stressors and ensuring healthy and safe work environments. Prerequisite: Restricted to students in the MHRIR program.

LER 539 Talent Management credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/539/)
Dive into the essentials of managing performance with this course! Discover how to design HR processes and programs that help employees reach their full potential, build high-performing teams, design effective performance management systems and develop a robust pipeline of ready successors and talent pools. You'll learn how to identify and develop talent, deliver impactful coaching, and boost employee engagement and retention at the enterprise level. Through interactive team projects, case studies, and discussions, you'll gain hands-on experience in key HR and organizational development practices that will enhance your professional growth. Prerequisite: Restricted to MHRIR:HR&Indus Reltns Onl-UIUC.

LER 540 Labor Economics I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/540/)
Same as ECON 540. See ECON 540.

LER 541 Labor Economics II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/541/)
Same as ECON 541. See ECON 541.

LER 542 Collective Bargaining credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/542/)
Examination of: social values and social science concepts to develop a framework for explaining the basis and shape of collective bargaining as it has been practiced in the United States; government and law, unions, and employers as part of the development of this framework; the environment of collective bargaining with respect to the role of economics and bargaining structure; the negotiating process as the interactive basis for union-management relations; conflict and conflict resolution as part of the negotiating process; wage and other effects of collective bargaining as bargaining outcomes; contemporary changes in union management relations. Case materials and exercises may be used to supplement course materials. Same as ECON 542. Prerequisite: Consent of instructor.

LER 543 Workplace Dispute Resolution credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/543/)
Examination of the use of procedures to resolve employment disputes in both union and nonunion workplaces; comparative analysis of grievance arbitration, interest arbitration, mediation, fact-finding, and combinations of these procedures; special emphasis given to the role of third party intervention. Same as ECON 543.

LER 544 Workforce Policies and Partnerships credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/544/)
Should an HR Director make a partnership with a local community college to train workers? Does the minimum wage reduce employment? This course focuses on the evaluation and analysis of key labor market policies, programs, and interventions. The course will take a multi-disciplinary approach to the topics it addresses; most of the readings will be drawn from the economics, sociology, and public policy literatures. Prerequisite: Restricted to students in the MHRIR and Ph.D. program.

LER 545 Economics of Human Resources credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/545/)
Study of the economics of personnel with the modern corporation. Topics include hiring, promotion, evaluation, discrimination, raiding, job definition, pay schemes, benefits, and design of work. Prerequisite: LER 593 or equivalent, or consent of instructor.

LER 546 The Gender Wage Gap credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/546/)
Focuses on male-female differences in workforce participation, earnings, and occupations, and potential explanations for these differences, using insights from economic models. The course will also focus on applying economic intuition to evaluate potential impacts of employer and government policies on labor market outcomes. Prerequisite: Restricted to students in MHRIR or Ph.D. program at the School of Labor and Employment Relations.

LER 547 Labor Law I credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/547/)
Same as LAW 662. See LAW 662.

LER 550 Game Theory and HR Strategy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/550/)
Teaches the fundamentals of strategic thinking from an applied game theoretic perspective, and the interrelationship between game theory, strategy, and human resource management. Students first learn the art and science of strategy, including differences between sequential and simultaneous strategies; identification of prisoner's dilemmas; coordination games; strategic moves; and information asymmetries. Students then learn how to connect these strategic tools to HR issues like talent management, workplace incentives, employee empowerment, and bargaining. Prerequisite: Restricted to students in the MHRIR program.

LER 551 Social Justice and the Workplace credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/551/)
Examines how movements for social justice have shaped – and continue to shape – U.S. employment relations. How have social movements mobilized to address employment discrimination? How have campaigns for social justice influenced U.S. employment law, public policy, and workplace practices? How can the workplace leaders of today and tomorrow continue to build more just and equitable workplaces? Prerequisite: Restricted to MHRIR students in LER.

LER 554 Comparative Employment Relations Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/554/)
Examines employment systems in selected developed, newly industrialized, and developing economies. We will discuss how distinctive labor market institutions emerged in the context of economic development and evolved through interactions with the global economy. Students will learn about management-labor relations, and the roles of firms, national governments, and international organizations in shaping employment systems. Emphasis will be placed on the analytical tools needed to make multi-country comparisons, to link theory and practice. Prerequisite: Restricted to students in the MHRIR program.

LER 556 Industrial Relations Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/556/)
Integrated analysis of the principles of industrial relations through the study of the works of the major theorists and their critics. Prerequisite: Consent of instructor.

LER 557 Human Resources Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/557/)
Continuation of LER 556. Focuses on contemporary research in human resource management and related fields.

LER 558 Faculty-Student Workshop credit: 0 to 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/558/)
Training and experience for Ph.D. students in the application of social science and industrial relations theory and research methodology to contemporary industrial relations problems through presentation and discussion of faculty and student research. Ph.D. students are required to make presentations and to participate in workshop discussions during the entire period of their campus residency. Approved for letter and S/U grading.

LER 559 Micro Research Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/559/)
Provides doctoral students a foundation for conducting independent, scholarly micro research (i.e., individuals or small groups as the primary unit of analysis) by addressing the components of the research process. This foundation for conducting independent research is based on the research process as an open system of interconnected choices that unfold sequentially: (1) Choosing and framing a research question, (2) Choosing an hypothesis to address the research question, (3) Choosing a Strategy and Design, (4) Choosing modes for treating constructs, (5) Choosing Forms for Converting Data into Observations, (6) Choosing procedures to analyze data, and (7) Choosing conclusions for interpreting results. Prerequisite: Doctoral degree student in LER, Department of Psychology, Economics, College of Business, College of Education. Master's degree students who are considering a doctoral degree program subject to instructor approval.

LER 560 Macro Research Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/560/)
Introduces a core set of macro research methods to human resources and industrial relations PhD students. The main objective is to help students become enlightened users of statistical methods and develop their own "toolkits" for future research. Through short lectures, discussion sessions, in-class exercises, and weekly and final assignments, students learn about issues that will arise in macro research, acquire analytical skills to deal with those problems, and develop their own research topics. Prerequisite: Restricted to students with Graduate standing.

LER 561 Compensation Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/561/)
Compensation theory and practice. Course addresses the theoretical and practical issues associated with the design of effective compensation systems. The design phases include establishing internal equity, external equity, and individual equity. Budgeting and administration are also addressed. Case analyses and computer simulations may be used to supplement course materials.

LER 562 HR Planning and Staffing credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/562/)
Examines conceptual issues, policies, and practices relating to the attraction, selection, development, and planning for the most effective utilization of human resources.

LER 564 HR Training and Development credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/LER/564/)
Provides students a firm understanding of human resource training and development systems in today's business environment. A constant theme setting the back drop for this course will be on the various kinds of change facing organizations and how these changes relate to human resource training and development. Aspiring HR professionals will gain essential knowledge to effectively manage employee training and development systems in a variety of companies.

LER 565 HR Management and Strategy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/565/)
Designed to provide integration across the specific functional areas of the human resources management (HRM) field, while at the same time demonstrating the linkages horizontally within HRM and vertically with strategic management of the firm. This case-focused course places emphasis on human resources issues of strategic importance to the organization. Same as BADM 512. Prerequisite: One prior course from the Organizational Behavior and Personnel Management distribution subject area list (in the MHRIR degree requirements for the graduate degree in Labor and Employment Relations).

LER 566 International HR Management credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/566/)
Human resource management issues examined from the perspective of the multinational firm. Topics include globalization and human resource strategy, management and the structure of multinational firms, dealing with intercultural differences, selecting employees for foreign assignments, training and developing expatriate employees, evaluation and compensation of employees in international assignments. Individual and group projects. Prerequisite: Graduate standing.

LER 567 Negotiation in HR Decisions credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/LER/567/)
General survey course concerning the strategies and tactics of bargaining and negotiation, with special emphasis on applications in human resource management contexts. Topics covered include: the structure of negotiated outcomes; integrative bargaining tactics; distributive bargaining tactics; negotiation planning; power, persuasion and influence; communication; negotiating in teams and groups; negotiating using 3rd parties (arbitrators, mediators, agents); cross-cultural negotiations. Students will discuss negotiation issues and build negotiation skills through a series of experiential exercises and cases. Credit is not given toward graduation for LER 535 and LER 567. Prerequisite: Graduate standing. An introductory course in social psychology or organizational behavior is preferred but not required. Restricted to students in the MHRIR program.

LER 568 Firm Performance and HR credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/568/)
The purpose of this course is to enable students to understand some basic ideas about and measures of firm performance with heavy emphasis on the role of human resource managers. Students will gain an understanding of how human resource professionals fit into the organization, structure, and function of business firms. Many basic ideas from the field of finance will be studied. The course covers theoretical ideas and has many empirical, policy, and practitioner-relevant applications, all with the goal of providing human resource managers fundamental financial analysis tools to enable them to function effectively in their post-graduate corporate workplaces.

LER 569 Power & Influence in HRM credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/LER/569/)
Designed to help prospective human resource managers learn how to use power and influence as effective tools for understanding the surroundings in which they will be working with and managing people, and achieving the goals that they set for themselves. It provides frameworks and practical tools that allow students to make sense of on-the-job learning experiences and equip them with basic diagnostic and action-planning skills that they can use at different points in their careers - and to consider difficult ethical questions in the process. Prepares students to get things done in the real world, where personalities and office politics sometimes hinder rather than help them.

LER 570 Leadership for HR Managers credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/LER/570/)
In contemporary organizations, the HR function is often called on to serve a variety of leadership roles. Thus, HR managers will not only need to learn how to utilize and improve their leadership skills in different and changing contexts, but also how to help other employees become effective leaders. The goals of this course are (1) to analyze and discuss a number of key frameworks that will provide students with knowledge of leadership in different types of organizations, and (2) to provide students with practical tools to help them make sense of their own on-the-job experiences and equip them with basic action-planning skills that they can use on the job.

LER 571 Executive Compensation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/571/)
Introduces theories and practices of executive compensation to MHRIR students. Through short lectures, case studies, and team projects, students will learn about diverse theories of executive compensation and contemporary practices through which firms design and implement compensation plans for executives. By examining actual compensation contracts from public corporations, students will also compare different compensation designs and acquire skills to evaluate their effectiveness in terms of enhancing the performance of executives and their firms. Prerequisite: Restricted to students in the MHRIR program.

LER 572 Social Networks in Human Resource Management credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/LER/572/)
Provides a framework for analyzing social networks and social capital within and across organizations. Explores key concepts from social network analysis, including, how do social networks form and evolve, how do social network positions and structures affect performance and innovation, and how should we manage our own social networks and the networks in our organizations. Provides an overview of research on social networks from several disciplines and introduces methods of analyzing social networks. Prerequisite: Restricted to students in the MHRIR program.

LER 580 Internship credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/LER/580/)
Full or part-time practice of human resources or employment relations in an off-campus government, corporate or not-for-profit environment. Approved for S/U grading only. May be repeated in separate terms. Prerequisite: Must be a student in the LER program.

LER 590 Individual Topics credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/LER/590/)
Students in labor and industrial relations may register for this unit with the consent of the curriculum adviser and the adviser under whom the student will perform individual study or research. Such individual work may include special study in a subject matter for which no course is available or an individual research project, including on-the-job research in industry, which is not being undertaken for a thesis. Approved for Letter and S/U grading. May be repeated if topics vary; unlimited credit hours for graduate and professional students.

LER 591 Employment Relations Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/591/)
General framework for the analysis of employment relationships. Topics include industrial relations theory, the American system of collective bargaining, intercountry system differences, and human resource management strategies and practices. Prerequisite: Graduate standing.

LER 593 Quantitative Methods in LER credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/593/)
Application of statistical methods to problems in human resources and industrial relations. Analysis and presentation of results using computer software. Covers statistical techniques through analysis of variance and multiple regression. Prerequisite: Any elementary statistics course.

LER 594 Tutorial Seminar credit: 0 to 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/594/)
Research experience for Master's students in carrying out a problem solving project from formulation to written report in a chosen area of labor and industrial relations. Each student selects an individual topic with the approval and guidance of a faculty member and participates in a Tutorial Workshop. Approved for both letter and S/U grading. Prerequisite: Completion of no fewer than 24 graduate hours of LER course work.

LER 595 Managing Diversity Globally credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/595/)
In a global economy workplace diversity is not a trend; it is a reality faced by corporate leaders, human resource professionals and management consultants. Within the US, immigration, migration, and gender and racial differences have been major trends shaping workplace composition. Globalization places additional pressures on managing workplace diversity effectively. In this setting, training managers and human resource professionals to manage differences and adapt to multiple national and cultural contexts is an imperative. Course provides an in-depth understanding of how managers and HR professionals can be effective in not only managing diversity in a global context, but also in leveraging global diversity as a competitive advantage. By the end of this course students will have a holistic appreciation of the tools necessary to implement effective diversity management practices for a globally inclusive workplace.

LER 597 Employee Motivation & Perfmnce credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/597/)
Managing and motivating employees effectively is one of the most complex and challenging issues facing companies today. While business leaders acknowledge the need for implementing effective performance management systems, recent studies indicate that an overwhelming majority of performance management systems are unsuccessful. Takes a strategic approach to employee motivation and performance starting with a firm level view to reviewing current approaches to employee motivation and performance management. Aims at providing students with practical and conceptual tools that will aid them in future endeavors to design and implement employee development and performance management systems. Format includes in-class discussions, case studies and individual assignments and papers.

LER 598 Impl High Perf Work Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/LER/598/)
Intensive analysis of all aspects of high performance work systems, including work design, reward systems, training, team operations, lean/six sigma systems, and labor-management partnership. Special focus on skills and principles for effective implementation, in ways that advance employee well-being and to organizational effectiveness.

LER 599 Thesis Seminar credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/LER/599/)
For all students writing theses in LER at the MHRIR and Ph.D. levels. May be repeated. Approved for S/U grading only. Approved for S/U grading only. May be repeated in the same term or in separate terms.

COURSES OF INSTRUCTION

AAS - Asian American Studies

AAS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AAS/)

Courses

AAS 100 Intro Asian American Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/100/)
Interdisciplinary introduction to the basic concepts and approaches in Asian American Studies. Surveys the various dimensions of Asian American experiences including history, social organization, literature, arts, and politics.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AAS 105 Introduction to Arab American Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/105/)
Interdisciplinary introduction to the basic concepts and approaches in Arab American Studies. Addresses the issues of history, race, social organization, politics, literature, and art related to Arab American experiences.

AAS 120 Intro to Asian Am Pop Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/120/)
Introductory understanding of the way U.S. popular culture has affected Asian Americans and the contributions Asian Americans have made to U.S. media and popular culture since the mid 1880's.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AAS 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/AAS/199/)
May be repeated to a maximum of 6 hours.

AAS 200 U.S. Race and Empire credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/200/)
Invites students to examine histories and narratives of U.S. race and empire, drawing upon multiple theoretical and methodological works in Asian American studies and related fields. Same as LLS 200.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AAS 201 US Racial & Ethnic Politics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/201/)
Same as AFRO 201, LLS 201, and PS 201. See PS 201.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AAS 203 Race, Science, and Technology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/203/)
Examines the intersection of racism with science and technology in the United States. The class investigates how racism has persisted across fields of scientific knowledge production and how technology has been used to advance systems of discrimination and inequality. It studies how science has been shaped by historical and contemporary structures of racism, including slavery, settler colonialism, immigration, and policing. It also explores justice-oriented approaches to science and technology.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AAS 211 Asian Americans and the Arts credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/211/)
Examination of Asian American artistic expressions in the visual and the performing arts providing historical, theoretical, and conceptual foundations of understanding the history of various art genres in Asian American communities. Prerequisite: AAS 100 or AAS 120, or consent of instructor.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

AAS 215 US Citizenship Comparatively credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/215/)
Examines the racial, gendered, and sexualized aspects of US citizenship historically and comparatively. Interdisciplinary course taught from a humanities perspective. Readings draw from critical legal studies, history, literature, literary criticism, and ethnography. Same as AFRO 215, AIS 295, GWS 215, and LLS 215.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AAS 232 Asian American Ethnography credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/232/)
Introduction to the methodologies of Asian American ethnography. Students will become familiar with the literature of the field and perform ethnographic research. The field itself has sensitively explored the experiences of Asian American communities and generated new theories of how to study them, which are always in flux and heterogeneous. The course will consider the long history and contemporary methods in researching race, gender, ethnicity, sexuality, migration, law, and cultural expression.

AAS 246 Asian American Youth in Film credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/246/)
Examines both mainstream and independent films and documentaries representing and/or produced by Asian American youth. Explores the role of multiculturalism and diversity issues in informing young people's experiences.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AAS 258 Muslims in America credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/258/)
Introduction to the study of Muslims in the United States and broadly the history of Islam in the Americas. Using a comparative approach, we study how the historical narrative of African American and Latino Muslims relates to newer immigrant populations, primarily Arab American and South Asian American Muslim communities. Same as LLS 258 and REL 258.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AAS 260 Intro Asian American Theatre credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/260/)
Same as THEA 260. See THEA 260.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AAS 275 The Politics of Fashion credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/275/)
Same as GWS 275. See GWS 275.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AAS 281 Constructing Race in America credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/281/)
Same as AFRO 281, HIST 281, and LLS 281. See HIST 281.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AAS 282 Feminist and Queer Activisms credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/282/)
Same as GWS 282 and LLS 282. See GWS 282.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AAS 283 Asian American History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/283/)
Same as HIST 283. See HIST 283.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AAS 286 Asian American Literature credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/286/)
Same as ENGL 286. See ENGL 286.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

AAS 287 Food and Asian Americans credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/287/)
Introduction to the interdisciplinary study of food to better understand the historical, social, and cultural aspects of Asian American food preparation, distribution and consumption. Students will investigate the politics and poetics of Asian American foodways by examining social habits, and rituals around food in restaurants, ethnic cookbooks, fictional works, memoirs, magazines, and television shows. Prerequisite: AAS 100 or AAS 120, or consent of instructor.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AAS 288 Global Islam and Feminisms credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/288/)
Same as GWS 288. See GWS 288.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

AAS 290 Individual Study credit: 2 to 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/290/)
Supervised reading and research in Asian American Studies chosen by the student with instructor approval. May be repeated to a maximum of 6 hours. Prerequisite: AAS 100.

AAS 291 Hinduism in the United States credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/291/)
Same as REL 291. See REL 291.

AAS 297 Asian Families in America credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/297/)
Same as HDFS 221 and SOCW 297. See SOCW 297.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AAS 299 Begin Topics Asian Am Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/299/)
May be repeated in the same or subsequent terms to a maximum of 6 hours.

AAS 300 Theories of Race, Gender, and Sexuality credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/300/)
Explores theories for performing interdisciplinary, intersectional and comparative studies within the field of Asian American studies. Follows multiple genealogies of critical work in ethnic and American studies. Same as GWS 305 and LLS 305.
This course satisfies the General Education Criteria for:
Advanced Composition

AAS 310 Race and Cultural Diversity credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/310/)
Same as AFRO 310, EPOL 310, and LLS 310. See EPOL 310.
This course satisfies the General Education Criteria for:
Advanced Composition
Cultural Studies - US Minority

AAS 315 War, Memory, and Cinema credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/315/)
Interdisciplinary examination of the ways that memories of war, trauma, and immigration are produced through the medium of film. Because war has been key to discourses and practices of imperialism and globalization, some questions addressed will include how these wars have impacted the nation and the global order, as well as how images about these wars produced important constructions of race, gender, and sexuality for national and cultural identities. Also examines the aftereffects of war by analyzing connections between war's trauma, race, immigration, and incarceration. Students will read critical texts, film theory, screenplays, and view films. Same as GWS 315. Prerequisite: AAS 100 or AAS 120, or consent of the instructor.

AAS 317 Asian American Politics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/317/)
Same as PS 317. See PS 317.

AAS 343 Criminalization and Punishment credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/343/)
Same as AFRO 343, AIS 343, GWS 343, and LLS 343. See LLS 343.

AAS 346 Asian American Youth credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/346/)
Explores cultural production of second-generation Asian American youth as a historical and social formation. Course examines how youth are actively shaping the U.S. landscape in terms of identity formation, youth, culture, education, juvenile justice, politics and activism, and community formations. These experiences are examined in backdrop of larger historical, economic, racial, social and political forces in the United States. Same as HDFS 341.

AAS 355 Race and Mixed Race credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/355/)
Same as LLS 355 and SOC 355. See LLS 355.

AAS 357 Literatures of the Displaced credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/357/)
Same as AIS 357, ENGL 357, GWS 357, and LLS 357. See LLS 357.

AAS 365 Asian American Media and Film credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/365/)
An examination of media generally and films and videos more specifically (experimental, documentary, independent, and Hollywood features) by, for, and about Asian Americans. Same as MACS 365. Prerequisite: Any AAS course at the 100- or 200-level, or consent of instructor.

AAS 370 Immigration, Law, and Rights credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/370/)
Exploration of the histories, cultures, and experiences of immigration to the United States by examining cultural production (literary and visual narratives and texts) alongside legal discourses (legislation, federal court cases). Same as LLS 372.
This course satisfies the General Education Criteria for:
Advanced Composition

AAS 375 Prisons, Race, and Terror credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/375/)
Examination of the U.S. prison regime, focusing on three dimensions of U.S. imprisonment -- criminal justice, immigrant detention, and martial imprisonment, particularly under the War on Terror. Same as LLS 377.

AAS 390 Intermed Topics Asian Am St credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/390/)
May be repeated in the same or subsequent terms to a maximum of 6 hours.

AAS 395 Adv Asian Am Undergrad Reading credit: 2 or 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/395/)
Supervised reading and research in upper level Asian American Studies topics chosen by the student with instructor approval. May be repeated to a maximum of 6 hours. Prerequisite: AAS 100.

AAS 400 Critical Ethnic Studies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/400/)
Examines the formation of the field of Critical Ethnic Studies and elaborates its key concepts, such as settler colonialism, indigeneity, heteropatriarchy, decolonization, and liberation. Same as LLS 460. 3 undergraduate hours. 4 graduate hours.

AAS 402 Asian American Education credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/402/)
Same as EPOL 402. See EPOL 402.
This course satisfies the General Education Criteria for:
Advanced Composition
Cultural Studies - US Minority

AAS 435 Commodifying Difference credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/435/)
Same as AFRO 435, GWS 435, LLS 435, and MACS 432. See LLS 435.

AAS 464 Theories & Theologies of Liberation credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/464/)
Same as ANTH 464, GWS 464, and REL 464. See GWS 464.

AAS 465 Race, Sex, and Deviance credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/465/)
Same as AFRO 465, GWS 465, and LLS 465. See LLS 465.

AAS 479 Race, Medicine, and Society credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/479/)
Same as ANTH 479 and LLS 479. See LLS 479.

AAS 490 Adv Topics in Asian Am Studies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/490/)
Research seminar on specialized topics in Asian American Studies. 3 or 4 undergraduate hours. 3 or 4 graduate hours. May be repeated if topics vary. Students may register in more than one section per term if topics vary. Prerequisite: AAS 100 or any Asian American Studies course, or consent of instructor.

AAS 494 Writing with Performance: Politics of Love credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/494/)
Same as ENGL 494, FAA 494, GWS 494, THEA 484. See FAA 494.

AAS 495 Minoritarian Aesthetics Practicum credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/495/)
Same as ENGL 495, FAA 495, GWS 425, and THEA 468. See FAA 495.

AAS 496 Experiments in Queer of Color Performance credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AAS/496/)
Same as ENGL 496, FAA 496, GWS 496, and THEA 486. See FAA 496.

AAS 501 Theory and Methods in AAS credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/501/)
Foundational gateway course for graduate study in Asian American Studies, examining the political, historical, epistemological, and cultural bases of the field through an intensive reading of canonical works and study of core concepts in the field. Also highlights the problems of interdisciplinary research and scholarship and adopts an intersectional and coalitional approach to Asian American Studies as it assumes the necessary linkages between other areas in ethic/racial and gender/sexuality studies.

AAS 539 Youth, Culture and Society credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/539/)
Examines youth as a historically and culturally specific social formation; examines discursive and material positioning of youth within broader intersecting racial, cultural, socio-economic, gender and political contexts to situate youth and youth cultural practices within global and local processes. Specific topics include youth cultures, juvenile justice, education, labor, consumerism, politics, sexuality and activism, as well as methodological considerations of conducting research on youth. Same as EPOL 518, and HDFS 539.

AAS 561 Race and Cultural Critique credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/561/)
Introduction to graduate level theoretical and methodological approaches in Comparative Race Studies. As a survey of theories of race and racism and the methodology of critique, this course offers an interdisciplinary approach that draws from anthropology, sociology, history, literature, cultural studies, and gender/sexuality studies. In addition, the study of racial and cultural formation is examined from a comparative perspective in the scholarship of racialized and Gender and Women's Studies. Same as AFRO 531, ANTH 565, GWS 561, and LLS 561.

AAS 589 Readings in Asian Am Studies credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/589/)
Individual guidance in intensive readings in the literature of one or more subdivisions of the field of Asian American Studies. May be repeated to a maximum of 8 hours. Students may register in more than one section per term if topics vary. Prerequisite: Graduate standing or consent of instructor.

AAS 590 Asian Am Studies Seminar credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/590/)
Approved for letter and S/U grading. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing or consent of instructor.

AAS 594 Writing the Minor - Minoritarian Aesthetics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/594/)
Same as ENGL 594, FAA 594, GWS 594, and THEA 594. See FAA 594.

AAS 596 Experiments in Minoritarian Aesthetics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AAS/596/)
Same as ENGL 596, FAA 596, GWS 596, and THEA 596. See FAA 596.

ABE - Agricultural and Biological Eng

ABE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ABE/)

Courses

ABE 127 Introduction to Agricultural & Biological Engineering credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ABE/127/)
Introduction to the engineering profession with career opportunities in the agricultural and biological engineering disciplines. Interactive class activities include concepts necessary for becoming a successful engineer including time management, design concepts, ethics, and team building. Students become familiar with laboratories, computer facilities, and other opportunities that are available to agricultural and biological engineering students. Class emphasis is on problem-solving skills, information synthesis, and technical communication. May not receive credit for both ABE 100 and ABE 127.

ABE 128 Applied Biology for Agricultural and Biological Engineers credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/128/)
Principles of biology relevant to agriculture, food, energy, and the environment, including microbiology, biochemistry, genetics, plant and animal systems, and ecosystems. Case studies of engineering applications where these biological principles have been taken into account or leveraged for the purpose of design. Credit not given for both ABE 128 and ABE 141.

ABE 152 Water in the Global Environment credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/152/)
This course develops a comprehensive understanding and appreciation of water and its impact in a global context. The course emphasizes cultural practices associated with water and its use, especially for regions in non-western cultures. Students will develop critical knowledge of: 1) water availability, water quality, and global challenges; 2) historical perspectives of water use; 3) past, present, and future environmental sustainability in relation to water, food, and energy; and 4) conduct analysis of cultural practices and their sustainability based on water in a global context. Students attend 3-4 field trips related to the course.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Nat Sci Tech - Phys Sciences

ABE 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ABE/199/)
May be repeated to a maximum of 12 hours.

ABE 227 Computer-Aided Problem-Solving for ABE I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/227/)
Approaches to solving problems in the field of Agricultural and Biological Engineering (ABE) using computer aids. Case studies will consider traditional and new domains in ABE such as: off-highway vehicle engineering, natural resources and environmental systems, control of indoor air environments, bioprocessing of food and agricultural materials, digital and urban agriculture, renewable energy, and sustainability. Typical approaches to problem solving include spreadsheets, GUI based programming, scripting, geospatial platforms, solid modeling, visual programming, dynamic modeling, biological modeling. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 228 Computer-Aided Problem-Solving for ABE II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/228/)
Case studies from traditional and new domains in ABE will be considered, such as: off-highway vehicles, natural resources and environmental systems, control of indoor air environments, bioprocessing of food and agricultural materials, digital and urban agriculture, renewable energy, sustainability, and synthetic biology. Typical approaches to problem solving include spreadsheets, GUI based programming, scripting, geospatial platforms, solid modeling, visual programming, dynamic modeling, biological modeling. ABE 228 considers complementary approaches and topics covered in ABE 227. Prerequisite: One of MATH 220, MATH 221, MATH 234.

ABE 232 Context in International Interventions credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/232/)
This multi-disciplinary course will examine a new approach to infrastructure engineering for alternately developed societies that seeks to counteract the disconnects and differing objectives among project stakeholders that result in lack of infrastructure sustainability and resiliency. Using a case study from Western Africa, the course will consider the impact of globalization, the attitudes of industrialized societies, and the role of place-based knowledge in designing and implementing infrastructure interventions for rural societies. Same as AFST 233.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ABE 340 Thermodynamics for Agricultural and Biological Engineering credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/340/)
Fundamental concepts of thermodynamics will be presented and applied to the discipline of Agricultural and Biological Engineering. Topics include: forms of energy, first and second laws of thermodynamics, energy balances on closed and open systems, entropy, refrigeration and cooling. Thermodynamic principles will be applied to Agricultural and Biological Engineering systems: thermodynamics of flow processes, mass and energy balances for non-reacting systems, mechanical energy balances, thermodynamics of food drying, freezing and reaction kinetics of biological systems. Credit is not given toward graduation for ABE 340 and either ME 200 or CHBE 321. Prerequisite: MATH 241.

ABE 341 Transport Processes in ABE credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/341/)
Principles of transport processes involving momentum, heat, and mass as applied to biological systems in agriculture, food, energy, and the environment. Credit is not given for both ABE 341 and CHBE 421. Prerequisite: ABE 227 and ABE 228.

ABE 361 Functional Analysis and Design of Agricultural Machine Systems credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/361/)
Design and development concepts of agricultural machines; analysis and synthesis of tillage, planting, harvesting, chemical application, material handling mechanisms, and precision farming tools. Prerequisite: TAM 212.

ABE 397 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/397/)
Individual research, special problems, thesis, development or design work under the supervision of a member of the faculty. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

ABE 398 Special Topics credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/398/)
Subject offerings of new and developing areas of knowledge in agricultural and biological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate term if topics vary to a maximum of 12 hours.

ABE 412 Applied Data Science for Agricultural and Biological Engineering credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/412/)
Use of data to study problems unique to agricultural and biological engineering, identify patterns, and make actionable insights. Course includes (1) exploratory data analysis including data profiling, missing data, description, and data visualization; (2) data processing techniques including singular value decomposition, dimensionality reduction, and Fourier and wavelet transforms; (3) machine learning techniques including regression, classification, feature selection, clustering, and neural networks. 3 undergraduate hours. 3 graduate hours. Prerequisite: CS101 or equivalent and MATH 257.

ABE 425 Engrg Measurement Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/425/)
Principles of instrumentation systems, including sensing, signal conditioning, computerized data acquisition, test design, data analysis and synthesis. Additional fees may apply. See Class Schedule. 4 undergraduate hours. 4 graduate hours. Credit is not given for both ABE 425 and ME 360. Prerequisite: ECE 205.

ABE 426 Principles of Mobile Robotics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/426/)
Prepares students in design, navigation, control, and autonomy of aerial and ground robots that operate in harsh, uncertain, and changing field environments. Covers three primary aspects of field robotics: perception (sensing), motion control, and data analytics, and bring everything together through labs involving ground robots and flying unmanned aircraft (drones). Same as ECE 426. 4 undergraduate hours. 4 graduate hours. Prerequisite: MATH 221, MATH 257, and MATH 285, IE 300 or ECE 313 or STAT 400, CS 101 or CS 124 or ECE 220, or graduate standing.

ABE 430 Project Management credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ABE/430/)
Engineering team effectiveness; project definition; assessing related technologies; marketing and business planning related to engineering; budgeting and financial analyses of engineering projects; safety, ethics and environmental considerations; intellectual property; engineering proposal presentation. Same as ETMA 430. 2 undergraduate hours. 2 graduate hours.

ABE 436 Renewable Energy Systems credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/436/)
Renewable energy sources and applications, including solar, geothermal, wind, and biomass. Renewable energy's role in reducing air pollution and global climate change. Capstone project to design a system for converting renewable energy into thermal or electrical energy. 3 undergraduate hours. 4 graduate hours. Credit is not given for both ABE 436 and ETMA 438. Prerequisite: PHYS 211.

ABE 445 Statistical Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/445/)
Same as ANSC 445 and NRES 445. See ANSC 445.

ABE 446 Biological Nanoengineering credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/446/)
Nanodevice design through organization of functional biological components; bio-molecular function and bioconjugation techniques in nanotechnology; modulation of biological systems using nanotechnology; issues related to applying biological nanotechnology in food energy, health, and the environment. 3 undergraduate hours. 4 graduate hours. Prerequisite: MCB 150.

ABE 452 Engineering for Disaster Resilience credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/452/)
Project-based design of resilient food, energy, and water supply chains for disaster-prone regions. Students investigate factors that provide context for specific disaster-prone regions and viable design solutions. Students quantify reliability and resilience of potential solutions, work with communities, aid organizations, and peer institutions identifying designs, eventually seeking pathways to implement solutions. Students will emerge with skills for managing such projects, collaborating closely with communities where local factors have impacts on sustainable engineering designs. 3 OR 4 undergraduate hours. 4 graduate hours. May be repeated one time by undergraduate students if the term project differs from previous term, up to total credit of 7 hrs. Not repeatable for graduate credit. Credit is not given toward graduation for: ABE 452 and ETMA 452.

ABE 454 Environmental Soil Physics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/454/)
Provides the theoretical basis for understanding and quantifying the physical, hydrological, geotechnical, and thermal properties of soil in relation to environmental processes. Topics include general soil properties as a porous media, particle size, soil structure and aggregation, water retention and potential, flow in saturated soil, flow in an unsaturated soil, soil temperature and heat flow, soil mechanics, infiltration, and soil-plant-water relations. 3 undergraduate hours. 3 graduate hours. Prerequisite: TAM 335 or NRES 201 or consent of instructor.

ABE 455 Erosion and Sediment Control credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ABE/455/)
Processes, estimation, and control of soil erosion by water, wind and resultant sedimentation. Upland, in-channel, urban, agricultural, disturbed (both military training and mining), and forested environments. Capstone experience in site planning and design. 2 undergraduate hours. 2 graduate hours. Prerequisite: CEE 350 or NRES 401; CEE 380 or NRES 201.

ABE 456 Land & Water Resources Engrg credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/456/)
Hydrology, hydraulics, design, construction and cost estimating of structures for the conservation and quality control of soil and water resources; relationship of topography, soils, crops, climate, and cultural practices in conservation and quality control of soil and water for agriculture. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Credit or concurrent registration in TAM 335.

ABE 457 NPS Pollution Processes credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ABE/457/)
Principles, concepts, and analysis of processes for nonpoint source pollution involving sediment, inorganic and organic chemicals, and microbial pathogens; hydrologic and pollutant interactions, pollutant fate and transport processes from storm water runoff and percolation; impact of pollutant transport on receiving water and ecosystems. 2 undergraduate hours. 2 graduate hours. Prerequisite: ABE 224 or CEE 350.

ABE 458 NPS Pollution Modeling credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ABE/458/)
Concepts, principles, and application of modeling for assessment and management of agricultural nonpoint source pollution. Modeling of agroecosystems and land use impacts on hydrologic and water quality response of upland catchments. Model selection, calibration, validation, and application for comparative analysis. Case studies in current watershed management issues, with a focus on agricultural waste and nutrient management, using existing field and watershed nonpoint source pollution models. 2 undergraduate hours. 2 graduate hours. Prerequisite: ABE 457.

ABE 459 Drainage and Water Management credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/459/)
Design, construction, performance, and maintenance of agricultural drainage systems to meet both production and water quality objectives. Modeling drainage systems. Principles of conservation drainage. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Credit or concurrent registration in TAM 335.

ABE 466 Engineering Off-Road Vehicles credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/466/)
Design and application of off-road vehicles for farm and construction use; thermodynamics of engines; measurement of power and efficiencies; power transmission and traction; chassis mechanics; operator environment. 3 undergraduate hours. 3 graduate hours. Credit is not given for both ABE 466 and ETMA 464. Prerequisite: ABE 340 or ME 200.

ABE 469 Capstone Design Experience credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/469/)
Design projects which utilize principles of design, engineering analysis and functional operation of engineering systems. Projects originate from industry, nonprofit entities and federal agencies. Design teams develop concepts, evaluate alternatives, model and analyze solutions, and build and test a final product. Emphases on communication skills, technical writing, and interaction with industry representatives. 4 undergraduate hours. No graduate credit. Prerequisite: Current senior standing in an engineering major. Restricted to undergraduate students.
This course satisfies the General Education Criteria for:
Advanced Composition

ABE 476 Indoor Air Quality Engineering credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/476/)
Principles and applications of indoor air quality. Particle mechanics, gas kinetics, air quality sampling principles and techniques, air cleaning technologies such as filters, cyclones, electrostatic precipitation for indoor environments; ventilation effectiveness for pollutant control. Research or design project. 4 undergraduate hours. 4 graduate hours. Prerequisite: PHYS 213, MATH 285, and TAM 335.

ABE 482 Package Engineering credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/482/)
Same as FSHN 469. See FSHN 469.

ABE 483 Engineering Properties of Food Materials credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ABE/483/)
Physical properties of foods and biological materials; properties relating to equipment design and the sensing and control of food processes; thermal, electromagnetic radiation, rheological, and other mechanical properties. 3 undergraduate hours. 3 graduate hours. Prerequisite: Restricted to Grainger Engineering Seniors or Graduate students.

ABE 488 Bioprocessing Biomass for Fuel credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/488/)
Engineering and scientific principles governing bioprocessing of biomass for production of ethanol and other fermentation products. Process unit operations; conventional and alternative feed stock materials; recovery of value-added coproducts and other variables involved in producing fuel ethanol; process simulation; economic analysis. 4 undergraduate hours. 4 graduate hours. Prerequisite: ABE 340 or ME 200 or CHBE 321. Restricted to Junior, Senior or Graduate student status.

ABE 497 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/497/)
Individual research, special problems, thesis, development or design work under the supervision of a member of the faculty. 1 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 8 hours. Prerequisite: Consent of instructor.

ABE 498 Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/498/)
Subject offerings of new and developing areas of knowledge in agricultural and biological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary to a maximum of 16 hours.

ABE 501 Graduate Seminar: Foundations of Success credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ABE/501/)
Basic research orientation, degree program requirements, literature review techniques, peer review of journal articles, presentation skills, safe laboratory practices, case studies, time management and productivity. Prerequisite: Restricted to ABE or ETMAS programs.

ABE 502 Graduate Seminar: Advanced Career Skills credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ABE/502/)
Introduction to managing time and stress, completing degree program requirements, research methods, data collection techniques, professional ethics, presentation and communication skills, and project management. Prerequisite: Restricted to ABE or ETMAS programs.

ABE 503 Graduate Seminar: Integrity, Teaching and Research credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ABE/503/)
Introduction to teaching and pedagogy, strategies for engaging students, presentation techniques, feedback, research integrity and thesis preparation. Prerequisite: Restricted to ABE or ETMAS programs.

ABE 526 Autonomous Systems and Robots credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/526/)
The objective of this course is to cover theory and techniques essential for building cyber-physical systems capable of autonomous decision making in the real-world. This course will lay a foundation for theory and techniques in autonomous planning, machine learning, and adaptive sequential decision making. Topics covered include Planning under uncertainty, Bayesian Nonparametric machine learning, Deep learning and Neural Networks, Markov Decision Processes, and Reinforcement Learning. A key emphasis of the course is placed on transition of fundamental aspects of autonomous decision making to application on robotics systems. Prerequisite: MATH 225; MATH 416, or equivalent; STAT 400, MATH 461 or equivalent. An introductory course in machine learning (e.g. CS 446), control (e.g. SE 422), robotics (e.g. ABE 424, ECE 470), OR Artificial Intelligence (CS 440) is required. An introductory software programming course is recommended. Restricted to graduate students in Engineering.

ABE 532 Advanced Contextual Design credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/532/)
Contextual Engineering addresses the loss of infrastructure usability, sustainability, and resiliency in non-industrialized societal settings that often results from disconnects and differing objectives among stakeholders. Using case studies and technical infrastructure designs, the impacts of globalization, Western attitudes, power dynamics, and place-based knowledge are explored and applied to infrastructure design and implementation processes, particularly when serving rural societies. Application of these concepts will then be conducted for specific design efforts associated with the student's own engineering discipline.

ABE 597 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/597/)
Individual investigations or studies of any phases of agricultural engineering selected by the student and approved by the advisor and the faculty member who will supervise the study. May be repeated to a maximum of 16 hours. Prerequisite: Consent of instructor.

ABE 598 Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ABE/598/)
Subject offerings of new and developing areas of knowledge in agricultural and biological engineering intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. May be repeated in the same or separate terms if topics vary to a maximum of 8 hours.

ABE 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/ABE/599/)
Approved for S/U grading only. May be repeated in the same term or in separate terms.

ACCY - Accountancy

ACCY Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ACCY/)

Courses

ACCY 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/199/)
May be repeated.

ACCY 200 Fundamentals of Accounting credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/200/)
Survey course in the principles of accounting for students registered in schools and colleges other than the College of Business. Credit is not given for both ACCY 200 and either ACCY 201 or ACCY 202. Prerequisite: Sophomore standing.

ACCY 201 Accounting and Accountancy I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/201/)
Develops a foundation for understanding and analyzing how accounting information is generated and interpreted by both external and internal decision makers. Students will begin by identifying the information conveyed in each of the basic financial statements and understand the way that this information is used by different external decision makers. Students will then focus on information used by management, with an emphasis on analysis to facilitate and guide management decision making, planning and control. Credit is not given for both ACCY 201 and ACCY 200. Prerequisite: Prior to enrollment in ACCY 201, students must: 1) have completed either ECON 102 or ECON 103; AND 2) have completed or be concurrently enrolled in the remaining ECON 102 or ECON 103 course.

ACCY 202 Accounting and Accountancy II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/202/)
Further develops the student's understanding of accrual accounting, the goals and objectives of financial reporting, the information needs of end users, the qualities of useful information, as well as the financial statements and financial statement elements. Students will analyze and record progressively more complex transactions, continuing to take the economic event from inception to reporting. Recurring themes and foundational concepts are emphasized such that students can develop intuition for accounting measurement and reporting. Credit is not given for both ACCY 202 and ACCY 200. Prerequisite: ACCY 201 or equivalent.

ACCY 290 Prof Internship in Accountancy credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/290/)
Formalized learning experience in combination with practice of accounting while engaged in an internship with a public accounting firm, business, or other off-campus organization; prior approval of learning plan and a summary report of learning experience are required. Approved for Letter and S/U grading. May be repeated in subsequent terms to a maximum of 3 hours. Prerequisite: Open to Department of Accountancy students; completion of ACCY 201 and ACCY 202 (or equivalent); and consent of department.

ACCY 301 Atg Measurement & Disclosure credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/301/)
Introduction to measurement and reporting of organizational performance for strategic and operational purposes with a focus on a variety of financial and non-financial performance measures suitable for both internal and external decision-making. Projects, together with a series of practical workshops, facilitate self-discovery of knowledge and development of a variety of professional skills and attitudes. Prerequisite: ACCY 202 or equivalent and recommend concurrent enrollment in ACCY 302 for Accountancy majors.

ACCY 302 Decision Making for Atg credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/302/)
We will develop and apply a framework to better understand the specific types of accounting information managers need to make key operational and strategic decisions. Utilizing business case studies and real-world projects, the course will also develop skills in gathering, visualizing, and statistically analyzing this accounting information to inform these important decisions. Prerequisite: ACCY 202 or equivalent; BADM 210 or concurrent enrollment or equivalent; and recommend concurrent enrollment in ACCY 301 for Accountancy majors.

ACCY 303 Accounting Institutions and Regulation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/303/)
Measurement and reporting of firm's liabilities and shareholders' equity. Topics include current liabilities, contingencies, subsequent events, bonds, leases, pensions, equity issuance and repurchase, dividends, and equity-based compensation. Prerequisite: ACCY 301 and FIN 221.

