Approved supporting coursework outside Mathematics (Supporting coursework may be completed with 12 advisor-approved hours of a single math-related area outside of MATH/ASRM not used for a major requirement and must include at least one advanced course; ANY minor which is fulfilled with at least 12 hours of courses, including one advanced course, not used for the major nor cross-listed with MATH/ASRM; or any double major or dual degree.)		12

Code	Title	Hours
Math Doctoral Preparation Concentration		
The courses chosen from the Core and the Math Doctoral Preparation Concentration must include at least two honors courses chosen from: MATH 416, MATH 424, MATH 425, MATH 427, MATH 428.		
MATH 424	Honors Real Analysis	3
or MATH 447	Real Variables	
MATH 418	Intro to Abstract Algebra II	3
or MATH 428	Honors Topics in Mathematics	
MATH 448	Complex Variables	3
MATH 423	Differential Geometry	3
or MATH 425	Honors Advanced Analysis	
or MATH 432	Set Theory and Topology	
or MATH 481	Vector and Tensor Analysis	
MATH 441	Differential Equations	3
Two additional 400-level or approved 500-level MATH courses that are not graded as S/U.		6

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Math Doctoral Preparation Concentration

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Math Doctoral Preparation Concentration

---

Students with a BSLAS degree in Mathematics will be able to:

1. construct proofs and recognize when proofs are complete.
2. use theorems in order to solve problems.
3. demonstrate technical proficiency in calculus and linear algebra.
4. apply mathematics; translating real-world problems into mathematical problems and solving them.

Additionally, students in this concentration will gain a proficiency with abstract mathematics at the level required for graduate study and beyond.

LAS Admissions and Requirements Overview (http://catalog.illinois.edu/schools/las/)

Mathematics: Mathematics Teaching, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Mathematics Teaching Concentration

---

Mathematics is a broad discipline that contains a range of areas of specialization within it. The required core courses provide fundamental background for mathematics in general. The concentrations allow the student to broaden this background or begin to specialize. Students must complete the core courses and a concentration.

An entering student in mathematics should have academic preparation to enroll in MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) during the first semester. Admission to MATH 220 (http://catalog.illinois.edu/search/?P=MATH%20220) requires an acceptable ALEKS score. A student should attain grades of B in calculus in order to complete the advanced courses successfully.

Undergraduate programs in Mathematics

Actuarial Science, BSLAS (p. 16)

Mathematics, BSLAS (p. 547)

Mathematics & Computer Science, BSLAS (p. 559)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics, Mathematics Teaching Concentration

This concentration fulfills state licensure requirements to teach high school math (grades 9-12) through the AP/honors level.

Time to degree completion varies. Minimum time to completion is 8 semesters, with some students requiring 10 semesters. Transfer students may need 10 total semesters combined to complete the program. Please see the LAS section in the transfer handbook (https://transferhandbook.illinois.edu/las/)for more information.

To remain in good standing in this program and be recommended for licensure, candidates are required to maintain a cumulative grade-point average of 2.5 (A= 4.0).

Departmental distinction: Distinction will be awarded on the basis of selection of 400-level courses in mathematics and the grade point average. Graduation with High Distinction or Highest Distinction in Mathematics requires participation in the Program for Distinction in Mathematics or Mathematics Education. Full details are available at the departmental website.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: Normally equates to 77-81 hours including 27-29 hours of mathematics beyond calculus, 3-4 hours of computer science, and 39 hours for the Teacher Education Minor in Secondary School Teaching. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Students in this concentration must complete the Teacher Education Minor in Secondary School Teaching (39 hours).

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by EDUC 202		
Humanities & the Arts (6 hours)		6
fulfilled by EDUC 202 and any other course approved as Humanities & the Arts		
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
fulfilled by EPSY 201 any other course approved as Social & Behavioral Sciences		
Cultural Studies: Non-Western Cultures (1 course)		3
fulfilled by EDUC 201		
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fullfilled by MATH 220 or MATH 221, MATH 231, MATH 241; CS 101 or CS 124 or CS 125		
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)		0-20

Major Requirements

Code	Title	Hours
Foundation Courses		
The following courses must be completed or in progress when students apply to the Secondary Education minor.		
MATH 220	Calculus	4-5
or MATH 221	Calculus I	
MATH 231	Calculus II	3
MATH 241	Calculus III	4
Three advanced mathematics courses, including		
MATH 347	Fundamental Mathematics	3
Required Core Courses		
MATH 416	Abstract Linear Algebra (Students may not receive credit for both MATH 416 and either ASRM 406 or MATH 415.)	3
MATH 417	Intro to Abstract Algebra	3
or MATH 427	Honors Abstract Algebra	
MATH 424	Honors Real Analysis (If MATH 424 or MATH 447 is completed, a requirement for the Math Doctoral Preparation concentration has been satisfied.)	3
or MATH 444	Elementary Real Analysis	
or MATH 447	Real Variables	
MATH 461	Probability Theory (If STAT 400 is completed, a requirement for the Data Optimization concentration has been satisfied.)	3-4
or STAT 400	Statistics and Probability I	
CS 101	Intro Computing: Engrg & Sci	3-4
or CS 124	Introduction to Computer Science I	
or CS 125	Introduction to Computer Science	
Teacher Education Minor in Secondary School Teaching (http://catalog.illinois.edu/undergraduate/education/secondary/)		39
Mathematics Teaching Courses		
MATH 402	Non Euclidean Geometry	3
or MATH 403	Euclidean Geometry	
MATH 453	Number Theory	3
One additional 400-level or approved 500-level mathematics course (Courses awarded S/U grades may not be used to fill this requirement.)		3
Total Hours		**77-80**

Mathematics & Computer Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics & Computer Science

The Math & CS major provides students with the mathematical background to be able to solve complex problems, while incorporating computer science techniques that are immediately useful in a variety of fields. The duality of this joint program aids students in building skills to become flexible professionals who are confident to take on new systems and technology.

Math&CS students are trained in the tools of both disciplines — formal methods, analysis, and computer programming — with the aim of acquiring the appropriate skills required by the field. The combination of coursework offers students an integrated program where their knowledge in both curricula is complementary and intertwined. Research opportunities include the Illinois Mathematics Lab (https://publish.illinois.edu/illinoisgeometrylab/) and PURE (https://pure.engr.illinois.edu/).

Students in this major are welcome in both Computer Science (https://cs.illinois.edu/student-life/student-organizations/) and Mathematics (https://math.illinois.edu/academics/undergraduate-program/student-organizations-and-journals/) student organizations.

This background is suitable for graduate work in computer science, mathematics, and many related areas, including financial engineering, software engineering, theoretical computer science, and data analysis.

Undergraduate programs in Mathematics

Actuarial Science, BSLAS (p. 16)

Mathematics, BSLAS (p. 547)

Mathematics & Computer Science, BSLAS (p. 559)

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics & Computer Science

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction. In addition, students must complete at least three semester hours of additional Computer Science or Mathematics courses selected from the following:CS 196, CS 296, CS 397, CS 492, CS 493, CS 499, any CS course numbered 411 or higher, MATH 412, MATH 414, MATH 417, MATH 418, MATH 423, MATH 432, MATH 448, MATH 482, MATH 484, MATH 496.

NOTE: A student taking a cross-listed course in this major may designate it as either mathematics or computer science.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 71-75 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Requirements

Code	Title	Hours
CS 100	Computer Science Orientation (recommended)	1
Calculus through MATH 241-Calculus III		11-12
CS 124	Introduction to Computer Science I	3
CS 128	Introduction to Computer Science II	3
MATH 347	Fundamental Mathematics	3
CS 173	Discrete Structures	3
CS 225	Data Structures	4
CS 222	Software Design Lab	1
Choose one of the following combinations		8-11
CS 233 & CS 341	Computer Architecture and System Programming	
OR		
CS 340	Introduction to Computer Systems	
& two CS courses at the 400 level above CS 403, excluding CS 421 and CS 491. These two courses must be distinct from all other courses used to fulfill program requirements or options.		
CS/MATH 357	Numerical Methods I	3
CS 374	Introduction to Algorithms & Models of Computation	4
CS 421	Programming Languages & Compilers	3
CS 450	Numerical Analysis	3
MATH 415	Applied Linear Algebra	3
or MATH 416	Abstract Linear Algebra	
400-level mathematics and computer science requirements:		18
Students must select at least six 400-level mathematics and computer science courses, including one from each of the following groups:		
GROUP I		
CS 361	Probability & Statistics for Computer Science (recommended)	
MATH 461	Probability Theory	
STAT 400/ MATH 463	Statistics and Probability I	
GROUP II		
MATH 412	Graph Theory	
MATH 413	Intro to Combinatorics	
MATH 417	Intro to Abstract Algebra	
MATH 427	Honors Abstract Algebra	
GROUP III		
MATH 441	Differential Equations	

MATH 446	Applied Complex Variables	
MATH 484	Nonlinear Programming	
GROUP IV		
MATH 424	Honors Real Analysis	
MATH 444	Elementary Real Analysis	
MATH 447	Real Variables	
GROUP V		
MATH 414	Mathematical Logic	
CS/MATH 473	Algorithms	
CS/MATH 475	Formal Models of Computation	
CS 476	Program Verification	
CS 477	Formal Software Development Methods	
Total Hours		**71-75**

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Mathematics & Computer Science

By the time of graduation, students will have the ability to:

Computer Science:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
2. Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
3. Communicate effectively in a variety of professional contexts.
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.
6. Apply computer science theory and software development fundamentals to produce computing-based solutions.

Mathematics:

1. Construct proofs and recognize when proofs are complete
2. Use theorems in order to solve problems
3. Demonstrate technical proficiency in calculus and linear algebra

Mechanical Engineering, BS

for the degree of Bachelor of Science in Mechanical Engineering

The Mechanical Engineering program at Illinois is one of the most diverse engineering majors and plays a major role in advancing almost every industry. Students study physical principles behind how forces act on bodies of solids or fluids and the interaction of these bodies with their environments through exchanges of energy. Further, Mechanical Engineering students learn how to apply these basic principles to design, manufacture, and control machines and complex systems. Examples include systems that apply loads, transport matter and energy, and convert one form of energy to another. Mechanical Engineering is a broad major that is well suited for students interested in the engineering underpinnings of the modern world around them.

Current Program Educational Objectives

for the degree of Bachelor of Science in Mechanical Engineering

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

Minimum Technical GPA: 2.0

TGPA is required for required Engineering courses and any technical elective courses. See **Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/)** to clarify requirements.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6

Technical electives chosen from the departmentally approved list below.		**6**
ABE 361	Functional Analysis and Design of Agricultural Machine Systems	3
ABE 430	Project Management (As Approved)	2
ABE 436	Renewable Energy Systems	3 or 4
ABE 445	Statistical Methods	4
ABE 452	Engineering for Disaster Resilience (As Approved)	3 or 4
ABE 454	Environmental Soil Physics	3
ABE 455	Erosion and Sediment Control	2
ABE 456	Land & Water Resources Engrg	3 or 4
ABE 457	NPS Pollution Processes	2
ABE 459	Drainage and Water Management	3 or 4
ABE 466	Engineering Off-Road Vehicles	3
ABE 469	Capstone Design Experience	4

ABE 476	Indoor Air Quality Engineering	4
ABE 483	Engineering Properties of Food Materials	3
ABE 488	Bioprocessing Biomass for Fuel	4
ABE 497	Independent Study (As Approved)	1 to 4
ABE 498	Special Topics (As Approved)	1 to 4
ADV 462	Computational Advertising Infrastructure	3 or 4
ADV 492	Tech and Advertising Campaigns	3
AE 352	Aerospace Dynamical Systems	3
AE 402	Orbital Mechanics	3 or 4
AE 403	Spacecraft Attitude Control	3 or 4
AE 410	Computational Aerodynamics	3 or 4
AE 412	Viscous Flow & Heat Transfer	4
AE 416	Applied Aerodynamics	3 or 4
AE 419	Aircraft Flight Mechanics	3 or 4
AE 420	Finite Element Analysis	3 or 4
AE 428	Mechanics of Composites	3
AE 433	Aerospace Propulsion	3 or 4
AE 434	Rocket Propulsion	3 or 4
AE 435	Electric Space Propulsion	3 or 4
AE 442	Aerospace Systems Design I	3
AE 443	Aerospace Systems Design II	3
AE 451	Aeroelasticity	3 or 4
AE 452	Introduction to Nonlinear Dynamics and Vibrations	4
AE 454	Systems Dynamics & Control	3 or 4
AE 456	Global Nav Satellite Systems	4
AE 460	Aerodynamics & Propulsion Lab	2
AE 461	Structures & Control Lab	2
AE 468	Optical Remote Sensing	3
AE 480	Hypersonic Aerothermodynamics	3 or 4
AE 482	Introduction to Robotics	4
AE 483	Autonomous Systems Lab	2
AE 485	Spacecraft Environment and Interactions	3 or 4
AE 497	Independent Study (As Approved)	1 to 4
AE 498	Special Topics (As Approved)	1 to 4
ANSC 445	Statistical Methods	4
ASRM 402	Actuarial Statistics II	4
ASRM 410	Investments and Financial Markets	3 or 4
ASRM 450	Methods of Applied Statistics	3 or 4
ASRM 451	Basics of Statistical Learning	3 or 4
ASRM 453	Applied Bayesian Analysis	3 or 4
ASRM 461	Loss Models	4
ASRM 469	Casualty Actuarial Mathematics	3 or 4
ASRM 471	Life Contingencies I	4
ASRM 472	Life Contingencies II	3
ATMS 301	Atmospheric Thermodynamics	3
ATMS 302	Atmospheric Dynamics I	3
ATMS 304	Radiative Transfer-Remote Sens	3
ATMS 306	Cloud Physics	3
ATMS 312	Atmospheric Dynamics II	3
ATMS 405	Boundary Layer Processes	4
ATMS 406	Tropical Meteorology	4
ATMS 410	Radar Remote Sensing	4
ATMS 411	Satellite Remote Sensing	4
ATMS 420	Atmospheric Chemistry	4
ATMS 424	Atmospheric Convection	4
BADM 460	Business Process Modeling	3
BADM 461	Tech, Eng, & Mgt Final Project	4
BIOC 406	Gene Expression & Regulation	3
BIOC 446	Physical Biochemistry	3
BIOC 455	Technqs Biochem & Biotech	4
BIOE 380	Biomedical Imaging	3
BIOE 414	Biomedical Instrumentation	3
BIOE 415	Biomedical Instrumentation Lab	2
BIOE 416	Biosensors	3
BIOE 427	Biomedical Ultrasound Imaging	3
BIOE 430	Intro Synthetic Biology	3 or 4
BIOE 461	Cellular Biomechanics	4
BIOE 467	Biophotonics	3
BIOE 476	Tissue Engineering	3
BIOE 479	Cancer Nanotechnology	3
BIOE 480	Magnetic Resonance Imaging	3 or 4
BIOE 481	Whole-Body Musculoskel Biomech	3 or 4
BIOE 482	Musculoskel Tissue Mechanics	3 or 4
BIOE 485	Computational Mathematics for Machine Learning and Imaging	4
BIOE 497	Individual Study (As Approved)	1 to 4
BIOE 498	Special Topics (As Approved)	1 to 4
BIOP 401	Introduction to Biophysics	3
BIOP 419	Brain, Behavior & Info Process	3
BIOP 432	Photosynthesis	3
CEE 310	Transportation Engineering	3
CEE 320	Construction Engineering	3
CEE 330	Environmental Engineering	3
CEE 340	Energy and Global Environment	3
CEE 350	Water Resources Engineering	3
CEE 360	Structural Engineering	3
CEE 380	Geotechnical Engineering	3
CEE 398	Special Topics (As Approved)	0 to 4
CEE 401	Concrete Materials	4
CEE 405	Asphalt Materials I	3 or 4
CEE 406	Pavement Design I	3 or 4
CEE 407	Airport Design	3 or 4
CEE 408	Railroad Transportation Engrg	3 or 4
CEE 409	Railroad Track Engineering	3 or 4
CEE 410	Railway Signaling & Control	3 or 4
CEE 411	RR Project Design & Constr	3 or 4
CEE 412	High-Speed Rail Engineering	3 or 4
CEE 415	Geometric Design of Roads	4
CEE 416	Traffic Capacity Analysis	3 or 4
CEE 417	Urban Transportation Planning (As Approved)	4
CEE 418	Public Transportation Systems	3 or 4
CEE 419	Transportation Economics	4

CEE 420	Construction Productivity	3 or 4
CEE 421	Construction Planning	3 or 4
CEE 422	Construction Cost Analysis	3 or 4
CEE 434	Environmental Systems I	3
CEE 437	Water Quality Engineering	3
CEE 438	Science & Environmental Policy	3
CEE 440	Fate Cleanup Environ Pollutant	4
CEE 442	Environmental Engineering Principles, Physical	4
CEE 443	Env Eng Principles, Chemical	4
CEE 444	Env Eng Principles, Biological	4
CEE 447	Atmospheric Chemistry	4
CEE 449	Environmental Engineering Lab	3
CEE 450	Surface Hydrology	3
CEE 451	Environmental Fluid Mechanics	3
CEE 452	Hydraulic Analysis and Design	3
CEE 453	Urban Hydrology and Hydraulics	4
CEE 457	Groundwater	3
CEE 458	Water Resources Field Methods	4
CEE 460	Steel Structures I	3
CEE 461	Reinforced Concrete I	3
CEE 462	Steel Structures II	3 or 4
CEE 463	Reinforced Concrete II	3 or 4
CEE 465	Design of Structural Systems	3
CEE 467	Masonry Structures	3 or 4
CEE 468	Prestressed Concrete	3 or 4
CEE 469	Wood Structures	3 or 4
CEE 470	Structural Analysis	4
CEE 471	Structural Mechanics	3 or 4
CEE 472	Structural Dynamics I	3 or 4
CEE 473	Wind Effects on Structures	4
CEE 474	Mechanics of Additive Manufacturing	3 or 4
CEE 483	Soil Mechanics and Behavior	4
CEE 484	Applied Soil Mechanics	3 or 4
CEE 490	Computer Methods	3 or 4
CEE 491	Decision and Risk Analysis	3 or 4
CEE 497	Independent Study (As Approved)	1 to 16
CEE 498	Special Topics (As Approved)	1 to 4
CHBE 413	Data Science for Chemistry and Engineering	4
CHBE 422	Mass Transfer Operations	4
CHBE 424	Chemical Reaction Engineering	3
CHBE 451	Transport Phenomena	3
CHBE 453	Electrochemical Engineering	2 or 3
CHBE 458	Synthetic Nanomaterials	3
CHBE 459	Polymer Rheology	3
CHBE 461	Functional Materials Assembly	3
CHBE 471	Biochemical Engineering	3 or 4
CHBE 472	Techniques in Biomolecular Eng	3 or 4
CHBE 473	Biomolecular Engineering	3 or 4
CHBE 474	Metabolic Engineering	3 or 4
CHBE 475	Tissue Engineering	3
CHBE 476	Biotransport	3
CHBE 478	Bioenergy Technology	3
CHEM 232	Elementary Organic Chemistry I	3 or 4
CHEM 233	Elementary Organic Chem Lab I	2
CHEM 236	Fundamental Organic Chem I	4
CHEM 237	Structure and Synthesis	2
CHEM 312	Inorganic Chemistry	3
CHEM 315	Instrumental Chem Systems Lab	2
CHEM 317	Inorganic Chemistry Lab	3
CHEM 332	Elementary Organic Chem II	4
CHEM 420	Instrumental Characterization	2
CHEM 436	Fundamental Organic Chem II	3
CHEM 437	Organic Chemistry Lab	3
CHEM 440	Physical Chemistry Principles	4
CHEM 442	Physical Chemistry I	4
CHEM 444	Physical Chemistry II	4
CHEM 445	Physical Principles Lab I	2
CHEM 447	Physical Principles Lab II	2
CHEM 452	Data Science for Chemistry and Engineering	4
CHEM 460	Green Chemistry	3 or 4
CHEM 472	Physical Biochemistry	3
CHEM 480	Polymer Chemistry	3 or 4
CHEM 482	Polymer Physics	3 or 4
CHEM 483	Solid State Structural Anlys	4
CHEM 488	Surfaces and Colloids	3 or 4
CHEM 497	Individual Study Senior (As Approved)	1 to 3
CPSC 489	Photosynthesis	3
CS 225	Data Structures	4
CS 233	Computer Architecture	4
CS 242	Programming Studio	3
CS 340	Introduction to Computer Systems	3
CS 341	System Programming	4
CS 357	Numerical Methods I	3
CS 374	Introduction to Algorithms & Models of Computation	4
CS 407	Cryptography	3 or 4
CS 409	The Art of Web Programming	3 or 4
CS 410	Text Information Systems	3 or 4
CS 411	Database Systems	3 or 4
CS 412	Introduction to Data Mining	3 or 4
CS 413	Intro to Combinatorics	3 or 4
CS 414	Multimedia Systems	3 or 4
CS 415	Game Development	3 or 4
CS 418	Interactive Computer Graphics	3 or 4
CS 419	Production Computer Graphics	3 or 4
CS 420	Parallel Progrmg: Sci & Engrg	3 or 4
CS 421	Programming Languages & Compilers	3 or 4
CS 422	Programming Language Design	3 or 4
CS 423	Operating Systems Design	3 or 4
CS 424	Real-Time Systems	3 or 4
CS 425	Distributed Systems	3 or 4

CS 426	Compiler Construction	3 or 4
CS 427	Software Engineering I	3 or 4
CS 428	Software Engineering II	3 or 4
CS 429	Software Engineering II, ACP	3
CS 431	Embedded Systems	3 or 4
CS 433	Computer System Organization	3 or 4
CS 436	Computer Networking Laboratory	3 or 4
CS 437	Topics in Internet of Things	3 or 4
CS 438	Communication Networks	3 or 4
CS 439	Wireless Networks	3 or 4
CS 440	Artificial Intelligence	3 or 4
CS 441	Applied Machine Learning	3 or 4
CS 442	Trustworthy Machine Learning	3 or 4
CS 443	Reinforcement Learning	3 or 4
CS 444	Deep Learning for Computer Vision	3 or 4
CS 445	Computational Photography	3 or 4
CS 446	Machine Learning	3 or 4
CS 447	Natural Language Processing	3 or 4
CS 448	Audio Computing Laboratory	3 or 4
CS 450	Numerical Analysis	3 or 4
CS 460	Security Laboratory	3 or 4
CS 461	Computer Security I	4
CS 463	Computer Security II	3 or 4
CS 465	User Interface Design	4
CS 466	Introduction to Bioinformatics	3 or 4
CS 467	Social Visualization	3 or 4
CS 468	Tech and Advertising Campaigns	3
CS 469	Computational Advertising Infrastructure	3 or 4
CS 473	Algorithms	4
CS 474	Logic in Computer Science	3 or 4
CS 475	Formal Models of Computation	3 or 4
CS 476	Program Verification	3 or 4
CS 477	Formal Software Development Methods	3 or 4
CS 481	Advanced Topics in Stochastic Processes & Applications	3 or 4
CS 482	Simulation	3 or 4
CS 483	Applied Parallel Programming	4
CS 484	Parallel Programming	3 or 4
CS 498	Special Topics (As Approved)	1 to 4
CSE 401	Numerical Analysis	3 or 4
CSE 402	Parallel Progrmg: Sci & Engrg	3 or 4
CSE 408	Applied Parallel Programming	4
CSE 412	Numerical Thermo-Fluid Mechs	2 to 4
CSE 414	Algorithms	4
CSE 422	Computer System Organization	3 or 4
CSE 423	Operating Systems Design	3 or 4
CSE 426	Software Engineering I	3 or 4
CSE 427	Interactive Computer Graphics	3 or 4
CSE 428	Statistical Computing	3 or 4
CSE 429	Software Engineering II	3 or 4
CSE 440	Statistical Data Management	3 or 4
CSE 441	Introduction to Optimization	3 or 4
CSE 448	Advanced Data Analysis	4
CSE 450	Computational Mechanics	3 or 4
CSE 451	Finite Element Analysis	3 or 4
CSE 461	Computational Aerodynamics	3 or 4
CSE 485	Atomic Scale Simulations	3 or 4
ECE 329	Fields and Waves I	3
ECE 330	Power Ckts & Electromechanics	3
ECE 333	Green Electric Energy	3
ECE 340	Semiconductor Electronics	3
ECE 342	Electronic Circuits	3
ECE 343	Electronic Circuits Laboratory	1
ECE 350	Fields and Waves II	3
ECE 374	Introduction to Algorithms & Models of Computation	4
ECE 380	Biomedical Imaging	3
ECE 385	Digital Systems Laboratory	3
ECE 391	Computer Systems Engineering	4
ECE 395	Advanced Digital Projects Lab	2 or 3
ECE 401	Signal Processing	4
ECE 402	Electronic Music Synthesis	3
ECE 403	Audio Engineering	3
ECE 407	Cryptography	3 or 4
ECE 408	Applied Parallel Programming	4
ECE 410	Neural Circuits and Systems	3 or 4
ECE 411	Computer Organization & Design	4
ECE 414	Biomedical Instrumentation	3
ECE 415	Biomedical Instrumentation Lab	2
ECE 416	Biosensors	3
ECE 417	Multimedia Signal Processing	4
ECE 418	Image & Video Processing	4
ECE 419	Security Laboratory	3 or 4
ECE 420	Embedded DSP Laboratory	2
ECE 422	Computer Security I	4
ECE 424	Computer Security II	3 or 4
ECE 425	Intro to VLSI System Design	3
ECE 428	Distributed Systems	3 or 4
ECE 431	Electric Machinery	4
ECE 435	Computer Networking Laboratory	3 or 4
ECE 437	Sensors and Instrumentation	3
ECE 438	Communication Networks	3 or 4
ECE 439	Wireless Networks	3 or 4
ECE 441	Physcs & Modeling Semicond Dev	3
ECE 443	LEDs and Solar Cells	4
ECE 444	IC Device Theory & Fabrication	4
ECE 447	Active Microwave Ckt Design	3
ECE 448	Artificial Intelligence	3 or 4
ECE 449	Machine Learning	3 or 4
ECE 451	Adv Microwave Measurements	3
ECE 452	Electromagnetic Fields	3
ECE 453	Wireless Communication Systems	4
ECE 454	Antennas	3
ECE 455	Optical Electronics	3 or 4

ECE 456	Global Nav Satellite Systems	4
ECE 457	Microwave Devices & Circuits	3
ECE 458	Applic of Radio Wave Propag	3
ECE 459	Communications Systems	3
ECE 460	Optical Imaging	4
ECE 461	Digital Communications	3
ECE 462	Logic Synthesis	3
ECE 463	Digital Communications Lab	2
ECE 464	Power Electronics	3
ECE 467	Biophotonics	3
ECE 468	Optical Remote Sensing	3
ECE 469	Power Electronics Laboratory	2
ECE 470	Introduction to Robotics	4
ECE 472	Biomedical Ultrasound Imaging	3
ECE 473	Fund of Engrg Acoustics	3 or 4
ECE 476	Power System Analysis	3
ECE 478	Formal Software Development Methods	3 or 4
ECE 479	IoT and Cognitive Computing	4
ECE 480	Magnetic Resonance Imaging	3 or 4
ECE 481	Nanotechnology	4
ECE 482	Digital IC Design	3
ECE 483	Analog IC Design	3
ECE 486	Control Systems	4
ECE 487	Intro Quantum Electr for EEs	3
ECE 488	Compound Semicond & Devices	3
ECE 489	Robot Dynamics and Control	4
ECE 490	Introduction to Optimization	3 or 4
ECE 491	Numerical Analysis	3 or 4
ECE 492	Parallel Progrmg: Sci & Engrg	3 or 4
ECE 493	Advanced Engineering Math	3 or 4
ECE 495	Photonic Device Laboratory	3
ECE 498	Special Topics in ECE (As Approved)	1 to 4
ECON 302	Inter Microeconomic Theory (As Approved)	3
EPSY 456	Human Performance and Cognition in Context (As Approved)	3 or 4
ETMA 430	Project Management (As Approved)	2
GEOL 450	Investigating the Earth's Interior	3
GEOL 451	Environmental Geophysics	4
GEOL 454	Introduction to Seismology	3 or 4
GEOL 460	Geochemistry	3
IB 421	Photosynthesis	3
IE 310	Deterministic Models in Optimization	3
IE 311	Operations Research Lab	1
IE 330	Industrial Quality Control	3
IE 340	Human Factors	4
IE 360	Facilities Planning and Design	3
IE 361	Production Planning & Control	3
IE 370	Stochastic Processes and Applications	3
IE 371	Simulation Modeling with Applications for Industrial Engineering	3
IE 400	Design & Anlys of Experiments	3 or 4
IE 410	Advanced Topics in Stochastic Processes & Applications	3 or 4
IE 411	Optimization of Large Systems	3 or 4
IE 412	OR Models for Mfg Systems	3 or 4
IE 413	Simulation	3 or 4
IE 420	Financial Engineering	3 or 4
IE 430	Economic Found of Quality Syst	3 or 4
IE 431	Design for Six Sigma	3
IE 434	Deep Learning: Mathematics and Applications	3 or 4
IE 445	Human Performance and Cognition in Context (As Approved)	3 or 4
IE 497	Independent Study (As Approved)	1 to 4
IE 498	Special Topics (As Approved)	1 to 4
MATH 314	Introduction to Higher Mathematics	4
MATH 347	Fundamental Mathematics	3
MATH 357	Numerical Methods I	3
MATH 403	Euclidean Geometry	3 or 4
MATH 412	Graph Theory	3 or 4
MATH 413	Intro to Combinatorics	3 or 4
MATH 414	Mathematical Logic	3 or 4
MATH 417	Intro to Abstract Algebra	3 or 4
MATH 418	Intro to Abstract Algebra II	3 or 4
MATH 423	Differential Geometry	3 or 4
MATH 424	Honors Real Analysis	3
MATH 425	Honors Advanced Analysis	3
MATH 427	Honors Abstract Algebra	3
MATH 428	Honors Topics in Mathematics (As Approved)	3
MATH 432	Set Theory and Topology	3 or 4
MATH 442	Intro Partial Diff Equations	3 or 4
MATH 444	Elementary Real Analysis	3 or 4
MATH 446	Applied Complex Variables	3 or 4
MATH 447	Real Variables	3 or 4
MATH 448	Complex Variables	3 or 4
MATH 450	Numerical Analysis	3 or 4
MATH 453	Number Theory	3 or 4
MATH 464	Statistics and Probability II	3 or 4
MATH 466	Applied Random Processes	3 or 4
MATH 473	Algorithms	4
MATH 475	Formal Models of Computation	3 or 4
MATH 481	Vector and Tensor Analysis	3 or 4
MATH 482	Linear Programming	3 or 4
MATH 484	Nonlinear Programming	3 or 4
MATH 487	Advanced Engineering Math	3 or 4
MATH 489	Dynamics & Differential Eqns	3 or 4
MATH 490	Advanced Topics in Mathematics (As Approved)	1 to 4
MATH 492	Undergraduate Research in Math (As Approved)	1 to 3
MCB 401	Cellular Physiology	3
MCB 402	Sys & Integrative Physiology	3
MCB 406	Gene Expression & Regulation	3
MCB 419	Brain, Behavior & Info Process	3
MCB 446	Physical Biochemistry	3

MCB 450	Introductory Biochemistry	3
MCB 493	Special Topics Mol Cell Biol (As Approved)	1 to 4
MSE 304	Electronic Properties of Matls	3
MSE 307	Materials Laboratory I	3
MSE 308	Materials Laboratory II	3
MSE 401	Thermodynamics of Materials	3
MSE 402	Kinetic Processes in Materials	3
MSE 403	Synthesis of Materials	3
MSE 405	Microstructure Determination	3
MSE 406	Thermal-Mech Behavior of Matls	3
MSE 420	Ceramic Materials & Properties	3
MSE 421	Ceramic Processing	3 or 4
MSE 422	Electrical Ceramics	3
MSE 440	Mechanical Behavior of Metals	3
MSE 441	Metals Processing	3
MSE 443	Design of Engineering Alloys	3
MSE 450	Polymer Science & Engineering	3 or 4
MSE 453	Plastics Engineering	3
MSE 455	Macromolecular Solids	3
MSE 456	Mechanics of Composites	3
MSE 457	Polymer Chemistry	3 or 4
MSE 458	Polymer Physics	3 or 4
MSE 460	Electronic Materials I	3
MSE 461	Electronic Materials II	3
MSE 464	Magnetic Materials and their Applications	3 or 4
MSE 466	Electrochemical Energy Conversion	3
MSE 470	Design and Use of Biomaterials	3
MSE 473	Biomolecular Materials Science	3
MSE 474	Biomaterials and Nanomedicine	3
MSE 480	Surfaces and Colloids	3 or 4
MSE 481	Electron Microscopy	3 or 4
MSE 485	Atomic Scale Simulations	3 or 4
MSE 487	Materials for Nanotechnology	3 or 4
MSE 488	Optical Materials	3 or 4
MSE 489	Matl Select for Sustainability	3 or 4
MSE 497	Independent Study (As Approved)	1 to 4
MSE 498	Special Topics (As Approved)	1 to 4
NE 410	Neural Circuits and Systems	3 or 4
NEUR 419	Brain, Behavior & Info Process	3
NPRE 321	Introduction to Plasmas and Applications	3
NPRE 330	Materials in Nuclear Engineering	3
NPRE 402	Nuclear Power Engineering	3 or 4
NPRE 412	Nuclear Power Econ & Fuel Mgmt	3 or 4
NPRE 413	Nuclear Separations and Fuel Reprocessing	2 or 3
NPRE 421	Plasma and Fusion Science	3
NPRE 423	Plasma Laboratory	2
NPRE 429	Plasma Engineering	3
NPRE 435	Radiological Imaging	3
NPRE 441	Radiation Protection	4
NPRE 442	Radioactive Waste Management	3
NPRE 445	Interaction of Radiation with Matter	4
NPRE 448	Nuclear Syst Engrg & Design	4
NPRE 449	Nuclear Systems Engineering and Design	3
NPRE 451	NPRE Laboratory	3
NPRE 452	Advanced Radiological Science Lab	2 or 4
NPRE 455	Neutron Diffusion & Transport	4
NPRE 457	Safety Anlys Nucl Reactor Syst	3 or 4
NPRE 461	Probabilistic Risk Assessment	3 or 4
NPRE 470	Fuel Cells & Hydrogen Sources	3
NPRE 475	Wind Power Systems	3 or 4
NPRE 498	Special Topics (As Approved)	1 to 4
NRES 445	Statistical Methods	4
PHYS 329	Atmospheric Dynamics I	3
PHYS 330	Atmospheric Dynamics II	3
PHYS 370	Introduction to Quantum Information and Computing	3
PHYS 401	Classical Physics Lab	3
PHYS 402	Light	3 or 4
PHYS 403	Modern Experimental Physics	4 or 5
PHYS 404	Electronic Circuits	4 or 5
PHYS 427	Thermal & Statistical Physics	4
PHYS 435	Electromagnetic Fields I	3
PHYS 436	Electromagnetic Fields II	3
PHYS 446	Modern Computational Physics	3
PHYS 460	Condensed Matter Physics	4
PHYS 466	Atomic Scale Simulations	3 or 4
PHYS 470	Subatomic Physics	4
PHYS 475	Introduction to Biophysics	3 or 4
PHYS 485	Atomic Phys & Quantum Theory	3
PHYS 486	Quantum Physics I	4
PHYS 487	Quantum Physics II	4
PHYS 496	Communicating in Physics—Writing Papers and Giving Talks (As Approved)	3
PHYS 497	Individual Study (As Approved)	1 to 4
PHYS 498	Special Topics in Physics (As Approved)	1 to 4
PSYC 358	Human Factors	4
PSYC 456	Human Performance and Cognition in Context (As Approved)	3 or 4
SE 400	Engineering Law (As Approved)	3 or 4
SE 402	Comp-Aided Product Realization	3 or 4
SE 411	Reliability Engineering	3 or 4
SE 412	Nondestructive Evaluation	3 or 4
SE 413	Engineering Design Optimization	3 or 4
SE 420	Digital Control Systems	4
SE 422	Robot Dynamics and Control	4
SE 423	Mechatronics	3
SE 424	State Space Design for Control	3
SE 450	Decision Analysis I (As Approved)	3 or 4
SE 497	Independent Study (As Approved)	0 to 4
SE 498	Special Topics (As Approved)	1 to 4
STAT 409	Actuarial Statistics II	4
STAT 410	Statistics and Probability II	3 or 4
STAT 420	Methods of Applied Statistics	3 or 4
STAT 424	Design of Experiments	3 or 4

STAT 425	Statistical Modeling I	3 or 4
STAT 426	Statistical Modeling II	3 or 4
STAT 428	Statistical Computing	3 or 4
STAT 429	Time Series Analysis	3 or 4
STAT 430	Topics in Applied Statistics (As Approved)	3 or 4
STAT 431	Applied Bayesian Analysis	3 or 4
STAT 432	Basics of Statistical Learning	3 or 4
STAT 433	Stochastic Processes	3 or 4
STAT 434	Survival Analysis	3 or 4
STAT 437	Unsupervised Learning	3 or 4
STAT 440	Statistical Data Management	3 or 4
STAT 443	Professional Statistics (As Approved)	3 or 4
STAT 448	Advanced Data Analysis	4
STAT 480	Big Data Analytics	3 or 4
TE 461	Technology Entrepreneurship (As Approved)	3
TMGT 460	Business Process Modeling	3
TMGT 461	Tech, Eng, & Mgt Final Project	4
UP 430	Urban Transportation Planning (As Approved)	4

Free Electives

Code	Title	Hours
Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		11
Total Hours of Curriculum to Graduate		**128**

for the degree of Bachelor of Science in Mechanical Engineering

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. The curriculum sequence can also be viewed via dynamic and static curricular maps *(*https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/mechanical-map/*), which include prerequisite sequencing.*

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(*p. 2*). One of the SBS courses must be an introductory economics course (* ECON 102 *or* ECON 103 *).* ME 470 *will satisfy a core course requirement and the Campus General Education Advanced Composition requirement.*

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives *(*https://go.grainger.illinois.edu/FreeElectives/*), so that there are at least 128 credit hours earned toward the degree.*

for the degree of Bachelor of Science Major in Mechanical Engineering

Student learning outcomes are aligned with the learning outcomes required by the ABET accreditation process.

Mechanical Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Media, BA (online)

for the degree of Bachelor of Arts in Media (online)

The Bachelor of Arts in Media provides students with a well-rounded interdisciplinary education in fields associated with the media industry. Students take coursework in advertising, journalism, and media & cinema studies. The remaining coursework, after completing general education courses, is comprised of free electives, to allow for maximum flexibility for students. The program is offered online, and students will take only online coursework to complete degree requirements.

This degree program is open to students with some college coursework, but no degree. First-year students with no college coursework are not eligible to apply.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the degree of Bachelor of Arts in Media (online)

Graduation Requirements

Minimum hours required for graduation: 120 hours

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The University and residency requirements can be found in Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Major Requirements

Code	Title	Hours
Foundation Course		**3**
MACS 101	Introduction to the Media	3
Core Requirements: Theory, History, Methods, and Production		**12-13**
Students must choose a track for core requirements and are encouraged to select one of the specific tracks. Each track requires students to complete at least one course each in Theory, History, Methods, and Production appropriate to their track.		
Cinema Studies Track		
Theory		
MACS 361	Film Theory	
History		
Choose 1:		
MACS 261	Survey of World Cinema I	
MACS 262	Survey of World Cinema II	
Methods		
MACS 350	Film Analysis and Criticism	
Production		
Choose 1:		
MACS 150	Introduction to Digital Media Production	
MACS 205	Introduction to Documentary	
MACS 260	Film Production	
Critical Media Production Track		
Theory		
Choose 1:		
MACS 320	Popular Culture	
MACS 326	New Media, Culture & Society	
MACS 356	Sex & Gender in Popular Media	
MACS 361	Film Theory	
History		
Choose 1:		
MACS 205	Introduction to Documentary	
MACS 261	Survey of World Cinema I	
MACS 262	Survey of World Cinema II	
MACS 284	Animated Media from Mickey to GIFs	
MACS 317	Media History	
Methods		
Choose 1:		
MACS 350	Film Analysis and Criticism	
MACS 351	Media Analysis	
Production		
MACS 260	Film Production	
Media Studies Track		
Theory		
Choose 1:		
MACS 320	Popular Culture	
MACS 326	New Media, Culture & Society	
MACS 356	Sex & Gender in Popular Media	
History		
MACS 317	Media History	
Methods		
MACS 351	Media Analysis	
Production		
Choose 1:		
MACS 140	Smartphone Cinema	
MACS 150	Introduction to Digital Media Production	
MACS 205	Introduction to Documentary	
MACS 260	Film Production	
MACS 264	Media Industries	
General Track		
While a specific track is strongly preferred, students may fulfill the following core requirements for the general track:		
Theory		
Choose 1:		
MACS 320	Popular Culture	
MACS 326	New Media, Culture & Society	
MACS 356	Sex & Gender in Popular Media	
MACS 361	Film Theory	
History		
Choose 1:		
MACS 205	Introduction to Documentary	
MACS 261	Survey of World Cinema I	
MACS 262	Survey of World Cinema II	
MACS 284	Animated Media from Mickey to GIFs	
MACS 317	Media History	
Methods		
Choose 1:		
MACS 350	Film Analysis and Criticism	
MACS 351	Media Analysis	
Production		
Choose 1:		
MACS 140	Smartphone Cinema	
MACS 150	Introduction to Digital Media Production	

MACS 205	Introduction to Documentary	
MACS 260	Film Production	
MACS 264	Media Industries	
Capstone Course		**3**
Students should complete at least 3 hours of MACS coursework at the 400-level from the following list:		
MACS 408	TV Studies	
MACS 410	Media Ethics	
MACS 466	Japanese Cinema	
MACS 480	Advanced Filmmaking (MACS 480 and MACS 481 must be taken concurrently)	
MACS 481	Advanced Filmmaking Studio (MACS 480 and MACS 481 must be taken concurrently)	
MACS 484	Media Professionalization	
MACS 485	Making Video Essays	
MACS 496	Advanced Media/Cinema Topics	
Media and Cinema Studies Electives		**12**
Students must complete at least 12 hours of MACS coursework that is in addition to the requirements above. At least 3 hours must be at the 300-level or above.		
College of Media Electives		**6**
Students should complete at least 6 hours of coursework from courses in the College of Media, in addition to the requirements above. These can be Media and Cinema Studies (MACS), Journalism (JOUR), Advertising (ADV), or Media (MDIA).		
Total hours required for graduation		**124**

for the degree of Bachelor of Science in Media & Cinema Studies

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Electives are additional courses to help students achieve 124 hours required for the degree. MACS Electives are any Media and Cinema Studies (MACS) courses not already counting toward degree requirements. Media Electives are any non-required Advertising (ADV), Journalism (JOUR), Media & Cinema Studies (MACS), or Media (MDIA) course. MACS and Media Electives can often be any level, but students should check with their advisor for specific guidance.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This may require up to three semesters of language depending on high school coursework or placement. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Media & Cinema Studies

Students in Media and Cinema Studies will be able to:

1. Demonstrate an understanding of media and cinema studies' subject areas, and their respective concepts, theories, and methods.
2. Demonstrate critical thinking skills.
3. Demonstrate an ability to identify and explain problems of social power and social justice across media products and processes.
4. Demonstrate the ability to successfully communicate research outcomes and/or creative expressions across a range of modalities.
5. Demonstrate the ability to collaborate successfully and inclusively on research and/or creative projects.

Middle Grades Education, BS

for the degree of Bachelor of Science in Middle Grades Education

The **Middle Grades Education, BS** prepares teachers for grades five through eight. A minimum of 120 semester hours is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

Students are admitted to Middle Grades Education as freshmen. In order to be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C- or better in ALL content and professional education coursework. For teacher education licensure applicable to all curricula, see the Council on Teacher Education. Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Students in the Middle Grades Education licensure program must complete the Campus General Education Requirements, the courses for one or more concentrations (literacy, social sciences, science or math) and the professional education coursework. In the final two years of the major, students will take a set of core courses, as well as coursework in one or more of the following concentrations:

- Literacy (p. 577)
- Mathematics (p. 579)
- Science (p. 582)
- Social Science (p. 585)

Middle Grades Education: Literacy, BS

for the degree of Bachelor of Science in Middle Grades Education, Literacy Concentration

The **Middle Grades Education, BS** prepares teachers for grades five through eight. A minimum of 120 semester hours is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0). Candidates in teaching licensure programs must maintain a C- or better in ALL content and professional education coursework. For teacher education licensure information applicable to all curricula, see the Council on Teacher Education. Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page (p. 2)*.*

Molecular & Cellular Biology, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciencesin Molecular & Cellular Biology

The Molecular and Cellular Biology major provides students with a solid preparation in molecular biology, molecular genetics, microbiology, cellular biology, biochemistry, physiology, and structural biology. Students will also acquire a strong background in chemistry, math and physical sciences. After completion of the core curriculum in MCB, students may complete the required advanced course work by taking a variety of MCB courses or by selecting a more focused group of courses in any of the following areas: biochemistry, cells and tissues, developmental biology, infection and immunity, microbiology, genetics, neurobiology and physiology. The MCB Advising Program (MAP) staff is available to help students plan their combination of advanced courses.

For students interested in adding licensure to the BSLAS in Molecular & Cellular Biology, please visit the Biology Teaching page (https://mcb.illinois.edu/academics/undergraduate-programs/major-molecular-cellular-biology/mcb-teaching-licensure-program/).

Undergraduate degree programs in Molecular & Cellular Biology

- Molecular & Cellular Biology Honors Concentration, BSLAS (p. 591)
- Molecular & Cellular Biology + Data Science, BSLAS (p. 595)
- Neuroscience, BSLAS (p. 649)

for the degree of Bachelor of Science in Liberal Arts and Sciences Major in Molecular & Cellular Biology

Certain advanced courses may be taken prior to completion of the MCB 250, MCB 253, MCB 354 sequence with permission of an academic advisor. A minimum of 15 hours of 300- or 400-level courses in MCB from the approved list is required.

In addition, undergraduate research (MCB 290, or departmental equivalent) is strongly recommended for students planning to go to graduate school. No more than 10 hours of MCB 290, or departmental equivalent credit may be counted towards the 120 hours required for a degree in MCB.

Students earning a degree in Molecular and Cellular Biology may not also earn a second degree in the Specialized Curriculum in Biochemistry.

Students earning a degree in Molecular and Cellular Biology may not double major in Integrative Biology.

Distinction

Students in MCB can qualify for Distinction via one of the following:

Distinction for Excellence in Research:

To be eligible for graduation with Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with High Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee.

To be eligible for graduation with Highest Distinction a student must:

Complete 2 semesters of MCB 290 for 2 credit hours or more each semester. Complete 1 semester MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate

Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator. Submit a written thesis that is approved by the Distinction Committee. Distinction for Excellence in Academics:

To be eligible for graduation with Academic Distinction a student must:

Maintain a major GPA of 3.90 or higher in the MCB major (biology, chemistry, physics and math courses for the MCB major) at the end of their penultimate semester.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: 67-71, including 21 hours of 300-/400- level courses. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Liberal Arts and Sciences in Molecular & Cellular Biology

Upon successful completion of the Molecular & Cellular Biology undergraduate curriculum, students will be able to:

1. Understand and appreciate the diversity of life as it evolved over time by processes of mutation, selection and genetic change.
2. Illustrate that fundamental structural units define the function of all living things.
3. Explain that the growth, development, and behavior of organisms are activated through the expression of genetic information in context.
4. Summarize that biological systems grow and change by processes based upon chemical transformation pathways and are governed by the laws of physics.
5. Illustrate that living systems are interconnected and interacting across scales of space and time.
6. Design a scientific process and employ the scientific method, demonstrating that biology is evidence based and grounded in the formal practices of observation, experimentation, and hypothesis testing.
7. Execute quantitative analysis to interpret biological data.
8. Construct and utilize predictive models to study and describe complex biological systems.
9. Apply concepts from other sciences in order to interpret biological phenomena.
10. Communicate biological concepts and understanding to members of a diverse scientific community as well as to the general public.
11. Identify social and historical dimensions of biological investigation.

Molecular & Cellular Biology: Honors, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences in Molecular & Cellular Biology, Honors Concentration

The Molecular and Cellular Biology Honors Concentration is designed for students whose preparation and interests motivate them to desire a more intensive undergraduate biology experience and to prepare for graduate or professional school. The MCB Honors Concentration is based on the MCB Concentration (http://catalog.illinois.edu/undergraduate/las/academic-units/molecular-cell-bio/molecular-cellular-biology-concentration/). Students must satisfy all of the requirements for the MCB concentration in addition to the requirements for the MCB Honors Concentration. Students interested in the MCB Honors Concentration (https://mcb.illinois.edu/academics/undergraduate-programs/major-molecular-cellular-biology/mcb-honors-concentration/) should contact the MCB Honors Concentration coordinator (shawna@illinois.edu) during the freshman year for more information.

Molecular and Cellular Biology + Data Science, BSLAS

for the degree of Bachelor of Science in Molecular and Cellular Biology + Data Science

In the Molecular and Cellular Biology (MCB) + Data Science (DS) degree program students are provided with a thorough foundation in both molecular and cellular biology and data science through an integrated and deliberate effort to ensure that our students have the necessary understanding of the biological science underpinning the study of life and biological systems, while also having access to the tools and training in the skillsets needed to collect, handle, and interpret the large biological datasets being generated by the field. Thorough preparation in molecular biology, molecular genetics, microbiology, cellular biology, biochemistry, physiology, and structural biology comes from coursework, laboratory classes, as well as research and discovery experiences. This degree program equips students with the knowledge, tools, and skills to manage and analyze very large and diverse datasets across various biological systems, including healthcare systems, pharmaceutical industry, biologically and environmentally relevant government agencies, and data-intensive biological research areas.

Undergraduate degree programs in Molecular & Cellular Biology

- Molecular & Cellular Biology, BSLAS (p. 588)
- Molecular & Cellular Biology Honors Concentration, BSLAS (p. 591)
- Molecular & Cellular Biology + Data Science, BSLAS (p. 595)
- Neuroscience, BSLAS (p. 649)

Distinction

Students in MCB + Data Science can qualify for Distinction via one of the following:

Distinction for Excellence in Research:

To be eligible for graduation with Distinction a student must: Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with High Distinction a student must:

- Complete 2 semesters of MCB 290 for 2 credit hours or more each semester.
- Complete 1 semester of MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester.
- Give at least one poster presentation at the Undergraduate Research symposium or other approved venue.
- Obtain a letter of support from their Principal Investigator.
- Submit a written thesis that is approved by the Distinction Committee.

To be eligible for graduation with Highest Distinction a student must:

- Complete 2 semesters of MCB 290 for 2 credit hours or more each semester.
- Complete 1 semester MCB 492 for 3 credit hours or more. Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester.
- Give at least one poster presentation at the Undergraduate Research symposium or other approved venue.
- Obtain a letter of support from their Principal Investigator.
- Submit a written thesis that is approved by the Distinction Committee.

