UNIVERSITY OF ILLINOIS URBANA-CHAMPAIGN

The University of Illinois Urbana-Champaign was founded in 1867 as a state-supported, land-grant institution with a threefold mission of teaching, research, and public service. The university has earned a reputation as an institution of international stature. It is recognized for the high quality of its academic programs and the outstanding facilities and resources it makes available to students and faculty. Scholars and educators rank it among a select group of the world's great universities.

About the Catalog

The online catalog is for informational purposes only, is considered an academic planning tool, and does not constitute a contract. The information was current at the time of publication and is subject to change.

The online catalog is updated regularly as degree programs, courses, and requirements change.

The archived versions of the current catalog and older catalogs are available in the *Archived Academic Catalogs* section.

Who to Contact

Individual academic units should be consulted for further information related to specific courses or programs. General questions about the Academic Catalog can be directed to the Office of the Registrar at cmss-catalog@illinois.edu.

The Campus

Located in the adjoining cities of Champaign and Urbana, approximately 140 miles south of Chicago, the university and its surrounding communities offer a cultural and recreational environment ideally suited to the work of a major research institution.

The University of Illinois Urbana-Champaign is a residential campus of classrooms, laboratories, libraries, residence halls, and recreational and cultural facilities. Nearly every facility on campus is accessible to people with physical disabilities, and the university's programs and services for people with disabilities have served as models worldwide.

Colleges and Schools

Ten undergraduate-serving academic units offer over 150 programs of study leading to baccalaureate degrees. They are the College of Agricultural, Consumer and Environmental Sciences; College of Applied Health Sciences; Gies College of Business; College of Education; Grainger College of Engineering; College of Fine and Applied Arts; College of Liberal Arts and Sciences; College of Media; School of Social Work; and School of Information Sciences. The Graduate College oversees administration of over 100 fields of study in the aforementioned colleges and schools plus the School of Labor and Employment Relations. Professional programs are offered through the College of Law, the Carle Illinois College of Medicine, and College of Veterinary Medicine. National surveys consistently rank the University of Illinois Urbana-Champaign among the top ten institutions in many fields of study, with several colleges and departments ranked among the top five.

GENERAL INFORMATION

The *University of Illinois Urbana-Champaign Academic Catalog* is the official listing of courses, programs, and degree requirements for undergraduate and graduate students. Information on courses, curricula, fees, policies, regulations and other matters is subject to change during the period for which the *Catalog* is in effect.

The class schedule is available each term in the Course Explorer *(*http://courses.illinois.edu*)*. The class schedule lists those courses that will be offered during specific terms, as well as times and locations. Not all courses listed in this *Catalog* are offered every term.

Course Descriptions

The *Catalog* lists courses of instruction alphabetically by subject and numerically by course number. The course number denotes the intended/recommended level of the course:

Courses numbered 000-099 are for preparatory work that does not count toward a degree but do count for tuition and load.

Courses numbered 100-199 are lower level undergraduate courses.

Courses numbered 200-299 are lower level undergraduate courses.

Courses numbered 300-399 are upper level undergraduate courses.

Courses numbered 400-499 are upper level undergraduate and graduate courses.

Courses numbered 500-599 are graduate level courses.

Courses numbered 600-799 are professional courses (available to College of Medicine, Law, and Veterinary Medicine) and select graduate courses.

Course credit is listed after each course title. The university counts credit in credit hours. Following the credit hours is a brief description of the content, requirements for registration to the course (if any), and other advisory statements. Additional information relating to the course content is available in the Course Explorer *(*http://courses.illinois.edu*)*. For information on credit policies, see the *Student Code*.

A **crosslisted** course refers to a course offered under the same course title by a different department. Courses may be crosslisted with one or more departments and will be noted by the statement: "**Same as**." The description of a crosslisted course is found only in the entry for the controlling department. Reference to the controlling department's course is noted by "See...."

Prerequisites are statements that refer to special requirements for registration in certain courses. These may include one or more courses that must be completed prior to, or in the same term. These statements may also recommend knowledge, skills or standards, or class standing that must be demonstrated prior to registration.

Illinois Articulation Initiative (IAI Code)

The Illinois Articulation Initiative (IAI) (https://itransfer.org/) is a statewide transfer agreement among more than 100 public and private four-year and two-year higher education institutions in Illinois. The agreement is designed to facilitate students transferring between colleges and universities and works best for students who are undecided on the transfer-to institution that will grant their baccalaureate degree. For more information on IAI Codes visit the Illinois Transfer Portal Page (https://itransfer.org/aboutiai/).

Degree and General Education Requirements

General Education Requirements

The University of Illinois Urbana-Champaign requires that all undergraduate students take General Education - or "Gen Ed" - courses to gain and use broad knowledge beyond the specialized learning they will do in a major field of study. These Gen Ed requirements cover the kinds of knowledge all students should have: the humanities and arts, social and behavioral sciences, natural sciences and technology, quantitative reasoning, composition/writing, and cultural studies.

General Education courses at Illinois are mindful of our students' diverse backgrounds, needs, and interests, and are an essential component of the transformative learning that prepares our graduates to become alumni who make a significant societal impact. These courses build students' abilities to think critically, solve problems, generate new ideas and create knowledge, make connections between academic disciplines, respect and understand differences, and develop as citizens and leaders.

General Education at Illinois is more than a set of required courses; it is a gateway into the Illinois experience. Additional information may be found on the General Education Program at Illinois website (https://gened.illinois.edu/).

Courses are noted as fulfilling one or more of the following categories:

- Composition I
- Advanced Composition
- Humanities and the Arts: Literature & the Arts or Historical & Philosophical Perspectives
- Natural Sciences and Technology: Life Science or Physical Science
- Quantitative Reasoning
- Social and Behavioral Sciences
- Cultural Studies: Western/Comparative Cultures, Non-Western Cultures, and US Minority Cultures

For a list of current courses approved for General Education credit, please visit the Course Explorer (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Written Communication Requirement

Undergraduate Students:

- Satisfactory proficiency in written communication is a requirement for all undergraduate degrees awarded at the University of Illinois Urbana-Champaign. This proficiency can be certified by the satisfactory completion of the "Composition I" general education requirement via the one-semester, four-hour course Rhetoric 105 (Writing and Research); the two-semester, eight-hour sequence of Rhetoric 101 (Principles of Writing) and 102 (Principles of Research); or the two-semester, six-hour sequence Communication 111 and 112 (Oral & Written Communication I and II).
- A student who achieved, prior to enrolling in college-level coursework, a sufficiently high score on either the appropriate college-preparatory English exam (currently ACT, SAT, AP, or IB) will earn course credit that fulfills the general education "Composition I" requirement and thus will satisfy the Written Communication requirement

for graduation. Note that ACT and SAT scores are taken into consideration for fulfillment of this requirement only when submitted to the Office of Undergraduate Admissions as part of the application process. More information can be found under “Proficiency Testing” at go.illinois.edu/pnp (http://go.illinois.edu/pnp/).

- Non-native English-speaking students who are mandated to take the English Placement Test (EPT) and given an English as a Second Language (ESL) placement must fulfill their Written Communication requirement by taking the two-semester, six-hour sequence of ESL 111 and 112 or the one-semester, four-hour ESL 115 course. They might also be required to take ESL 110 (Pronunciation). Non-native English-speaking students who are not required to take the EPT due to sufficiently high TOEFL iBT or IELTS scores may elect to satisfy the Written Communication requirement by taking the ESL, or the Rhetoric, or the Communication sequences. Students in this category who wish to take ESL must take the EPT to determine correct placement.
- If the academic credentials of a transfer student do not indicate fulfillment of coursework equivalent to fulfill the Written Communication graduation requirement, the student will need to do additional coursework to satisfy this requirement. Non-native English-speaking transfer students may be required to take the English Placement Test (EPT).

Graduate Students:

- Satisfactory proficiency in academic writing in English is a requirement for all graduate degrees awarded at the University of Illinois Urbana-Champaign.
- Graduate students who are admitted on limited status because they do not meet this proficiency requirement prior to admission may be placed into mandatory ESL courses based on the results of the EPT exam.
- Proficiency can then be certified by the satisfactory completion of a one-semester course (ESL 515) or the two-semester sequence (ESL 511 and 512). Students may also select equivalent coursework from the "English for specific purposes" tracks available through ESL (e.g., business track ESL 521, 522). International graduate students may also be required to take ESL 510 (Pronunciation).
- Mandatory ESL course assignments must be fulfilled in order to be eligible for graduation.

Health and Kinesiology Activity Courses, Language Other Than English, and Undergraduate Open Seminar Credit

Credit for Health and Kinesiology Activity Courses

Credit earned in Health and Kinesiology activity courses may be included in the grade point average at the discretion of the individual colleges. Up to eight (8) hours of these courses may be included in the total hours required for graduation. The following courses are activity courses in the Department of Health and Kinesiology: HK 100/KIN 100, HK 101/KIN 101, HK 102/KIN 102, HK 103/KIN 103, HK 104/KIN 104, HK 106/KIN 109, HK 107/KIN 107, and HK 108/KIN 111. Courses transferred from other institutions and deemed to be Health and Kinesiology activity courses are also subject to these limits. Transferred courses may be articulated as a direct equivalent to a Health and Kinesiology activity course or to HK 1-- as appropriate.

Language Other Than English Credit

- Effective for all entering freshmen in Fall 2000 or later, the following language requirement must be completed for graduation.
- This requirement may be satisfied by:
    1. Successfully completing a third-semester college-level course in a language other than English;
    2. Successful completion, in high school, of the third year of a language other than English; or
    3. Demonstrating proficiency at the third semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.
- Generally, one year of high school language study is equivalent to one semester of college study.
- Current list (https://registrar.illinois.edu/courses-approved-for-language-requirements/) of courses approved to satisfy the language requirement.
- If you enter UIUC without three years of language other than English in high school, or you plan to continue with the language you studied in high school, you must take a language placement test to determine the courses in which you should enroll.
- An exception to the university third-level requirements is for the students in the Gies College of Business (BUS) who matriculated prior to Fall 2021 and all students in the Sciences and Letters Curriculum of the College of Liberal Arts and Sciences (LAS). These students are expected to gain language knowledge equivalent to the completion of the fourth semester of college study in a language. The Language requirement may be met in any of the following ways:
    1. Successfully completing a fourth-semester college-level course in a language other than English;
    2. Successful completion, in high school, of the fourth year of a language other than English;
    3. Successful completion of the third-semester level in each of two different languages other than English by any combination of high school and college work;
    4. Demonstrating proficiency at the fourth-semester level in a language proficiency examination approved by the College of Liberal Arts and Sciences and the appropriate department.
- Students enrolled in the LAS Chemistry and Chemical Engineering Specialized Curricula are exempt from the four semester LAS Language requirement and must instead adhere to the Campus requirement of three semesters or equivalent. Please contact your adviser if you have any further questions.
- Except as prohibited or limited by the established policy of the student’s college, credit in University of Illinois Urbana-Champaign language courses other than English taken to remove high school entrance deficiencies may, at the discretion of the college:
    1. be counted in the total hours required for graduation, or
    2. be accepted in partial or complete satisfaction of the language other than English requirement for the degree.

- Normally no more than ten hours of proficiency credit for the study of a single language other than English at the elementary and intermediate level shall be counted for graduation in the College of Liberal Arts and Sciences. Additional credit may be granted for advanced courses emphasizing literature and language structure rather than communicative competence in the language.
- Students with a verified Seal of Biliteracy will earn 8 hours of credit equivalent to the first two levels of foreign language regardless of the language other than English. The credit will appear as 8.00 Earned hours from Seal of Biliteracy on the official University of Illinois at Urbana-Champaign transcript in the Transfer Credit Accepted by the Institution section.

Credit for Undergraduate Open Seminar Courses

- Credit in each 199 course shall not exceed four credit hours per semester.
- A student may accumulate an unlimited number of credit hours in 199 courses, but no more than 12 such hours listed on the student's transcript may be counted toward fulfilling graduation requirements, except in cases in which a larger number of credit hours in 199 courses is an integral part of a formal, college-approved program of study (e.g., Individual Plans of Study).
- A 199 course appears on a student's transcript with the departmental rubric and the title "Undergraduate Open Seminar" when a specific section title has not been assigned by the department offering the course.

Policy Notes

Registration Status

Registration status for enrollment reporting by the university is determined by the cumulative academic credit hours across all parts of term for the fall or spring semesters and is the same for all student levels:

- Full-time – 12 or more credit hours per semester
- Three-Quarter time – 9 to 11.99 credit hours per semester
- Half time – 6 to 8.99 credit hours per semester

Exceptions to this policy are provided in Student Code 3-301 (https://studentcode.illinois.edu/article3/part3/3-301/).

Transfer Credit Policies and Articulation Agreements

Transfer credit policies can be found in the Transfer Handbook (https://transferhandbook.illinois.edu/) and Policies and Procedures (https://www.admissions.illinois.edu/policies/#policies-transfer) from the Office of Undergraduate Admissions.

The university participates in the Illinois Articulation Initiative (https://transferhandbook.illinois.edu/) and complies with the expectations of the Student Transfer Achievement Reform Act for students transferring from an Illinois Community College. As such the university will not require a student transferring pursuant to the Student Transfer Achievement Reform Act to (a) take more than 60 additional semester units beyond the lower-division major requirements for majors requiring 120 semester units if the student remains enrolled in the same program of study and completed the major transfer requirements or (b) to repeat courses that are articulated with those taken at the community college level and counted toward an associate degree for transfer.

Illinois Copyright Policy

The University of Illinois Urbana-Champaign makes every effort to comply with laws and institutional policies on copyright and to encourage awareness within its community of both responsibilities and appropriate actions for compliance.

Copyright law can be a complex topic to navigate, and the issues students, faculty and staff must confront when it comes to copyright are often different. For that reason, the university has compiled a variety of resources to help you navigate your copyright responsibilities.

Copyright Resources (http://copyright.illinois.edu/resources/)

In addition, a variety of laws and regulations shape the specifics of copyright law. The Higher Education Opportunity Act is one of the laws that shapes copyright policies and education efforts at colleges and universities in America. How the University of Illinois Urbana-Champaign satisfies the requirements of HEOA are outlined on this page (http://copyright.illinois.edu/compliance/).

Religious Observances

The University of Illinois Urbana-Champaign supports religious, spiritual, and secular inclusion (https://diversity.illinois.edu/diversity-campus-culture/religious-inclusion/). The institution complies with the University Religious Observances Act (110 ILCS 110/). Details of the Act are available here (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1076&ChapterID=18).

Smoke and Tobacco-Free Campus

Smoking and the use of all non-combustible tobacco products and non-FDA approved nicotine delivery devices and products is prohibited on all campus property, both indoors and outdoors, and in university-owned vehicles and in privately owned vehicles parked on campus property. The advertising, sale, and free sampling of tobacco products and non-FDA approved nicotine delivery devices and products are prohibited on campus property. Littering the remains of tobacco and non-FDA approved nicotine delivery devices or products or any other related waste products on campus property is prohibited. The complete policy is available here (http://cam.illinois.edu/v/v-B-2.1.htm).

State Approving Agency Certification

Effective August 1, 2019, the University of Illinois Urbana-Champaign is in compliance with Title 38, Veterans' Benefits, Part III, Readjustment and Related Benefits, Section 3679, Disapproval of courses, Subsection e. [38 U.S. Code 3679(e) (https://uscode.house.gov/view.xhtml/?path=/prelim@title38/part3/chapter36&edition=prelim)].

Student Code

Policies and procedures applying to all undergraduate, graduate, and professional students enrolled at the University of Illinois Urbana-Champaign are found in the Student Code (http://studentcode.illinois.edu/).

Student Consumer Information

Information and disclosures regarding institutional accreditation, programs, and services at the University of Illinois Urbana-Champaign is available on the Office of the Provost's website (http://provost.illinois.edu/student-consumer-information/). This includes a description of the institution's accreditation and state authorization,

contact information for filing complaints with the accreditor and the state, financial aid, campus security, intercollegiate athletics, gainful employment programs, and student outcomes. A paper copy of the information on the website can be made available upon request.

U of I System Statement on Sex Discrimination, Sexual Harassment and Other Sexual Misconduct

Please refer to the University of Illinois System website (https://www.hr.uillinois.edu/cms/One.aspx?portalId=4292&pageId=5671) for the most up-to-date statement on Sex Discrimination, Sexual Harassment and Other Sexual Misconduct.

Professional Licensure Disclosures

The University of Illinois Urbana-Champaign provides public licensure disclosures pursuant to 34 CFR 668.43(a)(5)(v) (https://www.federalregister.gov/d/2019-23129/p-1593/) for educational programs designed to meet or advertised as meeting requirements for professional licensure or certification.
These public licensure disclosures also address requirements found in 38 C.F.R. Part 21 relating to veterans' education benefits.

Disclosures by College (http://www.dmi.illinois.edu/ProfLicDis.htm)

GI Bill® Pending Payment Policy

Beginning August 1, 2019, and despite any policy to the contrary, the University of Illinois Urbana-Champaign will not take any of the four following actions toward any student using U.S. Department of Veterans Affairs (VA) Post 9/11 G.I. Bill® (Ch. 33) or Veteran Readiness and Employment (Ch. 31), or Survivors' and Dependents' Educational Assistance DEA (Ch. 35) benefits while their payment from the United States Department of Veterans Affairs is pending to the educational institution:

- Prevent their enrollment;
- Assess a late penalty fee to;
- Require they secure alternative or additional funding;
- Deny their access to any resources (access to classes, libraries, or other institutional facilities) available to other students who have satisfied their tuition and fee bills to the institution.

However, to qualify for this provision, such students may be required to:

- Produce the VA's Certificate of Eligibility by the first day of class;
- Provide written request to be certified;
- Provide additional information needed to properly certify the enrollment as described in other institutional policies (see our VA School Certifying Official for all requirements).

I hereby certify this addendum to be true and correct in content and policy.
Our institution will adopt this addendum, or one of similar import, in the next revision of our catalog.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government website (https://www.benefits.va.gov/gibill/).

Annual Announcement of Copyright Policies

Copyright infringement is the act of exercising, without permission or legal authority, one or more of the exclusive rights granted to the copyright owner under Section 106 of the Copyright Act (Title 17 of the United States Code). Infringement may occur when a copyright protected work is reproduced or distributed without authorization, including when it is uploaded or downloaded from the Internet or otherwise published without permission. Protected works may include (among other works) photographic images; recordings (including class recordings); class materials, including, for example lectures and slides, assessment materials and examinations, and course readings; music; movies; and television programs. Although there are limited exceptions not requiring permission, such as the doctrine of fair use, sharing substantial portions of such works, including on peer-to-peer networks, without authorization by the rights owner or by meeting the exception requirements is an infringement.

Penalties for copyright infringement include civil and criminal penalties. Copyright compliance enforcement agencies aggressively pursue infringers. If you are infringing, even unknowingly, you can be subject to civil damages per work infringed, and even criminal fines and jail time.

All universities in the University of Illinois System make every effort to comply with laws and institutional policies on copyright. Individuals who receive a copyright infringement notice may face disciplinary or employment actions. These actions may include, but are not limited to, loss of network access, mandatory training about copyright infringement, conduct sanctions, and potential dismissal from the university.

For more information about copyright at the University of Illinois, please visit the Illinois Copyright Policy page (https://copyright.illinois.edu/).

UNDERGRADUATE PROGRAM INDEX

The undergraduate Colleges and Schools offer over 150 programs of study leading to baccalaureate degrees. Undeclared students begin their college career in the Division of General Studies before transferring to a degree program.

Degree Programs (emphasis)	School/College	Undergraduate
ACES Undeclared	ACES	NONE (p. 11)
Accountancy	BUS	BS (p. 12)

ACES Undeclared

The ACES Undeclared program allows students to explore various majors within the College of ACES. Students will work with an advisor in the Office of Academic Programs to select coursework based on their interests with the purpose of declaring a major. The ACES Undeclared program is flexible and allows students to select courses across various disciplines within the College of ACES. Students are not able to earn a degree in ACES Undeclared and are limited in the number of semesters they are allowed to remain in the program before declaring a major.

Students in ACES Undeclared must maintain a 2.0 or higher GPA to remain in good standing in the program. Actual GPA for transfer to ACES degree program will vary. Students must declare major by fifth semester or 60 hours.

Specific course recommendations will vary depending on the goals and interest of the student.

Graduation Requirements
Maximum hours allowed in ACES Undeclared: 30 hours.
Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Specific course recommendations will vary depending on the goals and interest of the student.

Code	Title	Hours

Second course in major		3-4
ACES Elective		3

Code	Title	Hours
Total Hours		**30**

The ACES Undeclared program allows students to explore various majors within the College of ACES without having to select one during the admissions process. Students will work with an advisor in the Office of Academic Programs, to select coursework based on their interests with the purpose of declaring a major. The time within the program is ideally no more than 4 semesters, but an extension to a fifth semester is available. The goal is to move students to their intended degree program as soon as they have met the degree requirements and feel it is the best option for their career and interest goals.

Accountancy, BS

for the degree of Bachelor of Science Major in Accountancy

The Gies accountancy major combines technical knowledge in accounting, assurance, taxation, and data analytics with professional competencies in critical thinking, communication, leadership, and strategic decision-making. Accountancy majors will study the principles, concepts, and methods used to record and report the transactions and activities of a business entity, as well as the tools and processes to audit and analyze accounting information. Accountancy majors will also study the role of accounting information in shaping and implementing key business strategies. Career opportunities for accountancy majors include positions in audit and assurance services, corporate accounting, taxation, consulting and advisory services, and in governmental and not-for-profit entities.

In addition to the accountancy major requirements, students in accountancy must meet the University General Education requirements and the College of Business core requirements (for more detail, see the Gies College of Business undergraduate section (p. 2304)).

for the degree of Bachelor of Science Major in Accountancy

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 8 hours of Kinesiology activity courses, numbered 100-111 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. There is no limit on the hours of Military Science/ROTC courses that will count toward degree completion. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Graduation Requirements

Minimum hours required for graduation: 124 hours

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science Major in Accountancy

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

First Year

Total Hours 124

for the degree of Bachelor of Science Major in Accountancy

1. **Disciplinary Competence:** Students will have sufficient knowledge of accounting and data analytic concepts to solve structured and unstructured business problems.
2. **Written and Verbal Communication Competency:** Students will be able to effectively communicate, both verbally and in writing. This competency will extend to communication in individual and team settings.
3. **Professional Responsibility:** Students will develop an inclusive, team-oriented mindset that recognizes the value of diversity and belonging, and emphasizes professionalsâ€™ responsibilities to themselves, their peers, and their community.

Accountancy + Data Science, BS

for the degree of Bachelor of Science in Accountancy + Data Science

This major is sponsored by the Department of Accountancy in the Gies College of Business, in collaboration with the Departments of Statistics, Computer Science, iSchool, and Mathematics. The Accountancy +Data Science major is designed for students seeking to supplement their accounting foundation with a strong background in data science. The major prepares students for professional or graduate work in all Accounting fields, but particularly those focused on analytics.

for the degree of Bachelor of Science in Accountancy + Data Science

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Twelve hours of 300 and 400-level courses must be taken on this campus.

Minimum hours required for graduation: 124 hours

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Meaningful Research or Discovery Experience

Code	Title	Hours
One of the most important skills a student will gain in an ACCY +DS degree will be the ability to present data in meaningful ways. A meaningful research and experience is as much a pillar of this degree program as both the core coursework and the area of specialization. This capstone experience can be fulfilled through BUS 301. This course is an active learning, real-client experience that will allow students to join their data science skills with their business skills.		
Total Hours		**3**

for the degree of Bachelor of Science in Accountancy + Data Science

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Actuarial Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences in Actuarial Science

This major is sponsored by the Department of Mathematics, and is an interdisciplinary subject involving mathematics, statistics, and financial economics. It is designed to prepare students to enter the actuarial profession, as well as to provide a background in quantitative finance and risk management.

Undergraduate programs in Mathematics

- Actuarial Science, BSLAS (p. 16)
- Mathematics, BSLAS (p. 547)
- Mathematics & Computer Science, BSLAS (p. 559)

for the degree of Bachelor of Science in Liberal Arts and Sciences in Actuarial Science

Departmental distinction: To qualify for distinction, the student must have a grade point average in ASRM courses of at least 3.25, and pass at least two examinations offered by the professional actuarial societies. To qualify for high or highest distinction, the student must have passed at least three professional exams, with highest distinction going to those whose grade point averages in mathematics are at least 3.75. Finance courses and additional professional exams may also be given consideration in close decisions.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work normally equates to 58-61 hours including 32-33 hours of actuarial courses beyond calculus. Twelve hours of 300- or 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Liberal Arts and Sciences in Actuarial Science

Student Learning Outcomes

1. Have sufficient exposure to actuarial and financial mathematics to be familiar with at least 80% of the material on five of the preliminary Society of Actuaries (SOA) credentialing exams.
2. Be familiar with the role of insurance in society, basic economic theory, and the basics of how insurance and financial markets operate.
3. Have familiarity with several of the technical tools, computer languages or software packages used by actuaries.
4. Develop communication, leadership and teamwork skills, and understand their importance in the actuarial industry.
5. Be able to apply this knowledge and these skills in new combinations and to new problems.

Advertising, BS

for the degree of Bachelor of Science in Advertising

ADVERTISING (ADV), teaches students about the role it plays in society, as well as its impact in business and sales. Advertising influences the products we buy, the media we consume, the causes we support, and the celebrities we follow on social media. In this program students will learn about branding, strategy, consumer behavior, and more. Whether you are

creative, analytical, interested in television, print, or digital media -- the advertising major has something for everyone!

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

Please note: Courses used to fulfill University General Education requirements or to fulfill requirements for a minor may count toward these requirements.		
Total Hours		**124**

for the degree of Bachelor of Science in Advertising

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

When reviewing the sample sequence, please note media electives are any non-required advertising (ADV), journalism (JOUR), media & cinema studies (MACS), or media (MDIA) course. Advertising (ADV) electives are any advertising course not already required for the major. Electives are additional courses to help students achieve 124 hours required for the degree. These can often be any level, but students should check with their advisor for specific guidance.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This may require up to three semesters of language depending on high school coursework or placement. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Advertising

Students graduating with a Bachelor of Science in Advertising will be able to:

1. Evaluate the ethical, economic, legal, cultural, and historical dimensions of advertising in a global society.
2. Conduct research and analyze secondary and primary data to develop effective brands and advertising planning and strategy.
3. Evaluate and analyze media and data for effective advertising and understand the media landscape and media ecosystems.
4. Turn strategy into innovative thinking, creative concepts, and the production of brand communications.
5. Apply creative concepts and innovative thinking to produce culturally relevant brand storytelling and content creation.
6. Effectively collaborate within diverse teams to design and deliver strategic and engaging brand content and presentations.

Aerospace Engineering, BS

for the degree of Bachelor of Science in Aerospace Engineering

The Aerospace Engineering curriculum provides a strong fundamental background in engineering, mathematics, and science, along with the ability to apply this fundamental knowledge to the analysis and design of future aircraft and spacecraft. It also prepares students for lifelong learning and the attainment of their career goals in the field of aerospace engineering and in a wide range of other areas. The concepts of system design are introduced early in the curriculum and culminate in the yearlong senior capstone design experience (AE 442, AE 443), in which students work in teams to respond to a design challenge from industry, government, or a professional engineering society. Technical and free electives allows the student to pursue an individualized program of study.

Current Program Educational Objectives

for the degree of Bachelor of Science in Aerospace Engineering

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Aerospace Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Aerospace Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

African American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in African American Studies

African American Studies is a field that systematically explores the life and culture of African American peoples and their African Diaspora relationships, patterns, and ties. Those who major in African American

Studies will learn about the historical, political, ideological, legal, social, artistic, and economic issues affecting African Americans. They will learn about the dignity-affirming struggles of African American people to have their humanity acknowledged, valued, and understood.

The major in African American Studies (AFRO) is to provide students with a transdisciplinary perspective on the origin, role and policy implications of race in the United States and world political economy, society and culture, over time. AFRO students will learn diverse concepts, theories and methodologies for analyzing the experiences and perspectives and the cultural and intellectual production of African Americans and African descended people, largely though not exclusively in the United States. An African American studies major will be encouraged to achieve excellence in developing vital creative and critical competencies, including oral and written communication, and computer and statistical skills. Students majoring in AFRO will also be encouraged to join a new generation of leadership grounded in African American studies knowledge and committed to public engagement to meet the continuing challenges of a diverse democratic society, as well as to foster national discourse to produce public policy aimed at achieving social justice.

This program is designed to serve undergraduate students primarily interested in the social sciences and humanities, though all students are welcome and encouraged to enroll in the program. This program prepares students for graduate study and research in traditional disciplines and interdisciplinary fields and for careers in the private or public sectors such as teaching, social work, human resources, criminal justice, management and administration, city planning, marketing, policy-making, medicine and law.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in African American Studies

---

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction:
To graduate with distinction, students must complete the following:

1. 3.3 overall G.P.A
2. 3.6 program G.P.A
3. Complete AFRO 495 Senior Thesis Seminar with a grade of 3.3 or better

Graduation Requirements

Minimum hours required for graduation: 120 hours

Minimum required major and supporting course work: Equates to 48 hours. Twelve hours of 300- and 400-level African American Studies courses must be taken on this campus.

University Requirements

Students should consult their academic advisor for additional guidance in fulfilling this requirement. The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/) (§3-801) and in the Academic Catalog (http://catalog.illinois.edu/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

IV. Cognate or Supporting Coursework		**9**
Students must complete 9 hours of supporting coursework. Supporting coursework courses consists of a set of courses which are logically grouped, and which reflect or support a student's interests outside of the African American Studies major. Supporting coursework courses must be approved by the Department's undergraduate advisor.		
Total Hours		**48**

for the degree of Bachelor of Arts in Liberal Arts and Sciences in African American Studies

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Total Hours 120

for the degree of Bachelor of Arts in Liberal Arts and Sciences in African American Studies

Upon completion of the major in African American Studies, students will be able to:

- **DESCRIBE** the main stages in the historical development of the African American experience that reflects both continuity and change, and the different component parts of the human experience.
- **ASSESS** the historical development of peoples of African descent in broad global context, emphasizing historical, contemporary, and future implications.
- **ANALYZE** the experiences of Black people using the perspectives, data, and interpretations from two or more disciplinary fields (e.g., historical studies, cultural studies, social studies).
- **EVALUATE** successes and failures as people have used their values to initiate efforts to achieve social justice for African Americans and people of diverse social backgrounds.
- **DESIGN** a strategies and tactics that provide a solution to a major civic or social challenge facing Black communities in various parts

of the world, illustrating how "Academic Excellence and Social Responsibility" in Black Studies have contributed to this process.

Agricultural & Biological Engineering, BS

for the degree of Bachelor of Science in Agricultural & Biological Engineering

Agricultural and Biological Engineers apply fundamental engineering principles to problems relating to agriculture and biology. ABE students learn to design technological solutions to problems in agricultural, food, bioenergy, water, and other biological systems.

The Bachelor of Science in Agricultural and Biological Engineering (ABE) equips graduates to address grand challenges related to food, water, energy, and the environment. The program offers an ABET-accredited, flexible curriculum.

The ABE program comprises six concentrations. Students pursuing this major select one of the following concentrations:

- Bioprocess Engineering and Industrial Biotechnology Concentration (p. 30)
- Off-Highway Vehicle and Equipment Engineering Concentration (p. 33)
- Renewable Energy Systems Engineering Concentration (p. 35)
- Soil and Water Resources Engineering Concentration (p. 38)
- Sustainable Ecological and Environmental Systems Engineering Concentration (p. 41)
- Synthetic Biological Engineering Concentration (p. 43)

Each concentration (30 hours each) has its own unique body of knowledge and engineering tools and builds upon engineering fundamentals from the first two years of the program.

Current Program Educational Objectives (https://abe.illinois.edu/undergraduate/abe-program-objectives/)

for the degree of Bachelor of Science in Agricultural & Biological Engineering

Graduation Requirements

Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300- and 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Students must complete the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/), including the campus Gen Ed language requirement.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(p. 2).*

for the degree of Bachelor of Science in Agricultural & Biological Engineering

The Agricultural and Biological Engineering BS is accredited by the Engineering Accreditation Commission of ABET, Inc (https://www.abet.org/).

In accordance with the ABET educational criteria, the program has been developed so that graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Grainger College of Engineering (https://grainger.illinois.edu/)

Agricultural & Biological Engineering: Bioprocess Engineering and Industrial Biotechnology, BS

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Bioprocess Engineering and Industrial Biotechnology Concentration

Graduates design and develop equipment and systems for the processing of food for human and animal use, biofuels, and other biological materials. Utilization of agricultural and biological materials presents unique engineering challenges to sustainably convert these natural resources into products needed by society. Examples include designing bioprocesses to convert cereal crops into food ingredients that optimize human and animal health and processing designs to convert biological materials into fuels and biochemicals while minimizing their environmental footprint.

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Bioprocess Engineering and Industrial Biotechnology Concentration

Graduation Requirements
Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300- and 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Students must complete the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/), including the campus Gen Ed language requirement.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives *(*https://go.grainger.illinois.edu/FreeElectives/*), so that there are at least 128 credit hours earned toward the degree.*

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Renewable Energy Systems Engineering Concentration

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Grainger College of Engineering (https://grainger.illinois.edu/)

Agricultural & Biological Engineering: Soil and Water Resources Engineering, BS

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Soil and Water Resources Engineering Concentration

Graduates design sustainable systems to manage and conserve soil and water, control erosion and sediment, improve water quality, and minimize pollution.

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Soil and Water Resources Engineering Concentration

Graduation Requirements
Minimum Overall GPA: 2.0
Minimum hours required for graduation: 128 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Students must complete the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/), including the campus Gen Ed language requirement.

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Synthetic Biological Engineering Concentration

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

for the degree of Bachelor of Science in Agricultural & Biological Engineering, Synthetic Biological Engineering Concentration

Agricultural & Biological Engineering Faculty (https://abe.illinois.edu/directory/faculty/)

College of Agricultural, Consumer & Environmental Sciences (https://aces.illinois.edu/)
Grainger College of Engineering (https://grainger.illinois.edu/)

Agricultural & Biological Engineering, BS and Agricultural & Biological Engineering, BSAG

for the dual degree of Bachelor of Science in Agricultural & Biological Engineering and the Bachelor of Science in Agriculture in Agricultural & Biological Engineering

Dual Degree – Five Year Academic Program

Students who successfully complete this five-year academic program receive the Bachelor of Science with a major in Agricultural and Biological Engineering from The Grainger College of Engineering as well as the Bachelor of Science in Agriculture with a major in Agricultural and Biological Engineering from the College of ACES.

Students enroll in the College of ACES and then transfer to The Grainger College of Engineering after two years. Students then complete the ABET-accredited degree program in Agricultural and Biological Engineering in The Grainger College of Engineering while taking additional coursework in ACES to complete the requirements for the Bachelor of Science in Agriculture in Agricultural and Biological Engineering degree program in ACES. The suggested program of study that follows fulfills the additional graduation requirements for the second degree, which requires completion of the Grainger College of Engineering degree.

Agricultural and biological engineering is the application of mathematics, physical and biological science, and engineering to agriculture, food systems, energy, natural resources, the environment, and related biological systems. This program has special emphasis on environmental protection and the biological interface of plants, animals, soils, and microorganisms with the design and performance of environments, machines, mechanisms, processes, and structures. Graduates are employed by industry, consulting firms, and government for research, education, and manufacturing.

for the degree of Bachelor of Science in Agricultural & Biological Engineering

Agricultural and Biological Engineers apply fundamental engineering principles to problems relating to agriculture and biology. ABE students learn to design technological solutions to problems in agricultural, food, bioenergy, water, and other biological systems.

The Bachelor of Science in Agricultural and Biological Engineering (ABE) equips graduates to address grand challenges related to food, water, energy, and the environment. The program offers an ABET-accredited, flexible curriculum.

The ABE program comprises six concentrations. Students pursuing this major select one of the following concentrations:

- Bioprocess Engineering and Industrial Biotechnology Concentration (p. 30)
- Off-Highway Vehicle and Equipment Engineering Concentration (p. 33)
- Renewable Energy Systems Engineering Concentration (p. 35)
- Soil and Water Resources Engineering Concentration (p. 38)
- Sustainable Ecological and Environmental Systems Engineering Concentration (p. 41)
- Synthetic Biological Engineering Concentration (p. 43)

Each concentration (30 hours each) has its own unique body of knowledge and engineering tools and builds upon engineering fundamentals from the first two years of the program.

Current Program Educational Objectives (https://abe.illinois.edu/undergraduate/abe-program-objectives/)

for the dual degree of Bachelor of Science in Agricultural & Biological Engineering and the Bachelor of Science in Agriculture in Agricultural & Biological Engineering

While completing the Agricultural & Biological Engineering, B.S. the student takes additional classes in ACES for the BSAG degree. The student is in ACES in years 1 and 2, transferring to The Grainger College of Engineering for years 3 through 5. The curriculum for the additional classes to complete the BSAG degree is as follows:

Graduation Requirements

Minimum hours required for B.S. graduation: 128 hours.
Minimum hours required for B.S. + BSAG graduation: 158 hours.
Minimum Overall GPA: 2.0

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program. The General Education Requirements shown below are taken as part of the **Agricultural & Biological Engineering, B.S. (p. 28)**

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
	fulfilled by ABE 469	
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
	fulfilled by CHEM 102, CHEM 104, PHYS 211, PHYS 212	
Social & Behavioral Sciences (6 hours)		6
	fulfilled by ECON 102, ACE 100, ACE 210, ACE 251, or ACE 255 and one other course approved as Social and Behavioral Sciences

Agricultural & Consumer Economics, BS

for the degree of Bachelor of Science Major in Agricultural & Consumer Economics

Students pursuing this major select one of nine concentrations:

- Agri-Accounting (p. 52)
- Agribusiness Markets and Management (p. 55)
- Consumer Economics & Finance (p. 57)
- Environmental Economics & Policy (p. 60)
- Farm Management (p. 62)
- Finance in Agribusiness (p. 65)
- Financial Planning (p. 67)
- Policy, International Trade & Development (p. 70)
- Public Policy & Law (p. 72)

for the degree of Bachelor of Science Major in Agricultural & Consumer Economics

Graduation Requirements

Minimum hours required for graduation: 126 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. The introduction to applied microeconomics and macroeconomics courses do not count toward the social science general education requirement. Students must take 6 hours above and beyond these two courses to meet the social and behavioral sciences requirement. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Agricultural & Consumer Economics: Consumer Economics & Finance, BS

for the degree of Bachelor of Science in Agricultural & Consumer Economics, Consumer Economics & Finance Concentration

Students in Consumer Economics and Finance develop knowledge and skills to help consumers with everyday problems. Coursework in consumer economics, personal finance, and economics gives students a broad-based background and an understanding of the role of consumers in the marketplace. Students can choose an emphasis in consumer economics, family economics, or financial planning and counseling, which leads to career opportunities with government and public agencies, marketing and sales firms, and financial institutions.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. The introduction to applied microeconomics and macroeconomics courses do not count toward the social science general education requirement. Students must take 6 hours above and beyond these two courses to meet the social and behavioral sciences requirement. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Agricultural & Consumer Economics, Environmental Economics & Policy Concentration

1. ACE students will acquire broad and deep knowledge of Agricultural and Consumer Economics.
2. ACE students will develop a critical and reflective orientation toward global systems (such as natural, environmental, social, cultural, economic, and political) and cultural differences (such as race, indigeneity, gender, class, sexuality, language, and disability).
3. ACE students will develop critical thinking and problem solving skills.
4. ACE students will develop their ability to communicate in a variety of settings.
5. ACE students will build and sustain productive relationships to be effective leaders who can respond to civic and social challenges at local, national, and global levels, creating positive change in their communities.
6. Study challenges in environmental, energy, and resource management from local water pollution to global climate change. Learn how to use economics to understand those challenges and to design effective policy and management solutions for them. Develop data science skills to analyze spatial data and quantify relationships between human well-being, policy, pollution, and resource quality.

Agricultural & Consumer Economics: Farm Management, BS

for the degree of Bachelor of Science in Agricultural & Consumer Economics, Farm Management Concentration

Students in Farm Management study the principles of economics, finance, risk and the decision-making process - all central to the successful management of a farm enterprise. Students develop skills to combine and manage land, labor, and capital resources for a competitive return. Also, students may learn how to appraise farmland and other assets. Farm (and other asset) appraisal is a growing part of professional farm management and can be pursued as a profession in itself.

for the degree of Bachelor of Science in Agricultural & Consumer Economics, Farm Management Concentration

Graduation Requirements

Minimum hours required for graduation: 126 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the

degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. The introduction to applied microeconomics and macroeconomics courses do not count toward the social science general education requirement. Students must take 6 hours above and beyond these two courses to meet the social and behavioral sciences requirement. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Agricultural & Consumer Economics, Financial Planning Concentration

1. ACE students will acquire broad and deep knowledge of Agricultural and Consumer Economics.
2. ACE students will develop a critical and reflective orientation toward global systems (such as natural, environmental, social, cultural, economic, and political) and cultural differences (such as race, indigeneity, gender, class, sexuality, language, and disability).
3. ACE students will develop critical thinking and problem solving skills.
4. ACE students will develop their ability to communicate in a variety of settings.
5. ACE students will build and sustain productive relationships to be effective leaders who can respond to civic and social challenges at local, national, and global levels, creating positive change in their communities.
6. Study principles of personal financial planning. Master core financial planning topic areas such as investments, tax, retirement, estate planning, higher education planning, general cash flow principles, and risk management. Learn the domains, process and ethical standards you need to become a financial planning professional.

Agricultural & Consumer Economics: Policy, International Trade & Development, BS

for the degree of Bachelor of Science in Agricultural & Consumer Economics, Policy, International Trade, & Development Concentration

Students in Policy, International Trade, and Development enjoy a broad exposure to policy, international trade, and agricultural development from an economics perspective. The concentration provides a global and societal perspective ideally suited for exploring studies in administration, government, policy analysis, social processes, and international economics. Graduates are prepared for positions in firms with international business; in federal or state government agencies dealing with policy, trade, or development; in trade organizations; and in public interest groups.

for the degree of Bachelor of Science in Agricultural & Consumer Economics, Policy, International Trade, & Development Concentration

Graduation Requirements

Minimum hours required for graduation: 126 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Agricultural Leadership, Education, & Communications, BS

for the degree of Bachelor of Science in Agricultural Leadership, Education & Communications

The major in Agricultural Leadership, Education and Communications is for students wishing to pursue careers in various professional contexts. The major currently offers three concentrations. Agricultural Communications, where students will learn and apply communication skills in telling the story of food, agriculture, and the environment. Students wishing to pursue a career as a teacher of agricultural science, agribusiness, agricultural mechanics, and horticulture in Illinois high schools should select the Agricultural Education concentration. The Organizational and Community Leadership concentration prepares students for supervisory, training, sales, and outreach positions in agricultural, extension, community, and governmental agencies.

Students pursuing the Agricultural Leadership, Education & Communications, BS (p. 76) select from three concentrations:

- Agricultural Communications (p. 78)
- Agricultural Education (p. 80)
- Organizational & Community Leadership (p. 83)

for the degree of Bachelor of Science in Agricultural Leadership, Education & Communications

Graduation Requirements

Minimum hours required for graduation: 126 hours.

University Requirements

Agricultural Leadership, Education, & Communications: Agricultural Communications, BS

for the degree of Bachelor of Science Major in Agricultural Leadership, Education, & Communications, Agricultural Communications Concentration

Students pursuing the Agricultural Leadership, Education, & Communications, BS (p. 76) select from three concentrations:

- Agricultural Communications (p. 78)
- Agricultural Education (p. 80)
- Organizational & Community Leadership (p. 83)

for the degree of Bachelor of Science Major in Agricultural Leadership, Education, & Communications, Agricultural Communications Concentration

Graduation Requirements

Minimum hours required for graduation: 126 hours.

University Requirements

A minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by AGCM 220; JOUR 200		
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
fulfilled by ACES 102; FSHN 101 or FSHN 120; NRES 100 or CPSC 112 or CPSC 113		
Social & Behavioral Sciences (6 hours)		6
fulfilled by CMN 232, CMN 277, or CMN 280; and ADV 150		
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
fulfilled by LEAD 340		
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)		0-15

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Agronomy, BS

for the degree of Bachelor of Science Major in Agronomy

Agronomy is the fundamental agricultural science: managing multiple parts of agricultural systems to sustainability and economically meet the growing need for food, fuel and fiber. The agronomy major provides a foundation that by necessity integrates the science and practice of agricultural production through courses in plant biology, genetics, weed and pest management, soil science, environmental quality, and agricultural management practices. The program also offers many opportunities to participate in research and internships. This curriculum prepares students for careers in agricultural sciences as well as for entrance into graduate and professional schools. Our students pursue employment in scientific research or fields related to agronomy including crop consulting, soil and crop management, international food security and agricultural development, and science policy.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Total Hours 126

for the degree of Bachelor of Science Major in Agronomy

1. Students will demonstrate proficiency in the areas of crop production, plant breeding, pathogen control, soil and nutrient management, genetics and genomics, environmental quality, and data analysis.
2. Students will gain leadership skills through team-based science in an experiential learning context to become leaders in scientific fields.
3. Students will communicate agronomy content to the public using traditional and 21st century media platforms.
4. Students will discover how agronomy can be used as the foundation to solve global and regional food security challenge, and how agronomy is an ever-evolving field poised to meet the demand for food of a growing population.
5. Students will develop professional networks that will enhance future career choices.

for the degree of Bachelor of Science Major in Animal Sciences

Upon successful completion of a degree in Animal Sciences, students will:

1. Demonstrate a mastery of the principles of animal sciences including genetics, nutrition, reproduction, and physiology
2. Understand and apply knowledge of animal husbandry, behavior, and handling techniques to effectively interact with animals in a safe and humane manner
3. Describe the breadth of animal sciences in terms of the variety of career paths, the diversity of the animal industries, the many roles of animals in society, and the contemporary issues facing animals and their environments
4. Communicate effectively, both written and orally, and interpret scientific sources and data
5. Through real-world and classroom experiences, develop competencies transferable to animal science careers

Animal Sciences: Companion & Equine Science, BS

for the degree of Bachelor of Science Major in Animal Sciences, Companion & Equine Science Concentration

The companion animal and equine science concentration is designed for students intending to pursue a career in those industries generally not associated with traditional meat animal or dairy production. Students will take courses that prepare them for careers in specialized fields of animal care, animal health and animal well-being associated with zoos, kennels, research laboratories, and the racing industry.

for the degree of Bachelor of Science Major in Animal Sciences, Companion & Equine Science Concentration

Prescribed Courses including Campus General Education

Graduation Requirements
Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Total Hours 126

for the degree of Bachelor of Science Major in Animal Sciences, Companion & Equine Science Concentration

Upon successful completion of a degree in Animal Sciences, students will:

1. Demonstrate a mastery of the principles of animal sciences including genetics, nutrition, reproduction, and physiology
2. Understand and apply knowledge of animal husbandry, behavior, and handling techniques to effectively interact with animals in a safe and humane manner
3. Describe the breadth of animal sciences in terms of the variety of career paths, the diversity of the animal industries, the many roles of animals in society, and the contemporary issues facing animals and their environments
4. Communicate effectively, both written and orally, and interpret scientific sources and data
5. Through real-world and classroom experiences, develop competencies transferable to animal science careers

The Companion Animal and Equine Science concentration is one of the only programs of its kind. Students in this concentration are able to focus their animal sciences degree on the animals we share our lives with. Discover a career in industries outside of traditional meat animal or dairy production. Prepare for careers in specialized fields of animal care, health and well-being associated with zoos, kennels, research laboratories, and the racing industry.

This program:

1. Prepares students for a career in humane education, animal advocacy and policy, shelter management, and animal care and control.
2. Provides courses and experiences to develop skills related to companion animal behavior.
3. Offers approximately 25 students participate in internships through the Champaign County 3. Humane Society and ASPCA Poison Control Center every semester.

Animal Sciences: Food Animal Production & Management, BS

for the degree of Bachelor of Science in Animal Sciences, Food Animal Production & Management concentration

The Food Animal Production and Management Concentration is designed for students intending to pursue a career in animal care and management or one of the associated food production industries. It emphasizes the scientific disciplines and the application of technology involved in animal production and animal products, as well as providing the opportunity to enhance a student's practical knowledge through business courses.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science Major in Animal Sciences, Food Animal Production & Management concentration

Upon successful completion of a degree in Animal Sciences, students will:

1. Demonstrate a mastery of the principles of animal sciences including genetics, nutrition, reproduction, and physiology
2. Understand and apply knowledge of animal husbandry, behavior, and handling techniques to effectively interact with animals in a safe and humane manner
3. Describe the breadth of animal sciences in terms of the variety of career paths, the diversity of the animal industries, the many roles of animals in society, and the contemporary issues facing animals and their environments
4. Communicate effectively, both written and orally, and interpret scientific sources and data
5. Through real-world and classroom experiences, develop competencies transferable to animal science careers

Prepare for a career in animal care and management or one of the associated food production industries. This concentration emphasizes the scientific disciplines and the application of technology involved in animal production and animal products, as well as providing the opportunity to enhance a student's practical knowledge through adding a minor. Common minors added with this concentration are business, communications, and leadership.

- This concentration is ideal for students who own or would like to operate animal production units, including the management of dairy, beef, poultry, sheep, or swine enterprises.
- Students may choose to work in animal production agriculture or continue their education in animal sciences or business-related disciplines.
- After sophomore year, students may choose to focus the remainder of their studies on a particular species (beef, swine, dairy) or the discipline of their choice (nutrition, reproduction, meat science).
- Graduates are in high demand because of their dual focus on animal production and business and pursue careers in the sales and service of animal health products, feed, equipment, and more. They are livestock representatives for banks and insurance companies, and work as consultants to animal agriculture industries. Some graduates pursue careers in the meat or food processing industries.

Animal Sciences: Science, Pre-Veterinary & Medical, BS

for the degree of Bachelor of Science Major in Animal Sciences, Science, Pre-Veterinary & Medical concentration

The science and pre-veterinary medical concentration is specifically designed for students interested in graduate school, professional training, or technical positions after the undergraduate degree. It is intended to satisfy most entrance requirements to post-graduate programs and emphasizes basic science courses. The concentration enables a student to complete all of the pre-veterinary science requirements while working towards a B.S. degree.

for the degree of Bachelor of Science Major in Animal Sciences, Science, Pre-Veterinary & Medical concentration

Prescribed Courses including Campus General Education

Graduation Requirements
Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science Major in Animal Sciences, Science, Pre-Veterinary & Medical concentration

Learning Outcomes

Upon successful completion of a degree in Animal Sciences, students will:

1. Demonstrate a mastery of the principles of animal sciences including genetics, nutrition, reproduction, and physiology
2. Understand and apply knowledge of animal husbandry, behavior, and handling techniques to effectively interact with animals in a safe and humane manner
3. Describe the breadth of animal sciences in terms of the variety of career paths, the diversity of the animal industries, the many roles of animals in society, and the contemporary issues facing animals and their environments
4. Communicate effectively, both written and orally, and interpret scientific sources and data
5. Through real-world and classroom experiences, develop competencies transferable to animal science careers

This concentration, emphasizing fundamental science courses, allows you to create a curriculum that will satisfy entrance requirements to the graduate or professional school of your choice. You'll be ready to succeed whether you choose veterinary school, medical school, or advanced scientific study.

1. Prepares students for research careers in various animal science disciplines, including nutrition, reproduction, physiology, and genetics.
2. Graduates from this concentration pursue careers in research and development with animal health and nutrition companies.
3. This concentration prepares students for rigorous study in graduate, veterinary, medical, or other professional schools.
4. Students will fulfill all requirements for veterinary school while earning a degree in animal sciences and have access to hands-on animal experiences not available in other departments.
5. Students from this concentration are in high demand due to their advanced technical knowledge and interest in discovery.

Stats & Facts:

1. 73% of students in the Science, Pre-Veterinary and Medical Concentration are employed or have accepted an offer to a professional school such as Vet School, Med School or Graduate School at graduation.
2. 75% of our undergraduate students are in this concentration.

Anthropology, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Anthropology

Anthropology is the study of humans across time and space, integrating biological and cultural information from prehistoric times to the present. The field is global in perspective, and includes findings from the natural sciences, social sciences, humanities, and arts. It is a broad discipline linked by a deep interest in exploring the fundamental notion of what it means to be human. Anthropology consists of four areas or subfields: Sociocultural Anthropology, the study of contemporary societies; Linguistic Anthropology, the study of talk, text, media, and other forms of communication; Archaeology, the study of the material remains of past societies; and Biological Anthropology, the study of human origins, primatology, biological diversity, genetics, genealogy, and forensic sciences. At the University of Illinois, we specialize in and integrate all four of these areas.

Students pursuing this major must select one of the following in consultation with an advisor:

- Major in Anthropology (p. 100)
- Archaeology Concentration (p. 102)
- Biological Anthropology Concentration (https://catalog.illinois.edu/undergraduate/las/anthropology-balas/biological-anthropology/)
- Human Evolutionary Biology Concentration (https://catalog.illinois.edu/undergraduate/las/anthropology-balas/human-evolutionary-biology/)
- Sociocultural & Linguistic Anthropology Concentration (p. 110)

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Anthropology

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60- 75 hours). Please see your adviser.