ACCY 304 Accounting Control Systems credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/304/)
Explores an important framework that highlights the vital roles accounting control systems play in shaping and implementing organizational strategy. Components of this framework include internal controls, organizational missions and values, codes of ethics, performance measurement, evaluation, and reward systems. Case studies, class discussions, group exercises, and field research projects emphasize critical reasoning, data analytics, teamwork, and written and oral communication. Prerequisite: ACCY 301 and ACCY 302.

ACCY 312 Principles of Taxation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/312/)
Introduction to the United States federal income tax system with an emphasis on income tax determination and the taxation of property transactions. Topics include the tax environment, tax provisions relevant to businesses, employees and business owners. Projects facilitate self-discovery of knowledge and development of a variety of professional skills and attitudes. Prerequisite: ACCY 202 or equivalent.

ACCY 321 Principles of Public Policy credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/321/)
Same as ACE 321, BADM 303, and PS 321. See PS 321.

ACCY 375 Career Pathways in Accountancy credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ACCY/375/)
Career Pathways in Accountancy is an enrichment program where you will explore accounting-related career paths, build skills for success, and connect with other Accountancy students and professionals. The goal of CPA is to accelerate students' learning by providing experiences that connect the classroom to real-world accounting and related careers. The course is intended for students who are in the early stages of deciding their specific career path and interviewing for internships and full-time positions. Prerequisite: Restricted to Gies College of Business Accountancy and Accountancy + DS majors and/or intention to declare Accountancy major.

ACCY 398 Practical Problems in Atg credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/398/)
Course covers the professional standards relating to corporate financial reporting, taxation, auditing and public sector reporting. Serves as a review course for the Uniform Certified Public Accountant (CPA) Examination. Approved for Letter and S/U grading. May be repeated up to 16 hours in separate terms, if topics vary. Credit is not given towards degree requirements. Prerequisite: Consent of the Department. Intended for students enrolled in the BS in Accountancy, MAS, and MSA programs. Students from other UIUC programs must demonstrate that they have taken courses in financial accounting (beyond introductory level), cost/managerial accounting (beyond introductory level), auditing, and taxation.

ACCY 405 Assurance and Attestation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/405/)
Conceptual introduction to diverse means by which assurers improve the quality of information used by third parties for contracting purposes, with emphases on the credibility- and relevance-enhancement properties of assurers' services. Topics include the economics of assurance and attestation, and concepts including independence, risk, evidence, and control. Projects facilitate self-discovery of knowledge and development of professional skills and attitudes. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACCY 304 or consent of department.

ACCY 410 Advanced Financial Reporting credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/410/)
Current authoritative accounting standards and applications to accounting practice. Topics do not represent the full range of financial reporting issues, but are selected based on relevance of the underlying business transaction, complexity of the topic, consistency of applicable standard with underlying reporting concepts, and transferability of the standard to other accounting issues. 3 undergraduate hours. 3 or 4 graduate hours. Credit is not given toward graduation for both ACCY 410 and ACCY 506 or ACCY 532. Prerequisite: ACCY 303 or consent of department.

ACCY 415 Auditing Stds and Practice credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/415/)
Framework for understanding and evaluating the professional auditing standards for assurance services. Model of financial reporting provides an overview of the types of information disseminated by companies to external users, and provides the basis for identifying professional standards areas for future standards' development. 3 undergraduate hours. No graduate credit. Credit is not given for both ACCY 415 and ACCY 515. Prerequisite: ACCY 304 or consent of department.

ACCY 419 Financial Accounting for Governmental and Nonprofit Entities credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/419/)
In this Governmental and Nonprofit Accounting course, students will experience an in-depth study of governmental and nonprofit accounting practices, focusing on financial reporting, budgeting, and fund accounting. Students will gain a comprehensive understanding of the unique accounting principles and regulations applicable to the public and nonprofit sectors. By the end of the course, students will know how to create and analyze financial transactions for governmental and nonprofit entities. 3 undergraduate hours. 4 graduate hours. Credit is not given toward graduation for both ACCY 419 and ACCY 519. Prerequisite: ACCY 301 or ACCY 501 or consent of department.

ACCY 449 Tax in Action - VITA credit: 1 or 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/449/)
Tax in Action allows students to gain hands-on experience while providing a valuable service to the community through the Internal Revenue Service's Volunteer Income Tax Assistance (VITA) program. Students will participate in a training and certification program through the IRS VITA program and will prepare tax returns for members of the community. Students taking the course for two credit hours will serve as team leads. They will be responsible for quality review, progress of the team toward goals and deadlines, training and communication with faculty. 1 undergraduate hour. 1 OR 2 graduate hours. May be repeated in separate terms to a maximum of 2 undergraduate or 4 graduate hours. Prerequisite: ACCY 312 or ACCY 505 or consent of the department. For 1 Credit Hour Section: Restricted to Junior, Senior, or Graduate Accountancy majors. For 2 credit hour section: Restricted to Master of Accounting Science or Master of Science in Accountancy programs.

ACCY 451 Advanced Income Tax Problems credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/451/)
An introduction to U.S. federal taxation of business entities including taxable corporations and flow through entities (partnerships, Subchapter S corporations, and limited liability companies). Practical problems facilitate self-discovery of technical tax knowledge and the development of data analysis skills. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Senior standing and ACCY 312.

ACCY 499 Senior Research credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/499/)
Research and readings course for students majoring in accountancy. May be taken by students in the college honors program in partial fulfillment of the honors requirements. 2 to 4 undergraduate hours. No graduate credit. May be repeated to a maximum of 6 hours. Prerequisite: Cumulative grade-point average of 3.0., honors in the junior year, or consent of department; senior standing.

ACCY 500 Accounting Measurement, Reporting, and Control credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/500/)
A managerial perspective of the nature and role of accounting in organizational measurement, reporting and control processes. Prerequisite: Enrollment in a non-accountancy masters program in business or consent of department.

ACCY 501 Accounting Analysis I credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/501/)
Addresses the conceptual framework and financial statements--balance sheet, income statement and the statement of cash flows. It also provides in-depth analysis of accounting issues related to the measurement, recognition and disclosure of current and non-current assets, and revenue recognition. May be repeated up to 4 hours for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Prerequisite: Enrollment in graduate degree program or consent of department.

ACCY 502 Accounting Analysis II credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/502/)
Measurement and reporting of firm's liabilities and shareholders' equity. Topics include contingencies, subsequent events, bonds, leases, deferred taxes, pensions, equity transactions, and earning per share. May be repeated up to 4 hours for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Prerequisite: ACCY 501 or equivalent; enrollment in graduate degree program or consent of department.

ACCY 503 Managerial Accounting credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/503/)
Introduction to management accounting principles, as used to facilitate and align internal decisions made by managers and employees. Topics include analytical tools and techniques to address common business problems, cost information systems, budgeting, and strategic performance measurement systems. May be repeated up to 4 hours for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Prerequisite: Credit or concurrent registration in ACCY 501 or equivalent; enrollment in graduate degree program or consent of department.

ACCY 504 Auditing credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/504/)
Introduction to conceptual and applied material in the field of auditing. Emphasizes the audit process, reporting, and professional responsibilities. May be repeated up to 4 hours for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Prerequisite: Credit or concurrent registration in ACCY 502, or equivalent; enrollment in graduate degree program or consent of department.

ACCY 505 Federal Taxation credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/505/)
Introduction to historical and conceptual as well as applied material in the accounting area of federal taxation; emphasizes the provisions of the tax law relevant to accounting measurement methods. May be repeated up to 4 hours for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Credit is not given for both ACCY 505 and ACCY 312. Prerequisite: Enrollment in graduate degree program or consent of department.

ACCY 506 Advanced Topics in Accounting credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/506/)
Covers current authoritative accounting standards and applications to accounting practice. Topics include accounting for business combinations, the preparation of consolidated financial statements, and other advanced financial reporting topics. Credit is not given toward graduation for both ACCY 506 and ACCY 410 or ACCY 532. Prerequisite: ACCY 501, and credit or concurrent enrollment in ACCY 502.

ACCY 507 Taxation of Business Entities credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/507/)
This course provides an introduction to the U.S. federal income tax treatment of corporations and pass-through entities, including Subchapter S corporations, partnerships, and limited liability companies. May be repeated up to 4 hours for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Credit is not given for both ACCY 507 and ACCY 451. Prerequisite: ACCY 505 or equivalent.

ACCY 510 Financial Reporting Standards credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/510/)
Stakeholders' needs for reliable and relevant information about the performance of firms, as well as managers; economic self-interests, influence managers' selection of accounting policies and financial reporting methods. This course selectively surveys both academic research and professional standards to focus on the measurement, classification and disclosure of financial transactions. Cases, class discussion and research projects emphasize independent thinking, group processes, and communication. Prerequisite: ACCY 410. Restricted to students in the BS/MAS Accountancy program or consent of department.

ACCY 511 External Risk Measurement and Reporting credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/511/)
Application of the concepts of risk and uncertainty to the financial management of organizations in achieving business objectives and strategies, with an emphasis on the role of accounting measurement and reporting in the management of such risks. Focuses on integrating knowledge acquired from behavioral, economic, finance, and accounting perspectives. Prerequisite: ACCY 410 and FIN 300, or equivalent, and enrollment in graduate accounting degree program; or consent of department.

ACCY 512 Data Analytics for Management Accounting credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/512/)
Data analytics incorporated into management decision making, including planning, cost management, and management control system design. Focuses on developing your skills of gathering and analyzing data for internal decision making purposes. Prerequisite: Enrollment in graduate accounting degree program or consent of department.

ACCY 515 Auditing & Assurance Standards credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/515/)
Role of professional and ethical standards in the conduct of auditing and assurance services and the role of auditing and assurance services in corporate governance and capital markets. This course selectively surveys both academic and professional literature to focus on the conduct of auditing and assurance services. Cases, class discussion, group projects, and data analytics using Tableau emphasize the importance of critical thinking, group processes, and communication for professional accounting practice. Real-world scenarios assist in implementing auditing standards. Prerequisite: ACCY 405 and enrollment in the BS/MS in Accountancy program or consent of department.

ACCY 516 Professional Responsibility and Ethics for Accountants credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/516/)
Covers key principles of accountants' professional responsibility in their jobs, organizations, and careers, and adopts both theoretical and practical perspectives of the role of ethics and morals within the accounting discipline. The course begins with a general overview of these key constructs and principles, including various philosophies from a variety of disciplines and cultures. Next, the course provides a historical perspective of major instances of accounting-related "failures" and "successes" in the area of professional responsibility and ethics. This historical perspective provides the underlying reasoning for many contemporary codes of conduct, ethics, and professional guidelines. A variety of experiential learning opportunities will help students explore and develop their own perspective on ethics and morals, and how these principles affect their professional roles, responsibilities, and choices.

ACCY 517 Financial Statement Analysis and Valuation credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/517/)
Examines the tools and techniques of financial statement analysis and company valuation from the perspective of investors and creditors; emphasizes theoretical and empirical properties of financial ratios as well as valuation methods used in practice. May be repeated up to 4 hours, if topics vary for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Credit is not given toward graduation for both ACCY 517 and ACCY 531. Prerequisite: ACCY 410 or concurrent enrollment; or ACCY 500 or equivalent; or ACCY 502 or equivalent; and enrollment in graduate degree program or consent of department.

ACCY 518 Financial Statement Fraud credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/518/)
Introduction to fraud examination with an emphasis on financial statement fraud. The course provides a comprehensive introduction to fraud examination. The topics addressed in the course include the unique characteristics of fraud examinations and a comparison to financial statement audits, the characteristics that should be possessed by fraud examiners, an overview of the fraud examination process, the nature and extent of fraud, an introduction to the taxonomy of financial statement frauds, techniques for evidence collection including interview techniques, Benford's law, and the development of fraud reports. Prerequisite: Enrollment in graduate accounting degree program or consent of the department. This class is restricted to MAS and MSA students: Accountancy-UIUC.

ACCY 519 Governmental and Nonprofit Accounting credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/519/)
In this Governmental and Nonprofit Accounting course, students will experience an in-depth study of governmental and nonprofit accounting practices, focusing on financial reporting, budgeting, and fund accounting. Students will gain a comprehensive understanding of the unique accounting principles and regulations applicable to the public and non-profit sectors. Students will take a deep dive into specialized areas within nonprofit and governmental accounting. This course will emphasize advanced research using various knowledgebase sources, and critical analysis. Additionally, this course involves more independent research and will require students to apply the knowledge gained in this course. By the end of the course, students will know how to create and analyze financial transactions for governmental and nonprofit entities. Credit is not given toward graduation for both ACCY 419 and ACCY 519. Prerequisite: ACCY 501 or consent of department. Restricted to students enrolled in the online Master of Science in Accountancy (iMSA) program.

ACCY 531 Financial Statement Analysis for MBAs credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/531/)
Gives professionals exposure to the knowledge and skills necessary to analyze, interpret, understand, and use financial information to make informed decisions. Students will use a variety of tools to break apart financial reports into meaningful units for analysis, to forecast financial statements, and to value a business entity. Content will be discussed from the perspective of investors, creditors, and other users of financial statements. Credit is not given toward graduation for both ACCY 531 and ACCY 517. Prerequisite: ACCY 500 or equivalent, and enrollment in graduate degree program or consent of department. For online Master of Business Administration (iMBA) students only.

ACCY 532 Accounting for Mergers & Acquisitions and Other Complex Transactions credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/532/)
Focuses on the financial accounting behind the deal structures and transactions that shape the design of complex organizations. To this end, this course will examine the accounting, economic, and regulatory aspects of a variety of different transaction types, including but not limited to M&A transactions. Credit is not given toward graduation for both ACCY 532 and ACCY 410 or ACCY 506. Prerequisite: Requires that students have a grasp of core accounting principles and have a basic knowledge of concepts in finance (time value of money, etc.). It is recommended that students complete ACCY 500 and FIN 570 before enrolling in this course.

ACCY 550 Multistate Taxation credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/550/)
Will examine state and local tax laws prevalent in the United States today. The course will consider the historical progression of state and local taxation, the power of states to tax (and the limitations on that power), and planning strategies for minimizing the impact of state and local taxation. Income taxes are emphasized; however, other taxes such as sales and use taxes and property taxes will be discussed. Prerequisite: ACCY 312 or ACCY 505, or equivalent, or consent of the department. Restricted to students enrolled in a graduate accounting degree program.

ACCY 551 Corporate Income Taxation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/551/)
Analyzes the tax treatment, problems, planning techniques, and underlying governmental policies involving corporations and their shareholders; coverage includes formations, operations, distributions, liquidations, reorganizations, and affiliations. Prerequisite: ACCY 312 or ACCY 505, or equivalent, or consent of department.

ACCY 552 Partnership Income Taxation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/552/)
Analyzes the tax treatment, problems, planning techniques, and underlying governmental policies involving partnerships and their partners, including Subchapter S corporations and their shareholders. Prerequisite: ACCY 312 or ACCY 505, or equivalent, or consent of department.

ACCY 553 Selected Topics in Fed Tax credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/553/)
Seminar on federal tax topics of current interest in specialized areas; topics include international taxation, deferred compensation, problems of closely-held businesses, estate planning, taxation of trusts, and new developments. May be repeated with the consent of the department. Prerequisite: ACCY 451 or consent of department.

ACCY 554 International Taxation credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/554/)
Analyzes the tax treatment, issues, planning techniques and underlying government policies involved in doing business internationally. The course incorporates concepts learned in all of the tax courses as they relate to the impact on cross border outbound transactions (i.e., the taxation of US taxpayers doing business abroad). Topics include the source of income, transfer pricing, controlled foreign corporations (CFCs), Subpart F income, foreign tax credits, Global Intangible Low-Taxed Income (GILTI), Base Erosion and Anti-Abuse Tax (BEAT), and Foreign Derived Intangible Income (FDII). While this course focuses heavily on outbound transactions, some inbound rules (i.e., non-US taxpayers doing business in the United States) will be discussed. Prerequisite: Credit or concurrent enrollment in ACCY 505, ACCY 507, or ACCY 551, or equivalent, or consent of the department. Restricted to students enrolled in a graduate accounting degree program.

ACCY 555 Income Tax Accounting credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/555/)
This course analyzes the underlying concepts for Accounting for Income Taxes. The course covers all aspects of financial statement income tax accounting including ASC 740, contingency reserves, purchase accounting; IFRS, footnote disclosures, and interim reporting. Prerequisite: Restricted to students enrolled in the MS in Taxation Program.

ACCY 556 Tax Research credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/556/)
Provides the student with a working knowledge of tax research methodology utilized by accountants in public practice. Aims to develop the student's capacity for either solving or defending his/her position with respect to a particular tax issue. Prerequisite: ACCY 312 or ACCY 505, or equivalent, or consent of department.

ACCY 557 Accounting Periods and Methods credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/557/)
Covers federal income tax rules concerning the choice, utilization, and changes regarding tax accounting periods and methods, including the following: overall methods of accounting, revenue recognition, deductions, capitalization, accounting periods, and certain other special tax accounting concepts available to taxpayers.

ACCY 558 Taxation of Closely-Held Bus. credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/558/)
The course analyzes the taxation and planning opportunities associated with all types of closely-held business entities and their stakeholders, including the tax impact of operating as an S corporation, converting from a C corporation to an S corporation, distributions, redemptions, liquidations, and termination of entities, at risk limitations, compensation vs. dividends, and fringe benefits. It also covers tax-exempt organizations.

ACCY 559 Tax Policy credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/559/)
A normative analysis of the structure and design of the tax system including the tenets of good tax policy; and the theoretical and empirical analysis of the impact of taxation on the economic system.

ACCY 561 Taxes and Business Strategy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/561/)
To be a complete tax professional, one must understand both the tax law and how the law interacts with a broad spectrum of factors affecting business decisions. To this end, the course integrates concepts from finance, economics and tax law to develop a complete understanding of the role of taxes in business strategy. It also provides a platform to allow students to explore specific areas of tax law more deeply than a traditional course would permit. Prerequisite: Concurrent enrollment with ACCY 557 or consent of instructor.

ACCY 562 Tax Procedures credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/562/)
An in-depth analysis of IRS Procedures including the processes through which tax laws are enacted, interpreted, administered and applied, along with the remedies available to taxpayers within the tax controversy framework of the IRS, Federal government and the court system.

ACCY 563 Consolidated Returns credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/563/)
Analyzes the technical tax law governing consolidated tax returns. Designed to further develop concepts discussed in the Corporate and Closely-Held Business courses.

ACCY 564 Reorganizations credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/564/)
Analyze the technical tax law governing corporate reorganizations. Designed to further develop concepts discussed in the Corporate Tax, Closely-Held Business as well as the Taxes ad Business Strategies courses.

ACCY 569 Data Driven Decisions in Accounting credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/569/)
This course prepares accounting students to use analytic software to explore, visualize, and statistically analyze accounting data.

ACCY 570 Data Analytics Foundations for Accountancy credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/570/)
Concepts and foundations underlying data analytics for accounting. Provides fundamental knowledge of how to acquire, organize, synthesize and analyze (possibly large) volumes of data to address questions and problems. After completing this course, students should (1) have a foundational understanding of the techniques underlying data analytics, (2) recognize scenarios and identify appropriate tools for various types of data analysis and (3) use Python and Tableau to perform data analysis. May be repeated up to 4 hours for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Prerequisite: Enrollment in graduate accounting program or consent of the department.

ACCY 571 Statistical Analyses for Accountancy credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/571/)
Fundamental knowledge of how to perform statistical analyses useful for leveraging accounting information to solve business problems. After completing this course, students should (1) have a foundational understanding of the statistical analyses underlying data analytics, (2) recognize scenarios and identify appropriate statistical tools for various types of data analysis and (3) use common computer-based tools to perform statistical analyses. May be repeated up to 4 hours for iMSA and online students that complete the first part of the course content in a 2-hour section (part A) and then complete the remainder of the class in a second 2-hour section (part B). Prerequisite: Enrollment in graduate accounting program or consent of the department.

ACCY 574 Risk Management and Innovation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/574/)
Decision making and analytic approaches to help organizations navigate disruptive changes in practices, technology, regulation, and culture to serve stakeholders (customers, employees, investors, the public). Course content focuses on identifying and quantifying risks, and balancing between achieving consistent, measurable outcomes and delivering stakeholder-driven objectives. Cases and experiential learning will emphasize developing tools to translate data into insights, tie these insights into managing stakeholder interests, and communicating these insights to decision makers. Prerequisite: Enrollment in MAS or MSA program.

ACCY 575 Data Analytics Applications in Accountancy credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/575/)
Develops knowledge regarding the role, methods, and implications of business and data analytics in accounting. Building on prior coursework on the fundamentals of statistical analysis and business/data analytics, this course provides the opportunity to apply related theoretical and practical principles to a variety of accounting scenarios, including audit, tax, fraud identification and detection, financial reporting, and managerial accounting. Prerequisite: ACCY 570.

ACCY 576 Data Preparation for Accounting credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/576/)
This course focuses on developing Python skills for assembling business data, taught within the context of multiple accounting settings (e.g., financial statement data, stock data, loan data, point-of-sale data, etc.).

ACCY 577 Machine Learning for Accounting credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/577/)
This course introduces machine learning algorithms and their applications in accounting problems. It covers classification, regression, clustering, text analysis, time series analysis. It also discusses feature importance and model optimization. Prerequisite: ACCY 576.

ACCY 578 Accounting Analytics Applications credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ACCY/578/)
Develops students' knowledge regarding the role, methods, and implications of business and data analytics in accounting via real-world applications of fundamental and advanced analytics principles. Application opportunities span multiple areas of accounting, including audit, fraud identification and detection, financial accounting, and managerial accounting. After engaging in this course, students should (1) have a foundational understanding of the role of business / data analytics in accounting and (2) be able to apply this knowledge to real-world clients, business decisions, etc. May be repeated in the same or separate semesters to a maximum of 4 hours. Prerequisite: Some sections require the completion of ACCY 576 (or equivalent), and are denoted as requiring this prerequisite.

ACCY 585 Constructs in Atg Research credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/585/)
Examines the role of information in economic and behavioral models of decision making under uncertainty; presents major paradigms underlying contemporary accounting research. Interdisciplinary approach; readings drawn from the accounting, behavioral, economics, and finance literature. Prerequisite: MATH 463 and ECON 502.

ACCY 590 Adv Prof Internship in ACCY credit: 0 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/590/)
A formalized learning experience in combination with practice of accounting while engaged in an internship with a public accounting firm, business, or other off-campus organization; prior approval of learning plan and a summary report of learning experience required. Approved for letter and S/U grading. May be repeated to a maximum of 4 hours. Prerequisite: Open only to accountancy majors enrolled in the department's integrated bachelor/master program or students with graduate standing in accountancy; completion of 300-level accountancy courses appropriate to internship learning plan; and consent of department.

ACCY 592 Introduction to Accounting Research credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/592/)
Comparative study of alternative methodologies and conceptual frameworks and their application to selected current research issues central to the development of accounting thought, both theoretical and empirical. Prerequisite: Courses in behavioral science, mathematics, and economics; or equivalent background and admission to the accountancy Ph.D. program; or consent of department.

ACCY 593 Special Research Problems credit: 1 to 8 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/593/)
Individual investigations or research projects selected by the students, subject to approval by the graduate adviser and the executive officer of the Department. May be repeated in the same or separate terms. Prerequisite: Enrollment in graduate accounting degree program or consent of department.

ACCY 594 Doctoral Research Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/594/)
Seminars in various accounting areas designed to enhance the research abilities of doctoral students and to assist them in preparing research proposals; these include Behavioral Dimensions, Public Sector, Tax, Auditing, Managerial, and others announced in the Class Schedule. May be repeated. Prerequisite: Credit or concurrent registration in ACCY 592 or consent of department.

ACCY 595 Models of Decision and Choice credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/595/)
Same as PS 528 and PSYC 534. See PSYC 534.

ACCY 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/ACCY/599/)
Individual direction and guidance in writing theses; seminar discussion of progress made. Approved for S/U grading only. May be repeated.

ACE - Agr & Consumer Economics

ACE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ACE/)

Courses

ACE 100 Introduction to Applied Microeconomics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/100/)
[IAI Code: AG901] Provides students an introduction to microeconomics by examining such topics as: individual and household decision-making regarding how to spend income and how many hours to work; decision-making by firms about production quantities, how many workers to hire, and what price to charge to maximize profits; the well-being of consumers in competitive markets compared to oligopolies and monopolies; and the role of government when markets fail (e.g., environmental, anti-trust, labor market issues, etc.). Credit is not given toward graduation for: Credit is not given toward graduation for ACE 100 if credit for ECON 102 has been earned.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ACE 123 Introduction to ACE credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/123/)
Introductory course for students in the Department of Agricultural and Consumer Economics to ensure success in their academic journey. Through class discussions and assignments, students will develop skills that will aid in learning, explore the academic environment at Illinois, and build community inside and outside the classroom. Credit is not given toward graduation for ACE 123 and ACES 101. Required of and limited to first-year students enrolled in the Department of Agricultural & Consumer Economics. Must register for one lecture and one discussion section.

ACE 161 Computer Concepts & Applications credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/161/)
[IAI Code: AG913] Instruction and practice in solving data-related problems using computers and general-purpose software packages within the context of personal finance, food, agriculture, and natural resources.

ACE 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ACE/199/)
Experimental course on a special topic in agricultural and consumer economics. Topic may not be repeated except in accordance with the Code. Approved for Letter and S/U grading. May be repeated if topics vary, up to 5 hours in the same semester, to a maximum of 12 hours.

ACE 203 Introduction to Public Policy and Law credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/203/)
Introduces students to public policy and law through federal legislation addressing agriculture, food, natural resources and rural economic development. Also introduces students to basic legal issues regarding judicial review of statutes, statutory interpretation and the Constitutional limits on Congressional powers. In addition to lectures, students will also participate in simulated legislative drafting efforts through assigned historic roles of committee members to write legislative proposals, debate and amendments.

ACE 210 Environmental Economics & Policy credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/210/)
Applies economic tools to analyze environmental problems and public policy formation. We will study human behavior to understand why environmental problems occur and our choice of policy tools to address problems. We will explore and critique current environmental policies in the U.S. and globally in a rigorous and constructive manner and the role of private-sector agents in solving environmental problems. Through this course, you will build your capacity for critical thinking and problem-solving. Same as ECON 210, ENVS 210, NRES 210, and UP 210.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ACE 220 Introduction to Sales: Principles and Strategies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/220/)
Prepares students for a variety of professional careers in business, marketing, and sales. Explores the human elements of business and introduces students to professional selling, marketing, sales strategies, human psychology, and communication of value while exploring tips & tricks about relationship selling from professionals working in the field. Students will be expected to participate in class discussions and complete exercises that use “real-world” examples in selling. Credit is not given toward graduation for ACE 220 if credit for ACE 199 SPS has been earned.

ACE 221 Negotiation credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/221/)
This course is an introduction to negotiation, with an emphasis on practical and useful knowledge that students can use throughout their financial lives, including negotiating job offers, auto purchases and sales, and residential purchases and sales. Credit is not given for ACE 221 if credit for ACE 199 NPS has been earned.

ACE 222 Agricultural Marketing credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/222/)
Examines factors affecting the size of the market for agricultural products and the scope of marketing activities; functions and services performed; pricing agricultural products, including the nature and causes of price fluctuations; and costs of marketing and efforts to reduce costs and improve the marketing system.

ACE 231 Food and Agribusiness Mgt credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/231/)
Overview of management in the food and agribusiness sector. Major topics covered include: introduction to the food and agribusiness sector; the environment of the firm; fundamentals, structural design, and change in organizations; leadership, motivation, communication; and planning and control. Coverage is at the introductory level with a focus on textbook material and current issues.

ACE 232 Farm Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/232/)
Economic principles are applied to the management of farms using budgeting system analysis, record analysis, financial management, and lease analysis. Problems related to resource appraisal and business organization are also addressed.

ACE 240 Personal Financial Planning credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/240/)
Examines principles of financial planning applied to individuals and households, with attention to organizing and analyzing financial information, budgeting, acquiring financial assets, managing credit, planning for taxes, investments, risk management, retirement, and estate planning.

ACE 241 Advanced Personal Finance credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/241/)
Students will obtain practical knowledge and skills applicable to their daily lives, whether at home or in a professional context. Students learn advanced risk management, make informed investment decisions, navigate credit scenarios, retirement and estate planning, and work toward achieving their financial goals. Students will learn about current research on personal finance. The course includes an action learning component, allowing students to educate their peers and the community on advanced personal finance topics. Prerequisite: ACE 240 and a Quantitative Reasoning course.

ACE 242 Women, Money, and Power credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/242/)
Women, Money, and Power will explore and develop money stories, managing money, workplace challenges, career advice, entrepreneurship, and empowerment. The course will present topics in an open and candid atmosphere, challenging historical perspectives and stereotypes about women and money. Students will learn from female financial planning professionals and entrepreneurs about their journeys. Students will leave this course with an understanding of issues women face in the financial world. Credit is not given towards graduation for ACE 242 if credit for ACE 199 AL has been earned.

ACE 243 Money and Happiness credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/243/)
What is the relationship between money and happiness? In this course, students will engage with scientific literature on happiness and the role money plays in living well. Students will explore the intersection of quantitative and qualitative aspects of personal finance and financial planning, examining what motivates individuals, and seeking to understand how values shape the financial decision-making processes and long-term goals. Prerequisite: ACE 240 (or other financial planning background) is recommended but not required.

ACE 251 The World Food Economy credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/251/)
Examination of global food production, consumption, and trade; problems of hunger and population; the role of agricultural development, trade, and aid in relieving hunger. Prerequisite: ACE 100 or ECON 102 or consent of instructor.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ACE 254 Economic Systems in Africa credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/254/)
Examines the fundamentals of economic development in Africa. It will provide students the tools and concepts to think about development in a way that is consistent with economic theory, informed by empirical research, and practically connected to policy. The course will discuss issues that the region faces related to economic growth, poverty, population, health, education, gender, agriculture, and climate change. Same as AFST 254.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ACE 255 Economics of Food and Environmental Justice credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/255/)
Access to food and a healthy environment varies across rural/urban location, race, gender, and income in the U.S. Students in this course will analyze questions of "food justice" and "environmental justice" through the lens of economic theory. Students will learn important concepts in the scholarship of minority cultures, learn facts about how food security and experience of environmental quality varies among groups in the U.S., and learn how to use economic theory to understand those patterns and analyze policies to correct inequities.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

ACE 262 Applied Statistical Methods and Data Analytics I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/262/)
Statistics is a key tool in the data analysis process involving data collection, description, analysis, and results interpretation. This course discusses how to collect and analyze data using descriptive statistics. Random variables, probability distributions, hypothesis testing, simple linear regression, linear systems, matrices, and the theoretical underpinnings of these concepts are introduced. Emphasis is placed on examples from the field of economics to enhance students' ability to apply appropriate models to professional and everyday problems. Credit is not given toward graduation for ACE 262 if credit for any of ECON 202, CPSC 241, STAT 100, or equivalent has been earned.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

ACE 264 Applied Statistical Methods & Data Analytics 2 credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/264/)
Offers the statistical and econometric tools to describe and understand common economic issues. The emphasis will be on the multiple regression model and its associated extensions regularly used to overcome traditional econometric issues. The course will introduce and use an advanced statistical software for hands-on exercises. No prior experience with the software is expected or required. Credit is not given toward graduation for ACE 264 if credit for ECON 203 or equivalent has been earned. Prerequisite: ACE 262 or equivalent.

ACE 270 Consumer Economics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/270/)
Introduction to the study of the consumer in the American economy; sources of consumer information and consumer protection; and examination of current consumer issues within an economic framework. Prerequisite: ACE 100 or ECON 102.

ACE 280 Experiencing Agritourism credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/280/)
Same as RST 290. See RST 290.

ACE 291 Ag Policy & Leadership credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/291/)
Current policy issues affecting agriculture and the legislative and rulemaking process that determines those policies will be studied. A trip to Washington, DC during spring break will give the students an opportunity to interact with legislators, federal agencies, organization leaders and representatives of the national and international agricultural policy community to better understand the policy making process and the issues moving through it. Student participation will focus on developing leadership skills and having an opportunity to meet with leaders who are actively engaged in creating and changing public policy. Additional fees may apply. See Class Schedule.

ACE 292 Farm, Food & Environmental Policy credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/292/)
Students will be exposed to the breadth and complexity of agriculture in the United States and the challenges and opportunities to be found in the U.S. food and agricultural system. It includes a week-long trip to an area outside of Illinois (such as California) during spring break where students will meet with farm, food and environmental leaders who are deeply involved in driving the issues shaping farm, food, and environmental policy. Additional fees may apply. See Class Schedule. Prerequisite: Restricted to Sophomore, Junior or Senior standing AND with approval of the instructor.

ACE 293 Off-Campus Internship credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/293/)
Supervised, off-campus experience in a field directly pertaining to a subject matter in agricultural and consumer economics. Approved for S/U grading only. May be repeated, up to 4 hours in the same semester, to a maximum of 10 hours. Independent Study courses are limited to 12 hours total applying to a degree in ACES. Prerequisite: Sophomore standing, cumulative GPA of 2. 5 or above at the time the internship is arranged, and consent of instructor.

ACE 294 On-Campus Internship credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/294/)
Supervised, on-campus, learning experience with faculty engaged in research. Approved for S/U grading only. May be repeated up to 4 hours in a semester, to a maximum of 10 hours. Credit is not given for more than a total of 12 hours of Independent Study (IND) courses applying to a degree in ACES. Prerequisite: Sophomore standing, cumulative GPA of 2. 5 or above at the time the internship is arranged, and consent of instructor.

ACE 295 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/295/)
Individual or small group research, special problems, or other studies under the supervision of an appropriate member of the faculty. Approved for Letter and S/U grading. May be repeated up to 4 hours in the same term, but no more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward the degree. Prerequisite: Cumulative GPA of 2.5 or above at the time the activity is arranged, and consent of instructor.

ACE 300 Intermediate Applied Microeconomics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/300/)
Why could energy policy affect the profitability of farmers? Is it better to help families in developing countries with food aid or mini cash grants? Who will bear the cost of a carbon tax? Microeconomic theory helps us answer many important questions about markets and human behavior. Students will learn rigorous intermediate microeconomic theory through applications to areas such as agriculture, development, finance, consumer behavior, and the environment. Credit is not given toward graduation for both ACE 300 and ECON 302. Prerequisite: ACE 100 or ECON 102; MATH 220, MATH 221, MATH 234, or equivalent.

ACE 303 Intro to Legal Principles credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/303/)
An introduction to basic legal principles using contemporary topics to illustrate their application. Fundamentals of the law of property and torts are used to develop reasoning and analytical skills to better understand legal concepts. Credit is not given toward graduation for: ACE 403 and ACE 303.

ACE 306 Food Law credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/306/)
Explores the legal and political dimensions of food law, policy and trade in the United States and major trading partners. Examines the development of major national and state laws that apply to production, distribution and retail sale of food. Evaluates current issues in food regulation, including: biotechnology, organics, health labeling claims, food safety and products liability litigation. Discusses food regulation in other countries within the context of international treaties such as the World Trade Organization and United Nations.

ACE 310 Natural Resource Economics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/310/)
Economic principles are used to analyze a broad range of natural resource policy and management issues. Economic concepts developed include public goods, social welfare, discounting, dynamic efficiency, and resource scarcity. Natural resources examined include biodiversity, fisheries, forests, minerals, soil, and water resources. Same as ENVS 310 and NRES 310. Prerequisite: ACE 100 or ECON 102.

ACE 321 Principles of Public Policy credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/321/)
Same as ACCY 321, BADM 303, and PS 321. See PS 321.

ACE 335 Food Marketing and Behavior credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/335/)
This course will explore the food choices consumers make and what this means in the food and agribusiness industries. Students will also learn how to conduct basic research related to consumer behavior, including developing a research question, designing high quality surveys/experiments, and analyzing data.

ACE 341 Careers and Professionalism credit: 1 or 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/341/)
Students study contemporary issues and career opportunities associated with various concentrations in the Department of Agricultural and Consumer Economics. An in-depth dialogue with industry professionals helps develop an understanding of the skill sets needed to succeed in each of the different career paths discussed. May not be repeated for credit.

ACE 344 FinTech in Personal Finance and Financial Planning credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/344/)
Provides students with a dive into Personal Finance, Financial Planning and FinTech. Students will develop a comprehensive understanding of how personal finance relies on Fintech to create comprehensive solutions for clients. This class will provide hands-on training in modern financial planning software, tools and cloud-based applications. Additionally, this course explores digital currencies and blockchain technology through the lens of personal finance and financial planning. Credit is not given towards graduation for ACE 344 if credit for ACE 398 TCH has been earned. Prerequisite: ACE 240 or FIN 232.

ACE 345 Small Business Finance credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/345/)
Introduction to financial decision-making for small businesses and individuals. Examines financial statement preparation and analysis; capital structure (use of debt and equity); investment analysis and portfolio theory; time value of money; interest rates and term structure; asset markets (pricing theories); evaluation of financial risk and insurance concepts, and an introduction to credit markets and financial capital suppliers. In addition, there is a class project involving a visit to either a lender or a financial planner/advisor, and other experiences to introduce students to services and careers in financial sectors. Prerequisite: ACCY 201 or equivalent, or consent of instructor.

ACE 346 Tax Policy and Finan Planning credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/346/)
Explores the federal tax system, including income, social security, Medicare, and estate taxes, and state and local tax systems. Students learn basic tax principles, public policy issues embedded in the tax systems, and how tax law influences financial plans and decisions. Helps students make wiser financial decisions through increased understanding of the tax impacts of those decisions, participate knowledgeably in public debates surrounding tax policy, and prepare for careers as financial planners. Prerequisite: Sophomore standing.

ACE 349 Risk Management and Financial Planning Across the Life Cycle credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/349/)
Provides students with an in-depth view of risk management and insurance by following a case study over the course of the semester. Students will evaluate human capital, health, disability, life, property and casualty, business, retirement, and long-term care risks faced by financial planning clients. The course will feature multiple lectures and interviews with practicing financial planning professionals. Content will be delivered utilizing a life cycle approach, focusing on a hypothetical client household's risks as they evolve through early career (with and without dependents), mid-career with dependents, and near-retirement stages of life. Credit is not given towards graduation for ACE 349 if credit for ACE 398 RM has been earned. Prerequisite: ACE 240 or FIN 232.

ACE 360 Spreadsheet Models and Applications credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/360/)
Spreadsheet development and modeling skills intended for economics and finance applications. Advanced uses of spreadsheet software, development of user-defined functions, use of Visual Basic and comparable external interface languages, data query designs, and advanced data analyses, summary and presentation skills are stressed. Intended to serve as a prerequisite for advanced modeling courses in specific disciplinary areas. Prerequisite: ACE 161, CS 105, or consent of instructor.

ACE 396 Honors Research or Thesis credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/396/)
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated as topic vary, up to 4 hours in the same term to a maximum of 12 hours in separate terms. Credit is not given for more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward the degree. Prerequisite: Junior standing, admission to the ACES Honors Program, and consent of instructor.

ACE 398 Experiential Learning credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/398/)
Experiential learning on a special topic in a field of study directly pertaining to subject matter in agricultural and consumer economics. Additional fees may apply. See Class Schedule. Approved for both Letter and S/U grading. May be repeated up to 12 hours, if topics vary.

ACE 403 Agricultural Law credit: 3 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/403/)
Relation of common-law principles and statutory law to land tenure, farm tenancy, farm labor, farm management, taxation, and other problems involving agriculture. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Junior standing.

ACE 406 Environmental Law credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/406/)
Examination of environmental law issues. Topics include common-law pollution control; role of administrative agencies and courts; federal and state power; air and water pollution; regulation of toxic substances; protection of land, soil and other natural resources. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: Sophomore or higher standing.

ACE 407 Business and Industry Data Analysis credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/407/)
Prepares students to find, analyze and explain data available through federal and state statistical agencies (e.g., U.S. Census Bureau, U.S. Bureau of Labor Statistics, Illinois Dept. of Employment Security). These data can help students answer business and policy-related questions about the employment, wage, and demographic trends within specific geographies. Active learning and regular exercises allow students to build data literacy, master basic analytical skills, and gain proficiency using Excel, PowerPoint, and several data visualization tools. 3 undergraduate hours. 4 graduate hours. Credit is not given toward graduation for: ACE 407 and ACE 499 MW or MWG. Prerequisite: ACE 161 or equivalent.

ACE 408 Environmental Valuation credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/408/)
Equips students with the knowledge and skills to evaluate the economic value of natural and ecological resources. Students will explore theories of economic valuation while analyzing relevant data. Key topics include policy management and implementation, assessing ecosystem services and their valuation, and cost-benefit analysis. 3 undergraduate hours. 4 graduate hours. Prerequisite: ACE 161 or equivalent; ACE 210 or ACE 310 or equivalent.

ACE 410 Energy Economics and Policy credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/410/)
Use of economics tools to understand and evaluate public policy issues surrounding energy markets and related environmental markets. Focus is on the economic drivers of energy production and use, biofuel policy, transportation and storage of energy commodities, regulation of energy markets, and policies designed to mitigate the impact of energy production and consumption on the environment. 3 undergraduate hours. 4 graduate hours. Prerequisite: ACE 300 or equivalent.

ACE 411 Environment and Development credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/411/)
Global poverty, global food security, and climate change are three of the most critical challenges in our world today. This course describes the relationship between economic development and environmental sustainability. Economic theory is used to study global poverty, explain environmental sustainability issues, and propose policy solutions. Equity and implementation challenges related to environment and development policies are also discussed. 3 undergraduate hours. 4 graduate hours. Prerequisite: ACE 300 or ECON 302.

ACE 417 Climate Change Economics and Policy credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/417/)
Provides expertise on climate change, its economics and the policies associated to it. The course starts with the physical properties of climate change with an emphasis on uncertainties, the difficulties of projecting climate trends and of devising future emissions scenarios. Then the course moves on to policy instruments for emission reduction, impacts of climate change (agriculture, development, migration, labor productivity, health), the costs and benefits of adaptation and mitigation, and international agreements. Same as ATMS 417. 3 undergraduate hours. 4 graduate hours. Prerequisite: ACE 100 or equivalent or consent of the instructor.

ACE 427 Commodity Price Analysis credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/427/)
A comprehensive and in-depth survey of commodity price analysis with emphasis on the fundamental factors affecting prices of agricultural products; sources of information relating to production and demand factors; government activities as they relate to prices of agricultural products; technical analysis of agricultural product prices; and market efficiency and forecasting. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 100 or ECON 102; ACE 262, or equivalent.

ACE 428 Commodity Futures and Options credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/428/)
Development of futures trading; operation and governance of commodity exchanges; economic functions of futures trading; operational procedures and problems in using futures markets; public regulation of futures trading; evaluation of market performance. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 222 or FIN 300 or equivalent.

ACE 430 Corporate Food Marketing credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/430/)
Performance of the food system; marketing margins; transportation, advertising, and retailing of food products; structure, conduct, and performance of food marketing firms and industries; government and public interest in the food system. Same as FSHN 425. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 100 or ECON 102.

ACE 431 Agri-food Strategic Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/431/)
Process of strategic decision-making in food and agribusiness firms; methods for analysis of business and regulatory environment; organizational issues in strategy choice for firms and supply chains. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 231, BADM 320, or consent of instructor.

ACE 432 Advanced Farm Management credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/432/)
Students develop expertise in evaluating and making decisions similar to those faced by farm operators and managers. 3 undergraduate hours. 4 graduate hours. Prerequisite: ACE 232. Junior standing or consent of instructor.

ACE 435 Global Agribusiness Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/435/)
Examination of the economic and strategic management of food, textile, and agribusiness firms within a global business environment; topics include the global business environment and its institutions, organizational strategies and policies, and business operations in global agricultural, food and textile industries. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 262 or equivalent or consent of instructor. Restricted to students with junior standing.

ACE 436 International Business Immersion credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/436/)
This is an experiential learning course with an international travel component designed to equip participants with the skills required to successfully operate in a global business environment. Examples of topics covered include global supply chains and marketing channels, regulatory and trade environments, and environmental considerations. The course culminates in a two-week immersion in which students learn from business leaders, trade organizations, government officials, and producers in the host country. 3 undergraduate hours. 4 graduate hours. May be repeated in separate terms to a maximum of 6 hours for UG credit and 8 hours for GR credit. Prerequisite: Consent of instructor.