To be eligible for graduation with Academic Distinction a student must:

- Maintain a major GPA of 3.90 or higher in the MCB + Data Science major (biology, chemistry, and math courses for the MCB + Data Science major) at the end of their penultimate semester.

for the degree of Bachelor of Science in Molecular and Cellular Biology + Data Science

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

MCB 410	Developmental Biology, Stem Cells and Regenerative Medicine	
MCB 413	Endocrinology	
MCB 424	Microbial Biochemistry	
MCB 426	Bacterial Pathogenesis	
MCB 430	Molecular Microbiology	
Research or Discovery Experience		**6**
One of the most important skills a student will gain in the MCB + DS degree will be the ability to work with data in context. A minimum of 6 credit hours of research or discovery experience is required. This can be achieved through one or more of the options listed below.		
Option 1		
MCB 290	Undergraduate Research	
Completed in School of MCB research labs, designated MCB data science-focused labs is encouraged. Optional: MCB 492: Senior Thesis in MCB 290 research lab.		
Option 2		
MCB 292	Experiential Learning in MCB	
Option 3		
School of MCB-developed Study Abroad Program where advanced courses in MCB and Data Science are the focus (minimum of the equivalent to 6 UIUC credit hours transferred back to Illinois). Some programs offer course-based research experiences in MCB research laboratories with an emphasis on Data Science. Students choose from MCB-developed residential study abroad programs. All courses are selected under the supervision of an MCB Study Abroad Academic Advisor and will be pre-articulated.		

for the degree of Bachelor of Science in Molecular and Cellular Biology + Data Science

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment

programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Molecular and Cellular Biology + Data Science

Upon successful completion of the Molecular & Cellular Biology + Data Science undergraduate curriculum, students will be able to:

1. Understand and appreciate the diversity of life as it evolved over time by processes of mutation, selection, and genetic change.
2. Illustrate that fundamental structural units define the function of all living things.
3. Explain that the growth, development, and behavior of organisms are activated through the expression of genetic information in context.
4. Summarize that biological systems grow and change by processes based upon chemical transformation pathways and are governed by the laws of physics.

5. Illustrate that living systems are interconnected and interacting across scales of space and time.
6. Design a scientific process and employ the scientific method, demonstrating that biology is evidence based and grounded in the formal practices of observation, experimentation, and hypothesis testing.
7. Apply critical thinking and quantitative reasoning skills to solve problems.
8. Execute quantitative analysis to interpret biological data.
9. Construct and utilize predictive models to study and describe complex biological systems.
10. Apply concepts from other sciences in order to interpret biological phenomena.
11. Communicate biological concepts and understanding to members of a diverse scientific community as well as to the general public.
12. Identify social and historical dimensions of biological investigation.
13. Develop relevant programming abilities.
14. Demonstrate proficiency with statistical analysis of data.
15. Develop the ability to build and assess data-based models.
16. Execute statistical analyses with professional statistical software.
17. Demonstrate skill in data management.
18. Apply data science concepts and methods to solve problems in real-world contexts and communicate these solutions effectively.

Music, BA

for the degree of Bachelor of Arts Major in Music

The Bachelor of Arts with a Major in Music is a 120-hour degree that is designed for students who wish to pursue a music degree with curricular flexibility to complete coursework in secondary and complementary areas of study. The BA in Music requires students to select a specific area of study, called either a concentration or an "option." A concentration is listed on your academic transcript, whereas an option is an informal focus of advanced music courses and supporting (non-Music) coursework and the coursework is determined in consultation with the student's advisor. The current concentration available is music technology. Current options include music theory, composition, and various branches of musicology; or students may work with an advisor to explore alternate options not listed here (music + "your choice").

BA students work with their BA advisor to designate supplemental coursework to suit their interests and long-term goals. Students may indicate a specific area of study during the admissions process; some students may prefer to select an option after completing the first year of the music core. All BA students should designate their option by no later than the start of the spring semester of the sophomore year.

for the degree of Bachelor of Arts Major in Music

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

Credits earned in applied music lessons are generally considered elective.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Total Hours 120

for the degree of Bachelor of Arts Major in Music

Bachelor of Arts in Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
4. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
5. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
6. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
7. Appreciate how music interacts in communities to enhance and engage social and cultural identities to enrich lifelong learning.

Music: Music Technology, BA

for the degree of Bachelor of Arts in Music, Music Technology concentration

The Concentration in Music Technology focuses on audio production, recording, mixing, electro-acoustic composition techniques, interactive sound synthesis, and digital audio fluency. The Music Technology curricular path gives students the flexibility to choose supporting coursework in sound design, engineering, computer sciences and more.

for the degree of Bachelor of Arts in Music, Music Technology concentration

Bachelor of Arts in Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.

3. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
4. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
5. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
6. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
7. Appreciate how music interacts in communities to enhance and engage social and cultural identities to enrich lifelong learning.

The goals of the Music Technology concentration are:

1. To treat the study of technology and music as equal subject areas, adopting a broad, multi-disciplinary approach to the curriculum.
2. To frame music technology within the larger contexts of historical trends, social transformation and ethical responsibility.
3. To give students a technical understanding of computers and a familiarity with how computers mediate work in different disciplines across the arts and sciences.
4. To transform students from consumers of digital media into informed producers of content.
5. To provide an education relevant to contemporary career paths.

Music Composition, BMUS

for the degree of Bachelor of Music Major in Music Composition

In this major, emphasis may be placed on music composition or on the theory of music. Necessary course adjustments require approval of the composition-theory division and college undergraduate affairs office.

for the degree of Bachelor of Music Major in Music Composition

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Students who wish to study voice or an instrument for credit are ~~credit are~~ required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This sample curriculum plan makes the assumption that the foreign language graduation requirement has been satisfied by completing three years of study of a single foreign language in high school. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Music Education, BME

for the degree of Bachelor of Music Education in Music Education

Students pursuing this major select one of four concentrations:

- **Choral Music Concentration (p. 609)**
- **(p. 609)General Music Concentration (p. 613)**
- **Instrumental Music Concentration (p. 617)**
- **Technology Concentration (p. 620)**

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades pre-kindergarten through twelve.

For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cote.illinois.edu/). In order to be recommended for licensure with the Illinois State Board of Education, candidates are required to maintain a UIUC cumulative grade-point average of 2.5. All music education students must earn a grade of C- or better in all music and education courses required for licensure.

Students complete a concentration in instrumental (band or strings), choral, technology, or general music education.

for the degree of Bachelor of Music Education in Music Education

Graduation Requirements

Minimum hours required for graduation: 130 hours.

Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

In order to be recommended for licensure with the Illinois State Board of Education, candidates are required to maintain a UIUC cumulative grade-point average of 2.5. All music education students must earn a grade of C- or better in all music and professional education courses required for licensure.

The School of Music teacher education program requires a content area (music core, techniques courses, BME electives) GPA of 2.75, and professional education (professional education, concentration specialization courses) GPA of 2.5 (A=4.0).

Candidates should consult their degree audit for a listing of courses used to compute these grade-point averages.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed

requirements may be met by courses required and/or electives in the program.

8 of these hours are fulfilled by MUS 201, MUS 202, MUS 207, and MUS 208, each of which has at least 2 prerequisites and may count as advanced	
A maximum of 8 hours of upper level coursework may be earned through ensembles, MUS 447 through MUS 498	
MUSC 487 through MUSC 499 do not fulfill advanced hours	
Total Hours	**130**

for the Degree of Bachelor of Music Education in Music Education, Choral Music Concentration

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. This sample curriculum plan makes the assumption that students will have demonstrated keyboard competency by proficiency examination when they matriculate or they will need to enroll in MUS 172 and/or MUS 173.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This sample curriculum plan makes the assumption that the foreign language graduation requirement has been satisfied by completing three years of study of a single foreign language in high school. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Music Education: General Music, BME

for the degree of Bachelor of Music Education in Music Education, General Music Concentration

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades pre-kindergarten through twelve.

For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cote.illinois.edu/). In order to be recommended for licensure with the Illinois State Board of Education, candidates are required to maintain a University of Illinois Urbana-Champaign cumulative grade-point average of 2.5. All music education students must earn a grade of C- or better in all music and education courses required for licensure.

Students complete a concentration in instrumental (band or strings), choral, technology, or general music education.

for the degree of Bachelor of Music Education in Music Education, General Music Concentration

Graduation Requirements

Minimum hours required for graduation: 130 hours.

Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

In order to be recommended for licensure with the Illinois State Board of Education, candidates are required to maintain a UIUC cumulative grade-point average of 2.5. All music education students must earn a grade of C- or better in all music and professional education courses required for licensure.

The School of Music teacher education program requires a content area (music core, techniques courses, BME electives) GPA of 2.75, and professional education (professional education, concentration specialization courses) GPA of 2.5 (A=4.0).

Candidates should consult their degree audit for a listing of courses used to compute these grade-point averages.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. This sample curriculum plan makes the assumption that students will have demonstrated keyboard competency by proficiency examination when they matriculate or they will need to enroll in MUS 172 and/or MUS 173.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This sample curriculum plan makes the assumption that the foreign language graduation requirement has been satisfied by completing three years of study of a single foreign language in high school. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

School of Music (http://catalog.illinois.edu/undergraduate/faa/music-education-bme/instrumental-music/School of Music/)

Music Faculty (https://music.illinois.edu/people/)

College of Fine & Applied Arts (https://faa.illinois.edu/)

Music Education: Technology, BME

for the degree of Bachelor of Music Education in Music Education, Technology Concentration

A minimum of 130 hours of credit is required for graduation. This curriculum prepares its graduates for teaching music in grades pre-kindergarten through twelve.

For teacher education requirements applicable to all curricula, see the Council on Teacher Education (https://cote.illinois.edu/). In order to be recommended for licensure with the Illinois State Board of Education, candidates are required to maintain a University of Illinois Urbana-Champaign cumulative grade-point average of 2.5. All music education students must earn a grade of C- or better in all music and education courses required for licensure.

Students complete a concentration in instrumental (band or strings), choral, technology, or general music education.

for the degree of Bachelor of Music Education in Music Education, Technology Concentration

Technology Concentration Requirements

Graduation Requirements

Minimum hours required for graduation: 130 hours.

Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

In order to be recommended for licensure with the Illinois State Board of Education, candidates are required to maintain a UIUC cumulative grade-point average of 2.5. All music education students must earn a grade of C- or better in all music and professional education courses required for licensure.

The School of Music teacher education program requires a content area (music core, techniques courses, BME electives) GPA of 2.75, and professional education (professional education, concentration specialization courses) GPA of 2.5 (A=4.0).

Candidates should consult their degree audit for a listing of courses used to compute these grade-point averages.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Plan of Study		
Students work with an advisor to submit their own Plan of Study for the Open Studies degree coursework.		
Important: A minimum of five (5) hours of courses at the 300- and/or 400-level must be chosen from Professional Electives, General Education (not including MUS 313 and MUS 314), or open electives in order to meet the minimum requirement of 40 hours of upper-level coursework for this degree.		
Applied Music Lessons		**12**
Students must complete four semesters of 100-level applied lessons before they can move to 400-level applied lessons. The minimum number of applied lesson credits for this program is twelve (12).		
Applied Music Lessons (years 1 & 2). Students choose from:		
MUSC 101, MUSC 102, MUSC 103, MUSC 110, MUSC 111, MUSC 112, MUSC 113, MUSC 114, MUSC 115, MUSC 116, MUSC 117, MUSC 120, MUSC 121, MUSC 122, MUSC 123, MUSC 124, MUSC 125, MUSC 126, MUSC 127, MUSC 128, MUSC 129, MUSC 130, MUSC 131, MUSC 132, MUSC 133, MUSC 134, MUSC 135, MUSC 136, MUSC 137, MUSC 138, MUSC 139, MUSC 140, MUSC 141, MUSC 142		

MUSC 401, MUSC 402, MUSC 403, MUSC 410, MUSC 411, MUSC 412, MUSC 413, MUSC 414, MUSC 415, MUSC 416, MUSC 417, MUSC 420, MUSC 421, MUSC 422, MUSC 423, MUSC 424, MUSC 425, MUSC 426, MUSC 427, MUSC 428, MUSC 429, MUSC 430 MUSC 431, MUSC 432, MUSC 433, MUSC 434, MUSC 435, MUSC 436, MUSC 437, MUSC 438, MUSC 439, MUSC 440, MUSC 441, MUSC 442		
Ensemble		**8**
Open Studies majors must be in an approved ensemble each semester of residence. A maximum of 10 hours of ensemble may be applied to the BMUS Open Studies degree.		
Students choose from:		
MUSC 460, MUSC 461, MUSC 462, MUSC 463, MUSC 464, MUSC 465, MUSC 467, MUSC 469, MUSC 473, MUSC 475, MUSC 476, MUSC 480, MUSC 481, MUSC 482, MUSC 483		
MUS 242	Elements of Conducting	2
Advanced Music Electives in Musicology and Music Theory		**12**
Students select 12 hours from the advanced Musicology and Music Theory courses below.		
Students must choose at least one musicology course:		
MUS 410, MUS 411, MUS 412, MUS 413, MUS 414, MUS 415, MUS 416, MUS 418, MUS 421		
and one music theory course:		
MUS 400, MUS 404, MUS 405, MUS 407, MUS 408, MUS 409, MUS 426		
Professional Electives		**12**
To be chosen in consultation with advisor according to the Open Studies focus area. The focus area can be inside or outside of music, or an area which combines both.		
Capstone Project		**1**
Total Hours		**47**

Summary of Credit for the Bachelor of Music in Music-Open Studies

Code	Title	Hours
General Education		
Orientation		1
Music Core		29
Open Studies		47
Free electives to bring the total hours earned to 120		
A minimum of 40 credits at the 300- or 400-level must be completed for this degree		
8 of these hours are fulfilled by MUS 201, MUS 202, MUS 207, and MUS 208, each of which has at least 2 prerequisites and may count as advanced		
A maximum of 8 hours of upper level coursework may be earned through ensembles, MUSC 447 through MUSC 498		
Total Hours		**120**

for the degree of Bachelor of Music Major in Music-Open Studies

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Total Hours 120

for the degree of Bachelor of Music Major in Music-Open Studies

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Musicology, BMUS

for the degree of Bachelor of Music Major in Musicology

This major offers a broad cultural education that unites academic and musical training. It also provides preparation for the graduate study required for research and teaching in musicology or ethnomusicology.

for the degree of Bachelor of Music Major in Musicology

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Students who wish to study voice or an instrument for credit are required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

Credits earned in applied music lessons are generally considered elective.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

The fourth-year student, working with an adviser, must complete a satisfactory thesis as part of the requirements for the Bachelor of Music in Musicology.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Advanced Musicology (MUS 400-level courses)		12
Advanced Music Theory (MUS 400-level courses)		6
Foreign Language		0-4
Students must complete the equivalent of a fourth-semester college-level foreign language course or demonstrate fourth-semester proficiency for graduation.		
Four courses in relevant discipline outside of Music.		12-16
Chosen in consultation with the BMUS Musicology advisor. These courses may not be used to satisfy General Education requirements.		
Electives as needed to total 120 hours		
Total Hours		**120**

for the degree of Bachelor of Music Major in Musicology

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment

programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. This sample curriculum plan makes the assumption that students will have demonstrated keyboard competency by proficiency examination when they matriculate or they will need to enroll in MUS 172 *and/or* MUS 173*.*

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. This sample curriculum plan makes the assumption that the foreign language graduation requirement has been satisfied by completing four years of study of a single foreign language in high school. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Natural Resources & Environmental Sciences, BS

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences

Students pursuing this major select one of four concentrations:

- Ecosystem Stewardship & Restoration Ecology (p. 633)
- Environmental Science & Management (p. 636)
- Environmental Social Sciences (p. 639)
- Fish, Wildlife & Conservation Biology (p. 643)

Designed for students interested in careers leading the conservation, protection, and management of natural and environmental resources or in pursuing advanced education in one of its many disciplinary areas, the NRES baccalaureate provides a science-based, application-oriented education. The NRES major is unique in its integration of a comprehensive physical, life, and social sciences background with coursework providing the management, decision-making, and analytical knowledge and skills required to solve the world's most pressing problems.

Students in the NRES major begin their studies by taking a set of core courses that provides the background for more focused substantive study at the upper level. The NRES core introduces students to the range of physical, life, and social science content most relevant to their future professions and equips them with tools essential for the discovery, analysis, and application of knowledge important for successful environmental management. NRES students then build upon the core by completing one of four upper-level concentrations. Courses in the concentrations involve focused attention to the theories, data, and analytical tools of a particular set of natural resource and environmental science areas, helping students develop the necessary understanding of the complexities underlying resources management. All students in the major are required to complete a combination of field courses and at least one project-oriented capstone course.

All the concentrations prepare students for graduate study as well as for multiple career paths throughout the public and private sectors. Because of its unique orientation toward integrative application of disciplinary knowledge, the NRES major prepares students for a wide range of careers involving the conservation, protection, and management of natural resources. Many occur within business or government agencies that provide services related to environmental and natural resource management. Other careers are found within social, professional, and advocacy institutions that focus on human impacts and environmental

sustainability. The major also prepares students for teaching, research, or other professional activities.

Graduates from the NRES major go on to pursue careers in the direction of environmental education centers; ecological management and restoration; enforcement of laws and regulations; environmental advocacy; environmental consulting; forest and environmental economics; land use analysis and management; law; local, state, and federal government; management of parks, forests and rangelands; plant physiology; policy development and implementation; resource planning and policy analysis; social and environmental impact analysis; soil conservation, science, and testing; technical sales; watershed management; and wildlife conservation and management.

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences

Graduation Requirements

Minimum hours for graduation: 126 hours.

University Requirements

Minimum of 40 hours of upper-division coursework generally at the 300- and 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (https://studentcode.illinois.edu/article3/part8/3-801/)(§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences

Students graduating with the B.S. in NRES should be able to:

1. Understand the scientific method/ways of knowing and critically evaluate information.
2. Integrate principles of biological, chemical, physical, and social sciences and apply them to resource and environmental issues using a systems approach.
3. Understand ecological principles underpinning management of resources, populations, communities, and ecosystems.
4. Use data collection and analysis tools (such as field methods, GIS, modeling, and statistics) to develop plans for managing resource/environmental challenges and adapt plans in response to rapid change.
5. Understand the policies governing resources and the environment and identify social dimensions (stakeholders, interests, trade#offs, synergies, ethical principles) to consider in the development of management plans.
6. Communicate effectively with colleagues, stakeholders, and the public about environmental and resource management issues.
7. Recognize how diverse groups understand the environment, experience positive and negative environmental impacts, and perceive just and equitable solutions.

Natural Resources & Environmental Sciences: Ecosystem Stewardship & Restoration Ecology, BS

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences, Ecosystem Stewardship & Restoration Ecology Concentration

Ecosystem Stewardship and Restoration Ecology emphasizes the ecology, structure, and function of ecosystems, with a particular focus on plant communities and their interactions with the living and non-living parts of ecosystems. It is designed for students interested in the fundamental properties and practices underlying the restoration and management of soil, watershed, wetland, forest, and grassland ecosystems. The concentration includes coursework in the areas of restoration, landscape, and plant ecology, as well as courses focused on specific ecosystems (e.g. streams, wetlands, agroecosystems), invasive species, community ecology, and ecosystem science. For guidance on creating your own degree sequence, consult Graduation Plan Handout (https://go.illinois.edu/gradplan/).

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences, Ecosystem Stewardship & Restoration Ecology Concentration

Graduation Requirements

Minimum hours for graduation: 126 hours.

University Requirements

Minimum of 40 hours of upper-division coursework generally at the 300- and 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Natural Resources & Environmental Sciences: Environmental Science & Management, BS

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences, Environmental Science & Management Concentration

Environmental Science and Management emphasizes the biological, chemical, and physical features of the environment. It is designed for students interested in the management of soil and water resources and in understanding how to protect and improve environmental quality. The concentration includes coursework in environmental chemistry, environmental microbiology, watershed hydrology, and environmental quality, as well as courses focused more specifically on soil and water sciences.

Natural Resources & Environmental Sciences: Environmental Social Sciences, BS

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences, Environmental Social Sciences concentration

Environmental Social Sciences emphasizes the social scientific interpretations of human-environment interactions at multiple levels, as well as applied policy and management implications. This concentration requires advanced coursework in behavior change science, natural resource economics, environmental and conservation psychology, communications, social impact assessment, environmental policy, and environmental law. Students who have completed degrees in this concentration have gone on to careers in natural resource management, environmental policy, law, advocacy, and education.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. For guidance on creating your own degree sequence, consult the Graduation Plan Handout *(https://go.illinois.edu/gradplan/).*

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences, Environmental Social Sciences concentration

Students graduating with the B.S. in NRES should be able to:

1. Understand the scientific method/ways of knowing and critically evaluate information.
2. Integrate principles of biological, chemical, physical, and social sciences and apply them to resource and environmental issues using a systems approach.
3. Understand ecological principles underpinning management of resources, populations, communities, and ecosystems.
4. Use data collection and analysis tools (such as field methods, GIS, modeling, and statistics) to develop plans for managing resource/environmental challenges and adapt plans in response to rapid change.
5. Understand the policies governing resources and the environment and identify social dimensions (stakeholders, interests, trade-offs, synergies, ethical principles) to consider in the development of management plans.
6. Communicate effectively with colleagues, stakeholders, and the public about environmental and resource management issues.
7. Recognize how diverse groups understand the environment, experience positive and negative environmental impacts, and perceive just and equitable solutions.

Natural Resources & Environmental Sciences: Fish, Wildlife & Conservation Biology, BS

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences, Fish, Wildlife & Conservation Biology Concentration

Fish, Wildlife and Conservation Biology emphasizes the ecology, conservation, and sustainable management of fish and wildlife species and communities. It is designed for students interested in understanding interactions among humans, wild animals, and their habitats. The concentration includes coursework in conservation of threatened and endangered species, management of harvested species, aquatic ecosystem conservation, animal behavior, vertebrate natural history, identification of animals and plants, and advanced ecology.

for the degree of Bachelor of Science in Natural Resources & Environmental Sciences, Fish, Wildlife & Conservation Biology Concentration

Graduation Requirements

Minimum hours for graduation: 126 hours.

University Requirements

Minimum of 40 hours of upper-division coursework generally at the 300- and 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Neural Engineering, BS

for the degree of Bachelor of Science in Neural Engineering

The Bachelor of Science in Neural Engineering provides training at the intersection of neuroscience and engineering fundamentals. The program focuses on skill development in electrical and imaging systems, molecular and cellular engineering, biological interfacing, and computational data sciences. The first two years of the program provide foundational knowledge in applied formal sciences, physical sciences, and life sciences. Years three and four provide focused training in neural engineering fundamentals and applications through core courses, neuroscience courses, and neural engineering electives. Students will be prepared for employment as engineers in growing healthcare industry sectors related to neurological devices, brain-computer interfaces, neurological disease treatments, and brain imaging technologies. Graduates will also be positioned to pursue professional degrees in medicine and graduate studies in clinical, life, and behavioral sciences.

for the degree of Bachelor of Science in Neural Engineering

Minimum Hours for Graduation: 128

To graduate, students must satisfy all University requirements as to residency, scholarship, and fees and must complete the University's general education requirements.

Highest honors/departmental distinction: Students completing a Bachelor's thesis with a minimum GPA of 3.8 will be eligible for highest honors.

Graduation Requirements
Minimum hours required for graduation: 128 hours.
Minimum Overall GPA: 2.0

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Neural Engineering

The Neural Engineering program prepares graduates to achieve the following seven outcomes by the time of graduation:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of computational bioengineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analysis and interpretation of data, and to use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Neuroscience, BSLAS

for the degree of Bachelor of Science in Liberal Arts and Sciences in Neuroscience

---

The School of MCB's neuroscience curriculum combines the study of molecular and cellular biology with neuroscience, neurophysiology, neurochemistry, and neuro-pathology. Students will gain an understanding of brain function at multiple levels, from behavior and information processing to systems and integrative physiology. We use model organisms like fruit flies, fish, and mice, and we will explore cells at all levels, from the dish to cells functioning in

animals. We seek to understand the causes of a variety of disorders, from neurodevelopmental to neurodegenerative disorders, from brain cancer to epilepsy, and to develop biomedical treatments for them. As a neuroscience major, you'll take a variety of cutting-edge courses and develop critically-important laboratory skills. Students conduct research alongside faculty who lead pioneering programs in sensory processing, neuroendocrinology, physiology of neurons and glia, regeneration, and cell signaling with advanced techniques, such as optogenetics and neuroimaging.

Undergraduate degree programs in Molecular & Cellular Biology

- Molecular & Cellular Biology, BSLAS (p. 588)
- Molecular & Cellular Biology Honors Concentration, BSLAS (p. 591)
- Molecular & Cellular Biology + Data Science, BSLAS (p. 595)
- Neuroscience, BSLAS (p. 649)

for the degree of Bachelor of Science in Liberal Arts and Sciences in Neuroscience

Minimum Required Courses: 83-84 hours including 29 hours of 300- or 400-level courses. 12 hours of advanced level courses in the major must be taken on the Urbana-Champaign campus.

In addition, undergraduate research (MCB 290) in an MCB Neuroscience-designated lab is strongly recommended for students planning to go to graduate school. No more than 10 hours of MCB 290 credit may be counted towards the 120 hours required for a degree in Neuroscience.

Students earning a degree in Neuroscience may not also earn a second degree in the Specialized Curriculum in Biochemistry.

Students earning a degree in Neuroscience may not double major in Molecular and Cellular Biology.

Distinction

Students in Neuroscience can qualify for Distinction via one of the following:

Distinction for Excellence in Research:

To be eligible for graduation with Distinction a student must:

Complete 3 semesters of MCB 290 for 2 credit hours or more each semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one poster presentation at the Undergraduate Research symposium or other approved venue. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with High Distinction a student must:

Complete at least 2 semesters of MCB 290, in an MCB Neuroscience-designated lab, for 2 credit hours or more each semester. Complete 1 semester of MCB 492, in the same Neuroscience-designated lab, for 3 credit hours or more in their final semester. Maintain a minimum cumulative GPA of 3.25 at the end of penultimate semester. Give at least one presentation at the Undergraduate Research Symposium or other approved venue. Submit a written thesis that is approved by the Distinction Committee. Obtain a letter of support from their Principal Investigator.

To be eligible for graduation with Highest Distinction a student must:

Complete at least 2 semesters of MCB 290, in an MCB Neuroscience-designated lab, for 2 credit hours or more each semester. Complete 1 semester of MCB 492, in the same Neuroscience-designated lab, for 3 credit hours or more in their final semester. Maintain a minimum cumulative GPA of 3.90 at the end of penultimate semester. Give at least one presentation at the Undergraduate Research Symposium or other approved venue. Submit a written thesis that is approved by the Distinction Committee. Obtain a letter of support from their Principal Investigator.

Distinction for Excellence in Academics:

To be eligible for graduation with Academic Distinction a student must:

- Maintain a major GPA of 3.90 or higher in the Neuroscience major (MCB/Neuroscience, Chemistry, Physics and Math courses for the Neuroscience major) at the end of their penultimate semester.
- General education: Students must complete the Campus General Education requirements, including the campus general education language requirement.
- Minimum required major and supporting course work: 83-84 hours, including 29 credit hours of 300- or 400-level courses; 12 hours of 300- and 400-level courses in the major must be taken on this campus.
- Minimum Hours required for graduation: 120 hours.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: 83-84, including 29 hours of 300-/400- level courses. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

MCB 462	Integrative Neuroscience	
Advanced Neuroscience Elective Courses		
Five additional three- or four-credit hour courses (minimum of 15 hours) at the 300- to 400-level from the Approved Advanced Elective Courses List are also required. [1]		15
Total Hours		**83-84**

[1] The Approved Advanced Elective Course List will be available on the MCB website (https://mcb.illinois.edu/undergrad/) and will be updated each semester to most accurately reflect the courses to be offered each academic year.

for the degree of Bachelor of Science in Liberal Arts and Sciences in Neuroscience

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the degree of Bachelor of Science in Liberal Arts and Sciences in Neuroscience

Upon successful completion of the Neuroscience undergraduate curriculum, students will be able to:

1. Understand and appreciate the diversity of life as it evolved over time by processes of mutation, selection and genetic change.
2. Illustrate that fundamental structural units define the function of all living things.
3. Explain that the growth, development, and behavior of organisms are activated through the expression of genetic information in context.
4. Summarize that living systems grow and change by processes based upon chemical transformation pathways and are governed by the laws of physics.
5. Illustrate that living systems are interconnected and interacting across scales of space and time.
6. Design a scientific process and employ the scientific method, demonstrating that neuroscience is evidence based and grounded in the formal practices of observation, experimentation, and hypothesis testing.
7. Execute quantitative analysis to interpret data.
8. Construct and utilize predictive models to study and describe complex systems.
9. Apply concepts from other sciences in order to interpret molecular and neural phenomena.
10. Communicate concepts of neuroscience to members of a diverse scientific community as well as to the general public.

Overview of College Admissions & Requirements: Liberal Arts & Sciences (http://catalog.illinois.edu/schools/las/academic-units/)

Nuclear, Plasma, & Radiological Engineering, BS

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering

Nuclear, plasma, and radiological engineering encompasses a broad and diverse but complimentary set of engineering disciplines with a wide variety of applications – in energy production, plasma processing of materials, fusion development, biomedical research and healthcare, and nuclear safeguards and radiation detection. The first two years of the NPRE curriculum provides a strong foundation in sciences (physics, mathematics, and chemistry), in engineering (mechanics and thermodynamics), in computer use, and in nuclear energy systems. Most of the technical core and concentration coursework takes place

in the third and fourth years of the curriculum. Students choose from among three concentrations: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical and instrumentation applications. Each concentration requires students acquire a depth of understanding of the area but with flexibility to develop advanced technical expertise depending upon the student's specific educational and professional interests. Students demonstrate proficiency in the engineering design process in a senior design capstone course.

Current Program Educational Objectives

Students pursuing this major must select one of three concentrations:

- Plasma & Fusion Science & Engineering (p. 655)
- Power, Safety & Environment (p. 659)
- Radiological, Medical & Instrumentation Applications (p. 662)

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0

TGPA is required for NPRE 200 and NPRE 247. See Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/) to clarify requirements.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science Major in Nuclear, Plasma, & Radiological Engineering

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Nuclear, Plasma, & Radiological Engineering graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Nuclear, Plasma, and Radiological Engineering: Plasma & Fusion Science & Engineering, BS

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering with a concentration in Plasma & Fusion Science & Engineering

Nuclear, plasma, and radiological engineering encompasses a broad and diverse but complimentary set of engineering disciplines with a wide variety of applications. The first two years of the NPRE curriculum provides a strong foundation in sciences (physics, mathematics, and chemistry), in engineering (mechanics and thermodynamics), in computer use, and in nuclear energy systems. Most of the technical core and concentration coursework takes place in the third and fourth years of the curriculum. Students choose from among three concentrations: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical and instrumentation applications. Each concentration requires students acquire a depth of understanding of the area but with flexibility to develop advanced technical expertise depending upon the student's specific educational and professional interests. Students demonstrate proficiency in the engineering design process in a senior design capstone course.

The plasma and fusion science and engineering concentration focuses on plasma processing for a myriad of applications including semiconductor production and on harnessing the power of nuclear fusion. Areas of scholarship and research in which students are involved include but are not limited to: plasma physics and fusion, plasma material interactions, plasma modeling, plasma code development, atmospheric plasma, extreme ultraviolet lithography and physical vapor

deposition, plasma processing of semiconductors, fusion materials, plasma nanosynthesis, plasma sources and processing, and plasma manufacturing. Exploration of the plasma science and fusion areas involves both computational and experimental approaches. Students are exposed to modeling and simulation and numerical analysis and computational methods as well as to hands on experiments in a physical laboratory setting. Students confer with their academic advisor on a chosen course set to ensure that a strong program is achieved. Technical electives are chosen from among NPRE courses and courses outside the department in the subfields of physical science, electrical engineering, and electronic materials. The program prepares graduates for positions in semiconductor industry, research laboratories and federal and regulatory agencies as well for further graduate study.

Current Program Educational Objectives

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering with a concentration in Plasma & Fusion Science & Engineering

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0

TGPA is required for NPRE 200 and NPRE 247. See Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/) to clarify requirements.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		11
Total Hours of Curriculum to Graduate		**128**

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering with a concentration in Plasma & Fusion Science & Engineering

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. The curriculum sequence can also be viewed via dynamic and static curricular maps *(*https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/npre-plasma-map/*), which include prerequisite sequencing.*

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*). One of the SBS courses must be an introductory economics course (*ECON 102 *or* ECON 103*).* NPRE 481 *will satisfy a technical elective requirement in the Professional Concentration Area and the Campus General Education Advanced Composition requirement. If* NPRE 481 *is not selected, a separate Advanced Composition course must be taken.*

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives *(*https://go.grainger.illinois.edu/FreeElectives/*), so that there are at least 128 credit hours earned toward the degree.*

Nuclear, Plasma, and Radiological Engineering: Power, Safety & Environment, BS

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering with a concentration in Power, Safety & Environment

Nuclear, plasma, and radiological engineering encompasses a broad and diverse but complimentary set of engineering disciplines with a wide variety of applications. The first two years of the NPRE curriculum provides a strong foundation in sciences (physics, mathematics, and chemistry), in engineering (mechanics and thermodynamics), in computer use, and in nuclear energy systems. Most of the technical core and concentration coursework takes place in the third and fourth years of the curriculum. Students choose from among three concentrations: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical and instrumentation applications. Each concentration requires students acquire a depth of understanding of the area but with flexibility to develop advanced technical expertise depending upon the student's specific educational and professional interests. Students demonstrate proficiency in the engineering design process in a senior design capstone course.

The power, safety and the environment concentration focuses on continued safe and reliable nuclear energy production. This relies on multifaceted engineering disciplines for design and analysis of large complex systems. Areas of scholarship and research in which students are involved include but are not limited to: advanced reactor design and safety, reactor physics and thermal-hydraulics, nuclear materials, instrumentation and controls, training and education, fuel design and performance, waste management, reactor accident analysis, risk and reliability, probabilistic risk assessment, human factors, validation and verification, uncertainty analysis, energy and security, and nonproliferation. Cross-cutting areas of study and research include modeling and simulation and numerical analysis and computational methods. Students confer with their academic advisor on a chosen course set to ensure that a strong program is achieved. Technical electives are chosen from among NPRE courses and courses outside the department in the subfields of: thermal sciences; power and control systems; solid, fluid and continuum mechanics; computational sciences and engineering, and environmental engineering and science. The program prepares graduates for positions in industry, research laboratories, federal and regulatory agencies, as well for further graduate study.

Current Program Educational Objectives

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering with a concentration in Power, Safety & Environment

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0

TGPA is required for NPRE 200 and NPRE 247. See Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/) to clarify requirements.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Nuclear, Plasma, and Radiological Engineering: Radiological, Medical & Instrumentation Applications, BS

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering with a concentration in Radiological, Medical & Instrumentation Applications

Nuclear, plasma, and radiological engineering encompasses a broad and diverse but complimentary set of engineering disciplines with a wide variety of applications. The first two years of the NPRE curriculum provides a strong foundation in sciences (physics, mathematics, and chemistry), in engineering (mechanics and thermodynamics), in computer use, and in nuclear energy systems. Most of the technical core and concentration coursework takes place in the third and fourth years of the curriculum. Students choose from among three concentrations: power, safety and the environment; plasma and fusion science and engineering; and radiological, medical and instrumentation applications. Each concentration requires students acquire a depth of understanding of the area but with flexibility to develop advanced technical expertise depending upon the student's specific educational and professional interests. Students demonstrate proficiency in the engineering design process in a senior design capstone course.

The radiological, medical and instrumentation applications concentration encompasses the intersection of radiation technologies, medicine, and security. This area focuses on developing science and engineering techniques that utilize ionizing radiation for biomedical research and healthcare as well as nuclear safeguards and radiation detection for homeland security. Areas of scholarship and research in which students are involved include but are not limited to: biomedical imaging, radiation detection and measurement systems, emerging x-ray imaging techniques, image processing, instrumentation for emission tomography (PET and SPECT), spectroscopy, dosimetry, homeland security, nuclear safeguards, nonproliferation, radiation protection during radiation therapy, big data analytics for radiation sensor networks, health physics, advanced thermal neutron detectors, and isotope identification algorithms. Students confer with their academic advisor on a chosen course set to ensure that a strong program is achieved. Students may select technical electives in the life sciences (chemistry, biology) to apply towards pre-med requirements. Technical electives are chosen from among NPRE courses and courses outside the department in the subfields of biomolecular and biomedical engineering. The program prepares graduates for positions in industry, research laboratories, federal and regulatory agencies, as well for medical programs and further graduate study.

Technical Electives		**12**

From Departmentally Approved List of Technical Electives - students are to take at least 12 hours. This includes technical electives from NPRE or from other departments in the subfields Biomolecular Engineering and Biomedical Engineering. The student is to confer with their academic adviser on a chosen course set to ensure that a strong program is achieved.

CHEM 104	General Chemistry II	3
CHEM 105	General Chemistry Lab II	1
CHEM 232	Elementary Organic Chemistry I	3 or 4
CHEM 233	Elementary Organic Chem Lab I	2
IB 150	Organismal & Evolutionary Biol	4
IB 151	Organismal & Evol Biol Lab	1
MCB 150	Molecular & Cellular Basis of Life	4
MCB 151	Molec & Cellular Laboratory	1
NPRE 199	Undergraduate Open Seminar (May be repeated in separate terms to a maximum of 2 times.)	1
NPRE 201	Energy Systems	2 or 3
NPRE 398	Special Topics	1 to 4
NPRE 461	Probabilistic Risk Assessment	3 or 4
NPRE 481	Writing on Technol & Security	3 or 4
NPRE 498	Special Topics	1 to 4
STAT 400	Statistics and Probability I	4
Biomolecular Engineering Electives		
BIOE 120	Introduction to Bioengineering	1
BIOE 414	Biomedical Instrumentation	3-4
or CHBE 472	Techniques in Biomolecular Eng	
CHEM 232	Elementary Organic Chemistry I	3 or 4
MCB 450	Introductory Biochemistry	3
MCB 401	Cellular Physiology	3
or BIOP 401	Introduction to Biophysics	
Biomedical Engineering Electives		
BIOE 120	Introduction to Bioengineering	1
CHEM 232	Elementary Organic Chemistry I	3 or 4
ECE 380	Biomedical Imaging	3
BIOE 414	Biomedical Instrumentation	3-4
or CHBE 472	Techniques in Biomolecular Eng	
BIOE 415	Biomedical Instrumentation Lab	2
ECE 480	Magnetic Resonance Imaging	3 or 4
MCB 250	Molecular Genetics	3
MCB 252	Cells, Tissues & Development	3
MCB 401	Cellular Physiology	3
or BIOP 401	Introduction to Biophysics	
MCB 402	Sys & Integrative Physiology	3

Free Electives

Code	Title	Hours
Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		11
Total Hours of Curriculum to Graduate		**128**

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering with a concentration in Radiological, Medical & Instrumentation Applications

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. The curriculum sequence can also be viewed via dynamic and static curricular maps *(*https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/npre-radiological-map/*), which include prerequisite sequencing.*

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*). One of the SBS courses must be an introductory economics course (*ECON 102 *or* ECON 103*).* NPRE 481 *will satisfy a technical elective requirement in the Professional Concentration Area and the Campus General Education Advanced Composition requirement. If* NPRE 481 *is not selected, a separate Advanced Composition course must be taken.*

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives *(*https://go.grainger.illinois.edu/FreeElectives/*), so that there are at least 128 credit hours earned toward the degree.*

for the degree of Bachelor of Science in Nuclear, Plasma, & Radiological Engineering with a concentration in Radiological, Medical & Instrumentation Applications

Learning Outcomes

1. An ability to identify, formulate, and solve engineering problems by applying principles of engineering, science, and mathematics.
   a. Identify, formulate, and solve engineering problems.
   b. Advanced mathematics applied to nuclear engineering concepts.
   c. Transport and interaction of radiation with matter.
   d. Atomic and nuclear physics, quantum mechanics.
   e. Computational solutions.
2. An ability to apply the engineering design process to produce solutions that meet specified needs with consideration for public health and safety, and global, cultural, social, environmental, economic, and other factors as appropriate to the discipline.
3. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
   a. Develop and conduct experiments, analyze and interpret data, and use engineering judgment to draw conclusions.
   b. Measure nuclear and radiation processes specifically.
   c. Analyze and interpret data, using engineering judgement to draw conclusions from experimental data.
4. An ability to communicate effectively with a range of audiences.
5. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
   a. Recognize ethical and professional responsibilities.
   b. Make informed judgements.

6. An ability to recognize the ongoing need to acquire new knowledge, to choose appropriate learning strategies, and to apply this knowledge.
7. An ability to function effectively as a member or leader of a team that establishes goals, plans tasks, meets deadlines, and creates a collaborative and inclusive environment.

The Grainger College of Engineering

Nuclear, Plasma, and Radiological Engineering + Data Science, BS

for the degree of Bachelor of Science in Nuclear, Plasma, and Radiological Engineering + Data Science

This major is sponsored by the Department of Nuclear, Plasma, and Radiological Engineering within the Grainger College of Engineering, in collaboration with the Siebel School of Computer and Data Science, the iSchool, and the Departments of Mathematics and Statistics.

Nuclear, plasma, and radiological engineering encompasses a broad and diverse but complementary set of engineering disciplines with a wide variety of applications – in energy production, plasma processing of materials, fusion technology development, biomedical research and healthcare, and nuclear safeguards and radiation detection.

A digital transformation is impacting all fields of science and engineering. The areas of study and research in nuclear, plasma, and radiological engineering increasingly involve modeling, simulation, numerical analysis, and computational methods. The subsequent massive quantity of data produced creates a demand for students with a mastery of data collection, management, analysis, machine learning, and other data science topics. The Nuclear, Plasma, and Radiological Engineering + Data Science major is designed for students wanting a specialized foundation in the NPRE disciplines supplemented with a strong background in data science.

The first two years of the NPRE + DS curriculum provides a strong foundation in general areas of science and engineering and data science as well as in nuclear energy systems. Most of the core technical NPRE and more advanced data methods coursework takes place in the third and fourth years. Students demonstrate proficiency in the engineering design process in a design capstone course which involves data science. The program prepares graduates for positions in industry, research laboratories, federal and regulatory agencies, as well as for further graduate study. The supplemental distinction of a data science background increases graduates' competitiveness and widens their opportunities as they enter a data-driven economy.

for the degree of Bachelor of Science in Nuclear, Plasma, and Radiological Engineering + Data Science

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0

TGPA is required for NPRE 200 and NPRE 247. See **Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/)** to clarify requirements.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree.

Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6

Total Hours 128

for the degree of Bachelor of Science in Nuclear, Plasma, and Radiological Engineering + Data Science

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process for Nuclear Engineering.

Nuclear, Plasma, & Radiological Engineering + Data Science graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Further, the Department of Nuclear, Plasma, and Radiological Engineering has undergraduate curriculum program education objectives (PEOs) that prepare our graduates to succeed in early career (two to five years post-graduation) professional activities in paths related to the NPRE discipline. Student learning outcomes represent process-orientated activities that either directly or in combination prepare students to satisfy all program educational objectives upon completion of the BS NPRE + Data Science degree program. These PEOs are:

1. To succeed as engineers in the 21st Century in a globally-connected technological environment in which best practices are shared internationally free of borders.
2. To advance in career paths associated with the NPRE disciplines, including commercial nuclear power, plasma sciences and technology, and radiological sciences related opportunities.
3. To pursue further academic growth, obtaining advanced degrees in disciplines related, but not limited, to the disciplines associated with NPRE technical areas.
4. To provide leadership to professional and societal communities in a general way and in ways specific to the NPRE disciplines.
5. To engage in life-long learning and professional development, staying abreast of the ever-evolving technological landscape related to the NPRE disciplines.
6. To contribute to society in a professional, responsible and ethical manner.

Nutrition and Health, BS

for the degree of Bachelor of Science in Nutrition and Health

This major provides the background for students who plan to pursue careers in nutrition and related health sciences. This major focuses on the field of human nutrition and reflects the growing need to prepare

individuals for careers in health and nutrition. For students who expect to pursue advanced degrees in nutritional sciences or professional degrees in medicine, dentistry or law, the Nutrition and Health major may be chosen. This major emphasizes a strong science background and allows students to obtain a strong human nutrition preparation that is not available elsewhere on campus. For those interested in practicing nutrition or nutrition counseling, please see the Dietetics and Nutrition, BS.

for the degree of Bachelor of Science in Nutrition and Health

All graduates of the University of Illinois Urbana-Champaign Nutrition and Health BS will be able to:

1. Demonstrate critical thinking, problem solving and communication skills.
2. Understand basic sciences relevant to nutrition, research and application of nutrition and an awareness of social and economic factors in food.
3. Prepared to pursue careers in the food, health, and fitness industries, or enter medicine, dentistry, nursing, and other health professions.

Operations Management, BS

for the degree of Bachelor of Science in Operations Management

The Operations Management (OM) Major prepares students for careers in manufacturing and service management, operations strategy consulting, purchasing and supply management, project management, and quality management. OM professionals work with most other units in any organization, more so with engineering, human resource management, information systems, and marketing. The OM curriculum focuses on analytical decision-making, logistics, new product development, operations strategy, process improvement, project management, quality control, and supply chain management. Students are trained in ways of developing, making, and delivering goods and services efficiently and effectively – generating value by satisfying ever-changing customer needs while improving profitability.

for the degree of Bachelor of Science in Operations Management

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

for the degree of Bachelor of Science in Operations Management

1. Disciplinary Competence: Students demonstrate an understanding of fundamental operations concepts, key principles of its management, and relevant analysis approaches.
2. Critical Thinking: Students demonstrate the ability to understand a real-world unstructured problem, and gather necessary information and data to formulate into a structured problem.
3. Problem Solving: Students demonstrate ability to develop quantitative and qualitative analysis framework and solution methods, and appropriately implement them to obtain meaningful solutions.
4. Decision making: Students demonstrate ability to identify strengths and weaknesses of alternative solutions and obtain relevant managerial insights.
5. Communication: Students express themselves logically, persuasively and succinctly & using correct grammar and composition when communicating in oral or written form.

Philosophy, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences: Major in Philosophy

Philosophy is the oldest, broadest, and most fundamental form of inquiry. Some philosophical questions have to do with the understanding of ourselves and whatever else there may be. Others focus upon the nature of different forms of knowledge and experience, and upon ethical issues and problems of value. The study of philosophy is one of the most important elements in a good liberal education. It also improves one's ability to think clearly, and to construct, analyze, and criticize arguments of any kind. The major and minor are sponsored by the Department of Philosophy.

for the degree of Bachelor of Arts in Liberal Arts and Sciences: Major in Philosophy

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Major With Distinction

To become a candidate for graduation with distinction in philosophy, a student must satisfy the major requirements and must satisfy the further requirements of either the Thesis option or the Coursework option. If a candidate has satisfied both sets of requirements, the student will graduate with whichever is the highest level of distinction earned.

THESIS: Requires 35 hours of philosophy courses (including PHIL 492 and 4 other courses at the 300 level or above), a GPA of 3.5 in all philosophy courses, and a written thesis with a grade of A- or above.

Students wishing to pursue this option must have at least a 3.5 GPA in all philosophy courses to begin thesis work, though students may petition the Director of Undergraduate Studies in the Department of Philosophy for an exemption. In order to earn distinction for thesis work, the student must graduate with at least a 3.5 GPA. The student should first approach a potential thesis adviser from one of the department's professors, associate professors, or assistant professors. This should be someone with whom the student already has a working relationship (typically through coursework). The student should have a preliminary idea of the sort of thesis research he or she would like to conduct. If the professor expresses a preliminary willingness to advise the thesis, the student should prepare a Plan for Thesis Work. The Plan should be 600-800 words. It should include the following information:

- A tentative project title
- The name of the proposed thesis adviser
- The primary area of philosophy (e.g., political philosophy, metaphysics, philosophy of mind, etc.) the project will concern and the particular discussions it will engage
- A lucid statement of the central claim(s) that the project will defend (bearing in mind that this may change during the course of the project)
- An overview of the kind of research that will be completed and, as far as they are known, the arguments and considerations that the student hopes to marshal in support of the central claim(s).

The student should submit the Plan for Thesis Work to both the Director of Undergraduate Studies and the proposed adviser. If both approve of the Plan for Thesis Work, the student should register for thesis work (PHIL 492) with the selected adviser and meet with that adviser to set up a research schedule. Thesis projects are usually in the 25-30 page range, and occasionally take two semesters to complete. When the thesis adviser decides that the thesis is ready for defense, the department chairperson will appoint a committee of two members of the department (including the thesis adviser). The committee will judge the project's quality, originality, and impact and assign a grade (which may be different from the grade the student's thesis adviser assigns for thesis coursework). If the thesis earns a grade of A- or above, distinction will be award as follows:

Thesis Grade A- Distinction
Thesis Grade A High Distinction
Thesis Grade A+ Highest Distinction

As a rough guideline, High Distinction is awarded when committee members feel that the work is of high enough quality that the student should be encouraged to pursue graduate study in philosophy. Highest Distinction is where the work is of such high quality that it would be a shame if the student did not pursue graduate study. Distinction is where the work is of high quality, though not so high as to clearly evidence potential for graduate study.

COURSE WORK: 38 hours of philosophy courses (including eight courses at the 300 level or above) and a 3.5 GPA in all philosophy courses.

The level of distinction will be determined by the Director of Undergraduate Studies on the basis of the student's Philosophy GPA in the following manner:

GPA 3.5 - 3.69 Distinction
GPA 3.7 – 3.89 High Distinction
GPA 3.9 – 4.0 Highest Distinction

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 44 hours including at least 32 hours of Philosophy courses. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3

fulfilled by PHIL 203 and PHIL 206		
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fulfilled by PHIL 202 and any other course approved as Quantitative Reasoning I or II		
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)		0-20

Major Requirements

Code	Title	Hours
PHIL 202	Symbolic Logic	3
PHIL 203	Ancient Philosophy	4
PHIL 206	Early Modern Philosophy	4
PHIL 421	Ethical Theories	3
PHIL 426	Metaphysics	3
or PHIL 430	Theory of Knowledge	
PHIL 499	Capstone Seminar	3
At least 12 additional hours of coursework in Philosophy, with 9 of those hours being above the 100-level (including at least two 300- or 400-level courses		12
A student may select either of two types of programs of supporting course work and should work out a specific program of the type chosen with the help and approval of a departmental adviser.		12
Twelve hours minimum. Select from:		
Option I: Intensive study in another discipline. Courses normally beyond the 100 level in one other discipline. Most approved minors satisfy this requirement. A second major may also be used to satisfy this requirement		
or		
Option II: A special program of study built around a unifying theme or topic. Course work outside philosophy in one or more other discipline(s), normally beyond the 100 level.

for the degree of Bachelor of Arts in Liberal Arts and Sciences Major in Philosophy

---

The Philosophy Department aims to produce four main learning outcomes.

1. Philosophical Knowledge: Students will be familiar with major figures and movements in the history of western philosophy; familiar with central topics, theories, and debates in epistemology and metaphysics, in ethics and value theory, and in logic; and familiar with current developments in professional philosophy.
2. Philosophical Reading: Students will develop the ability to analyze persuasive and argumentative prose: identifying the main claims asserted, the reasons alleged to support those claims, and the logical relations between the claims and the reasons, including identifying any gaps in the arguments.
3. Philosophical Inquiry: Students will develop the ability to formulate abstract principles in epistemology and metaphysics, in ethics and value theory, in logic, and in related special topic areas in philosophy; they will develop the ability to identify consequences of the principles they formulate; and they will develop the ability to construct arguments for those principles and compare them to competing principles.
4. Philosophical Writing: Students will develop the ability to write clearly and with logical precision on a wide range of important issues, including (but not limited to): civic and social challenges at local, national, and global levels; social and cultural issues related to race, indigeneity, gender, class, sexuality, language, and disability; and the ways that complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are

affected by the local identities and ethical choices of individuals and institutions.

Physics, BS

for the degree of Bachelor of Science in Physics

The Illinois Physics program provides students with outstanding opportunities to explore modern scientific mysteries. As a physics major at Illinois, students will develop a deep conceptual and mathematical understanding of the world. Our flexible program is designed to prepare students for a wide range of fulfilling careers or post-graduate paths.

The Physics curriculum provides a rigorous foundation in physics, mathematics, and laboratory technique. The students' selected program track will allow the student to fine-tune their individual program of study to best suit interests and career goals. Whether students plan to enter the private sector, become a teacher, or continue their education through graduate study, students can explore how the Illinois Physics Bachelor of Science in Physics can meet their goals.

In consultation with the academic advisor, each student will elect a set of technical or professional courses covering a cohesive body of knowledge. Each program track will add a minimum of twenty (20) hours to the physics core curriculum.