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.All students must discuss their selection of anthropology courses and supporting course work with a departmental adviser.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: 45-48. Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Choose one option below (Honors Thesis, Senior Capstone Seminar, Internship, Study Abroad) in consultation with and approval of the departmental advisor:	
Honors Thesis - 6 hours. Two consecutive semesters of research resulting in a written thesis	
ANTH 494	Honors Senior Thesis I
ANTH 495	Honors Senior Thesis II
Senior Capstone Seminar (Independent Research) - 3 hours	
ANTH 498	Senior Capstone Seminar
Internship - 3 hours. A portfolio and report associated with an approved departmental internship.	
ANTH 390	Individual Study
Study Abroad - 3 hours. A portfolio and report associated with an approved Study Abroad experience.	
ANTH 390	Individual Study

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Anthropology

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Total Hours 120

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Anthropology

Students who graduate with a BALAS degree in Anthropology will have:

- A broad knowledge of cultural, social, linguistic and biological facets of the human condition and the methods anthropologists use to study them.
- The ability to conduct independent research through data collection, critical analysis, synthesis, and written presentation of findings.
- An understanding of the ethical and social dimensions of anthropological research and their impacts on society.

Students who graduate with a concentration in Archaeology will be able to:

- Learn theories and methods for understanding cultural and societal change through time and the role of heritage in the present.
- Demonstrate an understanding of the ethical issues and legal responsibilities concerning cultural resource management.

Students who graduate with a concentration in Socio-cultural and Linguistic Anthropology will:

- Learn theories and methods for understanding cultural and linguistic variation in human societies, and how power and politics contribute to understandings of self and society.
- Demonstrate ways of thinking about the world that demonstrate the diversity and the interconnectedness of local, regional, and global processes.

Students who graduate with a concentration in Biological Anthropology will:

- Learn theories and methods for understanding biological variation and how this information is applied to forensic science and health sciences.

Overview of College Admissions & Requirements: Liberal Arts & Sciences (p. 2288)

Anthropology: Archaeology, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Anthropology, Archaeology Concentration

The Archaeology Concentration offers students a program to explore the human past through its material remains to understand cultural and societal change through time, and the role of heritage in the present. We offer many opportunities for students to conduct research with faculty in our archaeology labs, field schools, and in our extensive research collections.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Anthropology, Archaeology Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60- 75 hours). Please see your adviser.

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of coursework with a departmental adviser.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: 45-48. Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

Anthropology: Sociocultural & Linguistic Anthropology, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Anthropology, Sociocultural and Linguistic Anthropology Concentration

The Sociocultural and Linguistic Anthropology Concentration offers students a program of more focused coursework in these closely related fields. Sociocultural anthropologists study the daily lives of people around the world, both at home and abroad. They conduct field research to get a hands-on feel for people's lives and passions and examine everything from beauty pageants to political protest marches, from Disney films to the lab practices of nuclear scientists. Sociocultural anthropology distinguishes itself from other disciplines by its conviction that these local and personal details offer a crucial window on the largest processes and problems of our time, from globalization to race relations and violence.

Linguistic anthropology complements sociocultural anthropology with detailed attention to spoken and signed languages—their structure and use in the daily lives of people around the world, both at home and abroad. Linguistic anthropologists examine such things as the "English Only" movement in the United States, the persuasive language of advertising and politics, racism and hate speech, oral/gestural storytelling traditions around the world, communication in the classroom, on social media, or at the United Nations, as well as how the way we talk creates our sense of self and reality.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Anthropology, Sociocultural and Linguistic Anthropology Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60- 75 hours). Please see your adviser.

Departmental Distinction: The department may award distinction, high distinction, or highest distinction to any Anthropology major whose overall and major grade point averages are 3.25 or higher; and who successfully completes 33 hours of anthropology courses, including 4-6 hours of ANTH 494 and ANTH 495 resulting in an Honors Thesis. The level of distinction is based on evaluation of the honors thesis. See the departmental academic advisor for details.

All students must discuss their selection of coursework with a departmental adviser.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: 45-48. Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Anthropology, Sociocultural and Linguistic Anthropology Concentration

---

Students who graduate with a BALAS degree in Anthropology will have:

1. A broad knowledge of cultural, social, linguistic, archaeological, and biological facets of the human condition and the methods anthropologists use to study them.
2. An understanding of the ethical and social dimensions of anthropological research and their impacts on society.
3. The ability to conduct independent research through data collection, critical analysis, synthesis, and written presentation of findings.

Students who graduate with a concentration in sociocultural and linguistic anthropology will have:

1. Knowledge of the theories and methods for understanding cultural and linguistic variation in human societies, and how power and politics contribute to understandings of self and society.
2. An understanding of the ways of thinking about the world that demonstrate the diversity and the inter-connectedness of local, regional, and global processes.

Architectural Studies, BS

for the Bachelor of Science in Architectural Studies

The Bachelor of Science in Architectural Studies (BSAS) is a pre-professional degree that prepares students to enter a professional 2-year Master of Architecture degree program. The BSAS program provides a strong foundation in design, technology and history as they relate to architectural practice. The degree also provides students with a broad liberal arts foundation that can lead to many other career options.

In this curriculum, timely progress is imperative. A student failing to complete any required course more than one semester later than the time designated in the curriculum is prohibited from progressive registration in architectural courses until the deficiency is corrected. To continue at the sophomore level and beyond, a student must have a cumulative grade point average of 2.00 (A = 4.0) for all university course work attempted. For the Bachelor of Science in Architectural Studies degree, a total of 120 semester hours are required.

for the Bachelor of Science in Architectural Studies

Graduation Requirements

Minimum hours required for graduation: 120 hours.

A maximum of nine hours may be taken as professional architecture elective courses which a student can count toward the Master of Architecture in Architecture requirements.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the Bachelor of Science in Architectural Studies

The Bachelor of Science in Architectural Studies (BSAS) curriculum combines a comprehensive design education with the broad perspective necessary to become active and engaged global citizens. Students learn to address and solve tomorrow's complex problems at the intersection of the social, political, economic and environmental realms. Two- and three-dimensional design form the foundation of the four-year BSAS degree. Technology, history, and structures courses complete the curriculum, preparing students to enter a two-year NAAB-accredited Master of Architecture degree program, or to pursue a graduate degree or career in an allied discipline.

When students complete the BSAS degree they will be able to:

1. **Employ Specialized Knowledge**
   a. Apply design thinking approaches to address environmental and societal challenges.
   b. Implement design processes--documentation, research, analysis and application--intervening to improve a set of environmental conditions.
   c. Communicate ideas and concepts through verbal and graphic, physical and digital, means.
2. **Put Broad and Integrative Knowledge to Use**
   a. Identify complex problems and approaches to addressing them.
   b. Understand diverse community dynamics and social relationships.
   c. Explore the intersections among environmental, social, cultural, political and economic aspects.
3. **Exercise Intellectual Skills:**
   a. Evaluate and apply theories of the built environment's impact on human wellbeing.
   b. Differentiate and assess various means of manufacture and their suitability for use in a number of diverse contexts.
   c. Acknowledge different theories for analyzing and intervening in urban contexts.
   d. Evidence proficiency integrating technological systems to improve environmental performance.
   e. Critically examine humanistic perspectives in architecture, urban and landscape throughout time.
4. **Demonstrate Proficiency in Applied and Collaborative Learning:**
   a. Apply skills needed for successful teamwork and consensus decision making.
   b. Employ leadership skills.
   c. Recognize the value of multidisciplinary contributions in the realm of environmental design.
5. **Illustrate Civic and Global Understanding:**
   a. Demonstrate empathic and ethical decision making.
   b. Apply sustainable practices across a variety of scales and contexts.
   c. Cultivate self-learning skills and curiosity to learn and broaden cultural perspectives.
   d. Utilize contemporary and historical perspectives in design thinking processes.

Art & Art History, BFA

for the degree of Bachelor of Fine Arts in Art & Art History

The Program in Art & Art History at the University of Illinois Urbana-Champaign is unique. Housed in the School of Art & Design in the College of Fine and Applied Arts, the Program in Art History offers a Bachelor of Fine Arts degree in a combined Art History and Studio/Design course of study, providing a broad cultural education that unites academic and studio training. Students who earn this degree will be qualified to pursue a range of careers, museum work, or graduate study in either art history or studio practice.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

A portfolio review is required for admission to the School of Art and Design.

Departmental Distinction: a student must earn a 3.25 overall GPA, and 3.50 GPA in Art History. The student will complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for further details.

for the degree of Bachelor of Fine Arts in Art & Art History

A portfolio review is required for admission to the School of Art and Design.

Graduation Requirements

Minimum hours required for graduation: 122 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

for the degree of Bachelor of Fine Arts in Art & Art History

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Fine Arts in Art & Art History

1. Students will develop art historical knowledge and skills in tandem with their development of a studio or design practice.
2. Students will be able to demonstrate familiarity with key artistic monuments and modes of art production from various global contexts.
3. Students will be able to analyze and interpret works of art and architecture situated in a variety of historical and social contexts, and in comparative perspective.
4. Students will be able to use visual and verbal primary sources, secondary sources, and core critical frameworks of art historical analysis to develop and articulate persuasive arguments about works of art and the cultures that produced them.

Art Education, BFA

for the Bachelor of Fine Arts in Art Education

The curriculum in art education requires 130 credit hours and prepares students for positions as teachers of art in public and private schools, grades pre-kindergarten through twelve. The program places emphasis on theories, methods, materials, and processes of art education, foundational knowledge that is applicable to teaching in art in schools as well as in museums and community centers. For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cote.illinois.edu/). To be recommended for licensure, candidates are required to maintain an Illinois cumulative grade-point average of 2.5 (A=4.0).

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

A portfolio review is required for admission to the School of Art and Design.

for the Bachelor of Fine Arts in Art Education

Graduation Requirements

Minimum hours required for graduation: 130 hours.
To be recommended for licensure, candidates are required to maintain a UIUC cumulative grade-point average of 2.5 (A=4.0).

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

Learning Outcomes

Students graduating with the BFA in Art Education should be able to:

1. Understand the diverse characteristics and abilities of their students and how individuals develop and learn within the context of their social, economic, cultural, linguistic, and academic experiences. Our graduates are prepared to use these experiences to create instructional opportunities that maximize student learning in diverse art education settings such as schools, museums, and community centers.

2. Understand art content area knowledge, including central concepts, methods of inquiry, structures of the disciplines, and content area literacy. Our graduates are prepared to create meaningful learning experiences for students through both art content area and pedagogical knowledge.
3. Plan and design instruction for diverse art education settings based upon content area knowledge, diverse student characteristics, student performance data, curriculum goals, and the community contexts.
4. Create safe and healthy art education learning environments that facilitate cultural and linguistic responsiveness, emotional well-being, self-efficacy, positive social interaction, mutual respect, active engagement, academic risk-taking, self-motivation, and personal goal-setting.
5. Differentiate instruction by using a variety of strategies that support critical and creative thinking, problem-solving, and continuous growth and learning. Our graduates understand that art education settings are dynamic, thus requiring ongoing modification of instruction to enhance learning for each student.
6. Enact critical, inclusive, and empowering expressions of art education that challenge and redress systemic injustices related to social identities such as race, ethnicity, class, age, gender, sexuality, dis/ability, nationality, and religion.
7. Possess foundational knowledge of reading, writing, and oral communication within art education (e.g., curriculum and lesson planning, assessment tools, etc.) and recognize and address how student reading, writing, and oral communication facilitates the acquisition of knowledge in art education.
8. Understand the purposes, characteristics, and limitations of different types of assessments in art education and develop and implement a range of assessment tools for teaching and learning in art education.
9. Build and maintain collaborative relationships with colleagues, students, parents or guardians, and community members to foster the development of their students.
10. Exhibit ethical, reflective, and professional practices, while providing leadership in their educational settings and advocating for students, parents or guardians, and the profession.

Art History, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Art History

The Program in Art History is unique at the University of Illinois Urbana-Champaign. Though housed in the School of Art and Design in the College of Fine and Applied Arts, the Program in Art History offers a Bachelor of Arts in Liberal Arts & Sciences degree in Art History from the College of Liberal Arts and Sciences. The College of Liberal Arts and Sciences administers admission to the major in Art History; however, the Program in Art History advises all Art History majors.

The curriculum in Art History requires 120 credit hours and offers a broad historical and cultural education related to the visual and build world. The curriculum provides sound preparation for the graduate study required for museum work or teaching at the college level.

Departmental distinction: To be eligible for distinction, a student must earn a high grade point average and complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for details.

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Art History

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Six (6) 200-400 level courses in Art History, offered in the School of Art & Design **18**

(Though students must take a total of 6 courses, some may count toward the fulfillment of more than one area and period requirement. For instance, a course in 20th century African art could count as a class covering both Africa and the Middle East and material after 1700.)

Students must take at least one course in three of the following areas: 1) Africa and the Middle East; 2) Asia; 3) the Americas; 4) Europe

With an advisor's approval, up to 6 credit hours of courses in the history of architecture or landscape architecture at the 200-400 level may be taken towards the fulfillment of these required hours

At least one course must cover material before 1700

At least one course must cover material after 1700

Other courses may be approved in consultation with the advisor.

1. Africa and the Middle East

ARTH 219	Islamic Gardens & Architecture
ARTH 220	African Arts and Architecture
ARTH 310	African Art and Society I
ARTH 312	Central African Art
ARTH 313	Modern and Contemp African Art
ARTH 410	West African Art and Ideas
ARTH 413	Sacred African Diaspora Arts

2. Asia

ARTH 212	East Asian Art History
ARTH 214	Art in China
ARTH 320	Sacred Sites in Japan
ARTH 402	Ways of Seeing in Edo Japan
ARTH 403	Word and Image in Chinese Art
ARTH 404	China through Film

3. The Americas

ARTH 242	Art Since 1940
ARTH 250	American Art
ARTH 260	Graffiti and Murals
ARTH 342	Arts of Colonial Latin America
ARTH 343	Arts of Modern Latin America

4. Europe

ARTH 215	Greek Art
ARTH 218	Ancient Greek Sanctuaries

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Art History

1. Students will be able to demonstrate familiarity with key artistic monuments and modes of art production from various global contexts.
2. Students will be able to analyze and interpret works of art and architecture situated in a variety of historical and social contexts, and in comparative perspective.
3. Students will be able to use visual and verbal primary sources, secondary sources, and core critical frameworks of art historical analysis to develop and articulate persuasive arguments about works of art and the cultures that produced them.
4. Students will be able to engage with adjacent humanities disciplines in development of an interdisciplinary practice of art history.

College of Liberal Arts and Sciences (https://las.illinois.edu/)

Overview of College Admissions & Requirements: Liberal Arts & Sciences (p. 2288)

Art Undeclared

A portfolio review is required for admission to the School of Art and Design.

This first year curriculum is shared across all majors and serves as the temporary major declaration for those who enter as "undeclared." Students must complete the First Year Curriculum requirements before beginning other major requirements. Undeclared students will declare their Art & Design major December 1 of their first year of study.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

The School of Art & Design offers bachelor of fine arts degrees in art & art history, art education, graphic design, industrial design, and studio art (with concentrations in fashion, illustration, interdisciplinary practice, new media, painting, photography, printmaking, and sculpture), and a bachelor of arts degree in studio art.

Graduation Requirements

Minimum hours required for graduation: Students may not graduate from Art Undeclared. Majors in the School of Art & Design require between 122 and 130 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

Total Hours: 31

By the end of the First Year Experience Art and Design students will have:

1. Gained exposure to a wide variety of art making processes, materials, methods, and presentation strategies.
2. Been introduced to critical thinking and knowledge of contemporary issues in art and design.
3. Developed a verbal vocabulary that allows for informed criticism and debate in the critique process.
4. Gained an ability to use the investigative process to generate new solutions in their work and demonstrates the ability to problem solve using iterative strategies to complete projects.
5. An ability to recognize and use various forms of visual organization in their studio work.
6. Gained a knowledge of how to generate meaning in a variety of forms.
7. An ability to use design and drawing principles such as: (balance, symmetry/rhythm, space/perspective, sequence/time, eye movement, scale/proportion, unity/variety.

Asian American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Asian American Studies

The Asian American Studies Department offers a campus-wide Interdisciplinary Major. This major represents a coherent program for students who wish to deepen their study of Asian American histories, experiences, contemporary issues and social problems as a part of their liberal education and understanding of race and diversity in the United States and transnationally.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Asian American Studies

Advising

The Department of Asian American Studies provides advising for students. Students must officially declare their major by registering with the Associate Head of Asian American Studies. Students will work with their advisor to choose appropriate courses from the Additional Coursework List and the Approved Elective List to help plan a coherent program of study. A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: 33 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Total Hours: 120

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Asian American Studies

1. **Intellectual Reasoning and Knowledge**:
   a. Students acquire proficiency in the field and area of Asian American Studies. This includes, for example, knowledge based in intersectional, comparative, and interdisciplinary approaches. While largely based in an area approach to the United States, Asian American Studies is also deeply concerned with transnational, diasporic, and global studies. Students learn the history of Asian Americans and theories and methods of the social sciences and humanistic approaches to understand the Asian American experience. The conceptual rubrics broadly include migration, social movements, US imperialism and racism, and ideas of citizenship and belonging.
2. **Critical Inquiry and Discovery**
   a. Applying theories in Asian American Studies students develop skills of critical inquiry that draw on intersectional and comparative approaches. As a mode of discovery students exercise their skills using methods of the social sciences and humanities through verbal communication in the classroom and written research projects. Students are asked to apply their critical modes of learning in original and unique projects of discovery through research.
3. **Effective Leadership and Community Engagement**
   a. Students study models of community leadership and engagement through the histories of Asian American social movements, political culture, and community activism. Reflection based on these approaches provides a context from which to understand the role of classroom learning and the application of theories of social change in communities.
4. **Social Awareness and Cultural Understanding**
   a. Students learn the dimensions of intersectional analysis of social, cultural, economic, and political issues concerning the Asian Americans. Social theories of power inform how students are taught to understand a number of categories of analysis including race, gender, sexuality, class, ethnicity, religion, and disability, to name a few.
5. **Global Consciousness**
   a. Students gain an understanding of the global dimensions of intersectional approaches in a broad range of fields and disciplines including literary, historical, cultural and ethnographic approaches. Through the study of migration and diaspora, the broad understanding of individual and collective dynamics are observed, analyzed, and theorized. Students are also asked to think in terms of a comparative framework to understand how race, gender, and sexuality, for example, are thought of from a number of vantage points.

College of Liberal Arts and Sciences (https://las.illinois.edu/)

overview of college admissions & requirements: Liberal Arts & Sciences (p. 2288)

Astronomy, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astronomy

The LAS major in **Astronomy** is a flexible program for students who are fascinated by the cosmos and plan to pursue technical or professional careers in areas requiring a solid grounding in physical science and mathematics. It is based upon both a broad and an in-depth exploration into astronomy (https://astro.illinois.edu/) and allied disciplines, and is flexible enough to be paired with many other majors or minors.

STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

The Astronomy Department undergraduate program also includes majors in Astrophysics (p. 136), Computer Science + Astronomy (p. 234), and Astronomy + Data Science (p. 132), as well as a minor in Astronomy (p. 943).

Astrophysics Major

Astrophysics (p. 136), the study of how the universe works by applying the methods and principles of physics, is the cornerstone of modern astronomy. Students majoring in Astrophysics must complete advanced coursework in both astronomy and physics, allowing them to demonstrate the rigorous preparation necessary for graduate study in astronomy/astrophysics, physics, and planetary and space sciences.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Computer Science + Astronomy Major

The LAS major in Computer Science + Astronomy (p. 234) is a flexible program for students who wish to combine a solid grounding in computer science with technical knowledge of astronomy. This blended curriculum helps develop a unique approach to problem solving and offers novel perspectives in interdisciplinary work, such as data visualization, data mining, astrophysical simulations, and image processing.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astronomy + Data Science Major

The Astronomy + Data Science (p. 132) major incorporates simultaneously a strong foundation in Data Science and Astronomy to develop an appreciation and understanding of how big data is transforming science. Graduates of the Astronomy + Data Science program will have gained experience working with modern large data sets using current computational and statistical methods, with a strong grounding in data curation and ethics.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astronomy Minor

The minor in astronomy (p. 943) is designed to broaden the student's knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as the aerospace industry, science writing, scientific journalism, or science teaching in schools.

QUESTIONS?

To get answers to your questions about our undergraduate programs in astronomy or to schedule a visit, contact Astronomy Advising (advising@astro.illinois.edu).

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astronomy

Departmental distinction: A student majoring in astronomy may earn distinction or high distinction by attaining a minimum grade point average of 3.4 or 3.75, respectively, in required major courses (defined in the table below) taken at Illinois. For highest distinction, in addition to meeting the minimum requirements for high distinction, a senior thesis (ASTR 490) must be completed with strong endorsement by the research supervisor. Questions about eligibility for distinction status should be directed to an astronomy advisor before the senior year.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum required major and supporting course work normally equates to 48-51 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Total Hours: 120

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astronomy

Undergraduate Astronomy majors will graduate with a demonstrated ability to:

1. LO1. Understand the hierarchical architecture of the cosmos, increasing in scale from the Solar System to the Galaxy to the Universe, and decreasing in scale to atoms and their nuclei. Understand the interplay among these scales.
2. LO2. Define and use fundamental principles and techniques of astronomy and astrophysics.
   a. Identify which principles should be applied to a specified situation
   b. Show familiarity with astronomical observables and their physical origin.
   c. Understand and apply basic physics and computational techniques to solve problems in astrophysics, and interpret the results.
3. LO3. Analyze astronomical data, and quantitative data generally.
   a. Demonstrate the ability to link observation and theory.
   b. Demonstrate the ability to draw qualitative conclusions from quantitative information, and vice versa.
   c. Demonstrate the ability to plan observational programs, use astronomical telescopes and instrumentation, and to analyze and present astronomical data.
4. LO4. Plan and perform guided research, or attain an advanced-level understanding of a topic of contemporary interest in astronomy and astrophysics.
5. LO5. Demonstrate the ability to communicate effectively both verbally and in writing.

University of Illinois Urbana-Champaign Undergrad Admissions (https://www.admissions.illinois.edu/)

Astronomy + Data Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astronomy plus Data Science

The **Astronomy + Data Science** major incorporates simultaneously strong foundations in Data Science (https://datascience.illinois.edu/) and Astronomy (https://astro.illinois.edu/) to develop an appreciation and

understanding of how big data is transforming science. Graduates of the Astronomy + Data Science program will have gained experience working with modern large data sets using current computational and statistical methods, with a strong grounding in data curation and ethics.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

The Astronomy Department undergraduate program also includes majors in Astronomy (p. 130), Astrophysics (p. 136), and Computer Science & Astronomy (p. 234), as well as a minor in Astronomy (p. 943).

Astronomy Major

The LAS major in Astronomy (p. 130) is a flexible program for students who are fascinated by the cosmos and plan to pursue technical or professional careers in areas requiring a solid grounding in physical science and mathematics. It is based upon both a broad and an in-depth exploration into astronomy and allied disciplines, and is an excellent way to gain a general science education.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astrophysics Major

Astrophysics (p. 136), the study of how the universe works by applying the methods and principles of physics, is the cornerstone of modern astronomy. Students majoring in Astrophysics must complete advanced coursework in both astronomy and physics, allowing them to demonstrate the rigorous preparation necessary for graduate study in astronomy, physics, and planetary and space sciences.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Computer Science + Astronomy Major

The LAS major in Computer Science + Astronomy (p. 234) is a flexible program for students who wish to combine a solid grounding in computer science with technical knowledge of astronomy. This blended curriculum helps develop a unique approach to problem solving and offers novel perspectives in interdisciplinary work, such as data visualization, data mining, astrophysical simulations, and image processing.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astronomy Minor

The minor in astronomy (p. 943) is designed to broaden the student's knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as the aerospace industry, science writing, scientific journalism, or science teaching in schools.

QUESTIONS?

To get answers to your questions about our undergraduate programs in astronomy or to schedule a visit, contact Astronomy Advising (advising@astro.illinois.edu).

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astronomy plus Data Science

- **Minimum required major and supporting course work** normally equates to 62-66 hours
- **General education:** Students must complete the Campus General Education requirements including the campus general education language requirement.
- Twelve hours of 300 and 400-level courses must be taken on this campus.
- **Minimum hours required for graduation:** 120 hours
- **Departmental distinction:** To graduate with distinction requires a specified minimum grade point average in all Computer Science, Statistics, Information Science, and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 62-66 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement. The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
	fulfilled by PHYS 211 and PHYS 212	
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
	fulfilled by MATH 220 or MATH 221, STAT 107, STAT 207, PHYS 211, MATH 231, MATH 241	
Language Requirement (Completion of the fourth semester or equivalent of a language other than English is required)		0-20

Major Requirements

Code	Title	Hours
Required Data Science Core		**28-31**
Mathematical Foundations		
MATH 220	Calculus	4-5
or MATH 221	Calculus I	
Linear Algebra: Select one of the following (MATH 227 or MATH 257 is recommended)		2-4
MATH 227	Linear Algebra for Data Science	
MATH 257	Linear Algebra with Computational Applications	
MATH 225	Introductory Matrix Theory	
MATH 415	Applied Linear Algebra	
Data Science Fundamentals		
STAT/CS/IS 107	Data Science Discovery	4
STAT 207	Data Science Exploration	4
CS 307	Modeling and Learning in Data Science	4
Computational Fundamentals		
CS 277	Algorithms and Data Structures for Data Science	4
Ethics and Responsibility in Data Science		
IS 467	Ethics and Policy for Data Science	3
IS 477	Data Management, Curation & Reproducibility	3
Required Astronomy Coursework		**31-32**
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
PHYS 214	Univ Physics: Quantum Physics	2
MATH 231	Calculus II	3
MATH 241	Calculus III	4
ASTR 210	Introduction to Astrophysics	3
ASTR 310	Computing in Astronomy	3
Advanced Astronomy Courses - Select two courses from the following:		6-7
ASTR 404	Stellar Astrophysics	
ASTR 405	Planetary Systems	
ASTR 406	Galaxies and the Universe	
ASTR 414	Astronomical Techniques	
Research or Discovery Experience		**3**
ASTR 390	Individual Study	
or ASTR 490	Senior Thesis	

One of the most important skills a student will gain in an Astronomy & Data Science degree will be the ability to present astronomical data in meaningful ways. A research or discovery experience is as much as pillar of this degree program as both the data science core coursework (Part 1) and the coursework in Astronomy (Part 2).

This experience should be developed with an advisor before the end of a student's sophomore year and result in the creation of one or more artifacts documenting the experience. A minimum of 3 credit hours must be specifically designated to the preparation and the completion of the experience component.

Examples of possible experiences may include:

A semester study-abroad with at one or more courses focused on discovery while attending the international institution.

A multi-semester capstone experience within the student's area of specialization.

A semester co-op experience outside Champaign-Urbana focused on a subject within the student's area of specialization.

A multi-semester undergraduate research experience under the direction of Illinois faculty.

A summer NSF REU program focused within a student's area of specialization.

Total Hours	**62-66**

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astronomy plus Data Science

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astronomy plus Data Science

---

The Astronomy + Data Science program has learning objectives in both Astronomy and Data Science.

The Astronomy learning objectives are:

1. Understand the hierarchical architecture of the cosmos, increasing in scale from the Solar System to the Galaxy to the Universe, and decreasing in scale to atoms and their nuclei. Understand the interplay among these scales.
2. Define and use fundamental principles and techniques of astronomy and astrophysics.
   a. Identify which principles should be applied to a specified situation.
   b. Show familiarity with astronomical observables and their physical origin.
   c. Understand and apply basic physics and computational techniques to solve problems in astronomy, and interpret the results.
3. Analyze astronomical data, and quantitative data generally.
   a. Demonstrate the ability to link observation and theory.
   b. Demonstrate the ability to draw qualitative conclusions from quantitative information, and vice versa.
   c. Demonstrate the ability to plan observational programs, use astronomical telescopes and instrumentation, and to analyze and present astronomical data.
4. Plan and perform guided research, or attain an advanced-level understanding of a topic of contemporary interest in astronomy.
5. Demonstrate the ability to communicate effectively both verbally and in writing.

The Data Science learning objectives are:

1. Demonstrate proficiency with statistical and computational analysis of data.
2. Create informative and accurate visualizations of data.
3. Build and evaluate data-based models.
4. Describe, curate, and manage data.
5. Understand and manage issues of reproducibility in data science.
6. Understand and address ethical issues in data science such as access, bias, and privacy.
7. Apply data science skills and concepts in projects or research, and communicate and interpret the results of data analysis.

Astrophysics, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astrophysics

Astrophysics, the study of how the universe works by applying the methods and principles of physics, is the cornerstone of modern astronomy. Students majoring in Astrophysics must complete advanced coursework in both astronomy (https://astro.illinois.edu) and physics (https://physics.illinois.edu), allowing them to demonstrate the rigorous preparation necessary for graduate study in astronomy/astrophysics, physics, and planetary and space sciences.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

The Astronomy Department undergraduate program also includes majors in Astronomy (p. 130), Computer Science + Astronomy (p. 234), and Astronomy + Data Science (p. 132), as well as a minor in Astronomy (p. 943).

Astronomy Major

The LAS major in Astronomy (p. 130) is a flexible program for students who are fascinated by the cosmos and plan to pursue technical or professional careers in areas requiring a solid grounding in physical science and mathematics. It is based upon both a broad and an in-depth exploration into astronomy and allied disciplines, and is flexible enough to be paired with many other majors or minors.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Computer Science + Astronomy Major

The LAS major in Computer Science + Astronomy (p. 234) is a flexible program for students who wish to combine a solid grounding in computer science with technical knowledge of astronomy. This blended curriculum helps develop a unique approach to problem solving and offers novel perspectives in interdisciplinary work, such as data visualization, data mining, astrophysical simulations, and image processing.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astronomy + Data Science Major

The Astronomy + Data Science (p. 132) major incorporates simultaneously a strong foundation in Data Science and Astronomy to develop an appreciation and understanding of how big data is transforming science. Graduates of the Astronomy + Data Science program will have gained experience working with modern large data sets using current computational and statistical methods, with a strong grounding in data curation and ethics.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astronomy Minor

The minor in astronomy (p. 943) is designed to broaden the student's knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as the aerospace industry, science writing, scientific journalism, or science teaching in schools.

QUESTIONS?

To get answers to your questions about our undergraduate programs in astronomy or to schedule a visit, contact Astronomy Advising (advising@astro.illinois.edu).

for the degree of Bachelor of Science in Liberal Arts & Sciences in Astrophysics

Departmental distinction: A student majoring in astrophysics may earn distinction or high distinction by attaining a minimum grade point average of 3.4 or 3.75, respectively, in required major courses (defined in the table below) taken at Illinois. For highest distinction, in addition to meeting the minimum requirements for high distinction, a senior thesis (ASTR 490) must be completed with strong endorsement by the research supervisor. Questions about eligibility for distinction status should be directed to an astronomy advisor before the senior year.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 65 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Atmospheric Sciences, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences in Atmospheric Sciences

The Science and Letters Curriculum in Atmospheric Science prepares students for careers in a wide range of disciplines within the atmospheric sciences including meteorology, environmental science, climate, remote sensing, science education, atmospheric chemistry, computational science and other areas. The curriculum is tailored to achieve the student's long term educational goals, their career aspirations in atmospheric science, and their general interests in the field. All students receive a firm foundation in mathematics, physics and chemistry, and develop data analysis and computational skills that can be used in a wide range of applications within and beyond the atmospheric sciences. Students can emphasize specific areas of interest in their elective choices.

With a B.S. degree in Atmospheric Science, students have opportunities for employment as meteorologists and atmospheric scientists within agencies of government (e.g. the National Weather Service, NOAA, NASA, EPA, DOD, DOE), many private firms, and in colleges and universities for those who continue with graduate education. Most students take part in independent study, internship or research projects as a capstone experience in their senior year. Students interested in a research career in atmospheric science are encouraged to undertake research projects in the capstone experience.

The undergraduate curriculum in atmospheric science is modeled on the recently published recommendations of the American Meteorological Society. The American Meteorological Society is the professional society for atmospheric scientists and meteorologists in the United States. Their "recommended attributes" for undergraduate degree programs in the atmospheric sciences and meteorology are guidelines for graduates to be successful in finding employment or in seeking admission to graduate programs.

for the degree of Bachelor of Science in Liberal Arts and Sciences in Atmospheric Sciences

Departmental distinction: Students majoring in Atmospheric Sciences can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

> **For distinction:** A minimum cumulative grade point average of 3.3 and have also completed an approved independent study project, approved senior thesis, or approved capstone.
>
> **For high distinction:** A minimum cumulative grade point average of 3.5 and have also completed an approved independent study project, approved senior thesis, or approved capstone.
>
> **For highest distinction:** A minimum cumulative grade point average of 3.7 and also completed an approved senior thesis or approved research capstone.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: normally equates to 58-59 hours including at least 32 hours in Atmospheric Sciences.

Minimum hours required for graduation: 120 hours.

for the degree of Bachelor of Science in Liberal Arts and Sciences in Atmospheric Sciences

1. All students will have a fundamental understanding of the atmosphere and the dynamical and physical processes that control weather, including weather analysis and forecasting.
2. All students will have a fundamental understanding of the natural and anthropogenic processes that control climate and global change.
3. All students will have demonstrable computational problem-solving skills.
4. All students will develop competency in clear scientific written and oral communication, and participate in scientific research.
5. All students will have an understanding of the societal impacts of weather and climate.

Biochemistry, BS

for the degree of Bachelor of Science in Biochemistry (Specialized Curriculum)

Biochemistry is an interdisciplinary field that encompasses biological and chemical sciences. We investigate the many fascinating processes within living systems at a molecular level. As a biochemistry student, you will explore questions such as

- What chemical reactions occur within cells, their functions, and how are they regulated?
- What is the chemical mechanism of inheritance, growth, cell division, and differentiation?
- How does the body convert energy and nutrients to new cells or create movement?
- What chemical and physical properties of naturally occurring molecules enable them to carry out such highly specific functions?

As part of the School of Molecular & Cellular Biology community, you will also take courses and study with MCB majors and have the benefit of curricular enhancements available to all MCB undergraduates. These include research in available laboratories schoolwide, study abroad, and advanced teaching facilities.

A bachelor's degree in biochemistry will prepare you for graduate studies in biochemistry, chemistry, molecular biology, or medical school and other professional programs such as dental, pharmacy, or veterinary school. Our graduates have become leaders in medicine, pharmacology, agriculture, nutrition, microbiology, cell biology, food technology, pollution control, and biotechnology.

Undergraduate degree programs in Molecular & Cellular Biology

- Biochemistry, BS (p. 141)
- Molecular & Cellular Biology, BSLAS (p. 588)
- Molecular & Cellular Biology Honors Concentration, BSLAS (p. 591)
- Molecular & Cellular Biology + Data Science, BSLAS (p. 595)
- Neuroscience, BSLAS (p. 649)

for the degree of Bachelor of Science in Biochemistry (Specialized Curriculum)

The typical program of courses required to satisfy this degree totals 126-131 hours as outlined below including up to 12 hours of non-primary language (if not completed in high school); in no case will a program totaling less than 120 hours qualify for graduation. In addition, in order to graduate there is a minimum 2.0 cumulative academic grade point average and student must attain a 2.5 academic grade point average in the chemistry, biochemistry, biology, mathematics, physics and advanced electives in science/engineering courses specified in this curriculum. All proposals for course substitutions must be approved by the academic advisor. This curriculum is intended for those students who desire a rigorous education in chemistry, biochemistry, and biology, who have definite research-oriented goals, and whose career objectives include graduate school, MD/PhD programs, or industry.

Students earning the Biochemistry degree automatically complete the Chemistry minor. Students earning a degree in the Specialized Curriculum in Biochemistry may not earn a second degree in the Science and Letters Curriculum in Molecular and Cellular Biology.

Departmental distinction: A student seeking distinction must satisfy the following:

- Complete a minimum of 6 credit hours of undergraduate research (BIOC 290 and BIOC 492) with a minimum of 4 credit hours of BIOC 492.

- Earn at least a 3.25 grade-point average.
- Present a senior thesis to the department.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by BIOC 460		
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
fulfilled by MCB 150, CHEM 102 or CHEM 202, CHEM 104 or CHEM 204, PHYS 101 or PHYS 211, PHYS 102 or PHYS 212		
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fulfilled by MATH 220 or MATH 221, MATH 231, MATH 241, STAT 212		
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)		0-15

Major Requirements

Code	Title	Hours
Select one of the following:		8-10
CHEM 202 & CHEM 203 & CHEM 204 & CHEM 205	Accelerated Chemistry I and Accelerated Chemistry Lab I and Accelerated Chemistry II and Accelerated Chemistry Lab II (preferred sequence)	
CHEM 102 & CHEM 103 & CHEM 104 & CHEM 105	General Chemistry I and General Chemistry Lab I and General Chemistry II and General Chemistry Lab II (with advisor approval)	
Organic chemistry, select from:		9-10
CHEM 236 & CHEM 237 & CHEM 436	Fundamental Organic Chem I and Structure and Synthesis and Fundamental Organic Chem II (preferred sequence)	
CHEM 232 & CHEM 233 & CHEM 332	Elementary Organic Chemistry I and Elementary Organic Chem Lab I and Elementary Organic Chem II (with advisor approval)	
Molecular and Cellular Biology		17
MCB 150	Molecular & Cellular Basis of Life	
MCB 250	Molecular Genetics	
MCB 251	Exp Techniqs in Molecular Biol	
MCB 252	Cells, Tissues & Development	
MCB 253	Exp Techniqs in Cellular Biol	
MCB 354	Biochem & Phys Basis of Life	
or equivalent as approved by academic advisor		
Physical chemistry, select one group of courses:		7-8
CHEM 440	Physical Chemistry Principles (Biological Perspective Section)	
BIOC 446	Physical Biochemistry (preferred sequence)	
or		
CHEM 442	Physical Chemistry I	
CHEM 444	Physical Chemistry II (with advisor approval)	
Mathematics & Statistics		14-15
STAT 212	Biostatistics	
MATH 220	Calculus	
or MATH 221	Calculus I	
MATH 231	Calculus II	
MATH 241	Calculus III	
Physics, select from: [3]		10
PHYS 211 & PHYS 212 & PHYS 213	University Physics: Mechanics and University Physics: Elec & Mag and Univ Physics: Thermal Physics (preferred sequence)	
or		
PHYS 101 & PHYS 102	College Physics: Mech & Heat and College Physics: E&M & Modern (or equivalent as approved by academic advisor (with advisor approval)	
Biochemistry: [4]		13
BIOC 455	Technqs Biochem & Biotech	
BIOC 460	Biochemistry Senior Seminar	
BIOC 406	Gene Expression & Regulation	
BIOP 401	Introduction to Biophysics	
Select 10 hours of Advanced Science/Technical Electives (may include up to 7 hours of BIOC 492, Senior Thesis) from approved list. [5]		10

1 *Transfer credit must be approved by an advisor in biochemistry in order to be used to satisfy degree requirements.*

2 *A more detailed description of the requirements is listed in the Biochemistry Curriculum Handbook, available in room 419A of Roger Adams Laboratory.*

3 *PHYS 213 is not required if CHEM 442/CHEM 444 sequence is taken.*

4 *Freshman orientation course is under development and will be required. See advisor for details.*

5 *An approved list of current courses will be updated annually in January/February for the coming year. Contact advisor.*

for the degree of Bachelor of Science in Biochemistry (Specialized Curriculum)

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Biochemistry (Specialized Curriculum)

Upon successful completion of the Biochemistry Specialized Curriculum, students will be able to:

1. Understand and appreciate that the diversity of life evolved over time by biomolecular processes of mutation, selection, genetic change, and epigenetics.
2. Explain that molecular and macromolecular structure as well as supramolecular architecture determine function and regulation.
3. Explain that information storage and flow are molecular-based, dynamic, and interactive.
4. Understand and appreciate that biochemical mechanisms and kinetics ensure relative cellular stability and function under external or internal changing condition.
5. Explain that energy is required by and transformed in biochemical systems as governed by the laws of thermodynamics.
6. Illustrate that living organisms and biological systems interact via molecular connections.
7. Design a scientific process and employ the scientific method, demonstrating that biochemistry is evidence-based and grounded in the formal practices of observation, objective measurement, and hypothesis testing.
8. Execute quantitative analysis and mathematical reasoning to interpret biochemical data.
9. Construct and utilize predictive models and simulations that define chemical relationships, as well as molecular interactions of complex systems.
10. Apply concepts from other sciences that span biology, chemistry, physics, mathematics, computation, and engineering to interpret biochemical phenomena.
11. Communicate biochemical concepts and understanding to members of a diverse scientific community, as well as to the general public.
12. Identify social and health-related dimensions of biochemical investigations.

Bioengineering, BS

for the degree of Bachelor of Science in Bioengineering

Bioengineers use engineering principles to solve problems in the life sciences, human health and medicine, and related industries. At the undergraduate level, the goal of bioengineering education is to instill a fundamental understanding of biology while developing core skills to design technologies relevant to human health and disease.

The Bioengineering department at the University of Illinois Urbana-Champaign provides a rigorous engineering education that prepares graduates to attain:

- recognition as skilled engineers in biotechnology, life sciences, medical technology, and health care industries;
- advanced degrees through graduate studies in bioengineering-related fields, or professional degrees in the health sciences, law, and business; and
- recognition for fostering an inclusive and collaborative environment while demonstrating leadership and effective teamwork within diverse professional and community organizations.

During the first and second years of the curriculum, fundamental courses in biology, chemistry, computing, mathematics, and physics introduce students to the multidisciplinary principles underlying bioengineering as a field. Throughout the curriculum, core coursework becomes progressively more integrative across the disciplines and in years three and four, students specialize in a chosen bioengineering subdiscipline. The program is distinguished by laboratory courses that provide diverse experiences and hands-on skills as well as a capstone design course in which students practice the rigorous application of engineering fundamentals to biological problems identified by faculty, clinicians, and industrial partners.

for the degree of Bachelor of Science in Bioengineering

Graduation Requirements
Minimum hours required for graduation: 128 hours.
Minimum Overall GPA: 2.0

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Bioengineering

This program is accredited by the Engineering Accreditation Commission of ABET (https://www.abet.org), under the General Criteria and the Bioengineering, Biomedical, and similarly named Engineering Programs Criteria.

Bioengineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Brain & Cognitive Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Brain & Cognitive Science

The **Brain and Cognitive Science major** introduces the student to a simple question: How do intelligent systems work? Our world provides two examples of complex intelligent systems—human beings (and possibly some other animals) and intelligent computer systems. Brain and Cognitive Science majors investigate the brain and behavior of intelligent biological systems (e.g. people) from the perspective that the brain is a kind of computer. Consequently, students must learn about how brains and computers work, and how these can explain what we know about mental functions including perception, learning, memory, and language. Brain and Cognitive Science majors make use of discoveries from a number of different disciplines, including psychology, neuroscience, computer science, linguistics, philosophy, and anthropology, and has applications to the development of technology in education, health, language sciences, and design.

The Brain and Cognitive Science major provides fundamental training in psychology, neuroscience, and computation, and it allows a great deal of flexibility with regard to more advanced courses. The major requires training in statistics, a laboratory course, and the capstone course. Students should contact our Undergraduate Advising Office for help in creating a plan of study and research that best meets their goals and interests.

Academic Advising

The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

Undergraduate Degree Programs in Psychology

- BSLAS in Brain & Cognitive Science (p. 148)
- BSLAS in Psychology (p.) with the following concentrations:
  - Behavioral Neuroscience (p. 703)
  - Clinical/Community Psychology (p. 706)
  - Cognitive Neuroscience (p. 708)
  - Cognitive Psychology (p. 710)
  - Developmental Psychology (p. 712)
  - Diversity Science (p. 714)
  - Intradisciplinary Psychology (p. 717)
  - Organizational Psychology (p. 719)
  - Personality Psychology (p. 721)
  - Social Psychology (p. 723)

for the degree of Bachelor of Science in Liberal Arts & Sciences in Brain & Cognitive Science

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours).

Departmental distinction: To be eligible for graduation with Distinction in Psychology, a student must complete a two-semester research sequence in PSYC 494, submit a Senior Thesis that must be approved by the department, and maintain an overall 3.0 GPA at the time of submission. A student can also enroll in PSYC 492 to facilitate the preparation of a Bachelor's thesis.

To be eligible for High or Highest Distinction, a student must first be admitted to the Honors Program (requirements: junior standing, 3.5 GPA in Psychology overall, and completion of the statistics an laboratory requirements). The student then has to complete the three semester Honors sequence (PSYC 398, PSYC 498, PSYC 499), submit a Senior Thesis that must be approved by the department, and maintain an overall GPA of at least 3.0 to be awarded High Distinction or a GPA of 3.5 for Highest Distinction.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 42 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Liberal Arts & Sciences in Brain & Cognitive Science

1. Students will be able to explain how intelligent systems function by integrating foundational concepts from psychology, neuroscience, and computation, including how perception, learning, memory, and language emerge from biological and artificial processes.
2. Students will apply interdisciplinary methods—drawing from fields such as computer science, linguistics, philosophy, and anthropology—to analyze and model brain–behavior relationships and evaluate theories of biological and artificial intelligence.
3. Students will demonstrate competency in statistics, programming, and laboratory techniques to design, conduct, and interpret empirical or computational studies, culminating in a capstone seminar that synthesizes their learning across the major.

Business + Data Science, BS

for the degree of Bachelor of Science in Business plus Data Science

This major is sponsored by the Department of Business Administration within the Gies College of Business, in collaboration with the iSchool and the Departments of Statistics, Computer Science, and Mathematics. The Business+Data Science major is designed for students seeking to supplement their business specialization foundations with a strong background in data science. The major prepares students for professional and graduate work while involving a particular distinction with respect to analytics.

for the degree of Bachelor of Science in Business plus Data Science

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Meaningful Research or Discovery Experience

Code	Title	Hours
One of the most important skills a student will gain in a BUS+ DS degree will be the ability to present data in meaningful ways. A meaningful research and experience is as much a pillar of this degree program as both the core coursework and the area of specialization. This capstone experience can be fulfilled through BUS 301. This course is an active learning, real-client experience that will allow students to join their data science skills with their business skills.

for the degree of Bachelor of Science in Business plus Data Science

The learning objectives related to student learning outcomes includes competence in selected concentration, data science, critical thinking, group work, communication. These outcomes are mapped to questions concerning student ability to use data analytics and problem solving to effectively understand real-world business issues, problem analysis and articulating conclusions, assuming leadership roles, grasp of international complexities effect business and data science.

Business Undeclared

All first-year students admitted to the Gies College of Business begin in our Business Undeclared program. Students can explore all areas of study while working towards completing coursework in the Business Core Requirements, as well as General Education Requirements. The Business Core is a group of required coursework that all students in Gies College of Business must complete. Business Undeclared students do not need to complete the entire Business Core prior to declaring a major. After students find the best fit major for them, they will declare a major by no later then the end of their sophomore year. Once students declare a major, they will complete all remaining General Education and Business Core requirements, as well as the specific requirements for that major.

The General Education requirements reflect the most recent revisions for all Gies Business Programs which aligns with the campus grid/structure for general education requirements.

Graduation Requirements

Minimum hours required for graduation: Students may not graduate from Business Undeclared. Majors students declare in the Gies College of Business require 124 credits to graduate.

Business Undeclared students should take coursework to satisfy General Education, Business Core Requirements, and other areas of interest. Business Undeclared students are not required to complete all requirements listed below prior to declaring a major.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

First-year students admitted to Gies College of Business are admitted into the Business Undeclared program. Students will work with an advisor in the Office of Undergraduate Programs, to select coursework that works towards requirements in the Business Core as well as General Education requirements. Students are able to stay in Business Undeclared for their first two years, but may declare a major within Gies at any time.

Chemical Engineering, BS

for the degree of Bachelor of Science in Chemical Engineering (Specialized Curriculum)

The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses. It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The standard Chemical Engineering curriculum provides a strong fundamental understanding of Chemical Engineering and is designed to prepare students for careers in industries spanning the areas of energy, chemical processing, food, semiconductor processing, personal care products, specialized fibers and materials.

As an alternative, the Department of Chemical and Biomolecular Engineering provides a *Bachelor of Science in Chemical Engineering* degree with a concentration in Biomolecular Engineering. The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

for the degree of Bachelor of Science, in Chemical Engineering (Specialized Curriculum)

Graduation Requirements

Minimum hours required for graduation: 129 hours.

A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science, in Chemical Engineering (Specialized Curriculum)

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the* Degree and General Education Requirements page *(p. 2).

****The sample sequence below assumes that the student has placed into the Accelerated Chemistry courses.***

First Year

First Semester	Hours
ENG 100	1
CHEM 202	3
CHEM 203	2

for the degree of Bachelor of Science, in Chemical Engineering (Specialized Curriculum)

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Chemical Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Overview of College Admissions & Requirements: Liberal Arts & Sciences (p. 2288)

Chemical Engineering: Biomolecular Engineering, BS

for the degree of Bachelor of Science in Chemical Engineering, Biomolecular Engineering Concentration (Specialized Curriculum)

The first two years of the Chemical Engineering curriculum provide a strong foundation in basic sciences through Physics, Mathematics, Chemistry, an introduction to what Chemical Engineers do, and the fundamental basis of Chemical Engineering (Mass and Energy Balances and Thermodynamics.) In the third year, students delve deeper into more specialized Chemistry courses such as Physical and Analytical Chemistry, while exploring fundamental Chemical Engineering courses such as Momentum Transfer, Separations, and Reactor Design. The Senior year incorporates all of this learning through high level technical electives, Process Control, Capstone Lab, and Capstone Design courses. It is through the lab and design class that students apply everything they have learned in previous Chemical Engineering courses to real-world team projects and presentations.

The Biomolecular Engineering concentration builds upon the traditional principles of chemical engineering, but specializes in biological and biotechnological systems in order to better prepare students who are interested in or seek employment in the food, pharmaceutical, and biotechnology industries.

for the degree of Bachelor of Science in Chemical Engineering, Biomolecular Engineering Concentration (Specialized Curriculum)

For those students who are pursuing a B.S. Degree in Chemical Engineering, students can choose to earn a concentration in Biomolecular Engineering, as well. This concentration builds upon the traditional principles of chemical engineering but specializes in biological and biotechnological systems to better prepare students who are interested in or plan to seek employment in the food, pharmaceutical, and biotechnology industries.

Graduation Requirements

Minimum hours required for graduation: 129 hours

A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
	fulfilled by CHBE 431	
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
	fulfilled by CHEM 202 and CHEM 204, or CHEM 102 and CHEM 104; and PHYS 211, PHYS 212	
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
	fulfilled by MATH 220 or MATH 221 and MATH 231, MATH 241, MATH 285, PHYS 211, PHYS 212, CS 101	
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)		0-15

Orientation and Professional Development

These courses introduce opportunities and resources the college, department, and curriculum offers students. They also provide background on the Chemical Engineering curriculum, what chemical engineers do, and the skills to work effectively and successfully in the engineering profession.

Code	Title	Hours
CHBE 121	CHBE Profession	1
	For non-first-year students, CHBE 121 can be replaced with 1 hour of credit from Technical Elective List 1 or List 2. (Ref List 1 and List 2 below.)	
ENG 100	Grainger Engineering Orientation Seminar	1
Total Hours		**2**

Foundational Mathematics and Science

These courses stress the basic mathematical and scientific principles upon which the engineering discipline is based.

Code	Title	Hours

for the degree of Bachelor of Science in Chemical Engineering, Biomolecular Engineering Concentration (Specialized Curriculum)

Upon completing this program, students are expected to be able to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Communicate effectively with a range of audiences.
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.
8. An ability to analyze the chemistry and metabolism of macromolecules in biological processes and their relation to the regulation and processes of organisms, cells, and subcellular components.

Chemical Engineering + Data Science, BS

for the degree of Bachelor of Science in Chemical Engineering plus Data Science

This major is sponsored jointly by the Departments of Statistics, Mathematics and Chemical and Biomolecular Engineering, the Siebel School of Computer and Data Science, and the iSchool. The Chemical Engineering + Data Science degree is designed for students wanting a strong foundation in Data Science with a deep B.S. level specialization in Chemical and Biomolecular Engineering. The major prepares students for professional or graduate work in Chemical and Biomolecular Engineering with additional mastery of statistics, data analysis, data modeling, machine learning, and other data science topics.

for the degree of Bachelor of Science in Chemical Engineering plus Data Science

Graduation Requirements

Minimum hours required for graduation: 132 hours.

A grade point average of 2.5 or higher in all courses required for the major earned on the UIUC campus is required in order to be accepted by the department as juniors and seniors.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Chemical Engineering plus Data Science

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

The sample sequence below assumes that the student has placed into the Accelerated Chemistry courses.

for the degree of Bachelor of Science in Chemical Engineering plus Data Science

Student learning outcomes are based on learning outcomes in line with the Accreditation Board of Engineering (ABET) accreditation process.

Upon completing the program, Chemical Engineering + Data Science students are expected to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Communicate effectively with a range of audiences.
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. Acquire and apply new knowledge as needed, using appropriate learning strategies.

Students interested in majoring in chemistry may choose the Specialized Curriculum in Chemistry (http://catalog.illinois.edu/undergraduate/las/chemistry-bs/), leading to the Bachelor of Science Major in Chemistry, or the Chemistry Major (http://catalog.illinois.edu/undergraduate/las/chemistry-bslas/#requirementstext), leading to the Bachelor of Science in Liberal Arts and Sciences.

The Specialized Curriculum in Chemistry is a rigorous, specialized program suitable for those planning careers in chemistry. The Chemistry Major in the Sciences and Letters Curriculum is used by some students planning chemistry careers, but it is more often chosen by students wishing to obtain chemistry backgrounds for use in related fields.

for the degree of Bachelor of Science in Chemistry (Specialized Curriculum)

Specialized Curriculum

Graduation requires grade point averages of at least 2.0 overall and 2.0 in chemistry, mathematics, and physics courses.

Students in the Specialized Curriculum in Chemistry must include a course in Biochemistry in the Advanced Chemistry area or the Technical Electives area to be certified by the American Chemical Society as having met its specifications.