ACE 440 Finan Plan for Professionals credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/440/)
Capstone course applies financial planning principles and concepts in realistic case studies of specific planning needs, requires a comprehensive financial planning exercise, and covers professional ethics and responsibilities. 3 undergraduate hours. 4 graduate hours. Prerequisite: Concurrent enrollment in or completion of ACE 345, ACE 346, ACE 444, and ACE 449.

ACE 441 FINRA Professional Exam Review credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/441/)
Designed to prepare students to sit for the Series 65 Exam, SIE Exam, and begin the journey towards sitting for the CFP® Exam. This course will help students prepare for careers in financial planning, investment management, insurance, brokerage, banking, and credit unions. ACE 441 also serves as a review of content learned in the financial planning concentration. Students are responsible for registering and paying for the certification exam separately. The exam fee ranges from $80-$190. 3 undergraduate hours. No graduate credit. Credit is not given towards graduation for ACE 441 if credit for ACE 398 FP has been earned. Prerequisite: ACE 240 or FIN 232; ACE 349 or FIN 230; ACE 444 or FIN 441; and ACE 449.

ACE 444 Financial Services & Investing Planning credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/444/)
Advanced skills in and understanding of asset pricing, equity and debt investment, portfolio theory and diversification, asset allocation, financial risk management, and financial intermediation and regulation emphasizing applications in financial planning and agricultural finance. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ACE 345, or FIN 221, or consent of instructor.

ACE 445 Intermediate Financial and Estate Planning credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/445/)
Covers financial and estate planning philosophies, techniques, and procedures. Students will utilize case studies and problem-solving activities to construct financial plans for individuals and families in various life cycle stages and family structures. 4 undergraduate hours. 4 graduate hours. Prerequisite: ACE 240 or FIN 232; ACE 300 or ECON 302; or consent of instructor. ACE 349 or FIN 230 is recommended. Restricted to students with junior standing.

ACE 446 Modeling App's Finan Plan credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/446/)
Improves ability to make effective financial plans and decisions. Involves development of decision tools that are applied to "real world" financial data sets and planning/decision-making circumstances. Topics include applied data management techniques (designing queries/storable forms), financial statement analysis, numeric optimization tools, leverage assessment, incorporating risk in decisions, capital budgeting and time value of money, term structure of interest rates, and currency exchange. 2 undergraduate hours. 2 graduate hours. Prerequisite: One of ACE 240, ACE 345, FIN 221 or FIN 232; or consent of instructor and knowledge of spreadsheet software equivalent to the coverage of ACE 360.

ACE 447 Capstone in Applied Economics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/447/)
Capstone course that examines how firms across agricultural, food, and beverage supply chains navigate disruptions and adapt to contemporary challenges, such as regulatory reform, macroeconomic uncertainty, and shifts in consumer demand. Students will engage in case studies and class projects, discuss current events, and learn from industry leaders to see leadership and management strategies in action. The course promotes essential soft skills that employers value in today's job market, including critical thinking, problem-solving, and communication. 3 undergraduate hours. No graduate credit. Prerequisite: ACE 262 and ACE 300 or equivalent coursework.

ACE 449 Retirement & Benefit Planning credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/449/)
Employee benefit and retirement planning, including employer-sponsored or individually managed options, with particular attention to determining benefit and retirement needs and managing risks in specific planning situations. 3 undergraduate hours. 3 or 4 graduate hours. Credit is not given for both ACE 449 and FIN 434. Prerequisite: ACE 240, ACE 345, or consent of instructor.

ACE 451 Agriculture in Intl Dev credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/451/)
Economics of agricultural development and the relationships between agriculture and other sectors of the economy in developing nations; agricultural productivity and levels of living in the less developed areas of the world; and studies of agricultural development in different world regions including Africa, Asia, and Latin America. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ACE 300, ECON 302 or consent of instructor.

ACE 452 The Latin American Economies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/452/)
Same as ECON 452. See ECON 452.

ACE 455 International Trade in Food and Agriculture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACE/455/)
Economic theory used to analyze trends and patterns of international trade in major agricultural commodities and to understand interaction between economic development, policy, and trade; welfare implications of policies affecting production, consumption, and trade; implications of protectionism, free trade, regional trade blocs, and multilateral trade liberalization, and the role for international trade institutions. 3 undergraduate hours. 3 graduate hours. Prerequisite: ACE 300, ECON 302, or consent of instructor.

ACE 456 Agricultural and Food Policies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/456/)
Analysis of agricultural and food policies and programs and their effects on producers and consumers of agricultural products. Formulation of agricultural and food policies are examined with an emphasis on historical and current economic problems affecting agriculture and rural America. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ACE 300, ECON 302, or consent of instructor.

ACE 474 Intermediate Consumer Economics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/474/)
Concepts, theories, and methods for analysis of the micro and macro aspects of consumption; includes standards and content of consumption and description of consumption patterns and trends in the USA and selected other countries. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ACE 270; and either ACE 300 or ECON 302; and a course in statistics; or consent of instructor. Restricted to students with junior standing.

ACE 476 Behavioral Economics and Financial Decision Making credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/476/)
Uses applied economics and finance coupled with insights from psychology to better understand human behavior and decision making. Application of core behavioral economic concepts and interventions to address pressing economic and financial challenges. 3 undergraduate hours. 4 graduate hours. Prerequisite: ACE 300, ECON 302 or consent of instructor; a course in statistics. Restricted to students with senior standing.

ACE 478 Topics in Advanced Consumer Economics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/478/)
Special topics in advanced consumer economics. See class schedule for topics. 3 undergraduate hours. 4 graduate hours. May be repeated in the same or separate terms up to a maximum of 9 undergraduate hours or 8 graduate hours if topics vary. Prerequisite: ACE 300 or equivalent. Some topics may require additional prerequisites. Read the section text for each topic.

ACE 499 Contemporary Topics in ACE credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/499/)
Group discussion or an experimental course on a special topic in agricultural and consumer economics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for Letter and S/U grading. May be repeated in the same semester to 4 hours, or subsequent terms to a maximum of 12 hours as topics vary.

ACE 500 Applied Economic Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/500/)
Provides an understanding of theory of the firm, consumer economics and various market models necessary to conduct applied professional economic research with special emphasis on applications relevant to agricultural, consumer, development, and resource economics. Multivariate calculus and optimization methods are used.

ACE 501 Risk and Info: Theory and App credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/501/)
Applications of the theory of economic behavior under uncertainty and asymmetric information. Analysis of individual decision making under uncertainty includes: tests of the expected utility hypothesis; comparative statistics of changes in risk preferences and risk; and moment based models of decision making. Analysis of economic equilibrium under uncertainty and asymmetric information includes tests for complete markets and applications of noncooperative game theory. Prerequisite: Concurrent enrollment in ECON 500 and ECON 506.

ACE 502 Demand/Supply/Firms/Households credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/502/)
Applications of demand and supply theories and applications of firm and household behavior. Topics include demand and supply systems, aggregation and separability, dynamics, formation and boundaries of the firm, household decision making, intrahousehold allocation, allocation of time, human capital, and hedonics. Same as ECON 553. Prerequisite: ECON 500 and ACE 501.

ACE 503 Equilibrium and Welfare Econ credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/503/)
Provides a theoretical and applied treatment of economic equilibrium and the consequences of displacement of equilibrium for the welfare levels of economic agents. Displacement of equilibrium will be shown to be brought about by changes in government policy, technology, and consumer preferences. Welfare measures under partial equilibrium, general equilibrium, and multi-market models will be presented. Includes various applications of welfare economics in the analysis of policy and technological change. Prerequisite: ECON 500 and at least two semesters of college calculus.

ACE 504 Foundational Microeconomic Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/504/)
An advanced course in microeconomic theory, Microeconomics provides students in the theoretical fundamentals that serve as the foundation for studying microeconomics at the graduate level and conducting applied microeconomics research at a very high level. Prerequisite: MATH 220, MATH 221, MATH 231, MATH 415 and ACE Math Camp. Restricted to Graduate students.

ACE 505 Empirical Methods in Applied Economics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/505/)
Covers techniques in modern applied econometrics, with an emphasis on reduced-form causal inference. These methods form an important foundation for engagement with much of the literature in agricultural and applied economics. The course surveys research designs, with an emphasis on their identifying assumptions for causal inference. To prepare for future research, students will use software with data to apply these methods in problem sets. Prerequisite: ECON 502 or equivalent.

ACE 510 Adv Natural Resource Economics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/510/)
Economic theory is used to examine the allocation of renewable and efficiency issues that arise from natural resource policy and management issues. Same as ECON 548, ENVS 510, and NRES 510. Prerequisite: ECON 302 or equivalent.

ACE 516 Environmental Economics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/516/)
Same as ECON 549. See ECON 549.

ACE 520 Time Series Econometrics for Price Analysis credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/520/)
Examination of selected economic problems in marketing agricultural products and relevant theory and empirical methods for analyzing and interpreting research results. Topics include: operational efficiency in marketing firms and industries; efficient allocation over space, form, and time; price making institutions; and research in demand stimulation and selected issues in trade. Prerequisite: ACE 562 and ACE 563, and ECON 500; or equivalent.

ACE 527 Advanced Price Analysis credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/527/)
Study of methods used to analyze factors affecting agricultural prices; analysis of agricultural prices and price movements with respect to time, space, and form; and examination of methods of price forecasting and techniques of time series analysis. Prerequisite: ACE 562 or ECON 507 and ECON 500; or equivalent.

ACE 528 Research in Futures Markets credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/528/)
Research literature on commodity futures and options markets, both theoretical and empirical; topics include: supply of storage, basis models, theory of the firm and hedging under uncertainty, optimal hedging, speculative returns, market performance, pricing efficiency and option pricing. Prerequisite: ECON 500 or equivalent.

ACE 530 Microeconometrics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/530/)
Applied micro-econometrics concentrating on cross section data, panel data, and treatment effects. Includes methods for estimating treatment effects in the Rubin causal model framework. Emphasis will be placed on econometric procedures relevant for agricultural and applied economists and their implementation in Stata, including Mata. Prerequisite: ECON 506 and ECON 507, or equivalent.

ACE 531 Impact Evaluation credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/531/)
The problem of identification. Methods for impact evaluation, including randomized field experiments, propensity score matching, differences in differences, instrumental variables, and regression discontinuity. Includes exercises using the econometric software program STATA. Prerequisite: ACE 500 or ECON 500 or equivalent.

ACE 532 Network Econometrics & Supply Chain Analysis credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/532/)
Provides the theory, techniques and hands-on experience necessary to understand, model and measure networks and supply-chains. The course is split into two parts. The first one deals with the econometric techniques needed for the inclusion of networks in cross-sectional and panel datasets. The second part of the course will focus on input-output techniques used to measure supply-chain linkages, economic impacts and environmental footprints. An important aspect of the course is to gain hands-on experience in applying the appropriate techniques and using state-of-the-art software (GeoDa and R). Prerequisite: ACE 562, ACE 564, ECON 535, or the equivalent; or consent of the instructor. Restricted to graduate students.

ACE 535 Data Science for Applied Economics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/535/)
Students in this course will learn data science skills for questions in applied economics. Using the python programming language and git version control, we will cover obtaining data via scraping and APIs, processing and cleaning data using python, and analyzing data via data visualization and basic machine learning techniques. We will broadly cover the basics of text, spatial, and numeric data with an emphasis on their uses in analyzing economic questions and conducting research.

ACE 542 Advanced Agricultural Finance credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/542/)
Theory of financial decision making as applied to farms and firms related to agriculture. Topics include asset pricing models, financial markets, capital structure, farmland control, term structure of interest rates, risk management and credit evaluation. Prerequisite: ECON 500, calculus, and mathematical statistics, or equivalent; at least one course in finance strongly recommended; or consent of instructor.

ACE 544 Global Agriculture and Supply Chains credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/544/)
Provides essential knowledge of the production and distribution of agricultural commodities and food products. Topics will cover the full range of the agriculture supply chain, from pre-farm to the consumer, to provide students with a better understanding and appreciation for where and how crops and livestock are produced, and the systems used to distribute products to consumer. This course is exclusively offered online. It has been designed for and is restricted to students pursuing a graduate certificate and specific degree programs. Prerequisite: Restricted to current graduate students in the iMBA, iMSM, iMSA, JP.iMBA/iMSA, and MAAE degree programs, and the Agribusiness and Sustainable Food Production Economics graduate certificate. Non-degree graduate students are also eligible to enroll in the course.

ACE 545 Risk and Decision-Making in Agriculture credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/545/)
The food and agriculture sector faces a unique set of risks due to the nature of production and heavy reliance on uncontrollable factors such as weather. This course discusses the risks faced by farmers and food and agribusiness firms, the tools available to manage these risks, and the resulting approaches to managerial decision-making. This course is exclusively offered online. It has been designed for and is restricted to students pursuing a graduate certificate and specific degree programs. Prerequisite: Restricted to current graduate students in the iMBA, iMSM, iMSA, JP.iMBA/iMSA, and MAAE degree programs, and the Agribusiness and Sustainable Food Production Economics graduate certificate. Non-degree graduate students are also eligible to enroll in the course.

ACE 546 Agriculture as an Asset Class credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/546/)
Modern agriculture relies heavily on capital, assets, and financing. Students will examine scale and structure of the US agricultural sector, capital structure and financing of the asset class, rise of investment activities, and ag-specific institutions which serve the industry. Topics include financial performance, asset exposure mechanisms, and emerging investment opportunities. This course is exclusively offered online. It has been designed for and is restricted to students pursuing a graduate certificate and specific degree programs. Prerequisite: Restricted to current graduate students in the iMBA, iMSM, iMSA, JP.iMBA/iMSA, and MAAE degree programs, and the Agribusiness and Sustainable Food Production Economics graduate certificate. Non-degree graduate students are also eligible to enroll in the course.

ACE 547 Modern Issues in Food & Agriculture credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/547/)
With a projected global population of 9.7 billion by 2050, students in this course will discuss current food, agriculture, and sustainability challenges through a point/counterpoint framework to voice opinions and ask questions. Students will gain comprehensive knowledge of contemporary, ever-changing issues across the agriculture sector, from production to consumption. This course is exclusively offered online. It has been designed for and is restricted to students pursuing a graduate certificate and specific degree programs. Prerequisite: Restricted to current graduate students in the iMBA, iMSM, iMSA, JP.iMBA/iMSA, and MAAE degree programs, and the Agribusiness and Sustainable Food Production Economics graduate certificate. Non-degree graduate students are also eligible to enroll in the course.

ACE 557 Food, Poverty and Development credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/557/)
Economic theory and empirical analyses are used to study economic development, emphasizing the structural transformation of an economy, poverty alleviation among households, improvement in food security and public policies to support those processes. Topics include poverty measurement, poverty dynamics, growth theory, and impact evaluation. Special attention is paid to the role of the agricultural sector and rural development. Prerequisite: ACE 500 or ACE 501 or ECON 500 and basic econometrics.

ACE 559 Food, Trade and Development credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/559/)
Economic theory and empirical analyses are used to study international trade, emphasizing food trade, agricultural policy and international development. Topics include theoretical models of international trade, regional agreements, and food trade. Special attention is given to the impact of trade in developing countries with large agricultural sectors and to issues relating to trade in food products. Prerequisites: ACE 500 or ACE 501 or ECON 500 and basic econometrics.

ACE 561 Adv Res and Scholarly Comm credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/561/)
Seminar intended for Ph.D. students who have completed written preliminary examinations. Develops a comprehensive understanding of the research process. Discussions include identification of research topics, structure of research proposals, review of literature, effective communication, management of research activities, and contributions to scholarly debate. Prerequisite: Consent of instructor.

ACE 562 Applied Regression Models I credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/562/)
Application of simple regression methods to problems in agricultural and consumer economics with emphasis on foundational probability, random variable, and distribution concepts, development of the simple, two-variable regression model; estimation of model parameters; hypothesis testing; and prediction. Prerequisite: ACE 262 or equivalent; one of MATH 220, MATH 221, MATH 234.

ACE 563 Math Program App Econ I credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/563/)
Application of mathematical programming methods to discrete models in agricultural economics; Kuhn-Tucker theorem, Lagrange multipliers, duality, simplex method as applied to linear and quadratic programming, and input-output analysis models in agriculture. Prerequisite: MATH 124; one of MATH 220, MATH 221, MATH 234.

ACE 564 Applied Regression Models II credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/564/)
Application of multiple regression methods to problems in agricultural and consumer economics with emphasis on extensions to the simple, two-variable regression model, development of the multiple regression model; and problems created by violations of basic model assumptions. Prerequisite: ACE 562 or equivalent.

ACE 569 Career Development for PhDs credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ACE/569/)
This course is intended to help doctoral candidates transition into careers in or out of academia. The class covers job market processes and strategies, presentation skills, teaching philosophies, and development of research trajectories. Approved for S/U grading only. Prerequisite: ACE 561.

ACE 571 Household Economics credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACE/571/)
Discussion of current topics and review of the literature in household economics. Relevant topics include marriage, divorce, intergenerational transfers, investment in children, migration. Prerequisite: ECON 500 or equivalent.

ACE 580 Taxation and Regulation of Alternative Investments credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/580/)
Students will gain a thorough understanding of alternative investments, encompassing regulations, taxation, specific investments, compliance, and reporting obligations. Students will explore these investments in financial markets and gain insights into related regulations. Other course topics include taxation, planning, compliance, reporting, due diligence, anti-money laundering rules, and investor protection in alternative investments. This course is exclusively offered online. It has been designed for and is restricted to students pursuing a graduate certificate and specific degree programs. Prerequisite: Restricted to Agricultural & Applied Economics, MAAE, and the Land, Agriculture, and Alternative Investing graduate certificate programs. Non-degree graduate students are also eligible to enroll in the course.

ACE 581 Financial Lifecycles and Alternative Investments credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/581/)
Students will examine financial planning throughout the consumer lifecycle with a focus on alternative investments. Topics include wealth management, retirement plans, wealth accumulation phases, and generational wealth transfer. Through hands-on activities and engaging discussions, learners will gain knowledge of asset allocation, tax considerations, and wealth management strategies for incorporating alternative investments. This course is exclusively offered online. It has been designed for and is restricted to students pursuing a graduate certificate and specific degree programs. Prerequisite: Restricted to Agricultural & Applied Economics, MAAE, and the Land, Agriculture, and Alternative Investing graduate certificate programs. Non-degree graduate students are also eligible to enroll in the course.

ACE 582 Theory and Portfolio Dynamics of Alternative Investments credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ACE/582/)
Finance professionals and investors will examine alternative investment strategies, discuss modern portfolio theory's history and impact, and explore analysis concepts and asset classes. Students will construct portfolios using optimization techniques, discuss tax-efficient strategies, and evaluate alternative investments in institutional and consumer portfolios to develop due diligence frameworks for informed investment decisions. This course is exclusively offered online. It has been designed for and is restricted to students pursuing a graduate certificate and specific degree programs. Prerequisite: Restricted to Agricultural & Applied Economics, MAAE, and the Land, Agriculture, and Alternative Investing graduate certificate programs. Non-degree graduate students are also eligible to enroll in the course.

ACE 591 Independent Study credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/ACE/591/)
Individual research work under the supervision of an appropriate member of the faculty. Approved for both letter and S/U grading. May be repeated to a maximum of 8 hours if topics vary.

ACE 592 Special Topics credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/ACE/592/)
Group instruction on a special topic under the direction of one or more members of the faculty. Approved for both letter and S/U grading. May be repeated in a semester to a maximum of 8 hours. May be repeated to a maximum of 24 total hours, if topics vary.

ACE 594 Seminars and Workshops credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/ACE/594/)
Participation in a seminar or workshop with other graduate students and faculty members. Approved for both letter and S/U grading. May be repeated.

ACE 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/ACE/599/)
Individual research under supervision of members of the graduate teaching faculty in their respective fields. Approved for S/U grading only. May be repeated in the same term or separate terms.

ACES - Agr, Consumer, & Env Sciences

ACES Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ACES/)

Courses

ACES 101 Contemporary Issues in ACES credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACES/101/)
Study of contemporary issues in the human, food and natural resource systems, and an overview of the role of the College of Agricultural, Consumer and Environmental Sciences and the University of Illinois in these systems. Required of and limited to new freshmen enrolled in the College of ACES.

ACES 102 Intro Sustainable Food Systems credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACES/102/)
An objective approach towards critical systems thinking and towards collaborative analysis across multiple disciplines for the development, production, preparation, consumption, and utilization of food, feed, fiber and energy, while managing the disposal and reuse of byproducts, within complex socioeconomic, ecological and environmental systems. Students will be introduced to the fundamentals of modern crop, livestock, and other agricultural production systems, and consider the future challenges and opportunities in producing enough for a growing world population.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Life Sciences

ACES 123 ACES Orientation to Illinois credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ACES/123/)
Introduces students to the departments and College of ACES. Through class discussions and assignments, students will explore the academic environment at Illinois, develop skills that will aid in learning, and build community inside and outside the classroom. Prerequisite: Restricted to first year College of ACES students.

ACES 179 History of Ag in IL Since 1860 credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ACES/179/)
An introduction to the history of agriculture in the rural Midwest with an emphasis on Illinois based on an analysis of the attitudes of indigenous peoples, immigrants, farmers and agribusiness interests toward land, labor, crop selection and production, and technology. The course compares the regional characteristics of the rural Midwest to other U.S. regions, and explores factors that created the American "breadbasket," a region recognized for the commodities, equipment and ideas that it exports to the world.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

ACES 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ACES/199/)
Experimental course on a special topic in the College of Agricultural, Consumer and Environmental Sciences. Approved for Letter and S/U grading. May be repeated as topics vary.

ACES 200 ACES Transfer Orientation credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/ACES/200/)
Introduction to College of ACES and campus resources for students new to the College of ACES. Required of all off campus transfer students and optional for Inter College Transfer students. First eight weeks course. Approved for S/U grading only.

ACES 293 International Internship credit: 0 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ACES/293/)
Supervised learning experience designed for ACES students registering for an academic term abroad and/or for non-degree exchange students enrolling for an academic term at Illinois. The nature of the experience and the setting in which it takes place must be approved in advance by ACES faculty and by representative(s) of institutions/organizations/agencies that cooperate with the College of ACES in student exchange/study abroad programs. Approved for Letter and S/U grading. May be repeated to a maximum of 10 hours. (Summer Session). Prerequisite: Written consent of ACES Study Abroad Office.

ACES 295 Undergrad Research or Thesis credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACES/295/)
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated. Independent Study courses are limited to 12 hours total applying to a degree in ACES. Students may register in more than one section per term. Prerequisite: GPA of 3.0 or above at the time the activity is arranged, and consent of instructor.

ACES 298 International Experience credit: 1 to 9 Hours. (https://courses.illinois.edu/schedule/terms/ACES/298/)
International experience in agricultural, consumer and environmental sciences related areas involving foreign travel and study without enrollment in another institution. Experience must be planned and approved in advance through consultation with a College of Agricultural, Consumer and Environmental Sciences faculty member. Not open to students on academic warning. Approved for both Letter and S/U grading. May be repeated to a maximum of 9 hours in separate semesters. Prerequisite: Written consent of ACES Study Abroad Office.

ACES 299 ACES Study Abroad credit: 0 to 18 Hours. (https://courses.illinois.edu/schedule/terms/ACES/299/)
Provides campus credit in the College of Agricultural, Consumer and Environmental Sciences for study at accredited foreign institutions. Final determination of credit granted is made upon the student's successful completion of work. Approved for Letter and S/U grading. May be repeated to a maximum of 36 hours within one calendar year. 0 to 8 undergraduate hours in Summer session. Prerequisite: Consent of major department, college, and Study Abroad Office.

ACES 360 Program Needs Assessment credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ACES/360/)
Students in this course will apply needs assessment theory to identify and determine how to fill in the gaps between an organization's current and desired state. The learners in teams will outline, improve, or prioritize resources to meet the organization's goals toward a solution to a real problem.

ACES 396 Honors Study Abroad Retrospect credit: 1 or 2 Hours. (https://courses.illinois.edu/schedule/terms/ACES/396/)
Provides James Scholars with an opportunity to earn honors credit based on a full-term international experience in a university approved study abroad program completed during the academic term preceding enrollment in this course. Students complete an honors assignment related to the experience, approved by the instructor in a Memorandum of Understanding. Students need to earn a grade of at least B- on the honors assignment in order to earn honors credit. No more than 12 hours of special problems, research, thesis and/or individual studies may be counted toward a degree. Credit in this course may serve as only one of the honors course needed to meet James Scholar's Honors Requirements. Prerequisite: Consent of instructor. An approved MOU is required prior to enrollment. Current enrollment in the James Scholar Honors Program is required.

ACES 398 Experiential Learning credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ACES/398/)
Supervised experience in a field directly pertaining to a subject matter related to Sustainability in Food and Envrionmental Systems. Students are required to complete a Memorandum of Agreement prior to enrolling in this course. Approved for both Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours if topics vary.

ACES 399 Honors Seminar credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ACES/399/)
Designed to promote exposure to, and subsequent critical reflection about a variety of topics relevant to ACES James Scholars. Feature presentations by faculty members on topics of current interest in the agricultural, consumer and environmental sciences. Students engage in the topics by responding to faculty members' presentations through classroom activities, lab tours, stimulating debates, and lively discussions. The writing of a seminar paper rounds out the course. Prerequisite: James Scholars enrolled in the College of ACES with preference given to those with junior or senior standing.

ACES 499 Interdisciplinary ACES Seminar credit: 0 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ACES/499/)
Platform for experimental courses on special interdisciplinary topics within the agricultural, consumer and environmental sciences. Designed to provide upper-level undergraduates and graduate students with access to subject offerings of new and developing areas of knowledge across the ACES curricula. 0 to 4 undergraduate hours. 0 to 4 graduate hours. Approved for Letter and S/U grading. May be repeated to a maximum of 8 hours in the same term and 12 hours in separate terms if topics vary. Independent Study courses are limited to 12 hours total applying to a degree in ACES.

ADV - Advertising

ADV Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ADV/)

Courses

ADV 120 Consumer Data and Society credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/120/)
Data are everywhere! In our phones, our homes, our cars, the media, the shops, and more. But what do we know or think about that data and how data are being used in our everyday lives? This introductory course explores the intersection of consumer data and society, equipping students with the tools and knowledge necessary to navigate, analyze, and interpret data in everyday life. This is not a math course, but you will gain numeracy and understanding of data and statistics as you consider concepts, questions, and ways of thinking about data through the lens of advertising, media, politics, consumer behavior, and life. Through a combination of theoretical insights and practical applications, students will develop a critical understanding of how data shapes our world and how to use data responsibly and effectively to solve consumer and business problems.

ADV 150 Introduction to Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/150/)
Introduction to the practice and profession of advertising. Course material covers various functional areas of advertising and integrated brand promotion, including account planning, creative, media, research, consumer behavior, sales promotion and interactive advertising. Topics also include how advertising relates to society in cultural, social, ethical and regulatory contexts. Open to all undergraduate majors.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ADV 175 Introduction to Multicultural Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/175/)
Examines the multifaceted role diversity (including racial, gender, orientation, ability status) plays in the delivery and reception of advertising. Additionally, it examines the development of diversity as a marketplace practice and on the development of the advertising industry. We'll analyze advertising using a historical, cultural, and social perspective and address issues of diversity in the industry. We will also critically review current issues of multicultural, transcultural and multidimensional advertising and marketing. In the process we'll grapple with current theories on race and implicit /explicit bias and prejudice and their impact upon the production of advertising and consumer communications.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

ADV 199 Undergraduate Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ADV/199/)
May be repeated to a maximum of 12 hours in separate semesters, if topics vary.

ADV 200 Data Literacy credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/200/)
No matter what your major, or the job you plan to get, becoming fluent at working with data is a sought-after skill. Through lectures and guided workshops, this course provides hands-on- training on fundamentals of data exploration (asking the right questions), data gathering and data analysis (understanding and describing the situation) as well as communicating with data (telling a compelling story through data visualizations). Students learn how to find datasets in online archives and repositories, and are introduced to the commonly used software packages and techniques (spreadsheets, text analytics, social computing). We also focus on critical issues such as data ethics and privacy. We also learn basic computer programming aimed at data analysis. No prior knowledge of research methods, statistics or programming is required.
This course satisfies the General Education Criteria for:
Quantitative Reasoning I

ADV 201 Social Media and Personal Branding credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/201/)
Creating a personal brand is no longer a nice-to-have; it's expected and vital to social media influencers, student athletes and online celebrities. This course focuses on practical strategies for building and maintaining a strong personal brand on social media for career advancement and social influence. Students will develop advanced social media strategy skills and identify risks involved in online reputation management. This course will help you create an authentic personal brand and amplify your career.

ADV 212 Advertising History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/212/)
In this course, you will develop a rich knowledge base of advertising and the advertising industry as it has evolved in the United States over the last two centuries. Included will be an analysis of the key events, forces, people and technology. Credit is not given for ADV 212 if credit has been earned in ADV 312.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

ADV 214 Sports Advertising & Branding credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/214/)
Explores sports advertising and branding. Students will learn about relationships between advertising, media, integrated communications, sports, athletes, events, experiences, and brand partners across amateur, collegiate, and professional sports. Students develop insights and skills related to research, segmenting audiences, consumer behavior, brand strategy, creative messaging, and media in the sports industry. Topics such as e-sports, gaming, Name-Image- Likeness, personal branding, and endorsements are discussed. Students explore historical, ethical and cultural considerations in sports advertising.

ADV 222 Copywriting credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/222/)
For students considering a career in persuasive writing or just striving to become better creative thinkers and communicators, this course explores advertising copywriting concepts, processes and best practices. We'll craft headlines, body copy and scripts for a variety of media, all in the context of audience, strategy, design and the Big Idea. Writing-intensive and portfolio-building, with consideration for cultural trends and artificial intelligence. Credit is not given for this course and ADV 400: Copywriting. This course will use the Packback plug-in app on Canvas, which comes with a small usage fee (up to $25). Prerequisite: ADV 150. Restricted to Advertising majors or instructor approval.

ADV 250 Advertising and Brand Strategy credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/250/)
Designed to help students acquire brand decision-making skills. Advertising and marketing theories, practical problems and traditional cases will be studied as they learn to build a strong brand strategy that will lead to a strong brand advertising strategy. This encompasses every facet of making advertising decisions for a brand. This involves understanding the content a consumer requires, how the consumer will come in contact with the brand, and what is the goal of the connection between consumer and content/contact. Credit is not given toward graduation for ADV 250 and ADV 283.

ADV 270 Principles of Sales credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/270/)
This course focuses on the development of the sales process and the role of sales and sales people within organizations. It will also consider consultative and persuasive selling and interpersonal relationship building. It will include sales proposals, and simulation exercises that will reinforce concepts learned within the classroom. It will also feature exposure to sales experts from different areas of business.

ADV 280 Introduction to Advertising Media credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/280/)
Students will be introduced to advertising in media, including an understanding of the contemporary media landscape and the ways in audiences use media. We will primarily discuss media concepts and media tools that are commonly used by advertising professionals to collect and interpret media insights for advertising.

ADV 281 Advertising Research Methods credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/281/)
Introduces students to the wide spectrum of qualitative and quantitative research techniques that are commonly used in the advertising industry. In addition to examining the principles, methods and techniques of advertising research, the course will address issues such as when research should and should not be conducted, analyzing data sets, forming meaningful research questions, figuring out how to answer the questions, and presenting the answers to these questions in a clear and compelling manner. Prerequisite: STAT 100 or equivalent or ADV 200.

ADV 284 Consumer Insight credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/284/)
Course focuses on methods of eliciting consumer insight. In particular, this class introduces the process and applied outcomes of consumer insight in terms of building brand strategy. Techniques for persuasive presentation of insight will also be introduced.

ADV 290 Special Topics in Advertising credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/290/)
Designed to offer freshmen and sophomores opportunity to take courses in advertising's most recent developments. May be repeated to a maximum of 12 hours in separate terms, if topics vary.

ADV 301 Becoming an Influencer credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/301/)
Explores the everyday impact the influencer economy has on our purchasing decisions, political engagement, and social activism. This new celebrity class illustrates the critical importance that public relations, advertising, marketing, and communications management has on influencer marketing and influencer relations. The course will identify the evolving strategies, tactics, and techniques that drive the influencer ecosystem, evaluate the social and cultural impact of influencer marketing and engagement on organizations and audiences, and assess the racial and gender dynamics that are created and recreated within this quickly evolving marketing and creative arena. Finally, students will focus on the development of influencer generated branded content across for-profit, nonprofit, and human rights organizations. Eligible for the PR Minor: https://media.illinois.edu/pr_minor. Credit is not given towards graduation for both ADV 301 and ADV 290.

ADV 305 Advertising Technology and the Digital World credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/305/)
Digital communication and information technologies have profoundly changed nearly every aspect of our day-to-day lives. Advertising stands as the central funding model for many of these technologies, including search engines, social networks, news media, and a host of other platforms and services. This course systematically examines the role of these technologies in shaping our lives—and the role of the advertising industry in shaping these technologies. It is designed to prepare students to live and work in our increasingly digital world, and to understand the impact of digital communication and information technologies in their lives.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ADV 310 Intro to Public Relations credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/310/)
Introduces the student to the practice and profession of public relations. Course material covers topics such as the history of public relations, the role of law and ethics in public relations, and theories that guide public relations research and practice. The course will also introduce roles played by public relations practitioners within organizations, such as media relations, consumer relations, employee relations, community relations, and investor relations.

ADV 311 Classic Campaigns credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/311/)
Analyzes the most recognized and successful direct mail, print, radio, television and digital advertising campaigns of the 20th and early 21st centuries. Includes particular attention to their strategy and development as well as their social, cultural, and economic impact.

ADV 314 Sports Public Relations credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/314/)
Sports public relations is designed to show the management function of developing and sustaining two-way lines of communication, understanding, acceptance, and cooperation between a sports organization and all the other stakeholders, including team, athlete, league, organization, company and brand and its respective publics. Prerequisite: Restricted to students with Sophomore, Junior, or Senior class standing. Eligible for PR minor.

ADV 320 Sales Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/320/)
This course addresses conceptual and methodological issues related to the management of sales within organizations. Responsibilities, function and skills necessary to be an effective sales manager are covered, including an evaluation of sales organization structures, recruiting, selecting, testing, and training of salespeople. Related topics include compensation plans, controlling expenses, sales forecasting/projections, routing, quotas, ethics and motivation. It will consist of lectures, role playing exercises, and also may include guest lectures from industry leaders/alumni with experience in sales management.

ADV 333 Agency Experience credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/333/)
This is the class that runs like an agency: a fast-paced, hands-on environment where students plan, develop and execute innovative advertising campaigns and materials for real clients. Students take on specialized roles related to research, strategy, creative, media and account direction, and will apply creative problem solving, design thinking, data literacy and professionalism to address client goals and develop impactful work. Clients include the Department of Advertising, as well as other educational and nonprofit organizations. Credit is not given toward graduation for ADV 333 and ADV 400 or ADV 490 Sandage Studios. Prerequisite: ADV 250, ADV 284, or instructor approval. Restricted to Advertising or CS + Advertising majors.

ADV 350 Writing for Public Relations credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/350/)
Focuses on the strategy of crafting and delivering PR messages to various audiences with special emphasis on pre-writing, preparation, revision and presentation. Prerequisite: ADV 310.

ADV 360 Innovations in Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/360/)
Intended to improve creative and critical thinking skill in advertising planning by understanding the core technology and perspective of digital and other innovative media in the context of integrated communication. This will allow students to understand how consumers perceive and process digital advertising messages; to research critical questions in digital consumer behavior; to learn how to utilize digital and non-digital media in the context of integrated communication; to apply knowledge of digital communication technology to the real-world advertising cases. Credit is not given toward graduation for ADV 360 and ADV 460. Prerequisite: ADV 250 or ADV 283; ADV 284. Restricted to Advertising or Agricultural Communications or Computer Science & Advertising or Ag Communications-Advertising major(s) or minor(s). Restricted to students with Sophomore, Junior, or Senior.

ADV 370 Sales and the Consumer credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/370/)
This course focuses on different topics related to consumer behavior management, and the consumer's relationships to the sales process. It will include case studies and exercises that will facilitate application of effective sales techniques.

ADV 376 Global Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/376/)
Explores culture, brands, and advertising. Through advertising analysis, case studies and an applied culture and advertising project, students will develop strategies for advertising and communicating messages to local and global audiences. Prerequisite: Restricted to students with Sophomore, Junior, or Senior status.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

ADV 378 Psychology of Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/378/)
Designed to familiarize students with theory and research at the intersection of advertising and psychology. Explores issues pertaining to advertising psychology, including: understanding how and why people think, how & why advertising persuades, basic research methods, the emergence of trends, attitudes and persuasion, human and brand personality, cross-cultural advertising, implicit consumer cognition and behavior, emotions, and more. Prerequisite: ADV 281 or equivalent. Restricted to students with Sophomore, Junior, or Senior standing.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ADV 390 Content Creation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/390/)
Explores theories of creativity; situates creativity and creative practices within the social structure of organizations that develop creative content; examines the relationship between creative strategy, creative concepts and creative executions; exposes students to the practice of creating content for traditional and non-traditional media vehicles.

ADV 391 Creative Advertising for Non-Majors credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/391/)
Explore the creative side of advertising – writing and art, ideation through execution, for traditional and non-traditional media. This course also provides non-majors with some fundamentals of the field such as research, brand strategy, consumer insights, and media. Prerequisite: Not intended for Advertising or CS+Advertising majors.

ADV 392 Advertising Immersion and Experiential Learning credit: 1 to 6 Hours. (https://courses.illinois.edu/schedule/terms/ADV/392/)
Covers a variety of topics designed to help students learn more about, and be better prepared to enter, the advertising industry as professionals. Course content will include an overview of careers in the advertising industry while paying particular attention to areas of future career growth. This course is centered on experiential learning where students will participate in interactive discussions and create advertising strategies with industry professionals at media related agencies and other industry businesses. Credit hour(s) are determined by the instructor and approved by the department head. Additional fees may apply. See Class Schedule. Approved for both Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours, if topics vary.

ADV 393 Advertising and Society credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/393/)
Provides a critical understanding of advertising's role in modern society. Advertising will be studied as a cultural force and social institution. Its role will be examined in relation to communications, economics, and political and legal systems. Credit is not given for ADV 393 if credit for ADV 493 has been earned. Prerequisite: Restricted to students with Sophomore, Junior, or Senior class standing.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ADV 396 Research Experience in Advertising credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/396/)
Supervised participation in research and scholarly activities, usually as an assistant to an investigator. Approved for Letter and S/U grading. May be repeated to a maximum of 9 hours. Prerequisite: ADV 150, ADV 281, or written consent of instructor.

ADV 399 Advertising Study Abroad credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ADV/399/)
Provides credit toward undergraduate degree for undertaking study and/or a research project through faculty led programs or from an accredited foreign institution or approved overseas program. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 18 hours. Final determination of appropriate credit will be made upon completion of the work done abroad and/or on campus. Prerequisite: One academic year (or one semester in the case of transfer students) in residence at UIUC, good academic standing, completion of at least thirty semester hours toward the bachelor's degree, and prior approval of the Department of Advertising. Some programs have additional requirements.

ADV 400 Special Problems credit: 0 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/400/)
Special projects, research, and independent reading in advertising for students capable of individual work under the guidance of a faculty adviser. 0 to 3 undergraduate hours. No graduate credit. May be repeated in the same or in multiple semesters, if topics vary. Prerequisite: Written research proposal and consent of department.

ADV 409 Media Entrepreneurship credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/409/)
Introduces students to the foundations of entrepreneurship and evolving business models for media. Students are introduced to the foundation and context of entrepreneurship. The course will cover the skills and practices necessary for new entrepreneurial ventures, as well as the processes of evaluating an idea, assessing the market, and implementing a new venture. Finally, students will examine business case studies for both successful and unsuccessful media start-ups. 3 undergraduate hours. No graduate credit. Prerequisite: Junior or senior standing in the College of Media.

ADV 410 Public Relations Strategies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/410/)
Examines the intersection of public relations strategies and communication tactics used by organizations to meet reputation and relationship management objectives with relevant publics and stakeholder groups, such as journalists, consumers, employees, investors, government officials and agencies and community members. 3 undergraduate hours. No graduate credit. Prerequisite: ADV 310.

ADV 452 Creative Concepts I credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ADV/452/)
Planning and execution of advertising across media, with emphasis on the creation of campaigns 3 undergraduate hours. 4 graduate hours. Prerequisite: ADV 390 and consent of instructor (required).

ADV 454 Creative Concepts II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/454/)
This portfolio-oriented course builds upon the core competencies acquired in ADV 452 and applies them to solving real-world advertising problems with integrated creative consumer communications efforts than span traditional and new media. 3 undergraduate hours. 3 graduate hours. Prerequisite: ADV 452.

ADV 461 Computational Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/461/)
Explores the emerging landscape of computational advertising and provides students with a thorough understanding of digital advertising mechanisms, including topics like programmatic advertising, auctions, (behavioral) targeting, and attribution. Students also discuss the role of the digital traces left by consumers and how they can be used to generate insights to improve communication efforts. An emphasis is placed on privacy and ethical issues. Legal issues entrenched in digital advertising are also discussed. 3 undergraduate hours. No graduate credit. Prerequisite: ADV 284. Restricted to Juniors or Seniors.

ADV 462 Computational Advertising Infrastructure credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ADV/462/)
Same as CS 469. See CS 469.

ADV 475 Multicultural Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/475/)
Examines the role of multicultural issues upon advertising both as a practice and as an industry. Incorporates historical perspectives to understand the foundational role race, age, and sexual orientation has played in advertising and marketing and will address current issues of racial imagery in advertising, racial diversity in the industry, and a variety of topics related involving multicultural advertising and marketing. 3 undergraduate hours. 3 graduate hours.

ADV 480 Social Media Analytics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/480/)
Social media analytics is the art and science of extracting valuable hidden insights from vast amounts of semi-structured and unstructured social media data to enable informed and insightful decision making. ADV 480 is an advanced course designed to provide the students with (1) well-grounded understanding of social media analytics, (2) techniques of extracting and analyzing Twitter analytics, and (3) skills of interpreting and aligning insights gained with organizational goals and objectives. 3 undergraduate hours. 3 graduate hours. Credit is not given towards graduation for ADV 480 if credit for ADV 490 SMA Social Media Analytics has been earned. Prerequisite: Restricted to students with Junior, Senior, or Graduate class standing.

ADV 482 Qualitative Research Methods in Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/482/)
Provides students with knowledge and experience conducting qualitative methods used in advertising and consumer research (e.g., focus groups, interviews, netnography). 3 undergraduate hours. No graduate credit.

ADV 483 Audience Analysis credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/483/)
Analyzes audiences and matches consumer insights with strategic ideas for brand communication, contact, and connection. 3 undergraduate hours. 3 graduate hours. Prerequisite: ADV 250 or ADV 283 and ADV 284. Restricted to students with Senior OR Graduate class standing.

ADV 484 Quantitative Research Methods credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/484/)
Advanced undergraduate course on quantitative research methods in advertising and consumer behavior. In-depth coverage of descriptive research, experimental research, descriptive and inferential statistics, and computer analysis and interpretation of actual data. 3 undergraduate hours. No graduate credit. Prerequisite: ADV 281.

ADV 489 Digital Portfolio credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ADV/489/)
Digital portfolios offer a way to brand yourself and share your work and experience. In this hands-on class, you will create your own digital portfolio, essentially "packaging" and showcasing your unique experiences and content you've created in classes, extracurricular activities, jobs or internships (e.g., press releases or news articles, creative projects from ad campaigns to short films, research projects, media plans, video reels, etc.). You will also be required to refine and/or create one additional piece of creative content to add to, enrich, and round out your portfolio.

ADV 490 Advanced Special Topics in Advertising credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/490/)
Covers current issues in various advertising areas not studied extensively in other courses. 1 to 3 undergraduate hours. 1 to 3 graduate hours. May be repeated in the same or separate terms to a maximum of 6 hours. Prerequisite: Announced separately for each topic. Restricted to students with Junior, Senior, or Graduate class standing.