Students may select from a list of pre-approved tracks or design a custom track subject to departmental approval. Physics courses used to satisfy the Flexible Physics Core Electives and Physics Lab Electives may not be used to satisfy the track requirements, with the exception of the Graduate Study Track.

The current pre-approved options, requiring 20-24 credit hours of course work, are:

- Astrophysics Track
- Business Track
- Computational Physics Track
- Nuclear Physics Track
- Graduate Study Track
- Pre-Med
- Pre-Law

for the degree of Bachelor of Science in Physics

Graduation Requirements

Minimum hours required for graduation: 128 hours

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0 TGPA is required for Math and Physics courses. See **Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/)** to clarify requirements.
Minimum Overall GPA: 2.0

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Physics

By the completion of their degree program, Physics graduates will be able to:

1. Define and use fundamental principles of physics as defined and used by scientists and engineers.
   a. Identify which fundamental principles should be applied to a specified situation.
   b. Identify the tools used by scientists and engineers to use fundamental physical principles to solve problems.
   c. Apply physics problem solving tools to known and novel problems.
2. Analyze quantitative and qualitative data.
   a. Design and execute physics experiments to answer open-ended questions.
   b. Develop mathematical models to extract physics results from numerical data.
   c. Communicate verbally and in writing experimental and theoretical results.
3. Participate in cooperative groups to design, practice, and communicate physics and physics-related information to themselves and the community.
   a. Develop physics and mathematics related problem-solving skills through participation in cooperative-learning groups.
   b. Design and execute physics experiments/research projects in a collaborative setting.
   c. Document, report, and present experimental results.

Plant Biotechnology, BS

for the degree of Bachelor of Science Major in Plant Biotechnology

Biotechnology is now a part of our daily lives in applications such as developing nutritionally enhanced foods, enabling sustainable agricultural production, and engineering plants for industrial and medical purposes. The plant biotechnology major provides an interdisciplinary curriculum integrating the science and practice of crop production through courses in molecular biology, genetics and genomics, biochemistry, plant protection, and data analysis. The program also offers many opportunities to participate in research and internships. This curriculum prepares students for careers in biotechnology or for entrance into graduate and professional schools. Our students pursue employment in scientific research or fields related to the biotechnology enterprise including science policy, patent law, and business development.

for the degree of Bachelor of Science Major in Plant Biotechnology

Graduation Requirements

Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

for the degree of Bachelor of Science Major in Plant Biotechnology

1. Students will demonstrate proficiency in the areas of crop sciences, molecular biology, genetics and genomics, biochemistry, plant protection, and data analysis.
2. Students will gain leadership skills through team-based science in an experiential learning context to become leaders in scientific fields.
3. Students will communicate biotechnology-related content to the public using traditional and 21st century media platforms.
4. Students will discover how to apply biotechnologies to solve global problems and how these technologies can serve as class equalizers between developed and developing countries.
5. Students will develop professional networks that will enhance future career choices.

Political Science, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science

Students must complete one concentration in consultation with an academic advisor.

- Citizen Politics Concentration (p. 684)
- Civic Leadership Concentration (p. 686)
- General Political Science Concentration (p. 688)
- International Relations Concentration (p. 690)
- Law & Power Concentration (p. 692)
- Public Policy & Democratic Institutions Concentration (p. 694)
- World Politics Concentration (p. 697)

5 Year BALAS /MA in Political Science and European Union Studies

The Department of Political Science, along with the European Union Center, offers a **5 year BALAS/MA in Political Science and European Union Studies**. In order to be admitted to this degree program, students apply through a joint application process to their BALAS –granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

Departmental distinction

These eligibility requirements are effective for all students with catalog year of Fall 2025 or later. Students with earlier catalog years may receive (high) distinction as determined by these eligibility requirements or by the requirements in effect at the time of their admission to the university.

To be eligible for distinction, a student majoring in Political Science must complete one of the following two tracks:

1. Coursework Honors Track. On this track, a student must:
   a. Earn a university grade point average on this campus of at least 3.0,
   b. Earn a political science grade point average on this campus that is in the top 10% of PS majors in their graduating class, and
   c. Complete 30 hours of advanced (300 and 400 level) political science coursework on this campus.
2. Research Honors Track. On this track, a student must:
   a. Earn a university grade point average on this campus of at least 3.0,
   b. Earn a political science grade point average on this campus of at least 3.25,

c. Be admitted to and maintain good standing within the departmental research honors program,
d. Complete required coursework in the departmental research honors program,
e. Complete a senior thesis, and
f. Earn a grade point average in PS 495 and PS 496 (or equivalent coursework) of at least 3.67.

Admission to the departmental honors program requires the following:

1. Completion of 9 hours of political science coursework on campus,
2. Of these 9 hours, at least 3 must be advanced political science (300-level or above),
3. An on-campus political science grade point average of at least 3.50, and
4. Application and affirmative vote of a departmental committee.

High Distinction

To be eligible for high distinction, a student majoring in Political Science must:

1. Earn a university grade point average on this campus of at least 3.0,
2. Earn a political science grade point average on this campus of at least 3.25,
3. Be admitted to and maintain good standing within the departmental research honors program,
4. Complete required coursework in the departmental research honors program,
5. Complete a senior thesis, and
6. Earn a grade point average in PS 495 and PS 496 (or equivalent coursework) of 4.0.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science

---

1. Students will be able to apply central concepts of the scientific method to the study of politics, and demonstrate an ability to draw inferences from data.
2. Students will have a foundational knowledge of facts, concepts, and typologies in their chosen subfield in political science.
3. Students will be able to demonstrate basic knowledge of central theories in their chosen subfield and show how to evaluate those theories.
4. Students will be able to define political science and its subfields, drawing contrasts with other social sciences.
5. Students will be able to apply concepts, methods, and theories to research projects, internships, and/or off-campus experiences.

Political Science: Citizen Politics, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Citizen Politics Concentration

---

Citizen politics is the study of mass politics. Topics include how and why citizens form political attitudes, beliefs, and identities; how people engage in political decision-making; and what political behaviors individuals choose to participate in.

See the Political Science BALAS page (p. 683) for departmental distinction information.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Citizen Politics Concentration

---

See the Political Science BALAS page (p. 683) for departmental distinction information.

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor. The plan will consist of the selection of a concentration and 12 hours of supporting coursework approved by an advisor.

Restrictions: Except as otherwise noted, or by petition to the department, PS 191, PS 291, PS 292, PS 490, PS 491, and PS 492 are excluded from all concentration lists maintained by the department. These courses may be used only for requirements of courses “at any level” without respect to concentration. As an exception, these courses may be used toward the General Concentration or the Civic Leadership Concentration.

Students may include in the major no more than nine hours from any combination of PS 291, PS 292, PS 490, PS 491, and PS 492. Of these, only six hours from PS 490, PS 491, and PS 492 within that group can count toward the major.

Students may count a maximum of six (6) hours of credit of any combination of hours from PS 494 toward the advanced hours requirement. Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours of internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. (PS 496) is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 45-hour minimum required for the major.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Citizen Politics Concentration Requirements

Code	Title	Hours
PS 100	Intro to Political Science	3
Select at least one course from the following:		3
PS 101	Intro to US Gov & Pol

Political Science: General Political Science, BALAS

for the degree of Bachelor of Liberal Arts & Sciences Major in Political Science, General Political Science concentration

The World Politics concentration compares internal political dynamics and patterns of political behavior in the world's more than 200 countries. Major comparative themes include democracy, dictatorship and regime

change; political institutions; voting behavior, attitudes, and the creation and dissemination of political information; religious and ethnic identity politics; political economy of development and developing countries; social change and political violence; and the impact of globalization and transnational forces such as migration.

See the Political Science BALAS page (p. 683) for departmental distinction information.

for the degree of Bachelor of Liberal Arts & Sciences Major in Political Science, General Political Science concentration

See the Political Science Distinction page (p. 683) for departmental distinction information.

Political Science Core Requirements

Students may count a maximum of six (6) hours of credit of any combination of hours from PS 494 toward the advanced hours requirement. Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours of internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. (PS 496) is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 45-hour minimum required for the major.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Political Science: International Relations, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, International Relations Concentration

International relations (IR) is the study of interactions across borders of nation-states. Students explore how global, regional, and domestic factors influence relations among states as well as non-state actors across the interstate system.

Students take advanced courses in two or more of the following topics: international law and organization, international cooperation, international political economy, globalization, foreign policy, diplomacy, political strategy in IR, conflict, interstate war, civil war, terrorism, global environmental politics, and international human rights.

See the Political Science BALAS page (p. 683) for departmental distinction information.

Political Science: Law & Power, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Law and Power Concentration

The Law and Power concentration teaches students about how power, law, and ideas about justice shape political life. Courses cover questions concerning the procedures for social and legal change, the status of citizens in social and political institutions in society, and the ways that ideology and identity categories shape the pursuit of equality and justice.

See the Political Science BALAS page (p. 683) for departmental distinction information.

Political Science: Public Policy and Democratic Institutions, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Public Policy and Democratic Institutions Concentration

This concentration explores political institutions and processes and how and why they work as they do. Courses use historical and contemporary examples to understand the political system the founders established and the ways it has shaped modern politics. Students study institutions such as the presidency, Congress, courts, the bureaucracy,and political parties, with a focus on their organization and on important patterns of behavior within them, such as interest group lobbying and campaigning.

See the Political Science BALAS page (p. 683) for departmental distinction information.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, Public Policy and Democratic Institutions Concentration

1. Students will be able to apply central concepts of the scientific method to the study of politics, and demonstrate an ability to draw inferences from data.
2. Students will have a foundational knowledge of facts, concepts, and typologies in their chosen subfield in political science.
3. Students will be able to demonstrate basic knowledge of central theories in their chosen subfield and show how to evaluate those theories.
4. Students will be able to define political science and its subfields, drawing contrasts with other social sciences.
5. Students will be able to apply concepts, methods, and theories to research projects, internships, and/or off-campus experiences.

Students completing the concentration will be able to **analyze U.S. political institutions and processes**, examining their historical

foundations, organizational structures, and patterns of behavior, including elections, lobbying, and policymaking.

Political Science: World Politics, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, World Politics Concentration

The World Politics concentration compares internal political dynamics of and patterns of political behavior in the world's more than 200 countries. Major comparative themes include democracy, dictatorship and regime change; political institutions (parties, elections, and decision-making); voting behavior, attitudes, and the creation and dissemination of political information; religious and ethnic identity politics; political economy of development and developing countries; social change and political violence; and the impact of globalization and transnational forces such as migration.

See the Political Science BALAS page (p. 683) for departmental distinction information.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Political Science, World Politics Concentration

See the Political Science Distinction page (p. 683) for departmental distinction information.

Students may count a maximum of six (6) hours of credit of any combination of hours from PS 494 toward the advanced hours requirement. Not more than 6 hours of individual study courses in political science (PS 490) or 6 hours of internships (PS 491) or 6 hours of supervised research (PS 492) may be included in the major; a student with any mix of independent study hours and internship hours and supervised research hours may include a maximum of 9 hours of such credit in the major. (PS 496) is reserved for those seniors doing honors theses for distinction in political science and may not be counted in the 45-hour minimum required for the major.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Portuguese, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Portuguese

Understanding Brazil as a global crossroads of cultures, languages, and powers drives the Portuguese major. Our approach underscores Brazil as a gateway to study ties with not only Spanish-language countries of the Americas but also the Global South and Portuguese-language countries in Africa, Asia, and Europe. Our program focuses on intercultural communication and the transnational interplay among African, Asian, European, and Indigenous peoples and histories that shape not only Brazil but also Angola, Mozambique, Portugal, and other parts of what is sometimes called the Lusophone world. In the Portuguese major, students gain a command of the language and acquire communicative skills from a range of approaches, including diaspora and transnational studies; intersectional, cultural, and historical understandings of class, gender, race, and sexuality; and postcolonial studies. One of our strengths is that a Portuguese major may include courses with Brazilian content taken in anthropology, comparative literature, ethnomusicology, global studies, history, and Latin American and Caribbean studies. We are committed to including students from colleges such as ACES, Business, and Engineering as well. Our B.A. graduates follow local and global career paths and foster new visions of the world from a Brazilian and Portuguese standpoint.

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Portuguese

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

In order to remain in good standing in this program and be recommended for certification, candidates are required to maintain an Illinois, cumulative, content area, and professional education, grade-point averages of 2.5 (A= 4.0). Candidates should consult their advisor or the Council on Teacher Education for the list of courses used to compute these grade-point averages.

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 42-45 hours including at least 27 hours in Portuguese courses beyond the 100 level. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Portuguese

1. Students learn and practice the nuances of the language in all of its written and spoken modes, formally and informally.
2. Students demonstrate special cultural and linguistic literacy in relation to Portuguese and the ability to use concepts and methods from multiple disciplines
3. Students exhibit critical awareness of the tensions and opportunities inherent to globalist and universalist understandings.

4. Students evaluate the dynamics of power between dominant and subordinate groups in Brazil, especially through the lens of class, ethnicity, gender, race, and sexuality.
5. Students know the history of Brazil's interplay with Latin America and the Lusophone world.
6. Students gain a global perspective on civil society and social justice through Brazil and the Portuguese language.
7. Students develop avenues to support scholarly and professional interests in a Brazilian and/or Portuguese-speaking context.

Psychology, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology

Students choose from the following concentrations:

- Behavioral Neuroscience (p. 703)
- Clinical/Community Psychology (p. 706)
- Cognitive Neuroscience (p. 708)
- Cognitive Psychology (p. 710)
- Developmental Psychology (p. 712)
- Diversity Science (p. 714)
- Intradisciplinary Psychology (p. 717)
- Organizational Psychology (p. 719)
- Personality Psychology (p. 721)
- Social Psychology (p. 723)

The Psychology major is a broad-based curriculum within a research-focused department. The program is designed both for students interested in a liberal arts education with psychology as a focal area and for students who plan to attend graduate or professional school either in psychology or in a different field such as medicine, law, social work, business administration, counseling, labor relations and many others.

The Psychology major provides both depth and breadth of knowledge in Psychology. The major consists of an introductory course, a statistics course, a breadth of knowledge or foundation in the different areas of psychology that comes from a set of core courses, a research methods course, and elective courses that give students a depth of knowledge. Each concentration, except for intradisciplinary psychology, has a core course specific to that area of psychology with a research methods course designed for that concentration. In formulating their Plan of Study, students can decide either to undertake a concentration in Intradisciplinary Psychology and select courses that focus on their own unique interests or to specialize in a particular area of Psychology by fulfilling the requirements for one of the other concentrations listed below. As undergraduate students fulfill the requirements, they also have the opportunity to participate in current research projects by working in labs. Students should contact our Undergraduate Advising Office for help in creating a plan of study and research that best meets their goals and interests.

The Department of Psychology also offers a BSLAS in Brain & Cognitive Science (p. 148).

Academic Advising

The Psychology Undergraduate Advising Office is open to help students choose patterns of courses relevant to their interests, as well as to help students explore graduate school, professional school, and career options. Advising is done by an award-winning staff of academic professionals along with mentoring by faculty for students with research interests. Peer registration assistants are also available to help with the registration process.

Areas of Interest

Psychology is the scientific investigation of human and animal behavior. Psychologists study behavior in systems ranging from single cells to the individual person, from small groups of people to communities. Psychologists strive to describe behavior and to understand its underlying biological and social mechanisms. This enterprise, designed to better understand the human condition, accumulates knowledge that can help solve problems faced by individuals and by communities. Students that graduate with a major in psychology acquire a wide range of knowledge and useful skills that allows them to find employment in many different areas.

Areas of interest in psychology, and many of these are reflected in the similarly-titled concentrations that are available within the major.

- Behavioral Neuroscience is the study of the biological mechanisms underlying behavior. Biological psychologists generally are interested in the brain and the nervous system, in the endocrine system, and in other organismic processes.
- Clinical psychology is the study of problems encountered by individuals, groups, and families — especially problems involving psychopathology. Clinical psychologists are interested in the application of psychological knowledge and techniques for the alleviation of these problems.
- Community psychology is the study of the social processes and problems of groups, organizations, and neighborhoods, and the development and evaluation of progress for social change and social policy based on psychological understanding.
- Cognitive neuroscience is concerned with understanding the neuroscientific bases of cognition. Various methods are employed to assess the roles of different brain systems in psychological functions such as memory, attention, language, executive control, decision making, response processing, and emotion.

- Cognitive psychology is the study of basic behavioral and cognitive processes, including learning, memory, problem-solving, motivation, and language.
- Developmental psychology is the study of intellectual development, emerging personality, and the acquisition of language, as well as psychophysiological and social development processes as individuals develop from birth through old age.
- Engineering psychology is the study of human behavior in the context of interactions between humans and machines.
- Organizational psychology is the application of techniques of assessment, prediction, and intervention to areas of human resources in organizations, including, but not limited to, standard personnel selection and training, attitude assessments and interventions, and program evaluations.
- Personality psychology focuses on individual behavior. It is the study of ways to understand and describe an individual's behavior and to predict an individual's future behavior.
- Quantitative psychology specialists develop mathematical models of psychological processes and devise methods for quantitative representation and analysis of data about behavior. These are used in the study of differences between individuals in ability, personality, preferences, and other psychological phenomena.
- Social psychology is the study of attitudes, social perception and cognition, interpersonal relations, interpersonal interactions, and social and cultural factors affecting human behavior.
- Visual cognition and human performance is the study of attention, visual perception, visual memory, and human performance. Visual cognition research uses tools drawn from cognitive psychology and cognitive neuroscience to better understand how visual information is perceived and remembered.

Prescribing Psychologists

The states of Illinois, New Mexico and Louisiana now allow appropriately qualified psychologists to write prescriptions for psychotropic medications, if they have the necessary training. There are many other states that currently have pending prescriptive authority legislative initiatives. One component of becoming a prescribing psychologist is completion of the following undergraduate courses:

- 2-semester course sequence in chemistry or biochemistry with lab
- 1 semester microbiology with lab
- 1 semester general biology for science majors
- 1 semester physiology
- 1 semester human anatomy
- 1 semester physiology and anatomy
- Medical terminology (class or proficiency)

For more information on becoming a prescribing psychologist and a detailed list of which courses meet these requirements, please consult with one of the academic advisors in psychology.

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology

---

The student learning outcomes are adapted from the American Psychological Association's (APA) "Guidelines for the Undergraduate Psychology Major" (2013). These guidelines consist of general learning outcomes along with specific indicators that can be assessed. Two sets of indicators are provided by the APA depending on whether a student has completed just the foundational courses (100# and 200# level classes) or is finishing the elective courses (300# and 400# level classes) necessary for each concentration within the Psychology major. The four learning outcomes that we will be evaluating are:

1. Students will demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings to discuss how psychological principles apply to behavioral phenomena. This includes 1.1) describing key concepts, principles and overarching themes, 1.2) developing a working knowledge of the different content or program areas in psychology, and 1.3) describing the application of psychology to everyday life.
2. Students will develop scientific reasoning and problem solving skills, including effective research methods. This includes 2.1) using scientific reasoning to interpret psychological phenomena; 2.2) demonstrating psychology information literacy; 2.3) engaging in innovative and integrative thinking and problem solving; 2.4) interpreting, designing, and conducting basic psychological research; and 2.5) incorporating sociocultural factors in scientific inquiry when appropriate.
3. Students will develop ethically and socially responsible behaviors for professional and personal settings in a landscape that involves increasing diversity. This goal encompasses 3.1) applying ethical standards to evaluate psychological science and practice; 3.2) building and enhancing interpersonal relationships; and 3.3) adopting values that build community at local, national, and global levels.
4. Students will be prepared to apply psychology#specific content and skills, effective self-reflection, project#management skills, teamwork skills, and career preparation to optimize their competitiveness for securing places in a graduate school, professional school, or in the workforce. For example, students should be able to 4.1) apply psychological content and skills to career goals; 4.2) demonstrate project#management skills and teamwork capacity; and 4.3) develop meaningful professional direction for life after graduation.

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology, Behavioral Neuroscience Concentration

1. Students will demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings to discuss how psychological principles apply to behavioral phenomena. This includes 1.1) describing key concepts, principles and overarching themes; 1.2) developing a working knowledge of the different content or program areas in psychology; and 1.3) describing the application of psychology to everyday life.

2. Students will develop scientific reasoning and problem solving skills, including effective research methods. This includes 2.1) using scientific reasoning to interpret psychological phenomena; 2.2) demonstrating psychology information literacy; 2.3) engaging in innovative and integrative thinking and problem solving; 2.4) interpreting, designing, and conducting basic psychological research; and 2.5) incorporating sociocultural factors in scientific inquiry when appropriate.

3. Students will develop ethically and socially responsible behaviors for professional and personal settings in a landscape that involves increasing diversity. This goal encompasses 3.1) applying ethical standards to evaluate psychological science and practice; 3.2) building and enhancing interpersonal relationships; and 3.3) adopting values that build community at local, national, and global levels

4. Students will be prepared to apply psychology#specific content and skills, effective self-reflection, project#management skills, teamwork skills, and career preparation to optimize their competitiveness for securing places in a graduate school, professional school, or in the workforce. For example, students should be able to 4.1) apply psychological content and skills to career goals; 4.2) demonstrate project#management skills and teamwork capacity; and 4.3) develop meaningful professional direction for life after graduation.

Psychology: Clinical/Community Psychology, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology, Clinical/Community Psychology Concentration

Clinical psychology is the study of problems encountered by individuals, groups, and families — especially problems involving psychopathology. Clinical psychologists are interested in the application of psychological knowledge and techniques for the alleviation of these problems.

Community psychology is the study of the social processes and problems of groups, organizations, and neighborhoods, and the development and evaluation of progress for social change and social policy based on psychological understanding.

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology, Developmental Psychology Concentration

1. Students will demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings to discuss how psychological principles apply to behavioral phenomena. This includes 1.1) describing key concepts, principles and overarching themes; 1.2) developing a working knowledge of the different content or program areas in psychology; and 1.3) describing the application of psychology to everyday life.

2. Students will develop scientific reasoning and problem solving skills, including effective research methods. This includes 2.1) using scientific reasoning to interpret psychological phenomena; 2.2) demonstrating psychology information literacy; 2.3) engaging in innovative and integrative thinking and problem solving; 2.4) interpreting, designing, and conducting basic psychological research; and 2.5) incorporating sociocultural factors in scientific inquiry when appropriate.

3. Students will develop ethically and socially responsible behaviors for professional and personal settings in a landscape that involves increasing diversity. This goal encompasses 3.1) applying ethical standards to evaluate psychological science and practice; 3.2) building and enhancing interpersonal relationships; and 3.3) adopting values that build community at local, national, and global levels.

4. Students will be prepared to apply psychology#specific content and skills, effective self-reflection, project#management skills, teamwork skills, and career preparation to optimize their competitiveness for securing places in a graduate school, professional school, or in the workforce. For example, students should be able to 4.1) apply psychological content and skills to career goals; 4.2) demonstrate project#management skills and teamwork capacity; and 4.3) develop meaningful professional direction for life after graduation.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may

impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(http://catalog.illinois.edu/general-information/degree-general-education-requirements/).*

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology, Personality Psychology Concentration

1. Students will demonstrate fundamental knowledge and comprehension of the major concepts, theoretical perspectives, historical trends, and empirical findings to discuss how psychological principles apply to behavioral phenomena. This includes 1.1) describing key concepts, principles and overarching themes; 1.2) developing a working knowledge of the different content or program areas in psychology; and 1.3) describing the application of psychology to everyday life.

2. Students will develop scientific reasoning and problem solving skills, including effective research methods. This includes 2.1) using scientific

reasoning to interpret psychological phenomena; 2.2) demonstrating psychology information literacy; 2.3) engaging in innovative and integrative thinking and problem solving; 2.4) interpreting, designing, and conducting basic psychological research; and 2.5) incorporating sociocultural factors in scientific inquiry when appropriate.

3. Students will develop ethically and socially responsible behaviors for professional and personal settings in a landscape that involves increasing diversity. This goal encompasses 3.1) applying ethical standards to evaluate psychological science and practice; 3.2) building and enhancing interpersonal relationships; and 3.3) adopting values that build community at local, national, and global levels.

4. Students will be prepared to apply psychology#specific content and skills, effective self-reflection, project#management skills, teamwork skills, and career preparation to optimize their competitiveness for securing places in a graduate school, professional school, or in the workforce. For example, students should be able to 4.1) apply psychological content and skills to career goals; 4.2) demonstrate project#management skills and teamwork capacity; and 4.3) develop meaningful professional direction for life after graduation.

Psychology: Social Psychology, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology, Social Psychology Concentration

Social psychology is the study of attitudes, social perception and cognition, interpersonal relations, interpersonal interactions, and social and cultural factors affecting human behavior.

for the degree of Bachelor of Science in Liberal Arts & Sciences Major in Psychology, Social Psychology Concentration

Please see your academic advisor. A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours).

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 32-36 hours of Psychology courses.
Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Recreation, Sport & Tourism, BS

for the degree of Bachelor of Science in Recreation, Sport & Tourism

The Recreation, Sport & Tourism, BS degree program includes a set of three concentrations, of which a student must complete at least one:

- Recreation Management Concentration (p. 727)
- Sports Management Concentration (p. 729)
- Tourism Management Concentration (p. 731)

The Department of Recreation, Sport and Tourism (RST) originated at Illinois in 1940. Today, this program continues to rank nationally among the top three in the field, and takes pride in producing a large number of exceptional professionals. The Department of Recreation, Sport and Tourism offers a bachelor of science degree with three areas of concentration: recreation management, sport management, and tourism management. The curriculum prepares students to design, manage, and deliver RST services to a variety of populations in diverse settings and provides a firm foundation from which students may pursue graduate studies. A broad general education is emphasized and complemented with a core of professional courses. Beyond a strong core integrating theory, management, and research, the program allows students to focus on a major market segment within the RST field by choosing an area of concentration. A total of 128 hours is needed for graduation. For further information, contact the Department of Recreation, Sport and Tourism, 219 Huff Hall, 1206 S. Fourth Street, Champaign, IL 61820, (217) 333-4410.

Internship Program

All students in the Department of Recreation, Sport and Tourism must satisfactorily complete the Internship Program prior to graduation. The program is designed to augment formal classroom instruction with active experiential learning under the guidance of a university and an agency-based supervisor.

The program consists of two courses (RST 480 and RST 485). Students register for RST 480 after completing a series of required RST courses. During this semester, students make final arrangements for completing RST 485 the following semester.

The RST 485 Internship is taken during the student's junior or senior year after satisfactorily completing the majority of required RST course work, including RST 480. RST 485 is completed with agencies that are approved by the department and contracted for this program. Since a limited number of assignments are available in the campus area, most students look forward to the opportunity of an off-campus assignment. Students have been placed across the United States and abroad.

for the degree of Bachelor of Science in Recreation, Sport & Tourism

Students graduating with the B.S. in Recreation, Sport & Tourism should be able to:

1. Communicate effectively in writing and in oral presentations about issues in recreation, sport, and tourism.
2. Demonstrate a basic understanding of the historical and theoretical underpinnings of recreation, sport, and tourism in modern society.
3. Demonstrate basic knowledge about various dimensions of diversity, equity, and inclusion and their implications for recreation, sport, and tourism organizations.
4. Demonstrate a basic understanding of the essential management functions necessary to deliver and manage services in recreation, sport, and tourism organizations.
5. Apply knowledge of basic management principles to professional practice.
6. Design, implement, and evaluate services in recreation, sport and tourism venues.
7. Identify and apply basic research methodologies at a level sufficient to collect, analyze, and critique applied research data.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This may require up to three semesters of language depending on high school coursework or placement. See the corresponding section on the Degree and General Education Requirements page (p. 2).

Religion, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Religion

The Religion major offers students a rigorous academic study of religious traditions, ideas, and practices across historical and cultural contexts. Grounded in the humanities, the degree fosters critical thinking, cultural literacy, ethical reflection, and strong analytical and communication skills. Because it develops broadly applicable intellectual tools, the major places no limits on career direction and prepares students for a wide range of professional pathways.

Graduates can pursue opportunities in:

- **business**, where global organizations value the cultural understanding and cross-cultural communication developed through Religious Studies.
- **education**, supporting careers in teaching—whether in social studies, history, English, or in religious education settings—often in combination with additional pedagogical training.
- **international fields**, including work with NGOs, government agencies, development organizations, and other groups that rely on deep knowledge of cultures, histories, and belief systems.
- **religious professions**, offering an excellent academic basis for further study in seminaries or theological schools and for professional roles within faith communities.

Whether students plan to enter the workforce directly or pursue graduate or professional training, the Religion major equips them with the interpretive skills, cultural awareness, and intellectual flexibility needed to navigate an increasingly interconnected world.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Religion

Each student must complete two courses in any of the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser's office. And each student must complete two courses in any of the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser's office.

Additionally, each student will establish a primary and secondary field of study. For the primary area of study, a student must complete a minimum of three courses (nine credit hours), and for the secondary area two courses (six credit hours) are required. An individual course may not be counted twice toward fulfilling the requirements of the primary and secondary areas of interest. (Students are encouraged to complete more than the minimum of three courses in the primary area of study.)

The following are the areas of study: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or individually designed area of study chosen with the approval of the departmental adviser.

Students considering graduate study in Religion are urged to consult with professors on the necessary preparation for graduate study in their area of interest.

Language Requirements

The major in Religion does not require any language study beyond meeting the University's general education language requirement. However, majors are strongly encouraged to learn the languages relevant to their primary field of study and to begin that course of study as soon as possible. Please consult with the Director of Undergraduate Studies in Religion or a professor in your area of interest about appropriate language study.

Capstone Experience

Research paper for one 400-level course in Religion (REL): Each major must make special arrangements with a professor teaching a 400-level REL course to conduct a significant research project that results in a research paper of 20 pages (minimum). The goal of this requirement is to ensure that each Religion major has conducted a significant research project. REL 493 can be used to satisfy this requirement.

Departmental distinction

To be considered for departmental distinction a student must have an overall GPA of at least 3.5. Distinction is granted on the basis of a senior thesis written in the context of REL 493. The level of distinction is based on evaluation of the thesis.

General education: Students must complete the Campus General Education (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/) requirements including the campus general education language requirement.

Minimum required major and supporting course work: A minimum of 30 hours of coursework is required for the major. This includes (a)REL 230 or REL 231, and (b) completing a Capstone course. At least 15 of the 30 hours must be at the 300 or 400 level, and no more than 9 hours may be at the 100 level.
Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Code	Title	Hours
Minimum of 30 hours of Religion courses including:		
PHIL/REL 230	Philosophy of Religion Intro	3
or REL 231	Happiness and the Good Life	
Distribution Requirement: Courses taken must include:		12
(a) Two courses in the following: Judaism, Christianity, Islam, or religious practices of the ancient Near East, chosen from a list maintained in the departmental adviser's office and		
(b) Two courses in the following: Hinduism, Buddhism, Chinese and Japanese Religions, or indigenous American religious practices, chosen from a list maintained in the departmental adviser's office.		
Three courses in a primary area of study [1]		9
Two courses in a secondary area of study [1]		6
Capstone Experience: a 400-level REL course in which a research project is undertaken and a 20 page research paper is written. This course can be REL 493 and can also be used to fulfill part of the distribution or primary or secondary area of study requirement.		3

[1] *Areas of study include: Buddhism, Christianity, Hinduism, Islam, Judaism, Philosophy of Religion, Religion in America, or an individually designed area of study approved by the departmental advisor. Courses chosen to fulfill the*

primary area of study cannot also be used to fulfill the secondary area of study.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Religion

1. Students will be able to understand and explain how global religious traditions reflect the social contexts in which they emerged, and in turn how the traditions have affected and continue to affect those societies;
2. Students will be able to analyze, and interpret (in both written and oral communication) the relationship between religious traditions and other forms of human cultural and social activity, including languages, literature, arts, political and social movements;
3. Students will be able to appreciate the diversity of global religious traditions and express that appreciation in activities and experiences meaningful to them.
4. Students will be able to develop sound and well-formed written arguments on matters of interest to them that respond insightfully to scholarship significant to their field of study.
5. Students will be able critically to assess and evaluate theories, arguments, and positions that have shaped the fields of the study of religion and individual global traditions.

Russian, East European, & Eurasian Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Russian, East European, & Eurasian Studies

---

The Russian, East European, and Eurasian Center offers an interdisciplinary major and minor in Russian, East European, and Eurasian Studies (REEES). These programs involve students in the study of an important and complex world area in a manner that draws together the approaches of different disciplines, while at the same time building knowledge in a single discipline. A student will construct an individual program of study, depending on the student's interests and career goals, in consultation with the undergraduate advisor of the Center.

The major in Russian, East European, and Eurasian Studies consists of three components: 1) language study (Russian, Polish, Czech, Ukrainian, Bosnian-Croatian-Serbian, Turkish, and more); 2) a multidisciplinary area studies focus; and 3) concentration in a single discipline. Language study can be in Russian or in any of the other languages of the region offered at the University. Students also take courses in a variety of disciplines (history, sociology, political science) and develop a broad expertise in the history, politics, and culture of the region that includes Russia, but also many other countries, from the Czech Republic to Estonia to Uzbekistan. In addition, the concentration in a single discipline provides students with deep knowledge of a specific field that can qualify them for graduate or professional study. Many students also use this concentration to double major. With this program, the REEES major provides students with an interdisciplinary focus on issues critical to the region and foundational language training necessary for professional specialization in the area.

Students often go on to careers in government service (foreign service, FBI, CIA) or to work at NGOs (environment, human rights, and other international careers) in addition to publishing, editing, writing, translation, international business, law, teaching, and research.

REEES is one of two "Russian" majors (and minors) at the University of Illinois. What is the difference between them and which is the right one for you?

The REEES major has a current affairs focus and multidisciplinary area studies that develops students' skill sets in the humanities, social sciences, and other fields. The major in Slavic Studies emphasizes the study of language and literature, and students develop intensive cultural literacy and communication skills through humanities-oriented training. Many Slavic Studies majors go on to careers in writing and editing, media, or work with international cultural foundations and organizations. Both majors are excellent preparation for law school or graduate school and careers in teaching or research.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Russian, East European, & Eurasian Studies

---

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60-75 hours). Please see your advisor.

Departmental distinction: To qualify for departmental distinction, a student must have at least a 3.5 GPA in the courses taken for Component 2 (see below) and must complete a senior thesis in consultation with a faculty member affiliated with the center. Students who wish to qualify for distinction in this major should consult with the center director at the beginning of the junior year or earlier to prepare a suitable plan.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 48 hours. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3

Humanities & the Arts (6 hours)	6
Natural Sciences & Technology (6 hours)	6
Social & Behavioral Sciences (6 hours)	6
fulfilled by REES 200 and REES 201	
Cultural Studies: Non-Western Cultures (1 course)	3
Cultural Studies: US Minority Cultures (1 course)	3
Cultural Studies: Western/Comparative Cultures (1 course)	3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)	6-10
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)	0-20

Major Requirements

Code	Title	Hours
Component 1: Completion of three years of college-level study of Russian or another language of Eastern Europe or Eurasia, or equivalent proficiency. This stipulation may be partially satisfied through fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. A third year of study, however, is demanded beyond this. If a non-Russian, East European or Eurasian language is selected to meet the LAS requirement, then the three years of Russian, East European or Eurasian language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only the hours earned in the third, most advanced year of language study are calculated into the degree here, as these represent proficiency beyond that required by all LAS BA degree programs and as the first two years of language study are a prerequisite for the third.		6
Component 2: Russian and East European studies core courses, including:		24
REES 200	Intro to Russia and Eurasia	
REES 201	Introduction to Eastern Europe	
REES 495	Senior Seminar	
15 hours: Choose one course from each of three departments other than the department used for component 3 below. The courses comprising the remaining hours of component 2 may be from the same discipline as those under component 3; however, a course may be counted toward the total for only one component. Language courses that concentrate on the basic skills of speaking, listening, reading, and writing cannot be counted as part of this component.		
Component 3: Courses in a single discipline. Among those disciplines that are most commonly used with this specialization are anthropology, economics, geography, history, political science, Russian language and literature, and sociology. Among disciplines also used are business administration, comparative literature, education, English, fine arts, French, German, journalism, linguistics, mathematics, music, philosophy, psychology, and various natural sciences. Others are permitted. Consult your advisor. [2]		18

[1] *The Center maintains a list of applicable courses on its web site.*

[2] *If the study of a language is used for this component, 20 hours must be taken beyond the requirement of 6 additional hours outlined under component 1 above.*

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Russian, East European, & Eurasian Studies

1. **Global Competence and Intercultural Skills**
   - Definition: REEES majors will engage and build productive relationships, founded in proficient language skills, with communities, organizations, and individuals across cultures, both at home and abroad.
2. **Interdisciplinary Perspective**
   - Definition: REEES majors will recognize and mobilize multiple types of data and forms of analysis, drawn from paradigms in the humanities and social sciences, to propose solutions to complex problems.
3. **Analytical Reasoning and Broad Knowledge Base**
   - Definition: REEES majors will critically analyze and evaluate interpretations of social, cultural, political, and economic phenomena, drawing on a broad knowledge base and research experience.

Secondary Education, BS

for the degree of Bachelor of Science in Secondary Education

Students pursuing this major must select the Mathematics Concentration:
Secondary Education: Mathematics, BS (p. 739)

The **Secondary Education, BS** prepares teachers for grades nine through twelve. A minimum of 120 semester hours is necessary for graduation.

Students pursuing teaching licensure programs in the College of Education must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0). Grades in courses of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education (https://www.cote.illinois.edu/). Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Students in the Secondary Education licensure program must complete the Campus General Education Requirements, the courses for the Mathematics concentration, and the professional education coursework.

Secondary Education: Mathematics, BS

for the degree of Bachelor of Science in Secondary Education, Mathematics Concentration

The **Secondary Education, BS** prepares teachers for grades nine through 12. A minimum of 120 semester hours is necessary for graduation.

Students pursuing teacher licensure programs in the College of Education must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain a cumulative grade point average of 2.5 (A=4.0). Grades in courses of C- or lower may not be used for State of Illinois licensure, endorsements, or approvals. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education. Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Students in the Secondary Education licensure program must complete the Campus General Education Requirements, the courses for the Mathematics concentration, and the professional education coursework.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Slavic Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Slavic Studies

Students must select one concentration in consultation with an academic advisor. Students in all concentrations must complete a) 6 hours of language beyond the second year, and b) 24 hours of literature and culture courses.

- Major in Slavic Studies, Czech Studies concentration (p. 742)
- Major in Slavic Studies, Polish Studies Concentration (p. 744)
- Major in Slavic Studies, Russian Language, Literature, & Culture Concentration (p. 746)
- Major in Slavic Studies, South Slavic Studies Concentration (p. 749)
- Major in Slavic Studies, Ukrainian Studies Concentration (p. 751)

Unlike the major in Russian, East European, and Eurasian Studies, which has a multidisciplinary area studies and current affairs focus, the major in Slavic Studies emphasizes the study of language, literature, and culture in their historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training, and many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

5 Year BALAS/MA in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and European Union Studies

The Department of Slavic Languages & Literatures with the European Union Center offers a 5-year BALAS/MA degree program in Slavic Studies (Russian Language, Literature & Culture or Polish Studies concentrations) and the Master of Arts in European Union Studies (MAEUS). In order to be admitted to this degree program, students apply through a joint application process to their BALAS -granting program and the European Union Center during their third year of studies. Requirements for this degree program are identical to those for the stand-alone BALAS and for the stand-alone MAEUS. Students will receive both degrees when the requirements are met for the degrees; the BALAS and MA degrees will be conferred separately and independently. More detailed information may be obtained from department and EUC offices.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Slavic Studies

1. Proficiency in the target language associated with the major track of at least intermediate high level on the ACTFL scale, with some control of advanced low functions.
2. Improved and effective writing and communication skills in the English language.
3. Coherent knowledge and functional grasp of the culture(s) and history(ies) of the region or regions and peoples targeted by the major track.
4. Analytical and interpretive abilities making use of the critical tools and methodologies taught in our courses of literary and cultural study.

Slavic Studies: Czech Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Slavic Studies, Czech Studies Concentration

The major in Slavic Studies emphasizes the study of language, literature, and culture in historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training. Our students are culturally curious, interested in understanding different ways of thinking, feeling, and conceiving the world in distant times and places. They are critical readers and interpreters, sensitive to nuances of expression, responsive to artistic innovation, open to new ways of thinking. They're skilled writers and communicators who can master complex material, reconcile conflicting evidence, and succinctly argue and support a position. Many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Slavic Studies, Czech Studies Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Departmental distinction: Graduation with distinction may be earned by completion of one of the following two options:

- GPA in departmental courses of 3.75; or
- GPA in departmental courses of 3.50, plus successful completion of academic study trip to the region, documented by graded transcript. See a departmental adviser to work out details, preferably two semesters before graduation.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 30 hours including 6 hours in advanced language and 24 hours in literature and culture. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)		0-20

Major Requirements

Code	Title	Hours
Language: A minimum of 6 hours beyond the second year of the Czech language: CZCH 484 Readings in Czech for 6 hours or equivalent; or Students may choose to complete the second year (200-level sequence) of a second Slavic language, including Russian, in addition to Czech		6
Literature and Culture: A minimum of 24 hours is required in the following areas:		24
6 hours of Introductory Culture courses:		
SLAV 120	Russian & E Euro Folktales (and)	
Choose one of the following:		
REES 201	Introduction to Eastern Europe	
RUSS 261	Introduction to Jewish Culture in the Russian Empire	
SLAV 117	Russ & E Euro Science Fiction	
6 hours of Literature Survey courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. [1]		
12 hours of Upper-level (300- and 400-level) Literature and Culture courses chosen in consultation with the Undergraduate Advisor from a list maintained in the Slavic Department. [1]		
Capstone Experience: All majors are required to complete a capstone course, project, or experience chosen from among the following:		0-3
(1) RUSS 493 Honors Senior Thesis (2 hrs); or		
(2) a 300- or 400-level course in the Slavic Department in which a research project is undertaken; or		
(3) Study abroad in the region.		
Majors should consult with the Undergraduate Advisor to plan their capstone experience.		

[1] *Up to 9 hours of the literature requirement (but no more than 6 at the upper level) can be replaced by courses at the same level in other departments, chosen in consultation with and approved by the Undergraduate Advisor, that treat the history, culture, and society of the Czech region.*

Slavic Studies: South Slavic Studies, BALAS

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Slavic Studies, South Slavic Studies Concentration

The major in Slavic Studies emphasizes the study of language, literature, and culture in historical context. Students develop intensive cultural literacy and communication skills through humanities-oriented training. Our students are culturally curious, interested in understanding different ways of thinking, feeling, and conceiving the world in distant times and places. They are critical readers and interpreters, sensitive to nuances of expression, responsive to artistic innovation, open to new ways of thinking. They're skilled writers and communicators who can master complex material, reconcile conflicting evidence, and succinctly argue and support a position. Many go on to careers in writing and editing, media, or work with international cultural foundations and organizations. The major is an excellent preparation for law school, business school, or other graduate study, as well as careers in the N.G.O. world, teaching, or research.

for the degree of Bachelor of Arts in Liberal Arts and Sciences in Slavic Studies, South Slavic Studies Concentration

A Major Plan of Study Form must be completed and submitted to the LAS Student Affairs Office before the end of the fifth semester (60 - 75 hours). Study abroad courses may be substituted for major and minor requirements with approval of adviser.

Departmental distinction: Graduation with distinction may be earned by completion of one of the following two options:

- GPA in departmental courses of 3.75; or
- GPA in departmental courses of 3.50, plus successful completion of academic study trip to the region, documented by graded transcript. See a departmental adviser to work out details, preferably two semesters before graduation.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 30 hours including 6 hours in advanced language and 24 hours in literature and culture. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

Social Work, BSW

for the degree of Bachelor of Social Work in Social Work

The Bachelor of Science in Social Work can be completed through our traditional program on the Urbana campus or through our upper-level completer program. The traditional program is open to freshmen, off-campus transfers, and inter-campus transfers. Courses are taken on the Urbana campus. The iBSW Program is open to junior-level transfer students. The iBSW program is a two-year degree completion program that allows students to earn their Bachelor of Social Work (BSW) degree while residing in students' home communities.

The purpose of undergraduate social work education at the School of Social Work is to provide a comprehensive educational experience for students that is grounded in a liberal arts tradition and prepares graduates for excellence in the areas of social work practice, policy, social engagement, and leadership.

Upon degree completion, graduates will be prepared for entry into generalist social work practice, advanced standing in graduate social work education, and a multitude of career opportunities. These can include careers in communications, corrections, education, government, healthcare, human resources, law, non-profit organizations, religious studies, and public service. Obtaining an undergraduate degree in Social Work gives students the opportunity to pursue a License of Social Work (LSW). A BSW degree also makes students eligible to pursue Advanced Standing status in many masters of Social Work (MSW) programs. The advanced standing status enables BSW graduates to receive an MSW in only one year.

The focus of undergraduate curriculum delivery is through a student-centered strengths-based educational model that fosters student understanding by providing a challenging, yet supportive environment of high expectations that encourage the development of well-informed and engaged citizens.

The social work major prepares practitioners for generalist social work practice with individuals, groups, families, and communities. The curriculum requires a minimum of 120 hours for graduation.

for the degree of Bachelor of Social Work in Social Work

Departmental Distinction: The top 10% of the BSW graduating class will graduate with distinction.

Minimum required major and supporting course work: A minimum of 53 course hours of social work coursework, which includes 15 credit hours of combined agency-based field practicum (internship) and field seminar.

Sociology, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology

Large-scale societal change begins with individuals like you -- hungry for knowledge and ready to make a real difference; in the Department of Sociology you will study the inner workings of society with a focus on either Inequalities or Global Sociology.

Sociologists explore human social life at every level, from personal relationships to global society. Major topics of study include inequality, social movements, criminology, race and class relations, gender, social institutions such as religion and education, and fundamental population processes like immigration and mortality. Sociologists use a range of methods and theories to develop and evaluate ideas about social life.

As a student of Sociology, you will train in research methods and become fluent in social statistics while understanding the complexity of societal diversity and social change. These skills are usable in a wide variety of work settings and are skills that employers value.

Recent graduates have pursued careers with the FBI, as Human Resource Specialists, with non-profit organizations, as policy officers, and have earned advanced degrees in Social Work, Sociology, Law, Medicine, and more. The career paths of Sociology alumni are as diverse as our student population -- who represent the best and the brightest from a variety of backgrounds.

In the Department of Sociology you can choose the major in Sociology, the minor in Sociology, or the minor in Criminology, Law and Society (CLS). Whereas the major and minor in Sociology provide an overview into the broader disciplines of Sociology, the minor in CLS is a more specialized approach for those students intersted in law and justice related careers and occupations.

Each student should see a Sociology departmental advisor at least once a year to choose sociology courses and to monitor their progress.

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology

A Major Plan of Study Form must be completed and submitted to the LAS Student Academic Affairs Office before the end of the fifth semester (60-75 hours). Please see your adviser.

Departmental distinction: In order to achieve distinction, high distinction, or highest distinction, a sociology major must meet the following requirements:

- Have completed SOC 490 or SOC 495
- Attain an Illinois GPA of 3.25 or higher
- If both these requirements are met, then the MAJOR GPA distributes as follows:
  - 3.25 – Distinction
  - 3.50 – High Distinction
  - 3.75 – Highest Distinction

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 44 hours including 32 hours of Sociology courses. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed

requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
Social & Behavioral Sciences (6 hours)		6
fulfilled by SOC 100 and any other course approved as Social & Behavioral Sciences		
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fulfilled by SOC 280 and SOC 380		
Language Requirement (Completion of the fourth semester or equivalent of a language other than English, or completion of the third semester in two different languages other than English is required)		0-20

Major Requirements

Code	Title	Hours
SOC 100	Introduction to Sociology	4
SOC 200	Introduction to Sociological Theory	3
SOC 280	Intro to Social Statistics [1]	4
SOC 380	Social Research Methods	4
Select one of the following capstone experiences:		3
SOC 400	Internships	
SOC 450	Senior Capstone Seminar	
SOC 495	Senior Honors Seminar	
Students may select any sociology courses to fulfill the requirement of 32 hours in Sociology		14
Supporting course work taken outside the Department of Sociology [2]		12

[1] *If a statistics course is taken outside the Department of Sociology to fulfill this requirement, that course does not count toward the 32 hours of Sociology courses.*

[2] *Supporting course work is designed to expand the student's education, and should be taken outside of Sociology. A student may take supporting course work from one department, such as psychology, economics, history, or statistics, or from a cohesive selection of courses in various units. With an advisor's approval, departmental or interdisciplinary minors, or a double major, may be used to fulfill the requirements of supporting course work.*

for the degree of Bachelor of Arts in Liberal Arts & Sciences Major in Sociology

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. For more information, see the corresponding section on the Degree General and Education Requirements page *(p. 2).*

Spanish, BALAS

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Spanish

The Spanish major gives students the skills to understand and relate to many cultures, empowering them to pursue meaningful connections in both personal and professional settings. In addition to developing advanced Spanish language skills and intercultural competence, Spanish majors can take coursework in linguistics, literature, and cultural studies. Many students also take courses that prepare them to use Spanish in professional settings including healthcare, business, and the non-profit sector. Our recommended study abroad programs in Spain and Latin America allow students to complete their major requirements abroad while also providing opportunities for internships and service-learning. Transfer students and ICT students must have earned credit for one SPAN course at the 200-level or higher to declare the major.

for the degree of Bachelor of Arts in Liberal Arts & Sciences in Spanish

A Major Plan of Study Form must be completed and submitted to the Student Affairs Office before the end of the fourth semester (48-60 hours). Please see your adviser.

Departmental distinction: To be considered for departmental distinction, a student must maintain a 3.5 grade point average and fulfill special additional requirements. See the department's honors adviser.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 48 hours, including 33 hours in Spanish courses at the 200-level or higher. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Special Education, BS

for the degree of Bachelor of Science in Special Education

The **Special Education, BS** is designed to prepare special education teachers for students kindergarten-age 22. An applicant must have a cumulative grade point average of at least 2.5 (A = 4.0), a minimum of 50 hours of prior experience with individuals with disabilities, and sophomore or higher standing prior to entering the professional education sequence of the program. A minimum of 125 semester hours of credit is required for graduation. To proceed to the five-semester professional education sequence, students must have completed all degree requirements outside of the professional education coursework.

Students pursuing teacher licensure programs in the College of Education (COE) must meet requirements in a series of sequential gateways. Included in the gateway requirements are successful completion of specified coursework, achievement of appropriate grade point averages, requirements for clinical experiences, and appropriate tests for the licensure area. Meeting all Gateway requirements leads to degree and licensure completion.

In order to be recommended for licensure, candidates are required to maintain a cumulative grade-point average of 2.5 (A = 4.0). Candidates in teaching licensure programs must maintain a C- or better in ALL content and professional education coursework. For teacher education licensure requirements applicable to all curricula, see the Council on Teacher Education. (http://www.cote.illinois.edu/)

Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

for the degree of Bachelor of Science in Special Education

Students completing their degree before May 2026 should consult the 2023-2024 Catalog (http://catalog.illinois.edu/archivedacademiccatalogs/) to guide their selection of courses. Students enrolled starting August 2023 should consult the sequence below.

Graduation Requirements

Minimum hours required for graduation: 125 hours.

Requirements for licensure: Minimum cumulative Grade Point Average of 2.5 (A=4.0); Receive a grade of C- or better in licensure coursework.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Speech & Hearing Science, BS

for the degree of Bachelor of Science Major in Speech & Hearing Science

The Speech and Hearing Science, B.S. provides explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with an emphasis on the implications of differences and disruptions in the communication systems associated with disorders. Students are prepared to pursue graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language-Hearing Association's (ASHA) website (www.asha.org).

All students must complete a series of professional core courses and electives in Speech & Hearing Science. Students are advised to work with the undergraduate academic advisor to ensure the major and Gen Ed courses are taken in proper sequential order and meet the requirements for eventual ASHA certification.

for the degree of Bachelor of Science Major in Speech & Hearing Science

Graduation Requirements

Minimum hours required for graduation: 120 hours.