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a Illinois coursework major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75, respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Chemistry (Specialized Curriculum)

Students graduating with the BS in Chemistry will have:

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the subfields of chemistry, such as analytical, organic, physical, materials, inorganic, as well as chemical biology.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific data, information and literature.
4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

Chemistry: Environmental Chemistry, BS

for the Degree of Bachelor of Science in Chemistry, Environmental Chemistry Concentration

This concentration is designed to provide a background in environmental chemistry that is sufficient in breadth and depth to prepare a person to

work as an environmental chemist in the public or private sectors and/or to pursue an advanced degree in the field. Students who complete this concentration will be certified in environmental chemistry by the American Chemical Society (ACS). The Environmental Chemistry Concentration is based on the Specialized Curriculum in Chemistry.

PHYS 211	University Physics: Mechanics	
PHYS 212	University Physics: Elec & Mag	
PHYS 214	Univ Physics: Quantum Physics	
Technical Electives		**7-9**
CHEM (300 or higher), BIOC, CHBE (200 or higher)		
Courses in life sciences (all courses at 200 or higher)		
Mathematics or computer science above the basic level		
Other courses in the physical and biological sciences and engineering including CHEM 199 (Three hours maximum credit in CHEM 199. Additional courses in sciences and engineering can be taken, upon consultation with the SCS advisor and approval from the chemistry department. Approved courses must generally have a strong technical prerequisite, such as one year of college-level math or science.)		

Code	Title	Hours
Required Technical Elective Courses for the Environmental Chemistry Concentration		**12**
These courses can contribute, in whole or in part, to the required 7-9 hours of technical electives for the Specialized Curriculum in Chemistry.		
Basic Courses		
CHEM 360	Chemistry of the Environment	3
or CEE 330	Environmental Engineering	
Advanced Courses		9
Select three courses from the following:		
ATMS 420	Atmospheric Chemistry	
ATMS 449	Biogeochemical Cycles	
CEE 443	Env Eng Principles, Chemical	
CHEM 397	Individual Study Junior	
CHEM 460	Green Chemistry	
CHEM 497	Individual Study Senior	
CHEM 499	Senior Thesis	
GEOL 380	Environmental Geology	
GEOL 460	Geochemistry	
NRES 351	Introduction to Environmental Chemistry	
NRES 487	Soil Chemistry	
NRES 490	Surface Water System Chemistry	
Other 400 level courses dealing with economic, engineering, or biological aspects of environmental chemistry, upon consultation with the SCS advisor and approval of the chemistry department.		

for the Degree of Bachelor of Science in Chemistry, Environmental Chemistry Concentration

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the Degree of Bachelor of Science in Chemistry, Environmental Chemistry Concentration

---

Students graduating with the BS in Chemistry will have:

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the subfields of chemistry, such as analytical, organic, physical, materials, inorganic, as well as chemical biology.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific data, information and literature.
4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

The Department of Chemistry will supply, upon request, a brochure showing recommended semester-by-semester programs for the completion of the curriculum.

Departmental distinction: Students qualify for graduation with distinction by exhibiting superior performance in both course work and in senior thesis research. To be eligible, a student must have a UIUC coursework major grade point average of 3.25, must take CHEM 499 (normally for two semesters) and submit a senior thesis for evaluation, and must have their undergraduate research advisor submit to the department Head a letter of support attesting to the effort invested by the student. The minimum major GPAs for Distinction, High Distinction, and Highest Distinction are 3.25, 3.5, and 3.75 respectively. Final decisions on awarding Distinction honors will be made by the Head or designee.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3

Major Core Requirements		
Chemistry and biochemistry courses		**30**
Chemistry and biochemistry courses are any courses in CHEM or BIOC.		
No more than 10 hours of the following courses may count toward the 30 hours: CHEM 197, CHEM 297, CHEM 397, CHEM 497, and CHEM 499. The following courses do not count towards the 30 hours: CHEM 101, CHEM 108, and CHEM 199.		
At least 12 of the 30 hours must be at the 300 or 400 level, including at least one course outside physical chemistry. These 12 hours must include CHEM 440 or CHEM 442 and may include MCB 354 or MCB 450.		
CHEM 150	First Semester Success in Chemistry (Transfer students may substitute 1 hour of 200 level or higher Chemistry, including CHEM 297, CHEM 397, CHEM 497, or CHEM 499, for the 1 hour of CHEM 150.)	
General chemistry courses		
Select one of the following:		
CHEM 102 & CHEM 103 & CHEM 104 & CHEM 105	General Chemistry I and General Chemistry Lab I and General Chemistry II and General Chemistry Lab II	
CHEM 202 & CHEM 203 & CHEM 204 & CHEM 205	Accelerated Chemistry I and Accelerated Chemistry Lab I and Accelerated Chemistry II and Accelerated Chemistry Lab II	

Organic chemistry courses		
Select one of the following:		
CHEM 232 & CHEM 233	Elementary Organic Chemistry I and Elementary Organic Chem Lab I	
CHEM 236 & CHEM 237	Fundamental Organic Chem I and Structure and Synthesis	
Physical chemistry course		
CHEM 440	Physical Chemistry Principles	
or CHEM 442	Physical Chemistry I	
Mathematics courses		
MATH 220	Calculus	4-5
or MATH 221	Calculus I	
MATH 231	Calculus II	3
MATH 241	Calculus III	4
Physics courses		
Select one of the following:		8-10
PHYS 101 & PHYS 102	College Physics: Mech & Heat and College Physics: E&M & Modern	
PHYS 211 & PHYS 212	University Physics: Mechanics and University Physics: Elec & Mag

Civil Engineering, BS

for the degree of Bachelor of Science in Civil Engineering

Civil and environmental engineers apply basic principles of science, supported by mathematical and computational tools, to address the biggest challenges facing society: ensuring clean air, safe drinking water and sanitation; addressing our changing environment; protecting the population from natural and man-made hazards; designing a sustainable infrastructure that serves everyone; re-imagining human and commodity traffic for an automated future; and of course designing and constructing the world's tallest buildings and most iconic bridges.

The civil engineering program comprises seven focus areas (construction engineering and management, construction materials, environmental engineering and science, geotechnical engineering, water resources engineering and science, structural engineering, and transportation engineering) and three interdisciplinary programs (sustainable and resilient infrastructure systems; energy-water-environment sustainability; and societal risk and hazard mitigation). Although each area and program has its own special body of knowledge and engineering tools, civil and environmental engineering projects often use knowledge and data from many of these topical areas together in order to address societal challenges.

CEE's Program Education Objectives are to educate CEE students to:

1. a wide range of careers as engineers, consultants, and entrepreneurs in both traditional and emerging fields of civil and environmental engineering, science, and technology;
2. placement in leading graduate programs in engineering and interdisciplinary areas so they are able to develop as researchers, experts, educators, and leaders;
3. professional licensure and continuous professional skills development;
4. the ability to learn and create new knowledge in ever-changing environments of the 21st century and to communicate their work and ideas to colleagues, professional societies, and the public at large; and
5. high ethical and technical standards that enable them to lead their professional disciplines, organizations, and communities globally.

Program Review and Approval

To qualify for the degree of Bachelor of Science in Civil Engineering, each student's academic program plan must be reviewed by a standing committee of the faculty (the Program Review Committee) and approved by the Associate Head of Civil and Environmental Engineering in charge of undergraduate programs. This review and approval process ensures that individual programs satisfy the educational objectives and all of the requirements of the civil and environmental engineering program, that those programs do not abuse the substantial degree of flexibility that is present in the curriculum, and that the career interests of each student are cultivated and served.

Current Program Educational Objectives

for the degree of Bachelor of Science in Civil Engineering

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Civil Engineering Primary and Secondary Fields

Code	Title	Hours
Students choose a primary and a secondary field of study, of which there are seven traditional areas of study and three interdisciplinary programs to choose from. The particular primary and secondary field selections shape the selection of science electives, civil engineering core courses and advanced technical electives. The specific choices of courses in this category are made through the submission of a Plan of Study, which is subject to approval by the faculty Program Review Committee. Instead of choosing separate primary and secondary field options as listed below, students could select to pursue the General Civil Engineering Option. The General Civil Engineering Option offers a broader coverage of Civil Engineering topical areas. This option can be found below the Secondary Field list.		
Primary Field. Students choose 1 primary field, in which they must take 1 science elective course (3-4 hours), 15-16 hours of 300 level Civil Engineering Core Courses from departmentally approved list, and 12-13 hours of 400 level Advanced Technical Electives from departmentally approved list.		**31**
Construction Engineering and Management Primary		
Science Electives - Select 1 course from list below:		
ATMS 120	Severe and Hazardous Weather	3
ATMS 303	Synoptic-Dynamic Wea Analysis	4
ECE 205	Electrical and Electronic Circuits	3
FIN 221	Corporate Finance	3

CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3
Select 2 courses from list below:		
CEE 310	Transportation Engineering	3
CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 340	Energy and Global Environment	3
CEE 350	Water Resources Engineering	3
Advanced Technical Courses		
Required courses:		
CEE 460	Steel Structures I	3
CEE 461	Reinforced Concrete I	3
CEE 465	Design of Structural Systems (Required Integrated Design Course)	3
CEE 470	Structural Analysis	4
Transportation Engineering Primary		
Science Electives - Select 1 course from list below:		
CS 357	Numerical Methods I	3
ECE 205	Electrical and Electronic Circuits	3
GEOL 107	Physical Geology	4
ME 200	Thermodynamics	3
ME 340	Dynamics of Mechanical Systems	3.5
MSE 401	Thermodynamics of Materials	3
SE 320	Control Systems	4
STAT 420	Methods of Applied Statistics	3 or 4
Civil Engineering Core Courses		
Required courses:		
CEE 300	Behavior of Materials	4
CEE 310	Transportation Engineering	3
Select 3 courses from the list below:		
CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 340	Energy and Global Environment	3
CEE 350	Water Resources Engineering	3
CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3
Advanced Technical Courses - Select 1 course from each of the 3 Areas below and 1 course from the recommended list:		
Area 1 - Facilities:		
CEE 405	Asphalt Materials I	3 or 4
CEE 406	Pavement Design I	3 or 4
CEE 407	Airport Design	3 or 4
Area 2 - Systems:		
CEE 407	Airport Design	3 or 4
CEE 415	Geometric Design of Roads (Required Integrated Design Course)	4
CEE 416	Traffic Capacity Analysis	3 or 4
CEE 418	Public Transportation Systems	3 or 4
Area 3 - Railroad:		
CEE 408	Railroad Transportation Engrg	3 or 4
CEE 409	Railroad Track Engineering	3 or 4
CEE 410	Railway Signaling & Control	3 or 4
CEE 411	RR Project Design & Constr	3 or 4
Advanced Technical Courses Recommended:		
CEE 401	Concrete Materials	4
CEE 405	Asphalt Materials I	3 or 4
CEE 406	Pavement Design I	3 or 4
CEE 407	Airport Design	3 or 4
CEE 408	Railroad Transportation Engrg	3 or 4
CEE 409	Railroad Track Engineering	3 or 4
CEE 410	Railway Signaling & Control	3 or 4
CEE 411	RR Project Design & Constr	3 or 4
CEE 412	High-Speed Rail Engineering	3 or 4
CEE 415	Geometric Design of Roads (Required Integrated Design Course)	4
CEE 416	Traffic Capacity Analysis	3 or 4
CEE 417	Urban Transportation Planning	4
CEE 418	Public Transportation Systems	3 or 4
Water Resources Engineering and Science Primary		
Science Electives - Select 1 course from list below:		
CS 357	Numerical Methods I	3
GEOL 107	Physical Geology	4
ME 200	Thermodynamics	3
Civil Engineering Core Courses		
Required course:		
CEE 350	Water Resources Engineering	3
Select 4 courses from the list below:		
CEE 300	Behavior of Materials	4
CEE 310	Transportation Engineering	3

CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 340	Energy and Global Environment	3
CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3
Advanced Technical Courses		
Required courses - Select 1 from list below:		
CEE 452	Hydraulic Analysis and Design	3
CEE 453	Urban Hydrology and Hydraulics (Required Integrated Design Course)	4
Select remaining courses to fulfill this requirement from the list below:		
CEE 433	Water Technology and Policy	3 or 4
CEE 434	Environmental Systems I	3
CEE 437	Water Quality Engineering	3
CEE 450	Surface Hydrology	3
CEE 451	Environmental Fluid Mechanics	3
CEE 452	Hydraulic Analysis and Design	3
CEE 453	Urban Hydrology and Hydraulics	4
CEE 457	Groundwater	3
CEE 458	Water Resources Field Methods	4
CEE 459	Ecohydraulics	4
Energy-Water-Environment Sustainability Primary		
Science Electives - Select 1 course from list below:		
ME 200	Thermodynamics	3
CHBE 321	Thermodynamics	4
Civil Engineering Core Courses		
Required course:		
CEE 340	Energy and Global Environment	3
Select 4 courses from the list below:		
CEE 300	Behavior of Materials	4
CEE 310	Transportation Engineering	3
CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 350	Water Resources Engineering	3
CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3
Advanced Technical Courses		
Required course:		
CEE 493	Sustainable Design Eng Tech	4
Select remaining courses to fulfill this requirement from the list below:		
ABE 436	Renewable Energy Systems	3 or 4
CEE 433	Water Technology and Policy	3 or 4
CEE 435	Public Health Engineering	3 or 4
CEE 434	Environmental Systems I	3
CEE 437	Water Quality Engineering	3
CEE 441	Air Pollution Sources, Transport and Control	4
CEE 449	Environmental Engineering Lab	3
CEE 450	Surface Hydrology	3
CEE 452	Hydraulic Analysis and Design	3
CEE 453	Urban Hydrology and Hydraulics	4
CEE 457	Groundwater	3
CEE 459	Ecohydraulics	4
CEE 473	Wind Effects on Structures	4
CEE 492	Data Science for Civil and Environmental Engineering	4
CEE 498	Special Topics (As approved)	4
ENG 471	Seminar Energy & Sustain Engrg	1
ME 400	Energy Conversion Systems	3 or 4
NPRE 402	Nuclear Power Engineering	3 or 4
NPRE 475	Wind Power Systems	3 or 4
Societal Risk and Hazard Mitigation Primary		
Science Electives - Select 1 course from list below:		
FIN 230	Introduction to Insurance	3
GEOL 118	Natural Disasters	3
LAW 301	Introduction to Law	3
NRES 287	Environment and Society	3
STAT 420	Methods of Applied Statistics	3 or 4
Civil Engineering Core Courses		
Required course:		
CEE 340	Energy and Global Environment	3
Select 4 courses from list below:		
CEE 300	Behavior of Materials	4
CEE 310	Transportation Engineering	3
CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 350	Water Resources Engineering	3
CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3
Advanced Technical Courses		
Required course:		
CEE 491	Decision and Risk Analysis	3 or 4
Select remaining courses to fulfill this requirement from list below:		
CEE 406	Pavement Design I	3 or 4
CEE 416	Traffic Capacity Analysis	3 or 4
CEE 417	Urban Transportation Planning	4
CEE 437	Water Quality Engineering	3
CEE 440	Fate Cleanup Environ Pollutant	4
CEE 449	Environmental Engineering Lab	3
CEE 460	Steel Structures I	3
CEE 461	Reinforced Concrete I	3
CEE 465	Design of Structural Systems	3
CEE 472	Structural Dynamics I	3 or 4
CEE 473	Wind Effects on Structures	4
IE 410	Advanced Topics in Stochastic Processes & Applications	3 or 4
NPRE 442	Radioactive Waste Management	3
SE 450	Decision Analysis I	3 or 4
STAT 425	Statistical Modeling I	3 or 4
STAT 429	Time Series Analysis	3 or 4
STAT 430	Topics in Applied Statistics	3 or 4
UP 438	Disasters and Urban Planning	4
Sustainable and Resilient Infrastructure Systems Primary		

Science Electives - Select 1 course from list below:		
ATMS 120	Severe and Hazardous Weather	3
CS 357	Numerical Methods I	3
ENSU 300	Environmental Sustainability	3
ESE 140	Climate and Global Change	3
ESE 320	Water Planet, Water Crisis	3
ESE 482	Challenges of Sustainability	3
FIN 221	Corporate Finance	3
GGIS 103	Earth's Physical Systems	4
NPRE 201	Energy Systems	3
NRES 439	Env and Sustainable Dev	3
SE 320	Control Systems	4
STAT 420	Methods of Applied Statistics	3 or 4
UP 406	Urban Ecology	4
Civil Engineering Core Courses		
Required course:		
CEE 340	Energy and Global Environment	3
Select 4 courses from list below:		
CEE 300	Behavior of Materials	4
CEE 310	Transportation Engineering	3
CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 350	Water Resources Engineering	3
CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3
Advanced Technical Courses		
Required course:		
CEE 491	Decision and Risk Analysis	3 or 4
Select remaining courses to fulfill this requirement from list below:		
ABE 436	Renewable Energy Systems	3 or 4
CEE 401	Concrete Materials	4
CEE 406	Pavement Design I	3 or 4
CEE 408	Railroad Transportation Engrg	3 or 4
CEE 409	Railroad Track Engineering	3 or 4
CEE 416	Traffic Capacity Analysis	3 or 4
CEE 417	Urban Transportation Planning	4
CEE 418	Public Transportation Systems	3 or 4
CEE 421	Construction Planning	3 or 4
CEE 434	Environmental Systems I	3
CEE 453	Urban Hydrology and Hydraulics	4
CEE 458	Water Resources Field Methods	4
CEE 465	Design of Structural Systems	3
CEE 493	Sustainable Design Eng Tech	4
CEE 498	Special Topics (As approved)	3-4
MSE 489	Matl Select for Sustainability	3 or 4
UP 466	Energy & the Built Environment	4
UP 480	Sustainable Design Principles	2
Secondary Field. Students choose 1 secondary field that is different from but complements and adds breadth to their primary field selection. This should be done in consultation with academic advisor. See list of classes for each area of study below.		**6**
Construction Engineering and Management Secondary		
Students must have taken CEE 320 to pursue this Secondary Field.		
Advanced Technical Courses		
Required course:		
CEE 421	Construction Planning	3
Select 1 course from list below:		
CEE 420	Construction Productivity	3
CEE 422	Construction Cost Analysis	3
Construction Materials Engineering Secondary		
Students must have taken CEE 300 to pursue this Secondary Field.		
Advanced Technical Courses		
Select 2 courses from list below:		
CEE 401	Concrete Materials	4
CEE 405	Asphalt Materials I	3
CEE 406	Pavement Design I	3
Environmental Engineering Secondary		
Students must have taken CEE 330 to pursue this Secondary Field.		
Advanced Technical Courses		
Select at least 2 courses from list below, a minimum of 6 credit hours required.		
CEE 434	Environmental Systems I	3
CEE 435	Public Health Engineering	3
CEE 437	Water Quality Engineering	3
CEE 438	Science & Environmental Policy	3
CEE 441	Air Pollution Sources, Transport and Control	4
CEE 442	Environmental Engineering Principles, Physical	4
CEE 443	Env Eng Principles, Chemical	4
CEE 444	Env Eng Principles, Biological	4
CEE 447	Atmospheric Chemistry	4
CEE 449	Environmental Engineering Lab	3
Geotechnical Engineering Secondary		
Students must have taken CEE 380 to pursue this Secondary Field.		
Advanced Technical Courses		
Required course:		
CEE 484	Applied Soil Mechanics	3
Select 1 course from list below:		
CEE 483	Soil Mechanics and Behavior	4
CEE 498	Special Topics (As approved)	3-4
Structural Engineering Secondary		
Students must have taken CEE 360 to pursue this Secondary Field.		
Advanced Technical Courses		
Required courses:		
CEE 460	Steel Structures I	3
CEE 461	Reinforced Concrete I	3
Transportation Engineering Secondary		
Students must have taken CEE 310 to pursue this Secondary Field.		

Advanced Technical Courses		
Select 2 courses, each from a different Area listed below:		
Area 1 - Facilities:		
CEE 405	Asphalt Materials I	3
CEE 406	Pavement Design I	3
CEE 407	Airport Design	3
Area 2 - Systems:		
CEE 407	Airport Design	3
CEE 415	Geometric Design of Roads	4
CEE 416	Traffic Capacity Analysis	3
CEE 418	Public Transportation Systems	3
Area 3 - Railroad:		
CEE 408	Railroad Transportation Engrg	3
CEE 409	Railroad Track Engineering	3
CEE 410	Railway Signaling & Control	3
CEE 411	RR Project Design & Constr	3
CEE 412	High-Speed Rail Engineering	3
Water Resources Engineering and Science Secondary		
Students must have taken CEE 350 to pursue this Secondary Field.		
Advanced Technical Courses		
Select 2 courses from list below:		
CEE 433	Water Technology and Policy	3
CEE 450	Surface Hydrology	3
CEE 451	Environmental Fluid Mechanics	3
CEE 452	Hydraulic Analysis and Design	3
CEE 453	Urban Hydrology and Hydraulics	4
CEE 457	Groundwater	3
CEE 458	Water Resources Field Methods	4
CEE 459	Ecohydraulics	4
Energy-Water-Environment Sustainability Secondary		
Students must have taken CEE 340 to pursue this Secondary Field.		
Advanced Technical Courses		
Required course:		
CEE 493	Sustainable Design Eng Tech	4
Select 1 course from list below:		
ABE 436	Renewable Energy Systems	3 or 4
CEE 433	Water Technology and Policy	3
CEE 434	Environmental Systems I	3
CEE 435	Public Health Engineering	3
CEE 437	Water Quality Engineering	3
CEE 441	Air Pollution Sources, Transport and Control	4
CEE 449	Environmental Engineering Lab	3
CEE 450	Surface Hydrology	3
CEE 452	Hydraulic Analysis and Design	3
CEE 453	Urban Hydrology and Hydraulics	4
CEE 457	Groundwater	3
CEE 459	Ecohydraulics	4
CEE 473	Wind Effects on Structures	4
CEE 492	Data Science for Civil and Environmental Engineering	4
CEE 498	Special Topics (As approved)	3-4
ME 400	Energy Conversion Systems	3 or 4
NPRE 402	Nuclear Power Engineering	3 or 4
NPRE 475	Wind Power Systems	3 or 4
Societal Risk and Hazard Mitigation Secondary		
Advanced Technical Courses		
Required course:		
CEE 491	Decision and Risk Analysis	3
Select 1 course from the list below:		
CEE 406	Pavement Design I	3
CEE 416	Traffic Capacity Analysis	3
CEE 417	Urban Transportation Planning	4
CEE 437	Water Quality Engineering	3
CEE 440	Fate Cleanup Environ Pollutant	4
CEE 449	Environmental Engineering Lab	3
CEE 460	Steel Structures I	3
CEE 461	Reinforced Concrete I	3
CEE 465	Design of Structural Systems	3
CEE 472	Structural Dynamics I	3
CEE 473	Wind Effects on Structures	4
IE 410	Advanced Topics in Stochastic Processes & Applications	3 or 4
NPRE 442	Radioactive Waste Management	3
SE 450	Decision Analysis I	3 or 4
STAT 425	Statistical Modeling I	3 or 4
STAT 429	Time Series Analysis	3 or 4
STAT 430	Topics in Applied Statistics	3 or 4
UP 438	Disasters and Urban Planning	4
Sustainable and Resilient Infrastructure Systems Secondary		
Students must have taken CEE 340 to pursue this Secondary Field.		
Advanced Technical Courses		
Required course:		
CEE 491	Decision and Risk Analysis	3
Select 1 course from the list below:		
ABE 436	Renewable Energy Systems	3 or 4
CEE 401	Concrete Materials	4
CEE 406	Pavement Design I	3
CEE 408	Railroad Transportation Engrg	3
CEE 409	Railroad Track Engineering	3
CEE 416	Traffic Capacity Analysis	3
CEE 417	Urban Transportation Planning	4
CEE 418	Public Transportation Systems	3
CEE 421	Construction Planning	3
CEE 434	Environmental Systems I	3
CEE 453	Urban Hydrology and Hydraulics	4
CEE 458	Water Resources Field Methods	4
CEE 465	Design of Structural Systems	3
CEE 493	Sustainable Design Eng Tech	4
CEE 498	Special Topics (As approved)	3-4
MSE 489	Matl Select for Sustainability	3 or 4
UP 466	Energy & the Built Environment	4

UP 480	Sustainable Design Principles	2
Global Context Secondary		
Students must have taken CEE 340 and either CEE 330 or CEE 350 to pursue this Secondary Field.		
Advanced Technical Courses		
Select 1 course from the Global Issues list below:		
ACE 451	Agriculture in Intl Dev	3 or 4
ATMS 421	Earth Systems Modeling	4
CEE 438	Science & Environmental Policy	3
CEE 441	Air Pollution Sources, Transport and Control	4
CEE 447	Atmospheric Chemistry	4
CEE 450	Surface Hydrology	3
ECON 420	International Economics	3 to 4
Select 1 course from the CEE Global Design list below:		
CEE 408	Railroad Transportation Engrg	3
CEE 417	Urban Transportation Planning	4
CEE 437	Water Quality Engineering	3
CEE 449	Environmental Engineering Lab	3
CEE 465	Design of Structural Systems	3
CEE Multidisciplinary Secondary		
Science Electives Recommended: Any recommended science electives from existing CEE Primary and Secondary listed above.		
Civil Engineering Core Courses Recommended: Core courses relevant to the student's interests.		
Advanced Technical Courses: Students must work with CEE Academic Advisors to select courses.		
Atmospheric Science Secondary		
Students must have taken CEE 330 to pursue this Secondary Field.		
Advanced Technical Courses		
Select 2 courses from list below:		
ATMS 302	Atmospheric Dynamics I	3
ATMS 410	Radar Remote Sensing	4
ATMS 411	Satellite Remote Sensing	4
ATMS 421	Earth Systems Modeling	4
CEE 441	Air Pollution Sources, Transport and Control	4
CEE 447	Atmospheric Chemistry	4
Chemical Engineering Secondary		
Students must have taken CEE 330 and CEE 350 to pursue this Secondary Field.		
Advanced Technical Courses		
Select 2 courses from list below:		
CHBE 321	Thermodynamics	4
CHBE 421	Momentum and Heat Transfer	4
CHBE 422	Mass Transfer Operations	4
CHBE 424	Chemical Reaction Engineering	3
Chemistry Secondary		
Students must have taken CEE 330 to pursue this Secondary Field.		
Advanced Technical Courses		
Select at least 2 courses from list below, a minimum of 6 credit hours required.		
CHEM 232	Elementary Organic Chemistry I	3 or 4
CHEM 315	Instrumental Chem Systems Lab	2
CHEM 332	Elementary Organic Chem II	4
CHEM 420	Instrumental Characterization	2
CHEM 440	Physical Chemistry Principles	4
Microbiology Secondary		
Students must have taken CEE 330 to pursue this Secondary Field.		
Advanced Technical Courses		
Select 2 courses from list below:		
CEE 444	Env Eng Principles, Biological	4
MCB 301	Experimental Microbiology	3
MCB 431	Microbial Physiology	3
MCB 450	Introductory Biochemistry	3
Toxicology Secondary		
Students must have taken CEE 330 to pursue this Secondary Field.		
Advanced Technical Courses		
Select 2 courses from list below:		
CHEM 332	Elementary Organic Chem II	4
ENVS 480	Basic Toxicology	3
MCB 450	Introductory Biochemistry	3
The General Civil Engineering Option		**37**
Science Electives - Select 1 course from list below:		
GEOL 107	Physical Geology	4
CHEM 232	Elementary Organic Chemistry I	3 or 4
ME 200	Thermodynamics	3
STAT 420	Methods of Applied Statistics	4
Civil Engineering Core Courses		
Select 7 courses from list below:		
CEE 300	Behavior of Materials	4
CEE 310	Transportation Engineering	3
CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 340	Energy and Global Environment	3
CEE 350	Water Resources Engineering	3
CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3
Advanced Technical Courses		
Select 4 courses from Areas below, following either of these two options: Option I: Pick no more than 1 course from each area below. Option II: Pick 2 courses from 1 area and no more than 1 course from each of the remaining areas.		
Construction		
CEE 420	Construction Productivity	3
CEE 421	Construction Planning	3
CEE 422	Construction Cost Analysis	3
Environmental		
CEE 437	Water Quality Engineering	3
CEE 440	Fate Cleanup Environ Pollutant	4
CEE 441	Air Pollution Sources, Transport and Control	4
Geotechnical		

CEE 483	Soil Mechanics and Behavior	4
CEE 484	Applied Soil Mechanics	3 or 4
Materials		
CEE 401	Concrete Materials	4
Structures		
CEE 460	Steel Structures I	3
CEE 461	Reinforced Concrete I	3
Transportation		
CEE 405	Asphalt Materials I	3
CEE 406	Pavement Design I	3
CEE 407	Airport Design	3
CEE 408	Railroad Transportation Engrg	3
CEE 409	Railroad Track Engineering	3
CEE 410	Railway Signaling & Control	3
CEE 411	RR Project Design & Constr	3
CEE 412	High-Speed Rail Engineering	3
CEE 415	Geometric Design of Roads	4
CEE 416	Traffic Capacity Analysis	3
CEE 417	Urban Transportation Planning	4
CEE 418	Public Transportation Systems	3
Water Resources		
CEE 451	Environmental Fluid Mechanics	3
CEE 453	Urban Hydrology and Hydraulics	4

Free Electives

Code	Title	Hours
Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		**10**
Total Hours of Curriculum to Graduate		**128**

for the degree of Bachelor of Science in Civil Engineering

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. The curriculum sequence can also be viewed via dynamic and static curricular maps *(*https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/cee-map/*), which include prerequisite sequencing.*

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements (p. 2)*. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). CEE 300 or CEE 340 will satisfy a Civil Engineering core course requirement and the Campus General Education Advanced Composition requirement.*

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives *(*https://go.grainger.illinois.edu/FreeElectives/*), so that there are at least 128 credit hours earned toward the degree.*

for the degree of Bachelor of Science in Civil Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Civil Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Classics, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Classics

Students choose from the following concentrations:

- Classical Civilizations (p. 187)
- Classical Languages (p. 189)

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Classics

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Majors choosing the Classical Civilization and Classical Archaeology concentrations are advised, but not required, to satisfy the campus

general education language requirement with one of the classical languages.

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult a member of the department's honors committee at the earliest opportunity.

Students choose from the following concentrations:

Classical Civilizations (p. 187)

Classical Languages (p. 189)

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Classics

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Classics

1. Acquire and retain a detailed knowledge of Greek and Latin grammar, syntax, vocabulary, and modes of expression so as to be able to read literary and subliterary texts composed in Greek and Latin between roughly 800 BCE and 500 CE.
2. Situate knowledge of the languages within the cultural contexts in which they were used in order to understand the crucial role of language in social dynamics and cross-cultural communication.
3. Acquire facility with contemporary methods of literary and historical analysis sufficient to carry out original, self-directed research into cultures that made use of the Greek and Latin languages.
4. Acquire critical awareness of the place of Greek and Latin in western literary history in order to appreciate the powerful role of tradition in interpreting the texts and events of the past.
5. Acquire a detailed knowledge of the culture of Ancient Greek and Roman civilizations, especially the broader historical, social, and cultural contexts and their development.

Classics: Classical Civilizations, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Classics, Classical Civilizations Concentration

Study of the fascinating languages, literatures, and material cultures of ancient Greece and Rome provides a simultaneously broad and deep education in the liberal arts that is crucial for 21st century career paths, whatever your goals in life may be. A Classics major (https://classics.illinois.edu/academics/undergraduate-program/) helps you to think critically, read attentively, argue persuasively, understand compassionately. Classics majors are especially well prepared for careers in teaching, business, law, medicine, government, publishing, and more. Whether you choose a major in our Classical Languages or our Classical Civilizations concentration, come study with us (https://classics.illinois.edu/)! You will encounter unforgettable texts like Homer's Odyssey and Ovid's Metamorphoses, the lyric poetry of Sappho and Catullus, powerful tragedies and delightful comedies, satires and epigrams, histories and oratory; you will learn about mythology and religion, gender and sexuality, everyday life in the ancient Mediterranean, and much more!

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Classics, Classical Civilizations Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

Departmental distinction: Students seeking departmental distinction must have at least a 3.5 average in relevant courses and should consult the Director of Undergraduate Studies at the earliest opportunity.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting coursework: Normally equates to 44 hours. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Communication, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Communication

What is Communication

Communication is fundamental to an enormous variety of human activities. The study of communication fosters a sophisticated understanding of communication in all aspects of public and private life, including the workplace, public policy, health care, cultural norms, personal interactions, and notions of racial, class, gender, and sexual identity.

What You Get as a Communication Major

The study of communication is practical and flexible. Communication majors learn about communication in a variety of contexts and develop practical knowledge that prepares them for personal and professional success. Students develop communication skills that are highly valued by employers, such as the ability to work effectively in teams, critical thinking, and writing and presenting ideas.

Communication majors can choose to complete a general course of communication studies or specialize in one of the six areas of study (https://communication.illinois.edu/academics/undergraduate/areas-study/):

- Communication and Culture (https://communication.illinois.edu/academics/undergraduate/areas-study/communication-and-culture/)
- Communication and Health (https://communication.illinois.edu/academics/undergraduate/areas-study/communication-and-health/)
- Communication and Organizations (https://communication.illinois.edu/academics/undergraduate/areas-study/communication-and-organizations/)
- Interpersonal Communication (https://communication.illinois.edu/academics/undergraduate/areas-study/interpersonal-communication/)
- Mediated Communication & Technology (https://communication.illinois.edu/academics/undergraduate/areas-study/mediated-communication-and-technology/)
- Rhetoric & Public Discourse (https://communication.illinois.edu/academics/undergraduate/areas-study/rhetoric-and-public-discourse/)

Graduates pursue a wide variety of careers (https://communication.illinois.edu/academics/undergraduate/careers-communication/), including advertising, public relations, fund-raising and development, human resources, law, marketing, media, non-profit/advocacy, consulting, sales, and teaching.

Internship Opportunities

The department offers three types of internships to ensure students have opportunities to apply what they learn beyond the usual classroom setting:

- Our career internship (https://communication.illinois.edu/resources/communication-internship-programs/career-internships/) program helps students earn academic credit while gaining professional experience in real-world organizational settings.
- The teaching internship program (https://communication.illinois.edu/resources/communication-internship-program/teaching-internships/) allows students a chance to learn about university-level teaching by assisting in a course they have taken previously.

Research internships allow select students to work with faculty or with advanced doctoral students through the mentoring through research and practice (https://communication.illinois.edu/research/undergraduate-research/) program.

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Communication

Departmental distinction: Superior students are encouraged to consult the departmental honors adviser about requirements and opportunities for participation in the departmental honors program.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: At least 15 hours of the required 37 hours in Communication must be at the 300 level or above. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6

Liberal Arts & Sciences Admissions & Requirements (p. 2288)

Community Health, BS

for the Bachelor of Science in Community Health

Students pursuing this major select one of three concentrations:

- Health Education (p. 197)
- Health Planning & Administration (p. 202)
- Rehabilitation & Disability Studies (p. 206)

The Community Health Program at Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education (p. 197), Health Planning & Administration (p. 202), and Rehabilitation & Disability Studies (p. 206). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Health and Kinesiology, University of Illinois Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. Additional information regarding the joint degree program can be found here (https://ahs.illinois.edu/bs-mph/).

for the Bachelor of Science in Community Health

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/undergraduate/ahs/community-health-bs/health-education-promotion/:%20/general-information/degree-general-education-requirements/*).*

for the Bachelor of Science in Community Health

1. **Content Knowledge**: Students will know and comprehend the significant theories, models, themes, and ideas in the biomechanical, physiological, behavioral, pedagogical, biological, socioeconomic, environmental, and sociocultural correlates of Kinesiology and Community Health.
2. **Critical Thinking and Discovery**: Students will comprehend and demonstrate ethical practices and the application of scientific findings and/or critical analysis in order to interpret, promote inquiry, propose solutions, and/or create new ideas related to health, rehabilitation, and/or human movement.
3. **Awareness and Understanding**: Students will understand and appreciate the diverse socioeconomic, behavioral, sociocultural, biological, environmental, philosophical, and historical factors that influence health, rehabilitation, and human movement.
4. **Programming and Assessment**: Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases.
5. **Leadership and Engagement**: Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

Community Health: Health Education, BS

for the Bachelor of Science in Community Health, Health Education Concentration

The Community Health Program at Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education (p. 197), Health Planning & Administration (p. 202), and Rehabilitation & Disability Studies (p. 206). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Department of Health and Kinesiology, Academic Affairs Office (https://ahs.illinois.edu/community-health/).

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. Please visit our website (https://ahs.illinois.edu/

bs-mph/) to see additional information regarding the joint degree program.

for the Bachelor of Science Major in Community Health, Health Education Concentration

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

A total of 128 hours is required for a degree in Community Health with all the above requirements met. There will be range of electives a student will be able to take depending on the general education number of hours.

Supporting Electives

Community Health Supporting Electives

Guidelines for Choosing Supporting Electives:

- 18 credit hours (about 6 separate classes) are required in Supporting Electives for the major;
- 9 credit hours or more of Supporting Electives should be completed within the Department of Kinesiology and Community Health: CHLH, IHTL, KIN, or REHB courses;
- If you are taking a course as part of your primary concentration, it will not also count as a Supporting Elective;
- Your academic advisor will work with you to help determine what coursework is appropriate to count as your Supporting Electives and/or you may select from this approved list of courses.

Supporting Electives

Community Health Supporting Electives

Guidelines for Choosing Supporting Electives:

- 18 credit hours (about 6 separate classes) are required in Supporting Electives for the major;
- 9 credit hours or more of Supporting Electives should be completed within the Department of Kinesiology and Community Health: CHLH, IHTL, KIN, or REHB courses;
- If you are taking a course as part of your primary concentration, it will not also count as a Supporting Elective;
- Your academic advisor will work with you to help determine what coursework is appropriate to count as your Supporting Electives and/or you may select from this approved list of courses.

Community Health: Rehabilitation & Disability Studies, BS

for the Bachelor of Science in Community Health, Rehabilitation & Disability Studies Concentration

The Community Health Program at Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education (p. 197), Health Planning & Administration (p. 202), and Rehabilitation & Disability Studies (p. 206). All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Health & Kinesiology, University of Illinois Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. Additional information regarding the joint degree program can be found on the College of Applied Health Sciences website (https://ahs.illinois.edu/bs-mph/).

for the Bachelor of Science in Community Health, Rehabilitation & Disability Studies Concentration

The Community Health Program requires certain courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

A total of 128 hours is required for a degree in Community Health with all the above requirements met. There will be range of electives a student will be able to take depending on the general education number of hours.

Comparative & World Literature, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Comparative & World Literature

Students must select one of the following in consultation with an advisor:

- Major in Comparative & World Literature, Comparative Literature Concentration (p. 212)
- Major in Comparative & World Literature, World Literature Concentration (p. 214)

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Comparative & World Literature

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Comparative & World Literature: Comparative Literature, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Comparative & World Literature, Comparative Literature Concentration

The Major in Comparative & World Literature, Comparative Literature Concentration provides an engagement with two or more literary and cultural traditions, studied in historical depth, in their original languages (6 hours of advanced foreign language required).

Study abroad and work across cultures and disciplines is strongly encouraged. The distribution of course work allows for considerable flexibility. The concentration in Comparative Literature can be easily combined with a major or minor in any national literature, classics, global studies, area studies, ethnic studies, gender and women's studies, or majors and minors in anthropology, art history, cinema and media studies, history, music, philosophy, world religion, the visual arts, or with a certificate in translation studies.

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Comparative & World Literature, Comparative Literature Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

Departmental distinction: To be eligible for distinction, a student must have at least a 3.25 cumulative grade-point average and a 3.75 grade-point average in departmental courses, complete a senior thesis (CWL 493), and receive the approval of the departmental honors committee. The departmental honors committee will determine the level of distinction to be awarded.

Comparative Literature Concentration Requirements

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 39 hours with at least 18 hours of Comparative Literature courses. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree.

Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

CWL 471	International Lit Relations	
CWL 496	Special Topics in Comp Lit II	
Major Literature Coursework- Three courses in a major literature, taught in the orignial language, at 200-400-level. No more than 2 courses at the 200-level. [1]		**9**
Focus Area Coursework - At least two courses from one of the following focus areas, at 200-400 level. No more than 1 course at the 200-level:		**6**
Minor Literature: courses in a second national literature, taught in the original language. [2]		
Interdisciplinary: courses in another discipline, such as philosophy, cinema, art history, fine arts, music, religion, science, medical humanities, law, creative writing		
Cultural Studies: courses with a focus on race, gender, class, postcolonialism, environmental studies, or the like		
Area Studies: courses in a geographical area related to major literature (Africa, Middle East, Latin America, South Asia, East Asia, Eastern Europe, the European Union).		
Minimum Required Hours:		**39**

1 *Literature in the Original Language is defined by what is currently offered by the University (i.e. English, French, German, Italian, Spanish, etc.). Literatures generally taught in translation (including, but not limited to, Arabic, Chinese, Hebrew, Japanese, Persian, Polish, Russian, and Yiddish) may be chosen in consultation with the Director of Undergraduate Studies.*

2 *If one of the literatures studied is English, a student who continues in a graduate program in comparative literature will be required to acquire a reading knowledge of a second foreign language (i.e., one foreign language for the B.A., two foreign languages for the M.A., three foreign languages for the Ph.D.).*

2. **Intellectual Reasoning and Knowledge:** CWL students will appreciate the aesthetic qualities of literary texts and develop an awareness of influential critical and interpretive methods.

   a. *Measurable by:* analysis of student work samples; degree progress and course completion; focus groups; course syllabus comparison.
3. **Intellectual Reasoning and Knowledge:** CWL students will demonstrate a general understanding of the conventions of literary genres and of the major developments in literary history.
   a. *Measurable by:* analysis of student work samples; degree progress and course completion; focus groups; course syllabus comparison.
4. **Creative Inquiry and Discovery:** Students will demonstrate ability to express oneself orally and in writing in a clear, coherent and persuasive manner, and to construct an interpretive argument.
   a. *Measurable by:* analysis of student work samples; focus groups.
5. **For Comparative Literature concentration only:** Students will demonstrate mastery of at least two languages.
   a. *Measurable by:* participation in 200-400 level courses in the original language; degree progress and course completion.

Computer Engineering, BS

for the degree of Bachelor of Science in Computer Engineering

Computer Engineering is a blooming discipline focused on the development of vital computing technologies that range from chips to computers to networks to programming tools and key algorithms. Fundamentally, Computer Engineering addresses the problem of building scalable, trustworthy computing systems and applications, and the faculty's interests span a broad spectrum of issues pertinent to this theme. Computer engineering has taken the lead in revolutionizing many science and engineering disciplines with parallel computing, from chips to clouds to planet-scale critical infrastructures, and has defined new standards of security, privacy, and dependability for systems ranging from small circuits to the electric power grids of many nations. Students need a broad and sound set of mathematical and computing skills and are well-served by a flexible curriculum that enables them to pursue topics of interest among the many subdisciplines in computing.

The computer engineering core curriculum focuses on fundamental computer engineering knowledge: circuits, systems, electromagnetics, computer systems, electronics for information processing and communication, and computer science. The rich set of ECE elective courses permits students to concentrate in any sub-discipline of computer engineering including hardware systems; cyberphysical systems; foundations and theory; software and languages; algorithms and mathematical tools; trust, reliability, security; networking, mobile and distributed computing; big data analytics and systems; AI, machine learning, robotics, cybernetics.

Current Program Educational Objectives

for the degree of Bachelor of Science in Computer Engineering

Graduation Requirements

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0

TGPA is required for ECE courses (except ECE 316). See **Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/)** to clarify requirements.

Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education requirements including the campus general education language requirement. ECE 445 or combination of ECE 496 & ECE 499 satisfies a design elective and the Campus General Education Advanced Composition requirement.

Orientation and Professional Development

Code	Title	Hours
ENG 100	Grainger Engineering Orientation Seminar (External transfer students take ENG 300 instead.)	1
Total Hours		**1**

Foundational Mathematics and Science

Code	Title	Hours
MATH 221	Calculus I (MATH 220 may be substituted. MATH 220 is appropriate for students with no background in calculus. 4 of 5 credit hours count towards degree.)	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 257	Linear Algebra with Computational Applications	3
or MATH 416	Abstract Linear Algebra	
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
PHYS 214	Univ Physics: Quantum Physics	2
Total Hours		**29**

Computer Engineering Technical Core

Code	Title	Hours
ECE 110	Introduction to Electronics	3
ECE 120	Introduction to Computing	4
ECE 210	Analog Signal Processing	4
ECE 220	Computer Systems & Programming	4
CS 173	Discrete Structures (MATH 213 may be substituted.)	3
CS 225	Data Structures	4
ECE 313	Probability with Engrg Applic (STAT 410 may be substituted.)	3
ECE 374	Introduction to Algorithms & Models of Computation	4
ECE 385	Digital Systems Laboratory	3
ECE 391	Computer Systems Engineering	4
Total Hours		**36**

Technical Electives

Code	Title	Hours
From the Departmentally Approved List of Technical Electives (below) to include: at least 1 Electrical Engineering Foundations course, at least 3 Advanced Computing Electives, at least 1 Design Elective.		**30**
AE 202	Aerospace Flight Mechanics	3
AE 302	Aerospace Flight Mechanics II	3
AE 311	Incompressible Flow	3
AE 312	Compressible Flow	3
AE 321	Mechs of Aerospace Structures	3
AE 352	Aerospace Dynamical Systems	3
AE 353	Aerospace Control Systems	3
AE 402	Orbital Mechanics	3 or 4
AE 403	Spacecraft Attitude Control	3 or 4
AE 410	Computational Aerodynamics	3 or 4
AE 412	Viscous Flow & Heat Transfer	4
AE 416	Applied Aerodynamics	3 or 4
AE 419	Aircraft Flight Mechanics	3 or 4

AE 420	Finite Element Analysis	3 or 4
AE 428	Mechanics of Composites	3
AE 433	Aerospace Propulsion	3 or 4
AE 434	Rocket Propulsion	3 or 4
AE 435	Electric Space Propulsion	3 or 4
AE 451	Aeroelasticity	3 or 4
AE 460	Aerodynamics & Propulsion Lab	2
Agri. Bio Eng. (ABE): all 300 and 400 level courses except 440. Exceptions for seminars and special topics will be reviewed in Advising Office.		
ASTR 210	Introduction to Astrophysics	3
ASTR 310	Computing in Astronomy	3
ASTR 330	Extraterrestrial Life	3
ASTR 350	The Big Bang, Black Holes, and the End of the Universe	3
ASTR 404	Stellar Astrophysics	3
ASTR 405	Planetary Systems	3
ASTR 406	Galaxies and the Universe	3
ASTR 414	Astronomical Techniques	4
ATMS 201	General Physical Meteorology	3
ATMS 301	Atmospheric Thermodynamics	3
ATMS 302	Atmospheric Dynamics I	3
ATMS 303	Synoptic-Dynamic Wea Analysis	4
ATMS 304	Radiative Transfer-Remote Sens	3
ATMS 305	Computing and Data Analysis	3
ATMS 404	Risk Analysis in Earth Science	3 or 4
ATMS 405	Boundary Layer Processes	4
ATMS 406	Tropical Meteorology	4
ATMS 410	Radar Remote Sensing	4
ATMS 411	Satellite Remote Sensing	4
ATMS 420	Atmospheric Chemistry	4
ATMS 421	Earth Systems Modeling	4
ATMS 447	Climate Change Assessment	3
ATMS 449	Biogeochemical Cycles	4
BIOC 406	Gene Expression & Regulation	3
BIOC 446	Physical Biochemistry	3
BIOC 455	Technqs Biochem & Biotech	4
BIOE 201	Conservation Principles Bioeng	3
BIOE 202	Cell & Tissue Engineering Lab	2
BIOE 302	Modeling Human Physiology	3
BIOE 414	Biomedical Instrumentation	3
BIOE 415	Biomedical Instrumentation Lab	2
BIOE 461	Cellular Biomechanics	4
BIOE 467	Biophotonics	3
BIOE 476	Tissue Engineering	3
BIOE 480	Magnetic Resonance Imaging	3 or 4
BIOE 485	Computational Mathematics for Machine Learning and Imaging	4
Biophysics (BIOP): All 400 level courses except seminars and special topics, which may be reviewed in the Advising Office		
CHBE 221	Principles of CHE	3
CHBE 321	Thermodynamics	4
CHBE 421	Momentum and Heat Transfer	4
CHBE 422	Mass Transfer Operations	4
CHBE 424	Chemical Reaction Engineering	3
CHBE 430	Unit Operations Laboratory	4
CHBE 431	Process Design	4
CHBE 440	Process Control and Dynamics	3
CHBE 451	Transport Phenomena	3
CHBE 452		
CHBE 453	Electrochemical Engineering	2 or 3
CHBE 456		
CHBE 471	Biochemical Engineering	3 or 4
CHBE 472	Techniques in Biomolecular Eng	3 or 4
CHBE 473	Biomolecular Engineering	3 or 4
CHBE 474	Metabolic Engineering	3 or 4
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
Chemistry (CHEM): All 200, 300 and 400 level courses except 397, 497, 499, and seminars and special topics, which may be reviewed in the Advising Office		
CEE 310	Transportation Engineering	3
CEE 330	Environmental Engineering	3
CEE 408	Railroad Transportation Engrg	3 or 4
CEE 410	Railway Signaling & Control	3 or 4
CEE 416	Traffic Capacity Analysis	3 or 4
CEE 430		
CEE 447	Atmospheric Chemistry	4
CEE 491	Decision and Risk Analysis	3 or 4
CPSC 265	Genetic Engineering Lab	3
CS 101	Intro Computing: Engrg & Sci (By Approval)	3

Free Electives

Code	Title	Hours
Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		16
Total Hours of Curriculum to Graduate		**128**

for the degree of Bachelor of Science in Computer Engineering

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. The

curriculum sequence can also be viewed via dynamic and static curricular maps *(*https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/ce-map/*), which include prerequisite sequencing.*

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*). ECE 445 or combination of ECE 496 & ECE 499 satisfies a technical core requirement and the Campus General Education Advanced Composition requirement. If ECE 411 is selected as the design course, a separate Advanced Composition course also needs to be selected.*

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives *(*https://go.grainger.illinois.edu/FreeElectives/*), so that there are at least 128 credit hours earned toward the degree.*

for the degree of Bachelor of Science Major in Computer Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Computer Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Electrical & Computer Engineering Faculty (https://ece.illinois.edu/about/directory/faculty/)

The Grainger College of Engineering Admissions (https://grainger.illinois.edu/admissions/)

The Grainger College of Engineering

Computer Science, BS

for the degree of Bachelor of Science in Computer Science

The Computer Science curriculum provides both a broad and deep knowledge of the theory, design, and application of computer systems, with an emphasis on software systems. Because computing is ubiquitous, application areas involve virtually any field imaginable - from developing gene sequencing algorithms via techniques in computational biology, to designing user interfaces for mobile applications; from designing methods for high frequency trading, to creating computer generated graphics and special effects in the gaming industry; and from creating embedded real time systems to be deployed in medical devices, to analyzing social data from internet communication patterns. During the first two years the curriculum provides a strong foundation in mathematics, science, and computation. Advanced coursework both in more technical core areas and in areas of the student's choosing follows in the second two years. Graduates regularly go on to graduate study or leading positions in industry.

Both a combined B.S.-M.S. degree program and a B.S-M.C.S. degree program are available. The admission and course requirements are described on the Siebel School of Computing and Data Science website (https://siebelschool.illinois.edu/).

Current Program Educational Objectives (https://cs.illinois.edu/about/accreditation/)

for the degree of Bachelor of Science in Computer Science

Graduation Requirements

Minimum hours required for graduation: 128 hours.