ADV 491 Digital Content and Social Media Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/491/)
Application of analytical planning concepts to advertising planning, decision making, and managing social media accounts. Covers all of the decision making areas of advertising and social media management. 3 undergraduate hours. 3 graduate hours. Prerequisite: Restricted to students with Junior, Senior, or Graduate class standing.

ADV 492 Tech and Advertising Campaigns credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/492/)
With the maturation of the internet as an advertising and media channel, advertising, journalism, and communications students need to know more about technology and how that impacts their messages and designs. Likewise, computer scientists could benefit from knowledge of what the end user is looking for when designing web content, applications and other web-based media. Students in this course will gain design knowledge as well as a hands-on experience in completing a technology-driven advertising campaign. Students will participate in engineering, advertising and project management activities with individual as well as team responsibilities. Same as CS 468. 3 undergraduate hours. No graduate credit. Credit is not given for ADV 492 and ADV 498. Prerequisite: CS 225 or consent of instructors. Junior or senior standing in Advertising or Computer Science.

ADV 494 Persuasion Consumer Response credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/494/)
Addresses what makes a mass-mediated message persuasive by reviewing theories of mass communication and persuasion, consumer information-processing, and advertising effectiveness measures. 3 undergraduate hours. No graduate credit. Prerequisite: ADV 281.

ADV 495 Internship Seminar credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ADV/495/)
Seminar based on internship experience. Offered for College of Media students who complete an approved professional, industry related internship. 1 undergraduate hour. 1 graduate hour. Approved for S/U grading only. May be repeated in the same term to a maximum of 2 undergraduate hours or 2 graduate hours. May be repeated in subsequent terms to a maximum of 3 undergraduate hours or 3 graduate hours. Prerequisite: Consent of instructor.

ADV 496 UG Research Project credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/496/)
Supervised investigation of student-driven research on special topics related to advertising in individual or collaborative format. Topic and nature of research may vary. Capstone paper required. Type of course: Lecture-discussion 1 to 3 undergraduate hours. No graduate credit. May be repeated up to 3 hours in the same term or 6 hours in separate terms, if topics vary. Prerequisite: Evidence of adequate preparation for such study; consent of faculty member supervising the work; and approval of the department head. Restricted to majors only. Not available to freshman.

ADV 497 Colloquium in Advertising credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ADV/497/)
Current topics, cases, and research in advertising are presented in a forum that fosters critical thinking and engagement. Weekly presentation and discussion of current research and cases by faculty, undergraduate/graduate students, visiting scholars and visiting professionals. 1 undergraduate hour. No graduate credit. Approved for S/U grading only. May be repeated up to 2 hours in separate terms, if topics vary. Prerequisite: ADV 281 and consent of instructor.

ADV 498 The Sandage Project credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/498/)
This course is named after the founder of the Advertising Department, Charles H. Sandage (known as the "father of advertising education"). His vision of educating the future of the industry was grounded in theoretical and foundational courses emphasizing the "why of advertising" - not just the "how." In this course, students will integrate the concepts, experiences, and skills that have been learned in the curriculum with a service-learning project. 3 undergraduate hours. No graduate credit. Prerequisite: ADV 250 or ADV 283, ADV 360 or ADV 460, and ADV 390.

ADV 509 Media Entrepreneurship credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/509/)
Introduces students to the foundations of entrepreneurship and evolving business models for media. Students are introduced to the foundation and context of entrepreneurship. The course will cover the skills and practices necessary for new entrepreneurial ventures, as well as the processes of evaluation an idea, assessing the market, and implementing a new venture. Finally, students will examine business case studies for both successful and unsuccessful media start-ups. Credit is not given for both ADV 409 and ADV 509. Prerequisite: Limited to MS Advertising students.

ADV 550 Foundations of Advertising credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/550/)
Explores the development of American advertising through the 20th and into the early 21st century. Analyzes and evaluates American advertising through these primary areas: ethics, advertising philosophies, advertising structure, advertising education, its broader social impact, the role of media and technologies, and its place within a global framework. Prerequisite: Consent of department.

ADV 580 Advertising Theory credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/580/)
Reviews classic and contemporary theories used in advertising research and practice with multidisciplinary emphasis. Through reading, discussion and independent research, students will understand how basic social science and humanities research and advertising scholarship are related; how theories and concepts are applied, adapted, constrained and combined when applied to advertising and other communication issues; and how research evolves over time.

ADV 581 Quanti Research Methods in Adv credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/581/)
Provides students with an overview of quantitative research methodology in advertising and consumer behavior. Students will learn appropriate uses and techniques for conducting exploratory (e.g., focus groups, literature searches), descriptive (e.g., observational techniques, surveys), and casual (randomized- and quasi-experiments) research. Ethical considerations in research, and limitations of quantitative research will play an important role throughout the course. Students will learn basic descriptive and inferential statistical analyses to help analyze, and make sense of quantitative data. Prerequisite: Basic statistics course.

ADV 582 Qualitative Rsrch in Advert credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/582/)
Treatment of basic research concepts and procedures in the social sciences with emphasis on advertising. Prerequisite: Consent of the department.

ADV 587 Graduate Seminar I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/587/)
Provides advertising students and faculty the opportunity to interact on significant topics. It draws on a wide range of perspectives to explore not only foundational theories and research in advertising, but also current issues, contemporary analytical approaches, and emerging trends in advertising scholarship and practice. Prerequisite: Consent of department.

ADV 588 Graduate Seminar II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ADV/588/)
Students write research proposals in this course. Prerequisite: The grade of B or better in ADV 587.

ADV 590 Special Topics in Advertising credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ADV/590/)
May be repeated in the same or in multiple semesters if topics vary. Prerequisite: Consent of department.

ADV 594 Advanced Topics in Advertising credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ADV/594/)
This seminar explores topics associated with advertising theory and research. Topics will vary across different course offerings. They will include classic elements of advertising theory (e.g. persuasion, attitudes, cognition, emotion, motivation), as well as current research frontiers (e.g. decision-making, computational advertising, psychophysiology, gaming, social media). May be repeated up to 12 hours, if topics vary. Prerequisite: Ph.D. student or instructor approval.

ADV 597 Proseminar in Advertising credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ADV/597/)
Current topics, cases, and research in advertising are presented in a forum that fosters critical thinking and engagement. Weekly presentation and discussion of current research and cases by faculty, undergraduate/graduate students, visiting scholars and visiting professionals. Approved for S/U grading only. May be repeated up to 4 graduate hours in separate terms.

ADV 598 Professional Project credit: 0 to 6 Hours. (https://courses.illinois.edu/schedule/terms/ADV/598/)
This is a capstone course – where individuals will complete their final project for the MS Advertising degree. The project showcases the student's mastery of knowledge in the primary areas of advertising. Students can enroll in 0, 3, or 6 graduate credits – for a maximum of 6 credits during their degree program. Approved for S/U grading only. Course Description: May be repeated in separate terms to a maximum of 6 hours. Prerequisite: A grade of B or better in ADV 588.

ADV 599 Thesis Research credit: 0 to 6 Hours. (https://courses.illinois.edu/schedule/terms/ADV/599/)
Approved for S/U grading only. May be repeated in separate terms. Prerequisite: ADV 588 and consent of the department.

AE - Aerospace Engineering

AE Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AE/)

Courses

AE 100 Intro to Aerospace Engineering credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AE/100/)
Introduction to the Aerospace Engineering curriculum and career. Typical section topics include aircraft and rocket design and flight. Overviews of the topics are presented along with theory to be experimentally verified.

AE 140 Aerospace Computer-Aided Design credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AE/140/)
Computer-aided design (CAD) software modeling of engineered components. Sketching and three-dimensional solid modeling. Complex surface modeling. Production of assembly drawings and exploded views. Creation of dimensioned drawings using best practices for manufacturing. Sketching of parts in isometric views and multi-view drawings along with spatial visualization. Aerospace engineering-themed final project. Credit is not given for AE 140 and either SE 101 or ME 170. Prerequisite: Restricted to Aerospace Majors.

AE 199 Undergraduate Open Seminar credit: 0 to 5 Hours. (https://courses.illinois.edu/schedule/terms/AE/199/)
Undergraduate Open Seminar. Approved for Letter and S/U grading. May be repeated.

AE 202 Aerospace Flight Mechanics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/202/)
Fundamental principles of aerospace flight mechanics applied to spacecraft and aircraft. Orbital mechanics, rocket propulsion, and dynamics and control applied to spacecraft design. Aerodynamics, maneuvering, stability and flight performance applied to aircraft design. Prerequisite: Credit or concurrent registration in TAM 212.

AE 298 Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/298/)
Lectures and discussions relating to new areas of interest. See class schedule for topics and prerequisites. May be repeated if topics vary.

AE 302 Aerospace Flight Mechanics II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/302/)
Fundamentals of aircraft and spacecraft dynamics and orbital mechanics; aircraft performance in various flight attitudes; aircraft stability and control; spacecraft attitude dynamics and control; the two-body problem of orbital mechanics; orbit transfer. Prerequisite: AE 352.

AE 311 Incompressible Flow credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/311/)
Equations of motion for incompressible flow, both inviscid and viscous; potential flow theory, inviscid airfoil theory: two- and three-dimensional, Navier-Stokes equations, laminar boundary layer and transition to turbulence. Prerequisite: Credit or concurrent registration in AE 202 and MATH 241.

AE 312 Compressible Flow credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/312/)
Dynamics of compressible fluid; conservation of mass, momentum, and energy; one-dimensional and quasi-one-dimensional flow; oblique shock waves & Parandtl-Meyer expansion fans; unsteady wave motion; linearized theory. Application to nozzles, diffusers, airfoils, shock tubes and other geometries. Prerequisite: AE 202 and MATH 285. Credit or concurrent registration in ME 200.

AE 321 Mechs of Aerospace Structures credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/321/)
Fundamental concepts in the linear theory of elasticity, including stress, strain, equilibrium, compatibility, material constitution and properties. Failure mechanisms and criteria. Application to plane stress-strain problems, beams in extension and bending, and shafts in torsion. Prerequisite: MATH 285 and one of TAM 210 or TAM 211.

AE 323 Applied Aerospace Structures credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/323/)
Fundamental concepts of stress, strain, equilibrium, compatibility, material constitution and properties. Analysis of beams and shafts of monocoque and semi-monocoque construction. Energy methods. Prerequisite: AE 321, MATH 241, MATH 285, and one of TAM 210 or TAM 211.

AE 352 Aerospace Dynamical Systems credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/352/)
Particle kinematics and dynamics; Lagrange's equations; vibration of multiple degree-of-freedom systems; rotational kinematics and dynamics of rigid bodies. Credit is not given toward graduation for both AE 352 and TAM 412. Prerequisite: MATH 225, MATH 257, or MATH 415; MATH 285, MATH 284, MATH 286, or MATH 441; and TAM 212.

AE 353 Aerospace Control Systems credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/353/)
Modeling of linear dynamic systems; Laplace transform techniques; linear feedback control systems; stability criteria; design techniques. Credit is not given toward graduation for AE 353 and either SE 320 or ME 340. Prerequisite: MATH 225, MATH 257, or MATH 415; and MATH 285 and TAM 212.

AE 370 Aerospace Numerical Methods credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/370/)
Numerical methods used in aerospace engineering. Numerical integration, curve fitting, root finding, numerical solution of ODE, solution of linear systems of equations. Finite difference. Rayleigh-Ritz, and Finite element methods. Applications to simple structural mechanics and aerodynamics problems encountered in aerospace engineering. Prerequisite: Credit or concurrent registration in AE 311 or AE 312; credit or concurrent registration in AE 321 or AE 323.

AE 395 Honors Project credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/395/)
Special aerospace engineering project or reading course for James Scholars in engineering. Prerequisite: Consent of instructor.

AE 396 Honors Seminar credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/396/)
Special lecture sequences or discussion groups arranged each term to bring James Scholars in engineering into direct contact with the various aspects of engineering practices and philosophy. Prerequisite: Consent of instructor.

AE 397 Independent Study credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/397/)
Independent theoretical and experimental projects in aerospace engineering. May be repeated. Prerequisite: Consent of instructor.

AE 398 Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/398/)
Lectures and discussions relating to new areas of interest. See class schedule for topics and prerequisites. May be repeated if topics vary.

AE 402 Orbital Mechanics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/402/)
Analysis of orbits in an inverse-square gravitational field; elementary rocket dynamics, impulsive orbit transfer and rendezvous, and Lambert's Theorem with applications; patched-conic trajectories, planetary gravity-assist maneuvers, and linearized orbit theory with application to simplified analytical models; perturbations. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 202.

AE 403 Spacecraft Attitude Control credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/403/)
Theory and applications of spacecraft attitude dynamics and control; Euler angles, direction cosines, quaternions, and Gibbs-Rodrigues parameters; attitude sensors and control actuators; spin, three-axis active, reaction wheel, control moment gyro, and gravity gradient control systems; environmental effects. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 352 and AE 353.

AE 410 Computational Aerodynamics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/410/)
Computational technologies as solution tools for various aerodynamic problems; modeling and solution of one-and two-dimensional, incompressible and compressible, steady and unsteady inviscid external flow fields. Computational laboratory for practical experience. Same as CSE 461. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 311; credit or concurrent enrollment in AE 312.

AE 412 Viscous Flow & Heat Transfer credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/412/)
Momentum and thermal transport in wall boundary-layer and free shear flows, solutions to the Navier-Stokes equations for heat conducting laminar and turbulent shear flows; similarity concepts; thermal boundary layers in ducts and high-speed aerodynamic boundary layers. Same as ME 411. 4 undergraduate hours. 4 graduate hours. Prerequisite: AE 311, ME 310 or TAM 335.

AE 416 Applied Aerodynamics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/416/)
Two-dimensional and finite wing theory with emphasis on the mechanisms of lift and drag generation; Reynolds number and Mach number effects; drag analysis; high-lift wing systems; propeller and rotor aerodynamics; control surface design; application of V/STOL aerodynamics. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 311.

AE 419 Aircraft Flight Mechanics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/419/)
Steady and quasi-steady aircraft flight performance; take-off and landing, climbing and diving, cruise, level turn, and energy methods; longitudinal, directional, and lateral static stability and control; longitudinal and lateral motion and dynamic stability. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 202 and AE 353.

AE 420 Finite Element Analysis credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/420/)
Same as CSE 451 and ME 471. See ME 471.

AE 428 Mechanics of Composites credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/428/)
Same as MSE 456 and TAM 428. See MSE 456.

AE 433 Aerospace Propulsion credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/433/)
Fundamentals of rocket and airbreathing jet propulsion devices electric propulsion; prediction of thrust, combustion reactions, specific fuel consumption, and operating performance; ramjets; turbojets; turbofans; turboprops; aerothermodynamics of inlets, combustors, and nozzles; compressors, turbines; component matching, fundamentals of electrothermal, electromagnetic elastostatis thrusters, and solar sails. 3 undergraduate hours. 4 graduate hours. Prerequisite: AE 312 and PHYS 212.

AE 434 Rocket Propulsion credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/434/)
Basic principles of chemical rocket propulsion and performance, rocket component design, liquid rockets, solid rocket motors, combustion processes, combustion instability. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 312.

AE 435 Electric Space Propulsion credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/435/)
Elements of electric propulsion as applied to near-earth and deep-space missions; impact on spacecraft design; physics of ionized gases; plasmadynamics; electrothermal, electromagnetic, and electrostatic acceleration of gases to high velocity; high-impulse thruster design and performance; the resistojet, arcjet, ion engine, Hall thruster, MPD arc thruster, and plasma gun. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 312 or ME 410, PHYS 212, and ECE 205.

AE 442 Aerospace Systems Design I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/442/)
Principles of systems engineering as they apply to the design process for aerospace flight systems; general design methodology; application of these concepts to the initial sizing of both aircraft and spacecraft systems. Intensive technical writing. 3 undergraduate hours. No graduate credit. AE 442 and AE 443 taken in sequence fulfill the Advanced Composition Requirement. Prerequisite: Credit or concurrent registration in AE 311, AE 323, and AE 352.

AE 443 Aerospace Systems Design II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/443/)
Continuation of AE 442. Conceptual design project of either an aircraft or spacecraft flight system to satisfy a given set of requirements. Project team organization. Emphasis on sizing, trade studies and design optimization, subsystem integration, and technical communication skills. 3 undergraduate hours. No graduate credit. Prerequisite: AE 442.
This course satisfies the General Education Criteria for:
Advanced Composition

AE 445 Sustainable Aviation credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/445/)
Overview of key contributing factors to atmospheric and environmental impact of aviation; fundamentals of aircraft performance and energy utilization; energy carriers, powerplants, fuel feedstocks, and impacts of energy sourcing; aircraft lifecycle; impact of aircraft operations and technologies. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 202 or consent of the instructor. Credit or concurrent enrollment in AE 433.

AE 451 Aeroelasticity credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/451/)
In-depth examination of aerodynamic and dynamic structural phenomena associated with flexible airplanes and missiles; divergence of linear and nonlinear elastic lifting surfaces; effect of elastic and inelastic deformations on lift distributions and stability; elastic flutter of straight and swept wings; equations of disturbed motion of elastic and inelastic aircraft; dynamic response to forces, gusts, and continuous atmospheric turbulence; creep divergence of lifting surfaces; flutter in the presence of creep; effect of temperature on inelastic divergence and flutter. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 352 or TAM 412; TAM 251.

AE 452 Introduction to Nonlinear Dynamics and Vibrations credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/452/)
Same as TAM 416. See TAM 416.

AE 454 Systems Dynamics & Control credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/454/)
Examination of the common core of dynamics and control theory. Fundamental concepts of Lagrangian dynamics, state space representations, Hamiltonian and modern dynamics, stability theory, and control of dynamical systems. 3 undergraduate hours. 4 graduate hours. Prerequisite: AE 353.

AE 456 Global Nav Satellite Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/456/)
Same as ECE 456. See ECE 456.

AE 460 Aerodynamics & Propulsion Lab credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AE/460/)
Theory and application of experimental techniques in aerospace engineering with emphasis on fluid dynamic, aerodynamic, thermal, combustion, and propulsion phenomena. 2 undergraduate hours. No graduate credit. Prerequisite: AE 311; credit or concurrent registration in AE 433.

AE 461 Structures & Control Lab credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AE/461/)
Theory and application of experimental techniques in aerospace engineering with emphasis on structural mechanics, vibrations, dynamics, and control systems. 2 undergraduate hours. No graduate credit. Prerequisite: AE 321 and AE 352. Credit or concurrent registration in AE 323 and AE 353.

AE 462 Applied Computational Fluid Dynamics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/462/)
Introduction to the use of Computational Fluid Dynamics (CFD) to solve fluid dynamics problems relevant to aerospace engineering. Instruction on the end-to-end workflow, including geometry definition, grid generation, solver selection, solver execution, and solution analysis, with emphasis on ensuring solution accuracy through verification and validation. Students will be given access to CFD codes and will predict the aerodynamic behavior of several different flow configurations; both low-speed and high-speed applications will be examined. 3 undergraduate hours. 4 graduate hours. Prerequisite: AE 311, AE 312 and AE 370 or their equivalents and AE 410 or its equivalent is beneficial but not required.

AE 468 Optical Remote Sensing credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/468/)
Same as ECE 468. See ECE 468.

AE 480 Hypersonic Aerothermodynamics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/480/)
Fundamental aspects of hypersonic flows and aerothermodynamics of high-speed vehicles; the hypersonic aerothermal environment; inviscid hypersonic flows; hypersonic boundary layers; basics of high temperature gas dynamics and thermochemical nonequilibrium flows; re-entry aeromechanics 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 312.

AE 482 Introduction to Robotics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/482/)
Same as ECE 470 and ME 445. See ECE 470.

AE 483 Autonomous Systems Lab credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AE/483/)
Theory and application of experimental techniques in aerospace engineering with emphasis on autonomous systems. 2 undergraduate hours. No graduate credit. Prerequisite: AE 202, AE 352, AE 353, AE 370, and PHYS 212.

AE 484 UAV Performance, Design, and Fabrication credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AE/484/)
This course will cover topics necessary to design, fabricate, and evaluate the performance of unmanned aerial vehicles (UAVs). After a brief introduction to UAVs, an overview will be given of aerodynamics, stability/control, propulsion, aircraft performance, UAV hardware, manufacturing methods, and computational tools needed to fabricate unmanned aerial vehicles. An emphasis of the course will be on aircraft fabrication techniques (welding, composites, turning, milling, joining, additive manufacturing, etc.) culminating in the construction of the final design project. 3 undergraduate hours. No graduate credit. Prerequisite: AE 202 and AE 311. Restricted to AE majors only.

AE 485 Spacecraft Environment and Interactions credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/485/)
The course focuses on the theoretical and practical aspects of spacecraft aerodynamics and environment. It covers topics related to free molecular flows. Materials interactions and onboard sensor optical backgrounds caused by spacecraft neutral interactions, chemical reactions of materials with ambient atomic O, spacecraft glow, ion and chemical thrusters are studied. The plasma space environment, its connection to our sun, and the presence of the van Allen Belts and their affect on spacecraft charging for LEO and GEO conditions are discussed. Spacecraft shielding requirements due to plasma interactions and the space radiation environment are examined. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AE 311, AE 312, ME 200.

AE 497 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/497/)
Independent theoretical and experimental projects in aerospace engineering. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated. Prerequisite: Consent of instructor.

AE 498 Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/498/)
Subject offerings of new and developing areas of knowledge in aerospace engineering intended to augment the existing curriculum. See Class Schedule or department course information for topics and prerequisite. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate terms if topics vary to a maximum of 9 undergraduate hours or 12 graduate hours.

AE 502 Advanced Orbital Mechanics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/502/)
Circular-restricted three-body problem; surfaces of zero velocity, libration points, and halo orbits; perturbed two-body motion; Gauss and Lagrange planetary equations, Hamilton's principle, canonical equations and Delaunay variables; application to artificial Earth satellites; orbit determination. Prerequisite: AE 402.

AE 504 Optimal Aerospace Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/504/)
Formulation of parameter and functional optimization problems for dynamic systems; applications of optimization principles to the control and performance of aerospace vehicles, including optimal flight paths, trajectories, and feedback control. Prerequisite: AE 352.

AE 508 Optimal Space Trajectories credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/508/)
Optimal rocket trajectories in inverse-square and linearized gravitational fields; orbital transfer, intercept, and rendezvous; high-thrust (impulsive) and low-thrust (continuous) trajectories; primer vector theory and applications; cooperative rendezvous. Prerequisite: Credit or concurrent registration in AE 504.

AE 510 Advanced Gas Dynamics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/510/)
Same as ME 510. See ME 510.

AE 511 Transonic Aerodynamics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/511/)
Fundamentals of transonic flows; transonic characteristics and flow modeling, shock wave development, properties of shock wave, transonic similarity, shock-boundary layer interactions, three-dimensional effects, transonic solution techniques, transonic design, and transonic testing. Prerequisite: ME 410.

AE 512 Molecular Gas Dynamics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/512/)
The course focuses on the molecular description of physical and chemical processes in gases. The molecular viewpoint is essential to promote the understanding of physical processes occurring at very high temperatures and low pressures. These conditions are typically encountered in high speed and non-equilibrium gas flows. After a brief review of the fundamental concepts of statistical mechanics and chemical thermodynamics, the course focuses on the fundamentals of kinetic theory of gases, equilibrium chemistry, non-equilibrium kinetics and non-thermal radiation. Prerequisite: AE 311, AE 312, ME 200.

AE 514 Boundary Layer Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/514/)
Boundary layer concept at high Reynolds numbers; self-similar solutions of incompressible and compressible boundary layers; stability of parallel and nearly-parallel wall-bounded viscous flows; transition to turbulence; turbulent boundary layers; high-speed boundary layers; strong Reynolds analogy; Morkovin's hypothesis. Prerequisite: AE 412.

AE 515 Wing Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/515/)
Theoretical analysis of the aerodynamic characteristics of two- and three-dimensional wings and multiple-body systems in subsonic and supersonic flows. Prerequisite: AE 416.

AE 521 Fracture and Fatigue credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/521/)
Same as CEE 575. See CEE 575.

AE 522 Dynamic Response of Materials credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/522/)
One-dimensional stress waves; three-dimensional longitudinal and shear waves, reflection and refraction of plane waves; Rayleigh and Love waves; wave guides; spherical waves, inelastic wave propagation and shock waves; dynamic fracture and shear bandings of solids; wave propagation in anisotropic media; experimental techniques; acoustic emission, ultrasounds, split Hopkinson (Kolsky) bar, plate impact experiments, optical techniques in dynamic fracture, and high-speed photography. Prerequisite: TAM 451 or TAM 551.

AE 523 Nanoscale Contact Mechanics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/523/)
Short- and long-range dipole and electronic interactions; particle- and surface-force interactions; contact mechanics of rigid and nonrigid media; continuum adhesion models; principles of Atomic Force Microscopy (AFM); artifacts and remedies in AFM imaging; force and scale calibration; dynamics of AC-AFM imaging; force spectroscopy; instrumented nanoindentation. Prerequisite: TAM 451 or TAM 551.

AE 524 Nonlinear Solid Mech Design credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/524/)
Same as ME 570. See ME 570.

AE 525 Advanced Composite Materials credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/525/)
An extension of TAM 428. Advanced analysis of composite materials. Anisotropic elasticity; micromechanical theories; behavior of composite plates and beams under bending, buckling, and vibration; advanced elasticity solution techniques; hygrothermal behavior of polymer composites; strength prediction theories and failure mechanisms in composites; processing of metal, ceramic, and polymer composites; analysis of residual stresses. Prerequisite: TAM 428.

AE 526 Composites Manufacturing credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/526/)
Manufacturing methods for polymer-matrix composite materials; analysis of fiber processing techniques, interfacial treatments, and composites fabrication methods; analytical treatment of process modeling including heat transfer, cure kinetics, resin flow, and residual stresses. Term project. Prerequisite: TAM 428.

AE 527 Multi-Scale Modeling of Materials credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/527/)
This course introduces the theoretical foundation of multi-scale methods, and provides students with hands-on modeling and simulation experience. Students will be introduced to a variety of modeling techniques covering the full spectrum of length-scales from atomistics to continuum. The emphasis will be in the use of continuum-based concepts, such as the Principle of Virtual Work and conservation integrals, as bridging techniques to link atomistics and the continuum. The goal is to enable interpretation of material phenomena across different length-scales. Prerequisite: TAM 451, AE 420, and CSE 401, or equivalent.

AE 528 Nonlinear Continuous Media credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/528/)
Fundamental concepts of large deformations in nonlinear elasticity and inelasticity with applications: generalized tensors, finite deformations, stress-strain relations in terms of strain energy functions, inverse problems, solutions of tension, shear and bending problems, finite plane strain, theory of successive approximations, fiber-reinforced beams, plates and cylinders, thermodynamics of deformable media, stability considerations, and constituent relations for inelasticity. Prerequisite: AE 321 or TAM 451.

AE 529 Viscoelasticity Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/529/)
Fundamental concepts of viscoelasticity with applications: elastic-viscoelastic analogies, creep and relaxation functions, Poisson's ratio, thermomechanical reciprocity relations, variational principles, model fitting, shear center motion, thick-walled cylinders under pressure and inertia loads with material annihilation, sandwich plates, propagation of viscoelastic waves, vibration of bars, plates and shells, nonlinear elastic-viscoelastic analogy, properties of nonlinear viscoelastic stress-strain laws, creep rupture, and torsion of nonlinear bars and shells. Same as TAM 529. Prerequisite: AE 321 or TAM 451.

AE 538 Combustion Fundamentals credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/538/)
Same as ME 501. See ME 501.

AE 542 Aerospace Syst Engineering I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/542/)
Aerospace systems engineering principles, processes and practices for the definition of spacecraft, aircraft, launch and associated systems, and the application of the systems approach across the development life cycle. Prerequisite: Any of AE 442, AE 443, ME 470, ECE 445, ECE 411; CS 492, CS 493, or CEE 465.

AE 543 Aerospace Syst Engineering II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/543/)
Fundamental aerospace industry methods for control of an engineering development effort of a complex aerospace system typical in development of spacecraft, launch vehicles, aircraft, remotely controlled vehicles, and associated supporting infrastructure system in current acquisition environments. Standards and techniques to control risk, integration of technologies, and exploration of "design-to" process tailoring and systematically make design decisions. Prerequisite: AE 542.

AE 550 Nonlinear Aeroelasticity credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/550/)
Integrated fundamental treatment of the physical and mathematical aspects of nonlinear aeroelasticity. Fluid-solid interactions of unsteady aerodynamics and flexible structures and their components with applications to air-space-land vehicles, wind mills, solar sails, and gossamer structures. Physical and mathematical modeling; solution protocols to nonlinear problems; self-excited nonlinear oscillators; torsional divergence, loss of stability and control due to structural flexibility; chordwise and un-symmetric bending; viscous and structural damping, motion control; straight and swept-wind flutter; stall divergence and flutter; panel flutter; aerodynamic noise; chaotic motion; gust loads; limit cycles. Prerequisite: AE 451.

AE 551 Elastodynamics and Vibrations credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/551/)
Same as TAM 514. See TAM 514.

AE 554 Dynamical Systems Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/554/)
This course is structured to introduce the graduate students into advanced concepts of the geometric theory of nonlinear dynamics. Topics to be discussed include vector fields and maps, conjugacies, structural stability and Peixoto's theorem, dynamical systems on two-manifolds; center manifold theory and normal forms for vector fields and maps; local bifurcations of vector fields and maps, co-dimension 1 and 2 bifurcations; global bifurcations, the Smale horseshoe map and invariant Cantor sets, the shift map and symbolic dynamics, chaos in the horseshoe, Conley – Moser conditions for chaos, hyperbolic invariant sets, Moser's theorem and Smale-Birkhoff homoclinic theorem, homoclinic bifurcations and Newhouse sinks; homoclinic and subharmonic Melnikov theories, conditions for homoclinic chaos, chaos in perturbed Hamiltonian systems; applications to mechanics. This course will demonstrate how these advanced concepts can be applied to the study of response, stability and bifurcation behavior of engineering systems. Same as TAM 516. Prerequisite: TAM 416 and either ME 340, TAM 412 or AE 352.

AE 555 Multivariable Control Design credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/555/)
Frequency-response design specifications; algebraic and analytic constraints in scalar systems; uncertainty representation; Nyquist stability theory, small gain condition, and multi-input multi-output systems; singular value decomposition; robustness and u-function; linear quadratic regulator based design; recovery of LQ Design properties; Kalman filter; Riccati equations; H-infinity based design; reduction; balanced truncation; Hankel singular values; coprime factor reduction; loop shaping. Same as SE 521. Prerequisite: ECE 515.

AE 556 Robust Control credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/556/)
Signal and system spaces; stability, robustness, and the small gain theorem; factorization and parameterization of all stabilizing controllers; performance and achievable closed loop maps; model matching; design of optimal single-input single-output systems in H-infinity, H2, L1 senses; extensions to multi-output systems; structured and unstructured uncertainty; robust performance analysis and synthesis; multi-objective control. Prerequisite: ECE 515 and MATH 446.

AE 560 Fracture Mechanics Laboratory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/560/)
Experimental and physical aspects of fracture mechanics including elastic crack tip stress field, thermoelasticity, thermoplasticity, optical techniques, J-integral, toughening mechanisms, dynamic fracture, and fatigue. Laboratory experiments illustrate concepts. Prerequisite: TAM 451 or TAM 551.

AE 564 Advanced Aero Propulsion Lab credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/564/)
Theory and application of advanced diagnostic techniques used in aerodynamics and propulsion research with an emphasis placed on wind tunnel testing and advanced optical and laser-based techniques. Experience with aircraft performance measurement, wind tunnel testing, schlieren/shadowgraph photography, interferometry, spectroscopy, laser Doppler velocimetry, particle and molecular-based scattering, particle image velocimetry, pressure/temperature/shear sensitive paint, and other recently developed techniques provided through lectures and laboratory exercises.Prerequisites: AE 311, AE 312, AE 433, AE 460.

AE 590 Seminar credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/AE/590/)
Presentation by graduate students, staff, and guest lecturers of current topics in aerospace engineering. Approved for S/U grading only.

AE 597 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/597/)
Independent theoretical and experimental projects in aerospace engineering. May be repeated. Prerequisite: Consent of instructor.

AE 598 Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AE/598/)
Subject offerings of new and developing areas of knowledge in aerospace engineering intended to augment existing formal courses. Topics and prerequisites vary for each section. See Class Schedule or departmental course information for both. May be repeated in the same or separate terms if topics vary to a maximum of 12 hours.

AE 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/AE/599/)
Research in the various areas of aerospace engineering. Approved for S/U grading only. May be repeated in the same term or in separate terms.

AFAS - Air Force Aerospace Studies

AFAS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AFAS/)

Courses

AFAS 100 Department of Air Force Professionalism credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/AFAS/100/)
This course will cultivate a foundational understanding and appreciation of the Department of the Air Force's (DAF) core values, culture, and the essential personal attributes that define professionalism within this unique environment. This course is meticulously designed to bridge theoretical knowledge with practical skills, fostering a cadre of well-rounded students ready to excel in the DAF ecosystem.

AFAS 102 Leadership Laboratory credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/AFAS/102/)
Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complements the AFROTC academic program (AFAS 111 - AFAS 342). It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment Commander and operations Flight Commander. Approved for S/U grading only. May be repeated. Prerequisite: Consent of instructor.

AFAS 111 Heritage and Values of the United States Air Force I credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/AFAS/111/)
Heritage and Values of the United States Air Force is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Prerequisite: Concurrent enrollment in AFAS 102 is required.

AFAS 112 Heritage and Values of the United States Air Force II credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/AFAS/112/)
Heritage and Values of the United States Air Force is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Prerequisite: AFAS 111 or consent of instructor. Concurrent enrollment in AFAS 102 is required.

AFAS 120 Intro to US Armed Forces credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFAS/120/)
Same as MILS 120 and NS 120. See MILS 120.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

AFAS 221 Team and Leadership Fundamentals I credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/AFAS/221/)
Team and Leadership Fundamentals focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Prerequisite: AFAS 112 or consent of instructor. Concurrent enrollment in AFAS 102 is required.

AFAS 222 Team and Leadership Fundamentals II credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/AFAS/222/)
Team and Leadership Fundamentals focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Prerequisite: AFAS 221 or consent of instructor. Concurrent enrollment in AFAS 102 is required.

AFAS 331 Leading People and Effective Communication I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFAS/331/)
Leading People and Effective Communication teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skill. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Prerequisite: AFAS 222 or consent of instructor. Concurrent enrollment in AFAS 102 is required.

AFAS 332 Leading People and Effective Communication II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFAS/332/)
Leading People and Effective Communication teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skill. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Prerequisite: AFAS 331 or consent of instructor. Concurrent enrollment with AFAS 102 is required.

AFAS 341 Nat Sec Afrs/Prep Actv Duty I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFAS/341/)
National Security Affairs/Preparation for Active Duty" is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. Requires concurrent enrollment with AFAS 102. Prerequisite: AFAS 332 or consent of instructor.

AFAS 342 Nat Sec Afrs/Prep Actv Duty II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFAS/342/)
National Security Affairs/Preparation for Active Duty" is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. Requires concurrent enrollment with AFAS 102. Prerequisite: AFAS 341 or consent of instructor.

AFRO - African American Studies

AFRO Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AFRO/)

Courses

AFRO 100 Intro to African American St credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/100/)
Interdisciplinary introduction to the basic concepts and literature in the disciplines covered by African American studies; surveys the major approaches to the study of African Americans across several academic disciplines including economics, education, psychology, literature, political science, sociology and others.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AFRO 101 Black America, 1619-Present credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/101/)
Sociohistorical survey of African American experiences from the West African background to North America, from the 17th century to the present. Same as HIST 174.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AFRO 103 Black Women in the Diaspora credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/103/)
Explores the historical, social, economic, cultural and political realities of black women in the African diaspora with an emphasis on the U.S., Canada, Britain, Africa and the English speaking Caribbean. How macro structures such as slavery, imperialism, colonialism, capitalism, and globalization shaped and continue to circumscribe the lives of black women across various geographic regions. Discussion of the multiple strategies/efforts that black women employ both in the past and present to ensure the survival of the self and the community. Same as AFST 103 and GWS 103.

AFRO 105 Black Literature in America credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/105/)
Survey of the literary work of Black Americans from 1746 to the present. Exploration of the social, cultural, and political contexts that have shaped the Black American literary tradition by analyzing not only poetry, drama, autobiographical narratives, short stories, and novels, but also folktales, spirituals, and contemporary music. Same as ENGL 150.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

AFRO 106 Hist Arch Americas credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/106/)
Same as ANTH 106. See ANTH 106.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AFRO 122 Russia and Black America credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/122/)
Same as CWL 122 and RUSS 122. See RUSS 122.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AFRO 132 African American Music credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/132/)
Survey of African American music, from its origins to the present with a focus on understanding details of musical performance and the ways in which music interacts with its social and political context. Examines genres such as spirituals, the blues, jazz, R&B, soul, and hip-hop. No previous musical background is necessary.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

AFRO 134 Religion, Race, and Resistance credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/134/)
Same as REL 134. See REL 134.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AFRO 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/199/)
May be repeated.

AFRO 201 US Racial & Ethnic Politics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/201/)
Same as AAS 201, LLS 201, and PS 201. See PS 201.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AFRO 211 Intro to African-American Film credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/211/)
Same as MACS 211. See MACS 211.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AFRO 212 Introduction to African American Theatre credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/212/)
Same as THEA 263. See THEA 263.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AFRO 215 US Citizenship Comparatively credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/215/)
Same as AAS 215, AIS 295, GWS 215, and LLS 215. See AAS 215.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AFRO 220 Intro to Research Methods AfAm credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/220/)
Introduction to various methodologies to be employed in the interdisciplinary field of African American/Africana studies. Prerequisite: AFRO 100.

AFRO 221 History of the Prison credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/221/)
Same as HIST 219 and LA 221. See LA 221.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

AFRO 224 Humanist Persp of Afro-Am Exp credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/224/)
Presents the Afro-centric world view as it was manifested in traditional African society and in the Afro-American slave community. Shows that this world view merged with European notions of art and humanity, as revealed in modern Afro-American literature, art, and music. Same as CWL 226. Approved for both letter and S/U grading. Prerequisite: AFRO 100 or consent of instructor.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

AFRO 226 Black Women Contemp US Society credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/226/)
Sociological perspective of the experience of African American women in the contemporary United States. Specifically, an examination of relationships between the economy, state policy, culture, work and motherhood for this demographic group. Same as GWS 226 and SOC 223.

AFRO 227 Studies in Black Television credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/227/)
Explores topics in black television in order to a) analyze the economic and political factors that lead to successful series; b) historicize black television of the Diaspora, including the U.S., Caribbean, UK, Canada, and Nigeria; c) identify conventions and define a "black aesthetic;" d) determine how black series in one genre (such as sitcoms or dramas) aid in mapping other genres; and e) discuss how these series navigate stereotypes and cultural shifts. Same as MACS 227.

AFRO 228 Hip Hop Music: History and Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/228/)
A study of hip-hop from its beginnings in the post-industrial South Bronx of the 1970s to the global present. By focusing on the work of specific artists and movements, we will compare and contrast the production and consumption of hip-hop with other forms of popular music (including jazz, rock, disco, and pop). This course shows how musicians and listeners use hip-hop to express ideas about topics such as economics, nationalism, black power, feminism, and violence.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

AFRO 231 Lang Diff Dis: American Persp credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/231/)
Discusses the interaction of culture, ethnicity/race and language among American minorities. Emphasizes language difference theory as related to social and regional dialects and bilingualism/multilingualism. Distinguishes language differences from language disorders through examination of assessment and treatment approaches for different aged populations. Same as SHS 231.

AFRO 234 Black Religious Imaginations credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/234/)
Same as REL 234. See REL 234.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AFRO 243 Pan Africanism credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/243/)
Provides an introduction to Pan African political movements and ideologies from the Americas to continental Africa. Examines the political, social, economic, and ideological relationships and connections between Africans and their descendants in the diaspora from an historical and comparative perspective. Same as AFST 243 and PS 243.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

AFRO 250 Introduction to Health and Wellness in the Black Community credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/250/)
An introduction for understanding health-related issues and disparities affecting the African American community. We will explore health status across the lifespan, social and environmental challenges, chronic diseases, lifestyle behaviors, and intervention, research and policy implications. Students will learn how to integrate and situate these complexities in a broader systemic framework and understand how this population exhibits resiliency in the face of these adversities.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AFRO 259 Early African American Literature and Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/259/)
Same as CWL 259 and ENGL 259. See ENGL 259.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AFRO 260 Modern African American Literature and Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/260/)
Same as CWL 260 and ENGL 260. See ENGL 260.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

AFRO 261 Intro to the African Diaspora credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/261/)
Introduction to the origin, development, and maturation of the African diaspora in the Americas and the Caribbean, beginning with the transatlantic slave trade and up to the end of the 20th century. Same as ANTH 261.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AFRO 275 Afro-American History to 1877 credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/275/)
Same as HIST 275. See HIST 275.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AFRO 276 African American History Since 1877 credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/276/)
Same as HIST 276. See HIST 276.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AFRO 281 Constructing Race in America credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/281/)
Same as AAS 281, HIST 281, and LLS 281. See HIST 281.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AFRO 287 African-American Women credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/287/)
Same as GWS 287 and HIST 287. See HIST 287.

AFRO 290 Af Am Urban Hist Since 1917 credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/290/)
Examination of the changing interaction among black urban communities, the broader urban citizenry, municipal government, the local and national urban-industrial economy, and federal policy over time, giving particular attention to discourses about the black "ghetto" as both a physical space and set of social conditions. Same as HIST 284. Prerequisite: AFRO 101, HIST 276, HIST 172, SOC, 225, or PS 201.

AFRO 298 Spec Topics African-Am Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/298/)
Seminar on selected topics with particular emphasis on current research trends. May be repeated to a maximum of 6 hours. Prerequisite: AFRO 100 or AFRO 101, or consent of instructor.

AFRO 310 Race and Cultural Diversity credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/310/)
Same as AAS 310, EPOL 310, and LLS 310. See EPOL 310.
This course satisfies the General Education Criteria for:
Advanced Composition
Cultural Studies - US Minority

AFRO 312 Psychology of Race & Ethnicity credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/312/)
Same as PSYC 312. See PSYC 312.

AFRO 315 African American Politics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/315/)
Same as PS 315. See PS 315.

AFRO 340 Dancing Black Popular Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/340/)
Same as DANC 340. See DANC 340.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - US Minority

AFRO 341 Gov & Pol in Africa credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/341/)
Same as PS 341. See PS 341.

AFRO 342 Black Men and Masculinities credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/342/)
The sociological study of African American men in the contemporary U.S. Specifically, black manhood and masculinities and the experiences of this demographic group as it relates to the economy, state, policy, and institutions such as family, criminal justice system, and education. Same as SOC 325. Prerequisite: Introductory social science course.

AFRO 343 Criminalization and Punishment credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/343/)
Same as AAS 343, AIS 343, GWS 343, and LLS 343. See LLS 343.

AFRO 345 Becoming Malcolm X and Martin Luther King Jr. credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/345/)
A re-examination of the lives and legacies of Martin Luther King Jr. and Malcolm X. Few Black leaders are held in as high esteem, yet these ministers are often represented as rivals, even adversaries. While their rhetoric and protest strategies differed, there were values and priorities they shared. This course explores the social, religious, and political ideologies that underpinned their struggles for freedom, and considers how their memory is deployed in current social movements. Same as REL 333.

AFRO 372 Class Politics & Blk Community credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/372/)
Exploration of the complex history of class relations among African Americans during the twentieth century, examining both the internal and external shapers of black class stratification. Considers the historical development of contemporary black "underclass", and the parallel expansion of the black middle class today. Same as HIST 384. Prerequisite: AFRO 101, HIST 276, or SOC 225 or consent of instructor.