All students must complete a series of SHS professional core classes and an additional 12 credits of SHS electives. Students are advised to work with the undergraduate academic advisor to ensure courses are taken in proper sequential order and, if desired, that they meet the requirements for eventual ASHA certification. NOTE: For those planning on pursuing graduate studies in Speech-Language Pathology or Audiology, many graduate programs require 25 clinical observation hours prior to starting graduate school. Some of these may be completed as part of SHS 475.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program. Speech and Hearing Science Gen Ed courses may be viewed: SHS Gen Ed (https://courses.illinois.edu/gened/history/SHS/)

LING 450	Sociolinguistics I	3 or 4
No more than 3 credits total from the courses below may be counted toward the 12 credits of SHS electives		
SHS 291	Research Lab Experience in SHS	1 to 3
SHS 390	Individual Study	2 to 4
SHS 395	Honors Individual Study	2

for the degree of Bachelor of Science Major in Speech & Hearing Science

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. The minimum number of hours required for the BS degree is 120. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

Total Hours 120

for the degree of Bachelor of Science Major in Speech & Hearing Science

1. Students will describe basic speech, language, and hearing processes across the lifespan from the biological, behavioral, and social science perspectives.
2. Students will apply knowledge of how disruptions in speech, language, and hearing processes relate to human communication functioning and disability.
3. Students will demonstrate the ability to read and evaluate literature related to human communication processes across academic disciplines.
4. Students will apply knowledge of cultural-linguistic diversity to human communication functioning and disability.

Speech & Hearing Science: Audiology, BS

for the degree of Bachelor of Science in Speech & Hearing Science, Audiology Concentration

The Bachelor of Science in Speech & Hearing Science, Audiology Concentration is not currently accepting applications. Suspension of admissions effective Spring 2026. If you are interested in the Bachelor of Science in Speech and Hearing Science program, visit the Speech and Hearing Science, B.S. catalog page (p. 763) for more information.

The **Audiology** concentration provides explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding hearing, balance, human speech, language, and swallowing processes, with an emphasis on the differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, the audiology concentration is the most directly connected to clinical practice in audiology.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's website (https://www.asha.org/).

for the degree of Bachelor of Science in Speech & Hearing Science, Audiology Concentration

Graduation Requirements

Minimum hours required for graduation: 120 hours.

All students must complete a series of SHS professional core classes and an additional 12 credits of SHS electives. Students are advised to work with the undergraduate academic advisor to ensure courses are taken in proper sequential order and, if desired, that they meet the requirements for eventual ASHA certification. NOTE: For those planning on pursuing graduate studies in Speech-Language Pathology or Audiology, many graduate programs require 25 clinical observation hours

prior to starting graduate school. Some of these may be completed as part of SHS 475.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program. Speech and Hearing Science Gen Ed courses may be viewed: SHS Gen Ed (https://courses.illinois.edu/gened/history/SHS/)

Code	Title	Hours
Composition I		4-6

SHS 390	Individual Study	2 to 4
SHS 395	Honors Individual Study	2

Electives

All students are encouraged to take electives inside and outside the department that will count towards the 128 required hours for graduation (the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered as requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites, and course availability may vary.

Relevant areas include: Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EOL), Curriculum & Instruction (CI), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women's Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science (LIS), Linguistics (LING), Psychology (PSYC), Recreation, Sport, & Tourism (RST), Rehabilitation Counseling (REHB), Special Education (SPED), Sociology (SOC), Social Work (SOCW). Additional areas to explore may include: courses in a foreign language beyond the completion of the University's requirement, as well as additional courses in science, such as Biology (IB, MCB), Physics (PHYS), microcomputer applications (e.g. ACE), and courses in cultural studies.

Audiology Concentration

Code	Title	Hours
SHS 271	Communication and Aging	3
SHS 280	Communication Neuroscience	3
SHS 352	Hearing Health and Society	3
SHS 451	Aural Rehab Children to Adults (requires senior standing and completion of core classes)	3
SHS 475	Prepracticum in SHS (requires senior standing and completion of core classes)	1
Students must also take 6 hours from the following specified electives:		6
SHS 222	Language & Culture of Deaf Communities	
SHS 270	Comm Disability in the Media	
SHS 291	Research Lab Experience in SHS (Approved for S/U grading only. Must be arranged with individual faculty member.) [1]	
SHS 333		
SHS 375	Communication Partners and Health	
SHS 390	Individual Study [1]	
SHS 395	Honors Individual Study [1]	
SHS 473	Augmentative & Alternative Communication (Requires senior standing and completion of core classes)	
NOTE: For those planning on pursuing graduate studies in Speech-Language Pathology or Audiology, many graduate programs require 25 clinical observation hours. These should be completed and recorded prior to graduation (some may be completed prior to serving as a clinical participant in the required SHS 475 pre-practicum).		
Total Hours		**19**

[1] *No more than 3 credits from SHS 291, SHS 390 and SHS 395 may be counted toward the 6 credits of specified electives.*

Speech & Hearing Science: Cultural-Linguistic Diversity, BS

for the degree of Bachelor of Science in Speech & Hearing Science, Cultural-Linguistic Diversity Concentration

The Bachelor of Science in Speech & Hearing Science, Cultural-Linguistic Diversity Concentration is not currently accepting applications. Suspension of admissions effective Spring 2026. If you are interested in the Bachelor of Science in Speech and Hearing Science program, visit the Speech and Hearing Science, B.S. catalog pag (p. 763)e for more information.

The **Cultural-Linguistic Diversity** concentration is designed to examine ways that individual communication differences, including disorders, interface with sociocultural systems, institutions, and practices. Students will take courses in theory and research methods to explore ways in which sociolinguistic differences shape child development, socialization, and identity. This concentration is intended to help provide students with knowledge related to cultural-linguistic differences (race, ethnicity, socio-economic status, neurodiversity) that is needed to serve an increasingly global society concerned with human rights and responsibilities. Such expertise is expected to enhance multiple career paths in education, law, business, and health-related fields. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language Hearing Association's website (https://www.asha.org/).

Speech & Hearing Science: Neuroscience of Communication, BS

for the degree of Bachelor of Science in Speech & Hearing Science, Neuroscience of Communication Concentration

The Bachelor of Science in Speech & Hearing Science, Neuroscience of Communication Concentration is not currently accepting applications. Suspension of admissions effective Spring 2026. If you are interested in the Bachelor of Science in Speech and Hearing Science program, visit the Speech and Hearing Science, B.S. catalog page (p. 763) for more information.

The **Neuroscience of Communication** concentration provides an interdisciplinary understanding of the neurological systems that underlie human communication. Students will study the biological basis of communication in order to understand brain-behavior correlates of typical and disordered speech, language, and hearing function. In addition, students will benefit from faculty research that utilizes innovative technologies to study the structure and function of the sensory-motor systems that underlie human communication abilities. This concentration is intended to help prepare students for health and science-related careers, including medicine and neuroscience. In addition, undergraduates interested in pursuing careers as an audiologist or speech-language pathologist can combine this concentration with pre-certification requirements.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language-Hearing Association's website.

for the degree of Bachelor of Science in Speech & Hearing Science, Neuroscience of Communication Concentration

Graduation Requirements

Minimum hours required for graduation: 120 hours.

All students must complete a series of SHS professional core classes and an additional 12 credits of SHS electives. Students are advised to work with the undergraduate academic advisor to ensure courses are taken in proper sequential order and, if desired, that they meet the requirements for eventual ASHA certification. NOTE: For those planning on pursuing graduate studies in Speech-Language Pathology or Audiology, many graduate programs require 25 clinical observation hours prior to starting graduate school. Some of these may be completed as part of SHS 475.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree.

Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program. Speech and Hearing Science Gen Ed courses may be viewed: SHS Gen Ed (https://courses.illinois.edu/gened/history/SHS/)

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
fulfilled by CHEM 101, CHEM 102, CHEM 108, CHEM 202, PHYS 101, PHYS 102, PHYS 211, or PHYS 212; and ANTH 143, ANTH 241, ANTH 246, ANTH 249, HK 150, IB 100, IB 104, IB 110, IB 150, MCB 100, MCB 150, or MCB 170

SHS 480	Understanding Disability and Assistive Technology	2
SHS 481	Creating and Procuring Accessible Electronic Materials	2
SHS 482	Designing Universally Accessible Web Resources	2
One of the courses below may be counted toward the 12 credits of SHS electives		
CMN 232	Intro to Intercultural Comm	3
EPSY 202	Exploring Cultural Pluralism	3
LING 210	Language History	3
LING 450	Sociolinguistics I	3 or 4
No more than 3 credits total from the courses below may be counted toward the 12 credits of SHS electives		
SHS 291	Research Lab Experience in SHS	1 to 3
SHS 390	Individual Study	2 to 4
SHS 395	Honors Individual Study	2

Electives

All students are encouraged to take electives inside and outside the department that will count towards the 128 required hours for graduation (the total number of electives students may take may vary with each individual). Students are encouraged to select electives that will complement their areas of interest and future goals. Areas listed below are only a sampling of possibilities; they are not to be considered as requirements and students are not limited to these choices. All students are responsible for addressing course pre-requisites, and course availability may vary.

Relevant areas include: Anthropology (ANTH), Communications (CMN), Kinesiology and Community Health (KIN, CHLH), Educational Organization and Leadership (EOL), Curriculum & Instruction (CI), Educational Policy Studies (EPS), Educational Psychology (EPSY), English (ENGL), English as a Second Language (ESL), Gender and Women's Studies (GWS), Human Development and Family Studies (HDFS), Library and Information Science (LIS), Linguistics (LING), Neuroscience (NEUR), Psychology (PSYC), Recreation, Sport, & Tourism (RST), Rehabilitation Counseling (REHB), Special Education (SPED), Sociology (SOC), Social Work (SOCW). Additional areas to explore may include: courses in a foreign language beyond the completion of the University's requirement, as well as additional courses in science, such as Biology (IB, MCB), Physics (PHYS), microcomputer applications (e.g. ACE), and courses in cultural studies.

Neuroscience of Communication Concentration

Code	Title	Hours
SHS 280	Communication Neuroscience	3
SHS 389	Neuroplasticity and Communication	3
SHS 427	Language and the Brain	3
SHS 470	Neural Bases Spch Lang	3
Students must also take 6 hours from the following specified electives:		**6**
Any Chemistry or Physics 100-level class		
IB 100	Biology in Today's World	
PSYC 204	Intro to Brain and Cognition	
PSYC 216	Child Psych	
or EPSY 236	Child Development in Education	
PSYC 230	Perception & Sensory Processes	
PSYC 224	Cognitive Psych	
PSYC 248	Learning and Memory	
SHS 271	Communication and Aging	
SHS 291	Research Lab Experience in SHS [1]	
SHS 333		
SHS 375	Communication Partners and Health	
SHS 390	Individual Study [1]	
SHS 395	Honors Individual Study [1]	
SHS 473	Augmentative & Alternative Communication	
SHS 475	Prepracticum in SHS	
Total Hours		**18**

[1] *No more than 3 credits from SHS 291, SHS 390 and SHS 395 may be counted toward the 6 credits of specified electives.*

for the degree of Bachelor of Science in Speech & Hearing Science, Neuroscience of Communication Concentration

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. The minimum number of hours required for the BS degree is 128. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This may require up to three semesters of language depending on high school coursework or placement. See the corresponding section on the Degree General and Education Requirements (http://catalog.illinois.edu/general-information/degree-general-education-requirements/) page.

Speech & Hearing Science: Speech-Language Pathology, BS

for the degree of Bachelor of Science in Speech & Hearing Science, Speech-Language Pathology Concentration

The Bachelor of Science in Speech & Hearing Science, Speech-Language Pathology Concentration is not currently accepting applications. Suspension of admissions effective Spring 2026. If you are interested in the Bachelor of Science in Speech and Hearing Science program, visit the Speech and Hearing Science, B.S. catalog page (p. 763) for more information.

The **Speech-Language Pathology** concentration provides explicit background in the theoretical and clinical areas necessary for graduate study. Students will learn foundational knowledge for understanding human speech, language, swallowing, hearing, and balance processes, with an emphasis on the implications of differences and disruptions in the communication systems associated with disorders. Although students across any of the concentrations can pursue the graduate study and pre-certification requirements associated with becoming an audiologist or speech-language pathologist, the Speech-Language Pathology concentration is the most directly associated with opportunities for clinical practice in speech-language pathology.

More information about the fields of speech-language pathology and audiology may be found on the American Speech-Language-Hearing Association's website (http://www.asha.org).

Statistics, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Statistics

Statistics is the science of modeling, summarizing, and analyzing data, and of using mathematics and computing tools to make predictions and decisions in the face of uncertainty. Statistical ideas are applicable in any area involving quantitative measurement and in almost every area of scholarly pursuit. The major, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A major in statistics will prepare students for a career in business, industry, or government, and for further graduate study in statistics or in a related area.

Undergraduate degree programs in Statistics

- Statistics, BSLAS (p. 778)
- Statistics & Computer Science, BSLAS (p. 780)

for the degree of Bachelor of Science in Liberal Arts & Sciences in Statistics

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science, Statistics, and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction.

General education: Students must complete the Campus General Education requirements including the campus general education language requirement.

Minimum required major and supporting course work: Normally equates to 70-72 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

Minimum hours required for graduation: 120 hours.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

for the degree of Bachelor of Science in Liberal Arts & Sciences in Statistics

Statistics students will:

1. Be able to apply mathematical and statistical reasoning to draw valid conclusions from data.
2. Communicate the results of a statistical analysis effectively in writing, through visualizations, and orally.
3. Be competent in the use of statistical software, in data management, and in writing statistical code.
4. Be adept in the use of modern methods of statistical computing, statistical learning, and data science.
5. Work effectively as part of a team.

Statistics & Computer Science, BSLAS

for the degree of Bachelor of Science in Liberal Arts & Sciences in Statistics & Computer Science

This major is sponsored jointly by the Departments of Statistics and Computer Science. The Statistics and Computer Science major is designed for students who would like a strong foundation in computer science, coupled with significant advanced coursework in statistics. The major prepares students for professional or graduate work in statistics and computer science, and for applications of computing in which knowledge of statistics is particularly important, such as data mining and machine learning.

for the degree of Bachelor of Science in Liberal Arts & Sciences in Statistics & Computer Science

Departmental distinction: To graduate with distinction requires a specified minimum grade point average in all Computer Science, Statistics, and Mathematics courses listed below. A GPA of 3.25 is required for Distinction, 3.5 for High Distinction, and 3.75 for Highest Distinction.
General education: Students must complete the Campus General Education requirements including the campus general education language requirement.
Minimum required major and supporting course work: Normally equates to 68-72 hours. At least 12 hours of 300- and 400-level courses must be taken on this campus.
Minimum hours required for graduation: 120 hours

for the degree of Bachelor of Science in Liberal Arts & Sciences in Statistics & Computer Science

Statistics & Computer Science students will:

1. Analyze complex problems and apply principles of statistical reasoning and computing to draw valid conclusions from data.
2. Design, implement, and evaluate a statistically-sound and computing-based answers to interdisciplinary, field-specific problems.
3. Apply mathematical, probabilistic, and computer science theory fundamentals to produce statistical and computing-based solutions.
4. Communicate the results of their analysis effectively in writing, through visualizations, and orally in a variety of professional contexts.
5. Excel in the use of software development, in data management, and in writing statistical code.
6. Be adept in the use of modern methods of computing, statistical machine learning, and data science.

7. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Strategy, Innovation, and Entrepreneurship, BS

for the degree of Bachelor of Science Major in Strategy, Innovation, and Entrepreneurship

The Strategy, Innovation, and Entrepreneurship major examines how business opportunities are identified and exploited for society through existing and new organizations. Students will learn how to generate and evaluate ideas, develop those ideas into products and services, assemble resources (including finances), mitigate risks, and lead organizations that meet human needs. The degree prepares students to work within existing organizations as well as to create new organizations, both for-profit and not-for-profit.

In addition to the SIE Major requirements, students must also fulfill the University's General Education requirements and the College of Business Core Courses requirements (for more detail, refer to the Gies College of Business Undergraduate Section).

for the degree of Bachelor of Science Major in Strategy, Innovation, and Entrepreneurship

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science Major in Strategy, Innovation, and Entrepreneurship

1. **Discipline-based competency:** Students will develop knowledge and skills for (1) analyzing, formulating, and implementing strategies for new and established organizations, (2) managing technology and innovation, and (3) developing and growing new ventures.
2. **Problem solving:** Students are expected to solve complex business problems by integrating the knowledge from three core domains in strategic management, technology and innovation management, and entrepreneurship.
3. **Strategic leadership:** Students will develop skills and perspectives for organizing and directing the activities of others to pursue organizational goals.
4. **Communication:** Students will demonstrate competencies to communicate effectively, both verbally and in writing.

Gies College of Business website

Studio Art, BASA

for the degree of Bachelor of Arts in Studio Art in Studio Art

The Bachelor of Arts in Studio Art (BASA) focuses on the study of art, design, and art history in the context of a broader program of general study offered through the diverse research and teaching activities across the University of Illinois Urbana-Champaign campus. The BASA degree is intended for those students who have strong interests in blending the study of art and creative practices with coursework in other academic areas. It differs from the Bachelor of Fine Arts in that it offers students rigorous education in studio art for students who plan to pursue dual majors, minors, or advanced degrees in non-art fields, while integrating a studio art experience into their undergraduate studies.

First year courses for the BA in Studio Art introduce basic materials and conceptual approaches to making art, using traditional media including drawing and painting, printmaking, clay, plaster, wood and metal, to code, digital imaging, interactive media, and time-based applications.

The advanced BA Studio Art student can look forward to a changing menu of courses on a variety of studio practices and topics, taught by a diverse faculty with expertise in a wide variety of conceptual, material and technical strategies for making art. The BA Studio Art's curriculum offerings are designed to reflect an increasingly dynamic culture and provide students with experiences and skills that promote adaptability after graduation.

BA Studio Art students are provided with studio spaces housed in a communal studio building, where they pursue a self-determined studio practice. The communal studio configuration provides the geography for a strong, vibrant community of student-artists working together as they establish their focus and participate in exhibitions, performances, and critiques.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

A portfolio review is required for admission to the School of Art and Design.

for the degree of Bachelor of Arts in Studio Art in Studio Art

Graduation Requirements

Minimum hours required for graduation: 122 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

for the degree of Bachelor of Arts in Studio Art in Studio Art

Upon completion of the BASA:

1. Students will understand and be able to apply basic principles of visual and material communication, including two-dimensional pictorial concepts, three-dimensional formal and spatial concepts, and a wide variety of media and formats for artistic production, and possess the ability to apply them to a specific aesthetic intent.
2. Students will demonstrate an ability and willingness to experiment and explore the expressive possibilities of various media, and artistic and creative strategies for self-directed artmaking and investigate the diverse activities and conceptual modes available to the contemporary artist, including work that directly addresses or engages with recent developments in the field of fine art as well as broader social questions and challenges. Students are trained in the production and critique of artworks that explore forms and technologies identified as new or emerging.
3. Students will gain knowledge of, understand, and be able to apply concepts of visual rhetoric in the development of content, and be able to recognize and critically analyze an evolving variety of communicative practices in art and visual culture, including those that that represent diverse cultures and sociopolitical positions, and to demonstrate openness to new social possibilities and a critical empathy towards both audiences and culture producers of differing histories, origins and identities.
4. Students will be willing and able to investigate and accommodate broad-ranging types of knowledge and artistic strategies for the purpose of synthesizing diverse and even disparate ideas to create sophisticated, unique works of art, participate in new types of collaboration, and to make innovative statements and hypotheses, or propose creative solutions to social, organizational, and societal problems using aesthetic strategies.
5. Students will develop an innovative, imaginative, and entrepreneurial self-directed studio practice, will gain a deep understanding of their own creativity, be able to apply it in any context, and will learn to independently generate thematic investigation and implementation of research in a broad variety of social locations, including art and educational institutions, activist forums, and cyberspace. Students in the BASA will produce web and print based documents that serve to market and promote their practice as independent makers.

Studio Art, BFASA

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art

Students pursuing this major select one of eight concentrations:

- Fashion Concentration (p. 791)
- Illustration Concentration (p. 793)
- Interdisciplinary Practice Concentration (p. 796)
- New Media Concentration (p. 799)
- Painting Concentration (p. 801)
- Photography Concentration (p. 804)
- Printmaking Concentration (p. 806)
- Sculpture Concentration (p. 809)

Students must select one required concentration. Students are not permitted to declare more than one concentration.

The Bachelor of Fine Arts in Studio Art (BFASA) at the University of Illinois Urbana-Champaign offers students unprecedented flexibility in determining their own courses and topics of study, engaging in a diverse, innovative curriculum. In response to a rapidly changing world in which artists and designers are constantly presented with new tools, platforms, topics, strategies and venues for exhibition, publication, performance and other types of cultural work, the BFASA prepares students for the workplaces of the future. The BFASA is designed to equip graduates with the skills necessary to not only create artwork, but to communicate, think critically and creatively, and gain experience in a broad range of topics that will prepare them as innovative artists and as global citizens. Students will navigate a dynamic curriculum that is responsive to current trends in art, culture and creativity. It encourages new, interdisciplinary initiatives and fosters collaboration and research at the undergraduate level within the context of a premier research university.

The BFASA at Illinois begins with basic material and technological tools and concepts in a variety of studio courses. Students are guided in the understanding of visual organization and communication by utilizing both new and traditional technologies and strategies. Foundation courses introduce basic material and conceptual approaches to making art, using media from traditional disciplines including drawing and painting, printmaking, clay, plaster, wood and metal, to code, digital imaging, interactive media, and time-based applications.

At the intermediate and advanced levels, curriculum offerings are designed to reflect an increasingly dynamic culture, and to provide students with experiences and skills that will enhance their adaptability. A changing menu of courses on a variety of topics is taught by a faculty with expertise in a wide variety of conceptual, material and technical strategies for making art.

BFASA students are provided individual studio spaces, where they develop a self-directed practice, housed in a communal studio building. The studio configuration provides the stage for a strong, vibrant community of student-artists working together as they establish their interests and participate in exhibitions, performances, and critiques.

The capstone experience is the BFASA Thesis course, in which students develop an individually determined body of work based on their entire educational experience. A portfolio and written thesis paper will demonstrate their conceptual, technical and expressive abilities.

Our graduates will enter professional lives as artists at a time when the boundaries between art and other fields are vanishing. Creative individuals with broad and versatile material, technical and intellectual skills will be in demand within expanding diverse practices that comprise contemporary art and society.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

A portfolio review is required for admission to the School of Art and Design.

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art

Graduation Requirements

Minimum hours required for graduation: 122 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

Learning Outcomes

Upon completion of BFASA curriculum:

1. Students will apply basic principles of multi-dimensional and multi-sensory communication across diverse mediums to achieve a desired aesthetic in their creative work.
2. Students will experiment with and critically analyze the expressive possibilities of various media and conceptual strategies, demonstrating engagement with emerging technologies and investigation of broader social questions and challenges.
3. Students will implement concepts of visual rhetoric and meaning making in the development of artworks that acknowledge and demonstrate empathy toward diverse social histories and lived experiences.
4. Students will develop and articulate a self-directed creative practice that synthesizes existing knowledge, personal perspectives, and collaborative opportunities to engage audiences in a variety of social and institutional settings.

Students will demonstrate adaptability for varying professional roles across artistic, cultural, and commercial contexts

In addition, each concentration has discipline specific learning outcomes:

Fashion:

1. Students in the fashion concentration will have fluency in their own personal apparel design process, including a strong working knowledge of the various modes of research, ideation, and design sketching.
2. Students in the fashion concentration will be able to effectively communicate their design philosophy and personal aesthetic visually; through portfolio quality two dimensional representations of developed fashion collections and verbally; through presentations, critique response and in a post academic professional fashion industry context.
3. Students in the fashion concentration will be able to communicate their design philosophy within the context of the history of fashion and the theoretical underpinnings that drive fashion and contemporary culture.
4. Students in the fashion concentration will demonstrate skills appropriate for designing and researching within the fashion industry.
5. Students in the fashion concentration will understand the various aspects of fashion industry, from design and production through manufacturing, promotion and sales.
6. Students in the fashion concentration will be able to demonstrate construction and pattern making skills. They will have a knowledge of materiality, fibers and textiles in relationship to apparel production.
7. Students in the fashion concentration will be prepared for professional careers by developing technical competency, creative/independent problem solving and conceptual understanding necessary for the challenges of a career in the creative industries.

Illustration concentration:

1. Demonstrated competence and facility in drawing especially related to specific narrative or expressive problems.
2. Ablity to analyze the strengths and weaknesses of form, space, and tone.

3. Understand various color strategies and applications in rendering, including the scientific, cultural, and emotional aspects of color.
4. Apply knowledge and skills in the use of basic tools, techniques, and processes sufficient to work from concept to finished product. This includes capabilities in fields such as painting, photography, typography, general design procedures, and digital/computer-aided design.
5. Ability to analyze a text to identify the primary visual elements and character designs in storytelling.
6. Demonstrate a narrative's tone, rhythm, and intention in page and sequential formats.
7. Analyze the strengths and weaknesses of a visual strategies capacity to communicate it's given intention.
8. Evaluate the use of art elements, design principles, and rendering methods in one's work and the work of others.
9. Working knowledge of the history of illustration, including its origins in the fine arts, and its relationship to written communication.
10. An understanding of the commercial applications and basic business practices of illustration.

Interdisciplinary Practice concentration:

1. BFASA students in the Interdisciplinary Practice concentration will have the ability to conceive, design, and create works in one or more specific fine arts disciplines.
2. Students in the Interdisciplinary Practice concentration will have an understanding of the similarities, differences, and relationships among the various fine arts areas.
3. Students in the Interdisciplinary Practice concentration will have experiences that encourage familiarity with a broad variety of work in various specializations and media, including broad exposure to works of art.
4. Students in the Interdisciplinary Practice concentration will have opportunities to develop an area of emphasis in at least one fine arts area, process, or medium.

New Media Concentration:

1. Students concentrating in New Media are trained in the production and critique of artworks that explore forms and technologies identified as new or emerging.
2. Students concentrating in New Media create work for the new disciplinary mechanisms that have arisen to evaluate and promote artwork in digital media, but also for traditional institutional mechanisms of art distribution and art critique. As in Contemporary Art, work in New Media may take the form of performance, sound and radio broadcast, gallery exhibition, curation, public art, cinema and video, a networked event, publication, or even scientific research.
3. Students concentrating in New Media are able to analyze and synthesize relevant aspects of human interaction in various contexts (physical, cognitive, cultural, social, political, and economic) and with respect to technologically- mediated communication, objects, and environments. Junior and Senior years see students working with critics/professors across the School to develop a portfolio of works in time-based, interactive, physical, networked or performative media. In the process of generating a body of work around a subject and form of their choice, students receive instruction in technical execution, formal composition, and theoretical framing.

Painting Concentration:

1. Students concentrating in Painting attain a functional knowledge of the traditions, conventions, and evolutions of the discipline as related to issues of representation, illusion, and meaning.
2. Students concentrating in Painting understand and utilize the diverse conceptual modes available to the painter. This may deal with direct observational painting strategies or with alternative approaches to the making of traditional or innovative two- and, at times, three-dimensional images.

Photography:

1. Students in the photography concentration will acquire the ability to control the procedural construct of an image via camera, software and darkroom techniques.
2. Students in the photography concentration will have an understanding of and an ability to employ photography's unique narrative structure.
3. Students in the photography concentration will acquire a critical appreciation of the historical and social influences of the medium and the ability to evaluate their own work as well that of others via this construct.
4. Students in the photography concentration will develop a cohesive body of work demonstrating technical competency and conceptual awareness of photography's varied histories and applications.

Printmaking Concentration:

1. Knowledge and skills in the use of basic tools, techniques, and processes sufficient to work from concept to finished product. This includes knowledge of basic materials and technical procedures such as intaglio, relief, lithography, silkscreen, and digital processes.
2. Mastery of at least one printmaking technique, including the ability both to experiment with technical innovation and to explore and develop personal concepts and imagery.
3. Students concentration in Printmaking will attain a functional knowledge of the history of printmaking.

Sculpture Concentration:

1. Students concentrating in Sculpture have knowledge and skills in the use of basic tools, techniques, and processes to work from concept to finished product, leading to preparation of three-dimensional objects and installations using the broadest possible range of techniques and concepts.
2. Students concentrating in Sculpture will demonstrate mastery in one or more sculptural media, processes and presentational strategies.

Studio Art: Fashion, BFASA

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Fashion Concentration

Students in the BFASA who choose a concentration in Fashion will focus on developing their own unique apparel design process with an emphasis on sustainable practices while becoming familiar with the various aspects of the fashion industry from concept to consumer. Students will be introduced to various modes of research and ideation, gaining the tools to be able to effectively communicate and produce their two- and three-dimensional designs within the context of the history of fashion and the theoretical underpinnings that drive fashion and contemporary culture.

Introductory courses in Fashion give students an overview of the industry from customer development, design and production through manufacturing, promotion and sales. Students are introduced to the fundamentals of textiles and clothing design, and the basics of creating a fashion collection through the use of hand and digital illustration techniques. Further courses focus on the exploration of experimental design, patternmaking, and sewing skills while encouraging the development of the designer's personal creative vision within the context of fashion history and the consumer market. Additional courses bring a greater understanding of how to enact knowledge gained in an educational setting within the fashion industry, through sustainable fashion collection development and branding. Students are given the unique opportunity to showcase their constructed ensembles and mini-collections on the runway in the Re-Fashioned fashion show presented each spring. We offer experiences in a variety of classrooms designed to support explorations in bringing two-dimensional materials to three-dimensional forms, access to computer labs, digital output technologies including 3D printers, sewing and embroidery machines, and dress forms.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

A portfolio review is required for admission to the School of Art and Design.

BFASA Studio Art:

Upon completion of BFASA curriculum:

1. Students will apply basic principles of multi-dimensional and multi-sensory communication across diverse mediums to achieve a desired aesthetic in their creative work.
2. Students will experiment with and critically analyze the expressive possibilities of various media and conceptual strategies, demonstrating engagement with emerging technologies and investigation of broader social questions and challenges.
3. Students will implement concepts of visual rhetoric and meaning making in the development of artworks that acknowledge and demonstrate empathy toward diverse social histories and lived experiences.

4. Students will develop and articulate a self-directed creative practice that synthesizes existing knowledge, personal perspectives, and collaborative opportunities to engage audiences in a variety of social and institutional settings.
5. Students will demonstrate adaptability for varying professional roles across artistic, cultural, and commercial contexts.

In addition, each concentration has discipline specific learning outcomes:

Illustration concentration:

1. Demonstrated competence and facility in drawing especially related to specific narrative or expressive problems.
2. Ability to analyze the strengths and weaknesses of form, space, and tone.
3. Understand various color strategies and applications in rendering, including the scientific, cultural, and emotional aspects of color.
4. Apply knowledge and skills in the use of basic tools, techniques, and processes sufficient to work from concept to finished product. This includes capabilities in fields such as painting, photography, typography, general design procedures, and digital/computer-aided design.
5. Ability to analyze a text to identify the primary visual elements and character designs in storytelling.
6. Demonstrate a narrative's tone, rhythm, and intention in page and sequential formats.
7. Analyze the strengths and weaknesses of a visual strategies capacity to communicate it's given intention.
8. Evaluate the use of art elements, design principles, and rendering methods in one's work and the work of others.
9. Working knowledge of the history of illustration, including its origins in the fine arts, and its relationship to written communication.
10. An understanding of the commercial applications and basic business practices of illustration.

Studio Art: Interdisciplinary Practice, BFASA

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Interdisciplinary Practice Concentration

The BFA in Studio Art with a concentration in Interdisciplinary Practice offers a student-initiated path through a variety of studio art course offerings. This concentration is meant for those students who want to develop multiple approaches to making art, rather than focusing on a singular discipline or medium. The contemporary art world is inherently interdisciplinary, flexible, and responsive to new technologies and methods of expression. The Interdisciplinary Studio concentration recognizes this and offers students the opportunity to approach, hone and develop skills across the wide range of related fine arts practices offered in the School of Art and Design. Students who choose the Interdisciplinary Practice concentration develop an array of practical approaches, weaving together experience and skills from courses across our studio areas and faculty expertise. Interdisciplinary courses at the sophomore, junior, and senior level focus on developing practical skills in a variety of material applications. Advanced courses center on building critical, theoretical, and professional competencies and expertise in unique studio practices.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

Students in the BFA Studio Art degree, major in Studio Art, must declare one concentration and students may not declare more than one concentration.

A portfolio review is required for admission to the School of Art and Design.

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Interdisciplinary Practice Concentration

Graduation Requirements

Minimum hours required for graduation: 122 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

Studio Art: New Media, BFASA

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, New Media Concentration

The Studio Art concentration in New Media provides an opportunity for students in the BFASA degree program to pursue sustained study in art forms that include time-based media, performance, digital imaging, and coding-based practices.

New Media courses incorporate established and emerging technologies in the service of art-making that looks to the history of art as well as to contemporary intersections between art, design and community engagement. Students can expect to gain working knowledge in a core set of forms that include digital imaging, video, coding, and interactive technologies, along with an understanding of the conceptual and historical context in which these forms exist. As students advance, they will build on this core knowledge by developing and following individual interests in advanced courses that include both technical instruction and topic-focused explorations. Students will be able to take courses across the School of Art & Design and the broader campus to further pursue experiences in other disciplines and areas of inquiry that can contribute to a personal artistic trajectory.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

A portfolio review is required for admission to the School of Art and Design.

4. Students will develop and articulate a self-directed creative practice that synthesizes existing knowledge, personal perspectives, and collaborative opportunities to engage audiences in a variety of social and institutional settings.
5. Students will demonstrate adaptability for varying professional roles across artistic, cultural, and commercial contexts

In addition, each concentration has discipline specific learning outcomes:

New Media Concentration:

1. Students concentrating in New Media are trained in the production and critique of artworks that explore forms and technologies identified as new or emerging. Students concentrating in New Media create work for the new disciplinary mechanisms that have arisen to evaluate and promote artwork in digital media, but also for traditional institutional mechanisms of art distribution and art critique. As in Contemporary Art, work in New Media may take the form of performance, sound and radio broadcast, gallery exhibition, curation, public art, cinema and video, a networked event, publication, or even scientific research.
2. Students concentrating in New Media are able to analyze and synthesize relevant aspects of human interaction in various contexts (physical, cognitive, cultural, social, political, and economic) and with respect to technologically- mediated communication, objects, and environments. Junior and Senior years see students working with critics/professors across the School to develop a portfolio of works in time-based, interactive, physical, networked or performative media. In the process of generating a body of work around a subject and form of their choice, students receive instruction in technical execution, formal composition, and theoretical framing.

Studio Art: Painting, BFASA

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Painting Concentration

Students in the BFASA who choose the concentration in Painting pursue a course of study that begins with rigorous instruction in traditional drawing and painting materials, methods, techniques, and concepts, and proceeds to encourage a diversity of experimental and multi-disciplinary approaches to painting as a field with a complex and culturally influential history. Students are guided in the understanding of mark-making, color theory, composition, pictorial analysis, and visual perception as they develop their individual interests. At the advanced levels, students may choose to focus on Painting as a distinct genre with an important place in contemporary art, or to explore the expanding set of drawing- and painting-related practices, such as comix and graphic novels, character development, and 2D public and community-based art, among other topics, both established and developing. Specialized courses taught by Painting faculty, as well as electives across the School of Art and Design and across campus, permit students to enrich their educational experiences, seek out knowledge and expertise in a vast variety of fields, and develop their unique artistic identities and vision.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

Students in the BFA Studio Art degree, major in Studio Art, must declare one concentration and students may not declare more than one concentration.

A portfolio review is required for admission to the School of Art and Design.

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page (p. 2).

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Painting Concentration

BFASA Studio Art:

Upon completion of BFASA curriculum:

1. Students will apply basic principles of multi-dimensional and multi-sensory communication across diverse mediums to achieve a desired aesthetic in their creative work.
2. Students will experiment with and critically analyze the expressive possibilities of various media and conceptual strategies, demonstrating engagement with emerging technologies and investigation of broader social questions and challenges.
3. Students will implement concepts of visual rhetoric and meaning making in the development of artworks that acknowledge and demonstrate empathy toward diverse social histories and lived experiences.
4. Students will develop and articulate a self-directed creative practice that synthesizes existing knowledge, personal perspectives, and collaborative opportunities to engage audiences in a variety of social and institutional settings.
5. Students will demonstrate adaptability for varying professional roles across artistic, cultural, and commercial contexts.

In addition, each concentration has discipline specific learning outcomes:

Painting Concentration:

1. Students concentrating in Painting attain a functional knowledge of the traditions, conventions, and evolutions of the discipline as related to issues of representation, illusion, and meaning.
2. Students concentrating in Painting understand and utilize the diverse conceptual modes available to the painter. This may deal with direct observational painting strategies or with alternative approaches to the making of traditional or innovative two- and, at times, three-dimensional images.

Studio Art: Photography, BFASA

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Photography Concentration

Students in the BFASA who choose a Photography concentration will focus on creating works of art that use photographic imagery. Faculty in the Photography program are committed to continually redefining fine art photography in an expansive and openly creative way. The ability to understand and employ photography's unique narrative potential is emphasized alongside technical considerations. Our classes provide a balance of practice and theory, which assures the understanding and appreciation of both the interdependence and integration of creativity, production, and research.

Our photography faculty has international exhibition records and work in numerous museum and private collections. Their photographs, installations, books, films, and videos have won critical acclaim in the form of national reviews and grants ranging from the National Endowment for the Arts to the Illinois Arts Council. Faculty members have lectured on their work throughout the United States and abroad.

Collectively the faculty has a wide range of skills, and they use them to teach fine black and white printing, studio lighting, color photography, digital photography, video, installation art, the history of photography, and critical theory. Graduates of our program apply their knowledge in a variety of ways, as fine artists, commercial photographers, designers, gallery and museum professionals, or any field that requires visual literacy and creative thinking.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

Students in the BFA Studio Art degree, major in Studio Art, must declare one concentration and students may not declare more than one concentration.

A portfolio review is required for admission to the School of Art and Design.

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Photography Concentration

Graduation Requirements

Minimum hours required for graduation: 122 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in Art and Design.

Studio Art: Printmaking, BFASA

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Printmaking Concentration

The concentration in Printmaking offers students in the BFASA the opportunity to study a wide range of traditional, photographic, and digital printmaking methods that engage with contemporary art and design fields. Courses provide instruction in screenprint, letterpress, comics and zines, relief printing, intaglio, lithography, and other rotating special topics.

Instruction begins with a focus on mark-making, color theory, composition, and the unique role of the printed image in visual culture, from its invention to present-day. At every level, students are challenged to develop critical thinking skills, visual and cultural literacy, and a familiarity with current art theory and practice. At the intermediate and advanced levels, students are introduced to the laser cutter, CNC router, and Risograph printer as a means to incorporate digital typography and design elements into their studio work alongside traditional drawing practices.

Interdisciplinarity is encouraged as students hone their conceptual interests and develop a personal body of creative work. Students may focus in contemporary fine art printmaking, or related areas within the expanded field of print media such as poster design, print as sculpture/installation/performance, book arts, comics, community engagement, and more. Individual research interests are supported by access to elective courses across campus. Ongoing instruction, and the option to participate in national and regional printmaking conferences and events through the Noble Print Club, teach students the professional skills and habits to establish a unique, self-directed studio practice.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

Students majoring in this degree program must complete the First Year Curriculum requirements before beginning other major requirements.

Students in the BFA Studio Art degree, major in Studio Art, must declare one concentration and students may not declare more than one concentration.

A portfolio review is required for admission to the School of Art and Design.

Studio Art: Sculpture, BFASA

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Sculpture Concentration

Students in the BFASA who choose the concentration in Sculpture will focus on methods and concepts related to three-dimensional art, form-making, and expanded spatial practices. Contemporary sculpture practice is informed by multiple modes of ideation, making and fabrication, and utilizes a dynamic and ever-expanding set of tools, materials, techniques and approaches. The outcomes are endlessly varied, from the most traditional to the wildly experimental, in scope, scale and content. The Sculpture concentration allows students to explore the multitude of art making options available, by encouraging individual growth, collaborative engagement, and collective accomplishments.

Courses in sculpture introduce students to a variety of materials and fabrication methods with explorations in three dimensional form, concepts and ideation, including wood fabrication, mold making and casting, and metal fabrication and welding. Advanced courses allow for more independent practice, and encourage a more singular approach to the use of materials and methodologies, ensuring students develop their own unique path via elective courses in ceramics, fiber and soft sculpture, experimental fashion, time-based practices, video, photography, and special topic courses and seminars. We offer experiences in a variety of classrooms and shops designed to support an expansive material practice, including well-equipped wood-shops, ceramic studios, plaster and casting rooms, welding and cold metal fabrication, small-scale foundry, sewing and fiber, and digital output technologies including 3D printers, water jet and laser cutting, CNC machining, vacuum-forming, digital imaging, and sound and video editing.

Students in the School of Art and Design must complete the Campus General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Art and Design courses will also apply toward the General Education requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/).

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page (p. 2).

for the degree of Bachelor of Fine Arts in Studio Art in Studio Art, Sculpture Concentration

BFASA Studio Art:

Upon completion of BFASA curriculum:

1. Students will apply basic principles of multi-dimensional and multi-sensory communication across diverse mediums to achieve a desired aesthetic in their creative work.
2. Students will experiment with and critically analyze the expressive possibilities of various media and conceptual strategies, demonstrating engagement with emerging technologies and investigation of broader social questions and challenges.
3. Students will implement concepts of visual rhetoric and meaning making in the development of artworks that acknowledge and demonstrate empathy toward diverse social histories and lived experiences.
4. Students will develop and articulate a self-directed creative practice that synthesizes existing knowledge, personal perspectives, and collaborative opportunities to engage audiences in a variety of social and institutional settings.
5. Students will demonstrate adaptability for varying professional roles across artistic, cultural, and commercial contexts.

In addition, each concentration has discipline specific learning outcomes:

Sculpture Concentration:

1. Students concentrating in Sculpture have knowledge and skills in the use of basic tools, techniques, and processes to work from concept to finished product, leading to preparation of three-dimensional objects and installations using the broadest possible range of techniques and concepts.
2. Students concentrating in Sculpture will demonstrate mastery in one or more sculptural media, processes and presentational strategies.

Supply Chain Management, BS

for the degree of Bachelor of Science in Supply Chain Management

The Supply Chain Management student studies the flow of finances, information and materials starting from supply chain planning to the sourcing of raw material, parts and components through the manufacturing or processing sector to the marketing and delivery of end products for industrial customers or individual consumers. The Supply Chain Management Major is available only to qualified students based upon application. For more information, contact the Director of the Supply Chain Management Program, Mili Mehrotra, milim@illinois.edu.

for the degree of Bachelor of Science in Supply Chain Management

Core Curriculum

Normally, students must register for no fewer than 12 hours or more than 18 hours in each semester. Students should take mathematics, economics, and accountancy courses in the semesters indicated in the sample schedule of courses. The computer science course must be taken during the first year. The computer science requirement no longer allows ACE 161 as an equivalent course.

Up to 4 hours of Kinesiology activity courses, numbered 100-110 may be counted toward the 124 hours for the degree. The same section of a course may not be repeated for credit. Credit is limited to a maximum of 12 credit hours for 199 courses. Students may receive foreign language credit for courses only 2 levels below highest level taken in high school. For example: 4 years of high school French-no credit below FR 102.

Credit toward the 124 degree hours is not given for MATH 101. Once the math requirement is completed, lower level math courses cannot be taken for credit.

Any course used to fill a specific degree requirement may not be taken on the credit-no credit grade option. Only free electives may be taken on the credit-no credit option. All finance and accountancy courses must be taken for a grade. It is recommended that all courses taken in the business administration area be taken for a grade.

Graduation Requirements

Minimum hours required for graduation: 124 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Science in Supply Chain Management

1. Disciplinary Competence: Gain an understanding of the structure of supply chains, the fundamental principles of managing them, and their interactions with other business functions.
2. Analytical & Critical Thinking Skills – Apply quantitative and qualitative methods to analyze, model, and evaluate supply chain components, critically assess real-world challenges, and develop data-driven, practical solutions that enhance decision-making and efficiency
3. Group Work: Demonstrate the ability to collaborate as an effective team member in varying roles in diverse groups/environments.
4. Communication: Develop the ability to effectively and professionally tell a persuasive story through oral and written presentations.

Sustainable Design, BS

for the Bachelor of Science in Sustainable Design

The major in Sustainable Design offers an innovative, interdisciplinary course of study in design, with a focus on building sustainable communities through the intentional design of environmentally sensitive products, buildings, neighborhoods, landscapes and cities.

The program grounds concrete skills development with opportunities to move between disciplinary barriers, allowing students to prepare for the future in a sustainable world where ideas from many disciplines will be necessary to solve the complex problems of pollution reduction, energy conservation, and biodiversity protection in equitable, healthy, and thriving places.

Required introductory coursework provide a solid grounding in design thinking and skills, coupled with a broad understanding of the role of design in achieving sustainable results across scales. Students will apply their skills and knowledge in a required senior capstone project.

With expertise across disciplines, students in this program will be prepared to work in the public and private sector, or continue preparation in a variety of professional graduate programs such as Architecture, Industrial Design, Innovation Design, Landscape Architecture, Urban Design and Urban Planning.

for the Bachelor of Science in Sustainable Design

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the Bachelor of Science in Sustainable Design

Upon successful completion of a degree in Sustainable Design, students will:

1. Have a deep level of understanding of the fundamentals of sustainability and their functional links to the built environment.
2. Have a deep level of understanding of the fundamentals of design thinking and practice.
3. Be proficient in applying basic principles of visual and material communication, including sketching, drafting, model-making, 2D and 3D design software and geographic information systems.
4. Be able to combine design theory and practice with sustainability principles to address environmental issues at the product, building, neighborhood, city, landscape and global levels.
5. Be comfortable working in multidisciplinary teams to solve complex design problems.

Sustainability in Food & Environmental Systems, BS

for the degree of Bachelor of Science Major in Sustainability in Food & Environmental Systems

Students pursuing a degree in the Sustainability in Food and Environmental Systems (SFES) program will analyze, investigate, and propose solutions for issues of sustainability, security, and justice within food and environmental systems. Using an interdisciplinary approach, students will examine the science and practice of food production systems, evaluate policies and laws associated with food security across urban, environmental, economic, social, and health contexts, and analyze the ways resources and influence impact food production and environmental sustainability.

Students in this program can customize their experience by delving deeper into a specialization area of interest, including (but not limited to): policy and law, climate change and society, food production systems, or resources and influence. Within each of these specialization areas, students will examine behaviors and decision-making practices of people, communities, and the economy. Graduates of this program will be prepared for jobs that require skills in critical thinking, problem-solving, scientific literacy, communication, and leadership.

for the degree of Bachelor of Science Major in Sustainability in Food & Environmental Systems

---

A minimum of 126 credit hours are required for graduation, including General Education Requirements and the SFES Core Curriculum.

Graduation Requirements
Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

ACES 199	Undergraduate Open Seminar	3
Specializations		**30**
Students are encouraged to complete a minimum of 30 hours of coursework within one or more of the specializations. Students are not required to select a specialization; rather, students have the flexibility to customize their experience by choosing courses within or across specializations to best meet their personal interests and career needs.		
Policy and Law		**18**
ACE 203	Introduction to Public Policy and Law	3
ACE 306	Food Law	3
ACE 403	Agricultural Law	3 to 4
ACE 406	Environmental Law	3 or 4
NRES 325	Natural Resource Policy Mgmt	3
NRES 434	Environment, Policy, and Conflict	3
Climate Change and Society		**24**
ABE 232	Context in International Interventions	3

ACE 210	Environmental Economics & Policy	3
CPSC 431	Plants and Global Change	3
HDFS 220	Families in Global Perspective	3
LEAD 340	Leadership Ethics & Society: Addressing Contemporary Challenges	3
NRES 105	Climate Change Impacts on Ecological Systems	3
NRES 224	Environmental and Climate Justice	3
NRES 287	Environment and Society	3
Food Production Systems		**53**
ABE 152	Water in the Global Environment	3
ANSC 100	Intro to Animal Sciences	4
ANSC 101	Contemporary Animal Issues	3
ANSC 110	Animal Exploration: A Global Perspective	3
ANSC 205	World Animal Resources	3
ANSC 251	Epidemics and Infectious Diseases	3
ANSC 255	Animal Ethics	3
ANSC 305	Human Animal Interactions	3
CPSC 116	The Global Food Production Web	3
CPSC 416	Native Plants, Pollinators, & Food Ecosystems	3
ETMA 430	Project Management	2
FSHN 175	Science of Fermented Foods	3
FSHN 231	Food Systems: Cacao & Chocolate	2
FSHN 232	Science of Food Preparation	3
FSHN 465	Principles of Food Technology	3
HORT 205	Local Food Systems	3
HORT 435	Urban Food Production	3
PLPA 200	Plants, Pathogens, and People	3
Resources and Influence		**38**
ACE 251	The World Food Economy	3
ACE 310	Natural Resource Economics	3
ACE 335	Food Marketing and Behavior	3
ACE 476	Behavioral Economics and Financial Decision Making	3 or 4
AGCM 330	Environmental Communications	3
CPSC 444	Introduction to Spatial Analytics	4
ETMA 311	Humanity in the Food Web	3
FSHN 193	Edible Entrepreneurialism - Feeding Ideas for the Future	3
FSHN 320	Food Security: Service Learning in the Community	3
FSHN 425	Corporate Food Marketing	3
HDFS 330	Statistical Reasoning for Everyday Life	3
NRES 472	Environmental Psychology	4

for the degree of Bachelor of Science Major in Sustainability in Food & Environmental Systems

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

First Year

First Semester	Hours	Second Semester	Hours
ACE 100	4	ACES 102	3
ACES 101	2	Statistics Option	3
FSHN 101 or 120	3	NRES 100 or 102	3

Total Hours 126

for the degree of Bachelor of Science Major in Sustainability in Food & Environmental Systems

Students in this program will:

1. Examine the purposes, functions, and operations of food production systems across local, national, and global societies.
2. Investigate policies and laws of food security, sustainability, and justice.
3. Describe the impacts of resources and influence on food and environmental sustainability, and design creative solutions for these critical real-world issues.
4. Apply theories of communication and leadership within a team to analyze problems, collaborate with team members, prioritize and delegate tasks, establish objectives, and propose a solution for an identified challenge related to sustainability in food and environmental systems.
5. Analyze the scientific, social, political, and economic impacts of climate change within and across diverse cultural perspectives and identities.

The interdisciplinary nature of this degree, in combination with the variety of focus areas by which students can pursue to customize their experience, enables students to strive toward and attain the program's learning objectives throughout their academic experience. The SFES required core curriculum courses are pre-requisites for many of the 300- and 400-level courses within the specialization areas of Policy and Law, Climate Change and Society, Food Production Systems, and Resource and Influence. Formative and summative assessments, designed by academic experts within each specialization path across ACES (e.g., ABE, ACE, ALEC, ANSC, CPSC, ETMA, FSHN, HDFS, HORT, NRES) will ensure students achieve the intended objectives. To further assess student achievement for the program, each graduate will be asked to complete an exit survey. The results of the survey will evaluate students' cognitive, affective, and behavioral aptitudes toward the learning objectives and the intent of the degree program.

Systems Engineering and Design, BS

for the degree of Bachelor of Science in Systems Engineering and Design (formerly General Engineering)

Systems Engineering and Design (SED) is a comprehensive, interdisciplinary program emphasizing interactions between parts of a whole. It brings together basic sciences, engineering analysis, and engineering design. The curriculum offers flexibility through a Secondary Field Option, while providing a broad background in engineering as a whole and decision-making that supports overall design. Systems Engineers understand how to coordinate interacting parts of a whole and to evaluate engineering within economic and physical constraints.