M (https://go.grainger.illinois.edu/TechnicalGPA/)inimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0

TGPA is required for CS and Math courses. See **Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/)** to clarify requirements.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
fulfilled by PHYS 211 and PHYS 212		
Social & Behavioral Sciences (6 hours)		6

Cultural Studies: Non-Western Cultures (1 course)	3
Cultural Studies: US Minority Cultures (1 course)	3
Cultural Studies: Western/Comparative Cultures (1 course)	3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)	6-10
fulfilled by MATH 220 or MATH 221; and MATH 231, MATH 241, PHYS 211, PHYS 212, CS 124, CS 128, CS 225	
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)	0-15

Orientation and Professional Development

Code	Title	Hours
ENG 100	Grainger Engineering Orientation Seminar (External transfer students take ENG 300.)	1
Highly recommended, optional 1 credit hour course, CS 100 Computer Science Orientation. Credit hour counts toward free electives.		
CS 210	Ethical & Professional Issues	2 or 3
or CS 211	Ethical and Professional Conduct	
Total Hours		**3-4**

Foundational Mathematics and Science

Code	Title	Hours
MATH 221	Calculus I (MATH 220 may be substituted. MATH 220 is appropriate for students with no background in calculus. 4 of 5 credit hours count towards degree.)	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 257	Linear Algebra with Computational Applications	3
or MATH 415	Applied Linear Algebra	
or MATH 416	Abstract Linear Algebra	
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
One Science elective course:		**3**
Students must take one course from the Natural Science & Technology (NST) list, in addition to those taken as part of the General Education requirements. The course must be a course that is allowed for credit by the Grainger College of Engineering.		
Exceptions to the list are: ASTR 100, PHYS 101 and PHYS 102, and CHEM 101.		
Students who select either ASTR 121, ASTR 122, or ASTR 150 to satisfy the Science Elective requirement will not receive credit for any other 100-level ASTR course as a free elective (maximum of 4 credit hours of ASTR 100-level can count towards graduation requirements for all Grainger College of Engineering Undergraduates).		
Total Hours		**25**

Computer Science Technical Core

Code	Title	Hours
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3
CS 173	Discrete Structures	3
CS 222	Software Design Lab	1
CS 225	Data Structures	4
CS 233	Computer Architecture	4
CS 341	System Programming	4
CS 357	Numerical Methods I	3
CS 361	Probability & Statistics for Computer Science	3
CS 374	Introduction to Algorithms & Models of Computation	4
CS 421	Programming Languages & Compilers	3
Total Hours		**35**

Technical Electives

Code	Title	Hours
Students must take a minimum of (6) six additional technical electives with at least eighteen (18) cumulative credit hours and chosen from CS 397 and the CS 400-level courses, not including CS 400, CS 401, CS 402, CS 403 or CS 491. CS 500-level courses may be used as technical electives, but only with special permission from the CS Academic Office. CS 397 and CS 499 may be used with a cumulative maximum of six (6) credits from them counting as technical electives. One "CS-like" course in another department (e.g., ECE) may also be counted as a CS 400-level course with permission of the CS Academic Office. Non-CS tech electives will not be considered in focus areas.		**18**
At least one (1) of the CS courses used for technical electives must be chosen from the list below of CS courses satisfying the team project requirement.		
Team Project Course List:		
CS 411	Database Systems	3 or 4
CS 415	Game Development	3 or 4
CS 417	Virtual Reality	3
CS 425	Distributed Systems (4 hour section only)	4
CS 427	Software Engineering I	3 or 4
CS 428	Software Engineering II	3 or 4
CS 429	Software Engineering II, ACP	3
CS 437	Topics in Internet of Things	3
CS 465	User Interface Design	4
CS 467	Social Visualization	3 or 4
CS 493	Senior Project II, ACP	3
CS 494	Senior Project II	3
CS 497	CS Team Project	1 to 3
At least three (3) of the CS courses used for technical electives must be chosen from a single focus area, from among the list of focus areas listed below. The team project course may be used as one of them.		
CS 498 Special Topics and CS 598 Special Topics classes may be included in a focus area by department approval.		
Software Foundations:		
CS 407	Cryptography	3 or 4
CS 409	The Art of Web Programming	3
CS 422	Programming Language Design	3 or 4
CS 426	Compiler Construction	3 or 4
CS 427	Software Engineering I	3 or 4
CS 428	Software Engineering II	3 or 4

CS 429	Software Engineering II, ACP	3
CS 474	Logic in Computer Science	3 or 4
CS 476	Program Verification	3 or 4
CS 477	Formal Software Development Methods	3 or 4
CS 492	Senior Project I	3
CS 493	Senior Project II, ACP	3
CS 494	Senior Project II	3
CS 521	Advanced Topics in Programming Systems	4
CS 522	Programming Language Semantics	4
CS 524	Concurrent Progrmg Languages	4
CS 526	Advanced Compiler Construction	4
CS 527	Topics in Software Engineering	4
CS 576	Topics in Automated Deduction	2 to 4
Algorithms and Models of Computation:		
CS 407	Cryptography	3 or 4
CS 413	Intro to Combinatorics	3 or 4
CS 473	Algorithms	4
CS 474	Logic in Computer Science	3 or 4
CS 475	Formal Models of Computation	3 or 4
CS 476	Program Verification	3 or 4
CS 477	Formal Software Development Methods	3 or 4
CS 481	Advanced Topics in Stochastic Processes & Applications	3 or 4
CS 482	Simulation	3 or 4
CS 539	Distributed Algorithms	4
CS 571	Combinatorial Mathematics	4
CS 572	Extremal Graph Theory	4
CS 574	Randomized Algorithms	4

Advanced Electives

Code	Title	Hours
Students must take for a letter grade a minimum of two (2) advanced elective courses comprising at least six (6) credit hours. These advanced elective courses must be distinct from courses used to satisfy the technical electives. They may be chosen from CS 397 Individual Study and the 400-level coursework offered for letter grade in ANY area offered at the University of Illinois Urbana-Champaign. It is expected that students will select these additional advanced courses in a way that best augments their program of study. Consultation with a faculty mentors is highly encouraged. A maximum of six (6) credit hours of CS 397 may be used in the combination of technical electives and advanced electives.		6
Total Hours		**6**

Free Electives

Code	Title	Hours
Additional course work,subject to the Grainger College of Engineering restrictions to Free Electives,so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		**24-25**

Total Hours 128

for the degree of Bachelor of Science Major in Computer Science

By the time of graduation, students will have the ability to:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.

3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Computer Science + Advertising, BS

for the degree of Bachelor of Science in Computer Science + Advertising

COMPUTER SCIENCE + ADVERTISING is sponsored jointly by the Siebel School of Computing and Data Science and the Charles H. Sandage Department of Advertising. This is a program for students who have an interest in careers in the advertising field with a technology focus. Cloud computing, the availability and ubiquity of data, and the rapid and pervasive adoption of mobile technology have created a paradigm shift in the advertising industry. Projected areas of growth in advertising and communications are in Search Engine Optimization, web analytics, computational advertising, and other emerging areas of technology and media.

The degree will prepare students for advanced study at the graduate level as well as immediate entry into the workforce at advertising agencies, businesses with in-house advertising and marketing divisions, and technology companies.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
fulfilled by ECON 102, and ANTH 103 or PSYC 100 or SOC 100		
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fulfilled by CS 124; and CS 128; and CS 225; and MATH 220 or MATH 221; and MATH 231		
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)		0-15

Major Requirements

Code	Title	Hours
Computer Science Core		
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3

ADV 461	Computational Advertising	3
ADV 492	Tech and Advertising Campaigns	3
Advertising Electives:	Any ADV courses not already required for the major.	6
Total Hours		**124**

for the degree of Bachelor of Science in Computer Science + Advertising

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Electives are additional courses to help students achieve 124 hours required for the degree. These can often be any level, but students should check with their advisor for specific guidance.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements.

for the degree of Bachelor of Science in Computer Science + Advertising

1. Evaluate the historical, ethical, economic, legal, and social aspects of modern advertising.
2. Conduct research, visualize data, and apply inference and machine learning methods to extract knowledge.
3. Critically evaluate and select audiences for effective and ethical advertising delivery.
4. Create strategic and evidence-driven brand communications.
5. Develop and implement efficient algorithms to solve problems.
6. Develop, analyze, and test software in the advertising context.
7. Collaborate with diverse teams to develop strategic recommendations for clients.

Computer Science + Anthropology, BSLAS

for the degree of Bachelor of Sciences in Liberal Arts & Sciences Major in Computer Science + Anthropology

How does culture shape technology and technology shape culture? Does technology bridge inequalities or make them even wider? Anthropologists use computational tools and algorithms to analyze substantial amounts of data, gathered from a field site or by studying online social communities and social networks, to consider these questions.

With a Bachelor of Science in CS + Anthropology, which combines expertise from the Siebel School of Computing and Data Science and the College of Liberal Arts & Sciences, students will gain the knowledge necessary to use computer, social, and behavioral sciences within larger cultural questions of globalization, community, security, the ethics of privacy, social transformation, and social justice.

for the degree of Bachelor of Sciences in Liberal Arts & Sciences Major in Computer Science + Anthropology

Please see the computer science advisor as well as the anthropology advisor.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours). Please see the computer science advisor as well as the anthropology advisor.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 66 hours. Twelve hours of 300- and 400-level Anthropology courses must be taken on this campus.

Minimum hours required for graduation: 120 hours

Code	Title	Hours
Required Computer Science Coursework		
CS 100	Computer Science Orientation (recommended; CS 100 is an orientation course aimed at first-year students, so students who declare the major after the first year are not required to complete it.)	1
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3
CS 173	Discrete Structures	3
CS 225	Data Structures	4

CS 222	Software Design Lab	1
Choose one of the following combinations		8-11
CS 233 & CS 341	Computer Architecture and System Programming

Computer Science + Astronomy, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Computer Science + Astronomy

The LAS major in **Computer Science + Astronomy** is a flexible program for students who wish to combine a solid grounding in computer science (https://siebelschool.illinois.edu) with technical knowledge of astronomy (https://astro.illinois.edu/). This blended curriculum helps develop a unique approach to problem solving and offers novel perspectives in interdisciplinary work, such as data visualization, data mining, astrophysical simulations, and image processing.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

The Astronomy Department undergraduate program also includes majors in Astronomy (http://catalog.illinois.edu/undergraduate/las/astronomy-bslas/), Astrophysics (http://catalog.illinois.edu/undergraduate/las/astrophysics-bslas/), and Astronomy + Data Science (http://catalog.illinois.edu/undergraduate/las/astronomy-data-science-bslas/), as well as a minor in Astronomy (http://catalog.illinois.edu/undergraduate/las/minors/astronomy/).

Astronomy Major

The LAS major in Astronomy (http://catalog.illinois.edu/undergraduate/las/astronomy-bslas/) is a flexible program for students who are fascinated by the cosmos and plan to pursue technical or professional careers in areas requiring a solid grounding in physical science and mathematics. It is based upon both a broad and an in-depth exploration

into astronomy and allied disciplines, and is flexible enough to be paired with many other majors or minors.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astrophysics Major

Astrophysics (http://catalog.illinois.edu/undergraduate/las/astrophysics-bslas/), the study of how the universe works by applying the methods and principles of physics, is the cornerstone of modern astronomy. Students majoring in Astrophysics must complete advanced coursework in both astronomy and physics, allowing them to demonstrate the rigorous preparation necessary for graduate study in astronomy/astrophysics, physics, and planetary and space sciences.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astronomy + Data Science Major

The Astronomy + Data Science (http://catalog.illinois.edu/undergraduate/las/astronomy-data-science-bslas/) major incorporates simultaneously a strong foundation in Data Science and Astronomy to develop an appreciation and understanding of how big data is transforming science. Graduates of the Astronomy + Data Science program will have gained experience working with modern large data sets using current computational and statistical methods, with a strong grounding in data curation and ethics.
STEM designated*; BSLAS Degree (Bachelor of Science in Liberal Arts & Sciences)

Astronomy Minor

The minor in astronomy (http://catalog.illinois.edu/undergraduate/las/minors/astronomy/) is designed to broaden the student's knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as the aerospace industry, science writing, scientific journalism, or science teaching in schools.

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Computer Science + Astronomy

---

Undergraduate Computer Science & Astronomy majors will graduate with a demonstrated ability to:

1. LO1. Understand the hierarchical architecture of the cosmos, increasing in scale from the Solar System to the Galaxy to the Universe, and decreasing in scale to atoms and their nuclei. Understand the interplay among these scales.
2. LO2. Define and use fundamental principles and techniques of astronomy and astrophysics.
   a. Identify which principles should be applied to a specified situation
   b. Show familiarity with astronomical observables and their physical origin.
   c. Understand and apply basic physics and computational techniques to solve problems in astrophysics, and interpret the results.
3. LO3. Analyze astronomical data, and quantitative data generally.
   a. Demonstrate the ability to link observation and theory.
   b. Demonstrate the ability to draw qualitative conclusions from quantitative information, and vice versa.
   c. Demonstrate the ability to plan observational programs, use astronomical telescopes and instrumentation, and to analyze and present astronomical data.
4. LO4. Plan and perform guided research, or attain an advanced-level understanding of a topic of contemporary interest in astronomy and astrophysics.
5. LO5. Demonstrate the ability to communicate effectively both verbally and in writing.

Computer Science + Bioengineering, BS

for the degree of Bachelor of Science in Computer Science + Bioengineering

Students in the Computer Science + Bioengineering (CS+BioE) Bachelor of Science degree program will develop an integrative understanding of computational and bioengineering principles in order to analyze biomedical data, construct models of biological systems, and design and implement advanced diagnostic and therapeutic techniques to improve human health. As a joint offering through the Departments of Bioengineering and Computer Science, CS+BioE students will receive a rigorous engineering education that prepares graduates to:

- recognition as skilled engineers in biotechnology, life sciences, medical technology, and health care industries;
- advanced degrees through graduate studies in computer science and bioengineering-related fields, or professional degrees in the health sciences, law, and business; and
- recognition for fostering an inclusive and collaborative environment while demonstrating leadership and effective teamwork within diverse professional and community organizations.

In the first and second years, the curriculum provides students with thorough foundations in scientific computing practices as well as introductory bioengineering concepts. In the third and fourth years, technical and free electives facilitate the study of diverse modern applications of computing in medicine and the life sciences so that students are prepared to address emerging problems throughout their careers.

for the degree of Bachelor of Science in Computer Science + Bioengineering

Graduation Requirements
Minimum hours required for graduation: 128 hours.
Minimum Overall GPA: 2.0
Minimum Technical GPA: 2.0
TGPA is required for CS, BIOE, and Math courses. See Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/) to clarify requirements.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
fulfilled by CHEM 102 or MCB 150; and PHYS 211, PHYS 212		
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fulfilled by MATH 220 or MATH 221; and MATH 231, MATH 241, MATH 285, PHYS 211, PHYS 212; and CS 124; and CS 128 and CS 225		
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)		0-15

Major Requirements:
Orientation and Professional Development

Code	Title	Hours
ENG 100	Grainger Engineering Orientation Seminar (External transfer students take ENG 300.)	1
BIOE 100	Bioengineering Seminar	1
BIOE 120	Introduction to Bioengineering	1
Highly recommended, optional 1 credit hour course, CS 100 Freshman Orientation. Credit hour counts toward free electives.		
Total Hours		**3**

Foundational Mathematics and Science

Code	Title	Hours
MATH 221	Calculus I (MATH 220 may be substituted. MATH 220 is appropriate for students with no background in calculus. 4 of 5 credit hours count towards degree.)	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 257	Linear Algebra with Computational Applications	3
or BIOE 210	Linear Algebra for Biomedical Data Science	
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
Choose one of the following:		4
CHEM 102 & CHEM 103	General Chemistry I and General Chemistry Lab I	
OR		
MCB 150	Molecular & Cellular Basis of Life	
BIOE 310	Computational Tools for Biological Data	3
Total Hours		**32**

Computer Science Core

Code	Title	Hours
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3
CS 173	Discrete Structures	3
CS 222	Software Design Lab	1
CS 225	Data Structures	4
Choose one of the following options:		8-9

CS 233 & CS 341	Computer Architecture and System Programming	
OR		
CS 340	Introduction to Computer Systems	
& Two CS 400-level courses	Any two (2) 400-level CS courses above CS 403, excluding CS 491 and distinct from any 400-level courses taken to satisfy other requirements. If either or both of the courses are chosen for 4 credits, the extra credit hours will count towards free electives.	
CS 374	Introduction to Algorithms & Models of Computation	4
CS 357	Numerical Methods I	3
or CS 421	Programming Languages & Compilers	
CS Technical Elective	Any 400-level CS course above CS 403, excluding CS 491 and distinct from any 400-level courses taken to satisfy other requirements.	3
Total Hours		**32-33**

Bioengineering Core

Code	Title	Hours
BIOE 205	Signals & Systems in Bioengrg	3
BIOE 206	Cellular Bioengineering	3
or BIOE 302	Modeling Human Physiology	
BIOE 404	CS+BIOE Senior Design	4
Total Hours		**10**

Bioengineering Technical Electives

Code	Title	Hours
Select 15 hours of technical elective credit from the below list:		**15**
BIOE 303	Quantitative Physiology Lab	2
BIOE 360	Transport & Flow in Bioengrg	3
BIOE 414	Biomedical Instrumentation	3
BIOE 415	Biomedical Instrumentation Lab	2
BIOE 430	Intro Synthetic Biology	3 or 4
BIOE 461	Cellular Biomechanics	4
BIOE 467	Biophotonics	3
BIOE 476	Tissue Engineering	3
BIOE 479	Cancer Nanotechnology	3
BIOE 483	Biomedical Computed Imaging Systems	3 or 4
BIOE 484	Statistical Analysis of Biomedical Images	3 or 4
BIOE 485	Computational Mathematics for Machine Learning and Imaging	4
BIOE 486	Applied Deep Learning for Biomedical Imaging	3 or 4
BIOE 487	Stem Cell Bioengineering	3 or 4
BIOE 488	Applied High-Performance Computing for Imaging Science	3
BIOE 489	Regulations, Ethics and Logistics in Biomedical Applications of Machine Learning	3 or 4
BIOE 498	Special Topics (courses as approved by the department)	1 to 4

Upper Division Technical Electives

Code	Title	Hours
Students should select 6 hours of 300-400 level general technical elective coursework from the following rubrics: AE, ABE, BIOE, CHBE, CHEM, CS, CEE, ECE, IE, MCB, MATH, ME, NE, NEUR, NPRE, PHYS, SE, STAT, and TAM.		6
Total Hours		**6**

Free Electives

Code	Title	Hours
Additional coursework, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		13-14
Total Minimum Hours of Curriculum to Graduate		**128**

for the degree of Bachelor of Science in Computer Science + Bioengineering

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree.

First Year

First Semester	Hours	Second Semester	Hours
ENG 100	1	MATH 231	3

for the degree of Bachelor of Science in Computer Science + Bioengineering

---

The Computer Science + Bioengineering Program prepares graduates to achieve the following seven outcomes by the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of computational bioengineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. An ability to develop and conduct appropriate experimentation, analysis and interpretation of data, and to use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Computer Science + Chemistry, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences in Computer Science + Chemistry

---

This is an interdisciplinary program that provides a strong foundation in computer science to equip majors to apply computing technology, including high-performance computing, artificial intelligence and machine learning, to the study of chemical and biochemical systems and the design of new molecules and materials. This program prepares majors for a variety of careers that may involve computer modeling and simulation of chemical and biochemical processes; statistical analyses of large datasets; and data visualizations of reaction pathways, molecular interactions, living chemical reactions, or other phenomena.

Other Undergraduate Degree Programs in Chemistry

For the Degree of Bachelor of Science in Liberal Arts and Sciences

- Major in Chemistry (Sciences and Letters) (p. 174)

For the Degree of Bachelor of Science in Chemistry

- Major in Chemistry (Specialized Curriculum) (p. 168)
- Major in Chemistry (Specialized Curriculum), Environmental Chemistry Concentration (p. 170)

for the degree of Bachelor of Science in Liberal Arts and Sciences in Computer Science + Chemistry

---

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours).

Please visit the computer science advisor as well as the Chemical Sciences advising office.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 66 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
	fulfilled by CHEM 102 and CHEM 104 or CHEM 202 and CHEM 204	
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
	fulfilled by CS 124, CS 128, CS 225, MATH 220 or MATH 221, MATH 231	
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)		0-20

Major Requirements

Code	Title	Hours
Required Computer Science Coursework		
CS 100	Computer Science Orientation (recommended; CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.)	1
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3
CS 173	Discrete Structures	3
CS 225	Data Structures	4

CS 222	Software Design Lab	1
Choose one of the following combinations		8-11
CS 233 & CS 341	Computer Architecture and System Programming	
OR		
CS 340	Introduction to Computer Systems	
& two CS courses at the 400 level above CS 403, excluding CS 421 and CS 491		
Choose one of the following:		3
STAT 200	Statistical Analysis	
STAT 212	Biostatistics	
CS 361	Probability & Statistics for Computer Science	
CS 374	Introduction to Algorithms & Models of Computation	4
CS 421	Programming Languages & Compilers	3
Mathematics (may also fulfill the General Education Quantitative Reasoning I and II requirements)		
MATH 221	Calculus I	4-5
or MATH 220	Calculus	
MATH 225	Introductory Matrix Theory	2 or 3
or MATH 257	Linear Algebra with Computational Applications	
MATH 231	Calculus II	3
Required Chemistry Coursework - Minimum of 24 hours		
Foundation Courses- 12 hours required		
Select one of the following (General or Accelerated Chemistry):		8
CHEM 102 & CHEM 103 & CHEM 104 & CHEM 105	General Chemistry I and General Chemistry Lab I and General Chemistry II and General Chemistry Lab II	
or		
CHEM 202 & CHEM 203 & CHEM 204	Accelerated Chemistry I and Accelerated Chemistry Lab I and Accelerated Chemistry II	
CHEM 232	Elementary Organic Chemistry I	4
or CHEM 236	Fundamental Organic Chem I	
Advanced Chemistry Courses- 12 hours		
CHEM 440	Physical Chemistry Principles	4
or CHEM 442	Physical Chemistry I	
In consultation with an advisor, choose 8 hours of 300- or 400-level chemistry courses (The following courses may not be used to complete the advanced chemistry hours: CHEM 315, CHEM 397, CHEM 445, CHEM 447, CHEM 492, CHEM 494, CHEM 496, CHEM 497 and CHEM 499; and any course in another unit, such as any BIOC or MCB course.)		8

for the degree of Bachelor of Science in Liberal Arts and Sciences in Computer Science + Chemistry

Total Hours: 120

for the degree of Bachelor of Science in Liberal Arts and Sciences in Computer Science + Chemistry

By the time of graduation, students will have:

Computer Science:

1. An ability to apply knowledge of computing and mathematics appropriate to the discipline
2. An ability to analyze a problem, and identify and define the computing requirements appropriate to its solution
3. An ability to design, implement, and evaluate a computer-based system, process, component, or program to meet desired needs
4. An ability to function effectively on teams to accomplish a common goal
5. An understanding of professional, ethical, legal, security and social issues and responsibilities
6. An ability to communicate effectively with a range of audiences
7. An ability to analyze the local and global impact of computing on individuals, organizations, and society
8. A recognition of the need for and an ability to engage in continuing professional development
9. An ability to use current techniques, skills, and tools necessary for computing practice
10. An ability to apply mathematical foundations, algorithmic principles, and computer science theory in the modeling and design of computer-based systems in a way that demonstrates comprehension of the trade-offs involved in design choices
11. An ability to apply design and development principles in the construction of software systems of varying complexity

Chemistry:

1. A thorough knowledge of the basic principles of chemistry, including atomic and molecular structure, chemical dynamics and the chemical and physical properties of substances.
2. An exposure to the sub-fields of chemistry, including analytical, inorganic, organic and physical chemistry.
3. The ability to read, evaluate, interpret, and present (via oral and written communication) numerical, chemical and general scientific information and literature.
4. The ability to carry out experiments, use appropriate experimental apparatus effectively, and demonstrate proper laboratory safety skills.

Computer Science + Crop Sciences, BS

for the degree of Bachelor of Science Major in Computer Science + Crop Sciences

Computer Science + Crop Sciences (CS+CPSC) is a first-of-its-kind partnership between The Grainger College of Engineering's Department of Computer Science and the Department of Crop Sciences in the College of Agricultural, Consumer and Environmental Sciences.

Our growing population and changing climate demand out-of-the-box, multidisciplinary thinkers who can handle increasingly rich data sets. CS+CPSC students fill this crucial gap in the agriculture sector, combining a strong technical background with crop sciences expertise powerful enough to change the world.

Students will be among the first to analyze robotics-enabled soil and field measurements, predict weather and climate impacts on food supplies, and accelerate plant improvement through the simultaneous analysis of genetics, environment, and management.

for the degree of Bachelor of Science Major in Computer Science + Crop Sciences

Please see the Computer Science advisor in 1210 Siebel Center, as well as the Crop Sciences advisor in AE-116 Turner Hall.

To graduate from the Computer Science and Crop Sciences curriculum, a student must complete the following courses, all of which must be taken for a traditional letter grade.

Graduation Requirements
Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Total Hours 126

for the degree of Bachelor of Science Major in Computer Science + Crop Sciences

Computer Science component:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Crop Sciences component:

1. Demonstrate knowledge in the key subject matter areas of applied plant biology; crop growth and development; crop management and protection; and soil science.
2. Demonstrate an ability to identify a problem and develop solutions using quantitative reasoning skills for analysis of biological data.
3. Demonstrate oral and written communication skills necessary to listen and make effective arguments, to share applied scientific concepts with the public, and to make use of a broad variety of media.
4. Demonstrate an ability to lead and function in multidisciplinary teams.
5. Demonstrate the ability to perform self-guided discovery in agricultural sciences, practicing skills of engagement to enhance intellectual curiosity.

Computer Science + Economics, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Computer Science + Economics

Few disciplines are more impacted by "big data" than economics—a field with demand for analysts who not only have the sophisticated skills necessary to examine large datasets but also have the ability to write their own algorithms and software tools to do so. The computer science + economics curriculum produces students who can develop both skill sets by providing them with the opportunity to learn a variety of economic analytical skills, both theoretical and empirical, as well as computational skills.

Students in this STEM-designated Bachelor of Science program will be exposed to the tools of both disciplines with the aim of acquiring valuable skills that are in demand by a variety of employers. Graduates will not only be able to work with large datasets, but they will be able to create, analyze, and interpret this information. This major will prepare students for a variety of careers such as banking, finance, insurance, policy centers, and government agencies. In addition, this joint degree is ideal for preparing students for a variety of graduate programs.

Undergraduate Degree Programs in Economics

- Econometrics & Quantitative Economics, BSLAS (p. 307)
- Economics, BALAS (p. 309)
- Computer Science & Economics, BSLAS (p. 246)

For further information, please visit the Economics undergraduate program page (http://www.economics.illinois.edu/undergrad/info/).

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Computer Science + Economics

Please visit the computer science advisor as well as the economics advising office.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours).

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 66 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
fulfilled by ECON 102 and ECON 103		
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10

fulfilled by CS 124, CS 128, CS 225, MATH 220 or 221, MATH 231	
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)	0-20

Major Requirements

Code	Title	Hours
Required Computer Science Courses:		
CS 100	Computer Science Orientation (recommended; CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.)	1
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3
CS 173	Discrete Structures	3
CS 225	Data Structures	4
CS 222	Software Design Lab	1
Choose one of the following combinations		8-11
CS 233 & CS 341	Computer Architecture and System Programming	
OR		
CS 340	Introduction to Computer Systems	
& two CS courses at the 400 level above CS 403, excluding CS 421 and CS 491. These two courses must be distinct from all other courses used to fulfill program requirements or options.		
Choose one of the following:		3
ECON 202	Economic Statistics I	
STAT 200	Statistical Analysis	
STAT 212	Biostatistics	
CS 361	Probability & Statistics for Computer Science	
CS 374	Introduction to Algorithms & Models of Computation	4
CS 421	Programming Languages & Compilers	3
Mathematics (may also fulfill the General Education Quantitative Reasoning I and II requirements):		
MATH 220	Calculus	4-5
or MATH 221	Calculus I	
MATH 225	Introductory Matrix Theory	2 or 3
or MATH 257	Linear Algebra with Computational Applications	
MATH 231	Calculus II	3
Required Economics Coursework -- minimum 24 hours		
ECON 102	Microeconomic Principles	3
ECON 103	Macroeconomic Principles	3
ECON 203	Economic Statistics II	3
ECON 302	Inter Microeconomic Theory	3
Four 400-level courses in Economics selected from an approval list of computation-focused courses		12
Total Hours		**66-71**

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Computer Science + Economics

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Computer Science + Economics

---

To accomplish the educational objectives and to fulfill accreditation criteria, all economics programs provide the knowledge, experience, and opportunities necessary for students to demonstrate their attainment of the following outcomes:

- Analytical Skills/Problem-Solving: ECON students will effectively visualize, conceptualize, articulate, and solve complex problems or address problems that do not have a clear answer, with available information, through experimentation and observation, using microeconomic and macroeconomic theory, as well as calculus and statistical tools.
- Critical Thinking: ECON students will apply economic analysis to everyday problems helping them to understand events, evaluate specific policy proposals, compare arguments with different conclusions to a specific issue or problem, and assess the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.
- Quantitative Reasoning: ECON students will understand how to apply empirical evidence to economic arguments. Specifically, they may obtain and/or collect relevant data, develop empirical evidence using appropriate statistical techniques, and interpret the results of such analyses.
- Specialized Knowledge and Practical Application: ECON students will develop deeper analytical, critical, and quantitative skills in specialized areas by applying economic concepts to real world situations.
- Interdisciplinary Knowledge, Diverse Issues, and Global Consciousness: ECON students will broaden their global and disciplinary knowledge, enhancing their understanding of the world around them both within economics and beyond.
- Communication and Leadership: ECON students will build skills to work as part of a team and lead others, ensuring they are prepared to navigate diverse audiences and situations.

Computer Science + Education, BS

for the degree of Bachelor of Science Major in Computer Science + Education

The **Computer Science + Education, BS** is sponsored jointly by the Siebel School of Computing and Data Science and the Department of Curriculum & Instruction. The major in Computer Science and Education is a flexible program for undergraduate students who plan to pursue careers in either field and offers two foci of concentration.

- **Learning Sciences (p. 250)**
- **Secondary Education (p. 253)**

The Learning Sciences concentration focuses on how technology can be designed and developed to further education. Social media, virtual and augmented reality, data analytics, mobile and wearable devices have created an opportunity to transform teaching and learning in both formal and informal contexts. This degree will prepare students for advanced study at the graduate level, as well as immediate entry into the workforce at software companies, publishers, school districts, game design companies, and research non-profits.

The Secondary Education concentration provides the coursework and field experience for students to be licensed to teach computer science in grades 5-12. The degree will prepare students to join the workforce as teachers in the state of Illinois, providing them with the knowledge necessary to teach and develop computer science curricula.

for the degree of Bachelor of Science Major in Computer Science + Education

1. Students will acquire deep knowledge of computer science as it relates to the field of Education
2. (Secondary Education concentration only): Students will effectively plan and implement relevant, responsive instruction for high school students.
3. (Licensure concentration only): Students will use assessment data to drive decisions and solve problems in and out of the classroom.
4. Students will display the expectations of professionalism related to success in the field of education and beyond (Fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices).

Computer Science + Education: Secondary Education, BS

for the degree of Bachelor of Science Major in Computer Science + Education, Secondary Education concentration

The **Computer Science + Education, BS** is sponsored jointly by the Siebel School of Computing and Data Science and the Department of Curriculum & Instruction. The Secondary Education concentration provides the coursework and field experience for students to be licensed to teach computer science in grades 5-12. The degree will prepare students to join the workforce as teachers in the state of Illinois, providing them with the knowledge necessary to teach and develop computer science curricula.

Students pursuing teaching licensure programs in the College of Education must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

To be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0). Candidates in teacher licensure programs must receive a C- or better in ALL content and professional education coursework. Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

for the degree of Bachelor of Science Major in Computer Science + Education, Secondary Education concentration

To graduate from the Computer Science and Education curriculum, a student must complete all courses with a traditional letter grade.

In order to be recommended for licensure, candidates are required to maintain University of Illinois at Urbana-Champaign, cumulative, content area, and professional education grade point averages of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C- or better in ALL content and professional education coursework. Candidates should consult their adviser or the Council on Teacher Education for the list of courses used to compute these grade point averages. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education.

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Computer Science + Geography & Geographic Information Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Computer Science + Geography & Geographic Information Science

Everything happens *somewhere*, and Illinois is the national leader in CyberGIS — the use of high-performance, large-scale computing to answer geospatial questions. Students in CS + Geography & Geographic Information Science will develop advanced programming skills to deal with geospatial data and create new methods and tools to analyze that data.

The CS + GGIS, a blended bachelor's degree, is a partnership between the Siebel School of Computing and Data Science in The Grainger College of Engineering and the Department of Geography & Geographic Information Science in the College of Liberal Arts & Sciences. As part of the computing community at Illinois, you will benefit from being part of a top-five-ranked Computer Science program with world-class faculty and research.

for the degree of Bachelor of Science in Liberal Arts & Sciences in Computer Science + Geography & Geographic Information Science

Please see the computer science advisor as well as the geography advisor.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 66 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Code	Title	Hours
Required Computer Science Courses:		
CS 100	Computer Science Orientation (recommended; CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.)	1
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3
CS 173	Discrete Structures	3
CS 225	Data Structures	4
CS 222	Software Design Lab	1
Choose one of the following combinations		8-11
CS 233 & CS 341	Computer Architecture and System Programming	
OR		
CS 340	Introduction to Computer Systems	
& two CS courses at the 400 level above CS 403, excluding CS 421 and CS 491		
Choose one of the following:		3
STAT 200	Statistical Analysis	
STAT 212	Biostatistics	
CS 361	Probability & Statistics for Computer Science (recommended)	
CS 374	Introduction to Algorithms & Models of Computation	4
CS 421	Programming Languages & Compilers	3 or 4
Mathematics (may also fulfill the General Education QR I and II requirements)		
MATH 220	Calculus	5
or MATH 221	Calculus I	
MATH 225	Introductory Matrix Theory	2 or 3
or MATH 257	Linear Algebra with Computational Applications	
MATH 231	Calculus II	3
Required Geographic Information Science Coursework - Minimum of 24 hours		
GGIS 371	Spatial Analysis	
GGIS 379	Introduction to Geographic Information Systems	
GGIS 380	Geographic Information Systems II	
Two (2) additional GIS courses from the following list:		6
GGIS 205	Business Location Decisions	
GGIS 224	Environmental Data Science	
GGIS/SOC 280	Intro to Social Statistics	
GGIS 407	Foundations of CyberGIS & Geospatial Data Science	
GGIS 412	Geospatial Technologies & Society	
GGIS/ATMS 421	Earth Systems Modeling	
GGIS/PATH 439	Health Applications of GIS	
GGIS 460	Aerial Photo Analysis	
GGIS 468	Biological Modeling	
GGIS 473	Digital Cartography & Map Design	
GGIS 476	Environmental Remote Sensing	
GGIS 477	Introduction to Remote Sensing	
GGIS 478	Techniques of Remote Sensing	
GGIS 479	Advanced Topics in GIS	
GGIS 480	Principles of Geographic Information Science	
GGIS 489	Programming for GIS	
Two (2) human and/or physical geography courses:		6
GGIS 204	Cities of the World	
GGIS 210	Social & Environmental Issues	
GGIS 221	Geographies of Global Conflict	
GGIS 222	Big Rivers of the World	
GGIS/NRES 287	Environment and Society	
GGIS/ESE 350	Sustainability and the City	
GGIS 370/ESE 320	Water Planet, Water Crisis	
GGIS 384	Population Geography	
GGIS/NRES 401	Watershed Hydrology	
GGIS 405	Geography Field Course	

GGIS 406	Fluvial Geomorphology
GGIS 408	Humans and River Systems
GGIS 410	Green Development
GGIS 436/IB 439	Biogeography
GGIS 438	Geography of Health Care
GGIS 455	Geography of Sub-Saharan Africa
GGIS/LA 446	Sustainable Planning Seminar
GGIS 465	Transportation &Sustainability
GGIS 466	Environmental Policy
GGIS 471	Modern Geographic Thought
GGIS 482	Challenges of Sustainability
GGIS 483	Urban Geography
GGIS 496	Climate & Social Vulnerability

for the degree of Bachelor of Science in Liberal Arts & Sciences in Computer Science + Geography & Geographic Information Science

Learning Outcomes

1. **Geographic Understanding**
   a. GGIS students will understand the interconnectedness of places and scales in human-environmental systems, including the sustainability of those systems.
2. **Spatial Patterns and Processes**
   a. GGIS students will be able to analyze spatial patterns, distributions, processes, and connections within and among different human-environmental systems, using qualitative, quantitative, computational, and/or spatial methods of research

appropriate to their level of training and their field of geographic inquiry.

3. **Problem-Solving and Communication**
   a. GGIS students will be able to formulate and conduct geographic analyses and communicate the results in verbal, written, and visual form.

Computer Science + Linguistics, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Computer Science + Linguistics

Computational Linguistics is an interdisciplinary field located at the intersection between machine learning and cognitive science, between artificial intelligence and the social sciences. The CS + Linguistics program provides students a strong background in computer science alongside rigorous training in the liberal arts. Recognizing the diversity of disciplines in the contemporary world, this program offers unique opportunities for an interdisciplinary education and prepares students for both careers in emerging industries and for graduate school. The degree is grounded in theory and in practice, ensuring that students meet and exceed industry standards. It brings together faculty interested in distinct aspects of the relationship between language and computation: from studying language as a cognitive system to developing models with human-like behavior to achieving natural language understanding in machines.

for the degree of Bachelor of Science in Liberal Arts & Sciences in Computer Science + Linguistics

Please see the computer science advisor as well as the linguistics advisor.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours).

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.
Minimum required major and supporting course work: Normally equates to 66 hours. At least 12 hours of 300- and 400-level course work in the major must be taken on this campus.
Minimum hours required for graduation: 120 hours

Code	Title	Hours
Required Computer Science Coursework		
CS 100	Computer Science Orientation (recommended; CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.)	1

for the degree of Bachelor of Science in Liberal Arts & Sciences in Computer Science + Linguistics

Upon completion of the CS + Linguistics degree, students will be able to:

1. Analyze linguistic problems and identify relevant computational solutions.
2. Implement efficient computational models and demonstrate their adequacy.
3. Compare and assess the predictions of linguistic theories using empirical methods.
4. Synthesize findings across types, sources, and modalities of language data.
5. Examine the linguistic, social, and cognitive contexts in which models are used.

Computer Science + Music, BS

for the degree of Bachelor of Science in Computer Science + Music

The Bachelor of Science in Computer Science & Music (CS + Music) is designed for students who plan to pursue a career in music technology, as well as students who want to push the state-of-the-art in music composition and explore new avenues of expression. This degree will prepare students for advanced study at the graduate level for many existing programs in music and audio technology, as well as equip them with the proper skills to successfully join and lead a vibrant workforce centered around the creation and distribution of entertainment media through constantly evolving technological platforms.

The CS + Music curriculum provides a broad knowledge of the theory, design, and application of computer systems integrated with the theory, history, and application of music. The curriculum is formed around courses in music, mathematics, science, and computation. Advanced coursework includes either a senior thesis or a senior project. A minimum of 120 hours is required for graduation.

For admission requirements for the Bachelor of Science in CS + Music, please see the School of Music's Admissions website (listed above) or contact the Music Admissions Office:

Music Admissions Office
School of Music
1114 West Nevada Street
Urbana, IL 61801
(217) 244-7899

for the degree of Bachelor of Science in Computer Science + Music

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3

for the degree of Bachelor of Science in Computer Science + Music

By the end of the program, CS+Music graduates will demonstrate:

- An ability to acquire, understand, and integrate foundational knowledge in music and computer science, and to apply that knowledge to discover and engineer creative solutions to various types of complex problems.
- An ability to communicate, collaborate, and effectively engage with diverse people, teams, and communities.
- An understanding of how to apply musical practices and computer engineering principles with a mindfulness toward global cultural, economic, and societal differences.
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies, in furtherance of a culture of lifelong learning.

Computer Science + Philosophy, BSLAS

for the degree of Bachelor of Sciences in Liberal Arts & Sciences in Computer Science + Philosophy

The CS + Philosophy blended bachelor's degree is a partnership between the Department of Philosophy in the College of Liberal Arts & Sciences and the Siebel School of Computing and Data Science in The Grainger College of Engineering (https://siebelschool.illinois.edu/academics/undergraduate/degree-program-options/cs-x-degree-programs/computer-science-philosophy/). The CS + Philosophy major will prepare you to navigate and push the frontiers of computing where researchers and practitioners often face the same type of questions—from foundational to ethical—that philosophers have tackled for ages. Acquire skills in formal methods, philosophical analysis, and computer programming, all while learning from award-winning faculty invested in the relationship between computer science and philosophy.

for the degree of Bachelor of Sciences in Liberal Arts & Sciences in Computer Science + Philosophy

Please see the computer science advisor as well as the philosophy advisor.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office by the beginning of the fifth semester (60-75 hours).

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 71-73 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
	fulfilled by PHIL 222 and PHIL 223	
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
	fulfilled by MATH 220 or MATH 221, MATH 231, CS 124, CS 128, CS 225, and PHIL 454	
Language Requirement (Completion of the fourth semester or equivalent of a language other than English is required)		0-20

Major Requirements

Code	Title	Hours
Required Computer Science Courses		
CS 100	Computer Science Orientation (recommended; CS 100 is an orientation course aimed at first-year students, so students who declare the major after the freshman year are not required to complete it.)	1
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3
CS 173	Discrete Structures	3
CS 225	Data Structures	4
CS 222	Software Design Lab	1
Choose one of the following combinations		8-11
CS 233 & CS 341	Computer Architecture and System Programming	
OR		
CS 340	Introduction to Computer Systems	
& two CS courses at the 400 level above CS 403, excluding CS 421 and CS 491. These two courses must be distinct from all other courses used to fulfill program requirements or options.		
Choose one of the following:		
STAT 200	Statistical Analysis	
STAT 212	Biostatistics	
CS 361	Probability & Statistics for Computer Science	
CS 374	Introduction to Algorithms & Models of Computation	4
CS 421	Programming Languages & Compilers	3
Mathematics (may also fulfill the General Education Quantitative Reasoning I and II requirements)		
MATH 220	Calculus	4-5
or MATH 221	Calculus I	
MATH 225	Introductory Matrix Theory	2 or 3
or MATH 257	Linear Algebra with Computational Applications	
MATH 231	Calculus II	3
Required Philosophy coursework		
PHIL 222	Philosophical Foundations of Computer Science	3
PHIL 223	Minds & Machines	3
PHIL 421	Ethical Theories	3
Choose one of the following:		3
PHIL 426	Metaphysics	
PHIL 430	Theory of Knowledge	
Choose one of the following:		3
PHIL 425	Philosophy of Mind	
PHIL 438	Philosophy of Language	
PHIL 439	Philosophy of Mathematics	
PHIL 477	Philosophy of Psychology	
PHIL 454	Advanced Symbolic Logic	3
PHIL 499	Capstone Seminar	3
In consultation with an advisor, choose at least 9 additional hours of coursework in philosophy, with at least 6 of those hours being at the 300- or 400-level.		9
Total Hours		**68-74**

for the degree of Bachelor of Sciences in Liberal Arts & Sciences in Computer Science + Philosophy

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Sciences in Liberal Arts & Sciences in Computer Science + Philosophy

1. Students will become familiar with traditional topics, theories, and debates in epistemology and metaphysics, in ethics and value theory, and in logic; and familiar with current developments in professional philosophy.
2. Students will gain an understanding of machine learning and the metaphysical and moral issues rising from artificial intelligence, and the various consequences for human dignity and living.
3. Students will develop the ability to analyze persuasive and argumentative prose: identifying the main claims asserted, the reasons alleged to support those claims, and the logical relations between the claims and the reasons, including identifying any gaps in the arguments.
4. In addition to formal methods, students will develop the ability to write clearly and with logical precision on a wide range of important issues, including (but not limited to): civic and social challenges at local, national, and global levels; social and cultural issues related to race, indigeneity, gender, class, sexuality, language, and disability; and the ways that complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are affected by the local identities and ethical choices of individuals and institutions.

Computer Science + Physics, BS

for the degree of Bachelor of Science in Computer Science plus Physics

Physics focuses on quantitative descriptions for the behavior of physical systems. Computer science has a natural place in the study of physics. Computer science enables much more advanced computation than that available using pen and paper. These computational advances dramatically increase the complexity of physical systems that can be described quantitatively.

The Illinois CS+Physics program blends our physics and computer science degrees to give students the skills to both understand and carry out quantitative models of physical systems. This collaboration between Computer Science and Physics provides an innovative program for students who are interested in the intersection between computing and physics.

Students in the CS + Physics program will develop mastery in areas ranging from numerical methods and machine learning to algorithms for computational science and quantum computing. The program combines the domain expertise in Physics, including its computational aspects, with the broad-based expertise in computing from Computer Science. This unique approach allows students to bridge these two areas.

Students enrolled in CS+Physics have ample opportunity to explore both their interests in Physics and Computer Science through the selection of technical electives. In consultation with the academic advisor, each student will elect a set of technical courses broadening their knowledge of both Physics and Computer Science. Technical electives add a minimum of seventeen (17) hours to the core Physics and Computer Science combined curriculum.

The top-10 rated Physics and Computer Science programs provide students the unique opportunity to receive instruction from the top scientists in both subjects.

for the degree of Bachelor of Science in Computer Science plus Physics

Graduation Requirements

Minimum hours required for graduation: 128 hours

Minimum Technical GPA (http://catalog.illinois.edu/undergraduate/engineering/computer-science-physics-bs/go.grainger.illinois.edu/TechnicalGPA/): 2.0.
TGPA is required for CS, Math, and Physics courses. See Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/) to clarify requirements.

Minimum Overall GPA: 2.0

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
fulfilled by PHYS 211, PHYS 212		
Social & Behavioral Sciences (6 hours)		6

---

The Department of Physics Undergraduate Studies Office—together with guidance from the Physics Undergraduate Studies Committee—will work to collect, compile, evaluate, and report on the learning outcomes for its courses. This work will include, but not be limited to:

1. Informal Early Feedback:
   Students in each major-specific course will be invited to participate in a survey to help the department and instructors evaluate the students' understanding of the course learning objectives, outcomes, and course goals. Summary reports will be made available to instructors and the department leadership.
2. Evaluation of Direct Student Learning and Other Summative Learning Assessments:
   Final examinations (i.e., questions and student work) will be collected for evaluation of learning outcomes. This will include evaluation of the assessments' usefulness in evaluation of learning outcomes, as well as the mastery of the outcomes by students. Anonymized student work will be used for the evaluation. Summary reports will be made available to instructors and the Department leadership.

Additionally, CS will follow its standard student outcomes assessment process for the core CS courses, in the same manner as it uses for continuous assessment of the CS BS program.

1. Indirect Evaluation of Student Learning:
   Indirect measures of student learning will include current enrollment, including demographic information.
2. Degree completion rates, including information regarding:
   a. Semesters to completion
   b. Degree program requirements
   c. Semesters to complete specified intra-degree program requirements
   d. Choke-points in degree completion progression
   e. Course updates and revisions
   f. Desirable new courses
   g. Demographic trends

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Creative Writing

1. **Concepts:** Students will identify, analyze, and use the elements of literary craft appropriate for their chosen writing genre.
2. **Writing:** Students will develop a personal style, apply craft techniques that they learn during workshops, and choose from several strategies to revise written work.
3. **Workshop:** Students will identify and learn to use the most effective worship practices. They will learn how to critique the written work of their peers, both orally and in writing, in constructive and mutually beneficial ways.
4. **Reading:** Students will read, analyze, and evaluate contemporary and other literature from the perspective of literary craft and the study of creative writing.
5. **Literary Community and Profession:** Students will learn to evaluate, discuss, and research contemporary literary publishing and editing.

Students pursuing this major select one of these concentrations:

- Agroecology (p. 273)
- Crop Agribusiness (p. 275)
- Horticultural Food Systems (p. 277)

for the degree of Bachelor of Science Major in Crop Sciences

Graduation Requirements

Minimum hours required for graduation: 126 hours.
ACES prescribed and elective courses: 35 hours, of which 20 hours must be completed in residence.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Total Hours 126

for the degree of Bachelor of Science Major in Crop Sciences

Students graduating with the B.S. in Crop Sciences should be able to:

1. Demonstrate knowledge in the key subject matter areas of applied plant biology; crop growth and development; crop management and protection; and soil science.
2. Demonstrate an ability to identify a problem and develop solutions using quantitative reasoning skills for analysis of biological data.
3. Demonstrate oral and written communication skills necessary to listen and make effective arguments, to share applied scientific concepts with the public, and to make use of a broad variety of media.
4. Demonstrate an ability to lead and function in multidisciplinary teams.
5. Demonstrate the ability to perform self-guided discovery in agricultural sciences, practicing skills of engagement to enhance intellectual curiosity.

Crop Sciences: Agroecology, BS

for the degree of Bachelor of Science Major in Crop Sciences, Agroecology Concentration

The Agroecology Concentration addresses ecologically based management of cropping systems, stewardship of the environment, and sustainable food production systems. The intersection between crop plants and their environment is emphasized in this concentration. Graduates of the Agroecology concentration are prepared for careers in integrated plant health management, government regulatory and environmental agencies or for entrance into graduate or professional school.

for the degree of Bachelor of Science Major in Crop Sciences, Agroecology Concentration

Graduation Requirements
Minimum hours required for graduation: 126 hours.
ACES prescribed and elective courses: 35 hours, of which 20 hours must be completed in residence.

Crop Sciences: Crop Agribusiness, BS

for the degree of Bachelor of Science Major in Crop Sciences, Crop Agribusiness Concentration

The concentration in crop agribusiness is designed for students wanting to combine agronomic production and business management. This concentration prepares students for careers in production and marketing, cropping systems management, and a broad range of multi-functional agricultural enterprises, or for entrance into graduate school.

Crop Sciences: Horticultural Food Systems, BS

for the degree of Bachelor of Science Major in Crop Science, Horticultural Food Systems Concentration

This concentration provides students with a strong foundation in plant sciences along with specialized knowledge in horticultural fruit and vegetable crop systems at urban, local, and commercial scales. Graduates from this program are prepared for careers as crop consultants, crop protection and production specialists; entrepreneurs in urban and local food systems; greenhouse or farm managers; and as community gardening and horticultural educators. This concentration will also prepare students for graduate studies leading to careers in research, extension, and education. A minimum of 126 total hours is required.

for the degree of Bachelor of Science Major in Crop Science, Horticultural Food Systems Concentration

Students graduating with the B.S. in Crop Sciences should be able to:

1. Demonstrate knowledge in the key subject matter areas of applied plant biology; crop growth and development; crop management and protection; and soil science.
2. Demonstrate an ability to identify a problem and develop solutions using quantitative reasoning skills for analysis of biological data.
3. Demonstrate oral and written communication skills necessary to listen and make effective arguments, to share applied scientific concepts with the public, and to make use of a broad variety of media.
4. Demonstrate an ability to lead and function in multidisciplinary teams.
5. Demonstrate the ability to perform self-guided discovery in agricultural sciences, practicing skills of engagement to enhance intellectual curiosity.

Dance, BA

for the degree of Bachelor of Arts in Dance

The BA curriculum in dance is designed to provide an integrated and individualized approach to undergraduate studies of dance. The degree is designed for students who want to explore interdisciplinary approaches to art-making, and/or simultaneously pursue a minor or major in another discipline. Students will study core areas in Dance: Foundations, Physical Practice, Creative Practice, Performance Production, Context, and Synthesis. Students will identify at least one other key area of interest such as Psychology, Kinesiology, Theater Studies, Music, Anthropology, Business, Art & Design, Environment, Film, Gender Studies, Cultural Studies, etc., and will choose a Major, Minor or Focused Electives in this area of study under consultation with an advisor. Under the mentorship of a faculty member, students will propose a research project to the undergraduate committee for approval. This research will culminate in a BA Senior Thesis, evidencing a synthesis of their studies within dance and another area of study.

Students pursuing a Dance degree at Illinois must first be admitted to the BFA in Dance (audition required). Once admitted, those desiring an interdisciplinary education may choose to apply for admittance into the BA in Dance, rather than continuing in the BFA.

Evaluation of majors is an ongoing process. Continued enrollment in the program is contingent upon satisfactory performance. A student is expected to maintain a minimum 2.75 grade point average in all dance coursework in order to remain in good standing in the department.

A total of 120 hours is required for this degree.

for the degree of Bachelor of Arts in Dance

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Dance coursework grade point average minimum: 2.75

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Arts in Dance

Upon graduation, new alumni from the Bachelor of Arts program will be able to:

1. Dance with enthusiasm allied with basic technical and performance skills in more than one dance form.
2. Appreciate the socio-cultural, political, and historical contexts of the forms in which they dance.
3. Articulate dance research interests in anatomical, cultural, and/or epistemological terms.
4. Produce capstone research that reflects a synthesis of studies in dance and other fields.
5. Employ diverse modes of thinking, both orally and in writing, to communicate ideas relating to dance and other fields.
6. Demonstrate critical self-reflection, curiosity, self-motivation, and entrepreneurialism in all aspects of their engagement with dance, research, and community.
7. Integrate their dance studies with their other chosen field of specialty and produce a capstone project that evidences research skill, depth of inquiry, and relevance to society.

Dance, BFA

for the degree of Bachelor of Fine Arts in Dance

The BFA program in Dance offers intense dance training, multicultural movement practices, and meaningful interactions with faculty that prepare students to enter the world of dance as professional dancers and informed citizens. Each year of the students' education has a theme that designates a gestalt of competencies designed to progress yearly through the curriculum. First-years ACTIVATE (through technique classes, repertory and a first semester performance experience); sophomores DELVE (taking multiple physical practice, context and creative practice classes and being reviewed by a faculty committee); juniors ARTICULATE (with one semester spent abroad or on campus taking multi-disciplinary coursework); and seniors LAUNCH (taking career seminar, connecting with an alumni mentor, and producing their own work).

The BFA curriculum offers coursework in the areas of technique, composition, performance, theory, media, career preparation, improvisation, music studies, pedagogy, history, movement sciences, and repertory. Electives may be taken in a range of techniques, choreographic laboratory, and independent studies.

Specific Program requirement areas are as follows: 4 credits in Foundations, 26 credits in Physical Practice, 7-8 credits in Creative Practice, 8 credits in Performance, 3 credits in Production, 21 credits in Context, 5 credits in Synthesis, and 5–7 credits in Focused Electives.

Evaluation of majors is an ongoing process. Continued enrollment in the program is contingent upon satisfactory performance. A student is expected to maintain a minimum 2.75 grade point average in all dance coursework in order to remain in good standing in the department.

It is possible for transfer students to complete degree requirements in a three-year period contingent upon prior completion of general education requirements.

A total of 130 hours is required for this degree.

for the degree of Bachelor of Fine Arts in Dance

Graduation Requirements

Minimum hours required for graduation: 130 hours.

Dance coursework grade point average minimum: 2.75

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

for the degree of Bachelor of Fine Arts in Dance

Upon graduation, new alumni of the Bachelor of Fine Arts program will be able to:

1. Dance with full mind-body awareness, energy, skill, musicality, passion, and imagination in African- and European-informed movement practices.
2. Confidently teach a class that evinces deep physical and contextual understanding of a movement practice while paying attention to community building, safety, inclusiveness, and strategic educational engagement.
3. Communicate ideas about dance through physicality, written, and oral platforms, both in-person and online, in publication or publicity that evidence clarity and consideration of multiple perspectives.
4. Utilize technology and various media both as a creative tool and as a means for increasing positive visibility for dance.
5. Articulate the socio-political, cultural, historical impact of dance and its potential to contribute to global dialogue and inquiry.
6. Participate in and develop creative processes, conduct choreographic and performative research, and disseminate that research in theatrical events.
7. Utilize various approaches to the body and understand the context in which those approaches were founded.
8. Model good citizenship and community-building in their future environments.