AFRO 373 AfAm Cultr Politic Mid20C credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/373/)
Focusing on African American culture and history from World War II until the early 1960's, topics include citizenship, migration, urban life, the African Diaspora, Civil Rights Movement, and art forms. Approved for both letter and S/U grading. Prerequisite: AFRO 100 and AFRO 101, AFRO 261, ENGL 260 or HIST 276.

AFRO 378 Race and Revolutions credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/378/)
Focus on the relationship between race and slavery during the revolutions in American and Haiti, respectively. We will seek to understand how the themes of slavery, revolution and race affected blacks, whites and indigenous Americans. We will learn about life during the Revolutionary era by reading the biographies, political pamphlets and personal letters of former slaves, Revolutionaries and everyday men and women as well as historical scholarship. Same as HIST 389. Prerequisite: One African American Studies or History course at either the 100- or 200-level or the consent of instructor.

AFRO 380 Black Women Hist & Cultures credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/380/)
Same as GWS 380. See GWS 380.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

AFRO 381 Black Women and Film credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/381/)
An examination of the contribution of Black women film directors to cinema. The study of documentary, experimental, animated, fictional shorts, and feature films will reveal their unique approach to constructions of the intersection of race and gender. Starting from the 1920's up to the present, the course considers themes, aesthetics, historical contexts, and ideological discourses presented in the films. Same as MACS 381. Prerequisite: College level film course or consent of instructor.

AFRO 382 African Amer Families in Film credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/382/)
Uses film as case studies to examine the diverse structures, social classes, and internal dynamics among African American families. Critical family processes such as family formation patterns, dating mate selection, parenting, male-female/gender relations, child adolescent, and adult development, family routines and practices, family communication, and family stress and coping will be examined. Also considers how families interact within larger contexts, such as the local neighborhood and key institutions (school, workplace, social service agencies). Films will be supplemented with readings drawn for diverse disciplines (African American Studies, Anthropology, Family Studies, History, Psychology, and Sociology) that allow us to examine key substantive, theoretical, methodological, and policy issues in the study of African American families.

AFRO 383 Hist of Blk Women's Activism credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/383/)
Examination of the history of twentieth century black women's activism, specifically concerned with how African American female activists have been critical to building, sustaining and leading black freedom movements. Same as GWS 383 and HIST 383. Prerequisite: AFRO 100 or AFRO 101 or AFRO 103 or consent of instructor.

AFRO 398 Spec Topics Afro-Am Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/398/)
Advanced seminar on selected topics with particular emphasis on current research trends. May be repeated to a maximum of 6 hours. Prerequisite: Junior status and one of the following: AFRO 224, or HIST 275 or HIST 276, or ENGL 259 or ENGL 260.

AFRO 400 African Diasporic Thought in the Caribbean credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/400/)
Critical examination of the contributions of intellectuals of African descent in the Caribbean and its global circuits. Major streams of social/political thought, cultural analysis, and artistic expression from across the region and its diasporas are analyzed within post- and de-colonial theoretical frameworks. Dialogues with Caribbeanists and thinkers from other parts of the world will also be considered. Same as CWL 400. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 261 or consent of instructor.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

AFRO 407 Slavery & Race in Latin Am credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/407/)
Same as HIST 407. See HIST 407.

AFRO 410 Hate Crimes credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/410/)
Hate crimes represent the manifestation of intergroup bias and aggression. Examples of these crimes will be examined while analyzing longstanding theories in social psychology. Same as PSYC 410. 3 undergraduate hours. 3 graduate hours. Prerequisite: PSYC 201 or consent of instructor.

AFRO 411 African American Psychology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/411/)
Introduction to the research, theories, and paradigms developed to understand the attitudes, behaviors, and psychological and educational realities of African Americans. Same as PSYC 416. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 or one psychology course.

AFRO 415 Africana Feminisms credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/415/)
Explores readings and research from the perspective of feminists throughout the African diaspora, with a focus on Black feminist thought emanating from the United States. Same as AFST 420 and GWS 415. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 103 and an additional 300 or 400-level African American Studies course or consent of the instructor.

AFRO 421 Racial and Ethnic Families credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/421/)
Same as EPOL 410, and HDFS 424. See EPOL 410.

AFRO 435 Commodifying Difference credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/435/)
Same as AAS 435, GWS 435, LLS 435 and MACS 432. See LLS 435.

AFRO 460 Slavery in the United States credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/460/)
Examination of slavery in the U.S. using primary sources (slave narratives, songs and tales, plantation records, laws and newspapers) from the 18th century through emancipation. Same as HIST 482. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 or AFRO 101 and one 300-level AFRO course.
This course satisfies the General Education Criteria for:
Advanced Composition

AFRO 465 Race, Sex, and Deviance credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/465/)
Same as AAS 465, GWS 465, and LLS 465. See LLS 465.

AFRO 466 Race, Science, and Medicine credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/466/)
Examines the development of race in in medical and scientific thought; how public health and medical institutions deploy the concept; and the process by which race emerged as a valid though controversial topic of scientific and biomedical inquiry. Also addressed is the relationship between slavery and nineteenth-century medicine, the birth of the eugenics movement, legacies of medical exploitation and mistrust, trends in genetic medicine, and contemporary disparities in health outcomes and health care delivery. Same as HIST 483. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 or AFRO 101 and one 300-level AFRO course.

AFRO 474 The Black Liberation Movement, 1955-Present credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/474/)
An interdisciplinary exploration of the Black Liberation Movement (BLM) from the years 1955 to present, with emphasis on the last high tide of Black struggle in the turbulent 1960s. The course examines the different waves of the BLM and the strategies used by the BLM, namely “freedom, justice, equality” or integration, “self-determination” or Black nationalism, and “social transformation” or socialism. Same as HIST 478. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 101, HIST 276, or consent of instructor. Junior, Senior, or Graduate standing.
This course satisfies the General Education Criteria for:
Advanced Composition

AFRO 481 Urban Communities & Public Pol credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/481/)
Examination of how public policy has shaped urban communities and the life chances (i.e., the social, economic, mental and physical well-being) of families of color. Emphasizes the theoretical, political, and economic context of public policy making and specifically address urban issues of housing, communities and families, employment, welfare, and poverty. This course will draw on scholarship by sociologists, historians, policy analysts, race theorists, and economists. Same as SOC 472 and UP 481. 3 undergraduate hours. 4 graduate hours.

AFRO 482 Immersion Journalism credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/482/)
Same as JOUR 482. See JOUR 482.

AFRO 490 Theory in African American St credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/490/)
Introduction to various theories and methodologies rising out of the study of the Black world based on African American intellectual traditions. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFRO 100 and one additional 400-level AFRO course, or consent of instructor.

AFRO 495 Senior Thesis Seminar credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/495/)
3 undergraduate hours. No graduate credit. Prerequisite: AFRO 100 and AFRO 220 or AFRO 490.

AFRO 498 Spec Topics African Am Studies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/498/)
Seminar on selected topics with particular emphasis on current research trends. 3 undergraduate hours. 4 graduate hours. May be repeated up to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Upper level AFRO course (300 or above) or consent of instructor.

AFRO 500 Core Probs African-Am Studies credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/500/)
Introduction for grad students to the central concepts, theories, methodologies, and paradigms in Black Studies. Students will also be introduced to the key critical scholars, seminal works and emerging trends in Black Studies. Prerequisite: Graduate standing.

AFRO 501 Problems African American Hist credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/501/)
Same as HIST 575. See HIST 575.

AFRO 502 Researching Black Families, Communities, and Neighborhoods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/502/)
A critical examination of social scientific approaches to the study of black families, communities, and neighborhoods. Students are introduced to the methodological, epistemological, and ethical challenges of conducting research on this population. The class will be a learning community working together through the research process from the development of a research problem to the dissemination of results. Prerequisite: Graduate standing.

AFRO 504 Black Women's Studies credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/504/)
The study of black women and gender within critical discourses of history, the social sciences, and the humanities. Students are introduced to interdisciplinary and Black Women's Studies paradigms as means to study and understand the experiences of black women in the U.S. and other racialized women's groups.

AFRO 531 Race and Cultural Critique credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/531/)
Same as AAS 561, ANTH 565, GWS 561, and LLS 561. See AAS 561.

AFRO 552 Ethnography Urban Communities credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/552/)
Addresses substantive, theoretical, methodological, and policy issues within the field of urban community studies. Focusing primarily on African American urban communities, with comparisons to other racial-ethnic group communities (e.g. Euro-American, Latino, immigrant), ethnographic case studies are used to explore community processes (formation, ghettoization, gentrification, transnationalism), their relationship to historical, economic, social, and political factors, and how these processes are influenced by ethnicity, class, gender and developmental cycle. Attention will also be given to how empirical studies can be used to inform public policies affecting urban communities. Interdisciplinary readings draw primarily from anthropology, education, and sociology. Same as HDFS 543, SOC 578, and UP 578.

AFRO 560 African Diaspora Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/560/)
Study of the key political, social, economic and cultural developments of the African Diaspora in Asia, Europe and the Americas. Using an interdisciplinary framework, students will examine recent scholarship in history, women's studies, political science, sociology and anthropology to understand the experiences and challenges faced by people of African descent. Same as AFST 560.

AFRO 595 Directed Independent Readings credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/595/)
Primarily but not exclusively for students who are completing a minor or concentration in African American Studies. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 12 hours. Prerequisite: Consent of instructor.

AFRO 597 Problems in African-Am Studies credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/597/)
Focused reading and study of special problems in African American Studies. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing, AFRO 500 or equivalent, or consent of instructor.

AFRO 598 Res Sem in African-Am Studies credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/598/)
Graduate seminar on special topics based on current research trends. May be repeated to a maximum of 8 hours. Prerequisite: Graduate standing, AFRO 500 or equivalent, or consent of instructor.

AFRO 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/AFRO/599/)
Individual direction in research and guidance in writing theses and dissertations for advanced degrees. Approved for S/U grading only. May be repeated in separate terms.

AFST - African Studies

AFST Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AFST/)

Courses

AFST 103 Black Women in the Diaspora credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/103/)
Same as AFRO 103 and GWS 103. See AFRO 103.

AFST 111 History of Africa to 1800 credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/111/)
Same as HIST 111. See HIST 111.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

AFST 112 History of Africa from 1800 credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/112/)
Same as HIST 112. See HIST 112.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

AFST 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/AFST/199/)
May be repeated.

AFST 209 Constr Afr and Carib Identity credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/209/)
Same as CWL 225, FR 240, and LAST 240. See FR 240.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

AFST 210 Introduction to Modern African Literature credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/210/)
[IAI Code: H3908N] Significant contemporary African writings depicting the history and cultural traditions of African peoples. Same as CWL 210 and ENGL 211.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - Non-West

AFST 213 African Muslim Societies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/213/)
Same as HIST 213 and REL 215. See HIST 213.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

AFST 222 Introduction to Modern Africa credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/222/)
Interdisciplinary introduction to Africa dealing with basic themes and problems in the politics, economics, sociology, anthropology, and history of Africa. Same as ANTH 222, PS 242, and SOC 222.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

AFST 231 Elementary Swahili I credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/AFST/231/)
Same as SWAH 201. See SWAH 201.

AFST 232 Elementary Swahili II credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/AFST/232/)
Same as SWAH 202. See SWAH 202.

AFST 233 Context in International Interventions credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/233/)
Same as ABE 232. See ABE 232.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

AFST 241 Elementary Wolof I credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/AFST/241/)
Same as WLOF 201. See WLOF 201.

AFST 242 Elementary Wolof II credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/AFST/242/)
Same as WLOF 202. See WLOF 202.

AFST 243 Pan Africanism credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/243/)
Same as AFRO 243 and PS 243. See AFRO 243.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

AFST 254 Economic Systems in Africa credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/254/)
Same as ACE 254. See ACE 254.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

AFST 312 Central African Art credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/312/)
Same as ARTH 312. See ARTH 312.

AFST 313 Modern and Contemp African Art credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/313/)
Same as ARTH 313. See ARTH 313.

AFST 338 Egypt Since World War I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/338/)
Same as HIST 338. See HIST 338.

AFST 405 Topics Swahili Lang & Lit I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/405/)
Same as SWAH 407. See SWAH 407.

AFST 406 Topics Swahili Lang & Lit II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/406/)
Same as SWAH 408. See SWAH 408.

AFST 407 Adv Topics Swahili Lang&Lit I credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/407/)
Same as SWAH 409. See SWAH 409.

AFST 408 Adv Topics Swahili Lang&Lit II credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/408/)
Same as SWAH 410. See SWAH 410.

AFST 410 Modern African Fiction credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/410/)
Examines selected major African novels along thematic and formal lines; literary responses to colonialism and political independence and the crises that accompanied both in Africa; and study of critical approaches to the African novel and African characteristics of and contribution to the novel as a genre. Readings in English. Same as CWL 410 and ENGL 470. 3 undergraduate hours. 4 graduate hours. Prerequisite: AFST 210 or AFST 222, or junior standing.

AFST 412 Lang in African Culture & Soc credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/412/)
Same as LING 412. See LING 412.

AFST 420 Africana Feminisms credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/420/)
Same as AFRO 415 and GWS 415. See AFRO 415.

AFST 421 Sacred African Diaspora Arts credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/421/)
Same as ARTH 413. See ARTH 413.

AFST 433 Intermediate Swahili I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/433/)
Same as SWAH 403. See SWAH 403.

AFST 434 Intermediate Swahili II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/434/)
Same as SWAH 404. See SWAH 404.

AFST 435 Advanced Swahili I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/435/)
Same as SWAH 405. See SWAH 405.

AFST 436 Advanced Swahili II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/436/)
Same as SWAH 406. See SWAH 406.

AFST 443 Intermediate Wolof I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/443/)
Same as WLOF 403. See WLOF 403.

AFST 444 Intermediate Wolof II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/444/)
Same as WLOF 404. See WLOF 404.

AFST 445 Advanced Wolof I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/445/)
Same as WLOF 405. See WLOF 405.

AFST 446 Advanced Wolof II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/446/)
Same as WLOF 406. See WLOF 406.

AFST 447 Topics Wolof Lang & Lit I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AFST/447/)
Same as WLOF 407. See WLOF 407.

AFST 490 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/490/)
Supervised readings and research in selected fields in consultation with the instructor. 1 to 3 undergraduate hours. 1 to 4 graduate hours. May be repeated in separate terms up to 9 undergraduate hours or 12 graduate hours, if topics vary. Prerequisite: Consent of the Center for African Studies.

AFST 495 Special Topics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/495/)
Subject offerings of new and developing areas of knowledge in African Studies intended to augment the existing curriculum. See Class Schedule or departmental course information for topics and prerequisites. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary.

AFST 509 Seminar in African Art credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/509/)
Same as ARTH 510. See ARTH 510.

AFST 510 Problems in African History credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/510/)
Same as HIST 510. See HIST 510.

AFST 511 Research Seminar: Africa credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/511/)
Same as HIST 511. See HIST 511.

AFST 515 Practicum in African Studies credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AFST/515/)
A supervised practicum that emphasizes participation in the Center's educational activities and includes organizing conferences and outreach to K-12 educators, the media, and the community. Approved for S/U grading only. Prerequisite: Enrollment in graduate African Studies program or related Ph.D. programs, or consent of instructor.

AFST 522 Development of African Studies credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/522/)
Examines the development of Africanist scholarship during the 20th century and the changing paradigms in African Studies; focuses on the rise of the area studies model and its influences on the major Social Science and Humanities disciplines. Prerequisite: Graduate student status and approval of instructor.

AFST 550 Special Topics credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/550/)
Topics vary with the disciplinary focus. May be repeated to a maximum of 12 hours. Prerequisite: Consent of instructor.

AFST 555 Multicultural Education and Global Perspectives credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/555/)
Same as CI 512. See CI 512.

AFST 560 African Diaspora Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AFST/560/)
Same as AFRO 560. See AFRO 560.

AFST 599 Thesis Research credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/AFST/599/)
Individual direction in research and guidance in writing theses for advanced degrees. Approved for S/U grading only. May be repeated in the same term or in separate terms up to 8 hours.

AGCM - Agricultural Communications

AGCM Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AGCM/)

Courses

AGCM 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/199/)
An experimental course on a special topic in agricultural leadership, education and communications. May be repeated in the same or separate terms as topics vary to a maximum of 12 hours. Prerequisite: ALEC Program approval required.

AGCM 220 Communicating Agriculture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/220/)
Skills necessary to communicate complex information about the broad agriculture domain to different audiences. Application of communication theories. Emphasis on essential communication skills, including writing, conducting interviews, planning, and critical evaluation of information sources. Same as ENVS 220 and NRES 220. Prerequisite: Completion of a Composition I course.
This course satisfies the General Education Criteria for:
Advanced Composition

AGCM 310 Investigating Agricultural Communications credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/310/)
An introduction to the most prominent types of research methods used in the discipline of Agricultural Communications as well as across social science disciplines in general. This course will also engage the strategies and tactics that practitioners use in order to produce various forms of agricultural communications. There are three overarching goals of this course. First, after completion of this course, the student should be able to competently understand and assess reports of research. Second, the student should be able to adequately conceptualize and begin the process of conducting original research around questions of agricultural communications. Finally, students should be able to competently use research skills in order to generate various agricultural communications. Approved for Letter and S/U grading. Prerequisite: Registration preference given to Junior or Senior status students.

AGCM 315 Social Media Management in Agricultural Communications credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/315/)
Theories, principles and practices of applying emerging tools, technology, and norms to communicate agriculture to broad audiences. Focus on the strategies and tactics of using social media to communicate food, fuel, fiber, natural resources, health, human nutrition and related topics.

AGCM 330 Environmental Communications credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/330/)
Basics of communicating about environmental issues to various audiences, emphasizing communication to lay publics. Gathering information about a current environmental issue, analyzing interests of groups involved, and examining strategies for communicating clearly to different groups. Same as ENVS 330 and NRES 330. Prerequisite: Sophomore standing.

AGCM 375 International Agricultural Communications credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/375/)
An examination of agricultural communications in international contexts. Students will learn about global communication networks, global media flow, cultural and intercultural communication in agriculture, and development communications in agricultural contexts. Approved for Letter and S/U grading. Prerequisite: Restricted to students with junior or senior standing.

AGCM 380 Publication Development and Production credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/380/)
Addresses the modern realities of publication production (cost, competition, and consumption, among them) while giving students an experiential learning opportunity to take the lead in developing and publishing an e-magazine. Students will further develop and apply fundamental journalistic skills learned in AGCM 220, and learn magazine writing style, technical skills including photography and design, and production and e-delivery platforms. Students will discuss approaches to staffing, as well as publishers' and audiences' motivation. Approved for Letter and S/U grading. Prerequisite: AGCM 220.

AGCM 398 Undergraduate Seminar credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/398/)
Special topics in a field of study directly pertaining to subject matter in agricultural communications. Same as ALEC 398. May be repeated in the same or separate semesters, if topics vary.

AGCM 420 Public Information Campaigns credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/420/)
Coordinated approach to planning, implementing and evaluating information campaigns in the broad domain of food and agriculture. Students work with groups, agencies and organizations in designing communication campaigns strategies and tactics. 3 undergraduate hours. No graduate credit. Approved for Letter and S/U grading. Credit is not given for both AGCM 420 and AGCM 320. Prerequisite: Sophomore standing and Composition I course.

AGCM 440 Visualizing Our World credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/440/)
Our world is dominated by visuals and visuals construct our understanding of the world. This class investigates images, from creation to circulation, and everything in between. The first half of the course is dedicated to developing a vocabulary for describing and analyzing photographs and their role in creating and/or critiquing our world. The second half of the semester offers students the chance to produce images while also discussing the ethics and responsibilities of image production. Overall, the class offers a chance to explore the medium of photography as both a skill and an area of research and criticism. 3 undergraduate hours. 3 graduate hours. Prerequisite: Prior coursework in AGCM recommended.

AGCM 495 Communicating Science credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/495/)
Explores how science is communicated across contexts. Students will gain practical skills in communicating science to broad audiences. The main focus will be on agricultural science, but the lessons will be relevant to all science communicators. Topics will include exploring the foundations of science communication, developing skills in science writing for news and advocacy, public speaking, ethics and science communication, how persuasion operates in the context of science communication, science communication campaigns, among others. 3 undergraduate hours. 3 graduate hours. Approved for Letter and S/U grading. Prerequisite: Restricted to Junior or Senior standing for undergraduate students. Graduate standing is required for graduate credit.

AGCM 499 Seminar credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AGCM/499/)
Special topics in agricultural leadership, education or communications. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or separate semesters, if topics vary. Prerequisite: ALEC Program approval required.

AGED - Agricultural Education

AGED Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AGED/)

Courses

AGED 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/AGED/199/)
An experimental course on a special topic in agricultural leadership, education and communications. May be repeated in the same or separate terms as topics vary to a maximum of 12 hours. Prerequisite: ALEC Program approval required.

AGED 220 Prog Del in Ag & Leadership Ed credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGED/220/)
[IAI Code: AG911] Introduces formal and non-formal methods used to deliver education and training in agricultural and leadership education programs. Focuses on types and purposes of agricultural education, program components, principles of teaching and learning, community relationships, and reflective teaching. Technology-supported lab component provides skills needed to develop teaching and training materials.

AGED 250 Observation and Program Analys credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AGED/250/)
Early field experience in agricultural education, including observation and analysis activities in public schools, extension programs, or other selected settings; participation in clinical field experience activities; examination of educational program development and operation, teaching and learning processes, contextual factors in learning, evaluation of student learning; and professionalism. Approximately 45 hours of early field experience will be acquired. Off-campus observation begins the first week of January. Agricultural education programs in both school and non-school settings are examined. Prerequisite: AGED 220; concurrent enrollment in EDPR 203.

AGED 293 Ag Leadership Internship credit: 1 to 6 Hours. (https://courses.illinois.edu/schedule/terms/AGED/293/)
Supervised off-campus experience in a field directly pertaining to subject matter in agricultural leadership education. Approved for S/U grading only. May be repeated in the same or subsequent terms to a maximum of 12 hours.

AGED 295 Independent Study or Research credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AGED/295/)
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated in the same or subsequent terms.

AGED 350 Early Field Experience credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGED/350/)
Supervised experience during the summer months and fall semester including: supervision of students' agricultural experience programs and projects; development of problem-solving and decision-making skills related to use of instructional technologies, management of FFA activities, and supervision of agricultural experiences; review of teacher certification requirements and application for teacher certification; development of online teacher certification portfolio meeting state, UIUC, and program requirements. A minimum of 50 hours or early field observation is required. Prerequisite: AGED 250.

AGED 396 Honors Research or Thesis credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AGED/396/)
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated in the same or subsequent terms. Prerequisite: Junior standing, admission to the ACES Honors Program.

AGED 410 Grad Early Field Experience credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AGED/410/)
An introduction to the application of pedagogy through early field experiences in agricultural education. Students participate in eight weeks of instruction and 40 hours of participatory experiences in approved agricultural education programs. Off-campus observation begins the first week of January. Restricted to graduate students in the teacher education option. 2 undergraduate hours. 2 graduate hours. Prerequisite: Concurrent enrollment in EDPR 203.

AGED 420 Curr Design & Instruction credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGED/420/)
This instructional methodology course provides students the opportunity to analyze the principles of learning and teaching as they influence the academic motivation of learners in formal and non-formal environments within agricultural, food and environmental sciences. Topics include: the understanding and implementation of psychological aspects of learning, planning and development of agricultural courses and curricula, creating teaching plans, managing positive learning environments, evaluating student learning, and the utilization of effective self-reflective teaching behaviors. 3 undergraduate hours. 3 graduate hours. Prerequisite: AGED 220 for majors; consent of instructor for non-majors.

AGED 421 Teaching Strategies in AGED credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGED/421/)
Synthesis of principles of teaching and learning as they influence educational activities in formal and non-formal environments within agricultural and related sciences. Gives individuals an opportunity to apply the educational concepts covered in AGED 300 or AGED 420. Individuals will design, implement, and evaluate learner-centered approaches in a variety of simulated educational environments. 3 undergraduate hours. 3 graduate hours. Prerequisite: AGED 300 or AGED 420 or graduate standing.

AGED 430 Youth Development Programs credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AGED/430/)
Instruction in the youth development process, including learning; philosophy and purposes of youth development policies, programs, and organizations; relationships to organizational missions; principles and procedures for developing, coordinating, and implementing youth development programs; and examining research and practice in youth-at-risk initiatives. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Prerequisite: AGED 220, or HDFS 105, or PSYC 100.

AGED 450 Program Delivery and Eval credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AGED/450/)
Students complete this course during their twelve-week practice teaching or internship experience. Written assignments will focus on development of teaching plans, program initiation and improvement plans, and actual evaluation studies of agricultural education programs. Instruction will be provided during on-site faculty visits and by cooperating personnel. 4 undergraduate hours. 4 graduate hours. Prerequisite: AGED 420.

AGED 496 Beginning Agriculture Teachers Seminar credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AGED/496/)
The purpose of this course is to gain knowledge and skills to be an effective agriculture educator. This course is intended for high school agriculture teachers who are entering their first year as an educator. This is a blended course; the majority of the course will take place during the two-day, face-to-face instruction at an off-campus location (16 contact hours), while the remainder of the course will occur through online instruction. No undergraduate credit. 2 graduate hours. Prerequisite: Restricted to students who have completed an undergraduate degree and have accepted a position teaching agriculture in a secondary school in the state of Illinois.

AGED 498 Second Year Agriculture Teacher Seminar credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/AGED/498/)
This course is intended for high school agriculture teachers who are entering their second or third year as an educator. The majority of the two-day face-to-face course (16 contact hours) will occur at an off-campus location in mid-July. The purpose of the course is to provide teachers with an opportunity to reflect on successes and challenges from the previous year, address concerns and/or areas of improvement, and provide teachers with a framework to support their efforts in the upcoming year. Assignments include: strategic planning for officer teams, community involvement, and classroom/shop management, in addition to revising existing curriculum and/or developing new curriculum. No undergraduate credit. 1.00 graduate hours. N/A Prerequisite: Restricted to students who have completed an undergraduate degree and have accepted a position teaching agriculture in a secondary school in the state of Illinois.

AGED 499 Seminar credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AGED/499/)
Special topics in agricultural education. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in the same or subsequent terms to a maximum of 12 undergraduate or graduate hours as topics vary.

AGED 500 Special Topics in Ag Education credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AGED/500/)
Advanced study in selected phases of agricultural education applicable to agricultural educators in schools, community colleges, universities, cooperative extension, agribusiness, and community and governmental agencies. May be repeated in the same and subsequent terms.

AGED 501 Inquiry-Based Curriculum in Agricultural STEM and Biotechnology Education credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AGED/501/)
Provides students with knowledge of inquiry-based techniques related to Science, Technology, Engineering, and Mathematics in the context of Agriculture. Students will experience activities, labs, and projects developed for inclusion in secondary agriculture classrooms. The learning environment will be grounded in the specific agricultural content area, offered on a rotational basis (ex., Comprehensive agriculture, animal systems, plant systems, ag power, and technology, etc.) Approved for Letter and S/U grading. May be repeated in separate terms, if topics vary, for up to 6 hours. Prerequisite: Restricted to practicing middle school and high school teachers.

AGED 510 Education Program Management credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AGED/510/)
Theoretical and practical approaches to planning, delivering and evaluating programs in agricultural education, with a focus on development of comprehensive educational plans.

AGED 511 Grad Professional Dev in Ag Ed credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/AGED/511/)
Analysis of teaching and learning processes, program improvement strategies, professional development, FFA chapter development, awareness of school law, program management, and discussion of trends and issues in agricultural education.

AGED 550 Advanced Program Delivery credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AGED/550/)
Theory and practice of advanced program delivery in non-school settings, including the following: strategic planning; environmental scanning; logic model development; experiential and accelerated learning methodologies; and training and development strategies.

AGED 551 Advanced Program Evaluation credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/AGED/551/)
Theory and practice of advanced program evaluation in non-school settings, including the following: measuring the impact of educational programs; program outcomes and indicators; measuring behavior change, and developing, using, interpreting, and reporting pre-post evaluations, qualitative data, surveys, focus group data, and observational data.

AHS - Applied Health Sci Courses

AHS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AHS/)

Courses

AHS 125 Freshmen Scholars Seminar credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/AHS/125/)
Designed for James Scholars for Applied Health Sciences who are in their first year of college to introduce them to research. Students will learn strategies to apply classroom material to community and society. Includes visits from faculty and staff from across campus and within the College who will expose students to an array of contexts and approaches for research. This course is a James Scholar course for freshmen only.

AHS 199 Undergraduate Open Seminar credit: 1 to 6 Hours. (https://courses.illinois.edu/schedule/terms/AHS/199/)
Topics will vary each semester. Please see section topic. Approved for both Letter and S/U grading. May be repeated to a maximum of 12 hours.

AHS 292 AHS Study Abroad credit: 0 to 18 Hours. (https://courses.illinois.edu/schedule/terms/AHS/292/)
Provides credit toward the undergraduate degree for study at an accredited international institution or approved overseas program. Final determination of credit granted is made upon the student' s successful completion of work. Approved for letter and S/U grading. May be repeated to a maximum of 44 hours. Prerequisite: One year or residence at UIUC and consent of major department and the college.

AHS 294 Applied Health Sciences Internship Experience credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/AHS/294/)
Students follow a program of study, reflection, and research through an approved internship outside of an internship specifically required by a program of study. A final written work report is required. Approved for S/U grading only. May be repeated in separate terms for distinct internship experiences. Prerequisite: Instructor approval required. Restricted to undergraduate students in the College of Applied Health Sciences.

AHS 399 Advanced Open Seminar credit: 1 to 6 Hours. (https://courses.illinois.edu/schedule/terms/AHS/399/)
Advanced undergraduate seminar. Topics will vary each semester. Please see section topic. Approved for letter and S/U grading. May be repeated in the same or subsequent terms to a maximum of 6 hours.

AHS 494 Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/AHS/494/)
Lecture courses in topics of current interest; specific subject matter will be announced in the Class Schedule. 1 to 4 undergraduate hours. 1 to 4 graduate hours. Approved for Letter and S/U grading. May be repeated up to 12 hours if topics vary. Prerequisite: See Class Schedule for section requirements.

AIS - American Indian Studies

AIS Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/AIS/)

Courses

AIS 101 Intro to American Indian Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/101/)
Interdisciplinary introduction surveys the stories, histories, and lands of tribal peoples who became known as "American Indians".
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AIS 140 Native Religious Traditions credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/140/)
An interdisciplinary survey of native religious traditions, exploring the breadth and depth of spiritual expression among native people in North America. Assigned readings and class discussions cover a variety of important themes including sacred landscapes, mythic narratives, oral histories, communal identities, tribal values, elder teachings, visionary experiences, ceremonial practices, prayer traditions, and trickster wisdom. Students also consider historic encounters with missionary colonialism and contemporary strategies for religious self-determination. Class discussions are supplemented by audiovisual materials and guest speakers.

AIS 165 Lang & Culture Native North Am credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/165/)
Same as ANTH 165. See ANTH 165.

AIS 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/AIS/199/)
May be repeated to a maximum of 6 hours.

AIS 214 American Indian Law & Politics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/214/)
Same as PS 214. See PS 214.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

AIS 265 Intro to American Indian Lit credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/265/)
Introduces students to the study of American Indian literature by focusing on texts by contemporary American Indian novelists, poets, and playwrights. Over the course of the semester, students will consider how indigenous aesthetics shape narrative in addition to examining how American Indian authors engage the legacies of colonization and the histories of their tribal communities through their stories. Same as ENGL 265.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

AIS 275 Am Indian and Indigenous Film credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/275/)
Introduction to representations of American Indians and Indigenous peoples in film. Reconstructions of American Indians within the Western genre and more recent reconstructions by Native filmmakers will be considered. Other topics may include the development of an indigenous aesthetic; the role of documentaries and nonfiction films in the history of Native and Indigenous film; the role of commerce in the production of Native films. Same as ENGL 275 and MACS 275.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts
Cultural Studies - US Minority

AIS 277 Encounters in Native America credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/277/)
Same as HIST 277. See HIST 277.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AIS 278 Native American History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/278/)
Same as HIST 278. See HIST 278.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AIS 280 Intro to Federal Indian Policy credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/280/)
Traces the evolution of U.S. federal law as it pertains to American Indian nations. From the doctrine of discovery, through which European nations asserted control over the lands they claimed, to the processes of reorganization and recognition that have shaped contemporary rights and struggles native nations currently face, this class will interrogate how American Indian nations were transformed into "domestic dependent nations".

AIS 285 Indigenous Thinkers credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/285/)
An introduction to the English-language traditions of indigenous intellectuals. Specific topics vary. May be repeated in the same term, to a maximum of 6 hours, or in separate terms, to a maximum of 9 hours, if topics vary.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

AIS 288 American Indians of Illinois credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/288/)
Same as ANTH 288 and HIST 288. See ANTH 288.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AIS 291 Independent Study credit: 1 to 6 Hours. (https://courses.illinois.edu/schedule/terms/AIS/291/)
Supervised reading and research in American Indian Studies chosen by the student with instructor approval. Approved for both letter and S/U grading. May be repeated in the same or separate terms to a maximum of 6 hours. Prerequisite: One course in American Indian Studies and consent of instructor.

AIS 295 US Citizenship Comparatively credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/295/)
Same as AAS 215, AFRO 215, GWS 215, and LLS 215. See AAS 215.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

AIS 343 Criminalization and Punishment credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/343/)
Same as AAS 343, AFRO 343, GWS 343, and LLS 343. See LLS 343.

AIS 357 Literatures of the Displaced credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/AIS/357/)
Same as AAS 357, ENGL 357, GWS 357, and LLS 357. See LLS 357.

AIS 459 Topics in American Indian Lit credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AIS/459/)
Interdisciplinary seminar on special and advanced topics in American Indian and Indigenous Literatures. Same as ENGL 459. 3 undergraduate hours. 4 graduate hours. May be repeated in the same or subsequent terms to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: One year of college literature or consent of instructor.

AIS 481 History of American Indian Education credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AIS/481/)
Students will study various efforts to "civilize" American Indians through US government initiatives and religious churches, as well as educational models developed by tribal entities following passage of the Indian Self-Determination and Education Assistance Act of 1975. Same as EPOL 404. 3 undergraduate hours. 4 graduate hours.

AIS 490 Adv Topics in Am Ind Studies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/AIS/490/)
3 undergraduate hours. 4 graduate hours. May be repeated to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Any course in American Indian Studies; junior standing; or consent of instructor.

AIS 491 Readings in Am Ind Studies credit: 1 to 8 Hours. (https://courses.illinois.edu/schedule/terms/AIS/491/)
Individual guidance in intensive readings in the theories and practices of the field of American Indian Studies. 1 to 8 undergraduate hours. 1 to 8 graduate hours. May be repeated in the same or subsequent terms to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: Graduate standing or one course in AIS and consent of instructor.

AIS 501 Indigenous Critical Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AIS/501/)
Explores the distinctive form of inquiry which critiques settler-colonial ideas and institutions at the interdisciplinary crossroads where American Indian and Indigenous Studies engages other theories including but not limited to feminist theory, critical race theory, semiotics and phenomenology, psychoanalysis, and the postcolonial theory (to name only some of the many possibilities). Prerequisite: Graduate standing or consent of the instructor.

AIS 502 Indigenous Decolonial Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AIS/502/)
Introduction for graduate students to key critical scholars and prevailing and emerging models in research methods that seek ethical knowledge production in American Indian and/or Indigenous Studies, including ethnography, archival research, interviews, and translation (to name only some of the myriad options). Focus is on assisting students to initiate, develop, clarify, and justify the research methods they adopt and practice to reach their research goals. Prerequisite: AIS 501 or consent of the instructor.

AIS 503 Seminar in Indigenous Studies credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AIS/503/)
Research and writing seminar that offers special topics based on current research questions and concerns in American Indian and indigenous Studies and opportunities for graduate students who have made considerable progress in defining a research project to advance the research and writing to the next stage (e.g., to include as a thesis or dissertation chapter or for publication). Topics vary. May be repeated as topic varies in subsequent semesters to a maximum of 8 hours. Prerequisite: AIS 501 and AIS 502, or consent of the instructor.

AIS 590 Am Indian Studies Grad Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/AIS/590/)
May be repeated up to a maximum of 8 hours. Prerequisite: Graduate standing or consent of instructor.

AIS 591 Problems in Indigenous Studies credit: 1 to 8 Hours. (https://courses.illinois.edu/schedule/terms/AIS/591/)
Offers flexible, rigorous, and wide-ranging opportunities for interdisciplinary graduate-level work in Indigenous (including American Indians) Studies; thus, depending on student needs and instructor interests, the course may be negotiated as a directed reading, directed research, supervised fieldwork, supervised teaching, project, or thesis supervision. May be repeated in the same or subsequent semesters to a maximum of 8 hours. Prerequisite: Consent of instructor.

ALEC - Agricultural Leadership, Education, & Communications Program

ALEC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ALEC/)

Courses

ALEC 110 Introduction to Agricultural Leadership, Education and Communications credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/110/)
Provides an introduction to basic leadership, communications, and educational theory. Covers the practical application of theories in professional, educational, and community contexts. Designed as the foundational course underlying the ALEC undergraduate curriculum. No credit given if already completed AGCM 110 or AGED 100.

ALEC 115 Let's Talk about Food, Agriculture, and the Environment credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/115/)
[IAI Code: C2900] Food, agriculture, and the environment are shaped by communications. Students investigate a wide variety of current topics and controversies and how to educate, evaluate, and persuade on these issues. The course emphasizes the foundations of public speaking, with emphasis on organizing, researching, crafting, and presenting material. Students deliver five speeches throughout the semester and regularly analyze and evaluate speeches and other mediated messages about food, agriculture, and the environment. Credit is not given toward graduation for: Credit is not given toward graduation for ALEC 115 and CMN 101 or CMN 111/112.

ALEC 123 ALEC Orientation to Illinois credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ALEC/123/)
Introductory course for students in the ALEC program. Students will enhance their understanding of skills and practices to aid in learning, explore the academic environment at Illinois, and build community inside and outside of the classroom. Prerequisite: Restricted to students in the ALEC Program.

ALEC 293 Communications Internship credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/293/)
Supervised experience in a field directly pertaining to agricultural leadership, education, or communications. Approved for S/U grading only. May be repeated up to 12 hours, if topics vary. Credit is not given for more than a total of 12 hours of Independent Study (IND) courses applying to a degree in ACES. Prerequisite: ALEC Program approval required.

ALEC 294 Research Internship credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/294/)
Supervised, on-campus, learning experience with faculty engaged in research. Approved for S/U grading only. May be repeated up to 12 hours, if topics vary. Credit is not given for more than a total of 12 hours of Independent Study (IND) courses applying to a degree in ACES. Prerequisite: Sophomore standing.

ALEC 295 Independent Study or Research credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/295/)
Individual research, special problems, thesis, development and/or design work under the supervision of an appropriate member of the faculty. May be repeated up to 12 hours, if topics vary. Credit is not given for more than a total of 12 hours of Independent Study (IND) courses applying to a degree in ACES. Prerequisite: ALEC Program and instructor approval required.

ALEC 393 Internship in Agricultural Leadership, Education and Communications credit: 3 or 6 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/393/)
Provides an opportunity to apply principles and theories related to Agricultural Leadership, Education & Communications within the field through meaningful work experiences. Upon completion of the internship experience, the student will be able to incorporate principles and theories from classroom knowledge to real-life work situations that benefit the supporting organization both qualitatively and quantitatively while enhancing the problem-solving abilities of the student. Approved for S/U grading only. May be repeated up to 6 hours in separate terms. Prerequisite: ALEC 110. Restricted to majors only.

ALEC 396 Honors Research or Thesis credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/396/)
Individual research, special problems, thesis, development and/or design work under the direction of the Honors advisor. May be repeated for up to 6 hours in separate terms. Credit is not given for more than a total of 12 hours of Independent Study (IND) courses applying to a degree in ACES. Prerequisite: Junior standing, admission to the ACES Honors Program.

ALEC 398 Undergraduate Seminar credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/398/)
Same as AGCM 398. See AGCM 398.

ALEC 451 Professional Development in ALEC credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/451/)
The purpose of this course is to serve as a professional capstone to the ALEC curriculum. Students will examine their learning over the course of their academic experience and synthesize key components for practical purposes. The main point of the class is to help provide students with practical tools for their professional success. Students will be expected to perform at the highest levels of Bloom's Taxonomy – synthesize, evaluate, and create. 2 undergraduate hours. 2 graduate hours. Prerequisite: Restricted to students with senior standing.

ALEC 490 Foundations of Adult Training and Development credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ALEC/490/)
Covers theory and practice of adult learning applied specifically for training and development contexts within the broad food, agricultural, natural resources, and environmental (FANRE) employment sectors. This course includes theories and concepts related to education, learning, training, and development – and how each are related yet separate from the others. The course covers core adult learning principles applied across professional educational and training environments, and concepts to support "deep learning" and personal transformation in professional settings. Structurally, this course will progress through asynchronous consumption of course content Students will be required to complete a set of readings and watch a set of videos that explain theories and concepts. 1 undergraduate hour. 1 graduate hour. Credit not given towards graduation if AGED 490 credit already earned.

ALEC 491 Getting 110% Effort - Principles of Adult Motivation credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ALEC/491/)
Covers theory and practice of adult motivation designed for optimizing learning specifically for training and development contexts within the broad food, agricultural, natural resources, and environmental (FANRE) employment sectors. This course includes theories and concepts fundamental to understanding: what motivation is, factors that affect human motivation, and how to effectively apply motivational principles within rigorous training and education sessions. This course also explores the roles of emotion, culture, and human socialization principles applied to motivational contexts. 1 undergraduate hour. 1 graduate hour. Credit not given towards graduation if credit already given for AGED 490. Prerequisite: ALEC 490.

ALEC 492 Digitizing Development - Teaching and Training Online credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ALEC/492/)
Online teaching and training has become prevalent throughout the professional world of work and postsecondary education. This class examines what is similar and different about online training compared to in-person experiences, as well as between synchronous and asynchronous learning. It will focus on applying andrologogical (adult learning) principles to online contexts, and examine how to optimize engagement among consumers of online training content. It also examines the "digital divide" and covers how to optimize support for learners who are less comfortable or experienced with technology involved in online learning. 1 undergraduate hour. 1 graduate hour. Credit not given towards graduation if credit already given for AGED 490. Prerequisite: ALEC 490.

ALEC 494 Independent Research or Teaching credit: 0 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/494/)
Supervised, on-campus, independent learning experience with faculty mentor engaged in research or teaching activities. 0 TO 4 undergraduate hours. No graduate credit. May be repeated in separate terms up to 12 hours. Prior approval from course instructor required.

ALEC 499 Seminar credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/499/)
Special topics in agricultural leadership, education or communications. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated, if topics vary. Prerequisite: ALEC Program approval required.

ALEC 500 Foundations of Agricultural Leadership, Education and Communications credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/500/)
Comparative examination of the foundations of knowledge formation in agricultural leadership, education and communication, including extension education. Apply leadership, education and communication principles to trends and developments in food, fiber, agricultural and environmental systems. Examine approaches to teaching and learning throughout the careers associated with agricultural leadership, education and communications.

ALEC 505 Science and Art of Teaching and Learning credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/505/)
Students will investigate theoretical principles of education and learning; evaluate the roles of emotion and motivation and their impacts on the acquisition and retention of knowledge; and explore psychological and physiological variables that impact learning. Additional topics to examine include: metacognition, fixed and growth mindset, approaches to learning, and specific teaching and learning techniques that predict learner success. Prerequisite: Restricted to Graduate students.

ALEC 510 Program Planning, Implementation and Evaluation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/510/)
Compare and contrast theory and practice of educational program planning, delivery and evaluation for youth and adult audiences in community settings. Incorporate the principles of community needs assessment, logic model development, program implementation and program evaluation into agriculture-related programs. Credit not given towards graduation for ALEC 410 and ALEC 510.

ALEC 540 Volunteer Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/540/)
Theory and practice of volunteer management including: volunteer demographics; recruitment; selection; orientation; training and development; retention; supervision; motivation; evaluation; legal issues; and rick management. Students will develop a comprehensive volunteer management strategy based on using volunteers in non-profit organizations. Prerequisite: Restricted to graduate students only.