Through the Secondary Field Option electives, students can tailor their studies to one's interests and career goals in both technical

and nontechnical areas. Secondary field options are of two types: pre-approved and customized. Pre-approved secondary fields have designated titles and a specified list of courses, from which several may be selected. Approval for the substitution of a course for one on the specified list may be requested via a petition form submitted to the department. Customized secondary fields may be created to achieve goals in areas not provided by pre-approved fields. To do this, a suitable title and all the courses must be petitioned for acceptance by the department. Petition approval is based on the merit of the secondary field and the coherence of the courses within it relative to the student's goals.

Pursuit of campus minors, dual degrees, and James Scholar contracts may be integrated with customized secondary field options. Courses taken may be applied to minors, dual degrees, or contracts as well as secondary field options.

Pre-approved Secondary Fields

- Automotive Engineering
- Bioengineering
- Business Systems Integration and Consulting
- Civil Engineering Structures
- Communications and Computer Systems
- Computer Science
- Construction
- Control Systems
- Digital Prototyping
- Engineering Administration
- Engineering Marketing
- Environmental Quality
- Internet of Things (IOT)
- Manufacturing Engineering
- Nondestructive Testing and Evaluation
- Operations Research
- Quality Control
- Rehabilitation Engineering
- Robotics
- Theoretical and Applied Mechanics

Customized Secondary Fields

Customized secondary fields differ from pre-approved ones in that no sets of specified courses to choose from have been predefined. For all customized secondary field options, a course list must be constructed and submitted for approval by the department.

The following list contains examples of over fifty titles of customized secondary field options which have been approved. The complete list may be found at the department's secondary field website (https://ise.illinois.edu/undergraduate/systems-engineering-and-design-degree/secondary-field-options/). Additional titles beyond those listed may be proposed.

- A foreign language (several)
- An engineering discipline (several)
- Audio Engineering
- Economics
- Entrepreneurship
- Finance
- Fluid Dynamics
- International Business
- Mathematics
- Pre-Law
- Pre-Med
- Renewable Energy

Design experience and project management are emphasized and integrated across the core with a focus on establishing critical problem-solving skills applied across disciplines, strong communication skills, and the ability to work effectively and get results in a team environment.

The capstone experience for Systems Engineering and Design undergraduates is the Senior Project Course. Students work collaboratively with industry and a team of faculty members on a real-world problem during their final semester. The results are documented in a final written report and a formal presentation at the end of the semester to the company so that the student recommendations may be implemented.

Current Program Educational Objectives

for the degree of Bachelor of Science in Systems Engineering and Design (formerly General Engineering)

Graduation Requirements

Minimum hours required for graduation: 128 hours.

Minimum Overall GPA: 2.0

Minimum Technical GPA (https://go.grainger.illinois.edu/TechnicalGPA/): 2.0

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by SE 494		
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6

fulfilled by CHEM 102, PHYS 211, PHYS 212	
Social & Behavioral Sciences (6 hours)	6
fulfilled by ECON 102 or ECON 103 and any other course approved as Social & Behavioral Sciences	
Cultural Studies: Non-Western Cultures (1 course)	3
Cultural Studies: US Minority Cultures (1 course)	3
Cultural Studies: Western/Comparative Cultures (1 course)	3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)	6-10
fulfilled by MATH 220 or MATH 221; and MATH 231, MATH 241, MATH 285, PHYS 211, PHYS 212; and CS 101 or CS 124	
Language Requirement (Completion of the third semester or equivalent of a language other than English is required)	0-15

Major Requirements

Orientation and Professional Development

Code	Title	Hours
ENG 100	Grainger Engineering Orientation Seminar (External transfer students take ENG 300.)	1
SE 100	Introduction to ISE	1
SE 290	ISE Undergraduate Seminar	0
Total Hours		**2**

Introductory Economics Elective

Code	Title	Hours
ECON 102	Microeconomic Principles	3
or ECON 103	Macroeconomic Principles	
Total Hours		**3**

Foundational Mathematics and Science

Code	Title	Hours
CHEM 102	General Chemistry I	3
CHEM 103	General Chemistry Lab I	1
MATH 221	Calculus I (MATH 220 is appropriate for students with no background in calculus. 4 of 5 credit hours count towards degree.)	4
MATH 231	Calculus II	3
MATH 241	Calculus III	4
MATH 257	Linear Algebra with Computational Applications	3
MATH 285	Intro Differential Equations	3
PHYS 211	University Physics: Mechanics	4
PHYS 212	University Physics: Elec & Mag	4
PHYS 213	Univ Physics: Thermal Physics	2
Total Hours		**31**

Systems Engineering and Design Technical Core

Code	Title	Hours
CS 101	Intro Computing: Engrg & Sci (CS 124 may be substituted.)	3
ECE 110	Introduction to Electronics	3
ECE 211	Analog Circuits & Systems	2
IE 300	Analysis of Data	3
IE 310	Deterministic Models in Optimization	3
SE 101	Engineering Graphics & Design	3
SE 261	Business Side of Engineering	2
SE 310	Design of Structures and Mechanisms	3
SE 311	Engineering Design Analysis	3
SE 312	Instrumentation and Test Lab	1
SE 320	Control Systems	4
SE 424	State Space Design for Control	3
SE 494	Senior Engineering Project I	3
SE 495	Senior Engineering Project II	2
TAM 211	Statics	3
TAM 212	Introductory Dynamics	3
TAM 251	Introductory Solid Mechanics	3
TAM 335	Introductory Fluid Mechanics	4
Total Hours		**51**

Secondary Field Option Electives

Code	Title	Hours
Students must select one Secondary Field Option from the list below or they may petition to create their own Secondary Field Option (SFO). Courses from these lists may only be used to fulfill one curricular requirement.		**12**
Automotive Engineering		
Dynamics/Controls Focus - complete at least 1 course from this list:		
ECE 470	Introduction to Robotics (same as AE 482 and ME 445)	4
ECE 486	Control Systems	4
ME 460	Industrial Control Systems	4
TAM 412	Intermediate Dynamics	4
TAM 416	Introduction to Nonlinear Dynamics and Vibrations	4
Automotive Power Systems Focus - complete at least 1 course from this list:		
ECE 431	Electric Machinery	4
ECE 464	Power Electronics	3
ME 400	Energy Conversion Systems	3
ME 403	Internal Combustion Engines	3
Other Elective Options - complete remaining courses from this list:		
CS 173	Discrete Structures	3
CS 440	Artificial Intelligence	3
CS 446	Machine Learning	3
ME 320	Heat Transfer	4
ME 360	Signal Processing	3.5
ME 461	Computer Cntrl of Mech Systems	3
SE 400	Engineering Law	3
SE 422	Robot Dynamics and Control	4
SE 497	Independent Study (May be taken for up to 3 credit hours, based on automotive Engineering project approved by SFO faculty mentor.)	1-4
Autonomous Systems and Robotics		

CS 173	Discrete Structures	3
CS 225	Data Structures	4
CS 440	Artificial Intelligence	3
CS 446	Machine Learning	3
ECE 470	Introduction to Robotics	4
ECE 486	Control Systems	4
ECE 490	Introduction to Optimization	3
ME 270	Design for Manufacturability	3
ME 461	Computer Cntrl of Mech Systems	3
SE 400	Engineering Law	3
SE 411	Reliability Engineering	3
SE 420	Digital Control Systems	4
SE 422	Robot Dynamics and Control	4
SE 423	Mechatronics	3
Bioengineering		
BIOE 120	Introduction to Bioengineering	1
BIOE 414	Biomedical Instrumentation (same as ECE 414)	3
BIOE 415	Biomedical Instrumentation Lab (same as ECE 415)	2
BIOE 498	Special Topics	3
BIOP 401	Introduction to Biophysics	3
CHEM 232	Elementary Organic Chemistry I	3 or 4
CHEM 233	Elementary Organic Chem Lab I	2
HK 353	Biomechanics of Human Movement	3
IE 340	Human Factors (same as PSYC 358)	4
MCB 150	Molecular & Cellular Basis of Life (recommended only if a prerequisite to another listed course.)	4
MCB 250	Molecular Genetics (recommended only if a prerequisite to another listed course.)	3
MCB 251	Exp Techniqs in Molecular Biol (recommended only if a prerequisite to another listed course.)	2
MCB 401	Cellular Physiology	3
MCB 402	Sys & Integrative Physiology	3
MCB 450	Introductory Biochemistry	3
SE 400	Engineering Law	3
Business Systems Integration & Consulting		
Core Requirement:		
SE 400	Engineering Law	3
Group I Requirement - complete at least 1 course from this list:		
BADM 352	Database Design and Management	3
BADM 353	Info Sys Analysis and Design	3
IE 405	Computing for ISE	3
Group II - select remaining courses from this list. Of these courses, only 1 selected may be at the 100 or 200 level.		
ACCY 200	Fundamentals of Accounting (A basic accounting course is highly recommended.)	3
ACCY 201	Accounting and Accountancy I (A basic accounting course is highly recommended.)	3
ACCY 202	Accounting and Accountancy II (A basic accounting course is highly recommended.)	3
ADV 150	Introduction to Advertising	3
BADM 310	Mgmt and Organizational Beh	3
BADM 311	Leading Individuals and Teams	3
BADM 312	Designing and Managing Orgs	3
BADM 320	Principles of Marketing	3
BADM 445	Small Business Consulting	4
BADM 446	Entrepreneurship: New Venture Creation	4
BTW 250	Principles Bus Comm	3
BTW 261	Principles Tech Comm	3
FIN 221	Corporate Finance	3
FIN 300	Financial Markets	3
IE 420	Financial Engineering	3
Civil Engineering Structures		
CEE 380	Geotechnical Engineering	3
CEE 460	Steel Structures I	3
CEE 461	Reinforced Concrete I	3
CEE 462	Steel Structures II	3
CEE 463	Reinforced Concrete II	3
CEE 465	Design of Structural Systems	3
SE 400	Engineering Law	3
Computer Science		
Core Courses:		
CS 173	Discrete Structures	3
CS 225	Data Structures	4
Elective Options - complete 2 of the following courses:		
CS 410	Text Information Systems	3
CS 411	Database Systems	3 or 4
CS 425	Distributed Systems	3 or 4
CS 438	Communication Networks	3 or 4
All 200-, 300-, and 400-level CS courses excluding CS 210, CS 211, CS 397, CS 398, and CS seminar and senior project courses.		
SE 400	Engineering Law	3
Construction		
CEE 300	Behavior of Materials (Credit will not be given for CEE 300, ME 330 and MSE 280; select only 1 of these courses.)	4
CEE 310	Transportation Engineering	3
CEE 320	Construction Engineering	3
CEE 380	Geotechnical Engineering	3
CEE 420	Construction Productivity	3
CEE 421	Construction Planning	3
CEE 422	Construction Cost Analysis	3
CEE 460	Steel Structures I	3
CEE 461	Reinforced Concrete I	3
CEE 465	Design of Structural Systems	3
ME 330	Engineering Materials (Credit will not be given for CEE 300, ME 330 and MSE 280; select only 1 of these courses.)	4
SE 400	Engineering Law	3
Control Systems		

CS 173	Discrete Structures	3
ECE 470	Introduction to Robotics (same as AE 482 and ME 445)	4
ECE 486	Control Systems	4
ECE 490	Introduction to Optimization	3
IE 410	Advanced Topics in Stochastic Processes & Applications	3
MATH 444	Elementary Real Analysis	3
MATH 461	Probability Theory	3
MATH 464	Statistics and Probability II	3
ME 360	Signal Processing	3.5
ME 460	Industrial Control Systems	4
ME 461	Computer Cntrl of Mech Systems	3
SE 400	Engineering Law	3
SE 420	Digital Control Systems	4
SE 422	Robot Dynamics and Control	4
SE 423	Mechatronics	3
Digital Prototyping		
ME 270	Design for Manufacturability	3
ME 451	Computer-Aided Mfg Systems	3
ME 452	Num Control of Mfg Processes	3
ME 471	Finite Element Analysis (same as AE 420 and CSE 451)	3
SE 400	Engineering Law	3
SE 402	Comp-Aided Product Realization	3
SE 410	Component Design (This course cannot count as an SFO elective and an SED Design Elective.)	3
SE 413	Engineering Design Optimization (This course cannot count as an SFO elective and an SED Design Elective.)	3
SE 423	Mechatronics (This course cannot count as an SFO elective and an SED Design Elective.)	3
TAM 470	Computational Mechanics	3
Engineering Administration		
Core Requirement:		
SE 400	Engineering Law	3
Elective Options - select remaining courses from this list. Of these courses, only 1 selected may be at the 100 or 200 level.		
ACCY 200	Fundamentals of Accounting	3
ACCY 201	Accounting and Accountancy I	3

Technical Electives

Code	Title	Hours
Design elective selected from the departmentally approved list of Design Electives below:		**3**
SE 410	Component Design	3
SE 420	Digital Control Systems	4
SE 423	Mechatronics	3
SE 413	Engineering Design Optimization	3 or 4
Engineering science elective selected from the departmentally approved list of Engineering Science Electives below:		**3**
ME 200	Thermodynamics	3
MSE 280	Engineering Materials	3

Free Electives

Code	Title	Hours
Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree. (https://go.grainger.illinois.edu/FreeElectives/)		10
Total Hours of Curriculum to Graduate		**128**

for the degree of Bachelor of Science in Systems Engineering and Design (formerly General Engineering)

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence. The curriculum sequence can also be viewed via dynamic and static curricular maps (https://grainger.illinois.edu/academics/undergraduate/majors-and-minors/systems-engineering-map/), which include prerequisite sequencing.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements. One of the SBS courses must be an introductory economics course (ECON 102 or ECON 103). SE 494 and SE 495 will satisfy a core course requirement and the Campus General Education Advanced Composition requirement.

Free Electives: Additional course work, subject to the Grainger College of Engineering restrictions to Free Electives, so that there are at least 128 credit hours earned toward the degree.

Total Hours 128

for the degree of Bachelor of Science in Systems Engineering and Design (formerly General Engineering)

Student learning outcomes are based on learning outcomes in line with the ABET accreditation process.

Systems Engineering and Design graduates will have:

1. An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. An ability to communicate effectively with a range of audiences.
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts.
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives.

6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions.
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Teaching of French, BA

for the degree of Bachelor of Arts in the Teaching of French

This major prepares future French language educators with a strong foundation in second language acquisition, linguistics, pedagogy, and cultural analysis. Students develop the theoretical knowledge and practical skills necessary to design effective, inclusive instruction that supports learner development across the interpretive, interpersonal, and presentational modes of communication. Coursework emphasizes the application of second language acquisition theories and methodologies to the creation of instructional materials and learning activities that foster proficiency and engagement for diverse learners.

Students also learn to promote higher order thinking through culturally and historically informed analysis of literary and non-literary texts, including periodicals and contemporary media. Through focused study of French linguistics and phonetics, majors gain the ability to model accurate and authentic pronunciation in instructional settings. In addition, the program develops students' expertise in assessment design, preparing them to use multiple measures to monitor learner progress, support learner efficacy, and inform instructional decision-making. Graduates of the major are well prepared for professional practice as reflective, knowledgeable, and effective French language educators.

for the degree of Bachelor of Arts in the Teaching of French

In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain a cumulative grade-point average of 2.5 (A= 4.0).

Departmental distinction: A student must have a minimum 3.5 cumulative grade point average, including a 'Satisfactory' in the teaching practicum; complete two additional advanced-level courses in French or the teaching minor; complete FR 492, and provide two letters of recommendation as evidence of exceptional teaching potential. Consult the teacher education adviser for details.

General education: Consult the Curricula Preparatory to Teaching Foreign Languages (p. 364).

Minimum required major and supporting course work: Normally equates to 37 hours of French courses and 29 hours of professional education courses. The required coursework could be 16 additional hours, respectively, if the student does not already have the equivalent of French 101-102-133-134. NOTE: FR 299 is strongly recommended.

Minimum hours required for graduation: 120 hours.

Code	Title	Hours
FR 207	Writing and Grammar Workshop	3
FR 211	Introduction to Literary Studies	3

Teaching of German, BA

for the degree of Bachelor of Arts in the Teaching of German

The BA in the Teaching of German provides a multidisciplinary approach to the study of German and prepares students to become licensed teachers of German in the State of Illinois.

Undergraduate degree programs in Germanic Languages & Literatures:

- Germanic Studies, BALAS (p. 406)
- Teaching of German, BA (p. 828)
- Scandinavian Studies Concentration within German Studies BALAS (p. 412)

for the degree of Bachelor of Arts in the Teaching of German

In order to remain in good standing in this program and be recommended for teacher licensure, candidates are required to maintain a cumulative grade-point average of 2.5 (A= 4.0).

Departmental distinction: Students should consult their advisers by the second semester of the junior year for information pertaining to seminar honors work and honors awards in the department.

The total of 47 hours may be reduced by as much as 16 hours through prerequisite credit for work equivalent to GER 101-GER 104 taken in secondary school.

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum required major and supporting course work: Normally equates to 80 hours. Twelve hours of 300- and 400-level in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Teaching of Spanish, BA

for the degree of Bachelor of Arts in the Teaching of Spanish

The Bachelor of Arts in the Teaching of Spanish (BAT) is specifically designed to prepare our students to become pK-12 teachers of Spanish. In fact, the Spanish BAT program has a 100% placement rate, with each alumnus of the program leading their own classroom after graduation and inspiring the next generation of global citizens. The Spanish BAT program is jointly administered by the Department of Spanish & Portuguese and the World Language Teacher Education (WLTE) program.

Students interested in pursuing teaching licensure must first be admitted to the Spanish BA and complete a secondary application to the Spanish BAT in their third year of study. Because the Spanish BAT combines coursework in Spanish with the requirements of the WLTE program, it is important that students discuss their interest with the Spanish advisor during their freshman and sophomore years. With the advisor, students will create a clear timeline for completing their Spanish courses, studying abroad (if possible), and applying to the BAT/WLTE program.

Students who are accepted into the BAT/WLTE program then work with the WLTE director to complete the necessary coursework in language pedagogy, educational policy, educational psychology, and special education. Students must also complete early field experience and the student teaching practicum, in addition to passing the required state licensure exams.

for the degree of Bachelor of Arts in the Teaching of Spanish

Prerequisite to application to the Teaching program: GPA of 2.5 in all Spanish content courses in the major. Contact the Foreign Language Teacher Education Program (https://flte.illinois.edu/) for information.

In order to remain in good standing in this program and be recommended for licensure, candidates are required to maintain a cumulative grade-point average of 2.5 (A=4.0). Illinois teacher licensure rules require candidates to earn a grade of C- or better in all content and professional education coursework. Candidates for licensure in World Languages are required to pass the appropriate language content-area test prior to student teaching, and an oral proficiency test in their content major language prior to licensure. Licensure requirements are subject to change without notice as a result of new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Departmental distinction: To be eligible for departmental distinction, a student must have a minimum grade point average of 3.0, display exceptional teaching ability, and complete an approved project or series of projects. Consult the Spanish departmental advisor for details.

Study Abroad: It is strongly recommended that future teachers of Spanish engage in one or more semesters of study in a Spanish-speaking country. A number of the curricular requirements may be met through the Year Abroad Program or other approved programs; see Study Abroad Programs (https://spanport.illinois.edu/academics/education-abroad/).

Graduation Requirements

Minimum hours required for graduation: 120 hours.

Minimum hours required major and supporting course work: normally equates to 33-36 hours in Teaching Area of Concentration and 33 hours of professional education courses. Twelve hours of 300- and 400-level courses in the major must be taken on this campus.

University Requirements

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§

3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Theatre, BFA

for the Bachelor of Fine Arts Major in Theatre

Students pursuing this major select one of nine concentrations:

- Acting (p. 835)
- Arts & Entertainment Technology (p. 837)
- Costume Design & Technology (p. 840)
- Lighting Design & Technology (p. 842)
- Scenic Design (p. 845)
- Scenic Technology (p. 847)
- Sound Design & Technology (p. 850)
- Stage Management (p. 852)
- Theatre Studies (p. 854)

The curricular concentrations in the Department of Theatre provide extensive preparation for the rigorous demands of a professional career in the theatre and allied arts.

The BFA is an intensive undergraduate professional training curriculum with concentrations in Acting, Costume Design and Technology, Lighting Design and Technology, Scenic Design, Scenic Technology, Sound Design and Technology, Stage Management, and Theatre Studies. The Theatre Studies concentration is intended for students who want to explore the many facets of theatre or plan to pursue advanced training in directing, dramaturgy, playwriting, arts management, social issues theatre, and theatre history and criticism.

As part of the application process, prospective students must complete an interview and participate in auditions or portfolio reviews. Acting applicants should bring a resume/headshot and present 2 contrasting monologues of no more than 2 minutes each for their audition. Applicants who wish to pursue one of the concentrations in Design, Technology, or Management should bring a resume and a portfolio showing examples of their theatrical work, which can include a range of interests and experiences. Applicants who intend to pursue the Theatre Studies Concentration should present a writing portfolio that includes a resume and a short essay on theatre or another short, written creative work.

In the second year of study in the department, BFA Acting students are evaluated for promotion into the advanced studio classes in acting (Junior and Senior years). In addition to successful completion of all classes in their first and second years, acceptance will be based on each student's potential for professional-caliber performance.

As one of the Resident Producing Organizations at the Krannert Center for the Performing Arts, the Department of Theatre produces six or seven fully mounted productions each academic year. The theatres, rehearsal halls and shops of the Krannert Center serve as laboratories for theatre students, who have the opportunity to learn and to work alongside an outstanding staff of resident theatre professionals and visiting artists. In addition, the department sponsors a small experimental theatre space for student-written and student-directed productions.

All theatre majors must successfully complete production crew assignments at the Krannert Center under THEA 100 (Practicum I) and THEA 200 (Practicum II). Students working on Department of Theatre productions in their specific concentration area also take THEA 300 (Practicum III) or THEA 400 (Practicum IV). Design, Technology, and Management concentration students will also receive practicum credit for working on productions in Lyric Theatre, Department of Dance and Events.

for the Bachelor of Fine Arts Major in Theatre

Graduation Requirements

Minimum hours required for graduation: 128 hours.
Twelve hours of 300 and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

Theatre: Acting, BFA

for the Bachelor of Fine Arts Major in Theatre, Acting Concentration

Acting Concentration

The BFA in Acting concentration provides intensive training, emphasizing professional readiness and preparing students for diverse opportunities across stage and screen.

In the first and second years, students are introduced to foundational techniques and ensemble collaboration. Building on this foundation, students in the third and fourth years continue their training in the Illinois Theatre Acting Studio, which includes classes in acting, voice and speech, and movement, along with specialized training in stage combat and dialects.

Students engage in scene work from modern and contemporary plays, musical theatre, Shakespeare, and acting for the camera. Through vocal and physical integration, collaboration, and bold storytelling across various styles and texts, students are encouraged to approach their craft in a healthy, sustainable manner while embracing innovative and daring artistry. From the second year onward, students participate in auditioning for department productions.

Theatre: Arts & Entertainment Technology, BFA

for the Bachelor of Fine Arts in Theatre, Arts & Entertainment Technology Concentration

Level 21 reflects the design, technology and management disciplines in theatre arts. It has seven unique yet inter-related concentrations in: Arts + Entertainment Technology, Costume Design + Technology, Lighting Design + Technology, Scene Design, Scenic Technology, Sound Design + Technology, and Stage Management. Freshman and sophomore students learn the foundations of theatrical production with a focus on acquiring practical skills for application in advanced course work and in theatre productions. Junior and senior students participate in advanced study in their chosen discipline supported by one-on-one faculty mentoring of assigned projects. Students in this area are the designers, technicians, managers, artisans and crew for over a dozen theater, musical theater, dance and opera productions at Krannert Center for the Performing Arts and work on these shows in various roles throughout their entire course of study.

By the end of the program, students will be able to:

1. Analyze, interpret, write critically and creatively, and discuss thoughtfully in the field of theatre, performance and other genres of live entertainment.
2. Understand professional practices in project conception, technical design, construction, equipment specification, programming and show control and run protocols in the performing arts and live entertainment.
3. Synthesize independently acquired knowledge through the successful execution of a capstone project.
4. Demonstrate proficiency and practical application of learned methodologies including the ability to communicate ideas, articulate concepts and project requirements, and execute problem-solving strategies in order to successfully fulfill a skilled technology role in a stage production.
5. Demonstrate necessary skills and knowledge including significant technical mastery to acquire an entry-level skilled technologist position in professional live entertainment.

Twelve hours of 300 and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed

requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

for the Bachelor of Fine Arts Major in Theatre, Costume Design & Technology Concentration

Student Learning Outcomes:

1. Demonstrates a mature, effective ability to analyze, interpret, write critically and creatively, and discuss thoughtfully in the field of theatre and performance.
2. Demonstrates ability to actively engage in the collaborative process in preparation, construction, and performance of works for the stage.
3. Demonstrates practical application of learned methodologies including the ability to communicate ideas, concepts, and requirements in order to successfully fulfill a role related to costume design and technology for a stage production.
4. Demonstrates working knowledge of professional practices across genres of theatre, musical theatre, opera and dance.
5. Demonstrates necessary skills and knowledge to acquire an entry-level position in the field of costume design and technology including significant technical mastery, showing the capacity to produce work and solve problems independently.

Theatre: Lighting Design & Technology, BFA

for the Bachelor of Fine Arts Major in Theatre, Lighting Design & Technology Concentration

Level 21: Design, Technology and Management Concentrations

Level 21 reflects the design, technology and management disciplines in theatre arts. It has seven unique yet inter-related concentrations in: Arts + Entertainment Technology, Costume Design + Technology, Lighting Design + Technology, Scene Design, Scenic Technology, Sound Design + Technology, and Stage Management. Freshman and sophomore students learn the foundations of theatrical production with a focus on acquiring practical skills for application in advanced course work and in theatre productions. Junior and senior students participate in advanced study in their chosen discipline supported by one-on-one faculty mentoring of assigned projects. Students in this area are the designers, technicians, managers, artisans and crew for over a dozen theater, musical theater, dance and opera productions at Krannert Center for the Performing Arts and work on these shows in various roles throughout their entire course of study.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements page *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

Theatre: Sound Design & Technology, BFA

for the Bachelor of Fine Arts Major in Theatre, Sound Design & Technology Concentration

Level 21: Design, Technology and Management Concentrations

Level 21 reflects the design, technology and management disciplines in theatre arts. It has seven unique yet inter-related concentrations in: Arts + Entertainment Technology, Costume Design + Technology, Lighting Design + Technology, Scene Design, Scenic Technology, Sound Design + Technology, and Stage Management. Freshman and sophomore students learn the foundations of theatrical production with a focus on acquiring practical skills for application in advanced course work and in theatre productions. Junior and senior students participate in advanced study in their chosen discipline supported by one-on-one faculty mentoring of assigned projects. Students in this area are the designers, technicians, managers, artisans and crew for over a dozen theater, musical theater, dance and opera productions at Krannert Center for the Performing Arts and work on these shows in various roles throughout their entire course of study.

for the Bachelor of Fine Arts Major in Theatre, Sound Design & Technology Concentration

Graduation Requirements

Minimum hours required for graduation: 128 hours.
Twelve hours of 300 and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Theatre: Theatre Studies, BFA

for the Bachelor of Fine Arts in Theatre, Theatre Studies Concentration

Theatre Studies Program

The theatre studies concentration focuses on the practical applications of theatre and explores theatrical productions as a collaborative art form that is grounded in practice, theory, criticism, history, research and writing. The theatre studies concentration is intended to lay the foundation for students planning to pursue professional careers in the areas of theatre for which advanced training or specialization at the graduate level is normally required. These areas include, but are not limited to: directing, dramaturgy, playwriting, arts management, social issues theatre and theatre history and criticism. Emphasis is given to a comprehensive study of theatre practices of the past, participation in theatre practices of the present and the discovery and development of theatre practices for the future.

for the Bachelor of Fine Arts in Theatre, Theatre Studies Concentration

Graduation Requirements

Minimum hours required for graduation: 128 hours.
Twelve hours of 300 and 400-level courses in the major must be taken on this campus.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

for the Bachelor of Fine Arts in Theatre, Theatre Studies Concentration

Student Learning Outcomes:

1. Demonstrates a mature, effective ability to analyze, interpret, write critically and creatively, and discuss thoughtfully in the field of theatre and performance.
2. Demonstrates ability to actively engage in the collaborative process in preparation, construction, and performance of works for the stage. Demonstrates comprehension of theory and application of practices in areas of emphasis through production related activities.
3. Demonstrates necessary skills and knowledge to acquire an entry-level position in the theatre showing the capacity to work and solve

problems independently and with initiative (demonstrated through participation in a professional internship).
4. Demonstrates practical application of learned methodologies including the ability to communicate ideas, concepts, and outcomes of creative research (demonstrated in public presentation of a senior thesis project).

Urban Studies & Planning, BA

for the degree of Bachelor of Arts in Urban Studies & Planning

Students pursuing this major select one (no more than two) of four concentrations:

- Global Cities (p. 860)
- Policy & Planning (p. 863)
- Social Justice (p. 866)
- Sustainability (p. 868)

The Department of Urban and Regional Planning offers a program leading to the degree of Bachelor of Arts in Urban Studies and Planning. The aim of urban planning is to sustain and enhance the quality of life in cities and regions. Therefore, in addition to technical skills, students also acquire a broad liberal education that leads to an understanding of the natural and social environments, their problems, and their potential for enriching human life. The urban planning degree emphasizes skills in analysis, problem solving, and communication within complex urban and social contexts. As a result, undergraduate planning education leads to diverse professional careers or graduate study in urban planning or related professions, such as law, business, public policy or public administration. Continuation in the program requires the student to maintain a 2.00 grade point average. The degree is professionally accredited by the Planning Accreditation Board.

Concentrations: Admitted students are not admitted directly to a concentration. Students declare their concentration in the first or second year of study. Electing one of the four concentrations is required for graduation. The concentrations are transcriptable. Students may choose two concentrations, if they complete both gateway courses and distinct concentration courses, with no overlap. No more than two concentrations are permitted.

A transfer student must have completed 30 or more semester hours of acceptable undergraduate college work (including introductory courses in microeconomics, statistics, and sociology; a sequence in English composition is desirable) with an earned grade point average of at least 2.0 (A = 4.0). Transfer applicants not meeting these requirements will be considered in special cases.

for the degree of Bachelor of Arts in Urban Studies & Planning

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Arts in Urban Studies & Planning, Policy & Planning Concentration

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Urban Studies & Planning: Social Justice, BA

for the degree of Bachelor of Arts in Urban Studies & Planning, Social Justice Concentration

The Department of Urban and Regional Planning offers a program leading to the degree of Bachelor of Arts in Urban Studies and Planning. The aim of urban planning is to sustain and enhance the quality of life in cities and regions. Therefore, in addition to technical skills, students also acquire a broad liberal education that leads to an understanding of the natural and social environments, their problems, and their potential for enriching human life. The urban planning degree emphasizes skills in analysis, problem solving, and communication within complex urban and social contexts. As a result, undergraduate planning education leads to diverse professional careers or graduate study in urban planning or related professions, such as law, business, public policy or public administration. Continuation in the program requires the student to maintain a 2.00 grade point average. The degree is professionally accredited by the Planning Accreditation Board.

Concentrations: Admitted students are not admitted directly to a concentration. Students declare their concentration in the first or second year of study. Electing one of the four concentrations is required for graduation. The concentrations are transcriptable. Students may choose two concentrations, if they complete both gateway courses and distinct concentration courses, with no overlap. No more than two concentrations are permitted.

A transfer student must have completed 30 or more semester hours of acceptable undergraduate college work (including introductory courses in microeconomics, statistics, and sociology; a sequence in English composition is desirable) with an earned grade point average of at least 2.0 (A = 4.0). Transfer applicants not meeting these requirements will be considered in special cases.

for the degree of Bachelor of Arts in Urban Studies & Planning, Social Justice Concentration

Social Justice Concentration

Graduation Requirements

Minimum hours required for graduation: 120 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Voice, BMUS

for the degree of Bachelor of Music Major in Voice

The Voice Performance degree is designed to develop skilled performers in all areas of vocal techniques. Voice majors learn the appropriate stylistic approaches to the vocal literature of various historical periods and also study Italian, French, and German in order to better master the diction of works performed in these languages. There are opportunities to perform onstage throughout the degree program either in solo performance or in group productions with our Lyric Theatre program.

For Jazz Voice, please visit the BMUS-Jazz Performance pages.

for the degree of Bachelor of Music Major in Voice

Graduation Requirements

Minimum hours required for graduation: 130 hours.

Students who wish to study voice or an instrument for credit are ~~credit are~~ required to satisfy the instrumental or vocal qualifying audition designed for students outside the School of Music.

A minimum of twelve hours of 400-level courses in Music must be taken on the Urbana-Champaign campus.

Students in this curriculum take at least eight semester hours each of Italian, French, and German languages. A student who has not completed at least two years of Italian in high school should take Italian during the first year. Completion of this requirement does not complete the campus general education language requirement.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the degree of Bachelor of Music Major in Voice

Bachelor of Music graduates will:

1. Understand, apply, and integrate foundational concepts of musical study in theory, aural skills, history, composition, improvisation, and keyboard competency, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
5. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
6. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
7. Acquire a basic understanding of technology and professional skills, along with knowledge of specific technological developments within area of specialization.
8. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Aerospace Engineering, BS-MS

for the joint degree of Bachelor of Science in Aerospace Engineering and Master of Science in Aerospace Engineering

The joint B.S.-M.S. program in AE combines two degrees: a B.S. in AE with a M.S. in AE. Current AE students enrolled in The Grainger College of Engineering with junior standing (normally at least 90 credit hours, including those in process, and at least one year of undergraduate coursework remaining) who maintain superior academic performance are eligible to apply for this program. The B.S. degree within the B.S. - M.S. program is accredited by the Engineering Accreditation Commission of ABET (https://www.abet.org) under the same criteria as the traditional 128 hour B.S. degree. The program is designed to broaden a student's knowledge beyond that in the standard four-year curriculum. Students admitted to the program will receive both degrees once all requirements for both the B.S.-M.S. degree have been successfully completed.

Admission

For deadlines and procedures, consult the Aerospace department website (https://aerospace.illinois.edu/). Current Grainger AE students can apply after they complete their junior-level courses, but before they start their senior year. Students with an overall GPA of at least 3.00 may apply for admission to the program. Admission decisions are based on overall academic performance, letters of reference, and statement of purpose. The GRE general test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program in order to remain in the program.
- must maintain a technical GPA of 3.40 through completion of the B.S. component of the program.
- may register for graduate courses and earn graduate hour credits, with approval from their graduate academic advisor, when they have less than 12 credit hours remaining in their B.S. component.
- must earn at least 121 hours of undergraduate credit and satisfy all B.S. requirements of this program to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component students:

- must apply and be officially admitted into the Graduate College.
- are assigned a graduate academic advisor when B.S. courses are completed.
- will be issued letters of admission from the Graduate College and the AE Department, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- must satisfy the graduate student minimum residence requirement, which is 24 graduate credit hours.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.

Withdrawal

Students may withdraw from the program at any time by notifying the AE Undergraduate Programs Office. Students who do not complete all 5-year B.S.-M.S. degree program requirements may request by petition to have graduate hours earned converted to undergraduate hours and applied toward a traditional B.S. in AE degree. Students reverting to a traditional B.S. degree program must complete 128 hours and satisfy all degree requirements. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

for the joint degree of Bachelor of Science in Aerospace Engineering and Master of Science in Aerospace Engineering

Course Requirements

B.S. Component (121 hours)

- Same required courses as the traditional B.S. degree with minimum hours required reduced from 128 to 121.
- The reduction of 7 credit hours includes:
  a. 4 hours in Free Electives in both AE curricula
  b. 3 hours in other non-AE Technical Electives
- Overall GPA of 3.40 must be maintained through completion of B.S. component of the program.
- Students can apply after they complete their junior-level courses, but before they start their senior year.
- Illinois undergraduate student minimum residence requirement must be satisfied.
- If the student withdraws from the MS component they must revert to the traditional BS degree program and satisfy all degree requirements of the BS curriculum.

At the graduate level, requirements are identical for both the M.S. Non-Thesis Track (http://catalog.illinois.edu/graduate/ms-aero-engin/#degreerequirementstext) (32 additional hours of coursework) and the M.S. Thesis Track (http://catalog.illinois.edu/graduate/ms-aero-engin/#degreerequirementstext) (32 additional hours of coursework).

for the joint degree of Bachelor of Science in Aerospace Engineering and Master of Science in Aerospace Engineering

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. Also, students must take 6 hours from the campus General Education Social and Behavioral Sciences list and 6 hours from campus General Education Humanities and the Arts list. Students must complete the campus cultural studies requirement by completing (i) one western/comparative culture(s), (ii) one non-western, and (iii) one U.S. minority culture(s) course from the General Education cultural studies lists. See the corresponding sections on the Degree and General Education Requirements *(p. 2).*

Technical elective credits totaling twelve hours, selected from a departmentally approved list of Technical Electives, satisfying these

distribution requirements: (i) six hours of Aerospace Engineering Technical Electives; (ii) six hours of Aerospace Engineering Technical Electives or Non-Aerospace Engineering Technical Electives.

At least 12 hours must be in 500 level courses, and at least 8 of these 12 hours must be in Aerospace Engineering (may include up to 4 hours of 599 research credit). Breadth requirement coursework may be 500 level coursework and will count toward this requirement. If a breadth requirement counts also as a 500 level course, additional elective courses may be taken.

Agricultural & Consumer Economics, BS and Agricultural & Applied Economics, MAAE

for the degrees of Bachelor of Science in Agricultural & Consumer Economics and Master of Agricultural & Applied Economics in Agricultural & Applied Economics

The MAAE program includes a standalone non-thesis masters degree as well as a combined BS/MAAE option for ACE undergraduates only. Standalone MAAE students must complete 32 hours of coursework including an internship. Combined program students must meet all requirements for their BS degree in ACE and take an additional 26 hours of graduate credit including an internship to earn the MAAE degree. Six hours of upper-level electives will count jointly for both degrees. As a combined program, students will receive both degrees at the completion of both programs.

for the degrees of Bachelor of Science in Agricultural & Consumer Economics and Master of Agricultural & Applied Economics in Agricultural & Applied Economics

BS Program Component

Graduation Requirements

Minimum hours required for graduation: 126 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (§ 3-801) and in the Academic Catalog.

General Education Requirements

Follows the campus General Education (Gen Ed) requirements. Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours

for the degrees of Bachelor of Science in Agricultural & Consumer Economics and Master of Agricultural & Applied Economics in Agricultural & Applied Economics

Bachelor of Science LOAs:

1. ACE students will acquire broad and deep knowledge of Agricultural and Consumer Economics.
2. ACE students will develop a critical and reflective orientation toward global systems (such as natural, environmental, social, cultural, economic, and political) and cultural differences (such as race, indigeneity, gender, class, sexuality, language, and disability).
3. ACE students will develop critical thinking and problem solving skills.
4. ACE students will develop their ability to communicate in a variety of settings.
5. ACE students will build and sustain productive relationships to be effective leaders who can respond to civic and social challenges at local, national, and global levels, creating positive change in their communities.

MAAE LOAs:

1. Develop a knowledge base in, and demonstrate an understanding of how to use, microeconomic concepts to set up and analyze economic problems.
2. Develop mastery of quantitative methods which can be used to analyze and address economic problems.
3. Understand features of agriculture and natural resources (e.g., inherent risk, institutions, unique government policies, and cultural importance of food) that make them unique for applications of economic principles and methods.
4. Gain experience in applying skills developed in the program in a real-world professional setting.
5. Practice highest levels of professional conduct (e.g., in professional activities take responsibility, be accountable, show integrity, have strong ethics, and respect diversity).

Animal Sciences BS-MANSC

for the degree of Bachelor of Science Major in Animal Sciences and Master of Animal Sciences in Animal Science

The joint BS/MANSC program in Animal Sciences integrates a baccalaureate (BS) in Animal Sciences preparation with a non-thesis Master of Animal Sciences (MANSC) preparation. Students enrolled in the BS in Animal Sciences program that have completed a minimum of 60 credit hours of degree requirements and that have a minimum GPA of 3.0 are eligible to apply and be admitted to this program. Students that have a GPA above 2.75 may be admitted on probationary status. The Department of Animal Sciences will support the application to the MANSC program of the students in this joint program that have completed the required 126 credit hours towards a BS in Animal Sciences degree (including a minimum of 40 hours of 300- or 400- level courses) and that have a minimum GPA of 3.0. Up to 12 graduate-level (400- or 500-level) credit hours from the BS program will count towards the 32 credit-hour requirement of the MANSC program.

for the degree of Bachelor of Science in Animal Sciences and Master of Animal Sciences in Animal Science

Up to 12 graduate-level (400- or 500-level) credit hours from the B.Sc. in Animal Sciences program will count towards the 32 credit-hour requirements of the MANSC program.

The joint BS/MANSC program in Animal Sciences integrates a baccalaureate (B.Sc.) in Animal Sciences preparation with a non-thesis Master of Animal Sciences (MANSC) preparation. Students must be currently enrolled in the B.Sc. in Animal Sciences program to apply for transfer to the joint program. Students must contact the Animal Sciences Graduate Programs office (ansc-gradprog@illinois.edu) to coordinate the transfer.

The Department of Animal Sciences will support the transfer to the joint program of B.Sc. students that have completed the required 126 credit hours towards a B.Sc. in Animal Sciences degree (including a minimum of 40 hours of 300- or 400- level courses) and that have a minimum GPA of 3.0.Up to 12 graduate-level (400- or 500-level) credit hours from the B.Sc. in Animal Sciences program will count towards the 32 credit-hour requirements of the MANSC program.

The joint BS/MANSC program in Animal Sciences integrates a baccalaureate (B.S.) in Animal Sciences preparation with a non-thesis Master of Animal Sciences (MANSC) preparation.

For the Degree of Bachelor of Science Major in Animal Sciences

Graduation Requirements
Minimum hours required for graduation: 126 hours.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