Dance, BA & Kinesiology, BS

for the dual degree of Bachelor of Arts in Dance and the Bachelor of Science in Kinesiology

The BA/BS dual degree is designed for students who want to pursue an integrated approach to dance performance, choreography, and/or history and the study of human anatomy and kinesiology, specifically as applied to dance. In this program, students engage in an interdisciplinary curriculum of diverse dance styles and forms, learning how the body works, researching our art form's expansive history, and defining their own voices as performers and choreographers. Students will create a BA Capstone Project their senior year as a synthesis of the two majors.

Students pursuing a BA/BS in Dance and Kinesiology degree at Illinois must pass the required dance audition as well as qualify for admission to both the College of Fine and Applied Arts and the College of Health and Kinesiology.

The Kinesiology curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student's area of concentration within Kinesiology, which in this Dual Degree Pathway, is Dance.

for the dual degree of Bachelor of Arts in Dance and the Bachelor of Science in Kinesiology

Students are expected to follow all the degree requirements of each degree and may double-count courses, provided the total number of credit hours earned is 158.

Dance coursework grade point average minimum: 2.75

for the dual degree of Bachelor of Arts in Dance and the Bachelor of Science in Kinesiology

Graduates from the Bachelor of Arts in Dance will be able to:

1. Dance with enthusiasm allied with basic technical and performance skills in more than one dance form.
2. Appreciate the socio-cultural, political, and historical contexts of the forms in which they dance.
3. Articulate dance research interests in anatomical, cultural, and/or epistemological terms.
4. Produce capstone research that reflects a synthesis of studies in dance and other fields.
5. Employ diverse modes of thinking, both orally and in writing, to communicate ideas relating to dance and other fields.
6. Demonstrate critical self-reflection, curiosity, self-motivation and entrepreneurialism in all aspects of their engagement with Dance, Research, and Community.
7. Integrate their Dance Studies with their other chosen field of specialty and produce a capstone project that evidences research skill, depth of inquiry, and relevance to society.

Learning outcomes for the Bachelor of Science in Kinesiology are:

1. Content Knowledge: Students will comprehend and demonstrate the significant theories, models, themes, and ideas in the biomechanical, physiological, behavioral, pedagogical, biological, socioeconomic, environmental, and sociocultural correlates of Kinesiology and Community Health.
2. Critical Thinking and Discovery: Students will comprehend and demonstrate ethical practices and the application of scientific findings and/or critical analysis in order to interpret, promote inquiry, propose solutions, and/or create new ideas related to health, rehabilitation, and/or human movement.
3. Awareness and Understanding: Students will demonstrate awareness and appreciation for the diverse socioeconomic, behavioral, sociocultural, biological, environmental, philosophical, and historical factors that influence health, rehabilitation, and human movement.
4. Programming and Assessment: Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases.
5. Leadership and Engagement: Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

for the dual degree of Bachelor of Arts in Dance and the Bachelor of Science in Kinesiology

For further information regarding the dual degree opportunity or admissions, please contact the Department of Dance (dance@illinois.edu).

Dietetics and Nutrition, BS

for the degree of Bachelor of Science Major in Dietetics and Nutrition

Dietetics and Nutrition major meets the requirements set by the Accreditation Council on Education in Nutrition and Dietetics (ACEND) of the Academy of Nutrition and Dietetics (AND) and qualifies students for competitive dietetic internships. Upon completion of a postgraduate internship, students selecting this major may take the examination to become Registered Dietitians. Students choosing this major who do not complete an internship will be prepared for entry-level supervisory

positions in food service facilities and in the food and pharmaceutical industries.

for the degree of Bachelor of Science Major in Dietetics and Nutrition

Graduation Requirements

Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science Major in Dietetics and Nutrition

---

All graduates of the University of Illinois Didactic Program in Dietetics (DPD) will be able to:

1. KRDN 1.1 Demonstrate how to locate, interpret, evaluate and use professional literature to make ethical, evidence-based practice decisions.
2. KRDN 1.2 Select and use appropriate current information technologies to locate and apply evidence-based guidelines and protocols.
3. KRDN 1.3 Apply critical thinking skills.

1. KRDN 2.1 Demonstrate effective and professional oral and written communication and documentation.
2. KRDN 2.2 Describe the governance of nutrition and dietetics practice, such as the
3. Scope of Practice for the Registered Dietitian Nutritionist and the Code of Ethics for the Profession of Nutrition and Dietetics.
4. KRDN 2.3 Assess the impact of a public policy position on the nutrition and dietetics profession.
5. KRDN 2.4 Discuss the impact of health care policy and different health care delivery systems on food and nutrition services.
6. KRDN 2.5 Identify and describe the work of interprofessional teams and the roles of others with whom the registered dietitian nutritionist collaborates.
7. KRDN 2.6 Demonstrate cultural humility, awareness of personal biases and an understanding of cultural differences as they contribute to diversity, equity and inclusion.
8. KRDN 2.7 Describe contributing factors to health inequity in nutrition and dietetics including structural bias, social inequities, health disparities and discrimination.
9. KRDN 2.8 Participate in a nutrition and dietetics professional organization and explain the significant role of the organization.
10. KRDN 2.9 Defend a position on issues impacting the nutrition and dietetics profession.

1. KRDN 3.1 Use the Nutrition Care Process and clinical workflow elements to assess nutritional parameters, diagnose nutrition-related problems, determine appropriate nutrition interventions and develop plans to monitor the effectiveness of these interventions.
2. KRDN 3.2 Develop an educational session or program/educational strategy for a target population.
3. KRDN 3.3 Demonstrate counseling and education methods to facilitate behavior change and enhance wellness for diverse individuals and groups.
4. KRDN 3.4 Practice routine health screening assessments, including measuring blood pressure and conducting waived point-of-care laboratory testing (such as blood glucose or cholesterol).
5. KRDN 3.5 Describe concepts of nutritional genomics and how they relate to medical nutrition therapy, health and disease.
6. KRDN 3.6 Develop nutritionally sound meals, menus and meal plans that promote health and disease management and meet client's/patient's needs.

1. KRDN 4.1 Apply management theories to the development of programs or services.
2. KRDN 4.2 Evaluate a budget/financial management plan and interpret financial data.
3. KRDN 4.3 Demonstrate an understanding of the regulation system related to billing and coding,
4. what services are reimbursable by third party payers, and how reimbursement may be obtained.
5. KRDN 4.4 Apply the principles of human resource management to different situations.
6. KRDN 4.5 Apply safety and sanitation principles related to food, personnel and consumers.
7. KRDN 4.6 Explain the processes involved in delivering quality food and nutrition services.
8. KRDN 4.7 Evaluate data to be used in decision-making for continuous quality improvement.

1. KRDN 5.1 Perform self-assessment that includes awareness in terms of learning and leadership styles and cultural orientation and develop goals for self-improvement.
2. KRDN 5.2 Identify and articulate oneâ€™s skills, strengths, knowledge and experiences relevant to the position desired and career goals.
3. KRDN 5.3 Practice how to self-advocate for opportunities in a variety of settings (such as asking for needed support, presenting an elevator pitch).
4. KRDN 5.4 Practice resolving differences or dealing with conflict.
5. KRDN 5.5 Promote team involvement and recognize the skills of each member.
6. KRDN 5.6 Demonstrate an understanding of the importance and expectations of a professional in mentoring and precepting others.

Early Childhood Education, BS

for the degree of Bachelor of Science in Early Childhood Education (on campus & online)

The **Early Childhood Education, BS** prepares student candidates to teach birth through grade 2. A minimum of 120 semester hours of credit is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C- or better in ALL content and professional education coursework. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/). Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

This is a Gateways to Opportunity (http://www.ilgateways.com/) approved program.

Early Childhood Education: Professional Education - Licensure, BS

for the degree of Bachelor of Science in Early Childhood Education concentration in Professional Education - Licensure (online)

This **Early Childhood Education, BS** online concentration in Professional Education - Licensure is intended for transfer students who have earned an associate degree in early childhood education or closely related field.

This professional teacher licensure concentration prepares students to teach young children birth through grade 2 in settings that require teacher licensure. Students build upon prior coursework and experience in early childhood to advance their understanding of young children's learning and their own teaching practices. Coursework includes instructional planning, delivery of instruction, assessment, child development, family and community relationships, content area instruction, and fieldwork in early childhood settings.

A minimum of 120 semester hours of credit is necessary for graduation. Program requirements include successful completion of specified coursework, maintenance of a 2.5 GPA in all coursework taken at University of Illinois Urbana-Champaign, course grades of C- or above, and successful completion of clinical experiences.

Students pursing teacher licensure will be required to meet additional program requirements and pass all applicable licensure tests as required by the Illinois State Board of Education in order to be licensed. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/). Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

This is a Gateways to Opportunity (http://www.ilgateways.com/) approved program.

Early Childhood Education: Professional Education - Non-Licensure, BS

for the degree of Bachelor of Science in Early Childhood Education concentration in Professional Education - Non-Licensure (online)

This **Early Childhood Education, BS** online concentration in Professional Education - Non-Licensure is intended for transfer students who have earned an associate degree in early childhood education or closely related field.

This professional non-licensure concentration prepares students to teach young children birth through grade 2 in settings that do not require teacher licensure. Students build upon prior coursework and experience in early childhood to advance their understanding of young children's learning and their own teaching practices. Coursework includes instructional planning, delivery of instruction, assessment, child development, family and community relationships, content area instruction, and fieldwork in early childhood settings.

A minimum of 120 semester hours of credit is necessary for graduation. Program requirements include successful completion of specified coursework, maintenance of a 2.5 GPA in all coursework taken at University of Illinois Urbana-Champaign, course grades of C- or above, and successful completion of clinical experiences.

This is a Gateways to Opportunity (http://www.ilgateways.com/) approved program.

Earth, Society, & Environmental Sustainability, BSLAS

for the degree of Bachelor Science in Liberal Arts and Sciences in Earth, Society, & Environmental Sustainability

Students select one concentration in consultation with an academic advisor.

- **Science of the Earth System (SES) Concentration**
- **Society and the Environment (SAE) Concentration**

On-campus Illinois students can transfer to this degree without any special requirements.

Off-campus students who plan to transfer to this degree should have completed, or have in progress, the following:

- the Composition 1 requirement.
- the third level of high school foreign language or second level of college foreign language.

It is highly recommended that off-campus students complete the following requirements before transferring to the online degree - students who have not completed the following requirements may have to take additional coursework (either at Illinois or elsewhere) and should consult the program advisor.

- the Illinois LAS language requirement should be satisfied.
- the General Education Distribution Requirements of the College of Liberal Arts and Sciences should be completed.
- the Cognate Coursework should be completed.

for the degree of Bachelor Science in Liberal Arts and Sciences in Earth, Society, & Environmental Sustainability

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 48-58 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus. Substitutions may be made with advisor approval.

Minimum hours required for graduation: 120 hours.

Code	Title	Hours
ESES Introductory Core		**12-14**
Students take one approved introductory or advanced course from at least four of the following five areas.		
Earth's Biosphere and Ecology		
ESE 111, GEOL 143, IB 100, IB 103, IB 105, IB 150, MCB 150, NRES 105, UP 205		
Earth's Physical Systems, Resources, and Hazards		
ATMS 100, ATMS 120, ATMS 201, GEOL 100, GEOL 107, GEOL 117, GEOL 118, GGIS 103, GGIS 222		
Environment and the Human Response		
ACE 210, ACE 251, GGIS 106, HIST 202, REL 270, RST 242, SOC 160		
Sustainability, Policy, and Global Change		
ANTH 278, ATMS 140, CPSC 215, GEOL 208, LA 250, NPRE 101, NPRE 201, PS 224, PS 225, SOC 270		
Visualizing the Earth System		
ATMS 207, GGIS 105		
ESE coursework		**7**
ESE 200	Earth Systems	
GGIS 379	Introduction to Geographic Information Systems	
Advanced Courses		**15-20**
A minimum of five 300- and 400-level courses (from the list below) and in an academically coherent program approved by the advisor, are required. Courses taken to satisfy the "ESE Introductory Core" requirement cannot simultaneously be used to satisfy the Advanced Course requirement. It is strongly recommended that students complete the LAS requirement with 21 hours of 300- or 400-level courses related to the ESE curriculum.		
At least three of these five advanced courses must be listed or cross-listed as an ESE or ENSU course.		
Earth's Biosphere & Ecology		
ESE 439, HORT 430, IB 405, IB 440, IB 444, IB 447, IB 451, IB 452, IB 453, IB 461, IB 485, NRES 348, NRES 419, NRES 420, NRES 431		
Earth's Physical Systems, Resources, & Hazards		
ABE 436, ATMS 420, CEE 330, CHEM 360, ENSU 302, ESE 320, ESE 333, ESE 411, ESE 445, ESE 470, ESE 486, GEOL 380, GEOL 401, GEOL 450, GEOL 451, GEOL 460, GGIS 401, GGIS 406, GGIS 408, MSE 489, NRES 351		
Environment & the Human Response		
AGCM 330, AGCM 430, CHLH 469, ENG 315, ENGL 476, ENSU 301, ESE 311, ESE 360, ESE 389, GGIS 350, GGIS 384, GGIS 455, GGIS 483, GGIS 495, GGIS 496, LA 314, LA 430, LA 450, NRES 340, NRES 472, SOC 447		
Sustainability, Policy, and Global Change		
ACE 310, ACE 406, ACE 411, ATMS 307, ATMS 447, ATMS 449, CPSC 336, CPSC 415, CPSC 431, ENSU 303, ENSU 310, ENSU 410, ESE 410, ESE 465, ESE 466, ESE 482, ETMA 311, LA 370, NPRE 480, NRES 325, NRES 424, NRES 426, NRES 439, UP 405, UP 446, UP 456, UP 480		
Visualizing the Earth System		
ATMS 305, ESE 421, ESE/GGIS 380, GGIS 371, GGIS 412, GGIS 460, GGIS 468, GGIS 476, GGIS 477, GGIS 479, NRES 427, NRES 454, UP 418		

for the degree of Bachelor Science in Liberal Arts and Sciences in Earth, Society, & Environmental Sustainability

1. Be able to recognize, critique and implement commonly accepted Sustainability models and ideas in a wide variety of settings, using systems thinking to link social and natural science concepts.

2. Have a fundamental understanding of the underlying natural science (SES concentration) or social science (SAE concentration) concepts; being able to recognize and apply appropriate scientific methods (SES concentration) and social science methods (SAE concentration).
3. Use quantitative methods to describe, understand and evaluate theoretical and applied issues in environmental and sustainability study; this includes direct calculation, working with data, and using quantitative models.
4. Be able to critically evaluate and then communicate environmental and sustainability concepts to both specialized and wide audiences.
5. Prepare students for professional work in environmental and sustainability practice, such as laboratory and field techniques, apprehending and implementing Geographic Information Sciences (including the use of appropriate software), and quantitative and qualitative methods.

Earth, Society, & Environmental Sustainability: Science of the Earth System (SES), BSLAS

for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability, Science of the Earth System Concentration

All students wishing to attend graduate school in any field should discuss necessary supplementary course work with their advisor as early as possible.

A Major Plan of Study form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Study abroad courses may be substituted for major and minor requirements with approval of advisor.

Departmental distinction: Students who maintain grade point averages of at least 3.3 in all courses within the major and who undertake a faculty-guided individual research project for credit in the major are recommended for graduation with distinction.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. This may require up to four semesters of language depending on high school coursework or placement. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor Science in Liberal Arts and Sciences Major in Earth, Society, & Environmental Sustainability, Society and the Environment Concentration

1. Be able to recognize, critique and implement commonly accepted Sustainability models and ideas in a wide variety of settings, using systems thinking to link social and natural science concepts.
2. Have a fundamental understanding of social science concepts; being able to recognize and apply appropriate social science methods.
3. Use quantitative methods to describe, understand and evaluate theoretical and applied issues in environmental and sustainability study; this includes direct calculation, working with data, and using quantitative models.
4. Be able to critically evaluate and then communicate environmental and sustainability concepts to both specialized and wide audiences.
5. Students will demonstrate professional competence in environmental and sustainability practice by executing appropriate laboratory and field

techniques, applying Geographic Information Science tools and software, and selecting and employing suitable quantitative and qualitative analytical methods.

East Asian Languages & Cultures, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in East Asian Languages & Cultures

For decades, Illinois has been a major center for the study and research of the cultures and languages of East Asia. We have trained hundreds of students who have gone on to careers in education, business, finance, industry, law, journalism, international relations, governments and the arts. The goal of the undergraduate major is that the student gain an in-depth knowledge of the civilizations of East Asia, a firm competence in an East Asian language, a solid familiarity with East Asian cultures through multiple disciplines, and a more advanced knowledge of the region including research and writing in a seminar format. The Major (https://ealc.illinois.edu/academics/degree-programs/undergraduate-program/major-ealc/)and Minor (https://ealc.illinois.edu/academics/programs/degree-programs/undergraduate/minor-east-asian-languages-and-cultures/), administered by the Department of East Asian Languages and Cultures, are designed for students seeking a broad liberal arts education and preparation for graduate study or professional careers involving East Asia.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in East Asian Languages & Cultures

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 33-57 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
fulfilled by EALC 120 and any other course approved as Humanities & the Arts		
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
fulfilled by EALC 120		
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)		0-20

Major Requirements

Code	Title	Hours
One year of a single East Asian Language beyond the intermediate level (i.e., beyond CHIN 204 or CHIN 242; JAPN 204; KOR 204 or KOR 241). [1]		10-30
Disciplinary and period courses: [2]		12
EALC 120	East Asian Civilizations	
One course on East Asia dealing substantially with the period before 1800		
One course in East Asian history		
One course in East Asian literature		
Advanced courses:		12
Four non-language courses at the 300- or 400-level.		
EALC 398	Colloquium in EALC (or an approved senior project.) [3]	3

1 *Students testing out of the advanced language requirement (306-level) must take two additional non-language courses from East-Asian-related offerings.*

2 *No course may be counted more than once toward these requirements and at least two courses must be at the 200-level or above.*

3 *Students selecting the senior project option must submit to the Director of Undergraduate Study a proposal outlining the project to be undertaken, the course in which the project is to be completed and an agreement signed by the faculty member supervising the project.*

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in East Asian Languages & Cultures

1. **Linguistic Competence and Intercultural Understanding:** EALC students will demonstrate proficiency in the target language and effectively communicate in both routine and social situations. They will possess intercultural competence, enabling them to navigate and engage with diverse cultural contexts.
2. **Intellectual Reasoning and Knowledge:** EALC students will critically analyze and reflect on social, cultural, and linguistic differences. They will apply conceptual tools for cultural analysis and articulate their ideas effectively in speech and writing. Students will possess a deep, interdisciplinary knowledge of East Asian cultures and contextualize Asia within global trends and developments.
3. **Creative Inquiry and Discovery:** EALC students will apply their language proficiency, cultural knowledge, and analytical skills to further deepen their understanding of East Asian cultures and societies, contribute to the ever-changing perspectives and ideas about the region, and share what they learn with others through written, spoken, and visual media.

Econometrics & Quantitative Economics, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Econometrics & Quantitative Economics

Econometrics provides students with a quantitative curriculum consisting of economics (specifically in econometrics), statistics, mathematics, and computer science. Students will be trained in advanced data analysis skills to answer economic questions, uncovering relationships while taking all information into account. These skills are very important in the new world of large administrative data sets. The goal is to answer economic questions with the data by, for example, performing market analyses or drafting policy evaluations.

Students with this STEM-designated Bachelor of Science degree will find a variety of career paths available, and will be prepared for a variety of graduate programs. In particular, students trained in econometrics and quantitative economics possess empirical skills for working with large data sets across a variety of sectors including banking and finance, healthcare, and government.

Undergraduate Degree Programs in Economics

- Econometrics & Quantitative Economics, BSLAS (p. 307)
- Economics, BALAS (p. 309)
- Computer Science & Economics, BSLAS (p. 246)

For further information, please visit the Economics undergraduate program page (http://www.economics.illinois.edu/undergrad/info/).

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Econometrics & Quantitative Economics

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 63-65 hours including a minimum of 30 hours of economics courses excluding ECON 199, ECON 220, ECON 398, and ECON 399. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Econometrics & Quantitative Economics

To accomplish the educational objectives and to fulfill accreditation criteria, all economics programs provide the knowledge, experience, and opportunities necessary for students to demonstrate their attainment of the following outcomes:

- Analytical Skills/Problem-Solving: ECON students will effectively visualize, conceptualize, articulate, and solve complex problems or address problems that do not have a clear answer, with available information, through experimentation and observation, using microeconomic and macroeconomic theory, as well as calculus and statistical tools.
- Critical Thinking: ECON students will apply economic analysis to everyday problems helping them to understand events, evaluate specific policy proposals, compare arguments with different conclusions to a specific issue or problem, and assess the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.
- Quantitative Reasoning: ECON students will understand how to apply empirical evidence to economic arguments. Specifically, they may obtain and/or collect relevant data, develop empirical evidence using appropriate statistical techniques, and interpret the results of such analyses.
- Specialized Knowledge and Practical Application: ECON students will develop deeper analytical, critical, and quantitative skills in specialized areas by applying economic concepts to real world situations.
- Interdisciplinary Knowledge, Diverse Issues, and Global Consciousness: ECON students will broaden their global and disciplinary knowledge, enhancing their understanding of the world around them both within economics and beyond.
- Communication and Leadership: ECON students will build skills to work as part of a team and lead others, ensuring they are prepared to navigate diverse audiences and situations.

Economics, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Economics

Students in the Economics major learn about central issues and analytical concepts in economics, including consumer choice, profit-maximization, banking and finance, healthcare, education, fiscal and monetary policy, abstract economic modeling, and data analysis for economics. The major is customizable to students' interests based on the variety of advanced economics electives offered every semester in each of three fields: microeconomics, which explores how people and firms consume and produce goods and services; macroeconomics, which explores countries' economic growth, fiscal and monetary policy, and international trade; and econometrics, which are quantitative methods for analyzing data. This latter field also includes mathematical modeling of economic behavior. Economics graduates can apply these skills in nearly every field, from banking and finance to environmental issues to healthcare, education, and government.

Undergraduate Degree Programs in Economics

Total Hours 15

Total Hours: 120

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Economics

1. **Analytical Skills/Problem-Solving:** ECON students will effectively visualize, conceptualize, articulate, and solve complex problems or address problems that do not have a clear answer, with available information, through experimentation and observation, using microeconomic and macroeconomic theory, as well as calculus and statistical tools.
2. **Critical Thinking:** ECON students will apply economic analysis to everyday problems helping them to understand events, evaluate specific policy proposals, compare arguments with different conclusions to a specific issue or problem, and assess the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.
3. **Quantitative Reasoning:** ECON students will understand how to apply empirical evidence to economic arguments. Specifically, they may obtain and/or collect relevant data, develop empirical evidence using appropriate statistical techniques, and interpret the results of such analyses.
4. **Specialized Knowledge and Practical Application:** ECON students will develop deeper analytical, critical, and quantitative skills in specialized areas by applying economic concepts to real world situations.
5. **Interdisciplinary Knowledge, Diverse Issues, and Global Consciousness:** ECON students will broaden their global and disciplinary knowledge, enhancing their understanding of the world around them both within economics and beyond.

Electrical Engineering, BS

for the degree of Bachelor of Science in Electrical Engineering

Electrical Engineering is a multifaceted discipline that has produced an astounding progression of technological innovations related to energy and information that continues to shape virtually every aspect of modern life. Electrical engineers need a broad and solid foundation in mathematics and physics to support their education in the engineering principles of analysis, synthesis, design, implementation, and testing of the devices and systems that provide the bedrock of modern energy, communication, sensing, computing, medical, security, and defense infrastructures. Within each subdiscipline one can find application domains that strongly rely on hands-on experimental work or that are based on theoretical, mathematical, and computational approaches. The multidisciplinary nature of the electrical engineering education addresses the growing demand for the innovation and design of sensing,

communication, computing, and decision-making systems of increasing complexity in consumer, defense, and medical applications.

The curriculum starts with a core of fundamental courses on circuits, electromagnetics, solid-state electronics, and computer systems, leading to a comprehensive array of specialized courses and laboratories in all the important areas of modern electrical engineering.

Current Program Educational Objectives

for the degree of Bachelor of Science in Electrical Engineering

Graduation Requirements

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0
TGPA is required for ECE courses (except ECE 316). See **Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/)** to clarify requirements.

Minimum Overall GPA: 2.0

Minimum hours required for graduation: 128 hours

General education: Students must complete the Campus General Education requirements including the campus general education language requirement. ECE 445 or combination of ECE 496 & ECE 499 satisfies a technical core requirement and the Campus General Education Advanced Composition requirement.

Orientation and Professional Development

Code	Title	Hours
ENG 100	Grainger Engineering Orientation Seminar (External transfer students take ENG 300 instead.)	1
Total Hours		**1**

Foundational Mathematics and Science

Code	Title	Hours
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I (MATH 220 may be substituted. MATH 220 is appropriate for students with no background in calculus. 4 of 5 credit hours count towards degree.)	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 257	Linear Algebra with Computational Applications	3
or MATH 416	Abstract Linear Algebra	
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
PHYS 214	Univ Physics: Quantum Physics	2
Total Hours		**33**

Electrical Engineering Technical Core

Code	Title	Hours
ECE 110	Introduction to Electronics	3
ECE 120	Introduction to Computing	4
ECE 220	Computer Systems & Programming	4
ECE 210	Analog Signal Processing	4
ECE 313	Probability with Engrg Applic (STAT 410 may be substituted.)	3
ECE 329	Fields and Waves I	3
ECE 340	Semiconductor Electronics	3
ECE 385	Digital Systems Laboratory	3
ECE 445	Senior Design Project Lab (Combination of ECE 496 and ECE 499 may be substituted.)	4
Total Hours		**31**

Technical Electives

Code	Title	Hours
From Departmentally Approved List of Technical Electives (below), to include: at least 6 hours of non-ECE electives, at least 21 hours of ECE electives, at least 3 Advanced Core Electives, at least 3 ECE Labs, where at least one must be a Hardware Lab.		**31**
Non-ECE courses from list below:		**6**
AE 202	Aerospace Flight Mechanics	3
AE 302	Aerospace Flight Mechanics II	3
AE 311	Incompressible Flow	3
AE 312	Compressible Flow	3
AE 321	Mechs of Aerospace Structures	3
AE 352	Aerospace Dynamical Systems	3
AE 353	Aerospace Control Systems	3
AE 402	Orbital Mechanics	3 or 4
AE 403	Spacecraft Attitude Control	3 or 4
AE 410	Computational Aerodynamics	3 or 4
AE 412	Viscous Flow & Heat Transfer	4
AE 416	Applied Aerodynamics	3 or 4
AE 419	Aircraft Flight Mechanics	3 or 4
AE 420	Finite Element Analysis	3 or 4
AE 428	Mechanics of Composites	3
AE 433	Aerospace Propulsion	3 or 4
AE 434	Rocket Propulsion	3 or 4
AE 435	Electric Space Propulsion	3 or 4
AE 451	Aeroelasticity	3 or 4
AE 460	Aerodynamics & Propulsion Lab	2
Ag and Bio Eng. - All 300 and 400 level courses except ABE 440. Except seminars and special topics courses, which may be reviewed in the Advising Office		
ASTR 210	Introduction to Astrophysics	3
ASTR 310	Computing in Astronomy	3
ASTR 330	Extraterrestrial Life	3
ASTR 350	The Big Bang, Black Holes, and the End of the Universe	3
ASTR 404	Stellar Astrophysics	3
ASTR 405	Planetary Systems	3
ASTR 406	Galaxies and the Universe	3

ASTR 414	Astronomical Techniques	4
ATMS 201	General Physical Meteorology	3
ATMS 301	Atmospheric Thermodynamics	3
ATMS 302	Atmospheric Dynamics I	3
ATMS 303	Synoptic-Dynamic Wea Analysis	4
ATMS 304	Radiative Transfer-Remote Sens	3
ATMS 305	Computing and Data Analysis	3
ATMS 404	Risk Analysis in Earth Science	3 or 4
ATMS 405	Boundary Layer Processes	4
ATMS 406	Tropical Meteorology	4
ATMS 410	Radar Remote Sensing	4
ATMS 411	Satellite Remote Sensing	4
ATMS 420	Atmospheric Chemistry	4
ATMS 421	Earth Systems Modeling	4
ATMS 447	Climate Change Assessment	3
ATMS 449	Biogeochemical Cycles	4
BIOC 406	Gene Expression & Regulation	3
BIOC 446	Physical Biochemistry	3
BIOC 455	Technqs Biochem & Biotech	4
BIOE 201	Conservation Principles Bioeng	3
BIOE 202	Cell & Tissue Engineering Lab	2
BIOE 302	Modeling Human Physiology	3
BIOE 414	Biomedical Instrumentation	3
BIOE 415	Biomedical Instrumentation Lab	2
BIOE 461	Cellular Biomechanics	4
BIOE 467	Biophotonics	3
BIOE 476	Tissue Engineering	3
BIOE 480	Magnetic Resonance Imaging	3 or 4
BIOE 485	Computational Mathematics for Machine Learning and Imaging	4
Biophysics (BIOP): All 400 level courses except seminars and special topics courses, which may be reviewed in the Advising Office.		
CHBE 221	Principles of CHE	3
CHBE 321	Thermodynamics	4
CHBE 421	Momentum and Heat Transfer	4
CHBE 422	Mass Transfer Operations	4
CHBE 424	Chemical Reaction Engineering	3
CHBE 430	Unit Operations Laboratory	4
CHBE 431	Process Design	4
CHBE 440	Process Control and Dynamics	3
CHBE 451	Transport Phenomena	3
CHBE 452		
CHBE 453	Electrochemical Engineering	2 or 3
CHBE 456		
CHBE 471	Biochemical Engineering	3 or 4
CHBE 472	Techniques in Biomolecular Eng	3 or 4
CHBE 473	Biomolecular Engineering	3 or 4
CHBE 474	Metabolic Engineering	3 or 4
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
Chemistry (CHEM): All 200, 300 and 400 level except 397, 497, and 499. Exceptions also include seminars and special topics, which may be reviewed in the Advising Office.		
CEE 310	Transportation Engineering	3
CEE 330	Environmental Engineering	3
CEE 408	Railroad Transportation Engrg	3 or 4
CEE 410	Railway Signaling & Control	3 or 4
CEE 416	Traffic Capacity Analysis	3 or 4
CEE 430		
CEE 447	Atmospheric Chemistry	4
CEE 491	Decision and Risk Analysis	3 or 4
CPSC 265	Genetic Engineering Lab	3
CS 101	Intro Computing: Engrg & Sci (By Approval)	3
CS 173	Discrete Structures	3
CS 225	Data Structures	4
CS 242	Programming Studio	3
CS 357	Numerical Methods I	3
CS 410	Text Information Systems	3 or 4
CS 411	Database Systems	3 or 4
CS 412	Introduction to Data Mining	3 or 4
CS 413	Intro to Combinatorics	3 or 4
CS 414	Multimedia Systems	3 or 4
CS 416	Data Visualization	3 or 4
CS 418	Interactive Computer Graphics	3 or 4
CS 419	Production Computer Graphics	3 or 4
CS 420	Parallel Progrmg: Sci & Engrg	3 or 4
CS 421	Programming Languages & Compilers	3 or 4
CS 422	Programming Language Design	3 or 4
CS 423	Operating Systems Design	3 or 4
CS 424	Real-Time Systems	3 or 4
CS 425	Distributed Systems	3 or 4
CS 426	Compiler Construction	3 or 4
CS 427	Software Engineering I	3 or 4
CS 428	Software Engineering II	3 or 4
CS 429	Software Engineering II, ACP	3
CS 431	Embedded Systems	3 or 4
CS 433	Computer System Organization	3 or 4
CS 434	Real World Algorithms for IoT and Data Science	3 or 4
CS 435	Cloud Networking	3 or 4
CS 436	Computer Networking Laboratory	3 or 4
CS 437	Topics in Internet of Things	3 or 4
CS 438	Communication Networks	3 or 4
CS 439	Wireless Networks	3 or 4
CS 440	Artificial Intelligence	3 or 4
CS 441	Applied Machine Learning	3 or 4
CS 444	Deep Learning for Computer Vision	3 or 4
CS 445	Computational Photography	3 or 4
CS 446	Machine Learning	3 or 4
CS 447	Natural Language Processing	3 or 4
CS 450	Numerical Analysis	3 or 4
CS 460	Security Laboratory	3 or 4
CS 461	Computer Security I	4

CS 463	Computer Security II	3 or 4
CS 465	User Interface Design	4
CS 466	Introduction to Bioinformatics	3 or 4
CS 467	Social Visualization	3 or 4
CS 473	Algorithms	4
CS 475	Formal Models of Computation	3 or 4
CS 476	Program Verification	3 or 4
CS 477	Formal Software Development Methods	3 or 4
CS 481	Advanced Topics in Stochastic Processes & Applications	3 or 4
CS 484	Parallel Programming	3 or 4
CS 398	Special Topics (As Approved)	1 to 4
CS 498	Special Topics (As Approved)	1 to 4
ECE 297	Individual Study	1
ECE 304	Photonic Devices	3
ECE 307	Techniques for Engrg Decisions	3
ECE 310	Digital Signal Processing	3
ECE 311	Digital Signal Processing Lab	1
ECE 314	Probability in Engineering Lab	1
ECE 330	Power Ckts & Electromechanics	3
ECE 333	Green Electric Energy	3
ECE 342	Electronic Circuits	3
ECE 343	Electronic Circuits Laboratory	1
ECE 350	Fields and Waves II	3
ECE 365	Data Science and Engineering	3
ECE 374	Introduction to Algorithms & Models of Computation	4
ECE 380	Biomedical Imaging	3
ECE 391	Computer Systems Engineering	4
ECE 395	Advanced Digital Projects Lab	2 or 3
ECE 396	Honors Project	1 to 4
ECE 397	Individual Study in ECE	0 to 4
ECE 402	Electronic Music Synthesis	3
ECE 403	Audio Engineering	3
ECE 407	Cryptography	3 or 4
ECE 408	Applied Parallel Programming	4
ECE 411	Computer Organization & Design	4
ECE 412		3
ECE 414	Biomedical Instrumentation	3
ECE 415	Biomedical Instrumentation Lab	2
ECE 416	Biosensors	3
ECE 417	Multimedia Signal Processing	4
ECE 418	Image & Video Processing	4
ECE 419	Security Laboratory	0 to 4
ECE 420	Embedded DSP Laboratory	2
ECE 422	Computer Security I	4
ECE 424	Computer Security II	3 or 4
ECE 425	Intro to VLSI System Design	3
ECE 428	Distributed Systems	3 or 4
ECE 431	Electric Machinery	4
ECE 432		3
ECE 435	Computer Networking Laboratory	3 or 4
ECE 437	Sensors and Instrumentation	3
ECE 438	Communication Networks	3 or 4
ECE 439	Wireless Networks	3 or 4
ECE 441	Physcs & Modeling Semicond Dev	3
ECE 442	Silicon Photonics	3 or 4
ECE 443	LEDs and Solar Cells	4
ECE 444	IC Device Theory & Fabrication	4
ECE 446	Principles of Experimental Research in Electrical Engineering	4
ECE 447	Active Microwave Ckt Design	3
ECE 448	Artificial Intelligence	3 or 4
ECE 451	Adv Microwave Measurements	3
ECE 452	Electromagnetic Fields	3
ECE 453	Wireless Communication Systems	4
ECE 454	Antennas	3
ECE 455	Optical Electronics	3 or 4
ECE 456	Global Nav Satellite Systems	4
ECE 457	Microwave Devices & Circuits	3
ECE 458	Applic of Radio Wave Propag	3
ECE 459	Communications Systems	3

Select three courses from the following list of Advanced Core ECE electives.		
ECE 391	Computer Systems Engineering	4
or CS 225	Data Structures	
ECE 310	Digital Signal Processing	3
ECE 330	Power Ckts & Electromechanics	3
ECE 342	Electronic Circuits	3
ECE 350	Fields and Waves II	3
Select three courses from the following list of ECE labs. At least one must be a Hardware Lab.		
Hardware Labs:		
ECE 343	Electronic Circuits Laboratory	1
ECE 391	Computer Systems Engineering	4
ECE 395	Advanced Digital Projects Lab	2 or 3
ECE 402	Electronic Music Synthesis	3
ECE 415	Biomedical Instrumentation Lab	2
ECE 420	Embedded DSP Laboratory	2
ECE 431	Electric Machinery	4
CS 436	Computer Networking Laboratory	3 or 4
ECE 437	Sensors and Instrumentation	3
ECE 438	Communication Networks	3 or 4
ECE 439	Wireless Networks	3 or 4
ECE 443	LEDs and Solar Cells	4
ECE 444	IC Device Theory & Fabrication	4
ECE 446	Principles of Experimental Research in Electrical Engineering	4
ECE 447	Active Microwave Ckt Design	3
ECE 451	Adv Microwave Measurements	3
ECE 453	Wireless Communication Systems	4
ECE 456	Global Nav Satellite Systems	4
ECE 460	Optical Imaging	4
ECE 463	Digital Communications Lab	2
ECE 466		1
ECE 468	Optical Remote Sensing	3
ECE 469	Power Electronics Laboratory	2
ECE 470	Introduction to Robotics	4
ECE 481	Nanotechnology	4
ECE 486	Control Systems	4
ECE 489	Robot Dynamics and Control	4
ECE 495	Photonic Device Laboratory	3
Software Labs:		
ECE 311	Digital Signal Processing Lab	1
ECE 314	Probability in Engineering Lab	1
ECE 365	Data Science and Engineering	3
ECE 411	Computer Organization & Design	4
ECE 484	Principles of Safe Autonomy	4

Free Electives

Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		16
Total Hours of Curriculum to Graduate		**128**

For the degree of Bachelor of Science in Electrical Engineering

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. The curriculum sequence can also be viewed via dynamic and static curricular maps (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/ee-map/), which include prerequisite sequencing.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).* ECE 445 or combination of ECE 496 & ECE 499 satisfies a technical core requirement and the Campus General Education Advanced Composition requirement.

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives *(*https://go.grainger.illinois.edu/FreeElectives/*), so that there are at least 128 credit hours earned toward the degree.*

for the degree of Bachelor of Science Major in Electrical Engineering

---

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Electrical Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The Grainger College of Engineering

Elementary Education, BS

for the degree of Bachelor of Science in Elementary Education

The **Elementary Education, BS** prepares teachers for grades one through six. A minimum of 120 semester hours is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C- or better in ALL content and professional education coursework. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (http://www.cote.illinois.edu/). Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

CI 451	Teaching Elementary Science II	3
CI 467	Principles in Teaching Literature to Children and Youth	3
CI 475	Teaching Elementary Reading and Language Arts I	3
CI 476	Teaching Elementary and Middle Grade Language Arts	3
FAA 202	Artsful Teaching through Integ	3
CI 452	Social Studies as Action and Inquiry	3
Total Hours		**120**

TOTAL minimum hours include general education and professional education credits.[5]

[1] *Six hours of ROTC upper level courses (300 level or above) can count toward the degree as free electives.*

[2] *Exclusions apply including, but not limited to: Horticulture, Dance and Urban Planning. Must be a science rubric. Consult with advisers for further information.*

[3] *Across these gen-ed categories, students will need to take courses that include at least four different rubrics from the following: ANTH, ECON, GEOG, GLBL, HIST, PS, PSYC, SOC to meet the ISBE Social Science requirement.*

[4] *ISBE standards require demonstration of proficiency in algebra and statistics. Consult with adviser for further information.*

[5] *The total hours required for the degree may be higher for students who have not already completed the language other than English requirement and/or the ISBE algebra requirement.*

[6] *PYSC 100 is a prerequisite for EPSY 201.*

[7] *Students will register for EDPR 250 during their spring term of the year one professional education sequence year for zero credit hours and register for EDPR 250 again their fall term of the year two professional education sequence for four credit hours.*

for the degree of Bachelor of Science in Elementary Education

1. Students will acquire deep knowledge of content in the field of Education.
2. Students will demonstrate awareness and application of the Illinois Culturally Responsive Teaching and Leading (CRTL) standards in their teacher preparation course work and field experiences.
3. Students will display the expectations of professionalism related to success in the field of education and beyond (fairness, commitment to collaboration, community, reflective practice, and attention to 21st century skills and practices).

Engineering Mechanics, BS

for the degree of Bachelor of Science in Engineering Mechanics

The Engineering Mechanics program at Illinois is a major that focuses on the principles of mechanics that underpin design and engineering in diverse industries including materials, energy, biotechnology, civil, and aerospace to name a few. Students learn rigorous mathematical, scientific, and engineering principles in subject areas such as statics, dynamics, strength of materials, and fluid dynamics. Further, Engineering Mechanics students learn how to apply these basic principles in modern engineering design through laboratory and project work. The program also benefits from a cohesive secondary field which students can tailor to fit their academic and career objectives. Engineering Mechanics is well suited for students with an interest in analysis and design, and physical principles.

Current Program Educational Objectives (https://mechse.illinois.edu/undergraduate/#ABET)

for the degree of Bachelor of Science in Engineering Mechanics

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0
Minimum Technical GPA: 2.0

TGPA is required for required Engineering courses and any technical elective courses. See **Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/)** to clarify requirements.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (p. 2).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3

Secondary Field Option Electives

Code	Title	Hours
Secondary field electives selected from departmentally approved courses for Secondary Field Options. Each secondary field generally specifies two required courses and two additional courses from a list of approved elective courses. For each of the secondary fields, the required and approved elective courses specified for each are listed below. To add flexibility to the program and to accommodate particular interests, the student may fashion an individualized secondary field option. The only requirements are that the courses be related to mechanics, form a coherent and cohesive group, include at least two engineering courses, and total at least 12 hours of advanced-level coursework that are distinct from required courses in the Engineering Mechanics curriculum. This can include 500-level courses, if the student has the adequate preparation, for any of the secondary field elective courses. Each student must formally declare their choice of secondary field with a Mechanical Science and Engineering Undergraduate Programs Office advisor using a Secondary Field Options form.		**12**
Biomechanics		
Required Courses

Engineering Technology & Management for Agricultural Systems, BS

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems

The major in Engineering Technology and Management for Agricultural Systems is designed to prepare students as problem solvers for systems involving the application, management, and/or marketing of engineering technologies. Students are instructed in engineering and business principles in preparation as technically competent business persons for professional careers as entrepreneurs, marketing representatives, or plant managers working with service organizations, manufacturers, corporate farms, retail dealers, power suppliers, contractors, or management companies from production through processing and distribution.

Students pursuing this major select one of four concentrations:

- Agricultural Production & Processing (http://catalog.illinois.edu/undergraduate/eng_aces/engineering-technology-management-agricultural-systems-bs/agricultural-production-processing/)
- Construction Management (http://catalog.illinois.edu/undergraduate/eng_aces/engineering-technology-management-agricultural-systems-bs/construction-management/)
- Digital & Precision Agriculture (http://catalog.illinois.edu/undergraduate/eng_aces/engineering-technology-management-agricultural-systems-bs/digital-precision-agriculture/)
- Energy & the Environment (http://catalog.illinois.edu/undergraduate/eng_aces/engineering-technology-management-agricultural-systems-bs/energy-environment/)

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems

Graduation Requirements
Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems

The Engineering Technology and Management for Agricultural Systems (formerly Technical Systems Management) program is designed to prepare graduates for careers in management, marketing, operations, maintenance, and application of agricultural and biological engineering technologies within the realms of agriculture, food, energy, water, and the environment. Graduates are expected to understand problems and concerns in engineering technologies from production to processing through distribution and their social and cultural implications. Specific program learning objectives are:

- Objective 1: Provide academic and technical knowledge and experiences needed for success in an increasingly technological agricultural industry and world.
- Objective 2: Enhance students' abilities to formulate questions and find solutions both individually and as a part of a team.
- Objective 3: Improve students' abilities to communication both written and oral forms.
- Objective 4: Enhance the use and understanding of mathematics and calculation for analysis in technology and business.
- Objective 5: Provide opportunities to learn and enhance professional and ethical values and leadership skills.
- Objective 6: Understand their role in society and the social and cultural implications of practice in their profession.
- Objective 7: Recognize the need for and develop the abilities to engage in life-long learning.
- Objective 8: Understand the global nature of agriculture and business.

Engineering Technology & Management for Agricultural Systems: Agricultural Production & Processing, BS

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems: Agricultural Production & Processing concentration

Students in the Agricultural Production & Processing concentration learn the technology, machinery, and management of the agricultural production system. Students will gain knowledge and skills in topics including:

1. the agricultural industry from an operational and management perspective;
2. agricultural machinery, grain storage systems, and bioprocessing systems;
3. numerical and scientific processes to drive management decisions; and
4. the science and management of the complete food production system.

Graduates of the Agricultural Production & Processing concentration are prepared for careers in industry with both small and large companies, agricultural retailers and service providers, production farming operations, government and environmental agencies, or for entrance into graduate or professional school.

Engineering Technology & Management for Agricultural Systems: Construction Management, BS

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems: Construction Management concentration

---

Students in the Construction Management concentration are trained in construction skills and concepts, as well as management practices and principles. Students learn to:

1. Manage residential, agricultural, and industrial construction technologies;
2. Operate and manufacture systems that provide the desired environmental conditions for animals, people, crop storage, and greenhouses;

3. Maintain systems to handle and treat biowaste; and
4. Develop alternative housing and nutrient management practices.

Graduates of the Construction Management concentration are prepared for careers with private construction companies, government and environmental agencies, or for entrance into graduate or professional school.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems: Construction Management concentration

1. Provide academic and technical knowledge and experiences needed for success in an increasingly technological agricultural industry and world.
2. Enhance students' abilities to formulate questions and find solutions both individually and as a part of a team.
3. Improve students' abilities to communication both written and oral forms.
4. Enhance the use and understanding of mathematics and calculation for analysis in technology and business.
5. Provide opportunities to learn and enhance professional and ethical values and leadership skills.
6. Understand their role in society and the social and cultural implications of practice in their profession.
7. Recognize the need for and develop the abilities to engage in life-long learning.

Engineering Technology & Management for Agricultural Systems: Digital & Precision Agriculture, BS

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems: Digital & Precision Agriculture concentration

Students in the Digital & Precision Agriculture concentration learn the application of technology in agriculture and the larger system of production agriculture, including machinery, agronomy, and business management. Students will gain an understanding of:

1. The application of advanced technology used in agriculture with an emphasis on geospatial information systems and machinery technology;
2. The functional workings and management of agricultural machinery;
3. Crop and soil science and their interactions with advanced technologies;
4. Numerical and scientific processes to drive agricultural management decisions; and
5. Business operations and management with a focus on the agricultural industry. Graduates of the Digital & Precision Agriculture concentration are prepared for careers in industry with both small and large companies, agricultural retailers and service providers, production farming operations, government and environmental agencies, or for entrance into graduate or professional school.

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems, Digital & Precision Agriculture concentration

Concentration Requirements

Graduation Requirements
Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3

Engineering Technology & Management for Agricultural Systems: Energy & the Environment, BS

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems: Energy & the Environment concentration

Students in the Energy and the Environment concentration focus on renewable energy systems, environmental systems, or both. Students will:

1. gain an understanding of the science behind renewable energy from sunlight wind, geothermal, and biomass sources;
2. perform economic analysts of proposed systems;
3. manage energy systems to blend appropriate sources into reliable , cost-effective, and long-lasting systems; and
4. develop, construct, and operate large-scale, grid-connected renewable energy projects.

Students will also have the ability to utilize GIS and other technologies to develop and manage practices for controlling the transport of agricultural and other non-point sources of pollution in the environment, and to implement systems for sustaining and improving water quality, maintaining ecosystems, managing stormwater, and developing optimal irrigation use and drainage systems. Gradates of the Energy & the Environment concentration are prepared for careers with private consulting firms, government and environmental agencies, both small and large technology companies, or for entrance into graduate or professional school.

Code	Title	Hours
Energy & the Environment Concentration Core		
Introductory-Related Courses		**6-8**
Select two courses from this list:		

ACES 102	Intro Sustainable Food Systems	
CPSC 112	Introduction to Crop Sciences	
ENVS 101	Introduction to Energy Sources	
LEAD 260	Foundations of Leadership	
NRES 102	Introduction to NRES	
NRES 201	Introductory Soils	
ETMA Electives. A minimum of 11 hours at the advanced level are required.		**20**
ETMA 352	Land and Water Mgt Systems	3
ETMA 438	Renewable Energy Applications	3
Select an additional 14 hours from the list below for a total of 20 hours:		
ETMA 130	Basics of CAD	
ETMA 132	Basics of Project Management	
ETMA 232	Materials and Construction Sys	
ETMA 233	Metallurgy & Welding Processes	
ETMA 234	Wiring, Motors and Control Sys	
ETMA 295	Undergrad Research or Thesis	
ETMA 371	Residential Housing Design	
ETMA 372	Environ Control & HVAC Systems	
ETMA 396	UG Honors Research or Thesis	
ETMA 425	Managing Industrial and Agricultural Safety Risks	
ETMA 435	Elec Computer Ctrl Sys	
ETMA 464	Heavy Equipment Powertrains	
ETMA 496	Independent Study	
Concentration Electives		**18**
Select 18 hours from the lists below with a minimum of 12 hours at the advanced level.		
Select one of the following:		
ACE 210	Environmental Economics & Policy	
ACE 310	Natural Resource Economics	
ACE 406	Environmental Law	
ACE 410	Energy Economics and Policy	
ACE 411	Environment and Development	
Select one of the following:		
NRES 219	Applied Ecology	
NRES 370	Environmental Sustainability	
NRES 419	Env and Plant Ecosystems	
NRES 420	Restoration Ecology	
NRES 425	Natural Resources Law & Policy	
NRES 429	Aquatic Ecosystem Conservation	
NRES 438	Soil Nutrient Cycling	
NRES 439	Env and Sustainable Dev	
NRES 471	Pedology	
NRES 474	Soil and Water Conservation	
NRES 477	Introduction to Remote Sensing	
NRES 488	Soil Fertility and Fertilizers	
Select one of the following:		
UP 406	Urban Ecology	
UP 446	Sustainable Planning Seminar	
UP 480	Sustainable Design Principles	
May select from the below list to achieve 18 hours:		
AGCM 330	Environmental Communications	
CEE 320	Construction Engineering	
CEE 330	Environmental Engineering	
CPSC 215	The Prairie and Bioenergy	
CPSC 336	Tomorrow's Environment	
CPSC 415	Bioenergy Crops	
CPSC 416	Native Plants, Pollinators, & Food Ecosystems	
CPSC 431	Plants and Global Change	
CPSC 437	Principles of Agroecology	
ESE 465	Transportation &Sustainability	
ESE 482	Challenges of Sustainability	
GLBL 201	Energy Systems

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

First Year

for the degree of Bachelor of Science in Engineering Technology & Management for Agricultural Systems, Energy & the Environment concentration

The Engineering Technology and Management for Agricultural Systems (formerly Technical Systems Management) program is designed to prepare graduates for careers in management, marketing, operations, maintenance, and application of agricultural and biological engineering technologies within the realms of agriculture, food, energy, water, and the environment. Graduates are expected to understand problems and concerns in engineering technologies from production to processing through distribution and their social and cultural implications. Specific program learning objectives are:

1. Provide academic and technical knowledge and experiences needed for success in an increasingly technological agricultural industry and world.
2. Enhance students' abilities to formulate questions and find solutions both individually and as a part of a team.
3. Improve students' abilities to communication both written and oral forms.
4. Enhance the use and understanding of mathematics and calculation for analysis in technology and business.
5. Provide opportunities to learn and enhance professional and ethical values and leadership skills.
6. Understand their role in society and the social and cultural implications of practice in their profession.
7. Recognize the need for and develop the abilities to engage in life-long learning.
8. Understand the global nature of agriculture and business.

Engineering Undeclared

The Engineering Undeclared program (EU) is designed to support students interested in majors within The Grainger College of Engineering but who are unsure of which major fits their interests and goals. Students will work with specially trained advisors to select coursework based on their interests, coupled with EU specific programming that supports the exploration of majors within the college. Students will have the ability to apply to any major in The Grainger College of Engineering, with the exception of Computer Science.

Engineering Undeclared does not have a defined curriculum map that all students take. Instead, there are specific courses required for students to declare a major. Some majors have additional transfer requirements beyond the core classes specified below

Engineering Undeclared students will formally apply to transfer into a major through the IDT process. Students will be able to apply in the semester they are completing courses required to transfer, as early as their second semester. EU students who need to complete additional required courses may apply to transfer in their third or fourth semesters. All EU students must be declared in a major by the start of their fifth semester at Illinois.

Students in EU who earn at least a 3.0 UIUC GPA and a 3.0 Specialized GPA, in addition to meeting the requirements to remain in good EU standing (see below), are pre-approved for assignment into one of their three majors of interest. While we try to place each student in their first-choice major of interest, it is not guaranteed. Placement depends on the holistic review of a student's application to their majors of interest and major capacity. Major capacity may change from semester to semester and is not publicly available.

To remain in good EU standing, students must maintain at least a 2.5 UIUC GPA and a 2.5 Specialized GPA (all STEM courses), in addition to meeting any GPA/grade requirements that their intended major has, earning at least a B- in Eng 101, making appropriate progress in foundational and technical STEM coursework and meeting with an EU advisor each semester.

Graduation Requirements

Minimum hours required for graduation: Students may not graduate from Engineering Undeclared. Majors students declare in the Grainger College of Engineering require 128 credits to graduate.

Engineering Undeclared students should take coursework to satisfy General Education, Core Requirements, and Major Exploration Coursework. Engineering Undeclared students are not required to complete all requirements listed below prior to declaring a major.