ALEC 545 Research Methods and Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/545/)
Provides foundations for quantitative and qualitative research methodologies and design principles for investigating problems in social and behavioral sciences. Focuses on language of research and evaluation, purposes, validity threats, data collection methods, and critical evaluation of current literature. Prerequisite: ALEC 505.

ALEC 549 Independent Study credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/549/)
Individual investigation and reporting of research on any phase of agricultural leadership, education or communications selected by the student and approved by the advisor and faculty member who will supervise the study. May be repeated in the same or subsequent terms to a maximum of 8 hours.

ALEC 595 Capstone Curriculum Project credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/595/)
Consists of a curriculum development capstone project that includes a needs assessment, literature review, logic model, proposed budget, program evaluations, and instructional manuals for the facilitator(s) and learner(s). Students will plan and design educational program curriculum for adult, high school or youth learners appropriate for either formal classroom or informal developmental settings. Approved for Letter and S/U grading. Course Information: Prerequisite: ALEC 410 and ALEC 545. Restricted to graduate students only.

ALEC 599 Thesis Research credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/ALEC/599/)
Individual research in the various areas of agricultural leadership, education, or communications under the supervision of faculty members. Approved for S/U grading only. May be repeated in separate terms. Prerequisite: ALEC Program approval required.

ANSC - Animal Sciences

ANSC Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ANSC/)

Courses

ANSC 100 Intro to Animal Sciences credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/100/)
[IAI Code: AG902] Survey of beef and dairy cattle, companion animals, horses, poultry, sheep, and swine. Includes the importance of product technology and the basic principles of nutrition, genetics, physiology, and behavior as they apply to breeding, selection, feeding, and management. Lecture and lab.

ANSC 101 Contemporary Animal Issues credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/101/)
Provides an understanding of fundamental issues impacting the care and use of animals, and their role in human welfare. Topics addressed include the fundamental principles of animal domestication and its impact on humans, animal welfare and care, animal-environmental interactions, food safety, diet and health issues, economic and societal issues facing the world today, and bioethical issues.

ANSC 103 Working With Farm Animals credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/103/)
Introductory course that will provide novice students with the fundamentals of animal-animal and animal-human interactions for domestic farm animals. Emphasizes hands-on experiences to develop a background in the concepts and practice of recognizing and understanding the animal's physiology and behavior, animal well being, and animal responses to human interactions. Prerequisite: ANSC 100. Restricted to students in the Animal Sciences department. Not intended for First Time Freshman students.

ANSC 110 Animal Exploration: A Global Perspective credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/110/)
Course explores the biological, cultural, ecological, historical, political, scientific and social aspects of animals and their impact on global agriculture, medicine and industry. The curriculum also addresses biological concepts, animal research, diseases, vaccinations, and a diverse range of species including amphibians, aquatic organisms, companion animals, livestock, primates, reptiles and safari animals. The course intends to cultivate critical thinking, ethical reasoning, scientific literacy, and an understanding of the important interconnection between humans and animals. Credit is not given toward graduation for: Animal Science majors. Prerequisite: Not intended for Animal Science majors.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Life Sciences

ANSC 120 The Art and Ethics of Animal Documentaries credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/120/)
With the rise of both social media and documentary films, animal welfare is mainly viewed through the lens of media. This course asks students to critically evaluate information from these pieces of media and better understand the narratives and biases that can be inherent in documentaries, nature films, undercover animal rights investigations, and social media accounts. We will also explore how these media can be used to bring awareness and education about animal industries.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

ANSC 198 Building Habits for Success in Animal Sciences credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/198/)
This introductory course for students in the Department of Animal Sciences is designed to help improve student achievement in the college classroom by building study habits, improving time management, building community inside and outside the classroom, and overall understanding and exploring the resources and academic environment at the University of Illinois.

ANSC 199 Undergraduate Open Seminar credit: 0 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/199/)
An experimental course on a special topic in animal sciences. Approved for Letter and S/U grading. May be repeated, if topics vary.

ANSC 201 Principles of Dairy Production credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/201/)
Surveys the dairy industry; examines principles of breeding, selection, reproduction, feeding, milking and management of dairy cattle. Prerequisite: ANSC 100.

ANSC 205 World Animal Resources credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/205/)
Examination of the world's animals, domesticated and wild, and their uses in various climatic, economic and cultural contexts. Exploration of their contemporary management and their future prospects. Provides background for international experiences, such as ACES 298 and ACES 299. Prerequisite: Completion of the campus Composition I general education requirement.
This course satisfies the General Education Criteria for:
Advanced Composition

ANSC 206 Horse Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/206/)
Focus on the principles of managing horses from birth through breeding; topics include reproductive physiology, breeding management, nutrition, diseases, parasites, herd health programs, genetics, facility design and exercise physiology.

ANSC 207 The Science of Pets and How to Care for Them credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/207/)
Provides students with the knowledge and skills necessary to care for animal species commonly kept as pets. Biological concepts of anatomy, genetics, evolution, nutrition, reproduction, and behavior will provide valuable insight into companion animal husbandry practices for dogs, cats, small mammals, birds, fish, reptiles, and amphibians. Credit is not given for both ANSC 207 and ANSC 307.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Life Sciences

ANSC 210 Grilling and BBQ Science credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/210/)
This course will focus on food preparation and safety, product quality, correct cooking methods, endpoint temperatures, and other general grilling-related topics. The objective is to expand student knowledge on how to utilize different cuts of meat and other products to produce meals. Students will work in groups to prepare a dish with a specific product assigned to them and present their results to the class. Grills and cooking equipment will be provided. Additional fees may apply. See Class Schedule.

ANSC 211 Meat Animal Evaluation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/211/)
This course provides training in the evaluation of market animals and carcasses for value, price, and performance ranking. Students will develop skills in assessing beef, pork, and lamb for key industry traits such as trimness, muscling, and quality. Instruction emphasizes both live animal and carcass evaluation, with applications to real-world marketing and decision-making scenarios. Field trips to farms, processing plants, and meat evaluation competitions are required, offering hands-on experience with current industry standards and practices. Instructor approval is required to enroll in the course.

ANSC 215 Introduction to Animal Evaluation credit: 1 or 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/215/)
The objective of each section is to train students on industry evaluation techniques of animals and/or their by-products. Additionally, students will examine different industry production styles, selection for improvements, and end product marketability. This course is divided into sections that focus on evaluation of animals or animal by-products (meat or dairy) and will develop skills of basic evaluation associated with each section. Travel to production facilities may occur based on the section. For Animal Science majors, only one instance (2 credit hours) taken in this course will count as an Applied Science credit towards their degree requirements. May be repeated in separate semesters, if topics vary to a maximum of 6 credit hours.

ANSC 221 Cells, Metabolism and Genetics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/221/)
Provides an introductory background in basic aspects of cell biology, physiology, and genetics. Topics addressed include cell structure, cell organelles, and different types of cells, protein synthesis and gene expression, chromosome structure, basic mechanisms of chromosome replication, basic principles of quantitative and population genetics, and an introduction to genomics and proteomics. Prerequisite: ANSC 100, CHEM 102 and 103 or concurrent enrollment.

ANSC 222 Anatomy and Physiology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/222/)
Provides an introductory background in basic and fundamental principles of animal anatomy and physiology. The major organ systems (muscle, skeletal, neural, endocrine, cardiovascular, respiratory, and renal) will be presented with an emphasis on comparative anatomy, integrated function, and specific homeostatic mechanisms. Prerequisite: ANSC 100, CHEM 102 and 103 or concurrent enrollment.

ANSC 223 Animal Nutrition credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/223/)
Provides an introductory background in the fundamental principles of animal nutrition and how nutrition impacts animal well-being and performance. Students will develop comprehensive knowledge in gastrointestinal and digestive anatomy and physiology, nutrient function and requirements, and energy utilization in various species. Specific topics include different classes and properties of nutrients, differences in digestive mechanisms in monogastric vs. ruminant animals, and how carbohydrates, lipids, proteins, minerals, and vitamins contribute to the nutrient requirements of animals. Prerequisite: ANSC 100 and ANSC 221.

ANSC 224 Animal Reproduction and Growth credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/224/)
Study of the basic principles of reproduction, lactation, growth, and hormonal regulation in animals as well as humans, including cell growth and differentiation, processes of reproduction, biotechnological methods of reproductive control, manipulation, performance enhancement of lactation and growth. Prerequisite: ANSC 100, ANSC 221.

ANSC 250 Companion Animals in Society credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/250/)
Explores the current and historical functions and influences of companion animals in American society. Topics include the evolution of animal protection, the use of assistance and service animals, and the growth of the pet supply industry. Controversial issues which are of current concern to society will also be examined.
This course satisfies the General Education Criteria for:
Cultural Studies - Western

ANSC 251 Epidemics and Infectious Diseases credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/251/)
Introduces students to the major past and present causes of plague in humans as well as agricultural and companion animals. Smallpox, yellow fever, bubonic plague, polio, SARS, AIDS, West Nile encephalitis, Zika, PRRS, PEDV, foot and mouth disease, bovine spongiform encephalopathy, and others will be discussed. The characteristics of each disease, including, mode of transmission, symptoms, duration of illness, and mortality rates will be presented. History and probability of recurrence will also be explored. Prerequisite: Some knowledge in anatomy and physiology may be helpful.

ANSC 255 Animal Ethics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/255/)
Explores ethical issues raised by human use of animals. Students will be asked to apply philosophical perspectives to historical and current animal issues such as raising animals for food production, the keeping of pets, management and use of wild animals, use of animals in research, animal breeding and biotechnology, and animal control.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

ANSC 256 Horse's Role in Human History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/256/)
Provides an understanding of the crucial roles that horses have played in the development and expansion of human civilization, including how the role of the horse in culture and society has changed throughout history. Topics addressed include an understanding of the evolution and domestication of horses, use of horses for transportation, sport, warfare and power, and the impact of horses on societal issues facing the world today.

ANSC 298 Animal Science Careers and Professional Development credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ANSC/298/)
Designed to help students prepare for and investigate different career options in Animal Sciences. Professional development opportunities like undergraduate research, internships, and study abroad will be discussed. Prerequisite: Sophomore standing.

ANSC 301 Food Animal Production, Management, and Evaluation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/301/)
Provides an overview of how nutrition, genetics, and environment affect beef cattle, swine, and sheep growth, development, and end-product quality and value. Students get hands-on experience evaluating and determining value of live animals and carcasses. Prerequisite: Credit or concurrent enrollment in ANSC 223 and ANSC 224; or consent of instructor.

ANSC 305 Human Animal Interactions credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/305/)
Animals play a significant role in our society and in the lives of many individuals. This course explores the current and historical interactions of humans with non-human animals in our society from a multidisciplinary approach. Various cultures and historical periods will be examined when discussing these relationships with various non-human animals.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ANSC 306 Equine Science credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/306/)
Understand and apply current scientific research and principles of equine science to intensive horse production. An in-depth approach to equine reproductive physiology, nutrition, anatomy and exercise physiology will be followed using a combined lecture and laboratory format. Emphasis on current research and hands-on techniques. Prerequisite: ANSC 222 or equivalent, and credit or concurrent enrollment in ANSC 224 or equivalent.

ANSC 307 Companion Animal Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/307/)
Provides an advanced overview of companion animal biology through consideration of the physical structure, nutrition, behavior, and reproduction of animal species most commonly kept as companions. Course content is applied to discussion of best management practices and basic preventive health care. Course content is largely focused on cats and dogs, although other mammals, birds and reptiles are briefly considered. Legal and economic issues, ethical considerations, and career opportunities associated with companion animals are also incorporated into course discussion. Credit is not given for both ANSC 307 and ANSC 207. Prerequisite: ANSC 221, ANSC 222, ANSC 223, ANSC 224 or consent of instructor.

ANSC 309 Meat Production and Marketing credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/309/)
General approach to meat utilization with emphasis on selecting, grading, cutting, and pricing meat for the retail, restaurant, and food service industry. This course includes laboratory and may use field trips to establishments to highlight course concepts.

ANSC 310 Meat Selection and Grading credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/310/)
Study characteristics associated with the value of carcasses, primal and retail cuts from meat animals; emphasize USDA grading and specifications as well as written communication. Field trips to meat packing plants are required. Prerequisite: ANSC 215, Section A.

ANSC 312 Advanced Livestock Evaluation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/312/)
Advanced instruction in the selection of breeding animals of beef, sheep, and swine species and in the evaluation of market animals for slaughter. This course requires visits to farms, related companies, and events to observe the latest techniques and scientific principles associated with livestock selection and evaluation. Prerequisite: ANSC 211 or consent of instructor.

ANSC 313 Horse Appraisal credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/313/)
Advanced course for students interested in improving their performance and conformation evaluation skills; provides exposure to the horse show industry and the career opportunities associated with this facet of the horse industry.

ANSC 314 Adv Dairy Cattle Evaluation credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/314/)
Advanced instruction in the selection of breeding dairy animals. Involves visits to farms, related companies and events to observe the latest techniques and scientific principles associated with dairy cattle selection and evaluation. Field trips for cattle judging are required. Prerequisite: ANSC 204 or ANSC 215 or consent of instructor.

ANSC 322 Livestock Feeds and Feeding credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/322/)
Livestock feeds and practical feeding applications for livestock will be addressed. Feed identification and ration formulation will be strongly emphasized. One session of this class will take place at the UIUC Feed Mill. Prerequisite: ANSC 223.

ANSC 350 Principles of Biochemistry in Animals credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/350/)
Comprehensive study of biomolecule structure/function and the metabolism of carbohydrates, lipids, proteins, nucleic acids, vitamins, and coenzymes, with emphasis on energy transformations and metabolic regulation in animals. Prerequisite: CHEM 232 or CHEM 236, or equivalent.

ANSC 363 Behavior of Domestic Animals credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/363/)
Introduction to concepts of animal behavior with emphasis on domestic animals; lecture and discussion. Prerequisite: ANSC 100.

ANSC 366 Animal Behavior credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/366/)
Same as ANTH 342, IB 329, and PSYC 329. See IB 329.

ANSC 370 Companion Animal Policy credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/370/)
This course provides an overview of public policy with respect to the use and treatment of companion animals in the United States. Current and alternative policies are considered in terms of their effectiveness in improving or otherwise altering the treatment of companion animals. The influences of animal protection organizations, consumer groups, politicians, the scientific community, and other stakeholders on the development and enforcement of policies are examined in detail. Prerequisite: ANSC 250.

ANSC 398 UG Experiential Learning credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/398/)
Student-directed experiential learning on special topics directly pertaining to subject matter in animal sciences. Students are required to complete a Memorandum of Agreement prior to enrolling in this course. Additional fees may apply. See Class Schedule. Approved for Letter and S/U grading. May be repeated up to 5 hours per semester, up to a maximum of 12 total hours. Independent Study courses are limited to 12 hours total applying to a degree in ACES.

ANSC 399 Undergraduate Special Topics credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/399/)
Exploration of specialized topics in Animal Sciences not covered in existing courses. Designed for advanced undergraduates seeking deeper engagement in emerging or experimental subject areas. May be repeated in the same term to a maximum of 6 hours if topics vary. May be repeated in separate terms to a maximum of 12 hours if topics vary.

ANSC 400 Dairy Herd Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/400/)
The technology of modern milk production practices; application of principles in nutrition, physiology, economics, health and hygiene, waste management, and facilities design for efficient dairy herd management systems. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 201 or consent of instructor.

ANSC 401 Beef Production credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/401/)
The principles of the management of beef cattle enterprises. Applies science and technology to the breeding, selection, feeding, health and production of beef and beef products. Emphasizes the use of research findings in decision-making. 3 undergraduate hours. 3 graduate hours. Credit is not given for both ANSC 401 and ANSC 213. Prerequisite: ANSC 223 or equivalent.

ANSC 402 Sheep and Goat Production credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/402/)
The objective of this course is to understand the core principles of sheep and goat production. This course covers topics including common breeds, reproduction, breeding and selection, nutrition, health, fiber production, and management. Some lectures will be at the University farms. Other lectures will include demonstrations of sheep and goats evaluation principles, neonatal lamb and kid health, body condition scoring, and lamb and goat cooking. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 223 or equivalent.

ANSC 403 Pork Production credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/403/)
Applies science and technology to the selection, breeding, feeding, housing and management of swine in a production enterprise; emphasizes use of research findings in decision making. 3 undergraduate hours. No graduate credit. Prerequisite: ANSC 223, ANSC 224, ANSC 431 or equivalents or consent of instructor.

ANSC 404 Poultry Science credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/404/)
Basic principles of genetics, physiology, nutrition, and health of avian species; the application of science and technology in solving the breeding, nutrition, disease, housing, and other management problems encountered in commercial egg and poultry meat production. 3 undergraduate hours. 3 graduate hours.

ANSC 406 Zoo Animal Conservation Sci credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/406/)
Topics related to the conservation, physiology and management of exotic animal species in a captive setting will be addressed. These include conservation biology, population genetics, nutrition, reproduction (natural and assisted), behavior, exhibitry, environmental enrichment and veterinary care. Also covers taxonomy, zoo research, the role of zoos in conservations, and the ethics of maintaining captive animals. 3 undergraduate hours. 3 graduate hours. One Saturday field trip may be required. Prerequisite: ANSC 221 or IB 104, or equivalent.

ANSC 407 Animal Shelter Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/407/)
Basic management concepts related to maintaining the physical and behavioral health of companion animals in a shelter setting will be addressed. Population dynamics and management will be heavily emphasized. Utilizes practical resources available through local and national animal welfare organizations. Two class sessions will take place at the Champaign County Humane Society. One Saturday field trip is required. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 207 or ANSC 307.

ANSC 409 Meat Science credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/409/)
Fundamental biological principles that influence composition, processing, preservation, and quality of meat and meat products. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 221, IB 100, or equivalent, and CHEM 102.

ANSC 420 Ruminant Nutrition credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/420/)
Physiology and microbiology of digestion in the ruminant, and biochemical pathways of utilization of the absorbed nutrients for productive purposes. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 223 or equivalent.

ANSC 421 Minerals and Vitamins credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/421/)
Nutritional implications and metabolic roles of minerals and vitamins in animal metabolism. The course is designed to instill a basic understanding of vitamin and mineral functions, absorption, metabolism, and excretion. Research methodologies used in the study of vitamin and mineral nutrition will also be discussed. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 223 or equivalent, credit or concurrent registration in MCB 450 or ANSC 350, or consent of instructor.

ANSC 422 Companion Animal Nutrition credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/422/)
Digestive physiology and basic nutritional considerations of companion animals, with primary focus on dogs and cats. Topics discussed include nutritional idiosyncrasies of dogs and cats, the importance of nutrition in various physiological states, and nutrient needs during disease. Information on pet food regulations, common ingredients and formulation, manufacturing methods, and trends in the pet food industry will also be covered. Same as NUTR 422. 4 undergraduate hours. 4 graduate hours. Prerequisite: ANSC 223 or equivalent.

ANSC 424 Pet Food & Feed Manufacturing credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/424/)
Integrates principles of animal nutrition with various aspects pertaining to pet food and animal feed manufacturing. Topics discussed in this course include processing technologies (e.g., extrusion, retorting, baking) involved in the manufacturing of pet foods and animal feeds, principles of diet formulation and nutritional guidelines, and an overview of regulatory affairs, quality control, and good manufacturing practices. This course includes two field trips to a pet food manufacturing facility and a food and feed ingredient company. Same as NUTR 424. 3 undergraduate hours. 3 graduate hours. Prerequisite: Required - ANSC 223; Recommended - ANSC 322 and ANSC 422.

ANSC 431 Advanced Reproductive Biology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/431/)
Course is an upper-level undergraduate or entry-level graduate course dealing with reproductive biology. It will include the study of basic cell biology of reproduction, lactation, growth and hormone regulation of domestic and non-domestic animals as well as humans, including biotechnology methods of reproduction control, manipulation, performance enhancement of lactation and growth, and disease control. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 224 or equivalent.

ANSC 435 Milk Quality and Udder Health credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/435/)
An advanced course on the physiological basis of mammary growth, milk secretion, and udder health. Topics covered includes mammary gland anatomy, hormonal control, causes and control of mastitis, milk harvesting, and milk quality. 2 undergraduate hours. 2 graduate hours. Prerequisite: ANSC 221 or a comparable Genetics course.

ANSC 438 Lactation Biology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/438/)
Examines the structural and functional development of the mammary gland, cell biology, and control of milk synthesis, and composition and biochemistry of milk. Compares and analyzes the physiological processes of lactation in mammals. 4 undergraduate hours. 4 graduate hours. Prerequisite: ANSC 224 or equivalent.

ANSC 440 Applied Statistical Methods I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/440/)
Same as CPSC 440, FSHN 440, NRES 440, and NUTR 440. See CPSC 440.

ANSC 441 Human Genetics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/441/)
Same as ANTH 441. See ANTH 441.

ANSC 442 Introduction to Data Analytics credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/442/)
Introduces students to standard approaches commonly used to analyze science and engineering data; to the strengths and limitations of the approaches; and to gain confidence in the interpretation of results. At the end of this course, students will be able to analyze a wide range of datasets using appropriate models, and draw robust conclusions. 2 undergraduate hours. 2 graduate hours. Credit is not given for ANSC 442 and ANSC 445.

ANSC 444 Applied Animal Genetics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/444/)
Principles of heredity and their application to the problems of animal improvement. 3 undergraduate hours. 3 graduate hours.

ANSC 445 Statistical Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/445/)
Design and analysis of experiments: multiple regression, method of fitting constants, factorial experiments with unequal subclass numbers, analysis of covariance, experimental design; computer applications to agricultural experiments using statistical packages. Same as ABE 445 and NRES 445. 4 undergraduate hours. 4 graduate hours. Prerequisite: CPSC 440, or equivalent.

ANSC 446 Population Genetics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/446/)
Conceptual and mathematical approach to the genetics of populations: estimation of allele and genotype frequencies; Hardy-Weinberg principle; measures of genetic diversity and distance; selection; non-random mating; genetic drift; mutation; neutral theory; migration and population subdivision; linkage and recombination; coalescence and phylogenetic inference. Applications to animals, plants, human health and wildlife conservation. Same as IB 416. 3 or 4 undergraduate hours. 3 or 4 graduate hours. Students desiring 4 hours credit do additional work in some area of population genetics. Prerequisite: An introductory genetics course (ANSC 221 or IB 204); one of MATH 220, MATH 221, or MATH 234; or consent of instructor.

ANSC 449 Biological Modeling credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/449/)
Same as CPSC 448, GGIS 468, and IB 491. See GGIS 468.

ANSC 450 Comparative Immunobiology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/450/)
Advanced concepts of immunophysiology and immunogenetics. Immunophysiology with an emphasis on immune-neuroendocrine interactions. The molecular and cellular basis of self-nonself recognition with an emphasis on the major histocompatibility complex in vertebrates and innate immunity in both vertebrates and invertebrates. The mucosal immune system, which requires a complex interplay between innate and acquired immunity to protect mucosal surfaces exposed to the environment. A working knowledge of genetics and cellular and molecular biology is recommended. Same as MCB 442 and PATH 410. 4 undergraduate hours. 4 graduate hours.

ANSC 451 Microbes and the Anim Indust credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/451/)
Fundamental aspects of the ecology of microorganisms and their biochemical activities related to the degradation of organic matter with emphasis on the gastrointestinal tract of production animals. 3 undergraduate hours. 3 graduate hours. Prerequisite: MCB 100, and ANSC 350, MCB 300, MCB 424, or equivalent.

ANSC 452 Animal Growth and Development credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/452/)
Basic principles of animal growth from early fetal development through typical marketing ages for the major domestic animal species. Topics discussed include molecular and cellular determinants of tissue development and whole animal growth, with coverage of current and future technologies for manipulating growth to enhance animal production. 3 or 4 undergraduate hours. 4 graduate hours. Prerequisite: ANSC 221, ANSC 222, ANSC 223, and ANSC 224.

ANSC 454 Neuroimmunology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/454/)
Provides current information about the fundamental structures and functions of the 'neuroimmune' system. Later sessions address applied and contemporary neuroimmunology through research-focused lectures paired with 'journal club-style' discussions of recent, transformative publications. A working knowledge of basic immunology, anatomy, physiology, and cell and molecular biology is recommended. Same as NEUR 454. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 221, ANSC 222, ANSC 450 or equivalents.

ANSC 464 Physiology of Animal Stress & Disease credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/464/)
Advanced interdisciplinary concepts of animal physiology and behavior during stress and disease. Lectures and discussions will cover multi-system interactions regulating immune, microbial, endocrine, and behavioral responses to external stressors, pathogen infection, and idiopathic disease. Topics include: neuroendocrine regulation of immunophysiology and behavior, pathogenic and behavioral response to disease, bidirectional communication between the microbiome and central nervous system, developmental disruptions during gestation, cancer biology, and metabolic diseases. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 221 or equivalent, and ANSC 222 or equivalent; or consent of instructor.

ANSC 467 Applied Animal Ecology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/467/)
An in-depth multidisciplinary approach (physiology, behavior, immunology, neuroscience) to understanding animal-environment interactions (including thermal, air, microbic, photic and behavioral factors) as basis for prescribing practical environments for keeping animals. Courses in physiology, biology, nutrition, microbiology, and genetics are recommended. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANSC 221 or equivalent, ANSC 222 or equivalent, and ANSC 223 or equivalent; or consent of instructor.

ANSC 470 Companion Animal Cruelty Investigations credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/470/)
Animal cruelty is an unfortunate reality across the country and around the world. Proper investigation and prosecution of these cases is crucial to the prevention of these acts in the future. This course will teach the concepts and processes of animal cruelty investigations and prosecution, largely focusing on companion animals. 2 undergraduate hours. 2 graduate hours. Prerequisite: ANSC 250 and ANSC 407.

ANSC 471 ANSC Leaders & Entrepreneurs credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/471/)
Designed to familiarize students with the tools and skills necessary for successful business operation in industry and entrepreneurial environments including food animal production farms. The overall aim is to explore how enhanced interpersonal and leadership skills facilitate positive relations in business. Students will design a business plan, an entrepreneurial enterprise, that will be read by an external committee of professors, community members, and business owners and evaluated for its viability and creativity. This course is relevant for leaders as well as future entrepreneurs interested in acquiring valuable skills that may be applied to many careers. 3 undergraduate hours. 3 graduate hours. Prerequisites: Any advanced composition course.

ANSC 480 Introduction to Coding and Precision Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/480/)
Overview of agricultural systems' problems and application of different tools and sensors on problem-solving and efficient systems' design. The course will introduce coding and precision technologies through a hands-on approach. 3 undergraduate hours. 3 graduate hours. Credit is not given toward graduation for ANSC 360 and ANSC 480. Prerequisite: Three years of high school mathematics, or MATH 112, or consent of instructor.

ANSC 498 Integrating Animal Sciences credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/498/)
Introduction to the theoretical basis of and skills associated with leadership, inquiry, and collaborative learning. Capstone experience in integrating knowledge, practicing skills, and applying theory through collaborative projects that address current issues in animal sciences. Projects relate to the impact of animals and animal use on humans and societal issues facing the world today. 2 undergraduate hours. No graduate credit. Prerequisite: ANSC 298. Restricted to Animal Sciences major(s). Restricted to students with Senior class standing.

ANSC 499 Seminar credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/499/)
Group discussion or an experimental course on a special topic in animal sciences. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated if topics vary.

ANSC 500 Feeds in Dairy Nutrition and Diet Formulation credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/500/)
Students will examine the fundamentals of dairy cattle nutrition, identify common feedstuffs, and describe the basics of forage growth, harvest, insulation, and storage. Energy, carbohydrates, lipids, protein, amino acids, additives, forages, young stock, and transition cow feeding will be discussed. Students will explore common feed processing techniques, formulate diets for young and mature (lactating and non-lactating) dairy animals, and investigate the newest research insights for on-farm applications and evolving trends in dairy feeds and nutrition. Prerequisite: Restricted to Animal Sciences, MANSC, the Dairy Nutrition for Udder Success CERT, and the Livestock Systems Health, MVS. Non-degree graduate students are eligible to enroll in the course.

ANSC 501 Nutritional Impact on Cow Health and Disorders credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/501/)
Explore the holistic impact of nutrition on dairy cattle health and metabolic disorder, and analyze nutrition's role in alleviating stressors. Instructors will discuss profound effects of nutrition on production, physiology, and the immune system. The course includes self-paced learning, case studies, practical insights on dairy nutrition, application of artificial intelligence (e.g., machine learning) for predicting feed intake, and collaborative discussions to address complex issues. Students can also bring and work on their own datasets. Prerequisite: Restricted to Animal Sciences, MANSC, the Dairy Nutrition for Udder Success CERT, and the Livestock Systems Health, MVS. Non-degree graduate students are eligible to enroll in the course.

ANSC 502 What is Milk and Milk Quality credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/502/)
Explore the composition and synthesis of milk, maternal adaptations supporting milk production, and the impact of cow's milk on human nutrition. Students will examine the digestion of dairy products, health disorders (e.g., lactose intolerance), and milk quality. The course includes self-paced learning, current research, on-farm applications, and interactive discussions. Instructors and guest experts will present case studies, share hands-on experience in milk quality and economics, and discuss the economic relevance of milk quality. Prerequisite: Restricted to Animal Sciences, MANSC, the Dairy Nutrition for Udder Success CERT, and the Livestock Systems Health, MVS. Non-degree graduate students are eligible to enroll in the course.

ANSC 515 Bovine Assisted Reproductive Technologies credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/515/)
Acquire knowledge on reproductive technologies and techniques utilized in Bovidae including Bos taurus and Bos indicus cattle. Topics include general bovine reproductive anatomy and physiology, estrus detection, estrous cycle, estrus synchronization, pregnancy diagnosis, nutrition and disease concerns, collecting oocytes and sperm, semen processing, in vitro and in vivo embryo production, and emerging assisted reproductive technologies such as AI, IVF, MOET. Prerequisite: ANSC 221 and ANSC 222 and ANSC 223 and ANSC 224 are required or equivalent.

ANSC 520 Protein and Energy Nutrition credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/520/)
Physiological aspects of protein and amino acids, fats and fatty acids, and carbohydrates as applied to higher animals; includes classification, digestion, absorption, utilization, metabolism, and dietary deficiencies and excesses. Same as NUTR 520. Prerequisite: MCB 450 or equivalent and ANSC 222 or equivalent.

ANSC 521 Regulation of Metabolism credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/521/)
Same as FSHN 511, HK 510 and NUTR 511. See NUTR 511.

ANSC 522 Advanced Ruminant Nutrition credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/522/)
Physiological and microbiological aspects of ruminant digestion and their influence on the metabolism of the extraruminal tissues; interpretation of nutritive requirements in terms of rumen microbial activities; and evaluation of research techniques. Offered in alternate years. Prerequisite: ANSC 420 or equivalent, and ANSC 350, MCB 450, or equivalent.

ANSC 523 Techniques in Animal Nutrition credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/523/)
Discusses and applies methods of laboratory analysis and animal experimentation frequently used in nutrition research. Same as NUTR 523. Prerequisite: Courses in nutrition, physiology, and biochemistry and consent of instructor.

ANSC 524 Nonruminant Nutrition Concepts credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/524/)
Review of literature in nonruminant nutrition. Emphasizes basic concepts associated with food intake, carbohydrate and fat utilization, protein quality, bioavailability of nutrients, and diet formulation. Same as NUTR 524. Prerequisite: Consent of instructor.

ANSC 525 Topics in Nutrition Research credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/525/)
Same as FSHN 510 and NUTR 510. See NUTR 510.

ANSC 526 Adv Companion Animal Nutrition credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/526/)
Students will learn how to effectively apply advanced concepts related to pet nutrition and disease, including the metabolism within healthy and diseased dogs and cats, how nutrition may aid in preventing and treating disease, and the science behind pet food formulation and production. Students will develop critical-thinking and problem-solving skills by writing and reviewing grant proposals and delivering an oral presentation. Same as NUTR 526. Prerequisite: ANSC 422 or consent of instructor.

ANSC 533 Repro Physiology Lab Methods credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/533/)
Laboratory methods used in reproductive physiology studies, such as blood sampling, large animal surgery, collection of tissues and gametes, embryo recovery, in vitro fertilization, tissue culture, hormone measurements, and directed individual research problems. Same as MCB 533 and CB 533. Prerequisite: Consent of instructor.

ANSC 541 Regression Analysis credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/541/)
Same as CPSC 541. See CPSC 541.

ANSC 542 Applied Bioinformatics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/542/)
Introduction to theoretical and applied aspects of bioinformatics. Topics include genomic and proteomic databases, sequence alignment and search algorithms (e.g., BLAST, FASTA, CLUSTAL W), predictive methods in DNA sequence, machine-learning techniques (e.g., Hidden Markov Models) and data mining, biomolecular structure and its prediction, molecular evolution and phylogenetic reconstruction, structural genomics and phylogenomics. Concepts are complemented with hands-on experience with computational biology databases and bioinformatic tools. Same as CPSC 569 and IB 506. Prerequisite: Graduate level status or consent of instructor.

ANSC 543 Bioinformatics credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/543/)
Same as CHBE 571, MCB 571, and STAT 530. See CHBE 571.

ANSC 580 Artificial Intelligence and Computer Vision for Precision Management credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/580/)
Use of Artificial Intelligence (AI) in optimizing precision management for agriculture and animal care. Students will explore the application of AI and computer vision techniques to assist decision-making and improve performance in the realm of precision management. Techniques of image analysis, object detection, and real-time monitoring will be covered. Finally, students will develop a hands-on project and investigate ethical considerations and industry case studies on AI-driven precision management systems with a focus on computer vision. Credit will not be given for ANSC 460 and ANSC 580 Prerequisite: ANSC 480, or ANSC 360, or demonstrated basic knowledge in Python coding, or consent of instructor.

ANSC 590 Animal Sciences Seminar credit: 0 to 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/590/)
Discussions of current research and literature. Registration for 0 to 2 hours each term is expected for animal sciences graduate students. Same as NUTR 591. Course Information: Approved for Letter and S/U grading. May be repeated to a maximum of 2 hours for Masters students and 4 hours for PhD students.

ANSC 591 Grad Bioinformatics Seminar credit: 0 to 2 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/591/)
Same as CPSC 591 and INFO 591. See INFO 591.

ANSC 592 Adv Topics in Animal Science credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/592/)
Selected topics associated with teaching, research, and production related to the animal industry. Prerequisite: Consent of instructor.

ANSC 593 Res Studies in Animal Sciences credit: 1 to 8 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/593/)
Directed and supervised study of selected research topics in Animal Sciences. Approved for Letter and S/U grading. May be repeated in the same or separate terms to a maximum of 8 hours. Prerequisite: Consent of instructor.

ANSC 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/ANSC/599/)
Approved for S/U grading only. May be repeated in the same term or in separate terms.

ANTH - Anthropology

ANTH Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ANTH/)

Courses

ANTH 101 Introduction to Anthropology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/101/)
Anthropology was first envisioned as a holistic discipline, combining insights from the study of human anatomy and evolution, research on material remains of human settlements, and the analysis of social interaction in language and other cultural practices. Following this tradition, this course explores the questions about where humans came from, how societies live and communicate, and why human cultural groups vary.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

ANTH 102 Human Origins and Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/102/)
Explores the origin and evolution of humans with an emphasis on reconstructing and interpreting fossil evidence. It provides an introduction to the fundamentals of biological anthropology and draws on a diverse range of other disciplines that contribute to the study of human evolution – evolutionary biology, population genetics, comparative anatomy, primatology, archaeology, geology and paleoecology. We examine the fossil and artifact record of the last several million years in order to develop an understanding of why we are interesting animals and a somewhat unique species.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ANTH 103 Anthro in a Changing World credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/103/)
[IAI Code: S1901N] Presents the fundamental areas of anthropological analysis through a series of comparative cases that emphasize social and cultural relations in global contexts. Directs attention to the anthropological history of global empires and colonial states, their cultural exchanges, and contemporary studies of culture, society, and globalization.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ANTH 104 Talking Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/104/)
Introduces you to language-in-use from the perspective of linguistic anthropology. We explore how the language(s) people use creates a specific "worldview" or cultural "common sense" and how this creates and maintains distinct concepts of self, society and culture. We will examine critically the ways in which differences in language and communication work in the USA in relation to power and politics, the media, gender, ethnicity/race, age, class, and identity, with comparisons to other cultures. During the semester you will encounter new information about language structure and use, and learn methods of investigation and analysis used in contemporary linguistic anthropology. Same as LING 104.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ANTH 105 World Archaeology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/105/)
Using archaeological data, traces our prehistoric heritage and the processes which led to the evolution of agriculture, settled villages, and civilization in many areas of the world. Lectures range from the earliest Homo sapiens to Sumeria, Egypt, Mexico, Peru, and the United States.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

ANTH 106 Hist Arch Americas credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/106/)
Explores recent theoretical, methodological, and thematic developments in historical archaeology in North America and the Caribbean.
The temporal coverage is 1500-1900 AD. Examines how historical archaeologists use artifactual, documentary and oral history evidence in interpreting the past, and how historical archaeology can contribute to our understanding of the ways by which material culture can be used to study race, class, gender, and ethnic identities. Same as AFRO 106.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

ANTH 108 Religion & Society in West I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/108/)
Same as JS 108, PHIL 108, and REL 108. See REL 108.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

ANTH 109 Religion & Society in West II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/109/)
Same as PHIL 109 and REL 109. See REL 109.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Western

ANTH 110 Humanizing Science credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/110/)
Scientists are often taught that the skills they need are confined to conducting research in the lab, the field, or the observatory. Yet science is also a human endeavor. If scientists are not taught this lesson, mistakes can be made that have real implications for people's lives, for scientific progress, and for who gets to be a scientist. Therefore this course will introduce 1) a brief history of Western and non-Western science, 2) the influences of social categories and oppressions on scientific advancement, 3) the incentive and reward structure of science, and 4) stories of scientists who have chosen to walk a brave path in the way they conduct and disseminate their research. We will engage in a mix of ethnographic and case study work and bring interpretive and systematic analysis to bear on what it means to be a scientist. The ultimate goal of the course is to provide a substantive, rigorous, and broad introduction to the culture of science, and how that culture affects the people of science, its practice, and its process.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ANTH 112 Language, Race, and Ethnicity in the United States credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/112/)
Exploring historical, cultural, and theoretical perspectives on the relationship between language, race, and ethnicity in the United States, we ask, what is 'race' and 'ethnicity', and how do ideas about racial and ethnic belonging and difference relate to ideas about language? We examine how language use reflects, reproduces, and/or challenges racial and ethnic boundaries and explore topics such as language and racial/ethnic identity-making, language and nationalism, bilingual/multilingual education, and language and racial humor.

ANTH 126 Humans and Animals - Food or Friend? credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/126/)
Emphasizes questions of how we can move toward a more sustainable future by focusing on two key realms of human relations with non-human animals: as food, and as “friend,” or pets/companion animals. A third category, of animals as “fauna” or avatars of the wild will be touched on briefly. Anchored in humanistic social science, this course also exposes students to the benefits and challenges of interdisciplinary thinking and research, and provides an opportunity for active experiential learning and public engagement Prerequisite: This course is intended for first and second year students.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ANTH 130 History of South Asia credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/130/)
Same as HIST 130. See HIST 130.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

ANTH 143 Biology of Human Behavior credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/143/)
Biological anthropology looks at human biology and behavior through the lens of evolutionary biology. However, as human behavior is complex, it cannot be understood independent of culture or the physical environment. We will explore how biology intersects with environmental factors, including culture, to influence human behavior. Students will learn the skills needed to become scientifically literate, learning their place in nature, the importance of the comparative method in learning about ourselves, and the interaction between biology and culture in understanding the human condition. Topics include evolutionary theory and human evolution, primate origins of human behaviors, social and sexual behaviors, aggression, cooperation, and language, cognition, and culture. Same as HDFS 143.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Life Sciences

ANTH 157 The Archaeology of Illinois credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/157/)
Traces the prehistory of Illinois from the first entry of people into the region more than 13,000 years ago until the 17th century and the beginning of historical records; examines subsequent cultural changes up to the 19th century and statehood from an archaeological and ethnohistorical perspective.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

ANTH 160 Race and Contemporary Social Issues credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/160/)
Engages with issues such as migration, borders, policing and related topics to examine certain key interventions in the analysis of race in the United States. Introduces students to critical methods and theories in socio-cultural anthropology and allied disciplines in order to grapple with these issues. We will read a variety of material, including ethnographic accounts, scholarly and popular articles, and a work that blurs non-fiction with fiction-writing, as well as screening related films and documentaries. Students will develop a conceptual vocabulary (keywords) to begin analyzing the social problem that race and racism has become in US society.
This course satisfies the General Education Criteria for:
Cultural Studies - US Minority

ANTH 165 Lang & Culture Native North Am credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/165/)
Develops understanding of the rich diversity of languages and cultures found among Native North American peoples from the perspectives of sociocultural and linguistic anthropology. Same as AIS 165.

ANTH 175 Archaeology and Pop Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/175/)
Examines the ways in which the ancient past has been interpreted, appropriated, represented, used, and misused for a variety of reasons by political parties, national governments, and religious and ethnic groups living in the present.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil

ANTH 180 The Archaeology of Death credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/180/)
Cross-cultural introduction to the celebration of death across time and space. Examines the anthropological and archaeological literature on death, particularly in terms of death ritual and burial practices. Students study popular films on death in different cultures.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

ANTH 182 Latin American Cultures credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/182/)
Latin America considered as a theater of conflict and cultural experimentation among Native American, African, and Iberian peoples; their survival and transformation as reported in selected ethnographies and eyewitness sources; and some modern theories and controversies about their experience.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ANTH 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/199/)
May be repeated.

ANTH 209 Food, Culture, and Society credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/209/)
Introduces students to anthropological approaches to the study of food from socio-cultural, linguistic and archaeological perspectives. Topics include: food in popular culture; food, ethnicity and race; food and immigration; food and religious traditions; food and family; gendered roles in food production; food and national identity; competitive global marketing of food; food, class and status; socio-politics of food in ancient societies; food, ethics and human rights.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

ANTH 210 Families in Global Perspective credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/210/)
Same as HDFS 220. See HDFS 220.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ANTH 220 Introduction to Archaeology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/220/)
[IAI Code: S1903] Introduction to method and theory in archaeological research, data collection, and analysis in the study of past societies. Major topics include formation processes, field techniques and research design, dating methods, and artifact analysis.

ANTH 221 Archaeology of South Asia credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/221/)
Explores the archaeology of South Asia from the earliest occupations of the subcontinent to the present. South Asia is home to one of the first urbanized societies, over 40 World Heritage sites, and some of the 21st century's largest megacities. We will critically examine how these diverse archaeological resources have been investigated by different communities through time and how this has informed modern understandings of cultural, national, religious, regional and gender identities.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ANTH 222 Introduction to Modern Africa credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/222/)
Same as AFST 222, PS 242, and SOC 222. See AFST 222.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

ANTH 230 Sociocultural Anthropology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/230/)
Introduction to the anthropological study of contemporary human societies; emphasis on the comparative study of social organization, interpersonal relations, cultural ecology, and processes of sociocultural change, but also includes some consideration of the method and theory of ethnographic field research.

ANTH 240 Biological Anthropology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/240/)
[IAI Code: S1902] Past and present evolution of the human species and population and individual biological variation; topics include genetic principles relevant to human evolution, primate phylogeny and behavior, fossil evidence for human evolution, and the origin and significance of biological diversity in modern humans.

ANTH 241 Human Biological Variation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/241/)
Examines the biological concept of race as applied and misapplied to Homo sapiens by anthropologists and others from the 18th century to the present and of the origin, nature, and significance of so-called racial variation.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Life Sciences

ANTH 242 History of Human Evolution credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/242/)
Reviews the history of evolution and its controversies from the pre-Darwinians to contemporary debates. Examines disciplinary and wider societal debates and how they affect each other.