hour requirements of the MANSC program.
```

For the Degree of Master of Animal Sciences in Animal Sciences

Code	Title	Hours
ANSC 590	Animal Sciences Seminar	2
or ANSC 591	Grad Bioinformatics Seminar	
ANSC 593	Res Studies in Animal Sciences	8

The individual research studies project or internship experience and a written report will fulfill the ANSC 593 (Research Studies in Animal Sciences) capstone project requirement. The project or internship and the written product will be supervised by the Animal Sciences faculty mentor and provide evidence that the student can understand and apply the scientific method, interpret scientific information; and effectively communicate scientific information in a field of animal sciences.

Minimum Hours Overall Required Within the Unit	12
Maximum graduate-level credit hours from the B.S. degree that will count towards the MANSC degree	12
Minimum 500-level Hours Required Overall	12
Minimum GPA:	3.0
Total Hours between B.S. and MANSC	146

for the degree of Bachelor of Science Major in Animal Sciences and Master of Animal Sciences in Animal Science

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

---

The MANSC graduate is expected to demonstrate:

1. Graduate-level understanding of essential concepts and approaches in the area of animal science specialization.
2. Capacity to execute a supervised research project including:
   a. understanding of the scientific method, research objectives, materials and methods, basic data analysis, and appreciation of the findings;
   b. and leadership on the implementation of essential research activities.
3. Ability to effectively communicate essential disciplinary knowledge and research project findings in oral and written formats.
4. Aptitude to advocate for interdisciplinary research and education efforts to improve food security, food safety, animal and human health and wellbeing or environmental stewardship.

Community Health, BS & Epidemiology, MPH

for the degrees of Bachelor of Science in Community Health and Master of Public Health in Epidemiology

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (p. 1831). The requirements are explained in more detail on the MPH program website (http://www.mph.illinois.edu/Program/).

The Community Health Program at Illinois prepares students in the ever-changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion, Health Planning & Administration, and Rehabilitation Studies. All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Health and Kinesiology, University of Illinois Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

Community Health, BS & Public Health, MPH

for the joint degrees of Bachelor of Science in Community Health and the Master of Public Health in Public Health

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext). The requirements are explained in more detail on the MPH program website (http://www.mph.illinois.edu/Program/).

The Community Health Program at Illinois prepares students in the ever changing world of health care and health behavior as practitioners and offers three concentrations at the undergraduate level: Health Education & Promotion, Health Planning & Administration, and Rehabilitation Studies. All curricula are built on a foundation of general education courses which emphasize communication skills and critical thinking. The Professional Core courses are designed to help students develop skills in planning, implementation, and evaluation in the context of health services and programs. Students must complete an internship during their senior year in a setting related to the degree and their interests. Recent internship sites have included the American Heart Association, the American Red Cross, hospitals, nursing homes, fitness centers, work site health education programs, and substance abuse prevention centers.

Further information is available from the Academic Affairs Office, Department of Health and Kinesiology, University of Illinois Urbana-Champaign, 1206 S. Fourth Street, 2021 Khan Annex, Huff Hall, Champaign, IL 61820, (217) 333-2307.

for the joint degrees of Bachelor of Science in Community Health and the Master of Public Health in Public Health

Only students who have completed their junior year but have not yet completed their senior year are eligible to apply. The curriculum, degree requirements, and faculty for the 5-year BS-MPH program (MPH portion) are the same as the regular MPH program.

The BS-MPH program is accelerated. Students take a heavier course load during the fifth year, called the MPH year. The MPH year consists of one Fall semester, one Spring semester, and one Summer semester. For students in the Epidemiology concentration, the MPH portion of the degree consists of one Fall semester, one Spring semester, one Summer semester, and a second Fall semester, with students graduating in December.

Computer Science, BS-MCS

for the joint degree of Bachelor of Science in Computer Science and Master of Computer Science in Computer Science

The five-year B.S.-M.C.S. program in Computer Science combines two degrees: a B.S. in Computer Science with an M.C.S. in Computer Science. Current undergraduate Computer Science majors enrolled in The Grainger College of Engineering who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.C.S. degree program have been successfully completed.

Admission

Current Computer Science majors enrolled in The Grainger College of Engineering with two to four semesters (including Summer terms) left of their undergraduate study, after the application term , who maintain an excellent academic performance are eligible to apply for this program. Students admitted to this program will receive both degrees once all requirements for both degrees have been successfully completed.

Transfer students entering the CS undergraduate program their junior year are also eligible to apply to this program.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor.
- must maintain an overall GPA of 3.0 through completion of the B.S. component of the program to remain in the program.
- may register for graduate courses and earn graduate credit hours, with approval from their graduate academic advisor, if they have 12 hours or less to complete in their FINAL semester of their undergraduate studies. Please note that students cannot transfer more than 12 credit hours of coursework over to their M.C.S. degree, which includes the shared coursework.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (this is the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ/)"), and satisfy all B.S. requirements to be officially recommended for admission to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ/)"), and an overall GPA of at least 3.0 GPA, students:

- will be officially admitted into the Graduate College.
- will be issued letters of admission from the Graduate College Office of Admissions and the Siebel School of Computing and Data Science, at which time they will be considered graduate students and assessed graduate tuition the following semester. International students may be required to submit additional documentation at this time.
- must continue to maintain a graduate GPA of 3.0 or better in order to remain in the combined program.
- must complete the M.C.S. degree requirements remaining beyond the three shared Breadth Requirement courses within two consecutive semesters beginning with the semester they are admitted to the Graduate College (fall-spring, spring-summer, or spring-fall). Please note that if you finish your B.S. requirements in less than four years, you will not be given extra time to complete the M.C.S. degree requirements. You will just finish this joint program in less than 5 years.

Withdrawal
Students who do not complete all 5-Year B.S.- M.C.S. degree program requirements may request by petition to have graduate hours earned, including the Breadth Requirement coursework, converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

for the joint degree of Bachelor of Science in Computer Science and Master of Computer Science in Computer Science

Requirements

B.S. Component: 120 hours plus 3 "Breadth Requirement" courses for 9-12 graduate hours

- Same required courses as the traditional B.S. degree with the minimum hours required reduced to 120 hours.
- Must complete 3 out of the 4 "Breadth Requirement" courses: four different courses, each from a different area, from the following eight core areas with a grade of B- or higher.
- University undergraduate minimum residence requirement satisfied.
- Overall GPA of 3.0 or higher maintained through the completion of the B.S. component of the program.

M.C.S. Component: Minimum 20-23 additional coursework hours

- Program is identical to the traditional M.C.S. program with the 3 out 4 "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ/)" courses satisfied while still classified as an undergraduate.
- Students who take the "Breadth Requirement (http://cs.illinois.edu/prospective-students/graduate-students/professional-masters-mcs/professional-masters-mcs-degree-requ/)" courses for 3 credit hours instead of 4 will need to complete a minimum of 23 additional graduate level coursework hours.
- Students must satisfy the university's graduate student minimum residence requirement.
- Students must complete remaining M.C.S. degree requirements in two semesters (fall-spring, spring-summer, or spring-fall).
- Students must maintain an overall GPA of 3.0 through completion of the M.C.S. component of the program.

for the joint degree of Bachelor of Science in Computer Science and Master of Computer Science in Computer Science

Sample Sequence
This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(*http://catalog.illinois.edu/general-information/degree-general-education-requirements/*).*

Students use 3 x (400-level) CS courses, taken as undergraduates and completing undergraduate requirements, to satisfy "Breadth Requirements" for the MCS. These three "shared" courses may be taken for 3 or 4 hours. To ensure that students have the minimum 120 undergraduate hours remaining when the "shared" courses are moved to the MCS, students should take an extra free elective hour for every 4-hour "shared" course. In this example, the student is using the minimum of three 3-credit hours Breadth area courses (9 total) as shared between the BS and MCS degrees.

Total Undergraduate Hours: 120 hours + 3 x (3 or 4 hours), counting toward both undergraduate requirements and graduate "Breadth Requirements."

*Total Graduate Hours: 23+ 9 (9 shared BS-MCS hours), must **equal** degree total minimum hours requirement listed on the degree's requirements page in the catalog.*

for the joint degree of Bachelor of Science in Computer Science and Master of Computer Science in Computer Science

for the joint degree of Bachelor of Science in Computer Science and Master of Computer Science in Computer Science

Siebel School of Computing and Data Science website (https://siebelschool.illinois.edu)

Siebel School of Computing and Data Science faculty (https://siebelschool.illinois.edu/people/faculty/)

The Grainger College of Engineering (https://grainger.illinois.edu/)

Computer Science, BS-MS

for the joint degree of Bachelor of Science in Computer Science and Master of Science in Computer Science

The five-year B.S.-M.S. program in Computer Science combines two degrees: a B.S. in Computer Science with an M.S. (with thesis) in Computer Science. Current Computer Science students enrolled in The Grainger College of Engineering who maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the 5-year B.S.-M.S. degree program have been successfully completed.

Admission
For deadlines and procedures, consult the department website (https://cs.illinois.edu/academics/graduate/fifth-year-masters-programs/5-year-bs-ms-program/). Current Computer Science majors enrolled in The Grainger College of Engineering with one to two semesters (not including Summer term) left of their undergraduate study after the application term, with an overall GPA of at least 3.50 may apply for provisional admission to the program. The 5-year program is highly competitive. Admission is based on overall academic performance, letters of reference, and statement of purpose. The GRE General Test is not required.

Students provisionally admitted to the program:

- are assigned a graduate academic advisor when admitted.
- must maintain an overall GPA of 3.00 through completion of the B.S. component of the program, to remain in the program.
- may register for graduate courses and earn graduate hours credit, with approval from their graduate academic advisor, even if they are more than 10 hours from completing the B.S. component.
- must earn at least 120 hours of undergraduate credit, 9 hours of graduate credit (in the Breadth Requirement courses), and satisfy all B.S. requirements to be officially admitted to the Graduate College.

Upon successful completion of the B.S. component (including grades of B- or better in the Breadth Requirement), and an overall GPA of at least 3.00 in all graduate course work, students:

- will be officially admitted into the Graduate College.
- will be issued letters of admission from the Graduate College Office of Admissions and Records and the Siebel School of Computing and Data Science, at which time they will be considered graduate students and assessed graduate tuition the following semester.
- may apply or be considered for graduate research or teaching assistantships, tuition waivers, as well as fellowships and scholarships available to graduate students.
- must continue to maintain a graduate GPA of 3.00 or better in order to remain in the combined program.
- Students must complete the M.S. degree requirements remaining beyond the three shared Breadth Requirement courses within two consecutive semesters beginning with the semester they are admitted to the Graduate College (fall-spring, spring-summer, or spring-fall).

Withdrawal
Students may withdraw from the program at any time by notifying the Office of the Associate Dean for Undergraduate Programs and the Siebel School Assistant Director of Graduate Programs. Students who do not complete all 5-year B.S.- M.S. degree program requirements may upon request have all graduate hours earned, including the Breadth Requirement course work converted to undergraduate hours and applied toward a traditional B.S. in Computer Science degree. Students reverted back to the B.S. degree program must earn the minimum number of hours and satisfy all degree requirements of whichever version of the B.S. curriculum is appropriate. Graduate credit not used to fulfill the B.S. degree requirements will remain on the transcript and may, at some future point, be considered for transfer to another degree program.

Continued Graduate Study
Students in the program are eligible to apply for the Ph.D. program in Computer Science near completion of the M.S. component. If admitted, the combined degree will count as Stage 1 of the Ph.D. program, as if the student is admitted with a master's degree.

Students are strongly advised to seek faculty counsel about the 5-year program to be sure they understand the pros and cons of pursuing a master's degree via the 5-year program. If their intention is to ultimately pursue a Ph.D., then it may be preferable to avoid the rapid pace of the 5-year program and instead invest time in research as an undergraduate. For admission to competitive Ph.D. programs, the expectation of publications and extensive research experience is higher for M.S. graduates. Therefore, as an alternative to the 5-year program, many top students may prefer to conduct research, possibly leading to a B.S. thesis, as a way to improve their admissions chances into top Ph.D. programs.

for the joint degree of Bachelor of Science in Computer Science and Master of Science in Computer Science

Requirements

B.S. Component (120 hours plus three 400-level courses for 9-12 graduate hours):

- Same required courses as the traditional B.S. degree with the minimum hours required – not counting technical electives taken for graduate credit (see below) – reduced from 128 to 120.
- Course work shared by the B.S. and M.S. components must include three courses and at most 12 credit hours of 400-level CS courses required for the B.S. which also count towards the Breadth Requirement course work of the M.S. component, all of which must be taken for graduate credit. (Students must take the graduate section of the courses if offered and are strongly encouraged to take the 4-hour section if available). The CS Graduate academic advisor will assist students in mapping out this course work.
- Illinois undergraduate student minimum residence requirement satisfied
- Overall grade point average (GPA) of 3.00 maintained through completion of B.S. component of the program.

M.S. Component (minimum 16 additional credit hours plus 4 hours of CS 599):

- Identical to the traditional M.S. program with the Breadth Requirement course work satisfied while still classified as undergraduate (though held to the standards of a graduate student). A total of 32 credit hours (including the shared course work) are required.
- Satisfy Illinois' graduate student minimum residence requirement.
- Overall GPA of 3.00 must be maintained through completion of M.S. component of the program.

The Grainger College of Engineering

Crop Sciences, BS-MS

for the degrees of Bachelor of Science and Master of Science, Major in Crop Sciences

The five-year joint B.S.-M.S. program in Crop Sciences combines a B.S. in Crop Sciences with a non-thesis M.S. in Crop Sciences. Current University of Illinois Urbana-Champaign undergraduate students enrolled in the Department of Crop Sciences who have completed between 60 and 96 credit hours, maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive both degrees once all requirements for the B.S.-M.S. program are completed.

for the degrees of Bachelor of Science and Master of Science, Major in Crop Sciences

Graduation Requirements
Minimum hours required for Bachelor's degree only graduation: 126 hours.
Minimum hours required for the Bachelor's + Master's degree in Crop Sciences: 146 hours.
ACES prescribed and elective courses: 35 hours, of which 20 hours must be completed in residence.

University Requirements
Minimum of 40 hours of upper-division coursework, generally at the 300 and 400 level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements
Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

For the Crop Sciences, B.S.

Code	Title	Hours

for the degrees of Bachelor of Science and Master of Science, Major in Crop Sciences

CPSC, B.S.

Students graduating with a B.S. in Crop Sciences should be able to:

1. Demonstrate knowledge in the key subject matter areas of applied plant biology; crop growth and development; crop management and protection; and soil science.
2. Demonstrate an ability to identify a problem and develop solutions using quantitative reasoning skills for the analysis of biological data.
3. Demonstrate oral and written communication skills necessary to listen and make effective arguments, to share applied scientific concepts with the public, and to make use of a broad variety of media.
4. Demonstrate an ability to lead and function in multidisciplinary teams.
5. Demonstrate the ability to perform self-guided discovery in agricultural sciences, practicing skills of engagement to enhance intellectual curiosity.

CPSC, M.S. (Non-Thesis)

1. Students will be able to read, understand, knowledgeably discuss, and summarize in writing the primary scientific literature of one or more disciplinary areas (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will acquire professional scientific writing and communication skills.
3. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
4. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

Integrative Biology, BSLAS-MS

for the degrees of Bachelor of Science in Liberal Arts & Sciences and Master of Science in Integrative Biology

In the **School of Integrative Biology (SIB)**, students receive interdisciplinary training to prepare them for 21st-century scientific roles. We occupy a unique position on campus. Our majors explore how scales of life interact, from molecules through global cycles, to solve grand challenges such as addressing global change, improving human health, mitigating biodiversity loss, and contributing to ecosystem restoration and sustainable food and biofuel production. The SIB community collaborates extensively on both research and teaching, leading to multi-disciplinary courses grounded in active learning and highly transferable higher-order processing skills such as application, interpretation, and evaluation. Students build laboratory skills spanning from tall grass prairie restoration to modern genome-editing techniques. The IB curriculum includes preparation in genomics and evolution; comparative anatomy, physiology, and development; ecology and behavior; phylogenetic systematics and molecular biology; and mathematical modeling and informatics. Graduates are well-equipped for a broad range of careers in fields including healthcare, biotechnology, genetic counseling, wildlife management, and environmental sciences.

Additionally, the **MS in IB** program provides students with a non-thesis, course-based advanced degree program opportunity. Students in the BSLAS+ MS in IB program can enhance their skill sets within IB upper-level courses through our world-class educational experiences, without having to invest in a required thesis component for the degree. Students interested in research are able to participate in course-based research opportunities such as IB 390, IB 490, and IB 590. Typical time to degree completion is 5-years (ten full-time semesters) with both an undergraduate and advanced degree.

- Integrative Biology, BSLAS and Integrative Biology, BSLAS Honors concentration students are eligible to apply. See the IB Honors degree requirements (p. 460).
- Students with junior standing (90 credit hours, including those in progress) or higher apply internally to the School of Biology BSLAS + MS in IB program.
- Students must have 3.0 or higher GPA from their junior year onward of undergraduate study to receive admission to the Graduate College. This means that the average GPA of their junior year and/or (depending on when the student applies) first semester of their senior year coursework must be 3.0 or higher.
- Applications are reviewed holistically, looking at GPA and performance in courses, experiential opportunities (work, volunteer experiences, internships), personal statements that seek non-cognitive attributes such as work-ethic, leadership and service.
- The GRE is not required.
- Upon acceptance, students are admitted to the joint program and meet with their BSLAS + MS in IB Director of Graduate Studies to determine which courses will be taken that will apply to both degrees. (During their undergraduate degree, students also continue to meet with their undergraduate advisor.)
- After the completion of the undergraduate requirements (including those in progress), students apply to the master's portion of the program through the Graduate College and are assessed graduate tuition as the MS portion is self-supporting.
- Students admitted to the graduate program must maintain an overall 3.0 GPA to remain in good standing.
- Credits from the IB, BSLAS program cannot be retroactively applied.
- 12-hours will double-count toward both the BSLAS degree requirements and the MS requirements, for a total of 140-hours required in total. These 12-hours may be selected from any course listed on the MS in IB Approved Courses List.
- Students may withdraw from the program at any time by petition to have graduate hours earned converted to undergraduate hours and applied toward their IB, BSLAS undergraduate degree. Students reverting to a BSLAS degree program must complete 120 hours and satisfy all degree requirements.

Distinction for Excellence in Research

Students are eligible for graduation at the following levels: Distinction, High Distinction, or Highest Distinction. Distinction will be determined by the SIB Distinction Committee and the level of Distinction will be based on the information below. To be eligible for graduation with Distinction for Excellence in Research a student must:

- Be enrolled as an Integrative Biology or Integrative Biology Honors Major
- Have a completed distinction evaluation form submitted by their Faculty Research Advisor

- To be eligible for Distinction, students must maintain a minimum 3.0 GPA within the major at the end of the penultimate semester. Students must also give a poster presentation at the SIB Distinction Symposium or other approved venue
- To be eligible for Distinction, students must give a poster presentation at the SIB Distinction Symposium or other approved venue
- To be eligible for High or Highest Distinction, students must maintain a minimum 3.25 GPA within the major at the end of the penultimate semester. Students must also submit a written thesis and give an oral presentation at the SIB Distinction Symposium or other approved venue.
- Finally, all students regardless of Distinction level must either:

Complete two or more semesters of IB 390/IB 490 for 2-credit hours or more each semester. The student should enroll in IB 490 the semester they intend to graduate, which counts towards the two required semesters.

OR

Complete at least 180 hours of mentored research. The research experience must last a minimum of 20 weeks (the weeks need not be consecutive and summer research counts toward this total) and students should enroll in one semester of IB 490 for a minimum of 1-credit hour prior to or during the semester they intend to graduate. Example: a student could be eligible if they complete a 10-week summer research experience combined with enrolling in IB 490 the following spring semester, the same term they intend to graduate.

for the degrees of Bachelor of Science in Liberal Arts & Sciences and Master of Science in Integrative Biology

Graduation Requirements

Minimum hours required for graduation: 120 hours for the BSLAS portion; 140 minimum total hours required for the BSLAS and the MS degrees combined.

Minimum required major and supporting course work: Normally equates to to 66-75 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by IB 203		
Humanities & the Arts (6 hours)		6
Natural Sciences & Technology (6 hours)		6
fulfilled by CHEM 102 and CHEM 104, or CHEM 202 and CHEM 204; PHYS 101 and PHYS 102, or PHYS 211 and PHYS 212; IB 150, MCB 150		
Social & Behavioral Sciences (6 hours)		6
Cultural Studies: Non-Western Cultures (1 course)		3
Cultural Studies: US Minority Cultures (1 course)		3
Cultural Studies: Western/Comparative Cultures (1 course)		3
Quantitative Reasoning (2 courses, at least one course must be Quantitative Reasoning I)		6-10
fulfilled by MATH 220 or MATH 221; STAT 212; PHYS 101 and PHYS 102, or PHYS 211 and PHYS 212		
Language Requirement (Completion of the fourth semester or equivalent of a language other than English is required)		0-20

CHEM 232 & CHEM 233	Elementary Organic Chemistry I and Elementary Organic Chem Lab I	
CHEM 236 & CHEM 237	Fundamental Organic Chem I and Structure and Synthesis	
Select one group of courses:		8-10

PHYS 101 & PHYS 102	College Physics: Mech & Heat and College Physics: E&M & Modern	
PHYS 211 & PHYS 212	University Physics: Mechanics and University Physics: Elec & Mag	
Note: An optional IB Honors concentration may be elected, please talk to an advisor. Students who do not elect an optional concentration are required to take the IB major coursework below.		
STAT 212	Biostatistics	3
IB 202	Physiology (IB 202 requires animal dissection and no equivalent alternative is available. IB majors are required to enroll in the 4-hour version of this course.)	4
IB 203	Ecology	4
IB 204	Genetics	4
IB 302	Evolution	4
Advanced Free Elective (300- or 400-level course from IB or any other unit on campus)		3
Integrative Biology Advanced Area Courses		15-20
At least two courses from the following areas. At least one course must be a lab and the courses must be in different areas.		
Area I: Organismal and Evolutionary Biology		
IB 360	Evolution and Human Health	
IB 362	Marine Biology	
IB 368	Vertebrate Natural History (lab)	
IB 401	Introduction to Entomology (lab)	
IB 407	Plant Diversity and Evolution (lab)	
IB 461	Ornithology (lab)	
IB 462	Mammalogy (lab)	
IB 463	Ichthyology (lab)	
IB 464	Herpetology (lab)	
IB 468	Insect Classification and Evol (lab)	
IB 467	Principles of Systematics (lab)	
IB 471	Fungal Diversity and Ecology (lab)	
Area II: Behavior, Ecology, and the Environment		
IB 329	Animal Behavior	
IB 361	Ecology and Human Health	
IB 405	Evolution of Traits and Genomes	
IB 430	Animal Behavior Lab (lab)	
IB 431	Behavioral Ecology	
IB 432	Genes and Behavior	
IB 439	Biogeography	
IB 440	Plants and Global Change	
IB 444	Insect Ecology (lab)	
IB 451	Conservation Biology (lab)	
IB 452	Ecosystem Ecology	
IB 453	Community Ecology	
IB 455	Ecotoxicology and Human Health	
IB 481	Vector-borne Diseases (lab)	
IB 482	Insect Pest Management (lab)	
IB 494	Theoretical Biology + Models (lab)	
Area III: Integrative Anatomy, Physiology, and Molecular Biology		
IB 303	Anatomy (lab)	
IB 364	Genomics and Human Health	
IB 411	Bioinspiration	
IB 420	Plant Physiology	
IB 421	Photosynthesis	
IB 426	Env and Evol Physl of Animals	
IB 433	Insect Physiology	
IB 435	Critical Evaluation of Herbal Remedies	
IB 438	How Organisms Move (lab)	
IB 460	Evol of Intelligent Systems (lab)	
IB 465	Methods in Molecular Genetics and Genomics	
Remaining courses to total 15 hours minimum may be selected from any of the Area courses listed above or from the following list:		
IB 348	Fish and Wildlife Ecology	
IB 392	Translating Your IB Degree Into Career Success	
IB 416	Population Genetics	
IB 436	Evolutionary Neuroscience	
IB 442	Evolution of Infectious Disease	
IB 454	Science Writing & Presentation	
IB 476	Environmental Remote Sensing	
IB 478	Advanced Plant Genetics	
IB 479	Plant Growth and Development	
IB 484	Paleoclimatology	
IB 490	Independent Study (up to 2 hours maximum)	
IB 496	Special Courses	
IB 497	Science Communication	
IB 499	Discussions in Integrative Biology	
MCB 300	Microbiology	
MCB 314	Introduction to Neurobiology	
MCB 450	Introductory Biochemistry	
Total Hours		**120**

Code	Title	Hours
MS in IB Requirements		
12-hours will double-count toward both the BSLAS degree requirements above and the MS requirements below. These 12-hours can be selected from courses listed on any requirements for the MS in IB program.		
Required Course List		
IB 592	Career and Skill Development in Integrative Biology	2
Core Curriculum		**12**
Select from the following three Areas. At least one course must be a lab and the courses must be in at least two different Areas.		
Area I: Organismal and Evolutionary Biology		
IB 401	Introduction to Entomology (lab)	
IB 407	Plant Diversity and Evolution (lab)	
IB 461	Ornithology (lab)	
IB 462	Mammalogy (lab)	
IB 463	Ichthyology (lab)	

IB 464	Herpetology (lab)
IB 467	Principles of Systematics (lab)
IB 468	Insect Classification and Evol (lab)
IB 471	Fungal Diversity and Ecology (lab)
Area II: Behavior, Ecology and the Environment	
IB 405	Evolution of Traits and Genomes
IB 430	Animal Behavior Lab (lab)
IB 431	Behavioral Ecology
IB 432	Genes and Behavior
IB 439	Biogeography
IB 440	Plants and Global Change
IB 444	Insect Ecology (lab)
IB 451	Conservation Biology (lab)
IB 452	Ecosystem Ecology
IB 453	Community Ecology
IB 455	Ecotoxicology and Human Health
IB 481	Vector-borne Diseases (lab)
IB 482	Insect Pest Management (lab)
IB 494	Theoretical Biology + Models (lab)
Area III: Integrative anatomy, Physiology and Molecular Biology	
IB 411	Bioinspiration
IB 420	Plant Physiology
IB 421	Photosynthesis
IB 426	Env and Evol Physl of Animals
IB 433	Insect Physiology
IB 435	Critical Evaluation of Herbal Remedies
IB 438	How Organisms Move (lab)
IB 460	Evol of Intelligent Systems (lab)
IB 465	Methods in Molecular Genetics and Genomics
Additional electives selected from the following list to meet the 32-hour minimum.	
Courses from the any of the Areas above that did not fulfill another requirement may also count toward elective credit.	
IB 416	Population Genetics
IB 436	Evolutionary Neuroscience
IB 442	Evolution of Infectious Disease
IB 454	Science Writing & Presentation
IB 476	Environmental Remote Sensing
IB 478	Advanced Plant Genetics
IB 479	Plant Growth and Development
IB 484	Paleoclimatology
IB 496	Special Courses
IB 497	Science Communication
IB 499	Discussions in Integrative Biology
IB 501	Programming for Genomics
IB 502	Biological Networks
IB 504	Genomic Analysis of Insects
IB 505	Bioinformatics & Systems Biol
IB 506	Applied Bioinformatics
IB 512	Plant Metabolomics
IB 513	Plant Science Seminar
IB 516	Ecosystem Biogeochemistry
IB 517	Analysis of Biological Data in R
IB 524	Plant Biochemistry
IB 526	Seminar in Entomology
IB 531	Emerging Infectious Diseases
IB 533	Human Genome & Bioinformatics
IB 534	Evolution and Medicine
IB 542	Environmental Plant Physiology
IB 546	Topics in Ecology & Evolution
IB 590	Individual Topics
Total Hours Required	**32**
Other requirements:	
Minimum GPA	3.0
Maximum hours of IB 590 allowed to count toward the MS in IB degree	6
Minimum hours at the 500-level within the unit	12

for the degrees of Bachelor of Science in Liberal Arts & Sciences and Master of Science in Integrative Biology

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this five-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a fourth level of a language other than English. For more information, see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

IB majors may begin with CHEM 101 or MATH 115 if needed based on placement as part of a standard eight-semester sequence.

for the degrees of Bachelor of Science in Liberal Arts & Sciences and Master of Science in Integrative Biology

The Student Learning Outcomes (SLOs) for the BSLAS+MS in IB joint degree program are as follows:

1. Synthesize and apply core knowledge in Integrative Biology, including anatomy, development, ecology, evolution, genetics, molecular biology, physiology, and/or systematics.
2. Apply predictive models to biological phenomena and engage with the process of scientific inquiry.
3. Critically evaluate and communicate complex, dynamic scientific information.
4. Employ curiosity, inquiry, quantitative reasoning, and critical thinking in problem solving.
5. Create solutions for global and local biological challenges using interdisciplinary strategies.
6. Develop professional skills including ethics, proficiency in oral and written scientific communication, data analysis and interpretation, collaboration, and the ability to critically evaluate science-related news and information.

Interdisciplinary Health Sciences, BS & Epidemiology, MPH

for the degrees of Bachelor of Science in Interdisciplinary Health Sciences and Master of Public Health in Epidemiology

Interdisciplinary Health Sciences (or I-Health) is a unique and innovative undergraduate program that reflects the trajectory of the healthcare industry. I-Health teaches students to look at health care more holistically and draw from the knowledge of several other fields to develop innovative new solutions to health-related problems. Graduates leave the program not only armed with a deep knowledge of biology and other sciences, but with the ability to comprehensively care for the whole person.

The Interdisciplinary Health Sciences, BS degree program includes a set of four concentrations, of which a student must complete at least one:

- Health & Aging Concentration (p. 467)
- Health Behavior Change Concentration (p. 469)
- Health Diversity Concentration (http://catalog.illinois.edu/undergraduate/ahs/interdisciplinary-health-sciences/health-diverse/)
- Health Technology (p. 475)

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. A summary of the requirements for the MPH degree is provided here (http://catalog.illinois.edu/graduate/graduate-majors/community-health/master-pub-health/#degreerequirementstext). The requirements are explained in more detail on the MPH program page (http://www.mph.illinois.edu/Program/). (https://ahs.illinois.edu/how-to-apply-bs-mph/)

for the degrees of Bachelor of Science in Interdisciplinary Health Sciences and Master of Public Health in Epidemiology

The curriculum requires certain existing courses from the approved lists be taken as noted below. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education Requirements provided they are on the appropriate General Education List.

Interdisciplinary Health Sciences, BS and Public Health, MPH

for the degrees of Bachelor of Science in Interdisciplinary Health Science and Master of Public Health in Public Health

Interdisciplinary Health Sciences (or I-Health) is a unique and innovative undergraduate program that reflects the trajectory of the healthcare industry. I-Health teaches students to look at health care more holistically and draw from the knowledge of several other fields to develop innovative new solutions to health-related problems. Graduates leave the program not only armed with a deep knowledge of biology and other sciences, but with the ability to comprehensively care for the whole person.

The Interdisciplinary Health Sciences, BS degree program includes a set of four concentrations, of which a student must complete at least one:

- Health & Aging Concentration (p. 467)
- Health Behavior Change Concentration (p. 469)
- Health Diversity Concentration (http://catalog.illinois.edu/undergraduate/ahs/interdisciplinary-health-sciences/health-diverse/)
- Health Technology (p. 475)

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website (http://www.mph.illinois.edu/Program/).

for the degrees of Bachelor of Science in Interdisciplinary Health Science and Master of Public Health in Public Health

Only students who have completed their junior year but have not yet completed their senior year are eligible to apply. The curriculum, degree requirements, and faculty for the 5-year BS-MPH program (MPH portion) are the same as the regular MPH program.

The BS-MPH program is accelerated. Students take a heavier course load during the fifth year, called the MPH year. The MPH year consists of one Fall semester, one Spring semester, and one Summer semester.
For students in the Epidemiology concentration, the MPH portion of the degree consists of one Fall semester, one Spring semester, one Summer semester, and a second Fall semester, with students graduating in December.

for the degrees of Bachelor of Science in Interdisciplinary Health Science and Master of Public Health in Public Health

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. For more information see the corresponding section on the Degree and General Education Requirements page *(p. 2).*

Kinesiology, BS & Epidemiology, MPH

for the degrees of Bachelor of Science in Kinesiology and Master of Public Health in Epidemiology

The Kinesiology curriculum leads to a bachelor of science degree that will prepare students for careers in human movement-related fields and/or advanced professional or graduate study. The undergraduate program provides the student with a broad general education, a departmental core integral to the understanding of the diverse aspects of human movement, and a correlate area of courses specific to the student's area of concentration within Kinesiology.

The Kinesiology program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control, and skill of physical activity; physical growth, development, and body form throughout the lifespan; the effects of therapeutic techniques of Kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

The curriculum combines a comprehensive liberal arts and sciences education with in-depth study in a particular area of interest. The program of study provides knowledge and understanding essential for human movement and sport careers in either public or private agencies. The hours required for graduation include prescribed courses for all students as well as requirements determined by the various areas of emphasis selected by the student. Teaching and research emphasize hands-on learning through the use of technology and modern laboratory equipment. Graduates find employment in a variety of fields including teaching, corporate fitness, coaching, and athletic training. Many students continue their education and become physical therapists, physicians, exercise physiologists, and sport psychologists.

A 5 year BS MPH joint degree program is available for students majoring in Community Health, I-Health, or Kinesiology. Students apply for the program in the latter part of their third year (junior year) of study. Students accepted into the BS MPH joint degree program take 12 credit hours of coursework in their senior year that apply to both BS and MPH degrees. In the 5th year of study, students complete the remaining requirements for the MPH degree, and graduate simultaneously with both BS and MPH degrees. The requirements are explained in more detail on the MPH program website (http://www.mph.illinois.edu/Program/).

for the degrees of Bachelor of Science in Kinesiology and Master of Public Health in Epidemiology

Requirements Including General Education

The Kinesiology Program requires that General Education requirements must be selected from the Campus General Education course list. The prescribed courses prepare the student for upper division study and may be used to satisfy General Education requirements provided they are on the appropriate General Education list. Specifically required General Education courses are listed below.

Code	Title	Hours
Communication Arts		
Composition I and an approved speech performance course; or CMN 111 and CMN 112		6-7
Advanced Composition (KIN 340 fulfills requirement)		3
Quantitative Reasoning I & II		
From the approved campus list (KIN 201 fulfills QRII requirement)		6
Humanities and Arts		
From the approved campus list		6
Behavioral and Social Sciences		
KIN 140	(Social Science)	3
KIN 259		3
Natural Sciences		
KIN 150	(Life Science)	3
Course from the approved campus physical science list		3
Cultural Studies (may be completed through other categories)		
From Western Cultures approved campus list		3
From Non-Western Cultures approved campus list		3
From U.S. Minority Cultures approved campus list		3
Language Other Than English		
Completion through the third level of the same language in high school or college		
Anatomy and Physiology		
MCB 244 & MCB 245	Human Anatomy & Physiology I and Human Anat & Physiol Lab I	5
MCB 246 & MCB 247	Human Anatomy & Physiology II and Human Anat & Physiol Lab II	5
Kinesiology and Community Health Department Core		
CHLH 101		3
KIN 122		3
Kinesiology Core Requirements		
KIN 125		1
KIN 140	(Gen Ed)	3
KIN 150	(Gen Ed)	3
KIN 201	(Gen Ed)	3
KIN 259		3

Recreation, Sport & Tourism, BS-MS

for the degrees of Bachelor of Science and Master of Science, in Recreation, Sport & Tourism

The Department of Recreation, Sport and Tourism (RST) offers an integrated and accelerated program for outstanding students that combines a bachelor's and master's degree, referred to as the 5-year BS/MS option. This option can be completed in less time than is required for the two degrees separately. The 5-year BS/MS option is designed to provide students with the academic and professional skills needed to succeed in the recreation, sport and tourism industry.

RST majors with a GPA of 3.5 are eligible to apply at the beginning of their junior year. Accepted students will then work on both degrees simultaneously and will receive both degrees at the same time, once all requirements for each have been completed. Although their degrees will not officially be awarded, students may participate in the bachelor's graduation ceremonies once they have completed the 120 credit-hour requirement for that degree.

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this four-year plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. See the corresponding section on the Degree and General Education Requirements *(p. 2).*

Sustainable Design, BS and Art & Design: Design for Responsible Innovation, MFA

for the Joint Program of the Bachelor of Science in Sustainable Design and the Master of Fine Arts in Art & Design, Design for Responsible Innovation concentration

The BSSD – MFA program combines a BS in Sustainable Design with a MFA in Art & Design, concentration in Design for Responsible Innovation (4+2 program). Current University of Illinois Urbana-Champaign undergraduate students enrolled in the Sustainable Design undergraduate major who have completed between 60 and 96 credit hours and maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive the BS degree after four years and, contingent upon successful admittance to the Graduate School, will receive the MFA degree after two additional years.

Students interested in the BSSD – MFA DRI 4+2 program will need to plan their schedules well in advance of their Junior year to ensure they have taken the appropriate course work. By judicious selection of general education courses and major electives in their sophomore and junior years, students will be prepared to apply to the 4+2 program in their junior year.

For additional details and requirements refer to the department's website and the Graduate College Handbook.

for the Joint Program of the Bachelor of Science in Sustainable Design and the Master of Fine Arts in Art & Design, Design for Responsible Innovation concentration

For additional details and requirements refer to the department's website and the Graduate College Handbook.

Graduation Requirements

Minimum hours required for graduation: 160 hours.

- Bachelor of Science in Sustainable Design: 120 hours.
- Master of Fine Arts in Art & Design, concentration in Design for Responsible Innovation: 40 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§

3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

for the Joint Program of the Bachelor of Science in Sustainable Design and the Master of Fine Arts in Art & Design, Design for Responsible Innovation concentration

Bachelor of Science in Sustainable Design:

Upon successful completion of a degree in Sustainable Design, students will:

1. Have a deep level of understanding of the fundamentals of sustainability and their functional links to the built environment.
2. Have a deep level of understanding of the fundamentals of design thinking and practice.
3. Be proficient in applying basic principles of visual and material communication, including sketching, drafting, model-making, 2D and 3D design software and geographic information systems.
4. Be able to combine design theory and practice with sustainability principles to address environmental issues at the product, building, neighborhood, city, landscape and global levels.
5. Be comfortable working in multidisciplinary teams to solve complex design problems.

Master of Fine Art in Art & Design,#Design for Responsible Innovation Concentration:

By the end of the program, students will be able to:

1. Demonstrate familiarity with the design research literature relevant to their topic.
2. Create prototypes for research purposes.
3. Explain the different epistemological modes of knowledge production.
4. Select research methods appropriate to the thesis topic.

Sustainable Design, BS and Landscape Architecture, MLA

for the degrees of Bachelor of Science in Sustainable Design and Master of Landscape Architecture in Landscape Architecture

The six-year joint BSSD/MLA 4 + 2 program combines a B.S. in Sustainable Design with a MLA in Landscape Architecture. Current University of Illinois at Urbana-Champaign undergraduate students enrolled in the Sustainable Design undergraduate major who have completed between 30 and 96 credit hours and maintain superior academic performance are eligible to apply for this program. Students admitted to the program will receive the B.S. degree after four years and the M.LA. degree after two additional years.

Students interested in the BSSD/MLA 4 + 2 program will need to plan their schedules well in advance of their Junior year to ensure they have taken the appropriate course work. By judicious selection of general education courses and major electives, students will be prepared to apply to the 4+2 program in their sophomore year, and to the Graduate College in their senior year.

For additional details and requirements refer to the MLA department's Web site and the Graduate College Handbook.

for the degrees of Bachelor of Science in Sustainable Design and Master of Landscape Architecture in Landscape Architecture

Bachelor of Science in Sustainable Design

Upon the successful completion of a degree in Sustainable Design, students will:

1. Have a deep level of understanding of the fundamentals of sustainability and their functional links to the built environment.
2. Have a deep level of understanding of the fundamentals of design thinking and practice.
3. Be proficient in applying basic principles of visual and material communication, including sketching, drafting, model-making, 2D and 3D design software and geographic information systems.
4. Be able to combine design theory and practice with sustainability principles to address environmental issues at the product, building, neighborhood, city, landscape, and global levels.
5. Be comfortable working in multidisciplinary teams to solve complex design problems.

Master of Landscape Architecture in Landscape Architecture

Upon the successful completion of a Master of Landscape Architecture in Landscape Architecture students will have:

1. **Design Thinking.** Use a variety of processes to discover and frame opportunities, generate multiple possibilities, evaluate and refine ideas, rapidly prototype and test your proposal, and share your ideas in a compelling manner.
2. **Communicate with Skill.** Use a variety of digital tools to generate design proposals, test those proposals, and share your ideas with others.
3. **Tap into Existing Knowledge.** Incorporate our best understanding of natural resources, environmental systems, human development, social systems, professional practice and professional ethics into your work.
4. **Technical Competence.** Demonstrate the technical competence to translate design proposals into built work.
5. **Responsibility and Leadership.** Develop and demonstrate a sense of responsibility to the land and the people for whom we design.

Sustainable Design, BS and Urban Planning, MUP

for the degrees of Bachelor of Science in Sustainable Design and Master of Urban Planning in Urban Planning

The BSSD – MUP 4+1 program allows students completing the Bachelor of Science in Sustainable Design (BSSD) degree to complete the Master of Urban Planning (MUP) on an accelerated timeline. The 4+1 program is highly selective – the majority of successful applicants to the program have a 3.6 GPA or higher and demonstrate extraordinary evidence of preparedness for the MUP program. BSSD students must plan early to

complete prerequisites. Junior BSSD students may apply to participate in the program.

For additional details and requirements refer to the department's Web site and the Graduate College Handbook.

for the degrees of Bachelor of Science in Sustainable Design and Master of Urban Planning in Urban Planning

---

For additional details and requirements refer to the Sustainable Design Department website (https://faa.illinois.edu/bachelor-science-sustainable-design/) and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

Graduation Requirements

Minimum hours required for graduation: 152 hours.

- Bachelor of Science in Sustainable Design: 120 hours.
- Master of Urban Planning in Urban Planning: 32 hours.

University Requirements

Minimum of 40 hours of upper-division coursework, generally at the 300- or 400-level. These hours can be drawn from all elements of the degree. Students should consult their academic advisor for additional guidance in fulfilling this requirement.

The university and residency requirements can be found in the Student Code (https://studentcode.illinois.edu/article3/part8/3-801/) (§ 3-801) and in the Academic Catalog (http://catalog.illinois.edu/general-information/degree-general-education-requirements/).

General Education Requirements

Follows the campus General Education (Gen Ed) requirements (https://courses.illinois.edu/gened/DEFAULT/DEFAULT/). Some Gen Ed requirements may be met by courses required and/or electives in the program.

Code	Title	Hours
Composition I		4-6
Advanced Composition		3
fulfilled by UP 312

for the degrees of Bachelor of Science in Sustainable Design and Master of Urban Planning in Urban Planning

Sample Sequence

This sample sequence is intended to be used only as a guide for degree completion. All students should work individually with their academic advisors to decide the actual course selection and sequence that works best for them based on their academic preparation and goals. Enrichment programming such as study abroad, minors, internships, and so on may impact the structure of this plan. Course availability is not guaranteed during the semester indicated in the sample sequence.

Students must fulfill their Language Other Than English requirement by successfully completing a third level of a language other than English. This may require up to three semesters of language depending on high school coursework or placement. For more information, see the corresponding section on the Degree and General Education Requirements page (p. 2).

for the degrees of Bachelor of Science in Sustainable Design and Master of Urban Planning in Urban Planning

Bachelor of Science in Sustainable Design:

Upon successful completion of a degree in Sustainable Design, students will:

1. Have a deep level of understanding of the fundamentals of sustainability and their functional links to the built environment.
2. Have a deep level of understanding of the fundamentals of design thinking and practice.
3. Be proficient in applying basic principles of visual and material communication, including sketching, drafting, model-making, 2D and 3D design software and geographic information systems.
4. Be able to combine design theory and practice with sustainability principles to address environmental issues at the product, building, neighborhood, city, landscape and global levels.
5. Be comfortable working in multidisciplinary teams to solve complex design problems.

Master of Urban Planning:

1. Identify and understand the planners' role in:
   a. advocating for racial and economic equity;
   b. planning for the needs of disadvantaged groups;
   c. expanding choice and opportunity;
   d. reducing inequities through critical evaluation of systems and institutions;
   e. planning for sustainable communities;
   f. reducing impacts of climate change; and
   g. creating equitable and climate#adapted futures.
2. Demonstrate planning proficiency in a global context in the areas of:
   a. history, theory, law and institutions;
   b. the evolution of the practice of planning; and
   c. urban and regional development.
3. Build and put into practice a set of skills that are central to the planning profession, including skills specific to:
   a. communication, community engagement, and the planning process;
   b. research and critical thinking;
   c. mapping and data visualization; and
   d. data collection and analysis, and data analytics.
4. Illustrate professional leadership values including collaborative skills and ethical behavior in research, client representation and decision-making.

Urban Studies & Planning, BA & Urban Planning, MUP

for the degrees of Bachelor of Arts in Urban Studies & Planning and Master of Urban Planning in Urban Planning

The 4+1 program allows for students completing the BAUSP degree in the Department to complete the Master of Urban Planning (MUP) on an accelerated timeline--BAUSP and MUP degrees in five years. To be eligible to participate in the 4+1 program, the student should be a Junior BAUSP major with a minimum **3.6 GPA**. Junior BAUSP majors who do not meet these requirements may apply to the program, but their applications will need to provide extraordinary evidence of preparedness for the MUP program in order to gain admission.

Eligible BAUSP students should submit their application packet as a single PDF document to us by email (urbplan@illinois.edu) by January 15 of their Junior year. The application packet should include a cover letter, statement of purpose, resume and work examples. Students will be notified by February 15 of their Junior year if they have been accepted into the 4+1 program.

At the end of their senior year, 4+1 students wishing to complete the MUP degree will formally apply to the MUP program, submitting a full application package including recommendations, resume and transcripts.

Adult Development Minor

for the Undergraduate minor in Adult Development

The Adult Development minor combines theoretical and practical approaches to understanding issues faced by adults as individuals, partners, family members, learners, caregivers, and clients of social agencies. Course work examines adults from age 25 to 90+ in the contexts of evolving family roles, health issues, and social service needs. Students anticipating careers in social or health-related services will find an understanding of adult development and its attendant issues a valuable complement to other professional skills.

The minor requires a minimum of 18 hours. Students may count three hours earned in a community-based practicum or research project related to adult development toward the minor.

Please see the Minor Add Form (https://aces.illinois.edu/academics/current-students/forms/#minorforms) to add the Adult Development minor to your degree program.

for the Undergraduate minor in Adult Development

Minimum required hours and supporting course work: At least six hours of advanced coursework must be distinct from credit earned for the student's major or another minor. Courses in the minor may not be taken Credit/No Credit. Students may count three hours earned in a community-based practicum or research project related to adult development toward the minor.

Minimum hours for minor: 18 hours.

Code	Title	Hours
Foundation courses		**9**
HDFS 105	Intro to Human Development	
HDFS 120	Intro to Family Studies	
HDFS 310	Adult Development	
One course selected from:		
Adult roles in the family context		**3-4**
HDFS 225	Close Relationships	
HDFS 425	Family Stress and Change	
HDFS 426	Family Conflict Management	
Adult choices/challenges		**6**
Choose at least 6 hours from:		
HDFS 207	Self in Context	
HDFS 445	Substance Use and Family Health	
CMN 336	Communicating in Families	
CMN 368	Sexual Communication	
EPSY 407	Adult Learning and Development	
HK 404	Gerontology	
PSYC 361	The Psychology of Aging	
RST 316	Human Development and Recreation, Sport and Tourism	
SOCW 240	Death & Dying	
SOCW 315	Social Work Services for Older Adults	
Total Hours		**18**

for the Undergraduate minor in Adult Development

Upon successful completion of a minor in Adult development, students will:

1. Demonstrate a strong foundation in theories and empirical knowledge associated with human development and family studies (i.e., developmental periods and domains; socialization contexts; diversity among families and children; research methods; family dynamics, transitions, and resilience; and family policy).
2. Exhibit the skills necessary to effectively apply knowledge and generate new ideas to solve real world issues.
3. Demonstrate a critical and reflexive orientation toward and sensitivity to issues of diversity and inclusion.
4. Develop professional competence skills and establish well-informed career and professional goals.

Advertising Minor

for the Undergraduate minor in Advertising

The Advertising minor is designed to provide undergraduate students with knowledge and experiences in advertising and brand communication. Students will take foundational courses in advertising and then choose courses that are of interest to them, from an approved list. Courses within the Advertising minor will help students develop an understanding of the “big picture” of advertising as well as the role of advertising in society.

The minor requires a minimum of 18 hours.

Students pursuing a major in Advertising or CS+Advertising are not eligible for a minor in Advertising.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the Undergraduate minor in Advertising

Code	Title	Hours
Foundations of Advertising		**6**
ADV 150	Introduction to Advertising	3
ADV 393	Advertising and Society	3
Exploring Advertising Topics		**3**
Choose 1 course from the following list:		
ADV 175	Introduction to Multicultural Advertising	3
ADV 200	Data Literacy	3
ADV 201	Social Media and Personal Branding	3
ADV 212	Advertising History	3
ADV 214	Sports Advertising & Branding	3
ADV 290	Special Topics in Advertising	1 to 3
Advanced Advertising Topics		**9**
Select at least 3 courses at the 300- or 400-level from the list below.		
ADV 301	Becoming an Influencer	3
ADV 305	Advertising Technology and the Digital World	3
ADV 311	Classic Campaigns	3
ADV 376	Global Advertising	3
ADV 378	Psychology of Advertising	3
ADV 391	Creative Advertising for Non-Majors	3
ADV 392	Advertising Immersion and Experiential Learning	1 to 6
ADV 396	Research Experience in Advertising	1 to 3
ADV 399	Advertising Study Abroad	1 to 5
ADV 400	Special Problems	0 to 3
ADV 409	Media Entrepreneurship	3
ADV 475	Multicultural Advertising	3
ADV 480	Social Media Analytics	3
ADV 490	Advanced Special Topics in Advertising	1 to 3
ADV 491	Digital Content and Social Media Management	3
ADV 494	Persuasion Consumer Response	3
Total Minimum Hours Required		**18**

for the Undergraduate minor in Advertising

The Advertising Minor will contribute to the student learning outcomes of:

1. Intellectual Reasoning and Knowledge by providing students with a breadth and depth of knowledge related to the overall field of advertising (foundation) and allowing them to select courses so they can specialize in a particular area of advertising;
2. Social Awareness and Cultural Understanding through understanding the role of advertising effects and effectiveness with target marketing and audiences. Students will gain a deeper understanding of how people (as audiences) may differ along characteristics, values, and lifestyles; and
3. Creative Inquiry and Discovery as students learn how to solve advertising problems with creativity and communication.

Interdisciplinary Minor in African American Studies

for the Undergraduate Interdisciplinary Minor in African American Studies

The Department of African American Studies offers a campus-wide interdisciplinary minor in African American Studies. The minor is premised on the following principles: Interdisciplinarity, the centrality of Black women and gender, the use of the Global Africa/African Diaspora as a contextualizing framework and an emphasis on black agency or self-determining activity of African peoples. A minimum grade point average of 2.33 is required for completion of courses taken in the program. The Department of African American Studies must approve a student's minor course plan.

for the Undergraduate Interdisciplinary Minor in African American Studies

Code	Title	Hours
I. Core course requirements		
AFRO 100	Intro to African American St	3
AFRO 490	Theory in African American St	3
or AFRO 220	Intro to Research Methods AfAm	
AFRO 495	Senior Thesis Seminar	3
II. Areas of Concentration		
A. Comparitive Race, Racialized Communities & Identities. Students must take at least one course in this area. Students may choose courses from a list in the Department office.		3-4
B. Cultural Production & Cultural Movements. Students must take at least one course in this area. Students may choose courses from a list in the Department office.		3-4
C. Political Economy, Public Policy & Contemporary Issues. Students must take at least one course in this area. Students may choose courses from a list in the Department office.		3-4
Elective in any of the above areas		3

Students must take at least one course focusing on Black Women, Gender, and Sexuality Studies chosen from a list in the Department office. Students may count this course toward any of the required areas above.	
Total Hours	**21**

Students must not take more than 6 hours of 100-level courses. A minimum of 6 hours of 300- and 400-level courses is required.

for the Undergraduate Interdisciplinary Minor in African American Studies

---

Students completing the minor will be able to:

1. **Demonstrate foundational knowledge** of key themes, histories, and intellectual traditions in African American Studies that support clear and effective oral and written communication.
2. **Apply introductory analytical tools**—including qualitative, quantitative, or digital methods—to examine issues affecting African American communities and broader U.S. social contexts.
3. **Identify the roles of African American Studies in public engagement and social justice**, recognizing how scholarship can inform leadership, civic participation, and policy discussions in a diverse democratic society.

Interdisciplinary Minor in African Studies

for the Undergraduate Interdisciplinary Minor in African Studies

---

The Center for African Studies offers an interdisciplinary minor as a complement to any major. The 20 hours selected by students for the African studies minor should form a coherent program of study. This program must be approved by the Center for African Studies. The Dean of the College of Liberal Arts and Sciences will verify that the student has completed the program on the recommendation of the Director of the Center for African Studies and on completion of the requirements below.

Requirements

Code	Title	Hours
Study of an indigenous African Language. Acceptable languages include but are not limited to Arabic, Bamana, Lingala, Swahili, Wolof, and Zulu.		5