Minimum UIUC and Specialized (STEM Courses) GPA: 2.5

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
fulfilled by CHEM 102 and any other course approved as Natural Sciences & Technology		
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fulfilled by MATH 220 or MATH 221; MATH 231, PHYS 211		
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)		0-15

Major Requirements

Code	Title	Hours
Specific course recommendations will vary depending on the academic preparation, majors of interest, and goals of the student.		
Core Requirements for all Majors		
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 220	Calculus	4-5
or MATH 221	Calculus I	
MATH 231	Calculus II	3
PHYS 211	University Physics: Mechanics	4
ENG 100	Grainger Engineering Orientation Seminar (Not required for students who ICT into EU)	1
ENG 101	Engineering at Illinois	1
Major Exploration Coursework		6-12
Additional requirements for transfer to Bioengineering		
MCB 150	Molecular & Cellular Basis of Life (with grade of B or higher)	4
CHEM 104	General Chemistry II (with grade of B or higher)	3
CHEM 105	General Chemistry Lab II (with grade of B or higher)	1
Additional requirements for transfer to Chemical Engineering		
These requirements are for first year students only. Students in their 3rd semester or beyond will need to go through the normal College of LAS ICT process and requirements for Chemical Engineering.		
Chemistry sequence must be completed with grades of B- or higher.		

Students may substitute CHEM 202, CHEM 203, CHEM 204, and CHEM 205 for CHEM 102, CHEM 103, CHEM 104, and CHEM 105.		
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
Additional requirements for transfer to Electrical Engineering and Computer Engineering		
ECE 110	Introduction to Electronics (with grade of B- or higher)	3
ECE 120	Introduction to Computing (with grade of B- or higher)	4
For students who have completed the above work and are still in the EU Program		
MATH 241	Calculus III	4
MATH 257	Linear Algebra with Computational Applications	3
MATH 285	Intro Differential Equations	3
PHYS 212	University Physics: Elec & Mag	4
Additional Chemistry Core Coursework		0-4
Additional Physics Core Coursework		0-6

The Engineering Undeclared program (EU) provides students with the opportunity to explore major opportunities within The Grainger College of Engineering. Students are able to apply directly to EU as first-time freshmen or, if admitted to another college at Illinois, can apply to transfer via Intercollegiate Transfer to the program in their second and/or third semester at Illinois. External transfers to Illinois are not eligible for EU. Students will work with an Engineering Undeclared advisor to select coursework based on their interests with the purpose of exploring and declaring a major. All EU students must be declared in a major by the beginning of their fifth semester, but are eligible to apply to transfer as early as at the end of their second semester.

The Grainger College of Engineering

English, BALAS

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English

In an age when information is everywhere, the real challenge is knowing what questions to ask—and how to evaluate the answers. The English major develops precisely these capacities. Students learn to cultivate imagination, analyze texts and contexts critically, and understand how meaning shifts depending on perspective and framing. They gain facility with language as a creative and analytical tool, strengthening their ability to craft persuasive arguments and communicate with clarity, nuance, and impact.

Coursework spans eight centuries of literature and media, from novels, poems, and films to video games, digital texts, and emerging genres. Students explore topics as varied as Afrofuturism, lexicography, and linguistic change, while engaging interdisciplinary connections to history, philosophy, music, science, art, law, and technology.

Above all, studying English fosters independence of mind and a strong individual voice. Through sustained practice in reading and writing, students develop interpretive insight, creative and critical thinking, self-awareness, and sensitivity to audience. These skills empower graduates to adapt, innovate, and pursue fulfilling careers across a wide range of fields.

Undergraduate Degree Programs in English

Majors:

- English, BALAS (p. 344) with concentrations:
  - English, English Concentration, BALAS (p. 345)
  - English, English Teaching Concentration, BALAS (p. 347)
  - English, Topics in English Concentration, BALAS (p. 350)
- Creative Writing, BALAS (p. 269)

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English

1. Capacity to understand and interpret multimodal texts by using a variety of methods including close reading, genre theory, and formal and rhetorical analysis.
2. Capacity to understand multimodal texts in a variety of contexts, including cultural, historical, philosophical, and theoretical ones. Ability to understand texts in relation to diachronic processes, including histories of literature, genre, culture, or media.
3. Ability to create clear, focused, rigorous, and well-supported arguments that demonstrate awareness of audience.
4. Ability to develop research questions, to carry out research into primary and secondary sources, and to smoothly integrate these findings into student work, such as presentations and essays.
5. Capacity to understand the ways in which forms of difference (including racial, ethnic, gendered, sexual) inform the production and reception of multimodal texts.

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English, English Concentration

Minimum required major and supporting coursework equates to 39 hours of English department courses. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours), and 6 of these hours must come from two different period areas.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements.

Minimum hours required for graduation: 120 hours.

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in graduating with distinction or high distinction are encouraged to consult the English department advising office.

Concentration Requirements

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: 39 hours of English department courses. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours), and 6 of these hours must come from two different period areas.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by ENGL 350		
Humanities & the Arts (6 hours)		6
fulfilled by ENGL 200 and any other course approved as Humanities & the Arts		
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)		0-20

Major Requirements

Code	Title	Hours
Core Courses		**9**
ENGL 200	Introduction to the Study of Literature and Culture (prerequisite for other English courses; can be taken at the same time as a course that satisfies the Composition I requirement)	
ENGL 301	Introduction to Critical Theory	
ENGL 350	Writing about Literature, Text, and Culture	
Historical Surveys		**6**

Students are encouraged to take these required survey courses as early as possible after completing ENGL 200		
Two courses from the following options:		
ENGL 209	Early British Literature and Culture	
ENGL 255	Early American Literature and Culture	
ENGL 259	Early African American Literature and Culture	
Any ethnic literature survey with a significant pre-1900 focus [1]		
Period Courses (American, British, Anglophone, etc.)		**15**
6 hours: At least two courses that cover at least two of the following categories:		
Medieval Literature & Culture (before 1550)		
Shakespeare		
Early Modern Literature & Culture (1550-1660, other than Shakespeare)		
Eighteenth-Century Literature & Culture (1660-1800)		
3 hours: At least one course in Nineteenth-Century Literature & Culture		
3 hours: At least one course in Twentieth-Century Literature & Culture		
3 hours: At least one course in Contemporary Literature & Culture		
Elective Coursework [1,2]		**9**
At least three courses chosen from those controlled by or cross-listed with the Department of English (Business and Technical Writing, Creative Writing, and English)		
One course in Difference and Diaspora. This requirement can be fulfilled by taking an appropriately focused course from among ENGL 350: Writing about Literature, Text, and Culture; the historical surveys; the period courses; or the elective coursework.		
Total Hours		**39**

1 Chosen from the list maintained in the Department of English. Note: ENGL 350 can serve as a period course, a cluster course, an elective course, and/or a Difference and Diaspora course only when it is not also being used to fulfill a core requirement. Students who wish to use ENGL 350 in this way must thus take the course a second time (and with a different topic than the first time).

2 Student may count one Independent Study course (ENGL 290, ENGL 390 or BTW 290) toward the additional coursework requirement.

  - English, English Concentration, BALAS (p. 345)
  - English, English Teaching Concentration, BALAS (p. 347)
  - English, Topics in English Concentration, BALAS (p. 350)
- Creative Writing, BALAS (p. 269)

for the degree of Bachelors of Arts in Liberal Arts & Sciences: Major in English, English Teaching Concentration

This concentration fulfills state certification requirements to teach high school (grades 9-12) English Language Arts through the AP/honors level.

Minimum required concentration and supporting coursework normally equates to 78 hours: 39 hours of English department courses and 39 hours of courses from the Teacher Education Minor in Secondary School Teaching. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours). Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Time to degree completion varies. Minimum time to completion is eight semesters, with some students requiring ten semesters. Transfer students may need ten total semesters combined to complete the program. Please see the LAS Transfer Handbook for more information.

To remain in good standing in this program and be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0).

Prerequisites to transfer to the English Teaching concentration: Students must complete ENGL 200, the two required historical surveys, and ENGL 301 (Intro to Critical Theory). In addition, it is strongly recommended that students complete five additional ENGL courses (chosen in consultation with an English advisor) appropriate to the English Teaching Concentration.

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

English Teaching Requirements

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: 78 hours: 39 hours of English department courses and 39 hours of courses from the Teacher Education Minor in Secondary School Teaching. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours). Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by ENGL 350 and EDUC 202		
Humanities & the Arts (6 hours)		6
fulfilled by ENGL 200, ENGL 209, ENGL 255, and EDUC 202		
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
fulfilled by EPSY 201 and any other course approved as Social & Behavioral Sciences		
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
fulfilled by EDUC 201		
Cultural Studies: Western/Comparative Cultures (1 course)		3
fulfilled by ENGL 209 and ENGL 255		
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)		0-20

Major Requirements

Code	Title	Hours
Core Courses		**9**
ENGL 200	Introduction to the Study of Literature and Culture (prerequisite for other English courses; can be taken at the same time as a course that satisfies the Composition I requirement)	
ENGL 301	Introduction to Critical Theory	
ENGL 350	Writing about Literature, Text, and Culture	
Historical Surveys		**6**
Students are encouraged to take these required survery courses as early as possible after completing ENGL 200		
ENGL 209	Early British Literature and Culture	
ENGL 255	Early American Literature and Culture	
Period Courses (American, British, Anglophone, etc.) [1]		**15**
3 hours: At least one course in one of the following categories:		
Medieval Literature & Culture (before 1550)		
Early Modern Literature & Culture (1550-1660, other then Shakespeare)		
Eighteenth-Century Literature & Culture (1660-1800)		
3 hours: Shakespeare		
3 hours: At least one course in Nineteenth-Century Literature & Culture		
3 hours: At least one course in Twentieth-Century Literature & Culture		
3 hours: At least one course in Contemporary Literature & Culture		
Language, Composition, & Pedagogy Courses		**9**
ENGL 402	Descriptive English Grammar	
ENGL 481	Composition Theory and Practice	
Select at least one of the following (3 hours):		
ENGL 311	History of the English Language	

ENGL 380	Topics in Writing Studies	
ENGL 482	Writing Technologies	
BTW 490	Special Topics Prof Writing	
One course in Difference & Diaspora. This requirement can be fulfilled by taking an appropriately focused course from among ENGL 350, the historical surveys, or the period courses. [1]		
Teacher Education Minor in Secondary School Teaching (p. 1028)		**39**
Total Hours		**78**

[1] Chosen from the list maintained in the Department of English. Note: ENGL 350 can serve as a period course, a cluster course, an elective course, and/or a Difference and Diaspora course only when it is not also being used to fulfill a core requirement. Students who wish to use ENGL 350 in this way must thus take the course a second time (and with a different topic than the first time).

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English, English Teaching Concentration

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English, English Teaching Concentration

1. Capacity to understand and interpret multimodal texts by using a variety of methods including close reading, genre theory, and formal and rhetorical analysis.
2. Capacity to understand multimodal texts in a variety of contexts, including cultural, historical, philosophical, and theoretical ones. Ability to understand texts in relation to diachronic processes, including histories of literature, genre, culture, or media.
3. Ability to create clear, focused, rigorous, and well-supported arguments that demonstrate awareness of audience.
4. Ability to develop research questions, to carry out research into primary and secondary sources, and to smoothly integrate these findings into student work, such as presentations and essays.
5. Capacity to understand the ways in which forms of difference (including racial, ethnic, gendered, sexual) inform the production and reception of multimodal texts.

English: Topics in English, BALAS

for the degree of Bachelors of Arts in Liberal Arts & Sciences Major in English, Topics in English Concentration

In an age when information is everywhere, the real challenge is knowing what questions to ask—and how to evaluate the answers. The English major develops precisely these capacities. Students learn to cultivate imagination, analyze texts and contexts critically, and understand how meaning shifts depending on perspective and framing. They gain facility with language as a creative and analytical tool, strengthening their ability to craft persuasive arguments and communicate with clarity, nuance, and impact.

Coursework spans eight centuries of literature and media, from novels, poems, and films to video games, digital texts, and emerging genres. Students explore topics as varied as Afrofuturism, lexicography, and linguistic change, while engaging interdisciplinary connections to history, philosophy, music, science, art, law, and technology.

Above all, studying English fosters independence of mind and a strong individual voice. Through sustained practice in reading and writing, students develop interpretive insight, creative and critical thinking, self-awareness, and sensitivity to audience. These skills empower graduates to adapt, innovate, and pursue fulfilling careers across a wide range of fields.

Undergraduate Degree Programs in English

Majors:

- English, BALAS (p. 344) with concentrations:
  - English, English Concentration, BALAS (p. 345)
  - English, English Teaching Concentration, BALAS (p. 347)
  - English, Topics in English Concentration, BALAS (p. 350)
- Creative Writing, BALAS (p. 269)

for the degree of Bachelors of Arts in Liberal Arts & Sciences: Major in English, Topics in English Concentration

Minimum required major and supporting coursework equates to 39 hours of English department courses. Students must complete at least 15 hours of coursework at the 300-level or above (ENGL 301, ENGL 350, and 9 more hours) and 9 of these hours (including the capstone) must be taken in the student's chosen field.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements.

Minimum hours required for graduation: 120 hours

For this concentration, students will complete 12 hours of coursework (4 courses) in one of three cluster areas: Literature and Science, Media Cultures, or Race, Indigeneity, Gender, and Sexuality. These 12 hours will be selected from an approved list of courses for this category maintained by the English department. Students can access these lists and a further description of each cluster on the Department of English website (https://english.illinois.edu/academics/undergraduate-studies/majors-minors/).

Departmental Distinction: Students interested in graduating with distinction or high distinction are encouraged to consult the departmental honors adviser. In addition, students interested in the departmental honors program should contact the English department advising office.

Environmental Engineering, BS

for the degree of Bachelor of Science in Environmental Engineering

Environmental engineers apply basic principles of science, supported by mathematical and computational tools, to address an important issue facing society: ensuring clean air, safe drinking water, and sanitation; evaluating opportunities and designing systems for sustainable environmental resource management; designing infrastructure and developing technologies to enable climate change mitigation and adaptation; protecting people from natural and man-made hazards; and designing sustainable infrastructure that benefits society.

The environmental engineering program comprises five focus areas (Public Health Engineering; One Water; Energy and Environmental Sustainability; Climate and Environmental Sustainability; and Water Systems and Sustainability). Although each area and program has its own special body of knowledge and engineering tools, environmental engineering projects often use knowledge and data from many of these topical areas together in order to address societal challenges. Brief descriptions of each focus area are provided below:

Public Health Engineering (PHE). Students in the PHE primary will gain skills in monitoring and modeling air pollution, air quality management, air, and water pollution control technologies, and physicochemical and toxicological analysis of environmental contaminants. Students will also learn the skills to analyze and evaluate the interconnections between environmental factors and the progression of human diseases through various designs of epidemiological studies and apply the principles of engineering control for the protection of public health.

One Water (OneW). The OneW primary centers on the safe and reliable provision of drinking water, sanitation, and stormwater management for communities and households. Students in this primary will learn physical, chemical, and biological principles and how to apply them to design and develop innovative water quality control processes and systems. Students will also learn how to design resource (water, nutrient, energy) recovery systems to support circular economies. The term “One Water” stems from an international trend toward holistic water planning by municipalities (e.g., “One Water LA” for the City of Los Angeles).

Energy and Environmental Sustainability (E2S). The E2S primary focuses on understanding, quantifying, and modeling the interdependencies between energy, water, and the environment. Students will gain fundamental and applied knowledge in thermodynamics and chemical principles, and expertise in water policy, renewable energy systems, and sustainable design.

Climate and Environmental Sustainability (CES). CES students will develop skills to quantify and manage the dynamic interactions among society and the built and natural environments, with an emphasis on environmental and water resources engineering to adapt to a changing global climate. Coursework will focus on atmospheric sciences (including physical climate and physical meteorology), natural resource economics, environmental systems analyses, decision and risk analysis, and data science to generate insight from large and complex datasets.

Water Systems and Sustainability (WS2). The WS2 primary focuses on understanding, designing, and managing natural and engineered water systems. Students learn foundational knowledge of environmental hydrology and hydraulic engineering, and gain skills to develop sustainable solutions to urban water challenges such as flooding, to manage surface water and groundwater transport and pollution, and to design novel nature-based solutions and green and hybrid infrastructure to overcome the challenges imposed by a changing environment.

Across all focus areas, CEE’s Program Education Objectives are to educate EnvE students to:

1. a wide range of careers as engineers, consultants, and entrepreneurs in both traditional and emerging fields of civil and environmental engineering, science, and technology;
2. placement in leading graduate programs in engineering and interdisciplinary areas so they are able to develop as researchers, experts, educators, and leaders;
3. professional licensure and continuous professional skills development;
4. the ability to learn and create new knowledge in ever-changing environments of the 21st century and to communicate their work and ideas to colleagues, professional societies, and the public at large; and
5. high ethical and technical standards that enable them to lead their professional disciplines, organizations, and communities globally.

Program Review and Approval

To qualify for the degree of Bachelor of Science in Environmental Engineering, each student's academic program plan must be reviewed by a standing committee of the faculty (the Program Review Committee) and approved by the Associate Head of Civil and Environmental Engineering in charge of undergraduate programs. This review and approval process ensures that individual programs satisfy the educational objectives and all of the requirements of the environmental engineering program, that those programs do not abuse the substantial degree of flexibility that is present in the curriculum, and that the career interests of each student are cultivated and served.

for the degree of Bachelor of Science in Environmental Engineering

Educational objectives for the environmental engineering program reflect the mission of the Department of Civil and Environmental Engineering, the importance placed on successful professional practice, the ability to pursue advanced degrees, the assumption of professional and societal leadership roles, and a commitment to lifelong learning. Illinois B.S. in Environmental Engineering graduates will:

1. Successfully enter the environmental engineering profession as practicing engineers and consultants with prominent companies and organizations in diverse areas that include public health engineering, one water, energy and environmental sustainability, climate and environmental sustainability, and water systems and sustainability.
2. Pursue graduate education and research at major research universities in environmental engineering and related fields.
3. Pursue professional licensure.
4. Advance to leadership positions in their profession.
5. Engage in continued learning through professional development.
6. Participate in and contribute to professional societies and community service.

Undergraduate Admissions | Civil & Environmental Engineering | Illinois (https://cee.illinois.edu/admissions/undergraduate/)

The Grainger College of Engineering Admissions (https://grainger.illinois.edu/admissions/)
The Grainger College of Engineering (https://grainger.illinois.edu/)

Finance, BS

for the degree of Bachelor of Science Major in Finance

The field of finance is primarily concerned with the acquisition and management of funds by business firms, governments, and individuals. A business seeks financial advice when considering the purchase of new equipment, the expansion of present facilities, or the raising of additional funds. Determining the value of financial and real assets and derivatives is a key activity in finance.

As the study of finance is designed to provide the student with both the theoretical background and the analytical tools required to make effective judgments in finance, many students select careers in business financial management, commercial and investment banking, investments, government finance, insurance, and real estate. In addition to the finance major requirements, students in finance must meet the University General Education requirements and the Gies College of Business core requirements (for more detail, see the Gies College of Business undergraduate section (https://giesbusiness.illinois.edu/undergraduate-hub/majors-and-minors/finance/)).

for the degree of Bachelor of Science Major in Finance

Advising Notes

- Courses taken to fulfill major requirements may not be taken on a credit-no credit basis.
- It is recommended that Finance majors take additional accounting. ACCY 201 and ACCY 202 are required in the business core. Many employers look favorably upon additional accounting courses.

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 8 hours of Kinesiology activity courses, numbered 100-111 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

There is no limit on the hours of Military Science/ROTC courses that will count towards graduation.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

University Composition Requirements

for the degree of Bachelor of Science Major in Finance

1. Discipline-based competency: Students will acquire sufficient discipline based competency to address current and future corporate and investment finance problems. Such competency includes using finance knowledge and tools necessary to value real and financial assets, analyze a company's financial performance, and identify risk factors underlying such valuations or analysis.
2. Written and verbal communication competency: Students will be able to effectively integrate information into a coherent, well-organized, professional report.
3. Proficiency in the tools of the trade: Students should be able to demonstrate proficiency in the tools of the trade. First and foremost is Excel, but proficiency in Bloomberg, Morningstar, Capital IQ and the other tools of our trade.
4. Professional practice and ethics: Students should be familiar with professional practice and demonstrate consistent ethical behavior.

Finance + Data Science, BS

for the degree of Bachelor of Science Major in Finance plus Data Science

This major is sponsored by the Finance Department in the Gies College of Business, in collaboration with the Departments of Statistics, Computer Science, iSchool, and Mathematics. The FIN + Data Science major is

designed for students who desire to supplement their finance foundation with a strong background in data science. The major prepares students for professional or graduate work in all Finance fields, but particularly those focused on analytics.

Meaningful Research or Discovery Experience

Code	Title	Hours
	One of the most important skills a student will gain in the FIN + DS degree will be the ability to present data in meaningful ways. A meaningful research and experience is as much a pillar of this degree program as both the core coursework and the area of specialization. This capstone experience can be fulfilled through BUS 301. This course is an active learning, real-client experience that will allow students to join their data science skills with their business skills.

for the degree of Bachelor of Science Major in Finance plus Data Science

Learning objectives and assessment for success in this program will be handled following our current process for all undergraduate Finance students. Success in the advanced classes requires success in prerequisites. We carefully monitor student progress through the initial years of the major in the advising process, giving mentoring where necessary.

for the degree of Bachelor of Science in Food Science

All graduates of the Illinois Food Science Major will achieve the following:

Graduates are A) competent in core food science areas and B) can integrate and apply their knowledge to solve real-world problems and make decisions. Core Food Science Areas include Food Chemistry and Analysis, Food Safety and Microbiology, Food Processing and Engineering, and Sensory Science. Associated Areas include Nutrition and Health, Quality Assurance, and Food Laws and Regulations.

- Graduates possess strong critical thinking and problem-solving skills.
- Graduates are proficient communicators.
- Graduates possess impactful professional and leadership skills.
- Graduates possess aspirational goals.

Graduates of our Food Science program:

1. value diversity
2. are confident in their abilities
3. volunteer their services to their professional and societal communities, and
4. take professional and ethical responsibility for their actions.

Foreign Language Teaching

Curricula Preparatory to Teach Foreign Languages

- **Prerequisite to application to the Teaching program:** GPA of 2.5 in all foreign language content courses in the major.
- To remain in good standing in this program and be recommended for licensure, candidates are required to maintain a cumulative grade-point average of 2.5 (A = 4.0).
- Illinois law requires World Language licensure candidates to pass the relevant language content-area test and score at least *Intermediate High* on an oral proficiency test in their content major language before licensure.
- **Departmental distinction:** To be eligible for departmental distinction, a student must have a minimum grade point average of 3.0, display exceptional teaching ability, and complete an approved project or series of projects. Consult the Spanish departmental advisor for details.

- **General education:** Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.
- **Minimum required major and supporting course work:** Minimum required course work normally equates to 33-36 hours in Teaching Area of Concentration and 33 hours of professional education courses.

Code	Title	Hours

French, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Science in French

A French major is an excellent way for students to prepare for the global market ahead. Whether you love literature, cultural studies, linguistic analysis, or just simply appreciate studying another language, this major prepares students to read, write, think and speak critically at a moment when global employers are looking for said traits. The Department of French and Italian is excited to offer students majoring in French the promise of advanced linguistic and cultural competency in French.

for the degree of Bachelor of Arts in Liberal Arts and Science Major in French

Upon graduating with a major in French, students shall be able to do the following:

1. **Language proficiency and accuracy:** reach an advanced level of proficiency and accuracy in reading, writing, listening, and speaking in interpretive, presentational, and interpersonal modes of communication(based on proficiency guidelines outlined by the American Council on the Teaching of Foreign Languages [ACTFL]and the Common European Framework of Reference for Languages [CEFRL]).
2. **Research skills and literacy in texts, media, and technology in French:** access, manage, evaluate, select, and effectively use culturally authentic and relevant sources according to the standards of professional conduct; understand how these resources relate to language and culture; use appropriate tools when interpreting sources, interacting with others, and producing written, oral, or visual content.
3. **Intercultural awareness, knowledge, and competence:** identify and analyze products, practices, and perspectives of the French and Francophone world, and compare them to their own and other cultures.
4. **Knowledge about literature and the visual arts in French**: acquire general and specific knowledge of literature in French and visual arts from a formal, historical, and global perspective.
5. **Knowledge about French linguistics:** acquire general knowledge about the structure and history of the French language.

French: French Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in French, French Studies Concentration

The French Studies concentration is a wonderful way for students to achieve a well-rounded education regarding literature, culture, language. Our courses are diverse but grounded in a tradition that allows students to feel they are studying contemporary topics but also canonic issues.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in French, French Studies Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Please see your adviser.

Departmental distinction: A student must have at least a 3.45 LAS cumulative grade point average, complete a senior thesis FR 492 , and complete two additional advanced-level courses in French or in supporting course work. Consult the honors adviser for details.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 41 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (p. 2).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Arts in Liberal Arts and Sciences in French, French Studies Concentration

1. Language proficiency and accuracy: reach proficiency and accuracy in written and oral comprehension and production of French (based on proficiency guidelines outlined by the American Council on the Teaching of Foreign Languages [ACTFL] and the Common European Framework of Reference for Languages [CEFRL]).
2. Research skills and literacy in text, media, and technology in Italian: access, manage, evaluate, and effectively use culturally relevant sources according to the standards of professional conduct; understand how these resources relate to language and culture; use appropriate tools when interpreting sources, interacting with others, and producing written, oral, or visual content; develop sensitivity to the changes in cultures and languages produced by emerging technologies.
3. Intercultural awareness, knowledge, and competence: develop an awareness of differences between those of the entire French-speaking world and their own cultures. Identify implicit assumptions present in French linguistic practices of all communities, and relate them to their own cultural conventions. Learn how to identify the cultural component of everyday practices, like geography, food, body language, and recognize difference as culturally specific.
4. Proficiency in French Literature and Culture: acquire familiarity with literature and culture of the French speaking world, their history and their contexts, as well as the critical tools used in their analysis.
5. Competence in French linguistics: acquire competence in the structure, sounds, and history of the French language and the people who speak it.

Gender & Women's Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Gender & Women's Studies

As a Gender and Women's Studies major, students will receive a rigorously interdisciplinary education in the formation of gender *in* our philosophical, political, aesthetic, economic, social, and scientific worlds, and on gender as foundation *for* those worlds. Since gender is everywhere, acknowledged or not, GWS majors will be well-equipped to illustrate and investigate gender and other relations of power, such as sexuality, race, indigeneity, class, nationality, religion, and ability, as these form and inform discourses and practices in historical and contemporary arrangements.

GWS majors receive in-depth training in written and other forms of communication as well as skills in critical thinking, analytical research, and creative inquiry. GWS courses draw upon history, philosophy, sociology, and literary criticism, among other disciplines, so that our majors learn to identify limitations and expand possibilities for how to study and speak about knowledges, communities, institutions, populations, movements, and cultures in our world.

The courses and training GWS offers are transformative; and our students go on to transform themselves, others, and the world. While GWS majors are well prepared for advanced study in graduate or professional schools, they also bring their education to activities in media production, art-making, social work, public policy, victim advocacy, union organizing, community/sexual health services, counseling, public relations, and fields advocating civil rights and social justice.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Gender & Women's Studies

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction:

To be eligible for graduation with distinction, a student must have a cumulative grade-point average (GPA) of 3.5 and a 3.5 GPA within the major.

High distinction:

To be eligible for graduation with high distinction, a student must have a cumulative grade point average (GPA) of 3.5, a GPA of 3.7 within the major, and complete a thesis or project in a 400-level GWS course that is approved by the department.

Advising:

The Department of Gender and Women's Studies provides advising for students to help plan a coherent program of study.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 33 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Gender & Women's Studies

1. **Intellectual Reasoning and Knowledge:** Students will acquire a level of proficiency in Gender and Women's Studies, which can include but is not limited to broad and deep knowledge about feminist movements, intersectionality, queer and trans studies, imperialism and coloniality, and feminist and queer theories and methods across academic disciplines and fields. Students will learn that feminisms are both historical movements as well as bodies of critical inquiry, encompassing a wide range of actors and objects of study, including forms of information retrieval and knowledge production.
2. **Critical Inquiry and Creative Literacy:** Students will apply feminist and queer theories in developing their own capacities for critical inquiry and creative literacy. Students will also exercise their skills in oral and written communication, expressing new ideas in scholarly compositions and also generating multidisciplinary projects.
3. **Social Awareness and Understanding Power:** Students will recognize the gendered dimensions of social, philosophical, aesthetic, cultural, and political claims about national and global movements and events. Students will become familiar with feminist and queer theories and movements that consider together indigeneity, race, religion, nation, disability, gender, and sexuality to understand historical and contemporary formations of power.
4. **Self-Reflexivity and Community Engagement:** Students will demonstrate self-reflexivity about their ideas and social and political positions in their classrooms and communities, learning how to build and sustain relationships in striving for both immediate harm reduction and long-term social justice.
5. **Global Consciousness:** Students will understand how complex and interdependent forces –environmental, social, cultural, economic, and political— shape a range of possibilities and foreclosures for individuals and populations unevenly across the world, learning to apply indigenous, postcolonial, and transnational feminist and queer critiques to those forces.

Admissions
Liberal Arts & Sciences Admissions & Requirements (http://catalog.illinois.edu/schools/las/academic-units/)
University of Illinois Undergrad Admissions (https://www.admissions.illinois.edu/)

Students interested in majoring in Geography and Geographic Information Science may choose the Bachelor of Arts in Liberal Arts & Sciences (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-balas/), or the Bachelor of Science in Liberal Arts & Sciences (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/).

Students pursuing the Bachelor of Arts in Liberal Arts & Sciences select one of two concentrations:

General Geography Concentration (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-balas/general-geography/)

Geography majors integrate social science, physical science, and technology in their study of how humans use the Earth's surface. Majors in Geography & GIS can sample courses from different subfields of geography without having to choose one specialty of the discipline. Upon completion, the students are prepared for diverse employment opportunities, or further studies in a geography graduate program.

Human Geography Concentration (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-balas/human-geography/)

The Human Geography concentration allows students to specialize in the social science aspect of modern geography. The curriculum includes the systematic study of human social organization and its environmental consequences. Employment opportunities for human geographers

include urban and regional planning, transportation, marketing, real estate, tourism, and international business.

Students pursuing the Bachelor of Science in Liberal Arts & Sciences select one of two concentrations:

Geographic Information Science Concentration (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/geographic-information-science/)

The Geographic Information Science (GIS) concentration emphasizes the creation, use and analysis of digital geographic information to examine economic, environmental, physical and social phenomena. The GIS concentration provides students with in-depth training in contemporary software packages to prepare them for careers in the field. There is growing demand for professional knowledge of the earth's systems and the use of geographic information systems to enhance business, protect the environment and manage the massive amounts of spatial data now widely available on the internet. The U.S. Department of Labor has identified geospatial technologies as one of the fastest-growing domestic job sectors.

Physical Geography Concentration (http://catalog.illinois.edu/undergraduate/las/geography-geographic-information-science-bslas/physical-geography/)

The Physical Geography concentration examines the earth sciences including patterns of climates, land-forms, vegetation, soils, and water. Graduates of our physical geography concentration will be equipped for careers in infrastructure development, land and water resources management, and surveying.

Geography & Geographic Information Science, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Geography & Geographic Information Science

A Bachelor of Arts in Geography & Geographic Information Science prepares students to explore the social science aspect of modern geography. Curriculum includes the systematic study of human social organization and its environmental consequences.

Employment opportunities for human geographers include urban and regional planning, transportation, marketing, real estate, tourism, and international business.

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Geography & Geographic Information Science

Graduation Requirements

Minimum hours required for graduation: 120 hours
Minimum required major and supporting course work: A minimum of 35 credit hours of Geography & Geographic Information Science courses. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree, including courses outside of GGIS. Students should consult their academic advisor for additional guidance in fulfilling this requirement. The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Geographic Understanding

GGIS students will understand the interconnectedness of places and scales in human-environmental systems, including the sustainability of those systems.

Spatial Patterns and Processes

GGIS students will be able to analyze spatial patterns, distributions, processes, and connections within and among different human-environmental systems, using qualitative, quantitative, computational, and/or spatial methods of research appropriate to their level of training and their field of geographic inquiry.

Problem-Solving and Communication

GGIS students will be able to formulate and conduct geographic analyses and communicate the results in verbal, written, and visual form.

Minimum required major and supporting course work: A minimum of 35 credit hours of Geography & Geographic Information Science courses. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree, including courses outside of GGIS. Students should consult their academic advisor for additional guidance in fulfilling this requirement. The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed

requirements may be met by courses required and/or electives in the program.

Course choice must be different than Core requirements chosen in the major		

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Geography & Geographic Information Science, General Geography Concentration

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Geography & Geographic Information Science, General Geography Concentration

For the Degree of Bachelor of Science in Liberal Arts and Sciences

- Major in Computer Science & Geography & GIS, BSLAS (p. 256)
- Major in Geography & Geographic Information Science, Geographic Information Science Concentration, BSLAS (p. 382)
- Major in Geography & Geographic Information Science, Physical Geography Concentration, BSLAS (p. 385)

For the Degree of Bachelor of Arts in Liberal Arts and Sciences

- Major in Geography & Geographic Information Science, General Geography Concentration, BALAS (p. 373)
- Major in Geography & Geographic Information Science, Human Geography Concentration, BALAS (p. 376)

for the degree of Bachelor of Arts in Liberal Arts & Sciencesin Geography & Geographic Information Science, General Geography Concentration

Geographic Understanding

GGIS students will understand the interconnectedness of places and scales in human-environmental systems, including the sustainability of those systems.

Spatial Patterns and Processes

GGIS students will be able to analyze spatial patterns, distributions, processes, and connections within and among different human-environmental systems, using qualitative, quantitative, computational, and/or spatial methods of research appropriate to their level of training and their field of geographic inquiry.

Problem-Solving and Communication

GGIS students will be able to formulate and conduct geographic analyses and communicate the results in verbal, written, and visual form.

Geography & Geographic Information Science: Human Geography, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Geography & Geographic Information Science, Human Geography Concentration

A Bachelor of Arts in Geography & Geographic Information Science, with the Human Geography concentration, prepares students to explore the social science aspect of modern geography. The curriculum includes the systematic study of human social organization and its environmental consequences.

Employment opportunities for human geographers include urban and regional planning, transportation, marketing, real estate, tourism, and international business.

Departmental distinction: Students majoring in Geography & Geographic Information Science (GGIS) can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- Distinction: 3.3 GPA overall; 3.3 GPA in GGIS courses.
- High distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses.
- Highest distinction: 3.3 GPA overall; 3.75 GPA in GGIS courses; satisfactorily complete an honors independent project (GGIS 391).

Please visit our department website (https://ggis.illinois.edu/academics/undergraduate-programs/distinction-and-departmental-awards/) for more distinction information and consult with a GGIS advisor about it as soon as you join the major (no later than the end of junior year).

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Geography & Geographic Information Science, Human Geography Concentration

Graduation Requirements

Minimum hours required for graduation: 120 hours
Minimum required major and supporting coursework: A minimum of 35 credit hours of Geography & Geographic Information Science courses.

Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree, including courses outside of GGIS. Students should consult their academic advisor for additional guidance in fulfilling this requirement. The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Geography & Geographic Information Science: Geographic Information Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geography & Geographic Information Science, Geographic Information Science Concentration

A Bachelor of Science in Geography & Geographic Information Science with Geographic Information Science concentration prepares students to use cutting-edge geospatial technologies and data to examine environmental and social issues; support business decisions; protect the environment; and manage the massive amounts of spatial data generated from mobile devices and sensor networks. The GIS concentration provides in-depth practical and field training, preparing students for geospatial careers- one of the fastest-growing domestic job sectors.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment

programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geography & Geographic Information Science, Geographic Information Science Concentration

Geographic Understanding

GGIS students will understand the interconnectedness of places and scales in human-environmental systems, including the sustainability of those systems.

Spatial Patterns and Processes

GGIS students will be able to analyze spatial patterns, distributions, processes, and connections within and among different human-environmental systems, using qualitative, quantitative, computational, and/or spatial methods of research appropriate to their level of training and their field of geographic inquiry.

Problem-Solving and Communication

GGIS students will be able to formulate and conduct geographic analyses and communicate the results in verbal, written, and visual form.

Geography & Geographic Information Science: Physical Geography, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geography & Geographic Information Science, Physical Geography Concentration

A Bachelor of Science in Geography & Geographic Information Science with the Physical Geography concentration will prepare students to examine the environmental sciences including patterns of climate, landforms, vegetation, soils, and water.

Graduates will be equipped for careers in environmental science and consulting, land and water resource management, and remote sensing using satellite data and UAVs (drones).

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geography & Geographic Information Science, Physical Geography Concentration

Graduation Requirements

Minimum hours required for graduation: 120 hours
Minimum required major and supporting coursework: A minimum of 35 credit hours of Geography & Geographic Information Science courses. Twelve (12) hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree, including courses outside of GGIS. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (p. 2).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

University of Illinois Undergrad Admissions (https://www.admissions.illinois.edu/)

Students interested in majoring in geology may choose the Specialized Curriculum in Geology (http://catalog.illinois.edu/undergraduate/las/geology-bs/#degreerequirementstext), leading to the Bachelor of Science Major in Geology, or the Geology Major (http://catalog.illinois.edu/undergraduate/las/geology-bslas/#degreerequirementstext), leading to the Bachelor of Science in Liberal Arts and Sciences.

The Specialized Curriculum in Geology is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor's degree. It consists of geology, geophysics, and environmental geology areas, and offers more training in geology and related science than is required of students who make geology their major in the Sciences and Letters Curriculum.

The Geology Major in the Science and Letters Curriculum is designed for students who want a more flexible course of study than is provided by the Specialized Curriculum in Geology and Geophysics. It may be used by those wishing to obtain a more liberal education and/or background in geology for use in fields such as anthropology, business, mineral economics, regional planning, journalism, law, sales, or library and information science. It is not intended to prepare a student for graduate work in the geological sciences unless the student selects additional courses in mathematics, chemistry, and physics comparable to those required in the Specialized Curriculum in Geology.

Geology, BS

for the degree of Bachelor of Science Major in Geology (Specialized Curriculum)

The **Specialized Curriculum in Geology (BS)** is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor's degree. It consists of geology, geophysics, and environmental geology areas, and offers more training in geology and related science than is required of students who make geology their major in the Sciences and Letters Curriculum. Students must choose one of the following: Geology, Geophysics, or Environmental Geology.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 398)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 400)
- Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 402)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

- Major in Geology (Specialized Curriculum) (p. 389)
- Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 394)
- Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 392)

for the degree of Bachelor of Science Major in Geology (Specialized Curriculum)

Specialized Curriculum

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

Departmental Distinction:

Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

Distinction:

A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone.

High Distinction:

A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone.

Highest Distinction:

A minimum cumulative grade point average of 3.7, and also completed an approved senior thesis or approved research capstone.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum hours required for graduation: 126 hours.

Code	Title	Hours
Chemistry: Select one group of courses:		**8-9**
CHEM 102	General Chemistry I	
CHEM 103	General Chemistry Lab I	
CHEM 104	General Chemistry II	
CHEM 105	General Chemistry Lab II	
or		
CHEM 202	Accelerated Chemistry I	
CHEM 203	Accelerated Chemistry Lab I	
CHEM 204	Accelerated Chemistry II	
CHEM 205	Accelerated Chemistry Lab II	
(45 hours of Geology Courses: Students transferring into the geology concentration from another science or engineering program may substitute up to 8 hours of 300-or 400-level science or engineering credits for 8 hours of 300-or 400-level geology courses with departmental approval.)		
GEOL 107	Physical Geology (Students who decide to follow the curriculum after first taking GEOL 100 should enroll in GEOL 208. GEOL 100 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.)	4

for the degree of Bachelor of Science Major in Geology (Specialized Curriculum)

1. Students will develop cross-disciplinary skills of observation, data collection, and spatial display of data (e.g., map making) related to geological materials, features, and processes.
2. Students will develop an understanding of the physical, chemical and mathematical theories fundamental to earth processes through rigorous coursework and research.
3. Students will develop and apply critical thinking skills to synthesize principles learned in the classroom, and data collected in the laboratory and in the field in order to evaluate hypotheses and solve geological problems.
4. Students will demonstrate the ability to communicate effectively scientific data, interpretations, and hypotheses through written and oral methods.
5. Students will hone and apply interpersonal skills in a professional setting through group work, research activities, and field studies.

The Department of Geology will supply upon request a Guide for Geology Undergraduates giving more information about the curriculum.

Departmental Distinction: Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- **Distinction**: A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone
- **High Distinction**: A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone
- **Highest Distinction**: A minimum cumulative grade point average of 3.7, and also completed an approved senior thesis or approved research capstone

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum hours required for graduation: 126 hours.

Code	Title	Hours
Chemistry: Select one group of courses:		**8-9**
CHEM 102	General Chemistry I	
CHEM 103	General Chemistry Lab I	
CHEM 104	General Chemistry II	
CHEM 105	General Chemistry Lab II	
or		
CHEM 202	Accelerated Chemistry I	
CHEM 203	Accelerated Chemistry Lab I	
CHEM 204	Accelerated Chemistry II	
CHEM 205	Accelerated Chemistry Lab II	
22 hours of Geology Courses		
GEOL 107	Physical Geology (Students who decide to follow the curriculum after first taking GEOL 100 should enroll in GEOL 208. GEOL 100 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.)	4
GEOL 208	History of the Earth System	4
GEOL 452	Introduction to Geophysics	4
10 additional hours of 300 or 400 level geology courses		10
Mathematics		**16-18**
MATH 220	Calculus	
or MATH 221	Calculus I	
MATH 231	Calculus II	
MATH 241	Calculus III	
MATH 225	Introductory Matrix Theory	
or MATH 415	Applied Linear Algebra	
MATH 285	Intro Differential Equations	
Physics		**15-17**
PHYS 211	University Physics: Mechanics	
PHYS 212	University Physics: Elec & Mag	
PHYS 213	Univ Physics: Thermal Physics	
PHYS 214	Univ Physics: Quantum Physics	
Select one of the following:		
PHYS 325	Classical Mechanics I	
or		
TAM 210 & TAM 212	Introduction to Statics and Introductory Dynamics	
Additional Technical Requirements		**13**
CS 101	Intro Computing: Engrg & Sci	
or CS 125	Introduction to Computer Science	
MSE 401	Thermodynamics of Materials	
or PHYS 427	Thermal & Statistical Physics	

or CHEM 444	Physical Chemistry II
Six hours of other 300- or 400-level science, math, or engineering courses selected with adviser approval.	

for the degree of Bachelor of Science in Geology, Geophysics Concentration (Specialized Curriculum)

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Geology, Geophysics Concentration (Specialized Curriculum)

1. Students will develop cross-disciplinary skills of observation, data collection, and spatial display of data (e.g., map making) related to geological materials, features, and processes. Upon completing this program, students will be able to analyze the Earth as a complex system and evaluate the interconnectedness of Earth systems and their effects on each other. Students will be able to analyze the causes and impacts of the Earth's changing climate over various time scales and evaluate the environmental, social, and geological impacts of these changes. Students will be able to analyze complex geological processes and their interconnectedness with environmental systems on geologic and real timescales, applying spatial analyses in 3D (and 4D), using direct field observations coupled with geologic interpretation and synthesis.
2. Students will develop an understanding of the physical, chemical, and mathematical theories fundamental to Earth processes through rigorous coursework and research. Upon program completion, students will be able to analyze and solve mathematical and computational problems encountered in geoscience research and professional practice. Students will be able to analyze and interpret geologic structure including geologic timescales, and tectonic and deformation processes and their hazard potentials. Students will be able to interpret the chemical and mechanical processes involved within each stage of the rock cycle. Students will be able to recognize key surface processes and their connection to geological features, including potential hazards. Students will be able to analyze and interpret the chemical and mechanical processes involved in the Water Cycle and evaluate water as a critical natural resource.
3. Students will develop and apply critical thinking skills to synthesize principles learned in the classroom and data collected in the laboratory and in the field in order to evaluate hypotheses and solve geological and Earth science problems. Upon completion of this program, students will be able to carry out geological data collection and analysis in the field and/or lab, in independent and team working environments. Students will have the strong critical thinking and problem-solving skills needed to effectively analyzing and solving complex geologic problems. They will be able to navigate non-unique answers and make informed decisions based on evidence.
4. Students will demonstrate the ability to effectively communicate scientific data, interpretations, and hypotheses through written and oral methods. Upon completion, Students will be proficient in communicating science verbally and in writing and be able to tailor their written and verbal communication to different audiences. Students will have developed good listening skills and the ability to carry on an interactive dialogue with their colleagues.
5. Students will hone and apply interpersonal skills in a professional setting through group work, research activities, and field studies. Upon completing this program, students will be able to work in professional and academic group settings as productive members of a team to solve complex geologic and Earth science problems.

Geology: Environmental Geology, BS

for the degree of Bachelor of Science in Geology, Environmental Geology Concentration (Specialized Curriculum)

The **Specialized Curriculum in Geology (BS)** is designed for students who plan to pursue graduate study in geology or geophysics or who wish to work professionally in the environmental field upon obtaining the bachelor's degree. It consists of geology, geophysics, and environmental geology areas, and offers more training in geology and related science than is required of students who make geology their major in the Sciences and Letters Curriculum. Students must choose one of the following: Geology, Geophysics, or Environmental Geology.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 398)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 400)
- Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 402)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

- Major in Geology (Specialized Curriculum) (p. 389)
- Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 394)

- Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 392)

for the degree of Bachelor of Science in Geology, Environmental Geology Concentration (Specialized Curriculum)

Graduation requires a grade point average of at least 2.0 overall and a 2.0 average in all required science and technical courses (geology, physics, mathematics, chemistry, and technical requirements listed below). The Department of Earth Science & Environmental Change will supply a Guide for Geology Undergraduates upon request. This guide gives more information about the curriculum.

Departmental Distinction:

Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- **Distinction**: A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone.
- **High Distinction:** A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone.
- **Highest Distinction**: A minimum cumulative grade point average of 3.7, and also completed an approved senior thesis or approved research capstone.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum hours required for graduation: 126 hours.

Code	Title	Hours

Geology, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geology (Sciences & Letters)

The **Sciences and Letters Curriculum in Geology (BSLAS)**, administered by the Department of Geology, is designed for students who want a more flexible course of study than is provided by the Specialized Curriculum in Geology and Geophysics. It may be used by those wishing to obtain a more liberal education and/or background in geology for use in fields such as anthropology, business, mineral economics, regional planning, journalism, law, sales, or library and information science. It is not intended to prepare a student for graduate work in the geological sciences unless the student selects additional courses in mathematics, chemistry, and physics comparable to those required in the Specialized Geology and Geophysics Curriculum. Students must choose from the following: Geology, Earth and Environmental Sciences, or Earth Science Teaching. The Earth Science Teaching Concentration is designed for students preparing to teach earth science at the secondary school level.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an advisor:

- Major in Geology (Sciences and Letters) (p. 398)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 400)
- Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 402)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an advisor:

- Major in Geology (Specialized Curriculum) (p. 389)
- Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 394)
- Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 392)

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geology (Sciences & Letters)

Departmental Distinction: Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- **Distinction**: A minimum cumulative grade point average of 3.3, and have also completed an approved independent study project, approved senior thesis, or approved capstone
- **High Distinction**: A minimum cumulative grade point average of 3.5, and have also completed an approved independent study project, approved senior thesis, or approved capstone
- **Highest Distinction**: A minimum cumulative grade point average of 3.7, and also completed an approved senior thesis or approved research capstone

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required course work normally equates to 47-52 hours including at least 26 hours in Geology. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Code	Title	Hours
Core requirements:		
GEOL 107	Physical Geology (Students who decide to follow the curriculum after first taking GEOL 100 should enroll in GEOL 208. GEOL 100 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.)	4
GEOL 208	History of the Earth System	4
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
Select one of the following MATH courses: (An introductory Statistics course, e.g., STAT 100, SOC 280, ECON 202, or a second semester of Calculus is recommended)		4-5
MATH 220	Calculus	
or MATH 221	Calculus I

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 43 hours including at least 26 hours in Geology. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Code	Title	Hours
Core requirements:		
GEOL 107	Physical Geology (Students who decide to follow the curriculum after first taking GEOL 100 should enroll in GEOL 208. GEOL 100 will be accepted as a substitute for GEOL 107, but students should be aware that these courses are not intended for science majors.)	4
GEOL 208	History of the Earth System	4
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
Select one of the following MATH courses: (An introductory Statistics course, e.g., STAT 100, SOC 280, ECON 202, or a second semester of Calculus is recommended)		4-5

MATH 220	Calculus	
or MATH 221	Calculus I	
MATH 234	Calculus for Business I	
Courses beyond the core requirements		
ATMS 140	Climate and Global Change	3
or GEOL 118	Natural Disasters	
GEOL 333	Earth Materials and the Env	4
or GEOL 432	Mineralogy and Mineral Optics	
GEOL 380	Environmental Geology	4
Ten to twelve hours of additional advanced geology courses		10-12
Six to eight hours Environmental Studies electives. (see Geology advisor for list of approved courses)		6-8

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geology (Sciences & Letters), Earth & Environmental Sciences Concentration

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geology (Sciences & Letters), Earth & Environmental Sciences Concentration

1. Students will develop cross-disciplinary skills of observation, data collection, and spatial display of data (e.g., map making) related to geological materials, features, and processes. Upon completing this program, students will be able to analyze the Earth as a complex system and evaluate the interconnectedness of Earth systems and their effects on each other. Students will be able to analyze the causes and impacts of the Earth's changing climate over various time scales and evaluate the environmental, social, and geological impacts of these changes. Students will be able to analyze complex geological processes and their interconnectedness with environmental systems on geologic and real timescales, applying spatial analyses in 3D (and 4D), using direct field observations coupled with geologic interpretation and synthesis.
2. Students will develop an understanding of the physical, chemical, and mathematical theories fundamental to Earth processes through rigorous coursework and research. Upon program completion, students will be able to analyze and solve mathematical and computational problems encountered in geoscience research and professional practice. Students will be able to analyze and interpret geologic structure including geologic timescales, and tectonic and deformation processes and their hazard potentials. Students will be able to interpret the chemical and mechanical processes involved within each stage of the rock cycle. Students will be able to recognize key surface processes and their connection to geological features, including potential hazards. Students will be able to analyze and interpret the chemical and mechanical processes involved in the Water Cycle and evaluate water as a critical natural resource.
3. Students will develop and apply critical thinking skills to synthesize principles learned in the classroom and data collected in the laboratory and in the field in order to evaluate hypotheses and solve geological and Earth science problems. Upon completion of this program, students will be able to carry out geological data collection and analysis in the field and/or lab, in independent and team working environments. Students will have the strong critical thinking and problem-solving skills needed to effectively analyzing and solving complex geologic problems. They will be able to navigate non-unique answers and make informed decisions based on evidence.
4. Students will demonstrate the ability to effectively communicate scientific data, interpretations, and hypotheses through written and oral methods. Upon completion, Students will be proficient in communicating science verbally and in writing and be able to tailor their written and verbal communication to different audiences. Students will have developed good listening skills and the ability to carry on an interactive dialogue with their colleagues.
5. Students will hone and apply interpersonal skills in a professional setting through group work, research activities, and field studies. Upon completing this program, students will be able to work in professional and academic group settings as productive members of a team to solve complex geologic and Earth science problems.

Geology: Earth Science Teaching, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geology (Sciences & Letters), Earth Science Teaching Concentration

The **Sciences and Letters Curriculum in Geology (BSLAS)**, administered by the Department of Geology, is designed for students who want a more flexible course of study than is provided by the Specialized Curriculum in Geology and Geophysics. It may be used by those wishing to obtain a more liberal education and/or background in geology for use in fields such as anthropology, business, mineral economics, regional planning, journalism, law, sales, or library and information science. It is not intended to prepare a student for graduate work in the geological sciences unless the student selects additional courses in mathematics, chemistry, and physics comparable to those required in the Specialized Geology and Geophysics Curriculum. Students must choose from the following: Geology, Earth and Environmental Sciences, or Earth Science Teaching. The Earth Science Teaching Concentration is designed for students preparing to teach earth science at the secondary school level.

Undergraduate Degree Programs in Geology

For the Degree of Bachelor of Science in Liberal Arts and Sciences

Students select one of the following in consultation with an adviser:

- Major in Geology (Sciences and Letters) (p. 398)
- Major in Geology (Sciences and Letters), Earth and Environmental Sciences Concentration (p. 400)
- Major in Geology (Sciences and Letters), Earth Science Teaching Concentration (p. 402)

For the Degree of Bachelor of Science in Geology

Students select one of the following in consultation with an adviser:

- Major in Geology (Specialized Curriculum) (p. 389)
- Major in Geology (Specialized Curriculum), Environmental Geology Concentration (p. 394)
- Major in Geology (Specialized Curriculum), Geophysics Concentration (p. 392)

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geology (Sciences & Letters), Earth Science Teaching Concentration

---

This concentration fulfills state licensure requirements to teach high school (grades 9-12) Earth and Space Science through the AP/honors level and biology, chemistry, environmental science and physics up to but not including the AP/honors level.

Time to degree completion varies. Minimum time to completion is 8 semesters. Some students require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://transferhandbook.illinois.edu/las/open-majors/) for more information.

In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain a cumulative grade-point average of 2.5 (A= 4.0).