ANTH 243 Sociality of the Great Apes credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/243/)
Examines the social organization, mating patterns, and group structure of free-ranging chimpanzees, gorillas, and orangutans. Presents historical perspective focusing on misconceptions that have colored our understanding of ape social behavior; addresses questions concerned with learning potential, food sharing, social cooperation, aggressive behavior, self-awareness, and the appropriateness of the apes as models for understanding human behavior. Prerequisite: ANTH 102, ANTH 143, or an equivalent course in animal behavior; or consent of instructor.

ANTH 246 Forensic Science credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/246/)
History and theory underlying methods used in forensic science. Topics include the courtroom, the units of a crime laboratory, methods of securing and investigating a crime scene, and the analysis of evidence collected from a crime scene such as blood, fibers, hair, DNA, and fingerprints.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Life Sciences

ANTH 247 Forensic Science DNA Lab credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/247/)
Forensic science is the application of science to the law and encompasses a wide variety of scientific disciplines. This course introduces students to general laboratory practice, molecular biology and DNA analysis skill that are commonly used by forensic DNA scientists. Students will learn using a “hands-on” and interactive approach with many of the same tools used by professional forensic DNA scientists. Prerequisite: ANTH 246.

ANTH 248 Introduction to Engaged and Public Anthropology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/248/)
We ask 'How can activist scholars address observable social injustices such as inequality, poverty, and racism? What methods work best to intervene in public and policy debates? What are the implications of such interventions?' We explore the history of anthropological engagements with distinct "publics" as well as influences from other disciplines and forms of activism. These include Latin American Action Research traditions, Indigenous Studies, and Indigenous, Black, and Latinx feminist schools of thought. From these perspectives, we examine contemporary currents and influences inside and outside of the United States.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ANTH 249 Evolution and Human Disease credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/249/)
Principles of modern evolutionary theory are applied to medical problems. Topics include: transmission, pathogen strategies, symptoms and spectrum of disease, evolution of virulence, concept of cause, antimicrobial resistance, emerging diseases, stress and adaptation, nutrition, diachronic overview of changing patterns of human disease, and ecological factors.
This course satisfies the General Education Criteria for:
Nat Sci Tech - Life Sciences

ANTH 250 The World Through Museums credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/250/)
Same as MUSE 250. See MUSE 250.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

ANTH 258 Sex in Nature and Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/258/)
A simultaneous exploration of human sexuality from a biological and cultural perspective. Same as GWS 258.

ANTH 259 Latina/o Anthropology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/259/)
In this class, we will examine the contemporary cultures and communities of Latinas and Latinos in the United States. We will focus on recent ethnographic studies on the Latina/o experience written mainly (though not exclusively) by Latinas and Latinos who are active in the academy. Topics to be discussed include: ethnic and racial identity, language, sexuality, power, class hierarchies, cultural citizenship, racialization, gender inequality, cultural citizenship, legal citizenship, immigration, and popular culture—all from an anthropological perspective. In the process, we will critically examine the imagined, the lived, and the invented communities constituting the Latina/o population of this country in the West, Southwest, East Coast, and the Midwest. In particular, we will explore the experiences of Mexicans, Puerto Ricans, Central Americans, and Cubans in the United States. Same as LLS 259.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - US Minority

ANTH 261 Intro to the African Diaspora credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/261/)
Same as AFRO 261. See AFRO 261.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

ANTH 262 Women's Lives credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/262/)
Perceptions of women, their perceptions of themselves, and their varying roles and statuses in several contemporary societies in diverse countries; supervised ethnographic observation of women's behavior. Same as GWS 262.

ANTH 263 Body, Personhood, and Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/263/)
In this course we examine cultural assumptions about the human body and what it means to be a "person" in Western and non-Western societies. We examine key themes in cultural anthropology and other social sciences concerning the relationship of the individual and society, nature and culture. We will also focus on contemporary concepts of "person" vis a vis new genders/sexualities, differently-abled persons, organ transplants and bio-medicine, cyborgs and virtual persons; and commodification. We also explore the interface between intellectual and experiential ways of knowing our own bodies as cultural, dynamically embodied persons.

ANTH 268 Images of the Other credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/268/)
Do all peoples view neighboring or distant populations as radically different "Others," or can humans create mutual images based on a notion of shared humanity? Course compares and analyzes the range of images of ethnic, "racial," gender, class, and bodily differences that have been enacted historically and cross-culturally in both Western and non-Western populations. Prerequisite: A previous course in history and/or one of the social sciences suggested.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

ANTH 270 Language in Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/270/)
Examines the intersections of culture and language. Topics include the definition of language; the cultural shaping of discourse and narrative; how different linguistic systems guide speakers to think differently about the world; and how ideologies about language relate to beliefs about the nation, modernity, race, and gender. Prerequisite: Gen Ed. Composition 1.
This course satisfies the General Education Criteria for:
Advanced Composition
Social Beh Sci - Soc Sci

ANTH 272 Language and Culture in Turkey credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/272/)
Same as GLBL 272, SAME 272, and TURK 270. See TURK 270.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

ANTH 278 Climate Change & Civilization credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/278/)
Examination of how climate change impacts society. With the increasing need to understand how climate changes and society intersect at present, it is becoming important that we address critical questions about how lessons from the past inform present needs. Case studies from around the world are discussed.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

ANTH 279 Economy, Business & Society credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/279/)
Introduction to anthropological approaches to economics, capitalism, and the world of business. We discuss these topics as influential cultural ideals in U.S. society, consider critical alternative approaches, and examine a range of specific business and related economic practices drawing upon case studies from the U.S. as well as international and cross-cultural contexts.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci
Cultural Studies - Western

ANTH 280 Anthropology of Martial Arts credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/280/)
Same as EALC 280. See EALC 280.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West
Social Beh Sci - Soc Sci

ANTH 285 Intro to Korea Through Film credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/285/)
Same as EALC 285. See EALC 285.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

ANTH 287 Contemporary East Asia credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/287/)
Same as EALC 288. See EALC 288.

ANTH 288 American Indians of Illinois credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/288/)
An interdisciplinary survey of the Native American experience in the Illinois region from pre-Columbian times to the present. Introduces theories, concepts and methods in archaeology, history, and sociocultural anthropology. Includes archaeological field site and museum visits, plus guest lectures by American Indian scholars and community members. Same as AIS 288 and HIST 288.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - US Minority

ANTH 290 Jewish Cultures of the World credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/290/)
Survey of the world's Jewish cultures with a particular focus on the non-Western world. Addresses the relations between Judaism and other religious systems and the nature of Jewish life in such locales as North Africa, Subsaharan Africa, India, China, and South America. Same as JS 290.

ANTH 310 Archaeology of Food credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/310/)
Explores how archaeologists study food in the ancient world and the ways that understanding food and cuisine can inform interpretations of numerous other aspects of past societies. Looking at case studies from around the world, topics covered include food and evolution, the origins of agriculture, feasting, and food identity. The variety of methods that archaeologists use to examine foodways in the past, including zooarchaeology, paleoethnobotany, and residue analysis, will be presented.

ANTH 315 Archaeology of the American Southwest credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/315/)
The American Southwest is characterized by excellent preservation of archaeological sites, precision in chronological schemes, and a long history of intensive excavation and research, factors that have made it a laboratory for the development of archaeological methods. This course will provide an overview of the history of archaeological research in the Southwest, of the cultural developments of cultures and societies of the Southwest, and of the indigenous people present in the region today.

ANTH 339 Industrial Heritage and Communities credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/339/)
Primarily examines the legacy of the Industrial Revolution in the United Kingdom and the United States where former industrial sites (such as textile mills, coal mines, chocolate factories) have been transformed from abandoned ruins into major tourist attractions, economic regeneration machines for their communities, and even UNESCO World Heritage Sites. Studies industrial places in the context of the times in which they were operating and the processes by which they have been repurposed.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ANTH 340 Archaeology of Religion credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/340/)
We familiarize ourselves with how anthropologists approach the study of religion and then look at how we can best understand religion in the past. We examine the differences between religion, worldview, cosmology and culture, and investigate what archaeology can tell us about the origins of religion and the materiality and mundane practices of religion, revitalization and missionization. Lectures will cover theoretical, perspectives, and archaeological cases. Same as REL 342. Prerequisite: Consent of the instructor.

ANTH 342 Animal Behavior credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/342/)
Same as ANSC 366, IB 329, and PSYC 329. See IB 329.

ANTH 343 Behavior and Biology of Women credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/343/)
Exploration of female biology and behavior in a broad evolutionary context. Explores development from pre-puberty through menopause, reproductive processes such as pregnancy, birth and lactation, cognitive and behavioral sex differences, and male and female reproductive strategies in a variety of cultural settings. Examples are drawn primarily from traditional and modern human societies as well as field and experimental data from other species, particularly non-human primates. Prerequisite: ANTH 143 or consent of instructor.

ANTH 346 Forensic Anthropology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/346/)
Analysis of human skeletal remains of the medico-legal profession. Topics include the development of the field of forensic anthropology, biological profile and skeletal trauma analysis, interval since death estimation. Additional topics include investigation of crime scenes, the legal role of the biological anthropologist as an expert witness and case report preparation. Attention will also be drawn to the incorporation of anthropological and ethical approaches to dealing with death and using human remains for research. Prerequisite: ANTH 246.

ANTH 347 Human Osteology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/347/)
Comprehensive knowledge of the human skeleton is central to reconstructing the anatomy, demography, health and evolution of past populations because most of our evidence is derived from preserved skeletal and dental remains. The primary goal of this course is the identification of isolated and fragmentary skeletal remains given that this is a prerequisite to all subsequent analysis. In addition to identifying the bones and landmarks of the human skeleton, students will learn about the structure and function of bone, understand the growth and development of the human skeleton and be introduced to analytical techniques used in human osteology including paleopathology, paleodemography and forensics. Prerequisite: ANTH 102 or ANTH 240.

ANTH 350 Cultures of Law credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/350/)
Covers major concepts and debates in the study of legal anthropology: the way in which different societies understand justice, practice law, engage or violate human rights, adjudicate responsibility. We examine the foundations of different legal systems, the cultural categories that different societies use to determine the meaning of justice, guilt, innocence, and the variations in systems for both preventing and punishing crime. In addition, we will consider the cultures of law as a profession. How do lawyers learn to read and see the world differently? How do Courts create their own cultural norms and social contexts in ways that impact how all of us receive due process? Finally we explore the relationship between state power, rule of law and democracy. Is there and should there be a role for politics in the law?.

ANTH 351 Language and Race credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/351/)
What does it mean to say that someone "sounds Black" or to admiringly remark that Spanish is "a sexy language" or to accuse someone of "pulling the race card?" How do people apologize for doing or saying something racist? This course brings together resources from linguistic anthropology and theories about race to examine how we use language to ideologically and materially sort one another.

ANTH 352 Language and Gender credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/352/)
The relationship between language and gender is complex, contentious, and often misunderstood. In this course, we explore the many connections between language and gender. Topics include what gender is and how it is socially and linguistically constituted; real and perceived differences — grammatical, phonological, conversational — in how men and women speak; how the ways we talk about gender shape the ways we think about gender; and how all of these things vary cross-culturally and cross-linguistically. Prerequisite: ANTH 104 or ANTH 270 is strongly recommended.

ANTH 353 Language and Humor credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/353/)
Humor is an essential element of human life, yet it has proven an intractable object of study. Though scholars have long tried to distill "humor" to a static, universal formula, the anthropological approach to humor emphasizes that it is a culture- and context-specific phenomenon that must be studied in action. In this course we will study a wide range of scholarly perspectives on humor, including psychoanalysis, sociology, philosophy, and anthropology, as we consider the social and communicative dimensions of joking and laughter. Prerequisite: ANTH 104 or ANTH 270 are strongly recommended.

ANTH 358 People of the Ice Age credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/358/)
Explores a vast period of human prehistory - 2 million to 10,000 years ago - before the first cities arose and before people domesticated plants and animals in the Old World; uses archaeological and paleoanthropological data to understand past life ways as well as reasons for change through time in human adaptation. Prerequisite: ANTH 102 or ANTH 240 is strongly recommended.

ANTH 360 Evolution and Human Health credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/360/)
Same as IB 360. See IB 360.

ANTH 361 Ecology and Human Health credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/361/)
Same as IB 361. See IB 361.

ANTH 363 Anth of Dance/Movement credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/363/)
Anthropological study of dance and other human movement systems in cultural contexts. Designed especially for students with little or no background in socio-cultural anthropology or the social sciences. Includes reading the works of major figures in the field, and learning how to study dances, signed languages and ritual events from an anthropological perspective. Students will also learn about socio-cultural theory and observation, doing fieldwork, movement literacy, problems of subjectivity and objectivity, and personal anthropology.

ANTH 364 Performing 'America' credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/364/)
Introduction to theories of performance and performativity or enactment, and applies these to an understanding of public events like political rallies, music, the arts, protests, and everyday life in the U.S. Emphasis on how these practices of production and consumption help articulate social identity, including gendered, sexual, racial/ethnic, religious, class, and generational affiliations. Focus on the contemporary U.S. with comparative case studies drawn from other parts of the world and some historical materials. Draws on anthropological studies, as well as scholarly literatures from communication studies, literature, the arts, and social history. Prerequisite: At least one course in anthropology or the social sciences strongly recommended. Restricted to sophomore or above class standing.

ANTH 368 'America' in the World credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/368/)
Study of the lure and rejection of the U.S. around the world, by drawing on long-standing anthropological approaches to the histories of peoplehood, selfhood, and otherness. Examines the historical, political, cultural, economic, and social context of both anti- and pro-Americanism, in various parts of the globe. Prerequisite: Any previous course in cultural anthropology.

ANTH 370 Latina/o Ethnography credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/370/)
Same as LLS 370. See LLS 370.

ANTH 372 Topics in Lang & Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/372/)
Advanced topics in language and culture. May be repeated in separate terms. Prerequisite: ANTH 104, ANTH 270, or consent of instructor.

ANTH 374 Anth of Science and Technology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/374/)
Examination of science as a cultural system. Utilizing ethnographic methods and social theories, the course will locate scientific knowledge, institutions and practices within enduring anthropological questions around rationality and truth, meaning, personhood, sociality, power inequalities, social transformations, and social justice. Prerequisite: Restricted to Sophomore or above class standing.

ANTH 375 The Culture of Nature credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/375/)
Examines how the natural and the cultural are mutually-constitutive concepts, and investigates contemporary and historical constructions of notions of a natural world. We will see how these concepts have varied over time and among different social groups, with a special emphasis on the contemporary United States. Topics will include the idea of landscape and of nature as a resource to be used, appreciated, represented, controlled, or enjoyed. In addition, the course will feature a special unit on sustainability, and one devoted to analyzing our relationships to animals. Prerequisite: At least one anthropology course or a course in another social science.

ANTH 379 Medical Anthropology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/379/)
An anthropological approach is used to explore human health by integrating perspectives from biological and medical anthropology, as well as human biology. By the end of the course, students will be able to conceptualize health holistically, encompassing wellness and well-being. They will learn how to define, measure, and incorporate embodiment theory using genetic, epigenetic, and human biological methods. Students will also gain a strong understanding of the biological mechanisms through which environmental factors influence health outcomes and contribute to health disparities. Prerequisite: ANTH 230 strongly recommended, or consent of instructor.

ANTH 387 Anthropology of Crime credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/387/)
This course takes an anthropological perspective to challenge "common-sense" notions about crime. We will compare ideas about and representations of lawbreaking, criminality, danger, policing, and violence in different parts of the world, considering how they diverge from, and yet also overlap with, each other. Our goal is to find new ways to understand both how something becomes "crime" and also how it then quickly becomes sensationalized, stereotyped and simplified as it enters public debate.

ANTH 390 Individual Study credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/390/)
Supervised reading and research on anthropological topics chosen by the student with staff approval. Especially (but not exclusively) for students who are preparing for a summer field-work project, or who have some justifiable reason for doing independent study, but who do not qualify for the honors (departmental distinction) courses. Prerequisite: Junior or senior standing; 12 hours in anthropology; consent of instructor. May not be taken concurrently with ANTH 391 or ANTH 495.

ANTH 399 Special Topics credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/399/)
Topics are given on a one-time only, experimental basis. Faculty offer special topics in their areas of expertise that provide an opportunity for undergraduates to be exposed to some of the most current developments in faculty research. May be repeated.

ANTH 403 Women in Muslim Societies credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/403/)
Same as GLBL 403, GWS 403, HIST 434, REL 403, and SAME 403. See REL 403.

ANTH 404 Disability, Culture & Society credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/404/)
Same as HK 407. See HK 407.

ANTH 405 Contemporary Central America credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/405/)
Explores cultural, political and historical processes in 20th- and 21st-century Central America--focusing on Costa Rica, Nicaragua, Honduras, El Salvador, and Guatemala--through an anthropological lens. Grapples with a core set of questions arising from changes in the global relations, including the rise of global neoliberalism, the crises and renovations of political projects, the transformations of spatial relations through transnational migration, and the proliferation of various pan-hemispheric as well as local identity-based movements. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 103 or ANTH 182 or ANTH 230 or a course in Latin American history or consent of instructor.

ANTH 407 Evolutionary Immunology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/407/)
Immune systems are a defense mechanism against microbial assault and dying and cancerous cells. They are under tremendous evolutionary pressure to cope with changing invasions and other stresses and have, therefore, evolved differently across species and populations. The resulting immune variation strongly impacts human and animal health. This seminar addresses animal immune system physiology and function in the context of evolutionary and anthropological theory and research. It is designed for advanced undergraduate and graduate students with a basic background in biology, biological anthropology and related fields. 3 undergraduate hours. 4 graduate hours.

ANTH 408 Human Evolutionary Anatomy credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/408/)
Comprehensive, comparative study of musculoskeletal anatomy in primates, focusing on functional and adaptive changes that have occurred in the masticatory apparatus, facial skeleton, and locomotor systems of New World monkeys, Old World monkeys, apes, and humans. Relationships between morphology, ecology, and behavior are discussed, applied to the fossil record, and used to address current issues in human evolution. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 443 or ANTH 440 or ANTH 456 or a course in human or comparative vertebrate anatomy.

ANTH 411 Research Methods in Socio-Cultural Anthropology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/411/)
Exploration of qualitative forms of research used by sociocultural anthropologists when conducting field research. Emphasis is on formulating research questions, research design, and application of these ethnographic methods to a substantial research project. 3 undergraduate hours. 4 graduate hours.

ANTH 414 Writing Ethnography credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/414/)
In this seminar we address the theoretical divide between the humanities and the social sciences, the unique authority of the scholar/author, and the invisibility of the reader in producing scholarly texts. Focusing on the ways in which scholars are also authors, we explore current debates by reading a selection of contemporary anthropological texts (and a few precursors) that experiment boldly with how ethnography is written. Students will experiment with several ethnographic writing styles. This course is designed for advanced undergraduate anthropology students and graduate students in cultural anthropology, writing studies, and education. 3 undergraduate hours. 4 graduate hours. Prerequisite: Undergraduate students should have already taken at least one 300-level course in cultural anthropology, and graduate students in cultural anthropology, writing studies, and/or education. Other students should contact the instructor.

ANTH 416 Anthropology of Music credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/416/)
Same as MUS 416. See MUS 416.

ANTH 420 Case Studies Global Heritage credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/420/)
Cultural heritage encompasses major domains of social, economic, political, religious and environmental practice and policy-making under today's conditions of globalization. Students will critically examine cultural heritage case studies from around the world. 3 undergraduate hours. 4 graduate hours.

ANTH 421 Social Organization credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/421/)
Introduction to anthropological concepts of social organization and structure; considers kinship theory, descent and alliance systems, social stratification, nonkin association, social networks, group identification and boundaries, structural-functional interpretations of society, and the meaning of social or cultural structure. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 230 or consent of instructor.

ANTH 423 Economic Anthropology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/423/)
Covers the emergence of economic anthropology as a subdiscipline; considers various definitions of economics with their implications for the study of human society; emphasizes the relationship between social organization and economic life from the perspectives of classical studies in anthropology and their contemporary interpretations. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 230.

ANTH 426 Narrative credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/426/)
Narratives serve a central function in human life: at the most fundamental level, they enable us to make sense of a complex and chaotic world, but we also use narratives strategically to persuade, manipulate, create social bonds and social divisions, establish authority and deny responsibility. Narratives may be a human universal, but the rules of narrativity are intensely culturally specific. This course explores what narratives are and how they work, and considers a range of analytical techniques for studying them.

ANTH 430 The History of Anthropology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/430/)
Provides a selective overview of the history and historiography of anthropology in the 19th and 20th centuries. The class moves chronologically and topically, paying particular attention to the social, institutional, and historical contexts of paradigmatic shifts, the interconnections between various national traditions, and the negotiations of the discipline's boundaries. 4 undergraduate hours. 4 graduate hours. Prerequisite: Graduate or senior standing in anthropology, or consent of instructor.

ANTH 432 Genes and Behavior credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/432/)
Same as IB 432, NEUR 432, and PSYC 432. See IB 432.

ANTH 433 Communication and Culture credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/433/)
Same as CMN 433. See CMN 433.

ANTH 435 The Neandertal Debate credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/435/)
A detailed investigation of the origin and biological adaptations of late archaic humans and the emergence of modern humans. Explores the practice and validity to using skeletal anatomy to interpret the behavior of past populations using evolutionary and comparative approaches. This course will interpret Neandertal biology and anatomy with particular emphasis on its relevance for theories about the origin and evolution of our species. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 240.

ANTH 436 Biogeography credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/436/)
Same as ESE 439, GGIS 436, IB 439 and NRES 441. See IB 439.

ANTH 437 Primate Behav Endocrinology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/437/)
Introduction to behavioral endocrinology, focusing on primate, especially human behaviors. Examines the relationship between hormones and behavior using an evolutionary and comparative approach, considering both how hormones influences behavior and how behavioral interactions regulate endocrine physiology. The course covers basic endocrine system physiology and function, hormonal influences on primate social behaviors such as male and female reproductive behaviors, courtship, parental care, bonding and attachment, as well as aggression and territoriality. Other topics include stress, hormones, and health. 3 undergraduate hours. 4 graduate hours. Prerequisite: IB 150 and ANTH 143; or an equivalent course in behavioral ecology, primate behavior, physiology or psychology; or consent of instructor.

ANTH 438 Primate Life History Evolution credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/438/)
Life history seeks to explain why differences exist in the pathways that organisms follow from conception to death. Examination of the diversity in the evolution of primate (including human) life histories. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 102, ANTH 143, ANTH 240, ANTH 243 or equivalent.

ANTH 440 Human Paleontology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/440/)
Principles of evolution and a survey of human evolution from the early primates through the Pleistocene epoch; emphasis on evolutionary theory as applied to humans and interpretation of the fossil record. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 240 or consent of instructor.

ANTH 441 Human Genetics credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/441/)
Principles of human genetics; anthropological aspects of race and race formation; and hereditary and environmental factors in the biological variation of modern humans. Same as ANSC 441. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 102 or equivalent.

ANTH 443 Primate Form and Behavior credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/443/)
Survey of primate social behavior and the classification, morphology, and distribution of living and extinct species; emphasis on interrelationships among behavior, biology, and ecology. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 240 or consent of instructor.

ANTH 444 Methods in Bioanthropology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/444/)
Supervised participation in biological anthropology research projects; techniques, methods, and procedures discussed and practiced under actual field or laboratory working conditions. Normally taken concurrently with ANTH 445. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Usually offered in the summer session only. Prerequisite: ANTH 240 or equivalent; consent of instructor.

ANTH 445 Research in Bioanthropology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/445/)
Analysis, interpretation, evaluation, and organization of field and laboratory data in biological anthropology; preparation of written reports on research. May be taken concurrently with ANTH 444 or subsequently. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Usually offered in the summer session only. Prerequisite: ANTH 240 or equivalent; consent of instructor.

ANTH 447 Advanced Skeletal Biology credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/447/)
Human skeletal and dental remains form the basis for research in both bioarchaeology and forensic anthropology. We will examine the bases for making inferences about individual skeletons and past populations, with particular emphasis placed on paleodemography, reconstruction of diet, paleopathology, and biological distance analysis. 3 undergraduate hours. 3 graduate hours. Prerequisite: ANTH 347.

ANTH 448 The Prehistory of Africa credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/448/)
The study of cultural development in Africa from the appearance of hominids to the time of European domination. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 220 or consent of instructor.

ANTH 449 North American Archeology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/449/)
Methods, techniques, and results of archaeology in North America; focuses on divergent approaches to the regional archaeology of North America; and surveys and synthesizes the archaeology of the subcontinent. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 220 or consent of instructor.

ANTH 450 Zooarchaeology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/450/)
Zooarchaeology is the study of the many ways that animals fit into past human societies—including diet, economy, and ideology—through the analysis of animal remains (bones, teeth, and shell) recovered from archaeological sites. Given the broad range of ways that animals were involved in past human life, and the ubiquity of faunal remains in the archaeological record, faunal analysis is a method suitable for addressing many kinds of archaeological and anthropological research questions. This course will provide students with a practical working knowledge of basic laboratory identification and quantification techniques, and provide a framework for the interpretation of archaeological faunal assemblages. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 220 or graduate standing in Anthropology.

ANTH 451 Archaeological Surveying credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/451/)
Familiarization with methods used in the location and recording of archaeological sites, including techniques of mapping especially adapted to the needs of archaeology; attention given to means of presenting results and interpreting data derived from this work; and work both in the field and in the laboratory. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 220 or consent of instructor.

ANTH 452 Stone Tool Technology Analysis credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/452/)
Lecture and laboratory on the principles and techniques of stone and bone artifact manufacture, identification, classification, metrical analysis, interpretation, and integration with other classes of archaeological evidence. Emphasis on the use of lithics to test human behavioral models. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 220.

ANTH 453 Landscape Archaeology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/453/)
The use of archaeological, documentary, and oral history evidence to study and interpret the ways past peoples shaped their landscapes through the deployment of cultural and social practices, and the ways, in turn, that such people were influenced, motivated, or constrained by their natural surroundings. Same as LA 454. 3 undergraduate hours. 4 graduate hours. Prerequisite: Introductory archaeology course, such as ANTH 220, or introductory landscape architecture course, or equivalent with instructor's permission.

ANTH 454 Archaeological Field School credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/454/)
Participation in archaeological excavations; techniques, methods, and procedures discussed and practiced under actual working conditions. Normally taken concurrently with ANTH 455. Additional fees may apply. See Class Schedule. 3 undergraduate hours. 4 graduate hours. May be repeated in separate terms if topics vary. Prerequisite: Consent of instructor.

ANTH 455 Lab Analysis in Archaeology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/455/)
Laboratory work including processing, classifying, dating, interpretation, evaluation, and preparation of written reports of archaeological research. May be taken concurrently with ANTH 454 or subsequently. 3 undergraduate hours. 4 graduate hours. May be repeated in separate semesters, if topics vary. Prerequisite: ANTH 102 or consent of instructor.

ANTH 456 Contemporary Archaeology credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/456/)
Considers recent work in the emergent field of Contemporary Archaeology. Archaeological approaches can make visible the human-scale ramifications of contemporary problems like forced migration, homelessness, inequality, waste, and ruination. Focusing on the present, however, also introduces new methodological and theoretical challenges. Researchers must navigate global connectivities, ephemeral contexts, a diversity of data, and involvements with at-risk communities. The nature of this work raises questions about heterotemporality, researcher positionality, and opportunities for political action. 3 undergraduate hours. 4 graduate hours.

ANTH 459 The Ancient Maya credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/459/)
Introduces the ancestral Maya of the southern lowlands in Central America and focuses on the rise and fall of kings (c. 100 BCE-900 CE), water management, religion, sustainable practices, ritual and politics, impacts of the colonial period, and the Maya today. Excavation, iconography, inscriptions and ethnographic data are used to reveal past life ways as well as how past lessons are relevant today. 3 undergraduate hours. 3 graduate hours.

ANTH 460 Heritage Management credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/460/)
Detailed examination of the theoretical and practical issues of archaeological heritage management. Focusing on the legal, environmental, ethical, social, political, educational, and touristic aspects of the management of ancient sites for their continued sustainability. Same as LA 460 and RST 459. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 220 and at least one ANTH 300- or 400-level archaeological area course.

ANTH 461 Hist of Archaeological Theory credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/461/)
Examines the prominent theories in archaeology from its inception to the present day and does so within the context of general developments in anthropological thought. Provides a foundation for graduate students and a capstone for major emphasizing archaeology. 3 undergraduate hours. 4 graduate hours. Prerequisite: For undergraduates: ANTH 220; anthropology major with focus on archaeology; senior standing or consent of the instructor. For graduate students: enrollment in ANTH 430 during the same term advised.

ANTH 462 Museum Theory and Practice credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/462/)
A foundational introduction to museology consisting of a critical examination of the history and social life of museums and how museums have been studied by scholars in a range of academic disciplines. Includes visits to campus and local museums. Same as ARTH 462 and LA 472. 3 undergraduate hours. 4 graduate hours.

ANTH 463 Religion and Society credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/463/)
Course focuses on theoretical issues raised by religion. Does religion address itself essentially to intellectual, emotional or pragmatic issues? Is religion created by rulers, clerics or worshippers? How does the individual experience religion, and (how) can s/he reshape it? In exploring these and related issues, we will read the writings of German, French, and British social scientists of the past 150 years as well as work by contemporary anthropologists. Theoretical perspectives covered include symbolic, processual, materialist, structural-functionalist, structuralist, and postmodernist approaches. Same as REL 463. 4 undergraduate hours. 4 graduate hours. Prerequisite: A 200-level course in cultural anthropology or consent of instructor; or graduate standing.

ANTH 464 Theories & Theologies of Liberation credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/464/)
Same as AAS 464, GWS 464, and REL 464. See GWS 464.

ANTH 466 Class, Culture and Society credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/466/)
Social hierarchies in a variety of cultural contexts; industrial societies and the process of industrialization; looks at other social forms for the purposes of comparison. A variety of social theories will be discussed and compared through ethnographic studies. 4 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 103 and ANTH 230 or graduate standing.

ANTH 467 Cultures of Africa credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/467/)
Culture and social organization in traditional African societies with emphasis on the politics, kinship, and religion of a small sample of societies illustrating the main cultural variations found in sub-Saharan Africa; some discussion of ecological factors and ethnic group relations in precolonial times. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 230 or consent of instructor.

ANTH 468 Primate Microbial Seminar credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/468/)
This bioanthropology research seminar is focused on interdisciplinary projects for undergraduate and graduate students. Students will create individualized projects related to biological anthropology, primatology, ecology, microbe-host interactions, evolution, endocrinology, ontogeny or closely-related areas. Additional emphasis will be placed on developing presentation skills and scientific paper writing. 3 undergraduate hours. 4 graduate hours. May be repeated in separate terms. Prerequisite: ANTH 240, ANTH 243 or ANTH 443 strongly recommended; permission of instructor.

ANTH 470 Anthropology of Modern China credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/470/)
Same as EALC 470. See EALC 470.

ANTH 471 Ethnography through Language credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/471/)
Overview of theoretical perspectives and methodologies in linguistic anthropology, including sociolinguistics, ethnography of communication, performance and poetics, discursive practices, and structural analyses. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 230 or ANTH 270 and preferably both.

ANTH 472 Border Latina, Latino Cultures credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/472/)
Explores and examines the production of U. S. Latina/Latino identities as instances of international, cultural, historical, and social border crossings. In both regional and global contexts, we will analyze the ways in which Mexican American, Cuban American and Puerto Rican identities have been shaped by colonial relations vis-a-vis Spain and by postcolonial conditions vis-a-vis the United States. Same as LLS 472. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 103, and ANTH 259 or ANTH 359.

ANTH 477 Pottery Analysis credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/477/)
Introduction to the theories and techniques of pottery analysis for archaeologists. In addition to presentation and discussion of the major literature, there is hands-on practice making, drawing, breaking and analyzing pottery. 3 undergraduate hours. 4 graduate hours. Prerequisite: ANTH 220 or consent of instructor.

ANTH 479 Race, Medicine, and Society credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/479/)
Same as AAS 479 and LLS 479. See LLS 479.

ANTH 481 Andean Ethnography credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/481/)
Survey of Andean cultures at the time of the Spanish conquest, of their subsequent history, and of modern Indian culture in the Andean countries. 3 undergraduate hours. 3 or 4 graduate hours. Prerequisite: ANTH 182, ANTH 230 or consent of instructor.

ANTH 485 Anthropology of Policing credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/485/)
Introduction to the use of anthropological theories and methods in policing studies. Includes comparative historical survey of the diverse sources of power and authority which are bundled into the modern idea of "police power," considers the range of authors contributing to contemporary debates about policing in anthropology, and supports students focusing on both theoretical and applied questions. 3 undergraduate hours. 4 graduate hours.

ANTH 488 Modern Europe credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/488/)
The anthropology of Europe sheds light on contemporary social challenges including: political economy and neoliberalism; immigration and citizenship; the politics of race and gender; human rights and law; and the future of democracy. Using ethnographic case studies, the course will interrogate modern Europe as an ideological, cultural, political, and economic project.

ANTH 494 Honors Senior Thesis I credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/494/)
The first of a two-term individual study and research project for those students who are candidates for departmental distinction in anthropology. 2 to 4 undergraduate hours. No graduate credit. Prerequisite: Senior standing; 3.25 GPA in anthropology; and consent of instructor. May not be taken concurrently with ANTH 390.

ANTH 495 Honors Senior Thesis II credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/495/)
The second of a two-term individual study and research project for those students who are candidates for departmental distinction in anthropology. 2 to 4 undergraduate hours. No graduate credit. Prerequisite: Senior standing; 3.25 GPA in anthropology; and consent of instructor. May not be taken concurrently with ANTH 390.

ANTH 496 Individual Field Research credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/496/)
Supervised participation in field research in ethnography, ethnology, linguistics, or social anthropology; techniques, methods, and procedures discussed and practiced under actual working conditions. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Usually offered in the summer session only. Prerequisite: ANTH 230; some knowledge of the language of the area concerned; consent of instructor. Normally taken concurrently with ANTH 497.

ANTH 497 Individual Field Data Analysis credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/497/)
Analysis, interpretation, evaluation, and organization of field data in cultural anthropology; preparation of written reports on research in ethnography, ethnology, linguistics, or social anthropology. May be taken concurrently with ANTH 496 or subsequently. 3 undergraduate hours. 4 graduate hours. May be repeated if topics vary. Prerequisite: ANTH 230; some knowledge of the language of the area concerned; consent of instructor.

ANTH 498 Senior Capstone Seminar credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/498/)
A guided independent research seminar for Anthropology majors normally taken during the Fall of the senior year. Students may select to conduct significant and original research in any of the four sub-fields of anthropology or combine interdisciplinary interests. Working closely with the course instructors and with additional guidance from a chosen anthropology faculty advisor, student will develop a research topic of their choice, identify significant research questions, before collecting and analyzing their field data. 3 undergraduate hours. No graduate credit.

ANTH 499 Topics in Anthropology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/499/)
Research seminar on specialized topics in anthropology. 4 undergraduate hours. 4 graduate hours. May be repeated. Prerequisite: Consent of instructor.

ANTH 503 Seminar on States & Governance credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/503/)
Explores theories of the state and governance through an anthropological perspective. Theoretical issues covered will include political economy, sovereignty, biopolitics, and empire across a range of social settings will attend to issues of race, class, gender, and sexuality. May be repeated in separate terms up to 8 hours, if topics vary. Prerequisite: Grad Students only.

ANTH 504 Colonialism & Postcolonialism credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/504/)
Course examines the history of colonialism and post-colonialism in anthropological perspective. The relations of history and anthropology are explored through ethnographic studies that problematize historical memory. Theoretical works about colonized people will be debated and discussed. Same as HIST 519. Prerequisite: Graduate standing.

ANTH 511 Research Proposal Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/511/)
This seminar guides graduate students in designing a doctoral research project and writing a grant proposal. Focus is on developing a cogent theoretical framework, articulating significance of the project, identifying appropriate research methods, and considering ethical issues. Seminar format allows regular feedback from peers to clarify and hone ideas. Prerequisite: Graduate standing in anthropology or consent of instructor.

ANTH 512 Language in Culture I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/512/)
This first of our two core theoretical courses in linguistic anthropology pays particular attention to language in culture. Examines the historical development of the field and its debates, and its relationships with socio-cultural anthropology. Develops theoretical and critical analytical skills needed in contemporary ethnographic research. Same as LING 512. Approved for both letter and S/U grading. Prerequisite: Graduate standing.

ANTH 514 Seminar in Cognitive Science credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/514/)
Same as PSYC 514, CS 549, EPSY 551, LING 570, PHIL 514. See PSYC 514.

ANTH 515 Seminar in Anthropology credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/515/)
Analysis of selected topics of special interest in anthropology. May be repeated to a maximum of 8 hours in the same or subsequent semesters.

ANTH 518 Language in Culture II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/518/)
Part II of the core theoretical seminar in linguistic anthropology. Continues examination of historical developments in the sub-field and its debates, and relationships with socio-cultural anthropology. Develops theoretical and critical analytical skills needed in contemporary ethnographic research. Same as LING 518. Prerequisite: Graduate Standing.

ANTH 523 Dynamic Embodiment credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/523/)
Examines anthropological theories and methods for understanding systems of body movement and performance in cultural contexts. Explores the study of everyday skills as well as the expressive complexities of dances, gestural systems, sacred and secular ritual, sign languages, sports, theater, and martial arts. Prerequisite: Graduate standing.

ANTH 532 Dissertation Writing Seminar credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/532/)
Through reading style handbooks, theoretical works on the nature of writing, and published dissertations in anthropology, as well as completing specific dissertation writing assignments, this course provides a forum for advanced doctoral students to outline and complete substantial work on their doctoral thesis. The class format is a workshop in which every student circulates dissertation chapters for discussion by the instructor and other class members. Prerequisite: Students must have completed all requirements for the Ph.D. in anthropology but the dissertation, and they must have completed their doctoral fieldwork.

ANTH 540 Seminar in Bioanthropology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/540/)
Seminar designed to involve students in the theoretical and methodological approaches to problem areas in physical anthropology. May be repeated. Prerequisite: ANTH 440, ANTH 441, or ANTH 443; consent of instructor.

ANTH 552 Res Prob in Archaeology credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/552/)
Seminar oriented to current research problems in archaeology, designed to acquaint students with theoretical and methodological aspects of particular problems and to develop a critical perspective archaeological research. May be repeated. Prerequisite: Consent of instructor.

ANTH 555 The Archaeology of Complexity credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/555/)
Examines patterns of behavior archaeologists associate with complex societies and seeks to understand if and how these behaviors generate and/or reflect cultural complexity; theoretical literature and case studies discussed. Major topics include chiefdoms, settlement pattern analysis, and ideology. Prerequisite: Graduate student standing.

ANTH 557 Social Construction of Space credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/557/)
Consideration of anthropological, archaeological, and related disciplinary perspectives on space, place, landscape, the built environment, and architecture. Coursework encompasses critical review of major theoretical literature and case studies of ancient and modern societies. Same as LA 562. Prerequisite: Consent of instructor.

ANTH 558 Key Issues in Heritage Studies credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/558/)
Engages critical issues in contemporary heritage studies such as the politicized UNESCO World Heritage system, heritage-based domestic and international conflicts, management of sites of trauma, contested heritage, heritage tourism, historic urban centers, heritage futures, the production of identity, post-conflict heritage, heritage branding, repatriation and reparation, landscape and memory, and intangible cultural heritage. Bodies of literature produced by key CHS (Critical Heritage Studies) scholars are analyzed.

ANTH 560 Anthropology and Law credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/560/)
Introduction to the field of legal anthropology. Addresses anthropological theories of the nature of law and disputes, examines related studies of legal structures in non-Western cultures, and considers the uses of anthropology in studying facets of our own legal system. Same as LAW 678. 4 graduate hours. 3 professional hours. Prerequisite: Consent of instructor.

ANTH 561 Archaeological Theory credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/561/)
Contemporary theory in archaeology. Different theoretical approaches are examined by critically analyzing seminal literature within the contexts of paradigmatic shifts in archaeology and general developments in the discipline of anthropology, focuses on materiality and corporality. Prerequisite: ANTH 461 or consent of instructor.

ANTH 565 Race and Cultural Critique credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/565/)
Same as AAS 561, AFRO 531, GWS 561, and LLS 561. See AAS 561.

ANTH 570 Cultural Aspects of Tourism credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/570/)
Same as RST 570. See RST 570.

ANTH 589 Readings in Anthropology credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/589/)
Individual guidance in intensive readings in the literature of one or more subdivisions of the field of anthropology, selected in consultation with the adviser in accordance with the needs and interest of the student. May be repeated in the same or separate semesters as topics vary. Prerequisite: One semester of graduate work in anthropology; consent of advisor.

ANTH 590 Dissertation Readings credit: 4 to 16 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/590/)
Supervised individual investigation or study of a topic not covered by regular courses. The topic selected by the student and the proposed plan of study are approved by the adviser and the staff member who supervises the work. May be repeated in the same term up to 8 G hours if topics vary or in separate terms up to 16 G hours if topics vary. Prerequisite: Consent of instructor.

ANTH 594 Cultural Heritage credit: 2 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/594/)
Same as LA 594. See LA 594.

ANTH 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/ANTH/599/)
Preparation of theses. Approved for S/U grading only. May be repeated in the same or separate terms if topics vary.

ARAB - Arabic

ARAB Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ARAB/)

Courses

ARAB 150 Lang&Culture of Arab World credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/150/)
Interdisciplinary overview of the major aspects of the contemporary Arab culture. Based on scholarly research, textual resources, media, and literature from both the Arab World and elsewhere, examines the Arab people's historical background; language varieties; literary traditions; and representative social institutions. Same as SAME 150.
This course satisfies the General Education Criteria for:
Cultural Studies - Non-West

ARAB 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/199/)
May be repeated.

ARAB 201 Elementary Standard Arabic I credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/201/)
Mastery of the Arabic alphabet and phonetics; elementary formal grammar and the development of reading and writing skills; and conversation in the formal noncolloquial style. Participation in the language laboratory is required.

ARAB 202 Elementary Standard Arabic II credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/202/)
Continuation of ARAB 201. Participation in the language laboratory is required. Prerequisite: ARAB 201.

ARAB 210 Colloquial Arabic I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/210/)
Development of conversational fluency in one of the major colloquial dialects; see Class Schedule for dialect to be taught each term.

ARAB 211 Colloquial Arabic II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/211/)
Continuation of ARAB 210. Prerequisite: ARAB 210.

ARAB 403 Intermediate Stand Arabic I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/403/)
Survey of more advanced grammar; emphasis on increasing conversational fluency in the formal noncolloquial style; and reading of prose texts reflecting aspects of Arabic culture. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARAB 202.

ARAB 404 Intermediate Stand Arabic II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/404/)
Continuation of ARAB 403. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARAB 403.

ARAB 405 Advanced Standard Arabic I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/405/)
Practice to attain conversational fluency in the formal noncolloquial style; introduction to Arabic literature; and readings in social, political, and historic writings. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARAB 404.

ARAB 406 Advanced Standard Arabic II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/406/)
Continuation of ARAB 405. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARAB 405.

ARAB 407 Topics Stand Arabic Lang&Lit I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/407/)
Selected readings from Modern Standard Arabic authors, with a focus on novels, plays, and basic poetry illustrative of Arab cultural issues and advanced level MSA grammar, as well as development of expository writing skills. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARAB 406.

ARAB 408 Topics Stand Arabic LangLit II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/408/)
Continuation of ARAB 407 with increased emphasis on the reading and comprehension of literary texts exemplified in advanced level novels, plays, and poetry, as well as on advanced mastery of expository writing skills. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARAB 407.

ARAB 409 Adv Top Stand Arabic LangLit I credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/409/)
Introduction to Modern Standard Arabic in the professions as documented in selected newspapers, educational radio and TV programs, works of fiction, biographies, anthologies, and professional journals. Students will be introduced to argumentative writing in MSA, expected to make oral presentations, and to write a research paper in their field. 3 undergraduate hours. 4 graduate hours. Prerequisite: ARAB 408.

ARAB 410 AdvTop Stand Arabic LangLit II credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/410/)
Continuation of ARAB 409 with increased emphasis on the development of comprehension and writing of professional language. 3 undergraduate hours. 4 graduate hours. Prerequisite: ARAB 409.