African Studies core courses. These courses contain a minimum of 50 percent African content and are defined according to a list maintained and regularly updated by the Center for African Studies. Courses completed to satisfy the core must come from at least 3 separate departments and must include the following three components:		
Course-work surveying the continent. Choose one of the following:		3
AFST 210	Introduction to Modern African Literature	
AFST 222	Introduction to Modern Africa	
AFST 254	Economic Systems in Africa	
HIST 111	History of Africa to 1800	
HIST 112	History of Africa from 1800	
300- or 400-level core courses. Language courses cannot be used to meet this requirement.		6
Additional core courses at any level. African language courses may be used to satisfy this requirement if they are at the advanced level (fifth semester or higher). Only 3 hours of AFST 199 may be used to satisfy the requirements of the minor.		6
Total Hours		**20**

for the Undergraduate Interdisciplinary Minor in African Studies

---

Students completing the minor will be able to:

1. **Demonstrate foundational knowledge of African cultures, societies, and languages**, acquiring a multicultural and international perspective applicable to academic, professional, and personal contexts.
2. **Apply critical and analytical skills** to understand African political, economic, and cultural systems, preparing for further study, professional work in international contexts, or informed global engagement.

Interdisciplinary Minor in Aging

for the Undergraduate Interdisciplinary Minor in Aging

The Interdisciplinary Minor in Aging provides students with the opportunity to study aging as it relates to health, communication,

development and activity. The minor is offered through the College of Applied Health Sciences. There are no prerequisites for the minor. Minors should be declared by filling out the intent to pursue a minor form (https://ahs.illinois.edu/undergrad-declare-minor/).

for the Undergraduate Interdisciplinary Minor in Aging

Code	Title	Hours
Required Courses		9
IHLT 240, Health and Aging Policy		
CHLH 404		
PSYC 361	The Psychology of Aging	
Additional aging-related courses chosen from the following list:		9
KIN 459		
SOCW 240	Death & Dying	
SOCW 315	Social Work Services for Older Adults	
CHLH 494	(Special Topics courses must include aging-related content and be approved by the Aging minor advisor)	
RST 316	Human Development and Recreation, Sport and Tourism	
RST 335	Leisure and Consumer Culture	
SHS 271	Communication and Aging	
KIN 386		
EPSY 407	Adult Learning and Development	
UP 340	Planning for Healthy Cities	
Students may also earn elective credit by participating in an aging-related internship or independent study that is also pre-approved by the advisor for the minor. Minor modification forms should be filled out if you are requesting to use an independent study or internship. Forms can be found at http://provost.illinois.edu/files/2017/01/Minor-Modification-Form.pdf.

International Minor in Agricultural, Consumer, & Environmental Sciences

for the Undergraduate International Minor in Agricultural, Consumer, & Environmental Sciences

This minor will help students prepare for life and work in a global society and will provide the international skills employers expect of our graduates. While it is the intent of this minor to encourage students to spend time abroad and to develop proficiency in a foreign language, neither is required.

Students enrolled in this minor will be able to draw on resources outside the college as well as select from courses offered by the seven departments in the College of ACES. At least 12 of the total 21 credit hours required for this minor must be College of ACES courses. At least 6 credit hours (ACES or non-ACES) must come from 400-level courses and must be distinct from credit earned for the student's major or another minor. Courses in the minor cannot be completed Credit/No Credit.

This minor is administratively based in ACES Academic Programs. Student advising will take place in this unit.

American Indian Studies Minor, UG

for the Undergraduate Minor in American Indian Studies

American Indian Studies (AIS) prepares students in a range of methodologies, theories, technologies, and teaching approaches that compliments a thorough undergraduate education.

Specifically, an undergraduate minor is designed to assist students in preparing for graduate school or for careers in a variety of pursuits including public and business administration, education, public relations, marketing, politics, and government, especially as they relate to American Indian and Native American constituencies. Career opportunities also exist in agencies such as Indian Health Services, the Bureau of Indian Affairs, and the Bureau of Land Management.

For many, AIS is an ideal minor that presents a critical and intellectual foundation for success in an increasingly challenging world.

American Indian Studies (AIS) is an interdisciplinary program with four subject areas:

1. Culture, Identity, Ethics, and Community
2. Sovereignty, Governance, and Politics
3. Literature, Language, and Performance
4. Colonialism, Decolonization, and Indigeneity

The courses chosen must form a coherent program of study and be approved by an AIS advisor.

for the Undergraduate Minor in American Indian Studies

Code	Title	Hours
Foundation Courses		
AIS 101	Intro to American Indian Studies	3
AIS 102		3

REL 481	Islamic Ethics	
Total Hours		**18**

for the Undergraduate Minor in Arabic Studies

Upon completing a minor in Arabic Studies, students will be able to:

1. Produce Arabic across the skills of reading, writing, listening, and speaking at an intermediate level of proficiency and accuracy in interpretive, interpersonal, and presentational modes of communication, especially in familiar and everyday contexts.
2. Identify, analyze, and make effective use of authentic Arabic sources, including texts, media, and digital resources, for academic or professional purposes.
3. Explain key products, practices, and perspectives of Arabic-speaking cultures and compare them with their own and other cultural contexts.
4. Discuss major authors, works, or literary developments from the Arab world and relate them to broader literary and intellectual contexts.
5. Exhibit an informed understanding of major political, social, and cultural issues across the Arab world, critically engaging with historical and contemporary aspects and comparing them to global perspectives.
6. Describe essential linguistic features of Arabic, including the writing system, phonology, morphology, syntax, and regional dialectal variations.

Architectural Studies Minor

for the Undergraduate Minor in Architectural Studies

The Minor in Architectural Studies introduces non-architecture undergraduate students to an overview of architecture history, theory, and design. This minor can complement any discipline and is the only undergraduate minor offered by the School of Architecture.

Admission

Students must declare their intentions in the spring and be admitted to the program for the fall to pursue the Minor in Architectural Studies. Admission to the minor will be processed by the School of Architecture Undergraduate Programs Office. Students may enter the Minor in Architectural Studies until such time that allows the completion of the minor before graduating in their major area of study.

Advising

Advising of students in the minor will be conducted by the advisors in the Undergraduate Programs Office of the School of Architecture.

for the Undergraduate Minor in Architectural Studies

Code	Title	Hours
Required Courses		**11**
ARCH 101	Introduction to Architecture	2
ARCH 210	Introduction to the History of World Architecture	3
ARCH 237	Urban Scale Sustainability	3

ARCH 321	Environment, Architecture, and Global Health	3
Elective courses: Must choose six credit hours minimum from the following:		**6**
ARCH 314	History of World Landscapes	
ARCH 402	Introduction to the History of Architectural Theory	
ARCH 403	Special Topics in Architectural History	
ARCH 407	Rome: City of Visible History	
ARCH 410	Ancient Egyptian & Greek Arch	
ARCH 411	Ancient Roman Architecture	
ARCH 412	Medieval Architecture	
ARCH 414	Baroque & Rococo Arch	
ARCH 415	Modernity's Mirror: Nineteenth-Century Architecture 1750-1900	
ARCH 416	The Architecture of the United States, c.1650 to Present	
ARCH 417	Modern and Contemporary Global Architecture	
ARCH 418	History of the Urban Environment	
ARCH 434	Environmental Control Systems I	
Total minimum credit hours		**17**

for the Undergraduate Minor in Architectural Studies

By enriching your college major with a minor in Architectural Studies, you will:

- Understand architectural design concepts and theories, and how they have been applied in the design process.
- Understand the history of architectural design and practice through time and its impact on society.
- Understand how architectural design affects the lives of people and the built environment.
- Apply problem-solving skills to the development of concepts and ideas regarding design in the built environment.
- Apply fundamental principles of communication and architecture design to potential work.
- Apply critical thinking skills to the understanding of architecture at different scales, from the building to the urban.

Art & Design Minor

for the Undergraduate Minor in Art & Design

The Art & Design Minor provides students with the opportunity to integrate creative art and design practices with other academic or research pursuits. Students selecting the Art & Design Minor do not necessarily wish to pursue a career as a practicing artist or designer but do want the chance to work creatively in the visual arts and design and develop related skills.

Students will be required to have passed one of the approved courses for non-majors (ART 102, 103, 104 or 140) and submit a 5-image portfolio for entry into the Minor. The minor advisor will work with prospective students to prepare their portfolio for review. Portfolios are reviewed once a semester, at midterm. A minimum cumulative GPA of 2.00 is required. Contact the minor advisor, Michael Foellmer (foellme1@illinois.edu), for portfolio formatting details and for the submission deadline.

for the Undergraduate Minor in Art & Design

Course Requirements

Students must meet the following course requirements for a total of 18 hours.
Students will be required to have passed one of the approved courses for non-majors (ART 102-105, 140) for entry into the Minor.

Code	Title	Hours
1 required course:		3
ART 100	Understanding Visual Culture	
ART 140	Introduction to Art	
ARTH 110	Introduction to the History of Art and Visual Culture	
A minimum of 1 course from the academic menu:		3
ART 100	Understanding Visual Culture (if not taken above)	
ART 140	Introduction to Art (if not taken above)	
ARTH 110	Introduction to the History of Art and Visual Culture (if not taken above)	
ARTH ###	Any level ARTH course, not counted elsewhere in minor	
ARTJ 209	Chado (The Way of Tea)	
ARTJ 299	Seminar in Japanese Aesthetics	
ARTJ 302	Intro to Japanese Animation	
ARTJ 398	Designing Everyday Life in Modern Japan	
ARTJ 397	Zen, Tea, and Power	
ARTE 260	Museums in Action	
ARTE 475	Art Exhibition Practices	
ARTE 480	Popular Visual Culture	

A minimum of 3 courses from the studio menu:		9
ART ###	Any ART courses, except 100 or 140	
ARTD ###	Any ARTD courses (high demand Industrial Design and Graphic Design courses are typically not available to minors)	
ARTE ###	Any ARTE courses, except 260, 475, 480	
ARTF ###	Any ARTF courses	
ARTS ###	Any ARTS courses	
ARTJ 101	Introduction to Japanese Aesthetics	
ARTJ 199	Special Topics in Japanese Aesthetic Practices	
ARTJ 301	Manga: The Art of Image and Word	
ARTJ 399	Japan House Internship	
At least 1 additional course in either academic or studio course menu.		3
A minimum of six hours must be completed at the 300 or 400 level.		
Total Hours		**18**

Art History Minor

for the Undergraduate minor in Art History

The minor in art history requires 18 credit hours and offers students insight into the cultural and social history of the visual and built worlds. The minor course of study provides an introduction and initial preparation for students interested in pursuing careers in the humanities or museum work; it also provides excellent research and writing opportunities for those students in art and design looking to expand such skills.

for the Undergraduate minor in Art History

Minimum required major and supporting course work: Students must meet the following course requirements for a total of 18 hours. At least 6 hours of coursework must be advanced (300-400) level and distinct from credit earned for a major or a second minor.

Code	Title	Hours
ARTH 110	Introduction to the History of Art and Visual Culture	3
Select one course below, which focuses on a subject outside of Europe and the Modern Americas		3
ARTH 212	East Asian Art History	
ARTH 214	Art in China	
ARTH 219	Islamic Gardens & Architecture	
ARTH 220	African Arts and Architecture	
ARTH 320	Sacred Sites in Japan	
ARTH 342	Arts of Colonial Latin America	
ARTH 402	Ways of Seeing in Edo Japan	
ARTH 403	Word and Image in Chinese Art	
ARTH 404	China through Film	
ARTH 413	Sacred African Diaspora Arts	
Other courses may be approved in consultation with the minor advisor.		
Additional ARTH courses at the 200, 300 or 400 level		6
Additional ARTH courses at the 300 or 400 level		3
ARTH 495	Undergraduate Seminar in Art History	3
Additional Minor Credit Policies		
A maximum of one course from other universities will satisfy the requirements for upper-level Art History courses.		
A maximum of one history of architecture course below at UIUC will count toward the requirements of the Art History Minor		
ARCH 407	Rome: City of Visible History	
ARCH 412	Medieval Architecture	
ARCH 414	Baroque & Rococo Arch	
ARCH 415	Modernity's Mirror: Nineteenth-Century Architecture 1750-1900	
ARCH 416	The Architecture of the United States, c.1650 to Present	
ARCH 417	Modern and Contemporary Global Architecture	
Total credits required for Art History Minor: 18		

for the Undergraduate minor in Art History

The minor in art history is designed for undergraduates who seek to study art history as a complement to their major area of study.

Upon successful completion of the Art History Minor, students should be able to:

1. Approach art and visual culture with a critical lens.
2. Think, speak, and write with an understanding of art's rich cultural histories.
3. Think, speak, and write with an understanding of the potential intersectionality of art and visual culture with other fields of study.
4. Understand how art and visual culture affects the social world.

Interdisciplinary Minor in Asian American Studies

for the Undergraduate Interdisciplinary Minor in Asian American Studies

The Asian American Studies Department offers a campus-wide Interdisciplinary Minor. This minor represents a coherent program for students who wish to deepen their study of Asian American histories, experiences, contemporary issues and social problems as a part of their liberal education and understanding of race and diversity in the United States and transnationally. It is relevant to curricula such as letters and sciences, business, economics, education, health studies, pre-law, social work, or urban and regional planning.

for the Undergraduate Interdisciplinary Minor in Asian American Studies

Code	Title	Hours
AAS 100	Intro Asian American Studies	3
Asian American Studies Core Coursework		
AAS 200	U.S. Race and Empire	3
AAS 215	US Citizenship Comparatively	3
AAS 300	Theories of Race, Gender, and Sexuality	3
Approved Electives		**6**
Students complete 6 hours of AAS coursework (a minimum of 3 hours must be at the 300- or 400-level)		
Total Hours		**18**

for the Undergraduate Interdisciplinary Minor in Asian American Studies

- **Intellectual Reasoning and Knowledge**
  - Students acquire proficiency in the field and area of Asian American Studies. This includes, for example, knowledge based in intersectional, comparative, and interdisciplinary approaches. While largely based in an area approach to the United States, Asian American Studies is also deeply concerned with transnational, diasporic, and global studies. Students learn the history of Asian Americans and theories and methods of the social sciences and humanistic approaches to understand the Asian American experience. The conceptual rubrics broadly include migration, social movements, US imperialism and racism, and ideas of citizenship and belonging.
- **Critical Inquiry and Discovery**
  - Applying theories in Asian American Studies students develop skills of critical inquiry that draw on intersectional and comparative approaches. As a mode of discovery students exercise their skills using methods of the social sciences and humanities through verbal communication in the classroom and written research projects. Students are asked to apply their critical modes of learning in original and unique projects of discovery through research.
- **Effective Leadership and Community Engagement**
  - Students study models of community leadership and engagement through the histories of Asian American social movements, political culture, and community activism. Reflection based on these approaches provides a context from which to understand the role of classroom learning and the application of theories of social change in communities.
- **Social Awareness and Cultural Understanding**
  - Students learn the dimensions of intersectional analysis of social, cultural, economic, and political issues concerning the Asian Americans. Social theories of power inform how students are taught to understand a number of categories of analysis including race, gender, sexuality, class, ethnicity, religion, and disability, to name a few.
- **Global Consciousness**
  - Students gain an understanding of the global dimensions of intersectional approaches in a broad range of fields and disciplines including literary, historical, cultural and ethnographic approaches. Through the study of migration and diaspora, the broad understanding of individual and collective dynamics are observed, analyzed, and theorized. Students are also asked to think in terms of a comparative framework to understand how race, gender, and sexuality, for example, are thought of from a number of vantage points.

Astronomy Minor, UG

for the Undergraduate Minor in Astronomy

The minor in astronomy is designed to broaden the student's knowledge of science and our place in the universe. The minor in Astronomy will benefit especially those students who are eager to learn astronomy but who do not anticipate it to be their career. The Astronomy minor is also suitable for students who intend to pursue careers in areas that may benefit from a good knowledge of astronomy such as aerospace industry, science writing, scientific journalism, or science teaching in schools.

for the Undergraduate Minor in Astronomy

Code	Title	Hours
Basic Astronomy		
Select one of the following:		3-6
ASTR 100	Introduction to Astronomy [1]	
ASTR 121 & ASTR 122	Solar System and Worlds Beyond and Stars and Galaxies [1]	
ASTR 210	Introduction to Astrophysics	
Advanced Astronomy		
300- or 400-level courses taught by the Department of Astronomy [2]		9
Courses at any level taught by the Department of Astronomy [2]		3-6
Minimum total hours		**18**

[1] *Credit not granted for both ASTR 100 and the ASTR 121/ASTR 122 sequence.*

[2] *No more than 4 hours of ASTR 390 will be counted towards the minor.*

for the Undergraduate Minor in Astronomy

Undergraduate Astronomy minors will graduate with a demonstrated ability to:

1. Develop a broad understanding of fundamental concepts in astronomy.
2. Gain knowledge in selected advanced topics within astronomy, pursuing depth of knowledge in areas of individual interest.

Atmospheric Sciences Minor

for the Undergraduate Minor in Atmospheric Sciences

The minor in Atmospheric Sciences is designed for students who desire a significant background in weather and climate to support work in their major field. This minor will especially benefit students who choose to pursue careers in environmental areas in which multidisciplinary background is essential. The Atmospheric Science minor can complement majors in engineering and agriculture; or scientific pursuits such as chemistry, physics, biology, data analytics, and scientific writing.

for the Undergraduate Minor in Atmospheric Sciences

Code	Title	Hours
Choose from the following:		0-6
ATMS 100	Introduction to Meteorology	
ATMS 120	Severe and Hazardous Weather	
ATMS 140	Climate and Global Change	
ATMS 201	General Physical Meteorology	
300- and 400-level courses from the approved course list. Please see the Atmospheric Sciences advisor for a current list.		12-18
Total Hours		18

for the Undergraduate Minor in Atmospheric Sciences

1. All students will have understanding of core areas of atmospheric sciences including: atmospheric radiation, atmospheric thermodynamics, atmospheric dynamics, and weather systems.
2. All students will have the ability to analyze atmospheric properties both qualitatively and quantitatively.
3. All students will have an understanding of, and ability to communicate the societal impacts of weather and climate.

Biomolecular Engineering Minor

for the Undergraduate Minor in Biomolecular Engineering

Biomolecular Engineering is a broad, interdisciplinary field with the main goal of engineering value-added biomolecules and biomolecular systems for applications in the medical, chemical, agricultural and food industries. Its practice ranges from the fundamental study of biomolecules and biomolecular systems to the design of cellular factories and artificial organs. The Biomolecular Engineering minor is designed to better prepare non-chemical engineering students for careers in the food, pharmaceutical, personal care, and biotechnology industries. This minor is not open to students majoring in chemical engineering. Those students should instead take the biomolecular engineering concentration if they are interested in biomolecular engineering coursework.

Students may fulfill the requirements for a minor in biomolecular engineering by completing the following course sequence. For more information, please contact the academic advisors in the School of Chemical Sciences.

For more information regarding to the Biomolecular Engineering minor, contact the academic advisors in the School of Chemical Sciences at scs-advising@illinois.edu

for the Undergraduate Minor in Biomolecular Engineering

Biomolecular Engineering Electives		**9**
Choose 3 from the following: CHBE 471, CHBE 472, CHBE 473, CHBE 474, CHBE 475, CHBE 476, CHBE 478, CHBE 497, CHBE 499		
Technical Electives		**3**
Choose 1 from the following: ABE 436, ABE 483, ABE 488, BIOE 414, BIOE 415, BIOE 476, ECE 467, ECE 480, MSE 470, MSE 473, MSE 474, TAM 461		
Total Hours		**21**

for the Undergraduate Minor in Biomolecular Engineering

Upon completing this minor, students are expected to be able to:

1. Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics.
2. Acquire and apply new knowledge as needed, using appropriate learning strategies.
3. An ability to analyze the chemistry and metabolism of macromolecules in biological processes and their relation to the regulation and processes of organisms, cells, and subcellular components.

Business Analytics Minor

for the undergraduate minor in Business Analytics

The Business Analytics Minor is designed to provide business undergraduate students with a basic understanding of key business analytics concepts, skills, and tools. This Minor will be useful for students pursuing various business majors, who are seeking to add analytics and data-driven expertise that will be useful in their careers.

for the undergraduate minor in Business Analytics

The Business Analytics Minor requires students to complete six courses for 18 credit hours. Five courses (15 credit hours) are required and one elective course will be chosen from a list of options for the sixth course (3 hours) for a total of 18 credit hours.

Code	Title	Hours
Required Courses		
BADM 352	Database Design and Management	3
BADM 356	Data Science and Analytics	3
BADM 358	Big Data Platforms	3
BADM 373	Quantitative Foundations for Business Analytics	3
BADM 374	Management Decision Models	3
Total Required Hours		**15**

Code	Title	Hours
Elective Courses		
Select any one (1) course		
BADM 336	Supply Chain Modeling & Analytics	3
BADM 351	Social Media Strategy	3
BADM 361	Marketing Analytics	3
BADM 362	Introduction to Consumer Analytics	3
BADM 379	Business Process Improvement	3
BADM 453	Business Intelligence	3
ACCY 302	Decision Making for Atg	3
FIN 464	Applied Financial Analysis	3
Total Elective Hours		**3**

Code	Title	Hours
Minimum Total Hours		**18**

for the undergraduate minor in Business Analytics

The Business Analytics program will help students in:

1. Understanding of the business core, including statistics and data management, creating ability to align different functional contexts with business analytics
2. Gaining proficiency in technical aspects of business analytics, including programing and communicating with data.
3. Developing analytical and critical thinking, ability to synthesize data and information related to business processes and problems.
4. Navigating the complexities of non-conscious biases in data collection and analysis, and ethics of using sources and techniques, such as data privacy and artificial intelligence.
5. Applying business analytics concepts focused one or more business functions, such as marketing, finance, supply chain, accounting, etc.

for the undergraduate minor in Business Analytics

Gies College of Business (https://giesbusiness.illinois.edu/)

Undergraduate Programs (https://giesbusiness.illinois.edu/programs/undergraduate/)
Email the Dept. of Business Administration, ba@business.illinois.edu, or the Academic Director, Prof. Ram Subramanyam, rsubrama@illinois.edu.

Business Minor for Non-Business Majors

for the Minor in Business for Non-Business Majors

Please refer to the Business Minor website (https://business.illinois.edu/minor/) for further information.

The Business Minor is for students earning undergraduate degrees in colleges other than the Gies College of Business. The Business Minor provides coursework through which Non-Business students learn skills used in business. The Business Minor is not available to Gies College students and Technology and Management Minor students. The Business Minor is not to be considered as preparation for transfer into the Gies College to earn an undergraduate Business degree.

To declare their Business Minors, Non-Business students must submit their Statement of Intent to Pursue a Campus-Approved Minor (https://apps.atlas.illinois.edu/FormBuilderSurvey/Survey/las_administration/student_academic_affairs/minor_declaration_form/) (Statements) online.

for the Minor in Business for Non-Business Majors

1. Please note that not every Business Minor course will be offered every Fall and Spring Semesters, Winter Term and Summer Sessions. Students must select judiciously and enroll in the Business Minor courses when they are offered throughout any academic year.
2. Business Minor Students and Prospective Business Minor Students must register for the online sections of all Minor courses if online sections are offered.
3. Business Minor course enrollment instructions are noted in the fall and spring semesters, winter term, and summer session Class Schedule course's Section Detail & Information in Course Explorer. Students must complete all Business Minor course prerequisites. Students who have not completed a Minor course's prerequisite will have their enrollment canceled in that specific course by the academic departments.
4. A minimum number of off-campus transfer courses will be permitted to fulfill the Minor Core and Elective Course Requirements. Specifically, a minimum of 50% of credit hours for the minor must be earned with University of Illinois Urbana Champaign credit. Students should use the Transferology Program to confirm the off-campus course's transferability to fulfill the Minor requirements. You may confirm with the Business Minor Program if a proposed off-campus course will fulfill the Minor requirements.
5. Courses taken through a University of Illinois's Study Abroad Program may fulfill the Business Minor core requirement if there is an exact course articulation of the Gies Business course. For example, a study abroad course deemed the exact equivalent course to our campus' FIN 221 course is acceptable for the Business Minor Core course. If a student takes a study abroad course that is articulated as BADM 3- - and BADM 4- -, the student may work with the BUS Minor advisor to use this course as a Business Minor elective requirement.

The Business Minor is designed to be completed within three academic years. Gies College of Business cannot guarantee minor completion.

Contact busminor@business.illinois.edu to address academic questions.

Minimum required Minor and supporting course work: All six Business Minor courses must be earned with Letter Grades. Sophomore standing required to enroll in the four Core Courses.
For all Business Minor courses for which online delivery is available, students pursuing the Minor ***must enroll*** in the online sections.

Chemistry Minor

for the undergraduate minor in Chemistry

The Chemistry minor offers foundational knowledge in chemical principles and laboratory skills to complement a student's primary field of study and to prepare students for careers in medicine, healthcare, biology, chemical engineering, and environmental science where chemistry is central.

for the undergraduate minor in Chemistry

Code	Title	Hours
Choose one group of Chemistry courses below		8-10
CHEM 102	General Chemistry I	
CHEM 103	General Chemistry Lab I	
CHEM 104	General Chemistry II	
CHEM 105	General Chemistry Lab II	
or		
CHEM 202	Accelerated Chemistry I	
CHEM 203	Accelerated Chemistry Lab I	
CHEM 204	Accelerated Chemistry II	
CHEM 205	Accelerated Chemistry Lab II	
CHEM 232	Elementary Organic Chemistry I	3-4
or CHEM 236	Fundamental Organic Chem I	
CHEM 233	Elementary Organic Chem Lab I	2
or CHEM 237	Structure and Synthesis	
Choose two 3-4 credit hour courses from the List of Advanced Courses Approved for Chemistry Minor Credit (300- and 400-level Chemistry courses, not research or independent study, 3 hours credit or more). The two courses to be taken should be from different subdisciplines of Chemistry. [1]		6-8
Total Hours		**19-24**

[1] *The following courses may not be used to complete the minor: CHEM 492, CHEM 495.*

for the undergraduate minor in Chemistry

Students pursuing an undergraduate minor in Chemistry will

1. Attain chemical knowledge and critical thinking and analytical skills that complement the student's primary major and are applicable in related professional or academic fields.
2. Obtain a working knowledge of the basic principles of chemistry, including topics like atomic and molecular structure, chemical dynamics, and the chemical and physical properties of substances.
3. Acquire basic laboratory skills, including the ability to carry out experiments, use appropriate apparatus effectively, acquire and record data, and practice proper laboratory safety procedures.
4. Gain exposure to subfields of chemistry (analytical, organic, inorganic, physical, chemical biology, and environmental) that best align with their interests by taking advanced courses in at least two different areas.
5. Develop the ability to read, evaluate, interpret, and present numerical and scientific information and data in both oral and written forms.

Child Health and Well-being Minor

for the Undergraduate minor in Child Health and Well-being

Understanding child development and well-being are integral to keeping a child healthy. Similarly, knowing how to interact with children, how to ask family members questions to assess development, and knowing typical milestones in development by age group are all a part of good medical and allied health practices. The child health and well-being minor combines theoretical and practical approaches to understanding child development and well-being. Coursework in this minor examines child development biologically, psychologically, and socially from birth through age 18. Development is looked at in the context of the child's daily experience, with additional coursework focused on medical settings, special needs challenges, and grief.

The minor requires a minimum of 19 hours; ten hours of courses on child development and nine hours of courses examining health and well-being. 6 hours of advanced course credit must be distinct from credit earned for a student's major or another minor.

Please see the Minor Add Form (https://aces.illinois.edu/academics/current-students/forms/#minorforms) to add the Child Health and Well-Being minor to your degree program.

for the Undergraduate minor in Child Health and Well-being

Code	Title	Hours
Development Courses:		**10**
HDFS 105	Intro to Human Development	
HDFS 301	Infancy & Early Childhood	
Choose one course from:		
HDFS 305	Middle Childhood	
HDFS 405	Adolescent Development	
Health and Well-being courses:		**9**

HDFS 208	Child and Family Inclusion: Disability, Health, and Diversity	
HDFS 408	Hospitalized Children	
Total Hours		**19**

for the Undergraduate minor in Child Health and Well-being

Upon successful completion of a minor in Child Health and Well-being, students will:

- Demonstrate a strong foundation in theories and empirical knowledge associated with human development and family studies (i.e., developmental periods and domains; socialization contexts; diversity among families and children; research methods; family dynamics, transitions, and resilience; and family policy).
- Exhibit the skills necessary to effectively apply knowledge and generate new ideas to solve real world issues.
- Demonstrate a critical and reflexive orientation toward and sensitivity to issues of diversity and inclusion.
- Develop professional competence skills and establish well-informed career and professional goals.

Cinema Studies Minor, UG

for the Undergraduate Minor in Cinema Studies

The minor in Cinema Studies provides undergraduate students with certain core courses in the discipline while also allowing them the freedom to explore the various approaches to the subject presented by different departments.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the Undergraduate Minor in Cinema Studies

Students are expected to complete 18 hours of approved Cinema Studies minor coursework, of which 6 hours must be at the 300- or 400-level. At least 3 hours of 300- or 400-level coursework must be offered by or cross-listed with the Department of Media & Cinema Studies (MACS), other than those used to fulfill the requirements below.

Code	Title	Hours
Required Courses		**12**
MACS 203	Contemporary Movies	3
MACS 261	Survey of World Cinema I	3
MACS 262	Survey of World Cinema II	3
MACS 361	Film Theory	3

Classical Civilizations Minor

for the Undergraduate Minor in Classical Civilizations

This minor is sponsored by the Department of the Classics. The department also sponsors a minor in Classical Languages (p. 950).

for the Undergraduate Minor in Classical Civilizations

Code	Title	Hours
18 hours in classical civilization or archaeology courses at the level of 114 and above. A maximum of 6 hours is allowed at the 100-level. At least 6 of these hours must be at the advanced (300 or 400) level. Choose courses from the following, in consultation with the Department of the Classics Director of Undergraduate Studies.		18
CLCV 114	Introduction to Ancient Greek Culture	
CLCV 115	Mythology of Greece and Rome	
CLCV 116	Introduction to Ancient Roman Culture	
CLCV 120	The Classical Tradition	
CLCV 131	Classical Archaeology, Greece	
CLCV 132	Class Archaeology, Rome-Italy	
CLCV 133	Archaeology of Israel	
CLCV 160	Ancient Greek & Roman Religion	
CLCV 206	Classical Allusions in Cinema	
CLCV 220	Exploring the Greek and Roman World	
CLCV 221	Odysseus and Other Heroes	
CLCV 222	Introduction to Greek and Roman Theater	
CLCV 224	Greco-Roman Antiquity and US Minority Cultures	
CLCV 225	Greco-Roman Demo, Econ, Cult	
CLCV 230	Ancient Engineering	
CLCV 231	Development of Ancient Cities	
CLCV 232	Ancient Greek Sanctuaries	
CLCV 240	Gender & Sexuality in Greco-Roman Antiquity	
CLCV 323	The Comic Imagination	
CLCV 443	The Archaeology of Greece	
CLCV 444	The Archaeology of Italy	
CLCV 490	Topics in Classical Literature	
CLCV 491	Topics Classic Arch & Civ	
Total Hours		**18**

for the Undergraduate Minor in Classical Civilizations

1. Acquire a detailed knowledge of the culture of Ancient Greek and Roman civilizations, especially the broader historical, social, and cultural contexts and their development.
2. Acquire familiarity with contemporary methods of cultural and historical analysis to facilitate self-directed inquiry of Ancient Greek and Roman cultures.
3. Acquire an awareness of the place of Ancient Greek and Roman culture in the western tradition in order to understand connections between past and present.
4. Acquire an appreciation of how the careful engagement with other cultures can facilitate new ways of understanding and interpreting one's own contemporary culture.

for the Undergraduate Minor in Classical Languages

Ancient Greek Track

GRK 101, Elementary Greek I, is a prerequisite for subsequent GRK courses and does not count toward the 18 hours for the minor.

Code	Title	Hours
Ancient Greek Track		Hours
GRK 102	Elementary Greek II	4
GRK 201	Classical & Koine Greek I	4
GRK 202	Classical & Koine Greek II	4
6 hours in GRK courses at the 400-level, chosen from the following:		6

GRK 401	Survey of Greek Literature
GRK 411	Greek Prose Composition
GRK 491	Readings in Greek Literature
GRK 493	Independent Reading
Total Hours	**18**

Modern Greek Track

GRKM 201, Elementary Modern Greek I, is a prerequisite for subsequent GRKM courses and does not count toward the 18 hours for the minor.

Code	Title	Hours
Modern Greek Track		Hours
GRKM 202	Elementary Modern Greek II	5
GRKM 403	Intermediate Modern Greek I	4
GRKM 404	Intermediate Modern Greek II	4
5 hours in courses in Modern Greek language, literature, or culture, chosen from the following:		5
CLCV 120	The Classical Tradition	
GRKM 199	Undergraduate Open Seminar	
GRKM 453	Advanced Modern Greek I	
GRKM 454	Advanced Modern Greek II	
GRKM 492	Senior Thesis	
GRKM 493	Independent Reading	
Total Hours		**18**

Latin Track

LAT 101, Elementary Latin I, is a prerequisite for subsequent Latin courses and does not count toward the 18 hours for the minor.

Code	Title	Hours
Latin Track		Hours
LAT 102	Elementary Latin II	4
LAT 201	Intermediate Latin	4
LAT 202	Intro to Latin Literature	4
6 hours in Latin courses at the 400-level from the following:		6
LAT 401	Survey of Latin Literature	
LAT 411	Intermediate Prose Composition	
LAT 460	Medieval Latin	
LAT 491	Readings in Latin Literature	
LAT 493	Independent Reading	
Total Hours		**18**

for the Undergraduate Minor in Classical Languages

1. Acquire and retain a detailed knowledge of Ancient Greek, Modern Greek, and Latin grammar, syntax, vocabulary, and modes of expression.
2. Situate knowledge of the languages within the cultural contexts in which they were used in order to understand the crucial role of language in social dynamics and cross-cultural communication.
3. Acquire facility with contemporary methods of literary and historical analysis sufficient to carry out original, self-directed research into cultures that made use of the Greek and Latin languages.
4. Acquire critical awareness of the place of Greek and Latin in western literary history in order to appreciate the powerful role of tradition in interpreting the texts and events of the past.
5. Acquire a detailed knowledge of the cultures of Greek and Roman civilizations, especially the broader historical, social, and cultural contexts and their development.

Communication Minor, UG

for the Undergraduate Minor in Communication

The undergraduate minor in Communication is designed for students who wish to obtain a deeper understanding of communication processes and how they influence social, cultural, and political processes. It is appropriate for students majoring in a variety of disciplines in the social sciences or humanities and for students in professionally-oriented programs.

Code	Title	Hours
CMN 101	Public Speaking [1]	3
or CMN 112	Oral & Written Comm II	
CMN 102	Introduction to Communication	4
At least one course from each of two areas of specialization within the Department of Communication (Communication and Culture, Communication and Health, Communication and Organizations, Interpersonal Communication, Mediated Communication and Technology, and Rhetoric and Public Communication). These courses must be numbered at the 200-level or above. A list of courses is available from the Communication undergraduate advisor.		6
Additional hours in Communication. These courses must be numbered at the 200-level or above.		6
Total Hours		**19**

[1] *CMN 111 is a prerequisite for CMN 112. Credit in CMN 111 will not count towards the 19 hours of Communication courses required for the minor.*

At least 6 hours must be at the 300-level or 400-level.

for the Undergraduate Minor in Communication

Community Based Art Education Minor

for the Undergraduate minor in Community Based Art Education

The Community Based Art Education Minor is designed for students who seek to study the role of the visual arts in a variety of locations including cultural centers, museums, hospitals, nursing homes, adult day care centers, schools, recreation centers, and other community settings.

In addition to the completion of the required art education foundation courses, students choose electives in art education, art history, design, and art studio. Throughout their course of study, students will engage Art Education as it meets the challenges of the 21st century, including emerging technologies, new social formations, and new forms of cultural expression.

This minor does not lead to Illinois State Board of Education K-12 certification to teach art.

for the Undergraduate minor in Community Based Art Education

Minimum required major and supporting course work: Students must meet the following course requirements for a total of 18 hours. A minimum of six hours must be completed at the 300 or 400 level.

Code	Title	Hours
ARTE 201	Foundations of Art Education	3
ARTE 202	Facilitating the Art Experience	3
Electives from Art Education Division Offerings		
Select 6 to 12 hours from the following:		6-12
ART 140	Introduction to Art	
ARTE 260	Museums in Action	
ARTE 480	Popular Visual Culture	
Electives from the School of Art and Design in the following areas: ART, ARTD, ARTE, ARTH, ARTS		0-6
Total Hours		**18**

OPTION 2		
Two 400-level CSE courses listed above AND an independent study on a computational topic. In order for an independent study to fulfill the minor requirement, the student must conduct the undergraduate research with one of the CSE affiliated faculty.		

for the Undergraduate Minor in Computational Science & Engineering

The Grainger College of Engineering (https://grainger.illinois.edu/)

Computational Science & Engineering Minor (https://cse.illinois.edu/cse-educational-programs/undergraduate-minor/)

Computer Science Minor

for the Undergraduate Minor in Computer Science

This minor is offered by the Siebel School of Computing and Data Science for students seeking significant knowledge of digital computers without the more complete treatment of a major in computer science. This minor may be taken by any student except majors in the Computer Science programs and in Computer Engineering.

for the Undergraduate Minor in Computer Science

Code	Title	Hours
The following four courses are required: [1]		13
CS 173	Discrete Structures [2]	
CS 124	Introduction to Computer Science I [2]	
CS 128	Introduction to Computer Science II [2]	
CS 225	Data Structures [2]	
Students must take two upper level courses, each from CS at the 300 level or 400 level. At the 300 level, all CS courses are allowed, except CS 397 and CS 398, each of which may only be used by prior special permission from the CS Academic Office. At the 400 level, all CS courses are allowed, excluding CS 400, CS 401, CS 402, CS 403, CS 413, CS 491, CS 492, CS 493, CS 494, CS 497, and CS 499. The two upper level courses must be taken as University of Illinois credit (though one may be taken in a Study Abroad program). [3]		6

1 *Transfer equivalents of CS 124, CS 125, CS 128, CS 173 and/or CS 225 may satisfy these requirements – even if the number of credits for the transfer courses do not equal that for the UIUC equivalents, as long as the student completes at least 16 total credit hours for the minor. If fulfilling the course requirements described herein does not yield 16 credits as a result of differing credits for transfer courses, then the student must take additional CS coursework that is approved by the CS Academic Office, sufficient to yield a minimum of 16 credit hours for the minor.*

2 *The following substitutions are allowed: (*ECE 120 *and* ECE 220*) for (*CS 124 *and* CS 128*); *CS 125 *for* CS 124*;* CS 126 *for* CS 128*; one of* MATH 213, MATH 347, MATH 412 *or* MATH 413 *for* CS 173*. Credit for these substituted courses will count toward the total credit hours for the minor.* MATH 347, MATH 412*, and* MATH 413 *will not count as upper level courses for this minor.*

3 *Students must submit a course modification for any study abroad course used in this category.*

Creative Writing Minor

for the Undergraduate Minor in Creative Writing

The Creative Writing minor, administered by the Department of English's Creative Writing Program, is designed to augment majors from all over campus with a program of small workshops (poetry or fiction) and a variety of other writing, literature, and film courses. The result should be the development of a range of analytical and creative skills that will enrich the undergraduate experience and help prepare students for work in any number of fields.

Code	Title	Hours
CW 100	Intro to Creative Writing	3
Creative Writing Coursework		**9**

Students complete 9 hours of creative writing coursework by choosing one of the following 3-course (9-hour) sequences:	
CW 106	Poetry Workshop I
CW 206	Poetry Workshop II
CW 406	Poetry Workshop III
OR	
CW 104	Fiction Workshop I
CW 204	Fiction Workshop II
CW 404	Fiction Workshop III
Approved Electives	**6**
Students complete 6 hours of coursework in any of the following areas (a minimum of 3 hours must be at the advanced 300 /400 level):	
Any ENGL or CW course	
CMN 423	Rhetorical Criticism
JOUR 475	In-Depth Writing Styles
THEA 211	Introduction to Playwriting
IS 410	Storytelling
Total Hours	**18**

for the Undergraduate Minor in Creative Writing

1. **Concepts:** Students will identify, analyze, and use the elements of literary craft appropriate for their chosen writing genre.
2. **Writing:** Students will develop a personal style, apply craft techniques that they learn during workshops, and choose from several strategies to revise written work.
3. **Workshop:** Students will identify and learn to use the most effective worship practices. They will learn how to critique the written work of their peers, both orally and in writing, in constructive and mutually beneficial ways.
4. **Reading:** Students will read, analyze, and evaluate contemporary and other literature from the perspective of literary craft and the study of creative writing.
5. **Literary Community and Profession:** Students will learn to evaluate, discuss, and research contemporary literary publishing and editing.

Criminology, Law, & Society Minor, UG

for the Undergraduate Minor in Criminology, Law, & Society

Criminology, Law, and Society provides a foundation for students seeking to supplement their major area of study, to develop knowledge and skills needed for criminological, law, and justice related occupations, or to lay foundation for law school or graduate study in sociology, criminology, or justice fields. Students take a range of sociology courses that provide theoretical and practical knowledge while exposing students to current sociological, legal, and justice issues.

for the Undergraduate Minor in Criminology, Law, & Society

Code	Title	Hours
SOC 100	Introduction to Sociology	3-4
or SOC 163	Social Problems	
SOC 275	Criminology	3
One of the following courses:		3
SOC 378		
SOC 477		
SOC 479	Law and Society [1]	
Choose three courses from the following (9 hours minimum); at least 3 hours must be at the 300- or 400-level:		**9**
SOC 101	Sociology of Gender	
SOC 225	Race and Ethnicity	
SOC 310	Sociology of Deviance	
SOC 373	Social Inequality	
SOC 375	Criminal Justice System	
SOC 378	[1]	
SOC 390	Individual Study [2]	
SOC 396	Topics in Sociology [2]	
SOC 400	Internships [2]	
SOC 477	[1]	
SOC 479	Law and Society	
SOC 490	Advanced Independent Study [2]	
SOC 496	Advanced Topics in Sociology [2]	
Total Hours		**18**

[1] *If not taken as part of the core. Credit is not given for SOC 477 and SOC 479.*

[2] *Advisor approval required -- course topic must be focused in criminology and/or law.*

for the Undergraduate Minor in Criminology, Law, & Society

1. Students will be able to explain and apply key criminological, legal, and sociological theories to contemporary issues in crime, law, and justice.

2. Students will be able to evaluate and use relevant concepts, methods, and practical skills to prepare for careers or further study in criminology, law, sociology, or related justice fields.

Critical Film Production Minor

for the Minor in Critical Film Production

The minor in Critical Film Production provides undergraduate students with a rigorous introduction to core critical, formal, and technical aspects of filmmaking through the four required courses. The additional electives allow students to gain deeper theoretical, historical and/or methodological knowledge to enrich their filmmaking practice.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the Minor in Critical Film Production

The minor in Critical Film Production requires a minimum of 21 hours distributed over six courses as follows. At least six hours of advanced (300- or 400-level) courses are included. A course cannot be used to satisfy more than one requirement within the minor.

Code	Title	Hours
Required Course		**12**
MACS 150	Introduction to Digital Media Production	
MACS 260	Film Production	
MACS 370	Cinematography and Sound Design	
or MACS 371	Editing and Post-production for Cinema	
MACS 370 and MACS 371 do not count toward elective credits in the minor.		
Select ONE of the following foundational study electives		**3**
MACS 261	Survey of World Cinema I	
MACS 262	Survey of World Cinema II	
MACS 361	Film Theory	
Select TWO electives from the following list of film history, theory, and criticism courses		**6**
At least one of the elective courses must be at the 300-level or above		
MACS 203	Contemporary Movies	
MACS 205	Introduction to Documentary	
MACS 261	Survey of World Cinema I	
MACS 262	Survey of World Cinema II	
MACS 282	A World of Death and Blood: The Horror Movie	
MACS 284	Animated Media from Mickey to GIFs	
MACS 361	Film Theory	
MACS 366	Film Festivals	
MACS 372	Screenwriting	
MACS 380	21st Century Documentaries	
MACS 485	Making Video Essays	

Note: A course cannot be used toward more than one requirement in the minor.

Dance Minor

for the Undergraduate Minor in Dance

The undergraduate minor in Dance offers students an in-depth experience in the study and practice of dance. Dance is studied through a variety of perspectives and activities, including: dance technique classes, in a global variety of forms, and courses in making dances, dance history and context, and dance production. The minor is comprised of 18 hours of dance-related coursework. In addition to the life-long benefits of artistic fulfillment, health, and discipline that come from dance study, a minor in dance will benefit students who intend to pursue careers in any creative field, including related arts disciplines, the health and well-being industry, education, and body-based humanities research. Study in dance also significantly contributes to the creative economy by building audiences for all arts endeavors and broader public engagement efforts.

BA Dance and BFA Dance majors are not eligible for the undergraduate minor in Dance.

for the Undergraduate Minor in Dance

Students must take at least six hours of advanced (300-level or 400-level courses) and six hours of coursework must be distinct from credit earned for the student's major or another minor.

Context - 6 hours

Code	Title	Hours

Data Science

for the Undergraduate Minor in Data Science

The Minor in Data Science, an interdisciplinary collaboration administered by the Department of Statistics, is designed to provide students with an understanding of data science, including statistical analysis and inference, computation, and business intelligence. A Minor in Data Science will assist students with their major field of study to better prepare them for a career in their chosen field. It will also prepare students for graduate studies in a multitude of areas where data science plays an important role. Interested students should submit the Minor Declaration Form available from the Provost's website. Advising for undergraduates interested in the Minor in Data Science is available in the Department of Statistics.

All University of Illinois Urbana-Champaign undergraduate students are eligible to earn the Minor in Data Science, except for those enrolled in a BS degree program for an X+DS major. While there are no strict prerequisites to enter the Minor, basic familiarity with computers is expected.

for the Undergraduate Minor in Data Science

To complete the Minor, students must complete three core courses plus three supporting courses which cover sufficient data science content from an approved list of courses offered from a range of disciplines. The three core courses are STAT 107, STAT 207, and CS 307. Note that students must complete one calculus course (e.g., MATH 234, MATH 220) and one linear algebra course (e.g., MATH 227, MATH 257) prior to taking CS 307.

To satisfy the completion of three supporting courses in data science, students must choose two courses from the Domain Specific Data Science group and one course from the Data Ethics group. Some courses in the two supporting groups may have prerequisites aside from the three core courses of the Minor. The lists of Supporting Courses that satisfy the Minor in Data Science are dynamic as new classes are added each year. As data science curricula across the University develop, other courses approved by the steering committee for the Minor in Data Science will be added.

Completion of the Minor in Data Science requires at least six hours of advanced (300 or 400 level) course credit distinct from credit earned for any major or another minor.

Code	Title	Hours
STAT/CS/IS 107	**Data Science Discovery**	**4**
STAT 207	**Data Science Exploration**	**4**
CS 307	**Modeling and Learning in Data Science**	**4**
Note that students must complete one calculus course (e.g., MATH 234, MATH 220) and one linear algebra course (e.g., MATH 227, MATH 257) prior to taking CS 307.		
Choose 2 courses in Domain Specific Data Science		**6-8**
ATMS 207	Weather and Climate Data Science	
CS 225	Data Structures	
CS 277	Algorithms and Data Structures for Data Science	
Students may use credit from CS 225 or CS 277, but not both.		
CS 416	Data Visualization	
CS 441	Applied Machine Learning	
GGIS 407	Foundations of CyberGIS & Geospatial Data Science	
IS 357	Introduction to Data Storytelling	
IS 417	Data Science in the Humanities	
IS 445	Data Visualization	
LING 406	Introduction to Computational Linguistics	
MATH 467	Mathematics for Machine Learning	
STAT 432	Basics of Statistical Learning	
STAT 440	Statistical Data Management	
STAT 447	Data Science Programming Methods	
STAT 480	Big Data Analytics	
Choose 1 course in Data Ethics		**3**
IS 467	Ethics and Policy for Data Science	

IS 477	Data Management, Curation & Reproducibility	
Total Minimum Hours Required		**21**

for the Undergraduate Minor in Data Science

Students will:

1. Understand, explain, and utilize basic data science techniques.
2. Cultivate data science skills in a domain specific field through interdisciplinary courses.
3. Develop and apply ethical practices in data analysis.

Disability Studies Minor

for the Undergraduate Minor in Disability Studies

The undergraduate Minor in Disability Studies focuses on the physical, behavioral, biological, and social aspects of disability and chronic health conditions. The minor can include coursework from a broad array of departments, thus accommodating students from different disciplines across the campus. There are no prerequisites for this minor. The curriculum blends cultural and clinical perspectives of disability in society to allow for multiple approaches to understanding disability and to enable individual tailoring to meet students' varied career interests (e.g., medicine, nursing, physical therapy, occupational therapy, speech/hearing therapy).

Students must take at least six hours of advanced (300-level or 400-level courses) and six hours of coursework must be distinct from credit earned for the student's major or another minor. Additional information can be found on the minor in Disability Studies (https://ahs.illinois.edu/disability-studies-minor/) website.

Earth, Society, & Environment Minor, UG

for the Undergraduate Minor in Earth, Society, and Environment

The Earth, Society & Environment (ESE) minor is designed for students who desire to obtain a background in topics related to environmental studies, in order to support study and practice of their major field. A minimum of 18 hours is required.

Course lists can be found on the School's ESE Minor site (https://es.illinois.edu/campus/earth-society-environment-minor/).

for the Undergraduate Minor in Earth, Society, and Environment

Code	Title	Hours
Introductory course from the Earth's Physical Systems, Resources, and Hazards Area course list.		3-4
Introductory course from either the Environment and the Human Response or Sustainability, Policy, and Global Change Area course lists		3-4
ESE 200	Earth Systems	3
Three Advanced Courses from a list maintained by the minor advisor, at least two of which must be listed or cross listed as ESE courses		9-12
Total Hours		**18-23**

for the Undergraduate Minor in Earth, Society, and Environment

1. Develop a foundational understanding of Earth systems and society–environment interactions. Students will describe and explain how environmental processes, resources, hazards, and societal responses are interconnected using systems thinking.
2. Apply appropriate methods and evidence to analyze environmental issues. Students will use relevant quantitative and qualitative approaches at an introductory level, including interpreting data and applying analytical frameworks, to analyze environmental and sustainability challenges.
3. Evaluate and communicate environmental and sustainability concepts. Students will communicate environmental ideas, demonstrating how environmental change, policy choices, and societal actions are relevant for sustainable community outcomes.

East Asian Languages & Cultures Minor

for the Undergraduate Minor in East Asian Languages and Cultures

For decades, Illinois has been a major center for the study and research of the cultures and languages of East Asia. We have trained hundreds of students who have gone on to careers in education, business, finance, industry, law, journalism, international relations, governments and the arts. The goal of the undergraduate minor is that the student gain an in-depth knowledge of the civilizations of East Asia, a firm competence in an East Asian language, a solid familiarity with East Asian cultures through multiple disciplines, and a more advanced knowledge of the region including research and writing.

for the Undergraduate Minor in East Asian Languages and Cultures

Code	Title	Hours
Select one of the following:		5
CHIN 204	Intermediate Chinese II	
JAPN 204	Intermediate Japanese II	
KOR 204	Intermediate Korean II	
Non-language courses as follows:		15
EALC 120	East Asian Civilizations	
12 additional hours of East Asia-related courses (at least 6 of these hours must be at the 300 or 400 level)		
Total Hours		**20**

Note: Completion of CHIN 204, JAPN 204, or KOR 204 satisfies the LAS foreign language requirement.

for the Undergraduate Minor in East Asian Languages and Cultures

1. **Linguistic Competence and Intercultural Understanding:** EALC students will demonstrate proficiency in the target language and effectively communicate in both routine and social situations. They will possess intercultural competence, enabling them to navigate and engage with diverse cultural contexts.
2. **Intellectual Reasoning and Knowledge:** EALC students will critically analyze and reflect on social, cultural, and linguistic differences. They will apply conceptual tools for cultural analysis and articulate their ideas effectively in speech and writing. Students will possess a deep, interdisciplinary knowledge of East Asian cultures and contextualize Asia within global trends and developments.
3. **Creative Inquiry and Discovery:** EALC students will apply their language proficiency, cultural knowledge, and analytical skills to further deepen their understanding of East Asian cultures and societies, contribute to the ever-changing perspectives and ideas about the region, and share what they learn with others through written, spoken, and visual media.

Ecology & Conservation Biology Minor, UG

for the Undergraduate Minor in Ecology & Conservation Biology

A minor in Ecology and Conservation Biology points students toward getting strength in this sub-discipline of biology. Preparation for many careers is advanced by coursework in ecology and conservation, e.g. environmental lawyer, environmental consultant, conservation technician, and environmental educator.

for the Undergraduate Minor in Ecology & Conservation Biology

Code	Title	Hours
IB 150	Organismal & Evolutionary Biol	4
IB 203	Ecology	4
IB 204	Genetics	3-4

or IB 201	Organismal Genetics	
Select two of the following:		6-8
NRES/IB 348	Fish and Wildlife Ecology	
IB 362	Marine Biology	
IB 431	Behavioral Ecology	
CPSC 431/IB 440	Plants and Global Change	
IB 444	Insect Ecology	
IB 451	Conservation Biology	
IB 452	Ecosystem Ecology	
IB 453	Community Ecology	
IB 455	Ecotoxicology and Human Health	
Please note: all prerequisite courses must be taken if specified, and students must complete 6 advanced hours of coursework that are distinct from advanced hours required for their major.		
Total Hours		**17**

for the Undergraduate Minor in Ecology & Conservation Biology

1. Synthesize and apply core knowledge in Integrative Biology, including anatomy, development, ecology, evolution, genetics, molecular biology, physiology, and/or systematics.
2. Apply predictive models to biological phenomena and engage with the process of scientific inquiry.
3. Critically evaluate and communicate complex, dynamic scientific information.
4. Employ curiosity, inquiry, quantitative reasoning, and critical thinking in problem solving.
5. Create solutions for global and local biological challenges using interdisciplinary strategies.
6. Develop professional skills including ethics, proficiency in oral and written scientific communication, data analysis and interpretation, collaboration, and the ability to critically evaluate science-related news and information.

Economics Minor

for the Undergraduate Minor in Economics

The Minor in Economics is designed to provide students with an understanding of central issues and analytical concepts in economics, including consumer choice, profit-maximization, banking and finance, healthcare, education, fiscal and monetary policy, abstract economic modeling, and data analysis for economics. It is customizable to students' interests based on its three track options: Microeconomics, which explores how people and firms consume and produce goods and services; Macroeconomics, which explores countries' economic growth, fiscal and monetary policy, and international trade; or Econometrics, encompassing mathematical models of economic behavior and quantitative methods. All University of Illinois Urbana-Champaign undergraduate students are eligible to earn the Minor in Economics except for those enrolled in one of these majors: Economics BALAS, Econometrics & Quantitative Economics BSLAS, or Computer Science + Economics BSLAS. Prerequisites for each track of the minor vary; please consult the desired minor track for additional information.

Prerequisite to applying for the Economics Minor:

Microeconomics and Macroeconomics tracks:

- MATH 220-Calculus or MATH 221- Calculus I with a grade of C or higher. *MATH 234 can substitute for MATH 220 or MATH 221, with a grade of C or higher. Discuss your intended plan with the Department of Economics Advising Office to ensure MATH 234 will prepare you for advanced Economics coursework.*
- ECON 102 and ECON 202 with a 2.33 or higher Illinois Economics GPA. At least one ECON course must be taken on campus (please see an Economics Academic Advisor if you have completed these courses off-campus or have other credit).

Econometrics track:

- MATH 220-Calculus or MATH 221- Calculus I with a grade of C or higher.
- MATH 225 with a grade of C or higher. (Recommended prior to application, but not required)
- ECON 102, ECON 202 and ECON 203 with a 2.33 or higher Illinois Economics GPA. At least one ECON course must be taken on campus (please see an Economics Academic Advisor if you have completed these courses off-campus or have other credit).

for the Undergraduate Minor in Economics

Code	Title	Hours
Core Economics Requirements		
ECON 102	Microeconomic Principles	3
ECON 202	Economic Statistics I	3
ECON 203	Economic Statistics II	3
ECON 302	Inter Microeconomic Theory	3
Students will select one of the following tracks:		
Microeconomics Track		**6**
Two 400-level elective courses in Microeconomics:		