Departmental Distinction: Students majoring in Geology can earn distinction, high distinction, and highest distinction upon graduation. The requirements for these awards are:

- **Distinction**: A minimum cumulative grade point average of 3.3, and must present evidence of exemplary teaching
- **High Distinction**: A minimum cumulative grade point average of 3.5, and must present evidence of exemplary teaching
- **Highest Distinction**: A minimum cumulative grade point average of 3.7, and must present evidence of exemplary teaching

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 55-59 hours in the concentration and 39 hours for the Teacher Education Minor in Secondary School Teaching. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Code	Title	Hours
Foundation Courses		
The following courses must be completed or in progress when students apply to the Secondary Education minor.		
GEOL 107	Physical Geology	4
GEOL 208	History of the Earth System	4
GEOL 333	Earth Materials and the Env (Students can substitute GEOL 333 with GEOL 432)	4
MATH 220	Calculus	4-5
or MATH 221	Calculus I	
or MATH 234	Calculus for Business I	
Additional Required Coursework		
Teacher Education Minor in Secondary School Teaching (http://catalog.illinois.edu/undergraduate/education/secondary/)		39
Select one group of courses:		5-6
ASTR 100 & ASTR 131 & ASTR 132	Introduction to Astronomy and and	
or		
ASTR 121 & ASTR 122	Solar System and Worlds Beyond and Stars and Galaxies	
ATMS 100	Introduction to Meteorology	3
IB 100	Biology in Today's World	3
Select one group of courses:		4
CHEM 102 & CHEM 103	General Chemistry I and General Chemistry Lab I	
or		
CHEM 202 & CHEM 203	Accelerated Chemistry I and Accelerated Chemistry Lab I	
GEOL 117	The Oceans	3
GEOL 143	History of Life	3
Advanced-hour course work in Geology		8
Select one group of courses:		10-12
PHYS 101 & PHYS 102	College Physics: Mech & Heat and College Physics: E&M & Modern	
or		
PHYS 211 & PHYS 212 & PHYS 213 & PHYS 214	University Physics: Mechanics and University Physics: Elec & Mag and Univ Physics: Thermal Physics and Univ Physics: Quantum Physics	

Requirements for the Teacher Education in Secondary School Teaching Minor

Code	Title	Hours
Professional Education Required Courses		
EDUC 201	Identity and Difference in Education [1]	3
EDUC 202	Social Justice, School and Society [1]	3
CI 401	Introductory Teaching in a Diverse Society	3
CI 403	Teaching a Diverse High School Student Population	3
CI 404	Teaching and Assessing Secondary School Students	3
CI 473	Disciplinary Literacy	3
EPSY 201	Educational Psychology [1, 2]	3
EPSY 485	Assessing Student Performance	3
SPED 405	General Educator's Role in Special Education	3
EDPR 442	Educational Practice in Secondary Education	12
Total Hours		**39-40**

[1] EDUC 201, EDUC 202 and EPSY 201 can be completed at any time during the degree and are not pre-requisites to apply for the minor.

[2] PSYC 100 is a pre-requisite for EPSY 201.

for the degree of Bachelor of Science in Liberal Arts & Sciences in Geology (Sciences & Letters), Earth Science Teaching Concentration

Sample Sequence

Germanic Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Germanic Studies

The **BALAS in Germanic Studies** serves to develop competence in German or Scandinavian languages and cultures. Students will gain familiarity with the structure of the language and its use in the context of business, contemporary culture, intellectual history, literature, and science. Students must select one concentration in consultation with an adviser:

- German Studies Concentration (p. 410)
- German Business & Commercial Studies Concentration (p. 407)
- Scandinavian Studies Concentration (p. 412)

The Department of German Languages & Literatures also offers a BA in the Teaching of German (p. 828).

5 year BALAS/MA in Germanic Studies
The Department of Germanic Languages and Literatures offers a 5-year program leading to two degrees, a BALAS in Germanic Studies and an MA in German. In order to be admitted to this program, student can apply during their second or third year of studies. Requirements for this program are identical to those for the BALAS and the MA in the Department of Germanic Languages and Literatures.

In order to be admitted to the 5-year BALAS/MA during their *second* year, students will need to be in good standing, have finished GER 211 and GER 331, have a general **GPA of 3.0** and a German GPA of 3.0, and be required to write a short essay in German.

In order to apply for the 5-year BALAS/MA during their *third* year, students will have to have finished GER 401 and GER 420, have a general **GPA of 3.0** and a German GPA of 3.0, and be required to write a short essay in German.

The department will continue to monitor the GPAs of students admitted to the BALAS/MA program into their third and fourth years and before formal admission to the Graduate College. The decision about students' admission to the 5-year program will be made by the graduate admissions committee in conjunction with undergraduate and graduate advisors of the department. The Department will consider students in the fifth year of this program for departmental support as Teaching Assistants and Research Assistants, or for fellowships and scholarships.

The minimum total number of hours required for graduation from the BALAS/MA program is 152. Up to 12 hours not required for the BALAS (120 hours) taken during the fourth year can be used to meet the requirements for the MA (32 hours). Students admitted to the program will receive both degrees once all requirements for the 5-year BALAS/MA degree program have been successfully completed. More detailed information may be obtained from the departmental office.

5 Year BALAS/MA in German and European Union Studies
The Department of Germanic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in German (including a Scandinavian Studies Concentration) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the standalone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Germanic Studies

1. *Language ability:* Students develop and improve their foreign language abilities, i.e. their ability to read, speak, write, and listen in German and/or a modern Scandinavian language in order to work with texts and communicate with others in these languages.
2. *Cultural-historical literacy and knowledge:* Students develop and improve their ability to function in non-native cultural-historical and linguistic contexts and communities in order to respect and navigate cultural differences and build upon similarities. Furthermore, students will synthesize knowledge relevant to broad cultural and linguistic areas within German and/or Scandinavian studies in order to apply that knowledge toward the other learning outcomes outlined here.
3. *Analytical and argumentative skills:* Students develop and improve their abilities to analyze diverse cultural artifacts in order to apply analytical thinking and discursive skills to the construction of sound, supported, factual argumentation rather than merely expression of opinion, completely or in part.
4. *Writing development:* Students will demonstrate and produce well-written, communicative, argumentative, and interpretive texts in German, Swedish, and/or English in order to competently meet diverse writing tasks carried out in any of the relevant languages above. Furthermore, students will be able to carry out various forms of research in support of their writing in order to create more substantive texts, which are also genre appropriate and written for a particular audience.

College of Liberal Arts and Sciences website (https://las.illinois.edu/)

Germanic Studies: German Business & Commercial Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Germanic Studies, German Business & Commercial Studies Concentration

The German Business and Commercial Studies concentration focuses on the language and customs of the business world in German-speaking countries, together with study of international affairs and commerce, especially trade with Europe.

Undergraduate degree programs in Germanic Languages & Literatures:

- Germanic Studies: German Studies, BALAS (p. 406)
- Germanic Studies: German Business & Commercial Studies, BALAS (p. 407)
- Teaching of German, BA (p. 828)
- Germanic Studies: Scandinavian Studies, BALAS (p. 412)

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Germanic Studies, German Business & Commercial Studies Concentration

The German Business and Commercial Studies concentration focuses on the language and customs of the business world in German-speaking countries, together with study of international affairs and commerce, especially trade with Europe.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Students majoring in the Department of Germanic Languages and Literatures are urged to consult the departmental honors adviser by the second semester of the junior year for information pertaining to senior honors work and honors awards in the department.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 34 hours in German. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Germanic Studies, German Business & Commercial Studies Concentration

1. *Language ability:* Students develop and improve their foreign language abilities, i.e. their ability to read, speak, write, and listen in German in order to work with texts and communicate with others in the language.
2. *Cultural-historical literacy and knowledge:* Students develop and improve their ability to function in non-native cultural-historical and linguistic contexts and communities in order to respect and navigate cultural differences and build upon similarities. Furthermore, students will synthesize knowledge relevant to broad cultural and

linguistic areas within German studies and the world of business and commerce in German-speaking countries and Europe, in order to apply that knowledge toward the other learning outcomes outlined here.

3. *Analytical and argumentative skills:* Students develop and improve their abilities to analyze diverse cultural artifacts in order to apply analytical thinking and discursive skills to the construction of sound, supported, factual argumentation rather than merely expression of opinion, completely or in part.
4. *Writing development:* Students will demonstrate and produce well-written, communicative, argumentative, and interpretive texts in German and/or English in order to competently meet diverse writing tasks. Furthermore, students will be able to carry out various forms of research in support of their writing in order to create more substantive texts, which are also genre appropriate and written for a particular audience.

Germanic Studies: German Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Germanic Studies, German Studies Concentration

The Germanic Studies Concentration provides a multidisciplinary approach to the study of German, emphasizing a balanced knowledge of German language, literature, and culture as well as exposure to contemporary politics and social issues in broader European and global contexts.

Undergraduate degree programs in Germanic Languages & Literatures:

- Germanic Studies: German Studies, BALAS (p. 406)
- Germanic Studies: German Business & Commercial Studies, BALAS (p. 407)
- Teaching of German, BA (p. 828)
- Germanic Studies: Scandinavian Studies, BALAS (p. 412)

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Germanic Studies, German Studies Concentration

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 34 hours in German. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Global Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Global Studies

The BALAS in Global Studies (https://globalstudies.illinois.edu/academics/academic-programs/global-studies-major/) allows students to develop, hone, and put into practice their interests in global issues, processes, and societies. Students will gain interdisciplinary research, writing, and critical thinking skills, language and cultural competency, and will work with our advisors to craft a major plan of study that meets their needs and prepares them for the next steps after graduation. Information on courses and the major plan of study can be found on our academic program page (https://globalstudies.illinois.edu/academics/academic-programs/).

In addition to the major, Global Studies offers the following certificates and minors which can complement your degree:

Minor in Global Studies (https://globalstudies.illinois.edu/academics/academic-programs/global-studies-minor/)

Minor in Global Markets and Society (https://globalstudies.illinois.edu/academics/academic-programs/global-markets-and-society-minor/)

Certificate in International Development Studies (https://globalstudies.illinois.edu/academics/academic-programs/certificate-international-development-studies/)

Certificate in Global Health (https://globalstudies.illinois.edu/academics/academic-programs/certificate-global-health/)

Certificate in Global Social Sciences Research (https://globalstudies.illinois.edu/academics/academic-programs/certificate-global-social-sciences-research/)

5 Year BALAS/MA in Global Studies and European Union Studies

Global Studies, with the European Union Center, offers a 5-year BALAS / MA degree program in Global Studies and the Master of Arts in European Union Studies (https://globalstudies.illinois.edu/academics/academic-programs/global-studieseuropean-union-bama-41-degree/) (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

The minimum total number of hours required for graduation from the BALAS/MA program is 152. Up to 12 hours not required for the BALAS (120 hours) taken during the fourth year can be used to meet the requirements for the MS (32 hours). Upon completion of BALAS requirements, students receive a Bachelors degree and may continue in the MS program with credit for up to 12 hours taken as an undergraduate. More detailed information may be obtained from the departmental office.

5 year BALAS/MS in Global Studies

Global Studies, with the Center for Global Studies, offers a 5-year BALAS/MS degree program in Global Studies (https://globalstudies.illinois.edu/5-year-bachelormaster/). In order to be admitted to this degree program, students apply through a joint application process to their BALAS-granting program and the Center for Global Studies during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MS degrees will be conferred separately and independently. More detailed information may be obtained from Global Studies and the Center for Global Studies offices.

The minimum total number of hours required for graduation from the BALAS/MS program is 152. Up to 12 hours not required for the BALAS (120 hours) taken during the fourth year can be used to meet the requirements for the MS (32 hours). Upon completion of BALAS requirements, students receive a Bachelors degree and may continue in the MS program with credit for up to 12 hours taken as an undergraduate. More detailed information may be obtained from the departmental office.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Global Studies

---

A Major Plan of Study Form must be completed and submitted to the Global Studies academic advisor before the end of the fourth semester (60 hours) and prior to the required study abroad. Please see your advisor.

Departmental distinction: The department may award distinction, high distinction, or highest distinction to any Global Studies major whose overall and major grade point averages are 3.25 or higher, who successfully completes 3 hours of GLBL 494 or other approved research methods course and who completes a distinction research project. See the departmental academic advisor for details.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 51-55 hours and includes a semester-long full-time study abroad program. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed

requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Global Studies

Global Studies majors will be able to:

1. Discover how complex, interdependent global systems (natural, environmental, social, cultural, economic, and political) affect and are affected by the local identities and ethical choices of individuals and institutions.

2. Develop new skills in in how to research these interconnections through data collection, analysis, building familiarity with academic literature, and writing.

3. Apply knowledge to promote inquiry, discover solutions, and generate new ideas and creative works, and develop the capacity to conduct independent research in graduate and professional environments.

4. Gain social awareness and cultural understanding through intensive experiential, cross-cultural coursework, advanced language study, and study abroad.

5. Acquire effective leadership and community engagement capacities by developing the ability to make deliberate and independent choices about intellectual and professional trajectories. To do so, students will combine coursework and experiential learning with leadership opportunities (such as the Global Studies Leaders), along with fieldwork, RSO engagement, a semester abroad, volunteer opportunities, and internships with governmental and non-governmental organizations.

Overview of LAS Admissions & Requirements (p. 2288)

Graphic Design, BFA

for the degree of Bachelor of Fine Arts in Graphic Design

The curriculum in graphic design requires 122 credit hours and prepares the student for entrance into the professional practice of design visual communications. Studio work addresses graphic design fundamentals (typography and image making), design history and contemporary practices, research methods, user experience, and social responsibility. Students engage with complex problems and are asked to identify opportunities where design can intervene. In addition, students have the opportunity to develop their personal interests by taking advantage of a highly interdisciplinary selection of elective courses offered by the School of Art + Design, including photography, video, traditional printmaking, sustainability, and advanced interaction design.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

A portfolio review is required for admission to the School of Art and Design.

for the degree of Bachelor of Fine Arts in Graphic Design

Graduation Requirements

Minimum hours required for graduation: 122 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

Code	Title	Hours

for the degree of Bachelor of Fine Arts in Graphic Design

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page (p. 2).

for the degree of Bachelor of Fine Arts in Graphic Design

1. Acquire proficient skills in recognizing, researching, organizing, and visualizing abstract ideas to produce graphic compositions for effective communication of messages across digital, print, experiential, and speculative media.
2. Critically select industry standard and emerging tools and technology, analyzing their roles in the creation, reproduction, and distribution of visual messages.
3. Understand typography as a system and its appropriate use for readability, legibility, and conveying meaning across digital and print media.
4. Develop the capability to realize a design idea through an iterative creative process of research, prototyping, refinement, and implementation, articulating criticism of the field.
5. Adapt and use evolving research methods and frameworks of the graphic design and user experience disciplines.
6. Apply knowledge of perception, cognition, and embodied experience to multimodal design practices, enhancing the efficacy of communication through diverse sensory channels.
7. Recognize and analyze the multifaceted professional, social, environmental, and ethical implications of the graphic design discipline.

History of Art, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences, major in History of Art

The History of Art, BALAS is not currently accepting applications. Suspension of admissions effective Spring 2026. This program has been replaced by the Art History, BALAS (p. 122) program.

The Program in Art History is unique at the University of Illinois Urbana-Champaign. Though housed in the School of Art and Design in the College of Fine and Applied Arts, the Program in Art History offers a Bachelor of Arts degree in the History of Art from the College of Liberal Arts and Sciences. The College of Liberal Arts and Sciences administers admission to the major in the History or Art; however, the Program in Art History advises all History of Art majors.

The curriculum in the History of Art requires 120 credit hours and offers a broad historical and cultural education related to the visual and build world. The curriculum provides sound preparation for the graduate study required for museum work or teaching at the college level.

Departmental distinction: To be eligible for distinction, a student must earn a high grade point average and complete at least 4 semester hours of independent research to write a senior research paper. See the undergraduate adviser for details.

Six (6) 200-400 level courses in Art History, offered in the School of Art & Design **18**

(Though students must take a total of 6 courses, some may count toward the fulfillment of more than one area and period requirement. For instance, a course in 20th century African art could count as a class covering both Africa and the Middle East and material after 1700.)

Students must take at least one course in three of the following areas: 1) Africa and the Middle East; 2) Asia; 3) the Americas; 4) Europe

With an advisor's approval, up to 6 credit hours of courses in the history of architecture or landscape architecture at the 200-400 level may be taken towards the fulfillment of these required hours

At least one course must cover material before 1700

At least one course must cover material after 1700

Other courses may be approved in consultation with the advisor.

1. Africa and the Middle East	
ARTH 219	Islamic Gardens & Architecture
ARTH 220	African Arts and Architecture
ARTH 310	African Art and Society I
ARTH 312	Central African Art

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

for the degree of Bachelor of Arts in Liberal Arts & Sciences, major in History of Art

Students who graduate with a degree of Bachelor of Arts in Liberal Arts & Sciences in History of Art will be able to:

1. Demonstrate familiarity with key artistic monuments and modes of art production from various global contexts.
2. Analyze and interpret works of art and architecture situated in a variety of historical and social contexts, and in comparative perspective.
3. Use visual and verbal primary sources, secondary sources, and core critical frameworks of art historical analysis to develop and articulate persuasive arguments about works of art and the cultures that produced them.
4. Engage with adjacent humanities disciplines in development of an interdisciplinary practice of art history.

History, BALAS

for the degree of Bachelor or Arts in Liberal Arts & Sciences Major in History

Studying History at the University of Illinois Urbana-Champaign will prepare you for informed participation in public life and wide array of career paths, including in law, government, public policy, business, film-making, teaching, advertising, public relations, social work, the media, publishing, diplomacy, and military intelligence. The requirement that every Illinois History major successfully complete a work of original historical research means that our graduates have a demonstrated capacity to think contextually, locate and analyze evidence, evaluate competing viewpoints, assess causation, offer new interpretations, and solve complex problems.

for the degree of Bachelor or Arts in Liberal Arts and Sciences Major in History

Departmental distinction: To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 498 , HIST 492 and successful completion of either:

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. The completion of two approved independent research projects under the supervision of two different advisors (HIST 490). (in which case, students will be eligible for an award of distinction only, but not high or highest distinction).

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.
Minimum required major course work: 36 hours of History courses.

Code	Title	Hours
Minimum of 36 hours of History courses including:		
Two introductory History courses at the 100 level (preliminary coursework)		6
African, Asian, Global, Latin American, Middle Eastern History courses at the 200-level or above, at least 3 hours at the 300 level or above [1]		6
European History courses at the 200-level or above, at least 3 hours at the 300 level or above [1]		6
U.S. History courses at the 200-level or above, at least 3 hours at the 300 level or above. 3 hours must be in U.S. Minority History. [1]		6
Hours of history electives (at the 200-level or above). NOTE: HIST 200 and HIST 498 are required. HIST 200 and HIST 498 may count toward any of the area requirements or the 12 hours of History electives. For those students in the Honors Program, HIST 490 or HIST 493 may count toward any of the area requirements or the 12 hours of History electives. HIST 492 and HIST 499 must be taken as part of the 12 hours of required History electives.		12
Of the 36 hours of History courses, students must take 6 hours in a pre-modern period, one defined as before 1600 and one defined as before 1800 (HIST 100 and HIST 142 may not be used to fulfill this requirement). [1]		
Total Hours required for graduation [2]		**120**

[1] *Chosen from the list maintained in the Department of History*
[2] *Eighteen advanced hours (300- and 400-level) of History courses are required in the major. 12 of those 18 advanced hours must be taken on this campus.*

for the degree of Bachelor or Arts in Liberal Arts & Sciences Major in History

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor or Arts in Liberal Arts & Sciences Major in History

1. Historical interpretation:
   a. Students will be able to connect past and present, demonstrating an understanding of ways that the past has shaped the world we live in today
   b. Students will be able to grasp the complexity of historical causation
   c. Students will have a broad and empathetic understanding of the commonalities and differences of the human experience, as influenced by factors such as culture, race, ethnicity, gender, and class in a matrix of time and place
   d. Students will be able to critically assess different sources of information and points of view
2. Historical research:
   a. Students will be able to formulate historical questions
   b. Students will be able to locate, organize, analyze, and synthesize data to answer these questions
   c. Students will be able to craft original historical arguments
   d. Students will be able to position these arguments contextually
3. Historical communication:
   a. Students will be able to express their ideas clearly, logically, and in evidence-based ways
   b. Students will be able to convey their ideas to different audiences
   c. Students will be able to evaluate, review, and edit historical writing and other forms of historical communication

College of Liberal Arts & Sciences

Overview of College Admissions & Requirements (p. 2288)

History: Social Science: History Teaching, BALAS

For the Degree of Bachelor of Arts in Liberal Arts & Sciences Major in History, History Teaching Concentration

This concentration fulfills state licensure requirements to teach high school history (grades 9-12) through the AP/honors level and high school economics, geography, political science, psychology, and sociology/anthropology up to but not including the AP/honors level.

Time to degree completion varies. Minimum time to completion is 8 semesters, but some students may require 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://transferhandbook.illinois.edu/las/) for more information.

For the Degree of Bachelor of Arts in Liberal Arts & Sciences Major in History, History Teaching Concentration

This concentration fulfills state licensure requirements to teach high school history (grades 9-12) through the AP/honors level and high school economics, geography, political science, psychology, and sociology/anthropology up to but not including the AP/honors level.

Time to degree completion varies, but when following the new requirements effective Fall 2020, the expected completion time is 8 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://transferhandbook.illinois.edu/las/) for more information.

To remain in good standing in this program and be recommended for licensure, candidates are required to maintain a cumulative grade-point average of 2.5 (A= 4.0).

Departmental distinction: To be eligible for distinction, a student must be admitted to the Honors Program in History and complete its required coursework. Those admitted (ideally before the beginning of the junior year) must have earned at least a 3.5 GPA in History and a 3.25 GPA overall. They will then pursue a sequence consisting of HIST 498, HIST 492 and successful completion of either

1. HIST 493 and HIST 499 in two consecutive semesters (in which case, the level of distinction awarded to student will be decided by the examining committee) OR
2. The completion of two approved independent research projects under the supervision of two different advisors (HIST 490) (in which case, students will be eligible for an award of distinction only, but not high or highest distinction).

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: Students are required to take a minimum of 33 hours in History courses. Only one of the following Advanced Composition courses (HIST 140, HIST 143, HIST 170, HIST 173) will count toward the 33 hours required in History courses. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours).

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Major Requirements

Code	Title	Hours
Foundation Courses		
The following courses must be completed or in progress when students apply to the Secondary Education minor.		
Select one of the following Political Science courses:		3
PS 100	Intro to Political Science	
PS 101	Intro to US Gov & Pol	
PS 240	Intro to Comp Politics	
PS 241	Comparative Politics in the Global South	
PSYC 100	Intro Psych	4
SOC 100	Introduction to Sociology	4
HIST 200	Intro Hist Interpretation	3
Select one course each from two of the following three categories:		6-8
Global History		
HIST 100	Global History	
Western Civilization		
HIST 140	Western Worlds: Ancient and Medieval Societies from the Mediterranean to N. Europe (ACP)	
or HIST 141	Western Worlds: Ancient and Medieval Societies from the Mediterranean to Northern Europe	
HIST 142	Modern Europe and the World	
or HIST 143	Modern Europe and the World - ACP	
United States History		
HIST 170	US History to 1877-ACP	
or HIST 171	US History to 1877	
HIST 172	US History Since 1877	
or HIST 173	US History Since 1877-ACP	
HIST 174	Black America, 1619-Present	
Additional Required coursework		
Teacher Education Minor in Secondary School Teaching (p. 1028)		39

United States History		
Select one of the following (A US History survey course if not taken as a foundation course):		3-4
HIST 170	US History to 1877-ACP	
or HIST 171	US History to 1877	
HIST 172	US History Since 1877	
or HIST 173	US History Since 1877-ACP	
HIST 174	Black America, 1619-Present	
One 100-400 level course in US history		3
One 100-400 level course in US history focusing on US minorities history		3
HIST 273	Illinois History	3
or HIST 288	American Indians of Illinois	
or HIST 382	Race and Migration in Chicago	
Nonwestern and Global History		
HIST 100	Global History (if not taken as a foundation course)	3
One 100-400 level course in global or nonwestern history		3
One 100-400 level course in global or nonwestern history		3
European History		
Select one of the following (A Western Civ survey course if not taken as a foundation course):		3-4
HIST 140	Western Worlds: Ancient and Medieval Societies from the Mediterranean to N. Europe (ACP)	
or HIST 141	Western Worlds: Ancient and Medieval Societies from the Mediterranean to Northern Europe	
HIST 142	Modern Europe and the World	
or HIST 143	Modern Europe and the World - ACP	
One 100-400 level course in European history		3
One 100-400 level course in European History		3
Students must take HIST 498 - Research and Writing Seminar. Students may count the 3 hours towards any of the history areas noted above: US, Nonwestern/Global, or European.		
Students must complete 12 hours of advanced (300+) coursework in History. HIST 498 may count toward those 12 hours.		
Pre modern requirement: One History course must have a significant pre-1800 component.		
Social Science Requirement		
ECON 102	Microeconomic Principles	3
or ECON 103	Macroeconomic Principles	
One 100-400 level Geography course		3-4

For the Degree of Bachelor of Arts in Liberal Arts & Sciences Major in History, History Teaching Concentration

Students completing this concentration will be able to:

1. **Analyze and interpret history** by connecting past and present, understanding the complexity of historical causation, and recognizing how culture, race, ethnicity, gender, and class shape human experiences over time.
2. **Conduct historical research** by formulating questions, locating and evaluating sources, analyzing and synthesizing data, and constructing evidence-based historical arguments positioned in context.
3. **Communicate historical knowledge effectively** through clear, logical, and audience-appropriate oral, written, and digital forms, with the ability to revise and refine historical presentations and arguments.
4. **Apply historical and pedagogical skills in educational settings**, guiding student learning about the past while integrating interdisciplinary perspectives (e.g., economics, political science, psychology, or foreign languages).
5. **Engage in professional development** through internships, study abroad, classroom experiences, and other opportunities to prepare for careers in social studies education.

Hospitality Management, BS

for the degree of Bachelor of Science in Hospitality Management

As a hospitality management student, you will explore food-focused social and biological sciences. You will also learn critical business and management concepts that will make you highly sought-after for careers in restaurant and hotel management, event planning, catering, and food service.

The hospitality management curriculum provides a strong foundation for you to learn fundamentals while allowing flexibility for you to pursue individual interests through various minors, internships, and study abroad experiences.

Our well-managed class sizes will allow you to receive more personalized attention and interaction with your core faculty members. Experiential learning opportunities empower you to build your professional networks and tailor an individualized career plan.

As part of the curriculum, you will assist in the operation and management of our student-run facilities that are open to the public, Bevier Café and the Spice Box. You will learn how to safely prepare and serve foods, and execute fine dining experiences. You will also have opportunities to participate in practical and professional internships.

Human Development & Family Studies, BS

for the Bachelor of Science in Human Development & Family Studies

The Human Development and Family Studies program prepares students for graduate/professional education or employment in areas such as pediatric services in hospitals, medicine and allied health fields, marriage and family therapy, family law, human resources, child care services, family life education, social work, counseling, human services, and business activities related to children and families. Students select course work according to their interests in human development, such as infancy, early childhood or adolescence, and relationship and family science, such as intimate relationships, parent-child interaction, and family stress and change. Basic courses in these areas are linked to practical experiences in educational and community settings, and most courses emphasize issues related to cultural diversity and gender. Students develop an individualized plan within this major according to their career and professional interests.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the Bachelor of Science in Human Development & Family Studies

1. **HDFS students will demonstrate a strong foundation in theories and empirical knowledge associated with human development and family studies (i.e., developmental periods and domains; socialization contexts; diversity among families and children; research methods; family dynamics, transitions, and resilience; and family policy)**
   a. Recall key terminology (theoretical, empirical, methodological, substantive concepts)
   b. Describe current and historical challenges affecting individuals and families (e.g., social, political, economic, cultural, ethical, including research ethics)
   c. Summarize key theories, models, and principles (e.g., grand, disciplinary, substantive, methodological)
   d. Apply theories, models, and principles to developmental, relationship, familial, and social issues
   e. Apply knowledge to global contexts
   f. Integrate knowledge across courses and content areas (i.e., human development and family studies; lower level to higher level courses)
   g. Critique current theoretical and empirical knowledge of and methodological approaches to studying human development, relationships, and families
2. **HDFS students will exhibit the skills necessary to effectively apply knowledge and generate new ideas to solve real world issues**
   a. Use effective written communication
      i. Use appropriate grammar and writing mechanics
      ii. Demonstrate a working knowledge of APA style

iii. Respond to constructive criticism (e.g., revision process, peer review)
iv. Produce written work that is organized, logical, and fully developed

b. Use effective oral communication (e.g., clearly and logically present ideas aloud through presentation to class or group)
c. Apply knowledge to formulate and investigate hypotheses or research questions
d. Apply knowledge to propose or create research-based programs or policies
e. Critically evaluate the quality of published research, programs, and policies and their implications for individuals, relationships, and families
f. Collaborate to achieve group goals
g. Apply research-based knowledge to working with children, families, and communities and/or agencies that serve them

3. **HDFS students will demonstrate a critical and reflexive orientation toward and sensitivity to issues of diversity and inclusion**
   a. Describe the historical and current relevance of diversity and inclusion to individuals, relationships, families, and communities
   b. Reflect on one's own interconnected positions, privileges, and disadvantages across multiple contexts
   c. Critically examine one's own beliefs, assumptions, values, attitudes, and biases
   d. Demonstrate awareness of and sensitivity to issues of diversity and inclusion in one's own work (e.g., written and oral communication)
   e. Critically evaluate the cultural respectfulness and appropriateness of research, programs, and policies related to human development and families
   f. Critically evaluate the potential impact of research, programs, and policies on diversity and inclusion
   g. Demonstrate awareness of global factors (e.g., economic, political, cultural, social) and how they may affect individuals, families and communities
4. **HDFS students will develop professional competence skills and establish well-informed career and professional goals**
   a. Identify and compare/contrast a range of career options for HDFS majors
   b. Create professional/job-related materials (e.g., resume, cover letter, purpose statement)
   c. Connect discipline knowledge to personal and professional life
   d. Develop leadership skills (e.g., through formal positions; informal mentoring to prospective/new students; representing the department; participation in class teamwork)
   e. Develop professional connections to support career and professional goals (e.g., relationships with professors, internship supervisors who can serve as references; connections to professionals through attending conferences/workshops or engaging with guest speakers in class)
   f. Make decisions and solve problems
      i. Independently
      ii. Collaboratively
   g. Exhibit professional and ethical behavior

Individual Plans of Study, BALAS or BSLAS

for the Degree of Bachelor of Arts in Liberal Arts and Sciences, or Bachelor of Science in Liberal Arts and Sciences Major in Individual Plans of Study

Minimum required major and supporting course work normally equates to 51-70 hours.

General education: Students must complete the Campus General Education (p. 2) requirements including the campus general education language requirement.

Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Minimum hours required for graduation: 120 hours

Departmental distinction: To graduate with distinction, a student must

1. have a cumulative grade point average of at least 3.25 and
2. successfully complete a project that has been approved by the LAS Courses & Curricula Committee.

Further information on requirements for graduation with distinction may be obtained from the IPS advisor.

Students in the College of Liberal Arts and Sciences may choose any of the undergraduate degree programs offered within the college. These majors and specialized curricula, each with its own pattern of requirements and electives, are continuously reviewed by the sponsoring departments and the college and revised as needed. At the same time, it is not possible to anticipate or specify all possible undergraduate fields of study. So, in order to encourage the growth of new academic disciplines, the college sponsors the experimental major-the Individual Plans of Study program. IPS allows the student to create an original major more appropriate for the individual's educational needs and characterized by a unique pattern of upper-level courses with a new academic direction. Recent IPS students have successfully pursued such innovative majors as Cinematography, Entomology, Neuroscience, Meteorology, and Middle Eastern Studies.

The development of an IPS program begins with the student's perception that a more appropriate field of study could exist beyond the present majors. Consultation with the IPS advisor and with faculty members in related fields will soon establish whether an original major is appropriate. Then, with the cooperation of one or more faculty members who consent to serve as advisers for this IPS program, an IPS major is planned and justified as carefully as if this were a departmental major.

Once an IPS program is formulated, the student and adviser make formal application to the LAS Courses & Curricula Committee, which evaluates and decides whether a proposed IPS program is appropriate for the aims of both the student and the college. The LAS Courses & Curricula Committee and the college will determine whether BA or BS is appropriate for the proposed program of study. Students interested in IPS are encouraged to inquire as early as possible in the sophomore year. In all cases, IPS programs must be initiated and approved before the end of the student's junior year. If program innovation sounds challenging and attractive, additional information is available at the LAS Student Academic Affairs Office, 2002 Lincoln Hall.

Industrial Design, BFA

for the degree of Bachelor of Fine Arts in Industrial Design

The Bachelor of Fine Arts (BFA) in Industrial Design (ID) provides a compelling framework centered on a human-centered approach, empowering students to explore exciting opportunities for creating innovative products and services. Our studio courses prioritize experiential learning, immersing students in hands-on problem-solving while deepening their understanding of user experience, market trends, materials, and production processes. Companion courses within the BFA in ID curriculum are designed to expand students' skill sets, encouraging them to explore diverse interests that complement their design studio explorations. A required portfolio review during the second year of the BFA in ID enables faculty to provide students with valuable guidance, ensuring their success in the final two years of the BFA in ID. This holistic approach inspires students to cultivate their passions and create intuitive, cutting-edge designs that seamlessly integrate with their context, providing superior user experiences.

Our program's connections to other units at the University of Illinois Urbana-Champaign, as well as to industry and community partners, not only equip aspiring designers with the tools to fulfill consumer desires but also ensure they remain attuned to the ever-evolving landscape of technology and culture, thereby driving positive societal impact.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

To embark on this transformative journey at the School of Art and Design, prospective students must complete a portfolio review that showcases their creative vision and potential as design innovators. Join us to shape the future of design!

for the degree of Bachelor of Fine Arts in Industrial Design

Graduation Requirements

Minimum hours required for graduation: 122 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

Code	Title	Hours
Composition I		4-6

for the degree of Bachelor of Fine Arts in Industrial Design

1. **Inquiry and insight:** the ability to select and use appropriate research and experimental methods, to access existing data or to generate new data, to analyze and draw insights, with a particular emphasis on user needs
2. **Ideation:** the ability to produce creative proposals to identify design opportunities, using design thinking, modeling, and prototyping strategies, with appropriate integration of functional, technical, ergonomic, and visual factors
3. **Implementation:** the ability to select and use appropriate making and manufacturing processes with an understanding of the potential of new technologies, and the demands of sustainability
4. **Informing:** the ability to use visual and verbal communication, to explain and persuade, as appropriate for different audiences
5. **Self-development:** the ability to carry out independent learning and reflexive evaluation of your work, as well as to plan and implement action, individually or in teams, effectively managing self and others
6. **Contextualization:** the ability to locate your own activity within the multiple contexts of design practice, including the theoretical, professional, cultural, environmental, and technological contexts

Industrial Engineering, BS

for the degree of Bachelor of Science in Industrial Engineering

Industrial engineering is a discipline that encompasses the analysis, development, improvement, implementation, and evaluation of integrated systems and their components, including materials, information, energy, people, money, time, equipment, and associated processes. Industrial engineering draws upon a variety of disciplines, from mathematics to psychology, from communications to computer science, and from production management to process control. Industrial engineers design efficient, productive systems in a wide range of business, industrial, and governmental settings.

The technical portion of the Industrial Engineering curriculum is designed as a sequence of increasingly specialized experiences. The entering student's first year is spent mastering the basics of science: math, chemistry, and physics. Second-year students begin to take fundamental engineering courses such as statics, dynamics, statistics, and strength of materials. Third-year students take a core of industrial engineering courses and begin their chosen area of specialization in one of five tracks, including: Operations Research; Quality Engineering; Supply Chain, Manufacturing, and Logistics; Economics and Finance; and Industrial Engineering Fundamentals. The Track Option website (https://ise.illinois.edu/undergraduate/industrial-engineering-degree/industrial-engineering-track-options/) contains a full list of courses for each track option. During their senior year, students broaden and deepen their knowledge with additional technical elective courses. Engineering design, communication, teamwork, and laboratory experiences are integrated throughout all four years of the curriculum.

Track Options:

- Economics and Finance
- Human Factors/Ergonomics
- Industrial Engineering Fundamentals
- Operations Research
- Quality Engineering
- Supply Chain, Manufacturing, and Logistics

The capstone experience for Industrial Engineering undergraduates is the Senior Project Course. Students work collaboratively with industry and a team of faculty members on a real-world problem during their final semester. Students participate in the practice of engineering through the capstone senior design course in which they work in teams to solve problems submitted by industry partnering companies, and present their solutions in reports and presentations supported by complete economic analyses.

Current Program Educational Objectives

for the degree of Bachelor of Science in Industrial Engineering

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Track Option Electives

Code	Title	Hours
Track options include courses selected from departmentally approved lists. Courses on these elective lists may only be used to fulfill one curricular requirement.		**12**
Computational Methods in IE		
Track Core requirement - complete 2 courses:		
CS 173	Discrete Structures	3
CS 225	Data Structures	4
Track Electives - select remaining courses from this list:		
All 200-, 300-, and 400-level CS courses excluding CS 210, CS 211, CS 397, CS 398, and CS seminar and senior project courses.		
SE 400	Engineering Law	3 or 4
Economics and Finance (E&F)		
Track Core - complete 2 courses from this list:		
ACE 427	Commodity Price Analysis	3
IE 420	Financial Engineering	3
SE 450	Decision Analysis I	3
Track Electives - select remaining courses from this list of courses. Of these courses, only 1 selected may be at the 100 or 200 level:		
ACE 410	Energy Economics and Policy	3
ACE 427	Commodity Price Analysis	3
ACE 428	Commodity Futures and Options	3
ACCY 200	Fundamentals of Accounting	3
ECON 302	Inter Microeconomic Theory	3
ECON 303	Inter Macroeconomic Theory	3
ECON 420	International Economics	2 to 4
ECON 471	Intro to Applied Econometrics	2 to 4
FIN 221	Corporate Finance	3
FIN 300	Financial Markets	3
FIN 411	Investment & Portfolio Mngt	3
FIN 412	Options and Futures Markets	3
FIN 415	Fixed Income Portfolios	3
FIN 461	Banking and Financial Regulation	3
SE 400	Engineering Law	3 or 4
Human Factors		**12**
Track Core - complete the following course:		
IE 340	Human Factors	4
Track Electives - complete at least 3 of the following courses:		
Physical Ergonomics Focus		
BIOE 461	Cellular Biomechanics	4
or TAM 461	Cellular Biomechanics	
ETMA 421	Industrial and Agricultural Safety-Injury Prevention	3
ETMA 422	Industrial and Agricultural Occupational Illness Prevention	3
ETMA 425	Managing Industrial and Agricultural Safety Risks	3
HK 353	Biomechanics of Human Movement	3
HK 466	Measure & Eval in Kinesiology	3 or 4
ME 481	Whole-Body Musculoskel Biomech	3 or 4
ME 482	Musculoskel Tissue Mechanics	3 or 4
Cognitive Ergonomics Focus		
SE 400	Engineering Law	3 or 4
SE 450	Decision Analysis I	3 or 4
IE 445	Human Performance and Cognition in Context	3 or 4
Organizational Ergonomics Focus		
ANTH 411	Research Methods in Socio-Cultural Anthropology	3 or 4
BADM 310	Mgmt and Organizational Beh	3
BADM 312	Designing and Managing Orgs	3
BADM 357	Digital Making Seminar	3
HK 403	Technology, Health, and Aging	3 or 4

PSYC 245	Industrial Org Psych	3
Optional Health Focus		
Industrial Engineering Fundamentals (IEF)		
Track Core - complete the following 4 courses:		
IE 330	Industrial Quality Control	3
IE 411	Optimization of Large Systems	3
IE 412	OR Models for Mfg Systems	3
IE 340	Human Factors	4
SE 400	Engineering Law	3 or 4
Operations Research (OR)		
Track Core - complete the following 2 courses:		
IE 410	Advanced Topics in Stochastic Processes & Applications	3
IE 411	Optimization of Large Systems	3
Track Electives - complete 2 courses from this list:		
ECE 490	Introduction to Optimization	3
IE 420	Financial Engineering	3
MATH 444	Elementary Real Analysis	3-4
or MATH 447	Real Variables	
MATH 484	Nonlinear Programming	3 or 4
SE 400	Engineering Law	3 or 4
SE 411	Reliability Engineering	3
STAT 410	Statistics and Probability II	3
or MATH 464	Statistics and Probability II	
STAT 420/ASRM 450	Methods of Applied Statistics	3
STAT 424	Design of Experiments	3
STAT 425	Statistical Modeling I	3
Quality Engineering (QE)		
Track Core - complete the following course:		
IE 330	Industrial Quality Control	3
Track Core Elective - complete at least 1 of the following courses:		
IE 431	Design for Six Sigma	3
SE 400	Engineering Law	3 or 4
SE 411	Reliability Engineering	3
Track Elective- complete remaining courses from this list:		
STAT 410/MATH 464	Statistics and Probability II	3
STAT 420/ASRM 450	Methods of Applied Statistics	3
STAT 424	Design of Experiments	3
STAT 426	Statistical Modeling II	3
Supply Chain, Manufacturing and Logistics (SC&L)		
Track Core - complete the following course:		
IE 412	OR Models for Mfg Systems	3
Track Electives - complete 3 of the following courses:		
ECE 470	Introduction to Robotics	4
IE 330	Industrial Quality Control	3
ME 270	Design for Manufacturability	3
ME 451	Computer-Aided Mfg Systems	3
ME 452	Num Control of Mfg Processes	3
SE 400	Engineering Law	3 or 4

Technical Electives

Code	Title	Hours
Courses on these elective lists may only be used to fulfill one curricular requirement.		
Computer science elective selected from the departmentally approved list of Computer Science Electives below:		**3**
CS 225	Data Structures	4
CS 357	Numerical Methods I	3
CS 411	Database Systems	3
CS 450	Numerical Analysis	3
IE 405	Computing for ISE	3
IE technical electives selected from the departmentally approved list of IE Technical Electives below:		**3**
IE 330	Industrial Quality Control	3
IE 340	Human Factors	4
IE 411	Optimization of Large Systems	3
IE 412	OR Models for Mfg Systems	3
IE 420	Financial Engineering	3
IE 431	Design for Six Sigma	3
IE 445	Human Performance and Cognition in Context	3
SE 310	Design of Structures and Mechanisms	3
SE 320	Control Systems	4
SE 424	State Space Design for Control	3

Free Electives

Code	Title	Hours
Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		11
Total Hours of Curriculm to Graduate		**128**

for the degree of Bachelor of Science in Industrial Engineering

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.The curriculum sequence can also be viewed via dynamic and static curricular maps *(*https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/industrial-engineering-map/*), which include prerequisite sequencing.*

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*). One of the SBS courses must be an introductory economics course (*ECON 102 *or* ECON 103*).* SE 494 *and* SE 495 *will satisfy a core course requirement and the Campus General Education Advanced Composition requirement.*

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives *(*https://go.grainger.illinois.edu/FreeElectives*/), so that there are at least 128 credit hours earned toward the degree.*

for the degree of Bachelor of Science in Industrial Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Industrial Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Information Sciences, BS

for the Degree of Bachelor of Science Major in Information Sciences

The Bachelor of Science in Information Sciences (BSIS) prepares students for a wide range of careers within the knowledge economy. In today's technology-centered job market, there is a high demand for information professionals. By earning a BSIS from the School of Information Sciences (iSchool), you will gain a competitive edge. Our interdisciplinary, STEM-designated degree will prepare students for careers in a variety of fields. As a BSIS student, you'll learn how to manage data and other types of information to help organizations achieve their goals. You will become an information technology expert who understands the human perspective, social context, and policy implications.

Visit Information Sciences (https://ischool.illinois.edu/degrees-programs/undergraduate/), BS Degree website for more information

for the Degree of Bachelor of Science Major in Information Sciences

Minimum required major and supporting course work: Students must earn at least 51 hours in the School of Information Sciences or in approved courses offered by other departments. Students must demonstrate proficiency in at least one programming language.
General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements .
GPA Requirement: 2.5 - Earn a cumulative grade point average of 2.50 (A = 4.00) in all courses presented for the degree and a cumulative 2.50 grade point average for all courses taken in the School.

for the Degree of Bachelor of Science Major in Information Sciences

Program Goals

The goals of the program are to:

1. Equip students to be leaders in a knowledge society and innovators in a knowledge economy
2. Educate students for known, emerging, and currently unforeseeable careers in information sciences
3. Provide an interdisciplinary education where studies in fundamentals of information sciences and in application areas are fully integrated
4. Ensure that various upper-division elective pathways of the major share a common core of information sciences knowledge
5. Provide a program with enough flexibility to facilitate transfers into the major at the sophomore level, transfers across colleges at the sophomore and junior level, and transfers from two-year colleges
6. Since information sciences is a rapidly developing field, offer a flexible program that responds quickly to new needs and opportunities, and to new findings and approaches in the information sciences
7. Prepare interested students for graduate study in information sciences and related fields

Program Learning Outcomes

By the end of the program, students will be able to:

1. Understand relationships among people, information, and technology
2. Understand the history, theory, philosophy, and methodologies of the field of information sciences
3. Apply various approaches to research in the information sciences, including social science methods, data and text mining, digital humanities, historical approaches, and others
4. Apply critical analytical skills to information issues
5. Understand fundamental mathematical and programming tools for solving problems of information modeling, expression, and transformation

Information Sciences + Data Science, BS

For the Degree of Bachelor of Science in Information Sciences + Data Science

The Bachelor of Science in Information Sciences prepares students for a wide range of careers within the knowledge economy. In today's technology-centered job market, there is a high demand for information professionals. By earning a B.S. in Information Sciences (BS/IS) from the School of Information Sciences (iSchool), you will gain a competitive edge. Our interdisciplinary, STEM-designated degree will prepare students for careers in a variety of fields. As a BS/IS student, you'll learn how to manage data and other types of information to help organizations achieve their goals. You will become an information technology expert who understands the human perspective, social context, and policy implications.

Twelve hours of 300/400 level (advanced) courses in Information Sciences (IS) must be taken on this campus.

Meaningful Research or Discovery Experience

Code	Title	Hours
Total Hours		**6**
One of the most important skills a student will gain in a IS+DS degree will be the ability to present data in meaningful ways. A research or discovery experience is as much a pillar of this degree program as both the data science core coursework (Part 1) and the coursework in Information Sciences.		
IS 189	Independent Study	0 to 3
Examples of possible experiences may include:		
A semester study-abroad with at one or more courses focused on discovery while attending the international institution.		
A multi-semester capstone experience within the student's area of specialization.		
A semester co-op experience outside of the Champaign-Urbana area focused within the student's area of specialization.		
A multi-semester undergraduate research experience under the direction of iSchool faculty.		
A summer REU program focused within your area of specialization.

Information Systems, BS

for the degree of Bachelor of Science Major in Information Systems

The Information Systems major prepares students to comfortably navigate through the challenges posed by the new-age organizations and society that are increasingly getting digitized.

Students learn about the design, implementation, and protection of systems and technology to address the information processing needs of an organization, and provide data and information for managerial decision-making. IS majors take both, technology and business courses which equip them with the required skill-set to be able to design, develop and deploy computer and software-based solutions in order to help businesses attain their tactical and strategic objectives.

Some of the key courses taken by IS majors include information technology for networked organizations, systems analysis and design, and database management. Because computers and software are used in all functional areas of business today, IS majors may choose to take additional courses in data analytics, information security/cyber-security, project management, human-computer interaction, programming, and social media applications to strengthen their resume, gain a wider exposure to domains supported by IS specialists, and prepare themselves to face the challenges in the technology-driven business world of today. IS majors will have the required knowledge and skill-set to make decisions about the selection and implementation of information systems/information technology, be a liaison between non-technical managers, computer programmers, and technical managers, assume a wide variety of roles requiring computer-based solutions, and generally be business leaders of the digital era.

for the degree of Bachelor of Science Major in Information Systems

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on

the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Information Systems

Upon completion of the program, students will be able to:

1. Use critical thinking and problem-solving skills to provide solutions to businesses that leverage information technology.

2. Understand the intersection of technology and businesses, and recommend solutions to improve business performance and efficiency.

Innovation, Leadership & Engineering Entrepreneurship (ILEE), BS

for the degree of Bachelor of Science in Innovation, Leadership & Engineering Entrepreneurship

The Technology Entrepreneur Center offers studies leading to the Bachelor of Science in Innovation, Leadership, and Engineering Entrepreneurship (ILEE). The BS in ILEE degree is intended for Grainger Engineering students to better understand the innovative processes involved in identifying problems and creating, developing, and leading efforts to provide engineering solutions. The curriculum is based on a sound disciplinary engineering technical core with additional aspects of problem identification and innovation, and complex multidisciplinary engineering project management and leadership.

Currently, the BS in ILEE degree is only offered as a dual degree (double major) for current Grainger Engineering, Agricultural and Biological Engineering, and Chemical Engineering students.

for the degree of Bachelor of Science in Innovation, Leadership & Engineering Entrepreneurship

Students should follow their Grainger Engineering primary degree curriculum and take the additional required Orientation and Technical Core courses to earn a second bachelor's degree in ILEE.

Overview of Curricular Requirements

Students must complete all requirements specified for the primary engineering degree, and 31 hours for the second (ILEE) degree, for a minimum of 158 credit hours.

Innovation, Leadership and Engineering Entrepreneurship Orientation

for the degree of Bachelor of Science in Innovation, Leadership & Engineering Entrepreneurship

Learning objectives for the Innovation, Leadership, and Engineering Entrepreneurship Dual Degree BS Program are designed to allow Grainger Engineering students the opportunity to gain, sharpen, and refine their innovative, leadership, and entrepreneurship skill set through academic courses and hands-on experiential learning.

In conjunction with the student's primary/first department's curriculum, the Innovation, Leadership, and Engineering Entrepreneurship Program prepares students to achieve the following ABET outcomes by the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Instrumental Music, BMUS

for the degree of Bachelor of Music Major in Instrumental Music

Students may major in piano, organ, harpsichord, guitar, violin, viola, cello, double bass, harp, electric violin, electric viola, flute, oboe, bassoon, clarinet, saxophone, trumpet, horn, euphonium, trombone, tuba, or percussion.

for the degree of Bachelor of Music Major in Instrumental Music

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Students who wish to study voice or an instrument for credit are ~~credit are~~ required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities and the Arts (6 hours)		6
fulfilled by MUS 313 and MUS 314		
Natural Sciences and Technology (6 hours)		6
Social and Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)		0-15

Orientation Requirements

Code	Title	Hours
MUS 100	First-year Seminar for Music Majors	0

Instrumental Music Studies Core

Code	Title	Hours
MUS 242	**Elements of Conducting**	**2**
Music Lessons		
Woodwind, String, Percussion and Brass students register for one 3-credit hour lesson each semester for a minimum of eight consecutive semesters, unless otherwise advised by the applied teacher.		
Keyboard students register for one 4-credit lesson each semester		
Applied Music Lessons (years 1 & 2). Students choose from:		12-16
MUSC 101, MUSC 102, MUSC 103, MUSC 110, MUSC 111, MUSC 112, MUSC 113, MUSC 114, MUSC 115, MUSC 116, MUSC 117, MUSC 120, MUSC 121, MUSC 122, MUSC 123, MUSC 124, MUSC 125, MUSC 126, MUSC 127, MUSC 128, MUSC 129, MUSC 130		
Applied Music Lessons (years 3 & 4). Students choose from:		12-16
MUSC 401, MUSC 402, MUSC 403, MUSC 410, MUSC 411, MUSC 412, MUSC 413, MUSC 414, MUSC 415, MUSC 416, MUSC 417, MUSC 420, MUSC 421, MUSC 422, MUSC 423, MUSC 424, MUSC 425, MUSC 426, MUSC 427, MUSC 428, MUSC 429, MUSC 430		
Ensemble, MUSC 400-level courses		**4-8**
Instrumental Music majors are required to be in a major ensemble each semester of residence; a maximum of 10 hours of ensemble may be applied to the BMUS Instrumental Music degree.		
Keyboard performance majors take only four semesters of ensemble and may substitute accompanying for ensemble credit.		
Students may choose from:		
MUSC 473, MUSC 475, MUSC 476, MUSC 477, MUSC 480, MUSC 481, MUSC 482, MUSC 483		
Advanced Musicology or Music Theory		**3**
Students may choose from:		
MUS 400, MUS 407, MUS 408, MUS 409, MUS 410, MUS 411, MUS 412, MUS 413, MUS 414, MUS 415, MUS 416, MUS 418, MUS 421, and MUS 426.		
Recital		
Third- and fourth-year students must present satisfactory public junior and senior recitals as part of the requirements for the Bachelor of Music in Instrumental Music.		
MUSC 300	Junior Recital	0
MUSC 400	Senior Recital	0
Total Hours		**33-45**

Instrumental Music Options

Woodwind Requirements

Code	Title	Hours
Upper-Level Music Electives (MUS courses, 300- or 400-level)		5

Brass Requirements

Code	Title	Hours
MUSC 454	Brass Ensemble (8 semesters)	8
MUS 199	Undergraduate Open Seminar (Applied Instrument Literature, Brass Quintet Literature)	2
MUS 430	Applied Music Pedagogy	2
Upper-Level Music Electives (MUS courses, 300- or 400-level)		3

Percussion Requirements

Code	Title	Hours
MUSC 455	Percussion Ensemble (4 semesters)	4
MUSC 456	Steel Band (2 semesters)	2
MUS 430	Applied Music Pedagogy (2 semesters)	4

Upper-Level Music Electives (MUS courses, 300- or 400-level)		3

String Requirements

Code	Title	Hours
MUSC 450	Chamber Music (6 semesters)	6
Upper-Level Music Electives (MUS courses, 300- or 400-level)		5

Keyboard Requirements

Code	Title	Hours
Minor Keyboard Instrument		6
Keyboard students take a minimum of three 2-credit hour applied lessons (100-level) on a minor keyboard instrument.		
MUS 317	Intro to Piano Literature	3
MUS 318	Introduction to Piano Literature II	3
MUS 431	Piano Pedagogy I	2
MUS 432	Piano Pedagogy II	2

MUS 454	Advanced Keyboard Skills I	2
Upper-Level Music Electives (MUS courses, 300- or 400-level)		3

Summary of Credit for the Bachelor of Music in Instrumental Music

Code	Title	Hours
General Education		
Orientation		1
Music Core		29
Instrumental Music core		33-45
Instrumental Music options		5-21
Free electives to bring the total hours earned to 120		
A minimum of 40 credits at the 300- or 400-level must be completed for this degree		
8 of these hours are fulfilled by MUS 201, MUS 202, MUS 207, and MUS 208, each of which has at least 2 prerequisites and may count as advanced		
A maximum of 8 hours of upper level coursework may be earned through ensembles, MUSC 447 through MUSC 498		
Total Hours		**120**

for the degree of Bachelor of Music Major in Instrumental Music

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This sample curriculum plan makes the assumption that the foreign language graduation requirement has been satisfied by completing three years of study of a single foreign language in high school. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Separate sample schedules are below for Woodwind, Brass, Percussion, Strings, and Keyboard. Please scroll down to see them all.