ARAB 412 Business Arabic credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/412/)
Introduction to Arabic business language as used in basic business settings, including commercial advertisement and business correspondence. Emphasizes language skills that will enable students to conduct job searches and locate job vacancies that match their fields of study and their interests. 3 undergraduate hours. 4 graduate hours. May be repeated in separate terms if topics vary to a maximum of 6 undergraduate hours or 8 graduate hours. Prerequisite: ARAB 405 or consent of instructor.

ARAB 413 Arabic-English Translation credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/413/)
Introduction to translation methodology and the profession of translation, with particular emphasis on the development of Arabic-to-English translation techniques and the acquisition of related knowledge above and beyond language skills. Students will be exposed to a variety of text types from different Arabic-speaking countries and learn to produce quality, professional translations and apply effective strategies to deal with the challenges of fully preserving the meaning of the original text while conveying the appropriate tone (style/register) and paying attention to grammar, mechanics, and audience-specific needs. Same as TRST 413. 3 undergraduate hours. 4 graduate hours. Prerequisite: Advanced standing in Arabic.

ARAB 490 Readings in Advanced Arabic credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ARAB/490/)
Directed reading course intended to develop an advanced student's facility with the Arabic language through various readings (authors, genres, themes, or other topical studies) and is conducted entirely in the Arabic language. Topics may vary from term to term. 3 undergraduate hours. 4 graduate hours. May be repeated in separate terms up to 6 undergraduate hours or 8 graduate hours, if topics vary. Prerequisite: ARAB 410 or consent of instructor.

ARCH - Architecture

ARCH Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ARCH/)

Courses

ARCH 101 Introduction to Architecture credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/101/)
Introduction to architecture, the architectural profession, and its allied fields emphasizing the value of architecture to society and human behavior. Contemporary problems in architectural design, including an overview of building components and systems, sustainability, urbanism, fabrication, history and preservation, health, and social justice.

ARCH 171 Introduction to Design I credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/171/)
The principles of architectural composition including form, space, and order are introduced. Students explore architectural precedents and design conceptualization. Students will apply two- and three-dimensional analog representation through sketching, drawing, analytical diagramming, and physical modeling.

ARCH 172 Introduction to Design II credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/172/)
Principles, concepts and theories of architectural design and their spatial experience are explored. Students are introduced to methods of observation and documentation of the environment and associated activities and behaviors. Students develop techniques for analyzing and designing relationships between programs, people, and places. Prerequisite: ARCH 171.

ARCH 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/199/)
May be repeated.

ARCH 200 Construction History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/200/)
Construction History explores 4500 years of human construction, focusing on materials, engineering, and fabrication. It provides an alternative narrative to traditional architecture, linking economics, industry, labor, engineering, and related disciplines. Lectures cover material typologies, production methods, and how they've influenced design, the evolution of building science, and the impact of technology on architectural aesthetics and ethics. The course concludes by examining contemporary design and technology issues. Credit is not given toward graduation for: ARCH 200 and ARCH 403 section CH.

ARCH 210 Introduction to the History of World Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/210/)
An introduction to the history of World Architecture, Urbanism, and the built environment from pre-history to the present; in addition to examining the formal properties of global architecture, this course explores buildings and cities in their cultural, social, political, and religious contexts. Prerequisite: Sophomore standing or consent of instructor.

ARCH 211 Transformations in African Centered Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/211/)
Evaluates the development of African design from a multi-disciplinary approach, utilizing key theories from the fields of Art History, Architecture, African Studies, History, Anthropology and Urban Planning. From these perspectives, we will study how culture, traditions, aesthetics, religion, politics, economics and geography shaped and influenced the design and construction of Africa's past and present built environment. Credit is not given toward graduation for: ARCH 211 and ARCH 490 section ACA.

ARCH 222 Islamic Gardens & Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/222/)
Same as ARTH 219 and LA 222. See LA 222.
This course satisfies the General Education Criteria for:
Humanities - Hist Phil
Cultural Studies - Non-West

ARCH 231 Anatomy of Buildings credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/231/)
A holistic approach to the introduction of architectural technology. Enabling students to integrate technical material with design, this lecture/lab course addresses building codes, zoning, construction documentation and delivery, digital fabrication, and the impact of energy, sustainability, and environmental forces on building construction, comparing general principles of light frame and heavy construction materials, components, and systems. Students learn how to build virtually and physically, understanding the roles design and construction professionals play on integrated teams.

ARCH 232 Structural Fundamentals credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/232/)
The study of forces, their distribution, and their impact on building structure. Topics include: equilibrium of rigid bodies in two and three dimensions; trusses; shear and bending moments in beams; arches and frames; stresses, strains, and deformations in axially loaded members; direct shear and bearing stresses; torsion; beam stresses and deflections; introduction to the design of structural members; and architectural applications. Prerequisite: MATH 220 or MATH 221, and MATH 231 or PHYS 101.

ARCH 237 Urban Scale Sustainability credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/237/)
Focuses on understanding and conceiving holistic approaches to urban-scaled sustainability challenges, by looking at environmental, economic, and social factors affecting built environments. Emphasis is placed on illustrating individual and collective social roles in producing healthy and robust communities, currently challenged by climate change and environmental degradation. Students will investigate and propose actions ranging from simple gestures like reducing, reusing, and recycling, to highly complex neighborhood, city, and regional design decision-making and policy implementation.
This course satisfies the General Education Criteria for:
Social Beh Sci - Soc Sci

ARCH 273 Fundamentals of Design I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/273/)
Context as a key influence in architectural design. Students expand on the methods of documentation and analysis of social, physical, and ecological factors to formulate design strategies and processes using analog and digital tools. Prerequisite: ARCH 172. Restricted to architectural studies majors.

ARCH 274 Fundamentals of Design II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/274/)
Introduces urban systems and conditions. Students expand their knowledge of social, political, economic, and environmental characteristics and are introduced to cartographic methods of urban analysis. Students investigate urban experience and use environmentally aware design processes to formulate design interventions. Prerequisite: ARCH 273. Restricted to architectural studies majors.

ARCH 314 History of World Landscapes credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/314/)
Same as LA 314. See LA 314.
This course satisfies the General Education Criteria for:
Advanced Composition
Humanities - Hist Phil
Cultural Studies - Western

ARCH 315 History of Modern Landscape Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/315/)
Same as LA 315. See LA 315.

ARCH 321 Environment, Architecture, and Global Health credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/321/)
This course surveys current research at the intersection of the built environment, health, and well-being. It emphasizes relationships among people and multiple scales of the environments they inhabit and the health and well-being consequences of these relationships. It comparatively examines these relationships within a broad range of Western and Non-Western cultures and contexts by introducing significant historical and contemporary theories, data of relevance, research processes, and applications in environmental design and planning processes. To improve person-environment fit, the roles of social groups, institutions, and organizations in the person-environment-health/well-being nexus within various cultural and geographic contexts are examined and compared.

ARCH 371 Intermediate Design I credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/371/)
Investigates individual and collective architectural habitats. Students examine the effects of environmental context, cultural perspectives, and multi-sensory perceptions in living conditions. Students design livable, integrated, and inclusive habitats considering universal design, accessibility, and life safety. Prerequisite: ARCH 274. Restricted to architectural studies majors.

ARCH 372 Intermediate Design II credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/372/)
Investigates the design of complex urban contexts at multiple scales. Students apply theoretical and analytical methods to understand and represent the social, cultural, and civic conditions present in and between the private and public realms. Students design an urban project that activates public space as part of the social and city fabric. Prerequisite: ARCH 371. Restricted to architectural studies majors.

ARCH 401 Independent Study credit: 0 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/401/)
Independent guided study and investigation in a selected area of architecture. 0 to 4 undergraduate hours. 0 to 4 graduate hours. Approved for both letter and S/U grading. May be repeated. Prerequisite: Junior standing in architecture, written proposal approved by a sponsoring faculty member and the approval of the Director of the School.

ARCH 402 Introduction to the History of Architectural Theory credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/402/)
Architectural theory, criticism, and historiography from antiquity to the present. Based on close readings of texts from antiquity to the present day. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or consent of instructor.

ARCH 403 Special Topics in Architectural History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/403/)
Special topics in Architectural History courses. Topics and subject matter to be published in course listings. 3 undergraduate hours. 3 graduate hours. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: ARCH 210 or consent of instructor.

ARCH 407 Rome: City of Visible History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/407/)
Rome's many layers show the intersection of multiple periods of architecture and the effects of politics, economics, religion, and culture on its urban context. This course considers Rome from its foundation until today, examining its urban form as well as individual monuments and their arts. We will employ a variety of evidentiary materials: individual monuments, maps, photographs, films, prints, and primary texts. Same as ARTH 407. 3 undergraduate hours. 3 graduate hours. Prerequisite: Sophomore standing.

ARCH 409 Studies in Spanish Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/409/)
Explores aspects of the architecture and urban design of Spain from antiquity until the present. 3 undergraduate hours. 3 graduate hours. May be repeated to a maximum of 6 hours. Prerequisite: ARCH 210.

ARCH 410 Ancient Egyptian & Greek Arch credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/410/)
Architecture and urban form in Egypt and the Greek world through the Hellenistic period. Same as CLCV 410. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210, ARTH 111 or CLCV 131.

ARCH 411 Ancient Roman Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/411/)
Architecture and urban form in the ancient Roman world from the Etruscans to Late Antiquity. Same as CLCV 411. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210; ARTH 111, CLCV 131, or CLCV 132.

ARCH 412 Medieval Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/412/)
Introduces the architecture, monumental arts, and urbanism of Byzantium and medieval western Europe from c. 300-1500, using a comparative approach. We will learn about Byzantium's domed churches and robust cities, Europe's Romanesque monasteries and pilgrimage destinations, and its soaring Gothic cathedrals, fortresses, and cities. It integrates architecture with the study of the roles of secular and ecclesiastical authority, design and technological developments, religious performance and observance, warfare and trade between regions, and developing urbanism. Same as ARTH 412 and MDVL 412. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or ARTH 111.

ARCH 414 Baroque & Rococo Arch credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/414/)
Developments in architecture, urban design, and garden art in Italy, France, Germany, and England in the seventeenth and eighteenth centuries. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210, ARTH 112, or consent of instructor.

ARCH 415 Modernity's Mirror: Nineteenth-Century Architecture 1750-1900 credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/415/)
Examines architecture and urbanism in the long nineteenth century (c1750-1900), focusing on Europe and North America. Significant attention will be paid to architectural responses to rapid technological and social changes, including industrialization and the rise of consumer culture, nationalism and colonialism, migration and urbanization, and changes to class and gender norms. We will also consider ancient and medieval architectural revivalism as anchors for political, social, and cultural meaning in the modern world. Same as ARTH 438. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or ARTH 112, or consent of instructor.

ARCH 416 The Architecture of the United States, c.1650 to Present credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/416/)
This course surveys the architecture and urbanism in the territory of the present-day United States from c.1650 CE forward. Topics include Native American urban centers; the diverse national origins of colonial architecture; the ongoing significance of vernacular forms; the search for an architecture of democracy; the architecture of slavery; industrialization and the built environment; the Great Migration, urbanization, and architecture; the rise of a formal architectural profession; Modernist architectures in the U.S.; architecture, real estate, and the forces of capital investment; new technologies and the built environment. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210, ARTH 112, or consent of instructor.

ARCH 417 Modern and Contemporary Global Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/417/)
This course surveys the comparative history of world architecture and urbanism from c1900 to the present, including Modernist, postmodernist and contemporary architectures. Themes include the rise of new typologies, materials and techniques; the centrality of utopian thought, both built and imagined; architecture's role in forging emerging national and postcolonial identities; architecture as visual communication; the rise of spectacle and the privatization of public space; adaptive reuse and emerging discourses of sustainability. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or ARTH 112, or consent of instructor.

ARCH 418 History of the Urban Environment credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/418/)
Examines the evolution of town planning and urban design from prehistory to the present; studies cultural and technical advancements affecting the form of the urban environment. 3 undergraduate hours. 3 graduate hours. Prerequisite: ARCH 210 or consent of instructor.

ARCH 419 Historic Building Preservation credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/419/)
Introduces historic preservation: legal, financial, and administrative assistance, graphic examination of restored buildings and sites, and application of conservation technology. 3 undergraduate hours. 3 graduate hours.

ARCH 424 Gender & Race in Contemp Arch credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/424/)
Analyzes how the built environment reflects social attitudes towards gender and race. Identifies the work of women and people of color in architecture and related disciplines as consumers, critics, and creators of the environment. Provides links with valuable professional networks in Chicago and elsewhere. Same as GWS 424. 3 undergraduate hours. 3 graduate hours. Prerequisite: Consent of instructor.

ARCH 433 Design of Steel and Reinforced Concrete Structures I credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/433/)
Loads and load combinations; design methods/structural safety; steel as a structural material; design of structural steel members subject to tension, compression, bending, and shear. Reinforced concrete as a structural material; design for bending, shear, and serviceability; introduction to design of columns. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARCH 232. Restricted to undergraduate and graduate students in the School of Architecture.

ARCH 434 Environmental Control Systems I credit: 5 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/434/)
Study of the control of thermal, luminous, and sonic environments with an emphasis on passive means of controls. Specific topics include: thermal comfort and behavioral implications; fundamentals of thermal behavior of buildings; the principles of heat and moisture in buildings; lighting fundamentals; light sources; effects of lighting on comfort and performance; energy economy and sustainability; acoustic fundamentals; room acoustics; noise control; basic electrical, plumbing, vertical transportation, and life safety systems. 5 undergraduate hours. 5 graduate hours.

ARCH 435 Structural Systems and Construction Methods credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/435/)
Presents a unified approach to architectural structures and construction technology to enable students to integrate design, engineering, and construction, while providing an understanding of how material/component/system decisions impact the work of architects, engineers, and constructors. Using a series of case-studies and project-based assignments, students learn about the various structural systems and construction methods used in the design of buildings. The evolution and state-of-the-art in structure and construction strategies will be discussed to provide requisite breadth and depth. Topics covered include: structural and building codes; structural systems and their layout planning; foundation systems; construction methods and technologies in wood, steel, concrete, and masonry; sustainability considerations; detailing; and digital modeling. 4 undergraduate hours. 4 graduate hours. Prerequisite: ARCH 231, ARCH 232 and ARCH 433.

ARCH 468 Overseas Architectural Studies credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/468/)
This course is designed to enrich the professional development of students in a study abroad location. Students participate in thematic workshops, seminars, lectures and field trips focused on understanding and analyzing architectural and urbanistic landmarks and settings on site through both directed and independent assignments. 3 undergraduate hours. No graduate credit. May be repeated in separate terms up to 6 hours. Prerequisite: Senior standing in the School of Architecture.

ARCH 471 Fundamentals of Arch Design credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/471/)
Basic architectural design methods, fundamentals, principles and concepts including creative problem solving in two- and three-dimensions. 6 undergraduate hours. 6 graduate hours. Prerequisite: Limited graduate standing in Architecture and concurrent enrollment in ARCH 231.

ARCH 472 Arch Des in Landscape & Cities credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/472/)
Intermediate architectural design methods, fundamentals, principles and concepts focusing on buildings in landscape and urban contexts. 6 undergraduate hours. 6 graduate hours. Prerequisite: ARCH 471 and concurrent enrollment in ARCH 233.

ARCH 473 Advanced Design I credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/473/)
Integrates building systems into the architectural design process. Students apply technical aspects, such as structural, environmental, energy, and enclosure systems, as well as qualitative performance parameters related to human experience to a building. 6 undergraduate hours. 6 graduate hours. Prerequisite: ARCH 372. Restricted to architectural studies majors.

ARCH 474 Advanced Design II credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/474/)
Integrates principles of building construction into the architectural design process. Students integrate materiality, fabrication, constructability, and detailing into their projects. Explorations increase in both program and context complexity. The investigations include both technical and theoretical aspects of design. 6 undergraduate hours. 6 graduate hours. Prerequisite: ARCH 473. Restricted to architectural studies majors.

ARCH 481 Concepts and Theories of Architectural Design credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/481/)
The first in a series of four introductory courses exploring the theoretical and practical foundations architecture and the built environment. This course introduces basic theories of architecture. It creates awareness of design concepts. Course content is arranged in three topical areas: Architecture and People, Architecture and Place, and Making Architecture. Each topical area addresses roles of designers and architects in contemporary and historical perspectives. No undergraduate credit. 1 to 3 graduate hours. Prerequisite: Restricted to graduate students.

ARCH 482 Drawing and Modeling credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/482/)
This course explores the theoretical and practical foundations of architecture and the built environment. It provides an introduction to the architectural graphic communication skills that architects use to visualize, analyze, and record creative thoughts including freehand sketching, architectural delineation, and digital applications. No undergraduate credit. 1 to 3 graduate hours. Prerequisite: Restricted to graduate students.

ARCH 483 Strategies of Architectural Design credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/483/)
Strategies of Architectural Design focuses on understanding the importance of site in relationship to human scale and the built environment through precedent analysis of typology, street, block and neighborhood. In addition, students will be introduced to basic strategies of architectural design and how these strategies are implemented through tectonics and materiality. No undergraduate credit. 1 to 3 graduate hours.

ARCH 484 Representation credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/484/)
This course develops understanding of how architects represent ideas, values and meaning in the built environment. The course focuses on three topic areas; • analysis and representation of existing contexts, including climate, built environment and natural features • 2d and 3D graphic communication techniques and tools • analog and digital modeling techniques and tools. Students will be introduced to multiple relevant software tools and acquire basic skills in each. No undergraduate credit. 1 to 3 graduate hours.

ARCH 485 The Architecture of Graphic Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/485/)
Architecture of Design explores the fundamental systems and principles of graphic design, with a strong emphasis on digital media. It covers essential concepts such as color theory, contrast and balance, visual hierarchy, figure-ground relationships, composition fundamentals, and typographic systems. Additionally, learners delve into the creation of icons, brands, logos, and data visualization techniques. Participants engage in weekly exercises designed to enhance practical skills, fostering a deeper understanding and mastery of graphic design principles. 3 undergraduate hours. 3 graduate hours. Credit is not given toward graduation for: ARCH 485 and ARCH 490 section AGD.

ARCH 490 Special Topics in Contemporary Architecture credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/490/)
Selected topics in and applications of contemporary architecture; see Class Schedule or department office for current topics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated in separate terms up to 12 undergraduate hours or 8 graduate hours, if topics vary. Prerequisite: Consent of instructor. For majors only.

ARCH 491 Arch Professional Internship credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/491/)
Full-time or part-time professionally supervised field experience in design intended to introduce students to the practice of architecture in a commercial firm or agency of government. Students work in the school-approved firm or agency of their choice. Written work reports and reflective experiential learning reports are required. 0 undergraduate hours. 0 graduate hours. Approved for S/U grading only. May be repeated in separate terms a maximum of 3 times.Prerequisite: Graduate standing or upper-level undergraduate standing, or consent of instructor. For students enrolled in the BSAS and M.Arch. programs of study only.

ARCH 498 Directed Research in Arch credit: 1 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/498/)
Participation in on-going research projects which may include energy management, environmental perception, facilities development, building science, and other topics. 1 to 4 undergraduate hours. 1 to 4 graduate hours. May be repeated to a maximum of 8 hours. Prerequisite: Approval of written proposal by instructor and Director of School.

ARCH 499 Off-Campus Study credit: 0 to 12 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/499/)
Provides opportunity for approved off-campus study. Detailed proposal for study off campus must be submitted for approval to the appropriate committee in the School prior to such study. Final determination of credit and its application toward the degree is made after a review of the student's off-campus work by the above committee and the Director of School. 0 to 12 undergraduate hours. 0 to 12 graduate hours. Approved for both letter and S/U grading. Prerequisite: Senior or graduate standing in architecture and approval of program prior to registration.

ARCH 501 Architectural Practice credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/501/)
Role of the architect in the building enterprise, professional ethics, and the conduct of professional practice; legal aspects of architectural practice and building construction; introduction of business management, marketing, operational procedures, financial planning, and cost control of architectural practices; and the administration of construction contracts. Prerequisite: Graduate standing or consent of instructor.

ARCH 510 History of World Landscapes credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/510/)
Same as LA 513. See LA 513.

ARCH 511 Seminar in Ancient Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/511/)
Seminar on topics in ancient architecture. Prerequisite: ARCH 410, ARCH 411, or equivalent as determined by the instructor.

ARCH 512 Seminar in Medieval Architecture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/512/)
Seminar on topics in medieval architecture and urbanism. Same as MDVL 512. Course Information: May be repeated to a maximum of 12 hours in separate terms. Course Information: Prerequisite: ARCH 411, ARCH 412, or equivalent as determined by the instructor.

ARCH 513 Sem in Ren & Baroque Arch credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/513/)
Seminar on topics in European architecture from the fifteenth through the eighteenth centuries. Prerequisite: ARCH 413 and ARCH 414, or equivalent as determined by the instructor.

ARCH 515 History & Theory of Modern Landscape Architecture credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/515/)
Same as LA 515. See LA 515.

ARCH 516 Seminar in Modern Arch History credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/516/)
Seminar on topics in architectural history from 1800 to the present. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: ARCH 415, ARCH 416, or ARCH 417.

ARCH 517 Modern Architectural History, 1850-Present credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/517/)
This course is a survey of significant buildings, movements, and figures of modern and contemporary architecture, contextualized in the social, cultural, political, economic, and technological developments of their time. It outlines the development of Modernist, postmodernist, and contemporary architectural thought. Key themes include industrialization and modernization, the development of global Modernisms and postmodernism in the twentieth-century, regionalism, globalization, the sustainability movement, and the development of digital technologies in architecture.

ARCH 518 Recording Historic Buildings credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/518/)
Examines techniques for recording historic buildings and sites: measuring, photographing, and drawing to Historic American Building Survey standards; taking field notes and investigating public records to document reports. Prerequisite: ARCH 419 and demonstrated ability in architectural graphics; or consent of instructor.

ARCH 519 Conserv of Building Materials credit: 3 or 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/519/)
Examination, analysis, and pathologies of building materials and techniques for treatment and repair of historic buildings. Emphasis is on conservation of traditional masonry, concrete, and metals. Field trips and lab work. To receive 4 hours credit, students must participate in lab. Prerequisite: ARCH 419.

ARCH 521 Applications in the Built Environment, Architecture and Global Health and Well-Being credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/521/)
Addresses topics at the intersection of environmental conditions and human health around the globe and engages students in reading, discussing, and applying the results of the latest research and translational studies linking environmental design to health in a range of diverse cultural contexts. Students consider the application of research to everyday practices and decision making, as well as to professional design, planning, and community health practices and engage in a secondary-source research project. Prerequisite: Restricted to graduate students or consent of the instructor.

ARCH 522 Advanced Research in Environment, Architecture & Global Health credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/522/)
This course examines seminal and current research at the intersection of environmental conditions and human health globally. It introduces techniques for locating and interpreting research, and synthesizing findings. Students explore a range of epistemologies and research ontologies, compare results and utility for health-focused architectural and environmental design and policy interventions. Students apply research to professional design, planning, and community health-focused problems and decision making, and engage in a secondary-source research project and its dissemination. Prerequisite: ARCH 321, ARCH 521, or consent of instructor. Restricted to graduate students.

ARCH 523 Architecture and Medicine credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/523/)
Outlines the historical development of the hospital in tandem with changes in medical knowledge and practices and provides a critical review of research that links principles in healthcare design to process and outcome variables. Students reflect on applications of science to design decision-making and engage in a research project. 4 graduate hours. Same as BSE 603. 4 professional hours. Approved for both Letter and S/U grading.

ARCH 525 Project-scale Health Impact Assessment credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/525/)
Introduces a Health Impact Assessment (HIA), a public health tool used to consider the potential health impacts of prospective plans, programs, and policies that may not conventionally include health outcomes in the decision-making process. Students will learn the values and principles underpinning HIA, the steps required to complete an HIA and appropriate methods and approaches for each step. While historically employed in policy evaluation, public health, and community planning, HIA is a new tool to consider at the scale of site and building design. Students will develop capacity to employ this tool during pre-design and in the design process for architectural projects. Through this course, students will gain an understanding of the importance of engaging a breadth of project target audiences in the HIA process, as well as the use of HIA as a tool to address health inequities across impacted groups. Students will undertake an HIA project. Prerequisite: Successful completion of ARCH 321 or ARCH 521. Graduate standing or permission of instructor.

ARCH 534 Building Economics credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/534/)
Study of factors affecting cost of building including: the building market, construction cost, estimates and cost control, time value of money and building life-cycle cost, measuring the worth of investments, depreciation and tax consideration of cash-flows. Prerequisite: Graduate standing or consent of instructor.

ARCH 535 Design of Tall Buildings credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/535/)
Introduction into tall building design, including design process and phases; architectural design, components, and planning; structural systems; wind engineering and using the wind tunnel; mechanical/electrical/plumbing systems and components; sustainability; and materials and construction.

ARCH 536 Planning and Design of Structural Systems credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/536/)
This course addresses the selection, planning, and preliminary design of structural systems for buildings. Emphasis is on understanding structural systems and their components as part of an integrated building system. Topics covered include a review of concepts from statics and strength of materials, structural requirements of strength-stiffness-stability, structural planning considerations, gravity loads and systems, lateral loads and systems, soils and foundations, and cable-net and other facade systems. Prerequisite: ARCH 232 and ARCH 433 or consent of instructor.

ARCH 537 Environmental Control Systems II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/537/)
This course investigates the control of thermal and luminous environments with an emphasis on active means of controls and building envelope design. Specific topics include: heating and cooling load and energy calculations; primary (boilers, chillers, etc.) and secondary (comfort delivery) mechanical systems; indoor air quality; energy, lighting, and daylighting codes and metrics; electric lighting properties, selection, design, and calculations; advanced daylighting strategies and calculations; visual comfort assessment; curtain wall and masonry systems; and rain screen principles. Prerequisite: ARCH 434 or consent of instructor.

ARCH 538 Integrative Design of Buildings credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/538/)
This advanced course emphasizes understanding of the organizational and functional principles of buildings and their subsystems as a means of accomplishing desired project goals, and to develop the creative ability of designing buildings of great functional synergy and organizational coherence, thus creating maximal value. Specifically, the course aims at 1) understanding the functional and organizational principles of the requisite building systems, 2) understanding their inter-system relationships, organizational variations, and their implications on overall design and construction, and 3) developing comprehensive integrative design ability for maximum value creation. Prerequisite: ARCH 536 and ARCH 537.

ARCH 550 Design of Steel and Reinforced Concrete Structures II credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/550/)
Analysis and design of structural steel members subject to combined forces; analysis and design of bolted and welded joints, and simple connections. Presentation of reinforced concrete slab and roof systems and their characteristics; design of one-way slab-joist systems; design of multi-span reinforced concrete beams under pattern loading; influence lines and practical design of continuous beams; deflection of reinforced concrete beams and slabs; development length and bar cut-offs; design of short and slender reinforced concrete columns including biaxial bending. Prerequisite: ARCH 433. Restricted to graduate students in the School of Architecture.

ARCH 551 Structural Analysis credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/551/)
Advanced problems in the analysis of statically determinate structures; general theories and methods of analysis of statically indeterminate structures by geometric and energy methods; and introduction to theory of plastic design. Prerequisite: ARCH 232 and ARCH 433.

ARCH 552 Soil Mech and Foundations credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/552/)
Soil properties and site exploration; stresses in soils; soil consolidation and settlement; shear strength of soils; bearing capacity; design of spread and combined footings; mats; pile foundations; lateral soil pressure and retaining walls. Prerequisite: ARCH 452 and ARCH 551.

ARCH 553 Advanced Reinforced Concrete Design credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/553/)
Strengthening, evaluation, and repair of existing structures; design of two-way slab systems using direct design method; design of two-way slab systems using equivalent frame method; design of post-tensioned concrete systems; design of shear walls; design of deep beams. Prerequisite: ARCH 550; ARCH 551; credit or concurrent registration in ARCH 560 or consent of instructor. Restricted to graduate students in the School of Architecture.

ARCH 554 Adv Steel Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/554/)
Advanced topics in the design of steel structures; critical study of the AISC specification; design of steel members and their connections; composite structures; and the analysis and design of continuous structures and tall buildings. Prerequisite: ARCH 560 or consent of instructor.

ARCH 555 Prestressed Concrete Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/555/)
Theory and design of prestressed concrete structures and suspension shell structures. Prerequisite: ARCH 553 or consent of instructor.

ARCH 556 Advanced Structural Planning credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/556/)
Study of the loads, functional and spatial requirements, and construction problems in the selection and design of structural systems for buildings; cost estimates; and integration of mechanical and electrical equipment. Prerequisite: ARCH 552and ARCH 553; credit or concurrent registration in ARCH 554 and ARCH 555, or consent of instructor.

ARCH 557 Seismic Analysis and Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/557/)
This course introduces the basic concepts of seismology, vibration theory, and their relevance to building structural design. The course gives students the opportunity to understand the codes and their application. The class will explore seismic forces and distribution in a building through computer modeling, calculation-based exercises, and two projects. Prerequisite: ARCH 551 or ARCH 536 or consent of instructor. Students may be concurrently enrolled in ARCH 551.

ARCH 558 Structural Wood Design credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/558/)
Analysis and design of wood structures for buildings; response of wood buildings to gravity and lateral loads; design of structural elements: beams, columns, beam-columns, members in tension, and trusses using NDS specifications; connections; plywood panels; diaphragms and shear walls. Prerequisite: ARCH 232 or equivalent.

ARCH 560 Advanced Structural Analysis credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/560/)
Advanced theory and analysis of statically indeterminate structures, recognizing effects due to temperature, settlement, and fabrication errors; matrix methods focusing on computer analysis techniques; introduction to plastic analysis and design. Prerequisite: ARCH 551.

ARCH 563 Human-centric Research for Designed Environments credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/563/)
Introduces research methods and techniques for investigating the relationship between people and designed environments they inhabit. Approaches for gathering and analyzing social and behavioral data are introduced. Results are applied as evidence in environmental design decision-making to achieve healthier environments. Same as LA 563. Prerequisite: Graduate standing in architecture, landscape architecture, or urban and regional planning or consent of instructor.

ARCH 571 Design: Detail and Architectonics credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/571/)
Design studio investigations of multiple techniques and methodologies addressing the design and fabrication of small-scale architectural constructions, explorations of specific sites and places, and interdisciplinary projects. Field trips may be required. Shop safety orientation required. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: Graduate standing or consent of instructor.

ARCH 572 Design: Health and Well-being credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/572/)
Design studio explorations responding to social, economic, political, and behavioral dimensions of human existence and settlement to encourage healthier designed environments. Projects investigate the experience of physical environments at the human scale and socially sustaining design strategies addressing diverse human needs. Field trips may be required. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: Graduate standing or consent of instructor.

ARCH 573 Design: Technology and Performance credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/573/)
Design studio investigations of buildings and systems focusing on structure, enclosure, technology and performance. Integration of building materials, components and systems and their impact on the design, construction, and sustainability of buildings. Field trips may be required. May be repeated in separate terms to a maximum of 12 credit hours. Prerequisite: Graduate standing or consent of instructor.

ARCH 574 Design: Architecture and Urban Design credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/574/)
Design studio investigations of issues that impact urban habitats, buildings and people. Architecture and urban design, preservation, and adaptation of new and existing buildings, cities, districts, public realms and urban environments. Designing and preserving buildings and communities in a sustainable manner. Field trips may be required. May be repeated in separate terms to a maximum of 12 credit hours. Prerequisite: Concurrent enrollment in ARCH 536 or consent of instructor.

ARCH 575 Integrative Architecture Design Studio credit: 6 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/575/)
Schematic design and development of a public building focusing on the integration of environmental, structural, and building envelope systems, while also addressing issues of accessibility, life safety, environmental stewardship, and site conditions. Field trips may be required. Prerequisite: ARCH 536 and ARCH 537.

ARCH 576 Architectural Design Seminar credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/576/)
Presentations and discussions relative to various areas of architectural and environmental design concerns. May be repeated to a maximum of 15 hours. Prerequisite: Consent of instructor.

ARCH 577 Theories of Architecture credit: 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/577/)
Review of principles of architectural design; factors in programming architectural requirements; design development; and evaluation and criticism. Prerequisite: ARCH 517 or consent of instructor.

ARCH 588 Independent Study credit: 0 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/588/)
Independent guided study and investigation in a selected area of architecture. Approved for Letter and S/U grading. May be repeated in the same or separate semesters to a maximum of 12 hours, if topics vary. Prerequisite: Graduate standing in Architecture, written proposal approved by a sponsoring faculty member and the approval of the Director of Graduate Studies.

ARCH 589 PhD Colloquium credit: 1 Hour. (https://courses.illinois.edu/schedule/terms/ARCH/589/)
Provides Ph.D. students insight on the opportunities, responsibilities and expectations of various career paths, including academia, industry, and government. Core responsibilities - research, teaching and service - required of academic faculty will be discussed, along with important resources and strategies to aid students in obtaining a position and plotting a successful career path. Approved for S/U grading only. May be repeated in separate terms to a maximum of 2 hours. Ph.D. students must repeat in separate terms to a maximum of 2 hours.

ARCH 590 Directed Research credit: 0 to 8 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/590/)
Nature and scope of projects to be determined through consultation between student and faculty advisor; open to architecture and landscape architecture majors as well as those from other disciplines who wish to engage in interdisciplinary work. Approved for Letter and S/U grading. May be repeated by students in the same or separate terms to a maximum of 12 hours. PhD students may repeat in the same term to a maximum of 12 hours or in separate terms up to 18 hours. Prerequisite: Consent of instructor.

ARCH 591 Special Problems in Architectural History and Theory credit: 3 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/591/)
Examines historical and/or theoretical problems in the history of architecture, the built environment, and related designed objects and arts in relation to emerging, interdisciplinary research. Topics can include thematic investigations of historical, conceptual, aesthetic, and theoretical problems; the work of particular architects and/or patrons; specific buildings or environments in a single or multiple geographic regions or periods. May be repeated in separate terms to a maximum of 12 hours. Prerequisite: Consent of instructor. Graduate Standing.

ARCH 592 Special Problems in Urbanism credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/592/)
Addresses emerging issues and research focused on cities, regions and urbanism, with particular focus on issues pertinent to architecture. Topics may include urban theories, morphological studies, social, political and economic influences in cities, sustainable urbanism, comparative analysis or cities, and urbanism in global contexts. May be repeated to a maximum of 12 hours. Syllabi for this course vary by instructor and semester. Prerequisite: Graduate Standing.

ARCH 593 Special Problems in Detail and Fabrication credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/593/)
The investigation and study of the design and fabrication of architectural components and assemblies. May be repeated as topics vary to a maximum of 12 hours. Prerequisite: Restricted to Graduate Students.

ARCH 594 Special Problems in Building Performance credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/594/)
In-depth investigation of emerging issues and specific areas of research interest beyond what is covered in graduate courses of regular offering in the area of building performance. Students, as individuals or in groups, are expected to propose a research plan and methods for a specific topic of research interest in consultation with the instructor, and execute it under the guidance of the instructor through consultation on a regular basis. May be repeated to a maximum of 12 hours. Prerequisite: Restricted to Graduate Students.

ARCH 595 Spec Prob Struct Theory & Des credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/595/)
Individual or group investigation and study in architectural engineering application; research in economy and design in correlation with architectural, mechanical, and structural requirements. May be repeated to a maximum of 12 hours. Prerequisite: Consent of instructor.

ARCH 596 Special Problems in Health and Wellbeing credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/596/)
In-depth investigation of emerging issues and specific areas of research interest by individuals or groups. Topics are those beyond what is covered in graduate courses regularly offered in the area of health and wellbeing, including theories and knowledge of specific buildings or projects in diverse global contexts; comparative studies; and theoretical, conceptual, and health-focused problems. May be repeated to a maximum of 12 hours. Prerequisite: Restricted to Graduate Students.

ARCH 597 Special Problems in Architectural Design credit: 2 to 4 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/597/)
Individual investigation of building types and systems, aesthetic theories, programming and other problems in architectural design. May be repeated to a maximum of 12 hours. Prerequisite: Restricted to Graduate Students.

ARCH 598 Specialized Architectural Practice credit: 0 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/598/)
This course adds an academic dimension to professionally supervised field experiences in which problems in architectural design and technology are defined, researched, and solved. Advanced doctoral students are introduced to applied research processes in any of architecture's sub-disciplines. Sites of applied research may include commercial firms, not-for-profit organizations, and government agencies. Students work in school-approved firms or agencies of their choice. Written accounts of work accomplished, documentation of research questions developed and pursued, and reflective experiential learning reports must be submitted for evaluation. Field experiences may be part time or full time. Approved for S/U grading only. May be repeated for up to 11 months total of training. This course is intended to facilitate CPT in professionally focused environmental design research for students in the PhD program. Prerequisite: Required research methods course (ARCH 505/LA 505 or ARCH 563/LA 563 or equivalent) and approval of both PhD program chair and student's PhD adviser. For PhD students who have completed stage 1 of coursework.

ARCH 599 Thesis Research credit: 0 to 16 Hours. (https://courses.illinois.edu/schedule/terms/ARCH/599/)
For doctoral students in Architecture who have completed their required coursework and are working on their dissertations or who are completing their dissertation proposals prior to their preliminary examinations. Consists of focused writing of the dissertation or proposal as directed by Dissertation Advisor. Arranged sessions provide time devoted to meeting writing goals; discussion of the writing process; advisor feedback on students' writing, and guidance on how to make progress on the writing. Reserved for use by Ph.D. students in the writing phase of their dissertation work or in the semester leading to their preliminary examinations. In extraordinary cases it may be approved for use by M.S. students submitting a written thesis. Approved for S/U grading only. May be repeated in separate terms to a maximum of 32 hours. Prerequisite: Consent of instructor and graduate program coordinator. Restricted to Ph.D. Students.

ART - Art

ART Class Schedule (https://courses.illinois.edu/schedule/DEFAULT/DEFAULT/ART/)

Courses

ART 100 Understanding Visual Culture credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/100/)
Interdisciplinary methods in recognizing and understanding meaning of a wide range of visual messages in the arts, design, and culture, with emphasis on critical thinking and analysis. Topics include: visual perception, visual persuasion, the visual interpretation of time and space, humor. Contemporary art and design are explored through the use of semiotics and historical, cultural and ethical aesthetic and technical perspectives.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

ART 102 Drawing for Non-Majors credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/102/)
Students will work with a wide variety of drawing materials, methods and strategies in a studio art context. Students will explore drawing concepts, form, and technique through production and critique of artworks, as well as address theories and histories of visual representation through readings and discussion. Students with little or no background in visual art are encouraged to participate as well as those who may have significant knowledge and experience. Not open to students majoring in art and design. Additional fees may apply. See Class Schedule.

ART 103 Painting for Non-Majors credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/103/)
Students will work with a wide variety of painting materials, methods and strategies in a studio art context. Students will explore painting concepts, form, and technique through production and critique of artworks, as well as address theories and histories of visual representation through readings and discussion. Students with little or no background in visual art are encouraged to participate along with those who have significant knowledge and experience. Additional fees may apply. See Class Schedule.

ART 104 Sculpture for Non-Majors credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/104/)
Students will work with a wide variety of sculptural materials, methods and strategies in a studio art context. Students will explore sculpture concepts, form, and technique through production and critique of artworks, as well as address theories and histories of visual representation through readings and discussion. Students with little or no background in visual art are encouraged to participate along with those who may have significant knowledge and experience. Additional fees may apply. See Class Schedule.

ART 140 Introduction to Art credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/140/)
A creative and expressive exploration of multiple art media, including but not limited to drawing, painting and design elements. This course is an introduction to the art making process with weekly interactive lectures and hands on studio sections. Additional fees may apply. See Class Schedule. Not open to students in art and design and architecture.
This course satisfies the General Education Criteria for:
Humanities - Lit Arts

ART 150 Introduction to Drawing credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ART/150/)
This is an introductory drawing course with an emphasis on heightening visual awareness and utilizing basic elements of technique and concept. Media such as pencil and charcoal will be used through a variety of technical and conceptual exercises. This course is designed for students who have little to no prior experience with drawing. Approved for Letter and S/U grading. May be repeated in separate terms up to 4 hours. Prerequisite: Enrollment is restricted to students of Living Learning Communities and minors in Art + Design.

ART 151 Black & White Film Photography credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/151/)
Course offers a foundation in black & white film photography. Camera use, film exposure & processing, and printing processes will be explained and demonstrated. Provides a technical & conceptual understanding of photography as a visual medium for expression and communication of ideas. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Restricted to students in Living Learning Communities and minors in Art + Design.

ART 152 Experimental Photography credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/152/)
Introduces students to a variety of alternative photographic media and image making practices, including: photograms, pinhole cameras and paper negatives, Diana medium format cameras, orthochromatic film, cyanotype and VanDyke brown printing, solarizing/specialty print developers and print toners. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 6 hours. Prerequisite: Restricted to students of Living Learning Communities and minors in Art + Design.

ART 153 Digital Photography Seminar credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ART/153/)
Course offers a foundation in digital photography. Camera use and digital editing will be explained and demonstrated. Elements of visual composition for effective photographs will also be included. Course is taught as a service-learning project with the Champaign County Humane Society. Weekly field trips to photograph at CCHS are a component of the class schedule. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Restricted to students of Living Learning Communities and minors in Art + Design.

ART 154 Digital Video credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ART/154/)
This is an introductory course for those who have little or no experience working in digital video formats. Students will explore the tools and techniques of moving image production through individual and team projects, as well as view and discuss existing films and videos. Students will learn basic camera functions and the use of professional editing programs for video and sound. Projects will focus on the creation of time-based media with an emphasis on technique, documentation, narrative, and context. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 4 hours. Prerequisite: Restricted to students of Living Learning Communities and minors in Art + Design.

ART 155 Introduction to Graphic Design - Unit One credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/155/)
This course introduces non-graphic design majors to visual literacy, composition, and the creative process. Students will solve real world visual communication problems in a hands-on studio environment using Adobe Creative Suite (Illustrator, Photoshop, and InDesign). Students will receive instruction in the elements of visual grammar and establish a foundation for visual literacy based on design principles. Using hands-on exercises and problem-solving projects, students will work through the creative process and learn industry standards necessary to function in today's commercial art field. Approved for Letter and S/U grading. Prerequisite: Enrollment is restricted to students of Living-Learning communities and minors in Art + Design.

ART 156 Ceramics: Wheel Throwing credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ART/156/)
Introduces the techniques of making functional ceramic work on the pottery wheel including: centering, opening, throwing a cylinder, making bowl and plate forms, and making handles. Class time will focus on demonstrations of techniques and instructor led skills development of same by students. Students will also learn about materials and chemistry in the production and application of glazes. Students will examine the work of contemporary ceramic artists towards developing a vocabulary for the assessment and critique of their own works as well as their peers. Weekly studio contact time 3.75 hours. Approved for Letter and S/U grading. May be repeated in separate terms to a maximum of 4 hours.

ART 160 The Image World: Photography for Non-Majors credit: 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/160/)
Explores photography and video as the most powerful media in today's image-saturated world. Students will look at, think about, discuss, and write about a diverse array of photography and video. They will study examples of historical and contemporary art, design, journalism and advertising, in various and numerous contexts. Students will make their own images, create their own videos, conduct visual research, and produce media-based projects. Students will also build their own individual social media sites for sharing their work with both their classmates and the world. Additional fees may apply. See Class Schedule. Credit is not given for ART 160 if credit for ARTD 160 has been earned. Prerequisite: For non-majors and Art & Design Minors.

ART 191 Unit One Studio/Seminar credit: 1 to 3 Hours. (https://courses.illinois.edu/schedule/terms/ART/191/)
Topics vary; consult Unit One office. Approved for Letter and S/U grading. May be repeated if topics vary.

ART 199 Undergraduate Open Seminar credit: 1 to 5 Hours. (https://courses.illinois.edu/schedule/terms/ART/199/)
Additional fees may apply. See Class Schedule. May be repeated.

ART 201 Art in Early Childhood credit: 2 Hours. (https://courses.illinois.edu/schedule/terms/ART/201/)