Total Hours 120

for the degree of Bachelor of Music Major in Instrumental Music

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.

8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Integrative Biology, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Integrative Biology

In the **School of Integrative Biology (SIB)**, students receive interdisciplinary training to prepare them for 21st-century scientific roles. We occupy a unique position on campus. Our majors explore how scales of life interact, from molecules through global cycles, to solve grand challenges such as addressing global change, improving human health, mitigating biodiversity loss, and contributing to ecosystem restoration and sustainable food and biofuel production. The SIB community collaborates extensively on both research and teaching, leading to multi-disciplinary courses grounded in active learning and highly transferable, higher-order processing skills such as application, interpretation, and evaluation. Students build laboratory skills spanning from tall grass prairie restoration to modern genome-editing techniques. The IB curriculum includes preparation in genomics and evolution; comparative anatomy, physiology, and development; ecology and behavior; phylogenetic systematics and molecular biology; and mathematical modeling and informatics. Graduates are well-equipped for a broad range of careers in fields including healthcare, biotechnology, genetic counseling, wildlife management, and environmental sciences.

For students interested in the 5-year, combined BSLAS & MS in Integrative Biology program visit the Integrative Biology, BSLAS-MS catalog page (p. 896).

For students interested in adding educational licensure to the BSLAS in Integrative Biology, visit the Teacher Education Minor in Secondary School Teaching catalog page (p. 1028).

Students pursuing a degree in Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.

Distinction for Excellence in Research

Students are eligible for graduation at the following levels: Distinction, High Distinction, or Highest Distinction. Distinction will be determined by the SIB Distinction Committee and the level of Distinction will be based on the information below. To be eligible for graduation with Distinction for Excellence in Research a student must:

- Be enrolled as an Integrative Biology or Integrative Biology Honors major
- Have a completed distinction evaluation form submitted by their Faculty Research Advisor
- To be eligible for Distinction, students must maintain a minimum 3.0 GPA within the major at the end of the penultimate semester. Students must also give a poster presentation at the SIB Distinction Symposium or other approved venue.
- To be eligible for High or Highest Distinction, students must maintain a minimum 3.25 GPA within the major at the end of the penultimate semester. Students must also submit a written thesis and give an oral presentation at the SIB Distinction Symposium or other approved venue.
- Finally, all students regardless of Distinction level must either:

1. Complete two or more semesters of IB 390/IB 490 for 2-credit hours or more each semester. The student should enroll in IB 490 the semester they intend to graduate, which counts towards the two required semesters.

   OR

2. Complete at least 180 hours of mentored research. The research experience must last a minimum of 20 weeks (the weeks need not be consecutive and summer research counts toward this total) and students should enroll in one semester of IB 490 for a minimum of 1-credit hour prior to or during the semester they intend to graduate. Example: a student could be eligible if they complete a 10-week summer research experience combined with enrolling in IB 490 the following spring semester, the same term they intend to graduate.

for the degree of Bachelor of Science in Liberal Arts & Sciences in Integrative Biology

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum required major and supporting course work: Normally equates to to 66-75 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (p. 2).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by IB 203		
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6

MCB 300	Microbiology
MCB 314	Introduction to Neurobiology
MCB 450	Introductory Biochemistry

for the degree of Bachelor of Science in Liberal Arts & Sciences in Integrative Biology

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page (p. 2)*.*

for the degree of Bachelor of Science in Liberal Arts & Sciences in Integrative Biology

By the time they graduate, an Integrative Biology major should be able to:

1. Synthesize and apply core knowledge in Integrative Biology, including anatomy, development, ecology, evolution, genetics, molecular biology, physiology, and/or systematics.
2. Apply predictive models to biological phenomena and engage with the process of scientific inquiry.
3. Critically evaluate and communicate complex, dynamic scientific information.
4. Employ curiosity, inquiry, quantitative reasoning, and critical thinking in problem solving.
5. Create solutions for global and local biological challenges using interdisciplinary strategies.
6. Develop professional skills including ethics, proficiency in oral and written scientific communication, data analysis and interpretation, collaboration, and the ability to critically evaluate science-related news and information.

Integrative Biology: Honors Integrative Biology, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Integrative Biology, Honors Integrative Biology Concentration

Honors Integrative Biology is designed for students wishing to pursue an intensive program in integrative biology and, concurrently, to gain a strong background in the physical sciences and mathematics. Admission is by interview in spring of the freshman year prior to registration for fall. An overall 3.0 GPA is required to apply for admission. Honors Integrative Biology provides preparation suitable for graduate and professional training in biology, as well as for biology careers in the private and public sectors. Students earning the Honors Integrative Biology Concentration will also earn the Chemistry minor.

Students pursuing a degree in Honors Integrative Biology will be allowed to earn a second degree in the Specialized Curriculum in Biochemistry. Students pursuing a degree in Honors Integrative Biology will not be allowed to double major in Molecular and Cellular Biology.

Distinction for Excellence in Research:

Students are eligible for graduation at the following levels: Distinction, High Distinction, or Highest Distinction. Distinction will be determined by the SIB Distinction Committee and the level of Distinction will be based on the information below. To be eligible for graduation with Distinction for Excellence in Research a student must:

- Be enrolled as an Integrative Biology or Integrative Biology Honors Major
- Have a completed distinction evaluation form submitted by their Faculty Research Advisor.
- To be eligible for Distinction, students must maintain a minimum 3.0 GPA within the major at the end of the penultimate semester. Students must also give a poster presentation at the SIB Distinction Symposium or other approved venue.
- To be eligible for High or Highest Distinction, students must maintain a minimum 3.25 GPA within the major at the end of the penultimate semester. Students must also submit a written thesis and give an

oral presentation at the SIB Distinction Symposium or other approved venue.

- Finally, all students regardless of Distinction level must either:

Complete two or more semesters of IB 390/IB 490 for 2-credit hours or more each semester. The student should enroll in IB 490 the semester they intend to graduate, which counts towards the two required semesters.

OR

Complete at least 180 hours of mentored research. The research experience must last a minimum of 20 weeks (the weeks need not be consecutive and summer research counts toward this total) and students should enroll in one semester of IB 490 for a minimum of 1-credit hour prior to or during the semester they intend to graduate. Example: a student could be eligible if they complete a 10-week summer research experience combined with enrolling in IB 490 the following spring semester, the same term they intend to graduate.

for the degree of Bachelor of Science in Liberal Arts & Sciences in Integrative Biology, Honors Integrative Biology Concentration

Graduation Requirements

Minimum hours for graduation: 120 hours
Minimum required major and supporting course work: Normally equates to 80-88 hours.
No more than 8 hours of credit in 100-level courses in IB or MCB may be counted toward graduation.

Continuation in the Integrative Biology Honors Concentration requires a grade of B or better in each of IB 270, IB 271, and IB 372 and a 3.0 overall cumulative GPA.

Students should discuss alternate CHEM choices with the IB advising office. To earn the Chemistry minor students must choose 3 or 4 hour Chemistry courses, excluding research or independent study.

Introductory chemistry should be completed prior to enrolling in IB 270.

Independent study equivalent to IB 490 in non-IB programs must first be approved by Director of IBH Concentration.

Students may count toward graduation no more than a combined maximum of 10 hours of IB 390 and IB 490 credit offered for independent study.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Liberal Arts & Sciences in Integrative Biology, Honors Integrative Biology Concentration

---

By the time they graduate, an Integrative Biology Honors major should be able to:

1. Synthesize and apply significant knowledge in Integrative Biology, including anatomy, development, ecology, evolution, genetics, molecular biology, physiology, and/or systematics.
2. Apply predictive models to biological phenomena and engage with the process of scientific inquiry.
3. Critically evaluate and communicate complex, dynamic scientific information.
4. Employ curiosity, inquiry, quantitative reasoning, and critical thinking in problem solving.
5. Create solutions for global and local biological challenges using interdisciplinary strategies.
6. Develop professional skills including ethics, proficiency in oral and written scientific communication, data analysis and interpretation, collaboration, and the ability to critically evaluate science-related news and information.

Interdisciplinary Health Sciences, BS

for the degree of Bachelor of Science Major in Interdisciplinary Health Sciences

Interdisciplinary Health Sciences encourages students to examine today's complex health issues from a variety of perspectives. This degree provides students with a holistic view of health that can be customized for their professional goals and needs. The curriculum is structured to provide students an excellent foundation that can lead to numerous professional and scientific health-based careers. Students may build a customized program addressing their specific interests within three concentration areas, of which a student must complete at least one:

- Health & Aging Concentration (p. 467)
- Health Behavior Change Concentration (p. 469)
- Health Diversity Concentration (http://catalog.illinois.edu/undergraduate/ahs/interdisciplinary-health-sciences/health-diverse/)
- Health Technology Concentration (p. 475)

for the degree of Bachelor of Science Major in Interdisciplinary Health Sciences

1. Students will understand the influence of behavior and culture on health and well-being.
2. Students will gain a comprehensive and holistic perspective of health which will prepare them to enter a variety of health related careers.
3. Students will apply health-related knowledge through community service and experientially-based opportunities.
4. Students will be able to identify various health determinants in order to improve equity and access for vulnerable populations.

Interdisciplinary Health Sciences: Health & Aging, BS

for the degree of Bachelor of Science Major in Interdisciplinary Health Science, Health & Aging Concentration

Interdisciplinary Health Sciences encourages students to examine today's complex health issues from a variety of perspectives. This degree provides students with a holistic view of health that can be customized for their professional goals and needs. The curriculum is structured to provide students an excellent foundation that can lead to numerous professional and scientific health-based careers. Students may build a customized program addressing their specific interests within three concentration areas.

The concentration in Health & Aging emphasizes the health process across the lifespan with a particular focus on people from young adult to the end-of-life. It also provides opportunities to focus on specific aspects of aging, such as physical activity, nutrition, and communication processes.

Interdisciplinary Health Sciences: Health Behavior Change, BS

for the degree of Bachelor of Science in Interdisciplinary Health Sciences, Health Behavior Change Concentration

Interdisciplinary Health Sciences (or I-Health) is a unique and innovative undergraduate program that reflects the trajectory of the healthcare industry. I-Health teaches students to look at health care more holistically and draw from the knowledge of several other fields to develop innovative new solutions to health-related problems. Graduates leave the program not only armed with a deep knowledge of biology and other sciences, but with the ability to comprehensively care for the whole person.

The Health & Behavior Change concentration will help students understand the interplay among personal traits, family contexts, social structures, and cultural factors that play a role in healthy lifestyles. This includes developing strategies to implement and evaluate interventions that foster constructive health behaviors.

Interdisciplinary Health Sciences: Health Diversity, BS

for the degree of Bachelor of Science in Interdisciplinary Health Sciences, Health Diversity Concentration

Interdisciplinary Health Sciences (or I-Health) is a unique and innovative undergraduate program that reflects the trajectory of the healthcare industry. I-Health teaches students to look at health care more holistically and draw from the knowledge of several other fields to develop innovative new solutions to health-related problems. Graduates leave the program not only armed with a deep knowledge of biology and other sciences, but with the ability to comprehensively care for the whole person.

The Health & Diversity concentration will help students develop an understanding of the varied health needs of an increasingly diverse population. Coursework is directed at understanding health in light of several diversity factors including groups who may be marginalized due to poverty or social status.

for the degree of Bachelor of Science in Interdisciplinary Health Science, Health Technology Concentration

Upon successful completion of this program, students will be able to:

1. Discuss the field of health technology.
2. Discuss human factors methods and techniques.
3. Examine health behaviors in relation to health technology.
4. Perform introductory computing skills relevant to health technology.
5. Utilize knowledge from social, business, human factors, behavioral and information sciences and technology to design, implement, and evaluate health informatics solutions.

Interdisciplinary Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies

Students pursuing this major select one of two concentrations:

- Jewish Studies Concentration (p. 480)
- Medieval Studies Concentration (p. 482)

Requirements

Elect one of the concentrations offered within the major and file a concentration declaration with the LAS Student Academic Affairs Office no later than the end of the first semester of the junior year. Students who do not begin work on concentration requirements by the junior year will be at a disadvantage.

Select specific courses counted toward completion of a concentration with the advice and approval of the concentration advisor, subject to specific concentration requirements. Students are strongly encouraged also to enroll in 6-7 hours of Western civilization (HIST 140 or HIST 141 and HIST 142 or HIST 143, or CWL 241 and CWL 242).

For the elected concentration, complete the stated minimum number of hours in courses applicable toward the major and in accord with the concentration requirements; at least 25 hours must be at the 200, 300 or 400 level.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies

Interdisciplinary Studies: Medieval Studies, BALAS

After completing this program, students will have:

1. A broad and deep knowledge of the world's medieval cultures (ca. 500 - ca. 1500 CE).
2. An understanding of the periods and movements, institutions, material culture, ideas, beliefs, and values of the diverse cultures that comprise the medieval globe.
3. A capstone experience involving original research in a medieval topic.

Interdisciplinary Studies: Jewish Studies, BALAS

After completing this program, students will have:

1. A broad and deep knowledge of Jewish cultures, history, and religion, covering topics from Biblical Hebrew and the Holocaust to Jewish literature, cinema, and modern ideologies.
2. An understanding of the periods and movements, literatures and cultures, religious practices, and the values and beliefs of diverse Jewish communities around the globe.
3. An opportunity to study the Hebrew language and Yiddish.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies

Overview of College Admissions & Requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)

College of Liberal Arts and Sciences website (https://las.illinois.edu/)

Interdisciplinary Studies: Jewish Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Interdisciplinary Studies, Jewish Studies Concentration

The Program in Jewish Culture & Society (https://jewishculture.illinois.edu/) sponsors this concentration. This concentration provides the student with knowledge of the Hebrew language, the opportunity to begin a study of Yiddish, and a broad appreciation of Jewish religion, culture, and history.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Interdisciplinary Studies, Jewish Studies Concentration

All substitutions must be approved by the Advisor in the Program in Jewish Culture and Society Office (https://jewishculture.illinois.edu/academics/undergraduate/jewish-studies-major/). Substitution for specific courses listed will be approved by the concentration advisor only in exceptional cases.

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction: To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

High distinction: To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 45-51 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Interdisciplinary Studies: Medieval Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies, Medieval Studies Concentration

The Program in Medieval Studies (https://medieval.illinois.edu/) sponsors this concentration.

This concentration immerses students in the societies of the medieval world (ca. 500- ca. 1500 CE), providing them with a deep understanding of the periods and movements, institutions, material culture, ideas, beliefs, and values that comprise the medieval globe, with particular attention to premodern Afro-Eurasia as an integrated space of encounter. Coursework spans geographic regions and disciplines to emphasize to the breadth of medieval cultures as well as the diversity of methods and perspectives for their study.

The concentration includes a minimum of 45 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework; (III) advanced medieval coursework selected by the student in consultation with a Medieval Studies faculty advisor; and (IV) a capstone experience involving an intensive writing and research project. Because Medieval Studies is an interdisciplinary field of study, students are urged to consult with a Medieval Studies faculty advisor to ensure that they take a range of courses providing some exposure to the fields of History and Anthropology; Literature; the Arts; and Philosophy or Religion. Although study of medieval languages is not a requirement, students who intend to pursue graduate study should complete at least two courses in an appropriate language; up to twelve hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Interdisciplinary Studies, Medieval Studies Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Substitution for specific courses listed below will be approved by the concentration advisor only in exceptional cases.

Departmental distinction: To be eligible for graduation with distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.5, completion of HUM 498 with a grade of A, and completion of a semester paper in HUM 498 that is judged to be deserving of "distinction" by a committee of at least two faculty members.

> High distinction: To be eligible for graduation with high distinction, a student must have a college grade point average of 3.5, a major concentration grade point average of 3.7, and must have completed HUM 492 (instead of HUM 498) with a grade of A and a thesis in HUM 492 that is judged to be deserving of "high distinction" by a committee of at least two faculty members.

Medieval Studies Concentration Requirements

Graduation Requirements

Minimum hours required for graduation: 120 hours. Minimum hours of required major and supporting course work: Normally equates to 45 or 49 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

REL/CWL 283	Jewish Sacred Literature	
REL/JS/MDVL 344	Jewish Intellectual History: Encounters with Islam and Christianity	
Additional Medieval Studies Coursework		
Medieval-related coursework from participating departments selected in consultation with the concentration advisor. At least 12 hours must be at the 300- or 400-level. Up to 12 hours of appropriate language study can be applied to meet this requirement with approval of a Medieval Studies faculty advisor.		21
Capstone Experience		
A capstone experience (normally in the student's senior year) involving intensive interdisciplinary research and writing on a medieval topic. Any 400-level MDVL course (or medieval-related course not cross-listed with MDVL, with the approval of a Medieval Studies faculty advisor) can be designated as a capstone experience with approval of the instructor. For the course to qualify as a capstone experience, the student must undertake a substantial research project that supplements the standard course requirements, in the form either of an additional project or of a longer and more research-intensive version of an existing course project. The project must involve both primary and secondary research using advanced disciplinary methodologies and resources.		3
(A student may also petition to satisfy the capstone experience by enrolling in MDVL 500, Seminar in Medieval Studies)		
Total Hours		**45**

Italian, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Italian

Major in Italian Studies

The major in Italian Studies at Illinois offers students a comprehensive and interdisciplinary introduction to the study of Italy in a larger Mediterranean, European and global context, covering Italian language, history, culture, and literature. With professors, lecturers and a team of graduate students from the United States and Italy, all of whom are committed to undergraduate education, we are able to offer not simply a series of courses in Italian Studies, but a major and minor where students get to know the faculty and instructors personally. Study abroad is not required, but is typically a rewarding and significant part of the major in Italian Studies at Illinois. The major in Italian Studies strongly emphasizes skills that are valuable for our student's future careers, but also for their future as global citizens, and their life of the mind: extensive knowledge of a foreign language; strong written and verbal communication skills; cultural and cross-cultural knowledge and understanding; and critical thinking skills.

5 Year BALAS /MA in Italian and European Union Studies

The Department of French and Italian with the European Union Center offers a 5-year BALAS/MA degree program in Italian and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS–granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Italian

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Italian

Upon graduating with a major in Italian, students shall be able to do the following:

1. **Language proficiency and accuracy:** reach proficiency and accuracy in written and oral comprehension and production of Italian (based on proficiency guidelines outlined by the American Council on the Teaching of Foreign Languages [ACTFL] and the Common European Framework of Reference for Languages [CEFRL]).
2. **Research skills and literacy in text, media, and technology in Italian:** access, manage, evaluate, and effectively use culturally relevant sources according to the standards of professional conduct; understand how these resources relate to language and culture; use appropriate tools when interpreting sources, interacting with others, and producing written, oral, or visual content; develop sensitivity to the changes in cultures and languages produced by emerging technologies.
3. **Intercultural awareness, knowledge, and competence:** develop an awareness of differences between Italian and their own cultures.Identify implicit assumptions present in Italian linguistic practices and relate them to their own cultural conventions. Learn how to identify the cultural component of everyday practices, from food to body language, and recognize difference as culturally specific.
4. **Proficiency in Italian Literature and Culture:** acquire familiarity with Italian literature and culture, their history and their contexts, as well as the critical tools used in their analysis.
5. **Competence in Italian linguistics:** acquire competence in the structure and history of the Italian language.

Jazz Performance, BMUS

for the degree of Bachelor of Music Major in Jazz Performance

Students majoring in jazz performance may do so with piano, double bass, saxophone/clarinet, trumpet, trombone, percussion, guitar, strings, or voice as the major instrument.

for the degree of Bachelor of Music Major in Jazz Performance

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Total Hours 120

for the degree of Bachelor of Music Major in Jazz Performance

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Journalism, BS

for the degree of Bachelor of Science in Journalism

JOURNALISM (JOUR), prepares the next generation of journalists to explore and report on the diversity of ideas, people and events in a democratic society. Students learn the reporting, writing, editing, producing, and multimedia skills and concepts required to produce accurate, fair, and thorough journalism and to navigate the ever-changing news media landscape. Journalism graduates combine strong professional training with a broad liberal arts education to pursue careers in online newsrooms, television and radio stations, newspapers and magazines and emerging media.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the degree of Bachelor of Science in Journalism

Minimum hours for graduation is 124, to include a minimum of 40 hours of upper-division coursework generally at the 300- and 400-level. These hours can be drawn from all elements of the degree.

Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

All required courses must be taken for a letter grade.

Code	Title	Hours
Required Major Courses		**40**
JOUR 200	Introduction to Journalism	3
JOUR 205	History of American Journalism	3
or JOUR 452	Great Books of Journalism	
JOUR 210	Newsgathering Across Platforms	4

for the degree of Bachelor of Science in Journalism

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Electives are additional courses to help students achieve 124 hours required for the degree. Journalism Electives are any additional Journalism courses not already counting toward the major requirements. These electives can often be any level, but students should check with their advisor for specific guidance.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This may require up to three semesters of language depending on high school coursework or placement. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Journalism

1. Understand and apply theory and law related to journalism and the First Amendment in the United States.
2. Communicate and present information clearly and effectively across a variety of media platforms.
3. Apply critical thinking and various research methods—including numerical, statistical, and data visualization techniques—to evaluate information and accurately communicate relevant facts.
4. Understand and apply current and emerging tools and technologies in multimedia journalism to tell impactful and innovative stories that engage modern audiences.
5. Understand the history of journalism and the role of news professionals and institutions in shaping the development of the media industry and the nation.
6. Understand and apply principles and practices of ethical journalism in the pursuit of truth, accuracy, and fairness.
7. Practice journalism that respectfully and accurately represents people who are often ignored or misrepresented.
8. Critically evaluate journalism products for accuracy, fairness, clarity, style, and grammar.

Kinesiology, BS

for the Bachelor of Science Major in Kinesiology

The Kinesiology curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student's area of concentration within Kinesiology.

The Kinesiology program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control, and skill of physical activity; physical growth, development, and body form throughout the lifespan; the effects of therapeutic techniques of Kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website (http://www.mph.illinois.edu/Program/).

for the Bachelor of Science Major in Kinesiology

As of August, the Department of Kinesiology and Community Health is changing its name to the Department of Health and Kinesiology. Students who need information about registration, courses and rubrics can visit this page (https://publish.illinois.edu/hkcourseinfo/).

Requirements Including General Education

The Kinesiology Program requires that General Education requirements must be selected from the Campus General Education course list. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list. Specifically required General Education courses are listed below.

for the Bachelor of Science Major in Kinesiology

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students are required to meet with an academic advisor each semester to determine the actual course selection and sequence that works best for them based on their academic preparation and career goals/graduate school preparation, and to review remaining degree requirements and plan for upcoming semesters. Course availability is not guaranteed during the semester indicated in the sample sequence. Many factors may affect the plan, some of which include:

- Advanced placement and/or dual credit earned prior to enrollment
- LOTE (Language Other Than English) could be completed in high school
- Degree requires 128 total hours
- Correlate area courses determined by career or graduate program interests and can exceed 18 hour minimum
- Enrichment programming such as study abroad, minors, internships, etc.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page. (http://catalog.illinois.edu/general-information/degree-general-education-requirements/)

for the Bachelor of Science Major in Kinesiology

1. **Content Knowledge**: Students will know and comprehend the significant theories, models, themes, and ideas in the biomechanical, physiological, behavioral, pedagogical, biological, socioeconomic, environmental, and sociocultural correlates of Kinesiology and Community Health.
2. **Critical Thinking and Discovery**: Students will comprehend and demonstrate ethical practices and the application of scientific findings and/or critical analysis in order to interpret, promote inquiry, propose solutions, and/or create new ideas related to health, rehabilitation, and/or human movement.
3. **Awareness and Understanding**: Students will understand and appreciate the diverse socioeconomic, behavioral, sociocultural,

biological, environmental, philosophical, and historical factors that influence health, rehabilitation, and human movement.

4. **Programming and Assessment**: Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases.
5. **Leadership and Engagement**: Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

Kinesiology: Teacher Education K-12, BS

for the Bachelor of Science Major in Kinesiology, Teacher Education K-12 Concentration

Application to the Teacher Licensure curriculum is made at the end of the sophomore year. Admission depends on meeting minimum grade point average requirements. In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages. To learn more about the teacher licensure program in Kinesiology, please visit here (https://ahs.illinois.edu/teacher-licensure/).

for the Bachelor of Science Major in Kinesiology, Teacher Education K-12 Concentration

Requirements Including General Education

The Kinesiology Program requires that General Education requirements must be selected from the Campus General Education course list. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list. Specifically required General Education courses are listed below.

Requirements for Teacher Licensure

Application to the Teacher Licensure curriculum is made at the end of the sophomore year. Admission depends on meeting minimum grade point average requirements. Students must pass an Illinois-approved content-area test of basic skills prior to student teaching.

In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain UIUC, cumulative, and content area grade point averages of 2.5 (A=4.0), and a professional education grade point average of 3.0. Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade point averages. In addition, candidates must receive a B- or higher in KIN 360, KIN 361, KIN 362, KIN 363, KIN 364, and KIN 460, and meet professional standards of scholarship, ethics, and responsibility as evaluated by the Physical Education Area of

Specialization Committee. In addition, students must complete all professional education and content-area courses with a grade of C- or better for licensure.

The department's administrative office, upper-level studios, faculty offices, and classrooms are located in Temple Hoyne Buell Hall. The department also has a studio is located in Mumford Hall.

for the degree of Bachelor of Landscape Architecture

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (p. 2).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the unit.

for the degree of Bachelor of Landscape Architecture

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This may require up to three semesters of language depending on high school coursework or placement. See the corresponding section on the Degree and General Education Requirements page (p. 2).

for the degree of Bachelor of Landscape Architecture

Bachelor of Landscape Architecture students will:

1. **Build Knowledge & Develop Reasoning Skills** in applying broad and deep knowledge across academic disciplines and fields and using this knowledge to develop design proposals.
2. Apply knowledge of the **Natural World** to guide design decisions and activities taking into account natural resource constraints that impact land use.
3. **Strengthen Social Awareness** to better understand the social and cultural influences on human behavior and the social, political, economic, and legal institutions which influence land-use and design decisions.
4. Employ **Creative Inquiry and Discovery** in addition to a range of analytical skills, and general knowledge to develop design proposals, solve problems, generate new ideas, and produce creative work.
5. Demonstrate **Responsible Leadership** in working with the land and the people for whom we design.

Latin American Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies

A major in Latin American Studies, which is administered by the Center for Latin American and Caribbean Studies, provides an integrated exploration of a major world area. Depending upon the student's interests and career aspirations, individual programs of study are designed in close consultation with the Associate Director of the Center, who also serves as the academic adviser. Consultation revolves around the career goals of the student. The undergraduate program reflects an integrative, cross-disciplinary approach, and courses must be taken from these categories:

1. LAST 170 (http://catalog.illinois.edu/search/?P=LAST%20170)- Introduction to Latin American Studies;
2. Approved courses with content focused on Latin America;
3. Approved courses with content focused on Latin America in a global context;
4. LAST 490 (http://catalog.illinois.edu/search/?P=LAST%20490) - Independent Study, or approved Study Abroad course, or approved service-learning course.

Courses for the major must be selected in consultation with the Associate Director of the Center.

Students are also expected to demonstrate a substantial command of a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Mesoamerica or South America), either by passing a proficiency examination or through advanced courses of Latin American language(s) beyond the general Liberal Arts and Sciences language requirement.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies

Each student's course of study is devised in consultation with the Associate Director of the Center for Latin American and Caribbean Studies and is subject to the Associate Director's approval.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Graduation Requirements

Minimum hours required for graduation: 120 hours. Minimum required major and supporting course work: 33 hours.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Latin American Studies

1. **Strong Declarative Knowledge Base** on Latin American Culture and its position in the broader global world
   - Students should understand the diversity and complexity of Latin American cultures and languages and their historical, cultural, political, and economic development.
   - Students should develop appropriate expertise on a sub-region or culture of Latin America and/or a thematic topic related to Latin America
   - Students should also be able to place their knowledge of Latin American in a broader global context.
2. **Critical Thinking**
   - Students should be able to critically and reasonably evaluate and formulate claims about social, cultural, political, historic, and economic issues related to Latin America in both academic and popular media.
   - Students should be able to critically and reasonably evaluate and apply their knowledge to real world problems.
3. **Effective Written Communication**
   - Students should be able to identify research problems, approach these problems with appropriate methodologies and effectively communicate the results. They should be able to apply their knowledge to real world situations.
   - Students should be able to effectively communicate their knowledge of Latin American culture and language to a broad non-specialist audience.
4. **Advanced Proficiency in Spanish or Portuguese OR Intermediate – High proficiency in an Indigenous Latin American Language** - This will be assessed through completion of appropriate level course work and through OPI or equivalent testing.

Latina/Latino Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Latina/Latino Studies

---

The Undergraduate Major in Latina/Latino Studies explores the experiences and lives of Latinas/os in the context of the United States. The major provides a broad and deep approach to theory, research, and multidisciplinary study of the Latina/o experience. Students will complete 34 hours of required and elective courses, and a minimum of 18 hours of supporting course work or a minor in an area outside of the major. Students majoring in Latina/Latino Studies receive excellent preparation for graduate study or careers in education, social and welfare policy, counseling, law, public policy, and other fields that address Latino issues.

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Latina/Latino Studies

---

Advising: The Department of Latina/Latino Studies provides advising for students. Students will also be assigned a faculty advisor to help plan a coherent program in their selected area of study.

Departmental distinction: To graduate with distinction in Latina/Latino Studies, a student must have at least a 3.25 overall GPA, a minimum 3.5 GPA in the major, and complete a senior honors thesis. To complete the honors thesis requires a student to enroll in four hours of LLS 495, normally distributed evenly across two consecutive semesters. Students graduating with at least a 3.5 GPA in the major (and meeting the other conditions) will be awarded Distinction; those with at least a 3.7 GPA in the major will be given High Distinction.

Graduation Requirements

Minimum hours required for graduation: 120

Minimum required major and supporting course work: 52 hours required, including 34 hours in Latina/Latino Studies courses. Twelve hours of 300- and 400-level in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (p. 2).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Total Hours: 120

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Latina/Latino Studies

1. **Intellectual Reasoning and Knowledge:** Students will become proficient in the field of Latina/Latino Studies, which includes, but is not limited to, interdisciplinary, intersectional, and transnational knowledge about:
   a. sociohistorical, political, economic and cultural processes that affect Latina/Latino groups in contemporary society;
   b. Latina/Latino social movements;
   c. Latina/Latino cultural productions;
   d. the relationship between class, gender, sexuality, race/ethnicity and migration in the construction of Latina/Latino cultural and racial formations; and
   e. Latina/Latino Studies theories and methods. Students will learn that Latina/Latino Studies is a body of critical inquiry that encompasses a wide range of topics and objects of study, and that leverages multiple forms of knowledge production.
2. **Critical and Creative Inquiry:** Students will apply Latina/Latino Studies theories in developing their capacities for critical and creative inquiry. Specifically, students will exercise their oral and written communication skills as they express new ideas and generate projects that build upon Latina/Latino Studies theories and draw from the range of interdisciplinary Latina/Latino Studies methods.
3. **Self-Reflexivity and Community Engagement:** To help promote effective leadership and community engagement, students will demonstrate self-reflexivity about their ideas as well as about their social and political positions in their classrooms and communities. They will also learn to build and sustain relationships and take leadership towards the elimination of social inequities at the local, national, and global levels.
4. **Social Awareness and Understanding Power:** Student will recognize that Latina/Latino lives and communities unfold within historically unequal and racialized social, cultural, economic, and political power relations. Students will become familiar with Latina/Latino theories and social movements that consider indigeneity, race, class, gender, sexuality and citizenship to understand and intervene on historical and contemporary power formations.
5. **Global Consciousness:** Students will understand how complex and interdependent historical and contemporary global forces—environmental, social, cultural, economic, and political— impact and are impacted by Latinas/Latinos. They will learn to apply Latina/

Latino Studies critiques to these forces, including but not limited to those related to migration and transnationalism.

Learning & Education Studies, BS

for the degree of Bachelor of Science in Learning & Education Studies

The **Learning & Education Studies, BS** allows students to explore education outside the licensed teaching profession. A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program.

The program focuses on the demand of professionals who bring an education perspective to a range of industries such as business, non-profit organizations, healthcare, and technology settings. Students will take a set of core courses, as well as coursework in one of the following concentrations:

- Educational Equality and Cultural Understanding (p. 509)
- Educational Technology
- Inclusive Leadership & Learning in Organizations (p. 514)
- Workplace Training and Development (p. 516)

for the degree of Bachelor of Science in Learning & Education Studies

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (p. 2).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Learning & Education Studies: Educational Equality & Cultural Understanding, BS

for the degree of Bachelor of Science in Learning & Education Studies, Educational Equality & Cultural Understanding concentration

The Learning & Education Studies, Educational Equality & Cultural Understanding concentration is not currently accepting applications. Suspension of admissions effective Spring 2026.

The **Learning & Education Studies, BS** with a concentration in Educational Equality & Cultural Understanding will prepare students to better understand the role of education in enabling equality and cultural understanding in domestic and international perspectives. Focusing on equality, diversity, and cultural understanding will give students a unique perspective on the historical place of education in both challenging inequities and helping to justify social divisions. Classes will cover a wide range of disciplinary approaches, including history, social science, educational policy analysis, and theory.

Knowing how equity, social justice, and cultural understanding are enabled through education requires an in-depth understanding of domestic and international contexts. Introductory courses will cover basic definitions of educational justice and educational equality, survey international minorities in the United States or minorities in other countries in relationship to education, and explore political, economic, and social contexts for education.

Intermediary classes will invite students to apply their basic understanding of such processes to more local and detailed contexts, like shifts in the U.S. that have extended public schooling and higher education opportunities to historically marginalized populations such as people of color, immigrants, women and citizens from low socioeconomic status. Advanced classes will introduce students to the theoretical approaches to studying social justice and difference, including Critical Race Theory, transnational and global theory, and globalized critical pedagogy.

These courses will be designed to appeal to students seeking employment in both the United States and international educational settings, including teaching English as a second language. In addition, understanding the role of education in fostering the expansion of universal human rights will enable students interested in international business and NGOs to explore the problems and potentials of policies intent on improving conditions in the United States and abroad. As all areas of study and trade are increasingly situated in transnational networks, the concentration in Educational Equality and Cultural Understanding provides a firm grounding on key issues of rights, obligations, and new institutions that help maintain commitments for educational equity and justice under these new circumstances.

for the degree of Bachelor of Science in Learning & Education Studies, Educational Equality & Cultural Understanding concentration

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the concentrations.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Learning & Education Studies: Educational Technology, BS

for the degree of Bachelor of Science in Learning & Education Studies, Educational Technology concentration

The **Learning & Education Studies, BS** with a concentration in Educational Technology will provide students with a strong background in the design, development and implementation of technology for a range of learning environments.

Courses will introduce students to learning theory, designing and using technology to support learning, and issues encountered when deploying

technology to schools, workplaces and informal learning spaces. The program culminates in a capstone course in which students work on a design project under the direction of one or more faculty members.

The Education Technology concentration equips students with the knowledge and skills to design, evaluate, and support technology-driven learning experiences in schools, workplaces, and community settings. Students explore how people learn, how digital tools shape learning environments, and how to create inclusive, engaging instructional media for diverse learners. Graduates will be prepared for technology-focused roles in education, training, media, and corporate learning environments, including but not limited to:

• Instructional Designer • Learning Experience Designer • Educational Technology Specialist • eLearning Developer • Training & Development Specialist • Educational Content Developer • Education Program Manager

Learning & Education Studies: Inclusive Leadership & Learning in Organizations, BS

for the degree of Bachelor of Science in Learning & Education Studies, Inclusive Leadership & Learning in Organizations concentration

The **Learning & Education Studies, BS** with a concentration in Inclusive Leadership & Learning in Organizations, addresses the growing demand across sectors for graduates equipped to advance organizational change, lead in the workplace, and navigate barriers across diverse populations. This program will provide students with an overview of organizational leadership, specifically regarding diversity and inclusion. Students will also learn how organizations can address contemporary environmental and political challenges to enact sustainable and meaningful change.

Graduates from this program will be prepared to pursue graduate education or careers in education, government, non-profit, business, and public policy sectors, including but not limited to:

• Equal employment opportunity specialist • Higher Education Admissions Counselor • Education policy analyst • Training and Development Coordinator • Public Engagement Coordinator • Human Resources Specialist • Education Program Manager • Employee Learning & Engagement Specialist

An internship is recommended during the program, but it is not required. For internship credit, students can register in EPOL 491 Supervised Internship before the internship starts. At the end of the internship, a letter from the internship supervisor is submitted to the Inclusive Leadership & Learning in Organizations concentration contact.

Learning & Education Studies: Workplace Training & Development, BS

for the degree of Bachelor of Science in Learning & Education Studies, Workplace Training & Development concentration

The Learning & Education Studies, Workplace Training & Development concentration is not currently accepting applications. Suspension of admissions effective Spring 2026.

The **Learning & Education Studies, BS** with a concentration in Workplace Training & Development will provide international and domestic students with the broad sets of knowledge and skills necessary to design, develop, deliver, and evaluate training and development programs across workplace settings, such as businesses and industries, post-secondary schools, or community and government agencies. In addition, it will serve a growing demand for graduates who have an interest in helping adults learn about and seek to improve organizational performance. The demand comes from a range of business sectors.

Students in this concentration will receive an overview of the human resource development field and specifically focus on the training and development aspects of the field. Students will acquire the knowledge and practical skills, in such areas as training program design, training program facilitation and coordination, and learning with technologies.

An internship is recommended during the program, but it is not required. For internship credit, students can register in EPOL 491 Supervised Internship before the internship starts. At the end of the internship, a letter from the internship supervisor is submitted to the Workplace Training and Development concentration contact.

The concentration appeals to the following potential students:

- Individuals who wish to combine the study of organizations and learning in their academic studies;
- Individuals who wish to be a trainer and instructional designer;
- Individuals who currently work in a technical role, and who want to become more involved in training others about their occupation;
- Individuals who wish to work in the business and industry outreach departments of higher education institutions;
- Individuals who serve or wish to serve as instructors in post-secondary technical education schools;
- Individuals who wish to serve as a staff member in the human resource development department of an organization; and
- Individuals who wish to prepare for future graduate study in human resource development.

Students are encouraged to pursue a minor or a coherent set of electives from several departments as approved by their adviser. Suggested minors are: Business, Leadership, Communication, Psychology, Technology, and Management.

for the degree of Bachelor of Science in Learning & Education Studies, Workplace Training & Development concentration

A minimum of 120 semester hours is necessary for graduation in the Learning and Education Studies program. Students will spend much of the first two years with general education courses, achieving a solid preparation in the humanities, social and natural sciences, technology and mathematics. In the final two years of the major, students will take a set of core courses, as well as coursework in one of the concentrations.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Linguistics, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Linguistics

Linguistics is the systematic study of human language, its social functions, and its cognitive foundations. Linguists use empirical methods to answer theoretical questions about how languages are structured, how they are used for communication, how they evolved as symbolic systems, and how they change over time. Linguists then apply this scientific understanding to practical problems like how to best teach languages, how to develop effective language technology, and how to maintain knowledge of less common minority languages.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Linguistics

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: Students are strongly encouraged to fulfill the requirements for completing their program with distinction. Candidates for the degree with distinction must register their candidacy with their advisers no later than the end of the second semester of the junior year. They must achieve a grade point average of at least 3.4 for the required 36 hours in linguistics, and register for at least 4 hours of LING 391 - Honors Individual Study, plus submit a senior honors thesis to the Department of Linguistics by the first day of the month preceding the month of graduation.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 50-52 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Linguistics

Upon completion of the Linguistics degree, students will be able to:

1. Analyze the phonological, morphological, syntactic, and semantic systems of language.
2. Compare how these systems vary across languages and change over time.
3. Formulate hypotheses about how languages are processed, how they are learned, and how they express social identity.
4. Apply linguistics to solve practical problems like how to teach languages effectively or how to implement language technologies.
5. Describe linguistic analyses and defend them using reproducible empirical evidence.

Linguistics & Teaching English as a Second Language, BALAS (TESL)

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Linguistics & Teaching English as a Second Language (TESL)

The BALAS in Linguistics + TESL introduces students to two overarching questions: How do speakers of different languages learn and use English as an additional language? How to teach and assess English learners across different developmental stages and proficiency levels in different contexts? Linguistics + TESL majors Students will learn about how linguistic, cognitive, cultural, and societal factors contribute to second language acquisition, and how these can account for second-language developmental trajectories across individual learners of different backgrounds and characteristics in varying instructional and naturalistic settings. Linguistics + TESL majors make use of developments from a range of disciplines that include anthropology, English, global studies, psychology, and curriculum and instruction, as well as various disciplines housed in the School of Literatures, Cultures, and Linguistics.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Linguistics & Teaching English as a Second Language (TESL)

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Minimum required course work equates to a total of 41 credit hours of Linguistics and TESL courses, including at least 8 hours of foreign languages. Please see your academic advisor. A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Twelve hours of 300- and 400-level courses must be taken on this campus.

Minimum hours required for graduation: 120 hours. Students will complete 40 hours of upper-division coursework (these hours can be drawn from all elements of the degree).

Lyric Theatre, BMA

for the degree of Bachelor of Musical Arts in Lyric Theatre

Students pursuing this major select one of two concentrations:

Creative Concentration (p. 528)

Performance Concentration (p. 531)

The Bachelor of Musical Arts with a major in Lyric Theatre is an interdisciplinary degree designed for the singer-actor, which incorporates training in dance and theatre in addition to music. This degree requires students to choose one of two Concentrations: Performance (performer) or Creative (director, choreographer, dramaturg, set designer, composer).

The BMA Lyric Theatre curriculum is formed around courses in music, dance, and theatre. Advanced coursework includes a senior project. This degree requires a minimum of 129 semester hours of credit for graduation.

For admission requirements for the Bachelor of Musical Arts, please see the School of Music's Admissions website or contact the Music Admissions Office:

Music Admissions Office
School of Music
1114 W. Nevada Street
Urbana, IL 61801
Phone: (217) 244-7899
E-mail: musicadmissions@illinois.edu (%20musicadmissions@illinois.edu)

for the degree of Bachelor of Musical Arts in Lyric Theatre

Graduation Requirements

Minimum hours required for graduation: 129 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

At least one "Storytelling" (writing, telling, or reading stories) course is to be selected in consultation with advisor from the general education requirements.

Degree Hours

The Bachelor of Musical Arts in Lyric Theatre requires a minimum of 129 hours for graduation. This includes a minimum of 40 hours of upper-division coursework at the 300- and/or 400-level from all elements of the degree. Additional hours needed to reach the minimum of 40 are chosen in consultation with advisor.

for the degree of Bachelor of Musical Arts in Lyric Theatre

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. This sample curriculum plan makes the assumption that students will have demonstrated keyboard competency by proficiency examination when they matriculate or they will need to enroll in MUS 172 and/or MUS 173.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This sample curriculum plan makes the assumption that the foreign language graduation requirement has been satisfied by completing three years of study of a single foreign language in high school. For more information, see the corresponding section on the Degree and General Education Requirements page (p. 2).

Management, BS

for the degree of Bachelor of Science Major in Management

The Management Major is designed to enable business students to be leaders and innovators in their work teams and organizations. You'll be trained to analyze and solve managerial problems – be they around people, organizations, or markets - that every organization faces in its day-to-day operations. You'll take courses about leading individuals and teams, designing and managing organizations, effective negotiation, and strategic human resource management. You'll also choose from a variety of electives, including new product development, project management, entrepreneurship, and international business.

for the degree of Bachelor of Science Major in Management

Minimum requirements for the major in the Bachelor of Science Degree in Management are:

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
fulfilled by ECON 102 and ECON 103		
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: U.S. Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fulfilled by CS 105; and MATH 115, MATH 220, MATH 221, MATH 231, MATH 234, or STAT 100		
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)		0-15

Business Core Requirements

Code	Title	Hours

for the degree of Bachelor of Science Major in Management

1. **Disciplinary competence:** Students will acquire knowledge of and be able to explain foundational theory and concepts related to leadership, team and interpersonal dynamics, and organizational structure and operations.

2. **Critical thinking and problem-solving:** Students will analyze and solve real-world management problems using critical thinking skills. Students will apply management concepts to offer guidance and sustainable solutions.
3. **Collaborative teamwork:** Students will be able to contribute to developing inclusive, diverse teams.
4. **Self and other-awareness:** Students will demonstrate increased awareness of the self (e.g., identifying personal and professional values, identifying biases in decision-making), and others (e.g., engaging in perspective-taking while working in diverse groups).
5. **Communication:** Students will develop and deliver effective written and/or oral managerial communications skills.

Marketing, BS

for the degree of Bachelor of Science in Marketing

The Marketing student studies business activities directly related to the process of developing, deciding, and placing meaningful assortments of goods and services in the hands of the consumer. The Marketing major is concerned with the efficient and effective performance of marketing activities and coordinating with the other operations of the firm. In addition to the Marketing Major's requirements, Business Administration students must also fulfill the Urbana-Champaign campus's General Education requirements and the Gies College of Business's Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate Section (http://catalog.illinois.edu/schools/gies-business/academic-units/)).

for the degree of Bachelor of Science in Marketing

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Total Hours 124

for the degree of Bachelor of Science in Marketing

1. Master core concepts that pertain to contemporary marketing practices and technologies.
2. Demonstrate the ability to analyze real-world marketing problems, develop alternative solutions, evaluate the strengths and weaknesses of these solutions and choose and implement a solution.
3. Demonstrate the ability to collaborate and problem-solve in teams, and to collaborate with team members and clients across business functions and disciplines.
4. Cultivate a global mindset – an appreciation, curiosity, and empathy toward other cultures, and a capacity to develop innovative solutions to global as well as local marketing problems.
5. Communicate effectively in writing and orally across all modalities – written, oral, and digital.

Materials Science & Engineering, BS

for the degree of Bachelor of Science in Materials Science & Engineering

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. The Materials Science and Engineering (MatSE) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change communications technologies, for site specific drug delivery, for self-healing materials, for enabling the transition to a hydrogen-based economy, and for more efficient photovoltaics and nuclear systems for energy production. The curriculum uses concepts from both basic physics and chemistry and provides a detailed knowledge of what makes the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE. In the senior year, students focus on an area of MatSE of their greatest interest, providing them with the detailed knowledge to be immediately useful to corporations, become entrepreneurs, or to provide the underpinning knowledge for graduate study. Note: students interested in biomaterials take a specific set of courses to provide them with a background in biology and chemistry while maintaining a strong engineering focus.

Current Program Educational Objectives

for the degree of Bachelor of Science in Materials Science & Engineering

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

University Requirements

Minimum of 40 hours of upper-division coursework at the 300- and 400-level. from all elements of the degree. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
	fulfilled by MSE 307 and MSE 308	
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6

fulfilled by CHEM 102, CHEM 104, PHYS 211, PHYS 212	
Social & Behavioral Sciences (6 hours)	6
Cultural Studies: Non-Western Cultures (1 course)	3
Cultural Studies: US Minority Cultures (1 course)	3
Cultural Studies: Western/Comparative Cultures (1 course)	3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)	6-10
fulfilled by MATH 221 or MATH 220; MATH 231, MATH 241, MATH 285, PHYS 211, PHYS 212, CS 101	
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)	0-15

Materials Science and Engineering Graduation Requirements

Orientation and Professional Development

Code	Title	Hours
ENG 100	Grainger Engineering Orientation Seminar (External transfer students take ENG 300.)	1
Recommended, optional 1 credit course, MSE 183 Introductory MatSE Laboratory. Credit hour counts toward free electives.		
Total Hours		**1**

Foundational Mathematics and Science

Code	Title	Hours
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
MATH 221	Calculus I (MATH 220 may be substituted. MATH 220 is appropriate for students with no background in calculus. 4 of 5 credit hours count towards degree.)	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 257	Linear Algebra with Computational Applications	3
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4

for the degree of Bachelor of Science Major in Materials Science & Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Materials Science & Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Materials Science & Engineering + Data Science, BS

for the degree of Bachelor of Science Major in Materials Science & Engineering + Data Science

Materials science and engineering is the basis for all engineering. Improvements in the quality of life require knowledge of the processing and properties of current materials and the design, development and application of new materials. At the same time, data science is revolutionizing all areas of science and engineering. The Materials Science and Engineering (MatSE+DS) curriculum provides an understanding of the underlying principles of synthesis and processing of materials and of the interrelationships between structure, properties, and processing, while also addressing the unique data science challenges in materials science and engineering. Students learn how to create advanced materials and systems required, e.g., for flexible electronic displays and photonics that will change communications technologies, for site specific drug delivery, for self-healing materials, for enabling the transition to a hydrogen-based economy, and for more efficient photovoltaics and nuclear systems for energy production. The curriculum uses concepts from both basic physics and chemistry combined with statistics and data science and provides a detailed knowledge of what makes the materials we use every day behave as they do.

Students in the first two years take courses in general areas of science and engineering and data science as well as courses introducing the concepts in MatSE. In the third year, students study the common, central issues related to MatSE while learning more advanced data science methods. In the senior year, students focus on an area of MatSE of their greatest interest, providing them with the detailed knowledge to be immediately useful to corporations, become entrepreneurs, or to provide

the underpinning knowledge for graduate study, and complete a design project involving data science.

for the degree of Bachelor of Science Major in Materials Science & Engineering + Data Science

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3

for the degree of Bachelor of Science Major in Materials Science & Engineering + Data Science

---

The program educational objectives of the MatSE Department and its faculty at the undergraduate level are:

1. Our graduates will attain the foundational knowledge to be successful in their chosen career.
2. Our graduates will be skilled at teamwork, communication and individual professionalism, including ethics and environmental awareness.
3. Our graduates will provide valuable service to their chosen profession and to society.
4. Our graduates will have the ability to achieve their personal goals and advance in their chosen profession through life-long learning.

The curriculum is designed to guarantee a certain breadth of knowledge in materials science and engineering through a set of core courses, ensure depth and focus in specialties with materials science, and provide a breadth of knowledge in data science. In accordance with the ABET educational criteria and the Data Science learning objectives, the program has been developed so that graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, mathematics, and computational analysis of data.
2. An ability to apply engineering design with data science skills to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences, including accurate and informative visualizations of data.
4. An ability to recognize ethical and professional responsibilities in engineering situations and data science and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, build and evaluate data-based models and use engineering judgment to draw conclusions.

7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.
8. An ability to describe, curate, and manage data.

Mathematics, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics

---

Students in the Mathematics major can choose one of the following to complete the major:

- **Mathematics major (p. 547)**
- **Mathematics major, Applied Mathematics concentration (p. 549)**
- **Mathematics major, Data Optimization concentration (p. 551)**
- **Mathematics major, Math Doctoral Preparation concentration (p. 553)**
- **Mathematics major, Mathematics Teaching concentration (p. 555)**

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

Undergraduate programs in Mathematics

- Actuarial Science, BSLAS (p. 16)
- Mathematics, BSLAS (p. 547)
- Mathematics & Computer Science, BSLAS (p. 559)

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Mathematics

---

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum required major and supporting course work: Normally equates to 54-59 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework. Twelve (12) hours of 300- and 400-level non-S/U-graded courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics

Students with a BSLAS degree in Mathematics will be able to:

1. construct proofs and recognize when proofs are complete.
2. use theorems in order to solve problems.
3. demonstrate technical proficiency in calculus and linear algebra.
4. apply mathematics; translating real-world problems into mathematical problems and solving them.

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Applied Mathematics Concentration

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

Undergraduate programs in Mathematics

- Actuarial Science, BSLAS (p. 16)
- Mathematics, BSLAS (p. 547)
- Mathematics & Computer Science, BSLAS (p. 559)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Applied Mathematics Concentration

A Major Plan of Study form, declaring concentration and supporting coursework, must be completed and submitted to the LAS Student Academic Affairs Office except for students in the Teaching of Mathematics concentration. Please complete this form with an advisor in the Mathematics Undergraduate Office within 1-2 semesters of completing MATH 347 or MATH 348.

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum required major and supporting course work: Normally equates to 57-62 hours including 27-35 hours of mathematics beyond calculus, 3-4 hours of computer science, and 12 hours of supporting coursework. Twelve (12) hours of 300- and 400-level non-S/U-graded courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed

requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

Total Hours 120

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Applied Mathematics Concentration

Students with a BSLAS degree in Mathematics will be able to:

1. construct proofs and recognize when proofs are complete.
2. use theorems in order to solve problems.
3. demonstrate technical proficiency in calculus and linear algebra.
4. apply mathematics; translating real-world problems into mathematical problems and solving them.

Additionally, students in this concentration will be able to develop and test mathematical models of physical, chemical, and biological systems.

Mathematics: Data Optimization, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Data Optimization Concentration

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.