ECON 411	Public Sector Economics	
ECON 414	Urban Economics	
ECON 440	Economics of Labor Markets	
ECON 450	Development Economics	

ECON 451	Program Evaluation in Developing Economies	
ECON 452	The Latin American Economies	
ECON 480	Industrial Comp and Monopoly	
ECON 481	Govt Reg of Economic Activity	
ECON 483	Econ of Innovation and Tech	
ECON 482	Economics of the Digital Economy	
ECON 484	Law and Economics	
ECON 490	Topics in Economics	
Macroeconomics Track		**9**
ECON 103	Macroeconomic Principles	
ECON 303	Inter Macroeconomic Theory	
One 400-level elective course in Macroeconomics:		
ECON 420	International Economics	
ECON 425	Macroeconomic Policy	
ECON 452	The Latin American Economies	
ECON 490	Topics in Economics (Including: Monetary Policy, Economic Growth))	
Econometrics Track		**9**
ECON 471	Intro to Applied Econometrics	
Two 400-level elective courses in Econometrics:		
ECON 465		
ECON 490	Topics in Economics (Including: Financial Econometrics, Economic Forecasting, Topics in Econometrics, Numerical Methods for Economics)	
Total Hours		**18-21**

for the Undergraduate Minor in Economics

The Economics minor provides the knowledge, experience, and opportunities necessary for students to demonstrate their attainment of the following outcomes:

- Analytical Skills/Problem-Solving: students will effectively visualize, conceptualize, articulate, and solve complex problems or address problems that do not have a clear answer with available information, through experimentation and observation, using microeconomic and macroeconomic theory, as well as calculus and statistical tools.
- Critical Thinking: students will apply economic analysis to everyday problems, helping them to understand events, evaluate specific policy proposals, compare arguments with different conclusions to a specific issue or problem, and assess the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.
- Quantitative Reasoning: students will understand how to apply empirical evidence to economic arguments. Specifically, they may obtain and/or collect relevant data, develop empirical evidence using appropriate statistical techniques, and interpret the results of such analyses.
- Specialized Knowledge and Practical Application: students will develop deeper analytical, critical, and quantitative skills in specialized areas by applying economic concepts to real world situations.
- Communication and Leadership: students will build skills to work as part of a team and lead others, ensuring they are prepared to navigate diverse audiences and situations.

Electrical & Computer Engineering Minor

for the Undergraduate Minor in Electrical & Computer Engineering

Electrical and Computer Engineering (ECE) transforms our day-to-day lives through a multitude of innovative technologies and products related to energy and information exchange. The ECE minor is intended to expose students from other disciplines to the unlimited opportunities for innovation in this exciting field, and to the methodologies and tools used by electrical and computer engineers for the exploration and design of new technologies and products. The minor is open to undergraduates outside the ECE Department. Computer Science majors cannot elect the Computer Engineering Option within the minor.

for the Undergraduate Minor in Electrical & Computer Engineering

Code	Title	Hours
Circuits Requirement:		**3**
Select one of the following:		
ECE 110	Introduction to Electronics	3
ECE 205	Electrical and Electronic Circuits	3
Programming Requirement: [1]		**0-3**
Select one of the following (with no particular preference) unless ECE 220 is taken:		
CS 101	Intro Computing: Engrg & Sci	3
CS 124	Introduction to Computer Science I	3
A probability or statistics course chosen from an approved list below:		**3-4**
ECE 313	Probability with Engrg Applic	3

IE 300	Analysis of Data	3
BIOE 310	Computational Tools for Biological Data	3
MATH 461	Probability Theory	3 or 4
MATH 463	Statistics and Probability I	4
CEE 202	Engineering Risk & Uncertainty	3
CS 361	Probability & Statistics for Computer Science	3
Select one of the following options below. Both the Core and Advanced Core courses from Option A or B must be completed		
A. Electrical Engineering Option		**10-11**
Core requirement:		
ECE 210	Analog Signal Processing	4
Advanced Core Electives:		
Two ECE courses chosen from an approved list below:		
ECE 310	Digital Signal Processing	3
ECE 329	Fields and Waves I	3
ECE 330	Power Ckts & Electromechanics	3
ECE 340	Semiconductor Electronics	3
ECE 342 & ECE 343	Electronic Circuits and Electronic Circuits Laboratory	4
B. Computing Engineering Option		**15-16**
Core Requirement:		
ECE 120	Introduction to Computing	4
ECE 220	Computer Systems & Programming	4
Advanced Core Electives:		
Two ECE courses chosen from an approved list below:		
ECE 385	Digital Systems Laboratory	3
ECE 391	Computer Systems Engineering	4
ECE 411	Computer Organization & Design	4
Elective ECE Courses to achieve a minimum of 18 hours of ECE course work. [2]		**0-5**

Footnotes

1 *If the student will be taking ECE 220 following ECE 120, this requirement will be waived.*

2 *Completion of the minor requires a minimum of 18 hours ECE course work. No additional hours are needed in this category if all courses taken to satisfy the previous requirements are ECE courses. Otherwise choose from any 300 and 400 level classes except ECE 316, ECE 317, ECE 396, ECE 397, ECE 496, ECE 499.*

International Minor in Engineering

for the Undergraduate International Minor in Engineering

Many Grainger Engineering graduates will be involved in international activities during their professional careers. In anticipation of such involvement, the college offers an opportunity for students to complete an international minor as part of any engineering degree program. All international minor requirements must be satisfied before graduation.

for the Undergraduate International Minor in Engineering

To earn the Undergraduate International Minor in Engineering, students must complete 21 hours of coursework as noted below. At least six (6) hours of coursework must be advanced courses (300- or 400-level) and distinct from credit earned for the student's major or another minor.

Code	Title	Hours
Language courses, maximum of 12 credit hours. Students completing a minor in Great Britain or Australian studies will not have to complete a language requirement. Instead, the courses will all be chosen from the non-engineering, globally focused course list		12
Non-engineering, globally focused courses. Must include one 300/400 level course and one political science or economics related course.		9
ENG 299	Engineering Study Abroad (At least 4 weeks in residence for work or study in chosen country or region.)	0
Total Hours		**21**

Engineering Technology and Management for Agricultural Systems Minor

for the Undergraduate Minor in Engineering Technology and Management for Agricultural Systems

The Engineering Technology & Management for Ag Systems minor gives students a background in applied engineering technology in the areas of agriculture, construction, energy, and the environment. Knowledge in these areas will help students gain practical skills and experience useful in their careers and everyday life.

for the Undergraduate Minor in Engineering Technology and Management for Agricultural Systems

Code	Title	Hours
ETMA 100	Technical Systems in Agr	3
Fifteen Hours, at least six of which must be at the 400 level. No more than 4 hours of independent study will count toward the minor (ETMA 496). Selected from:		15
ETMA 232	Materials and Construction Sys	
ETMA 233	Metallurgy & Welding Processes	
ETMA 234	Wiring, Motors and Control Sys	
ETMA 262	Agricultural Machine Systems Management	
ETMA 352	Land and Water Mgt Systems	
ETMA 363	Fluid Power Systems	
ETMA 371	Residential Housing Design	
ETMA 372	Environ Control & HVAC Systems	
ETMA 381	Grain Drying & Storage Systems

ETMA 438	Renewable Energy Applications	
ETMA 464	Heavy Equipment Powertrains	
ETMA 465	Chemical Applications Systems	
ETMA 467	Precision Agric Technology	
ETMA 496	Independent Study	
Total Hours		**18**

for the Undergraduate Minor in Engineering Technology and Management for Agricultural Systems

During their time in the Engineering Technology and Management for Agricultural Systems minor, students will:

1. Obtain subject matter expertise
2. Identify problems and develop problem-solving abilities / critical thinking
3. Function effectively on multidisciplinary teams
4. Demonstrate professional and ethical values
5. Communicate effectively in written and oral forms
6. Engage in life-long learning skills
7. Develop leadership and interpersonal skills
8. Analyze and interpret data
9. Understand social and cultural contexts
10. Develop global perspective
11. Carry out independent research with expertise in research design, methods, and analysis

English as a Second Language Minor

for the Undergraduate Minor in English as a Second Language

The English as a Second Language minor, sponsored by the Department of Linguistics, prepares a student to teach English overseas and in contexts other than U.S. public schools. Completion of the minor fulfills the coursework requirement for a Certificate in Teaching English as a Second Language (TESL). To receive a Certificate in TESL and a letter of completion from the department, the student must apply for the Certificate after completing all certificate requirements. Students must declare their minor at the start of their study. The Certificate in TESL does not lead to ISBE State certification for K-12 Schools.

for the Undergraduate Minor in English as a Second Language

Code	Title	Hours
LING 100	Intro to Language Science	3
LING 489	Theoretical Foundations of SLA	3
EIL 411	Intro to TESL Methodology	3
Select three of the following:		9

EIL 422	Engl Grammar for ESL Teachers	
EIL 445	Second Lang Reading & Writing	
EIL 460	Principles of Language Testing	
EIL 488	Phonology for Second Language Teachers	
LING 450	Sociolinguistics I	
or EIL 456	Lang and Social Interaction I	
Total Hours		**18**

for the Undergraduate Minor in English as a Second Language

1. Students will receive grounding in core areas of Teaching English as a Second Language.
2. Students will receive grounding in linguistic theory.
3. Students will gain theoretical and practical grounding in pedagogy.
4. Students will gain knowledge on and the ability to assess student learning at a number of levels.
5. Students will receive grounding on multi-cultural and multi-lingual practices amongst their potential student populations.
6. Students will gain 'hands-on' practice in teaching.

English Minor, UG

for the Undergraduate Minor in English

Code	Title	Hours
ENGL 200	Introduction to the Study of Literature and Culture	3
ENGL 301	Introduction to Critical Theory	3
One 200-level course in British literature before 1800		3
One 200-level course in British or American literature after 1800		3
Two additional 300- or 400-level courses in English		6
One English or Creative Writing course selected in consultation with an English Department advisor		3
Total Hours		**21**

for the Undergraduate Minor in English

Students completing the minor will be able to:

1. **Analyze multimodal texts** using foundational interpretive methods such as close reading, genre awareness, and formal or rhetorical analysis.
2. **Interpret texts within cultural, historical, and theoretical contexts**, recognizing how meaning is shaped by broader intellectual and social frameworks.
3. **Construct clear, focused arguments** supported with relevant textual evidence and tailored to specific audiences.
4. **Formulate productive research questions** and integrate primary and secondary sources effectively into written or oral work.
5. **Recognize how forms of social difference**—including race, ethnicity, gender, and sexuality—shape the creation, interpretation, and circulation of multimodal texts.

Environmental Economics & Law Minor

for the Undergraduate Minor in Environmental Economics and Law

The minor in Environmental Economics and Law is designed to provide students with basic skills in economic and legal analysis, and to teach them how to apply those tools to environmental problems. Students will emerge from this minor with in-depth knowledge about issues related to environmental protection and natural resource management and possibly sustainable development or land-use planning. The 300- and 400-level courses may have additional prerequisites not included in requirements for the minor.

Food & Environmental Systems Minor, UG

for the Undergraduate Minor in Food and Environmental Systems

The Minor in Food and Environmental Systems is designed primarily for students who are enrolled in the Agricultural Communications Major which is jointly administered by the College of ACES and the College of Media. The eighteen hours of coursework in this minor provide a significant background in consumer sciences, agricultural management and production, and environmental and natural resources to support the study and practice of Agricultural Communications. Selection of additional courses beyond the core will depend on the student's major and interests.

for the Undergraduate Minor in Food and Environmental Systems

Enrollment in ACES 102 , FSHN 101 , and NRES 100 , four hours from selected 100- and 200-level courses, and six hours of 300-and 400-level courses as listed below is required for all students completing this minor. Courses in the minor cannot be taken Credit/No Credit. This minor is administratively based in ACES Academic Programs.

Required Courses for the Food and Environmental Systems Minor

Code	Title	Hours
ACES 102	Intro Sustainable Food Systems	3
FSHN 101	The Science of Food and How it Relates to You	3
NRES 100	Fundamentals of Env Sci	3
Select a minimum of three hours from the following introductory level courses:		3
ANSC 100	Intro to Animal Sciences	
ANSC 101	Contemporary Animal Issues	
ANSC 110	Animal Exploration: A Global Perspective	
ANSC 223	Animal Nutrition	
ANSC 224	Animal Reproduction and Growth	
ANSC 250	Companion Animals in Society	
ACE 100	Introduction to Applied Microeconomics	
ACE 210	Environmental Economics & Policy	
ACE 222	Agricultural Marketing	
ACE 231	Food and Agribusiness Mgt	
ACE 232	Farm Management	
ACE 251	The World Food Economy

Select one of the following: [1]		**3-6**
FSHN 232	Science of Food Preparation	
FSHN 260	Raw Materials for Processing	
FSHN 302	Sensory Evaluation of Foods	
FSHN 416	Food Chemistry Laboratory	
FSHN 418	Food Analysis	
FSHN 460	Food Processing Engineering	
FSHN 466	Food Product Development	
ANSC 350	Principles of Biochemistry in Animals	
MCB 450	Introductory Biochemistry	
ABE 483	Engineering Properties of Food Materials	
Total Hours Required		**18**

[1] *Students who take the combination FSHN 481 & FSHN 483 (4 hours total) need to select one course (2 hours) at minimum from the second list to reach the total minimum required hours (18 hours). Students who take FSHN 465 (3 hours), will need to select two courses (6 hours) at minimum from the second list to reach the total minimum required hours.*
For a FS minor with an emphasis in food processing it is recommended that students select the combination of FSHN 481 & FSHN 483 (4 hours total) option. However, FSHN 481 & FSHN 483 (4 hours total) have prerequisites that not every student seeking a minor may choose to meet.
Students cannot take both the combination of (FSHN 481 & FSHN 483) and FSHN 465.

French Minor, UG

for the Undergraduate Minor in French

The French minor develops a student's proficiency in spoken and written French while introducing them to the study of literature, culture, and society in France and the broader francophone world. Through coursework in conversation, grammar and writing, and cultural analysis, students explore questions of language, identity, politics, and everyday life across diverse media. The minor complements majors all majors by strengthening intercultural communication skills, critical analysis, and preparation for globally oriented careers.

for the Undergraduate Minor in French

Code	Title	Hours
FR 207	Writing and Grammar Workshop	3
FR 211	Introduction to Literary Studies	3
FR 212	Introduction to Cultural Analysis: French Identities	3
FR 205	French in Conversation	2-3
or FR 313	Worldwide Spoken French	
Select one of the following:		3
FR 335	French Cultural History to 1789	
FR 336	French Cultural History 1789-1968	
FR 337	Contemporary France	
Two French courses at the 300- or 400-level in any of the following areas: language and translation, business, cinema, culture, linguistics, literature, media		6
Total Hours		**20-21**

for the Undergraduate Minor in French

Upon completing a minor in French, students will be able to:

- **Language proficiency and accuracy:**
  - Demonstrate an intermediate level of proficiency and accuracy in reading, writing, listening, and speaking in interpretive, presentational, and interpersonal modes of communication (roughly corresponding to Intermediate High on ACTFL / B2 on CEFRL), especially on familiar topics and everyday situations.
- **Research skills and literacy in texts, media, and technology in French:**
  - Locate, understand, and make use of culturally authentic and relevant sources in French (texts, media, and digital resources); use appropriate tools to support language production.
- **Intercultural awareness, knowledge, and competence**
  - Recognize and describe products, practices, and perspectives of the French and Francophone world, and make comparisons to their own and other cultures, demonstrating growing intercultural curiosity and sensitivity.
- **Knowledge about literature and the visual arts in French:**
  - Gain familiarity with major authors, works, genres, or movements in French and Francophone literature and visual culture, and discuss them in relation to broad historical or cultural contexts.
- **Knowledge about French linguistics:**
  - Demonstrate awareness of key features of the French language.

Game Studies & Design Minor

for the Undergraduate Minor in Game Studies & Design

The Game Studies & Design Minor is intended to foster critical skills in academic game studies, and technical skills in game design. The minor will serve undergraduates who are interested in the study and design of games, gaming, game design and the digital, extended and virtual reality (XR/VR) and artificial intelligence (AI) technologies involved with the crafting of interactive systems and interfaces relevant to the game, film, education, and media industries, as well as a range of other emerging professions. Through this minor, students will learn to think critically about the history, cultural meaning, social impact, ethics, and increasingly significant role of games, gaming, and interactive media in a diverse society; they will develop the logical, algorithmic, narrative, and design capacities needed to make games, interactive narratives, and simulations; and they will become prepared for graduate work, if desired, on a path to pursuing a career in the game industry or in academic game studies research.

for the Undergraduate Minor in Game Studies & Design

The program requires 18 credit hours of undergraduate coursework, for which students must complete 9 credit hours of foundational coursework, and 9 credit hours of elective coursework.

Code	Title	Hours
Core Required Foundational Courses		
GSD 101	Introduction to Game Studies and Design	
A minimum of one 100-200 level historical/social perspectives course.		

Choose from the following:		
GSD 102	Introduction to the Videogame Industry	
IS 142	Social History of Games and Gaming	
GSD 202	Let's Play: Understanding the Role of Play in Life and Art	
A minimum of one 100-200 level introductory game design course.		
Choose from the following:		
GSD 103	The Basics of Game Design	
CI 210	Introduction to Digital Learning Environments	
Electives		
Students must choose a minimum of three elective courses, at least 2 at the 300-400 level, from the lists below.		

Electives from the College of Applied Health Sciences

Code	Title	Hours
COMMUNITY HEALTH		
CHLH 441		3 or 4
KINESIOLOGY		
KIN 346		3
KIN 369		3
KIN 442		3 or 4
KIN 474		3 or 4
RECREATION, SPORT AND TOURISM		
RST 199	Undergraduate Open Seminar (Section ESF only)	1 to 5

Electives from the College of Education

Code	Title	Hours
CURRICULUM & INSTRUCTION		
CI 210	Introduction to Digital Learning Environments (Can only be used for either a foundational required course OR an elective course, but not both)	3
CI 437	Educational Game Design	3 or 4
CI 439		3 or 4
CI 483	Computer Systems for CS Teachers	2
CI 499	Issues and Development in Education (Sections "Attention Learning & Tech" and "Technology Apps for Teachers" only)	2 to 4

Electives from the College of Fine & Applied Arts

Code	Title	Hours
FINE & APPLIED ARTS		
FAA 499	Special Topics (Section "Escape Rooms as Interactive Theatre" only)	0 to 4
ART

Gender & Women's Studies Minor, UG

for the Undergraduate Minor in Gender and Women's Studies

A minor in GWS provides complementary tools for many majors in the humanities, arts and sciences. The minor advocates actively reading, questioning, challenging, and understanding racialized, sexualized, and gendered bodies. The Department of Gender and Women's Studies must approve a student's minor course plan. Students must register their minor with the Gender and Women's Studies advisor.

for the Undergraduate Minor in Gender and Women's Studies

At least 6 hours of advanced coursework must be distinct from credit earned for the student's major or another minor.

Code	Title	Hours
Select two of the following:		6
GWS 201	Race, Gender & Power	
GWS 202	Sexualities	
GWS 350	Feminist & Gender Theory	
Additional Coursework- At least 9 additional hours of coursework offered by the Gender and Women's Studies Department at the 300- or 400-level. Required courses consist of a selected list of courses offered by the Department of Gender & Women's Studies; they are on an approved list maintained in the department office and with the GWS advisor. [1]		9
3 hours of area electives at any level. For a list of approved courses contact the GWS department office or the GWS advisor.		3
Total Hours		**18**

[1] *Topics courses (GWS 395, GWS 495) may count up to 3 hours toward additional coursework with consent of the GWS advisor. GWS 390 or*

GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.

for the Undergraduate Minor in Gender and Women's Studies

Students completing the minor will be able to:

1. **Demonstrate foundational knowledge** of key concepts in Gender and Women's Studies, including feminist movements, intersectionality, queer and trans studies, and feminist and queer theories.
2. **Apply introductory feminist and queer frameworks** to support critical inquiry, creative thinking, and effective oral and written communication.
3. **Identify how gender and related forms of difference**—including race, indigeneity, religion, nation, disability, and sexuality—shape social, cultural, political, and aesthetic claims.
4. **Demonstrate self-reflexivity** regarding their own social positions and engage constructively in classroom or community settings informed by feminist commitments to equity and care.
5. **Explain how global social, cultural, political, economic, and environmental forces** influence experiences across different contexts, using basic indigenous, postcolonial, or transnational feminist and queer perspectives.

Geography & Geographic Information Science Minor

for the Undergraduate Minor in Geography & GIS

The minor in Geography and Geographic Information Science provides students with both foundational courses in core geographical ideas and methods, and deeper specialization with advanced coursework that prepares students for research and professional opportunities. Students select six hours of GGIS core courses at the 100/200 level, and 12 hours at the 200, 300, or 400 level, at least six hours of which must be at the 300 or 400 level.

for the Undergraduate Minor in Geography & GIS

Code	Title	Hours
Two core courses selected from the following:		6
GGIS 101	Global Development & Environment	
GGIS 103	Earth's Physical Systems	
GGIS 104	Social and Cultural Geography	
GGIS 106	Geographies of Globalization	
GGIS 210	Social & Environmental Issues	
GGIS 221	Geographies of Global Conflict	
GGIS 224	Environmental Data Science	
Four 200-, 300-, or 400-level GGIS courses, at least six hours of which must be at 300- or 400-level		12
Total Hours		**18**

for the Undergraduate Minor in Geography & GIS

---

1. Geographic Understanding; GGIS minor students will be able to define fundamental geographical concepts for describing the interconnectedness of places and scales in human-environmental systems, including the sustainability of those systems.
2. Spatial Patterns and Processes: GGIS minor students will be able to analyze spatial patterns, distributions, processes, and connections within and among different human-environmental systems, using qualitative, quantitative, computational, and/or spatial methods of research appropriate to their level of training and their field of geographic inquiry.
3. Problem-Solving and Communication: GGIS minor students will be able to formulate and conduct geographic analyses and communicate the results in verbal, written, and visual form.

Global Markets & Society Minor

for the Undergraduate Minor in Global Markets & Society

The LAS **Global Markets and Society** Minor enables students at Illinois to gain interdisciplinary knowledge of global market-society relations through historical and global perspectives that emphasize the social, political, and economic forces that shape market institutions and practices. The minor requires 18-21 hours of coursework completed through six courses, *with a minimum of six hours at the advanced level (300- or 400-level)*. A professional development capstone experience course is optional and can be met by completing an internship or participating in a research experience and/or written project. The LAS Global Markets and Society Minor is open to undergraduate students in any major at the University of Illinois Urbana-Champaign campus.

Applications Requirements and Procedures

Completion of 30 hours of undergraduate coursework by the end of the Spring semester of application.

Students are admitted by application into the LAS Global Markets and Society Minor. Interested students will be asked to demonstrate a commitment to the program through (a) completing an application to the program, including a written statement of goals for participation in the program and/or evidence of or commitment to participation in activities designed to enhance leadership, and (b) developing a program plan with the program coordinator and/or their academic advisor prior to admission.

Only students officially admitted into the LAS Global Markets and Society Minor may earn the minor.

OPTIONAL Professional Development Capstone Experience (3 hours)

Choose one option in consultation with the Global Markets and Society minor advisor:
Internship or Field Experience in a market-focused organization

Research Experience with a faculty member	
Analytical/Research Paper with faculty guidance	
Credit is awarded for each of these three options on the basis of an analytical/research paper written by the student under the supervision of a faculty adviser	
Total Minimum Hours	**18**

for the Undergraduate Minor in Global Markets & Society

Students in the LAS Global Studies Global Markets and Society minor will be able to:

1. Identify how complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are affected by the local identities and ethical choices of individuals and institutions.
2. Develop social scientific skills to explain these interconnections through data collection and analysis, building familiarity with academic literature, and written assignments.
3. Reinforce the practical importance of skills and knowledge from traditional liberal arts disciplines in business, government, non-profit, and non-governmental sectors.
4. Gain social awareness and cultural understanding of the ways in which markets, societies and associated institutions interact to produce outcomes at the local, national, and global levels.
5. Integrate the minor with their current major(s) to add depth and sophistication to their understanding of global interconnections with their primary academic/professional field. The minor will provide a foundation for increased complexity of engagement with interdisciplinary fields, projects, and intellectual inquiry.

Global Studies Minor

for the Minor in Global Studies

The Global Studies Minor provides a multidisciplinary study of a global theme with the requirement of advanced language training to promote the development of intercultural skills. In consultation with an advisor, students select 21 hours of thematically-related courses from a variety of departments to form a coherent program of study suited to individual interests, educational and/or career aspirations. The Global Studies Minor can complement any major.

Code	Title	Hours
Social Science Core Courses		
Select one course from three disciplines.		9
	Anthropology: ANTH 230, ANTH 268, ANTH 270	
	Economics: ECON 202, ECON 420, ECON 450	
	Geography: GGIS 204, GGIS 210	
	Global Studies: GLBL 200	
	History: HIST 258, HIST 259, HIST 274	
	Linguistics: LING 222	
	Political Science: PS 241, PS 280/PS 281, PS 282	
	Sociology: SOC 226, SOC 270	
Language and Culture Studies Requirements		
Advanced Language Coursework. Select a course in a language other than your primary language(s).		3
	Arabic: ARAB 405, ARAB 406	
	Chinese: CHIN 305, CHIN 306	
	French: FR 205, FR 207, FR 211, FR 212, FR 313, FR 314, FR 413	
	German: GER 211, GER 212, GER 320	
	Hebrew: HEBR 405, HEBR 406	
	Hindi: HNDI 405, HNDI 406	
	Italian: ITAL 200, ITAL 210, ITAL 220, ITAL 310, ITAL 380	
	Japanese: JAPN 305, JAPN 306	
	Korean: KOR 305, KOR 306	
	Persian: PERS 403, PERS 404, PERS 454	
	Portuguese: PORT 402, PORT 403, PORT 404	
	Quechua: LAST 445	
	Russian: RUSS 301, RUSS 302	
	Spanish: SPAN 200, SPAN 204, SPAN 208, SPAN 228	
	Swahili: SWAH 405, SWAH 406	
	Turkish: TURK 405, TURK 406	
	Wolof: WLOF 405, WLOF 406	
Thematic Area Requirements		
Students choose an approved thematic area and, in consultation with a Global Studies advisor, construct an appropriate customized curriculum. Students must choose 200- to 400-level courses and at least 6 hours must be at the 300- or 400-level.		9
Total Hours		**21**

for the Minor in Global Studies

Global Studies minors will be able to:

1. Discover how complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are affected by the local identities and ethical choices of individuals and institutions
2. Develop social scientific skills to explain these interconnections through data collection and analysis, building familiarity with academic literature, and written assignments.

3. Apply knowledge to promote inquiry, discover solutions, and generate new ideas and creative works while enhancing their capacity to conduct independent research.
4. Gain social awareness and cultural understanding through intensive experiential, cross-cultural coursework and advanced language study.
5. Integrate the minor with their current major(s) to add depth and sophistication to their understanding of global interconnections with their primary academic/professional field. The minor will provide a foundation for increased complexity of engagement with interdisciplinary fields, projects, and intellectual inquiry.

Health Administration Minor

for the Undergraduate Minor in Health Administration

The Health Administration Minor is directed toward undergraduate students across campus, and within the College of Applied Health Sciences, who seek to understand the business side of health care. The field of health administration is growing quickly. Expertise in health administration can help students enter into an occupation that has excellent job prospects with a high median salary. Health administration is a dynamic field given the constant changes in healthcare, insurance, policy, and technology.

The requirements for the Health Administration Minor include three required courses that will provide students with foundational knowledge. In addition, students will be exposed to health care systems, hospital and insurance administration, and management principles relative to health care institutions. The requirements represent 9 credit hours of coursework, 6 of which are offered at an advanced level. In addition, students will need to complete at least 8 credit hours from a list of elective courses. This will enable students to acquire greater knowledge in a specific area of interest.

The Health Administration Minor prepares students to understand the business side of health care. Coursework offers students exposure to health care systems, hospital and insurance administration, and management principles relative to health care institutions. Students must complete 9 hours of foundational/required courses and a minimum of 8 hours of approved electives. To learn more, visit the Health Administration Minor page (https://www.ahs.illinois.edu/healthadmin-minor/).

for the Undergraduate Minor in Health Administration

Minimum required course work: Students must complete 9 hours of required coursework and a minimum of 8 hours of approved elective coursework, including at least 6 hours of 300- or 400-level courses that are not used in any other major or minor.

Code	Title	Hours
Foundational Courses (Required):		
HK 206	Health Care Systems	3
HK 417	Health Services Financing	3
HK 421	Health Administration	3
Electives Courses:		**Minimum of 8**
HK 202	Health Careers & Professionalism	1
HK 208	Introduction to Medical Ethics	3
HK 272	Aging and Health Policy	3
HK 305	Community Health Organizations	3
HK 361	Civic Engagement in Wellness	3
HK 416	Applied Health Data Analysis	3
HK 418	Organization of Health Care	3
HK 419	Artificial Intelligence in Public Health	3
HK 420	Community Health Assessment and Planning	3
HK 422	Community Health Workers	3
HK 424	Emergency Preparedness, Planning, and Response	3
HK 472	Health and Kinesiology Study Abroad	3
HK 480	Medical Aspects of Disability	4
Total Hours (Minimum Required)		**17**

for the Undergraduate Minor in Health Administration

1. Demonstrate a basic understanding of major issues confronting health care systems from a macro perspective. Identification and analysis of the functions, major participants and trends in health care systems in the United States and abroad.
2. Demonstrate a basic understanding of major topics and emerging trends in health financing, including sources of revenue, public and private financing organizations, reimbursement and sources of revenue to health providers, and capital financing in the health care industry.
3. Demonstrate an ability to examine management principles relative to health care institutions with emphasis on goal setting, decision making, system analysis, organizational structure, conflict resolution, and leadership theories.

Hindi Studies Minor

for the Undergraduate Minor in Hindi Studies

The minor in Hindi Studies is designed for students interested in receiving training in processing and using Hindi in a wide variety of authentic (from informal to institutional) contexts. Students will be encouraged to read authentic Hindi material from different genres and registers (including Hindi print media). Completion of the minor requires at least 19 hours in applicable courses.

for the Undergraduate Minor in Hindi Studies

Code	Title	Hours
Hindi language requirement		10
HNDI 404	Intermediate Hindi II	
HNDI 405	Advanced Hindi I	
HNDI 406	Advanced Hindi II	
Two courses in Indian Linguistics/sociolinguistics (to be chosen from the following list in consultation with advisor)		6
LING 115	Language and Culture in India	
HNDI 412	Business Hindi	
LING 222	Language in Globalization	
One historically significant language course related to Modern Hindi or a course on Indian/South Asian Literature		3-5
SNSK 201	Elementary Sanskrit I	
SNSK 202	Elementary Sanskrit II	
ARAB 201	Elementary Standard Arabic I	
ARAB 202	Elementary Standard Arabic II	
PERS 201	Elementary Persian I	
PERS 202	Elementary Persian II	
HNDI 408	Intro to South Asian Lit	
Students with prior knowledge of any of the languages mentioned above can also meet the 3-5 credit requirement by taking upper level courses of the languages.		
Total Hours		**19-21**

for the Undergraduate Minor in Hindi Studies

1. Students will acquire advanced level proficiency in speaking, listening, reading, writing in Hindi.
2. Students will acquire knowledge of products, practices, and perspectives of culture related to Hindi.
3. Students will be able to connect knowledge from the Hindi minor to other disciplines, especially business, literature, dynamics of global communication, women and gender studies, education, and health.
4. Students will be able to develop knowledge of a variety of texts (including films), contexts, genres, registers and styles of Modern Hindi.
5. Students will be able to learn the linguistically distinct varieties of Hindi and the role and impact of other Indian languages in variations in Hindi.

Hip Hop Culture and the Arts Minor

for the Undergraduate minor in Hip Hop Culture and the Arts

The Undergraduate Minor in Hip Hop Culture and the Arts is an interdisciplinary program housed in the College of Fine Applied Arts. Students completing this program will explore fundamental content in Hip Hop history, generate original creative work, engage with critical cultural considerations, develop introductory skills with relevant digital media, and participate in youth programming in the Champaign-Urbana community.

The Minor is open to all undergraduate students, with no prerequisite requirements. The student is responsible for notifying their college of the desire to pursue the minor by completing and appropriately filing the Statement of Intent to Pursue a Campus-Approved Minor (https://go.illinois.edu/MinorDeclaration/).

Code	Title	Hours
If needed, select from any additional or repeatable courses above to complete the 16 minimum hours required for the minor		
Other courses may be approved in selection with and approved by minor advisor		

At least six hours of coursework for the minor should be advanced (300-level or 400-level courses) and must be distinct from credit earned for your major or another minor.	
Total Hours	**16**

for the Undergraduate minor in Hip Hop Culture and the Arts

Student Learning Outcomes

- **Foundations:** Students will demonstrate understandings of the history and evolution of Hip Hop culture.
- **Creativity:** Students will generate original work in at least one artistic practice relevant to Hip Hop culture.
- **Culture:** Students will engage with Hip Hop scholarship that relates critical cultural understandings to inform their own work as emerging artists, scholars, and professionals.
- **Digital Media:** Students will develop skillsets and understandings around digital media to engage globally and locally in contemporary Hip Hop culture.

Declare the Minor (https://go.illinois.edu/MinorDeclaration/)

History Minor, UG

for the Undergraduate Minor in History

The history minor is designed for students who would like to pursue a passion for history in conjunction with any major at the university. History minors graduate with an advanced capacity to think contextually, locate and analyze evidence, evaluate competing viewpoints, assess causation, offer new interpretations, and solve complex problems. There is considerable flexibility in the minor, with course options that may be selected based on student interests.

Code	Title	Hours
HIST 200	Intro Hist Interpretation	3
One History course focused on Non-Western (African, Asian, Global, Latin American, Middle Eastern) history, chosen from a list maintained in the department		3
Additional History coursework, selected with an advisor		12
Total Hours [1]		**18**

[1] *At least 6 hours must be at the 300- or 400-level; no more than 6 hours at the 100-level. With permission, 3 hours may be study abroad hours.*

for the Undergraduate Minor in History

Students completing the minor will be able to:

1. **Investigate historical questions and problems**, analyzing primary and secondary sources to develop a deeper understanding of past events and their complexities.
2. **Communicate historical knowledge effectively**, producing well-reasoned and evidence-based written and oral work that demonstrates proficiency in research and argumentation.

Horticulture Minor

for the Undergraduate Minor in Horticulture

The Horticulture minor is designed for students who desire a significant background in horticulture to support study and practice of their major field. Selection of additional courses beyond the core will depend on the student's major and interests. Enrollment in the Horticulture minor is not available to students enrolled in the Horticultural Food Systems concentration within the Crop Sciences major. Courses in the minor cannot be taken Credit/No Credit. **At least six hours of coursework for the minor should be advanced (300-level or 400-level courses) and must be distinct from credit earned for the student's major or another minor.**

for the Undergraduate Minor in Horticulture

Code	Title	Hours
Core Requirements		**7**
HORT 100	Introduction to Horticulture	
HORT 341	Greenhouse Mgmt and Production	
HORT Electives		**11**
At least 2 additional hours of HORT 3XX-4XX. [1]		
Select a minimum of 9 hours from any HORT courses (excluding HORT 393 and HORT 395).		
Total Hours		**18**

[1] *At least six hours of coursework for the minor should be advanced (300-level or 400-level courses) and must be distinct from credit earned for the student's major or another minor.*

Hospitality Management Minor

for the Undergraduate Minor in Hospitality Management

The Hospitality Management minor prescribes courses that meet the professional needs of the hospitality industry including hotels and food service operations and is comprised of 18 hours of hospitality related coursework. The minor is designed for students interested in expanding their knowledge and application of management principles, with a focus on the unique application in the field of hospitality. A minor in Hospitality Management would benefit those students who intend to pursue careers in the hospitality or customer service industries. This minor is not appropriate for students pursuing the FSHN concentration in Hospitality Management.

for the Undergraduate Minor in Hospitality Management

No GPA minimum.
Courses in the minor cannot be completed credit/no credit.

Code	Title	Hours
Courses required for minor in Hospitality Management		
FSHN 140	Introduction to Hospitality	3
FSHN 345	Strategic Operations Management	3
FSHN 346	Foundations of Hotel Management	3
FSHN 441	Services Management	3
FSHN 442	Hospitality Management & Leadership Skills	3
Select a minimum of 4 credit hours from the following:		
FSHN 145	Intro Hospitality Management	
FSHN 249	Food Service Sanitation	
FSHN 340	Food Production and Service	
FSHN 343	Foundations in Beverage Management: Introduction to Wine, Beer and Spirits	
ANSC 309	Meat Production and Marketing	
FSHN 443	Management of Fine Dining	
LEAD 321	Training and Development	
Total Credit Hours Required		**18**

for the Undergraduate Minor in Hospitality Management

1. Integrate human, financial, and physical resource management into hospitality related operations.
2. Understand and apply current concepts of hospitality to successful business management and leadership.
3. Evaluate elements of service management.

Industrial and Agricultural Safety and Health Minor

for the Undergraduate Minor in Industrial and Agricultural Safety & Health

The Industrial & Agricultural Safety and Health minor equips students with a comprehensive understanding of workplace safety and health issues, focusing on industrial and agricultural environments. This program emphasizes injury prevention, safety management, and occupational health strategies, preparing students to address safety challenges in diverse industries.

for the Undergraduate Minor in Industrial and Agricultural Safety & Health

Admissions prerequisites: This minor has prerequisites of a minimum of 30 hours with a 2.5 GPA.

Code	Title	Hours
ETMA 421	Industrial and Agricultural Safety-Injury Prevention	3
ETMA 422	Industrial and Agricultural Occupational Illness Prevention	3
ETMA 425	Managing Industrial and Agricultural Safety Risks	3
A minimum of three credit hours is required from the following courses:		3
ETMA 293	Off-Campus Internship	1 to 4
ETMA 295	Undergrad Research or Thesis	1 to 4
ETMA 496	Independent Study	1 to 4
A minimum of six credit hours selected from:		6
ALEC 490	Foundations of Adult Training and Development	
FSHN 480	Basic Toxicology	
HDFS 105	Intro to Human Development	
HK 111	Introduction to Public Health	
HK 201	Health Sciences Research Methods	
HK 207	Introduction to Epidemiology	
HK 209	Introduction to Biostatistics and Health Data Analysis	
HK 262	Motor Develop, Growth & Form	
HK 300	Health Behavior Theories and Applications	
HK 400	Human-Robot Interaction for Health and Wellness	
HK 408	Environmental Health	
HK 416	Applied Health Data Analysis	
HK 422	Community Health Workers	
HK 424	Emergency Preparedness, Planning, and Response	
HK 515	Health Behavior Theory	
NPRE 461	Probabilistic Risk Assessment	
PSYC 100	Intro Psych	
PSYC 358	Human Factors	
PSYC 456	Human Performance and Cognition in Context	
Total Hours		18

for the Undergraduate Minor in Industrial and Agricultural Safety & Health

Learning Objectives:

1. To provide understanding of workplace safety and health issues relating to industrial and agricultural work environments.
2. To provide fundamental understanding of concepts relating to workplace safety, injury prevention, safety management and occupational health strategies.

Informatics Minor

for the Undergraduate Minor in Informatics

The Minor in Informatics will teach you to become a better creator and user of computing technology in your major area and to think critically about new technology's role in society. No other field has, and will have, a greater influence on humanity in our generation.

Informatics studies the design, application, use and impact of information technology. The ability to handle vast amounts of information cheaply has changed the way we live. Advances in computer power, the World Wide Web, search engines, social networking, mobile technology, GIS, and large-scale collaborative initiatives, to name a few, have revolutionized the way knowledge is created and shared. Information has become a ubiquitous, indispensable component of our everyday lives, as we strive to manage information, create knowledge, and make decisions.

The Informatics Minor signals that you have concrete expertise in computing and Information Technology (IT) and understand their human implications.

Students from any major interested in applying technology or studying its effect on humanity are encouraged to apply, preferably by the end of sophomore year. Although there are no prerequisites, basic familiarity with computers is expected.To receive the Informatics Minor students must complete three core courses plus three upper-level classes with sufficient informatics or computational content from an approved list of courses offered from a wide range of disciplines. The core courses are INFO 102, CS 105, and INFO 202. INFO 102 is a broad introduction to computer science and provides an understanding of the nature, capabilities, and limitations of IT. CS 105 is an introduction to computer programming for non-science and non-engineering majors. INFO 202 explores the ways in which IT has and is transforming society and how these technologies affect a range of social, political, and economic issues from the individual to societal levels. Some substitutions can be made. Visit our website to see the list of upper-level courses (https://informatics.ischool.illinois.edu/courses-for-the-minor/) that count toward the minor. This list is dynamic as new classes are added each year.

Visit our website for information about the Informatics Minor (https://informatics.ischool.illinois.edu/minor-program/). This minor is offered by Informatics Programs (https://informatics.ischool.illinois.edu/). Informatics Programs can be reached by phone at (217) 333-4930.

for the Undergraduate Minor in Informatics

Integrative Biology Minor, UG

for the Undergraduate Minor in Integrative Biology

The minor, administered by the School of Integrative Biology, is designed for students intending to have a career in a field other than biology, but for whom a background in biology is nevertheless complementary, e.g. law, technology, bioinformatics, business, scientific writing, and engineering. A minor in integrative biology provides an understanding of fundamental principles for one major subdiscipline of biology, whether this be organismal and evolutionary biology; behavior, ecology and the environment; or integrative anatomy, physiology, and molecular biology.

for the Undergraduate Minor in Integrative Biology

Code	Title	Hours
Select one of the following:		**4**
IB 150	Organismal & Evolutionary Biol	
IB 103	Introduction to Plant Biology	
IB 104	Animal Biology

IB 460	Evol of Intelligent Systems	
IB 465	Methods in Molecular Genetics and Genomics	
Please note: all prerequisite courses must be taken if specified, and students must complete 6 advanced hours of coursework that are distinct from advanced hours required for their major.		
Total Hours		**16**

for the Undergraduate Minor in Integrative Biology

1. Synthesize and apply core knowledge in Integrative Biology, including anatomy, development, ecology, evolution, genetics, molecular biology, physiology, and/or systematics.
2. Apply predictive models to biological phenomena and engage with the process of scientific inquiry.
3. Critically evaluate and communicate complex, dynamic scientific information.
4. Employ curiosity, inquiry, quantitative reasoning, and critical thinking in problem solving.
5. Create solutions for global and local biological challenges using interdisciplinary strategies.
6. Develop professional skills including ethics, proficiency in oral and written scientific communication, data analysis and interpretation, collaboration, and the ability to critically evaluate science-related news and information.

International Business Minor, UG

for the Undergraduate Minor in International Business

Overview of business minor admissions & requirements:

Please refer to the *International Business Minor* website for important changes to the application process and requirements.

The International Business Minor is for students earning Undergraduate degrees in the Gies College of Business and is not open to students earning Undergraduate degrees in colleges other than the Gies College. The International Business Minor provides a program of study that exposes students to global business in a manner that complements their existing studies in Accountancy, Finance, Information Systems, Management, Marketing, Operations Management, Supply Chain Management, and Strategic Business Development & Entrepreneurship.

Specifically, the Minor provides students with a clear understanding of the opportunities and challenges involved with international business transactions, as global managers face a diverse set of circumstances when engaging in cross-border business: e.g., enhanced globalization (& de-globalization) forces, cross-national variation in institutions and cultures, increased competition from emerging economies, and altered economic incentives. Thus, the International Business Minor is designed to educate and train future business leaders, decision-makers and strategic thinkers to skillfully manage in the evolving global business environment.

To declare their Minors, Business students must submit their *Statement of Intent to Pursue a Campus-Approved Minor* (Statements) to 1055 Business Instructional Facility (BIF) at any time.

for the Undergraduate Minor in International Business

Code	Title	Hours
Minor Core Requirements		**15**
BADM 338	Global Supply Chain Management	3
BADM 380	International Business	3
BADM 381	Multinational Management	3
BADM 382	International Marketing	3
BADM 383	Topics in International Business	3
Minor Elective Requirements [1]		**3**
BADM 383	Topics in International Business	3
Any 200-level langugage course [2]		3
Total Hours		**18**

1. In order to fulfill the elective requirement, students have the option of taking either a second 'Topics in International Business' section or a 200-level language course. The Academic Director of the minor will also consider substitutes for the elective requirement (e.g., study-abroad courses) upon petition.
2. Any course taught in any modern foreign language beyond Beginning and Intermediate language instruction (which in most, but not all, language departments is numbered in the 200-series) will be counted.

International Development Economics Minor

for the Undergraduate Minor in International Development Economics

The International Development Economics minor is designed for students to deepen their understanding of international development practices around the globe. Courses will examine food, trade, agriculture, the environment, policy, and aid practices as they relate to development goals and international development practices.

for the Undergraduate Minor in International Development Economics

Some of these courses have additional non-ACE prerequisites. A semester-long study abroad experience in an emerging market or development economy (i.e. countries not part of the OECD) will be accepted in lieu of one of these courses.

The minor should consist of at least 18 hours of course work. At least 6 hours of the minor must be advanced (300 or 400) level courses.

Courses in the minor cannot be completed Credit/No-Credit.

Code	Title	Hours
Required for the Minor in International Development Economics

Italian Minor, UG

for the Undergraduate Minor in Italian

The minor in Italian at Illinois offers students an interdisciplinary introduction to the study of Italy in a larger Mediterranean, European and global context. Study abroad is not required but is often a rewarding and significant part of the minor in Italian Studies at Illinois. It is often possible to complete a minor while studying abroad. The minor in Italian Studies strongly emphasizes skills that are valuable for our student's future careers, but also for their future as global citizens, and their life of the mind: extensive knowledge of a foreign language; strong written and verbal communication skills; cultural and cross-cultural knowledge and understanding; and critical thinking skills.

for the Undergraduate Minor in Italian

Code	Title	Hours
Minimum of 19 hours of course work in Italian language and literature beyond ITAL 103 including:		
ITAL 104	Intermediate Italian II	4
Minimum of 15 hours of electives at the 200- to 400-level. Choose from the following: [1]		15
ITAL 200	Italian Studies in a Mediterranean Context	
ITAL 210	Practical Review Italian	
ITAL 220	Contemporary Italian, Oral and Written	
ITAL 240	Italy Middle Ages & Renaiss	
ITAL 270	Introduction to Italian Cinema	
ITAL 310	Advanced Grammar	
ITAL 380	Ital Business & Profess	
ITAL 390	Spec Topics Italian Studies	
ITAL 406	Italian Culture and Globalization	
ITAL 413	Dante	
ITAL 414	Petrarch & Boccaccio	
EURO 415	Europe and the Mediterranean	
ITAL 420	Masterpieces Renaiss Lit	
ITAL 440	Modern Italian Novel	
ITAL 450	Italian Syntax & Phonology	
ITAL 470	Topics in Italian Cinema	
ITAL 490	Italian Critical Theory	
ITAL 491	Honors Senior Thesis	
Total Hours		**19**

[1] *At least 6 of the 15 hours must be taken from among the following advanced-level courses: ITAL 310, ITAL 380, ITAL 406, ITAL 413, ITAL 414, ITAL 420, ITAL 440, ITAL 450, ITAL 470, ITAL 490.*

for the Undergraduate Minor in Italian

The Italian minor develops a student's proficiency in spoken and written Italian while introducing them to the study of the various literatures, cultures, and societies of Italy. Through coursework in conversation, grammar and writing, and cultural analysis, students explore questions of language, identity, politics, and everyday life across diverse media. The minor complements all majors by strengthening intercultural communication skills, critical analysis, and preparation for globally oriented careers.

Interdisciplinary Minor in Jewish Culture & Society

for the Undergraduate Interdisciplinary Minor in Jewish Culture and Society

The Program in Jewish Culture and Society offers an interdisciplinary minor and a concentration in Jewish Studies (through the LAS Interdisciplinary Studies Major (http://catalog.illinois.edu/undergraduate/las/academic-units/interdisc-studies/jewish-studies-concentration/)).

for the Undergraduate Interdisciplinary Minor in Jewish Culture and Society

No more than 6 hours (two courses) may be at the 100 level.

The 18 hours selected by students for a minor in Jewish Culture and Society should form a coherent program and must be approved by the undergraduate advisor for the Program in Jewish Culture and Society.

A list of courses, regularly updated by the Program in Jewish Culture and Society, is available from the Program Office, 109 English Bldg., 608 South Wright Street, Urbana, Illinois, 61801.

Code	Title	Hours
One course in the cluster of Religion, chosen from a list of courses maintained by the Advisor in the Program in Jewish Culture and Society Office.		3
One course in the cluster of Culture, chosen from a list of courses maintained by the Advisor in the Program in Jewish Culture and Society Office.		3
One course in the cluster of History, chosen from a list of courses maintained by the Advisor in the Program in Jewish Culture and Society Office.		3
Of the 18 required hours, two courses (6 hours) must be 300-or 400-level courses. HEBR 403 and HEBR 404 cannot be used to satisfy this requirement.		
Electives within the minor. Students may choose additional courses from any of the three clusters or can choose from the following language courses:		9
HEBR 199	Undergraduate Open Seminar	
HEBR 201	Elementary Modern Hebrew I	
HEBR 202	Elementary Modern Hebrew II	
HEBR 205	Intensive Biblical Hebrew	
HEBR 403	Intermediate Modern Hebrew I	
HEBR 404	Intermediate Modern Hebrew II	
HEBR 405	Advanced Modern Hebrew I	
HEBR 406	Advanced Modern Hebrew II	
HEBR 407	Topics Hebrew Lang & Lit	
YDSH 103	Intermediate Yiddish I	
YDSH 104	Intermediate Yiddish II	
Total Hours		**18**

for the Undergraduate Interdisciplinary Minor in Jewish Culture and Society

1. Acquire knowledge of the main concepts in Judaism and Jewish culture.
2. Become conversant in the most significant events in Jewish history from antiquity to the present.
3. Acquire fluency, or almost fluency, in Jewish languages, such as Hebrew and Yiddish.
4. Develop critical reading skills, including the ability to approach primary texts and secondary literature with critical analysis.
5. Enhance their ability to identify the main argument of scholarly books and articles.
6. Develop rhetorical skills and strategies to convey their opinion on matters in Jewish history, culture, and religion.

Journalism Minor

for the Undergraduate Minor in Journalism

The Minor in Journalism allows a student to explore the role of journalism in a democracy and to assess how journalism is meeting its social responsibility to engage, enlighten and empower citizens. The minor equips students to participate in the ever-changing world of media delivery and consumption.

Fundamental journalistic skills—identifying questions, obtaining answers, then communicating them effectively—are huge advantages in virtually every profession. Students of all majors can learn how to find engaging topics, locate and interview key sources, analyze and visualize important data, and present material impactfully in written, audio/visual, and interactive forms across media platforms. Students explore introductory principles in four courses in writing, history, ethics, and law, which also may fulfill General Education requirements, then choose at least two elective courses, which again may meet General Education requirements, from a list that includes research and practical courses.

View all College of Media undergraduate (https://catalog.illinois.edu/schools/media/#undergraduatetext) and graduate (p. 2300) degree programs.

for the Undergraduate Minor in Journalism

The minor in Journalism requires at least six hours of coursework at the 300- or 400-level, in order for the minor to be complete.

Code	Title	Hours
JOUR 200	Introduction to Journalism	3
JOUR 205	History of American Journalism	3
or JOUR 452	Great Books of Journalism	
JOUR 250	Journalism Ethics & Diversity	3
or JOUR 456	Race, Ethnicity & Gender in Journalism	
JOUR 311	Media Law	3
or JOUR 310	Media Law in Historical Context	
Select two courses from the following:		**6-7**
JOUR 210	Newsgathering Across Platforms	
JOUR 240	Introduction to Documentary Storytelling & Production	
JOUR 361	Classics of Sports Journalism	
JOUR 410	Data Storytelling for Journalists	
JOUR 440	Advanced Documentary Storytelling & Production	
JOUR 450	Media and Public Opinion	
JOUR 451	Research Methods in Journalism	
JOUR 453	Crisis Communications	
JOUR 454	Propaganda & the News Media	
JOUR 471	Science Journalism	
JOUR 472	Business Reporting	
JOUR 473	Environmental Journalism	
JOUR 482	Immersion Journalism	
JOUR 483	Investigative Journalism	
Total Hours		18

for the Undergraduate Minor in Journalism

1. Find engaging topics to report on.
2. Locate and interview key sources.
3. Analyze and visualize data.
4. Present impactful material in written, audio/visual, and interactive forms across media platforms.
5. Know journalism's roles in democracy.
6. Assess journalism's performance in fulfilling its roles.

Kinesiology Minor

for the Undergraduate Minor in Kinesiology

The Kinesiology Program is committed to the study and research of human movement in all its dimensions. Undergraduate study focuses on exercise stress, movement efficiency, and fitness; the social, cultural, and psychological aspects of participation in physical activity and sport; coordination, control and skill physical activity; physical growth, development, and body form throughout the lifespan; the effects of therapeutic techniques of kinesiology upon recovery from physical injury; and the instructional process of teaching/coaching of physical activity and sport.

To obtain a minor, students must complete 12 hours of foundational courses and 9 hours within an area of specialization, including at least 6 hours of 300- and 400-level courses. To learn more, visit the Kinesiology minor website (https://ahs.illinois.edu/kinesiology-minor/).

Landscape Studies Minor

for the Undergraduate Minor in Landscape Studies

Students who pursue a Minor in Landscape Studies develop a comprehensive understanding of landscape and landscape design that can enhance their major field of study.

Study of landscape is valuable in many related fields, such as architecture, art, engineering, geography, sustainability studies, and urban planning. Our Minor in Landscape Studies enables undergraduate students from disciplines across campus to gain knowledge of the ecological, historical, social, and cultural factors that have shaped contemporary understandings of landscape from local to global scales.

Admission to the minor

University of Illinois Urbana-Champaign students with a minimum GPA of 2.0 and completion of the campus Composition I and Quantitative Reasoning I requirements are eligible for admission. Applicants from other institutions must have a minimum GPA of 2.5. Students must declare their intentions and be admitted to the program by the Academic Affairs Coordinator in the Department of Landscape Architecture (ladept@illinois.edu).

Prerequisites

Students must comply with any prerequisite requirements of courses to be taken under this program.

Advising

Advising of students in the minor will be conducted by the Academic Affairs Coordinator in the Department of Landscape Architecture.

Certification of Successful Completion

Completion of the Minor in Landscape Studies will be certified by the student's home college office.

Interdisciplinary Minor in Latin American Studies

for the Undergraduate Interdisciplinary Minor in Latin American Studies

The Center for Latin American and Caribbean Studies offers an interdisciplinary minor for students majoring in another discipline. The minor in Latin American Studies consists of a total of 21 credit hours selected from offerings by the Center and various departments. This program must be approved by the Associate Director.

The minor is for those students who wish to concentrate their work in a specific discipline yet maintain a Latin American focus in their coursework. For students completing a major sponsored by the College of Liberal Arts and Sciences, the department or unit sponsoring the student's major must approve the minor.

for the Undergraduate Interdisciplinary Minor in Latin American Studies

Code	Title	Hours
Two courses in a Latin American language (Spanish, Portuguese, Quechua or other Native American language indigenous to Middle or South America) beyond the level specified by the LAS language requirement, or the equivalent as demonstrated by special examination. At the end of their language study, all students are urged to take an oral proficiency test based on ACTFL guidelines.		5-6
Courses drawn from the Latin American Studies curriculum. The curriculum normally consists of courses with 50 percent or more Latin American content and is defined according to a list maintained and regularly updated by the Center for Latin American and Caribbean Studies. Courses include:		15-16
LAST 170	Que Pasa in Latin America? Cultures, Histories and Politics South of the Rio Grande	
No more than 6 hours chosen from a single department		
Six hours of 300- to 400-level course offerings		
No more than 6 hours of literature		
Total Hours		**21**

for the Undergraduate Interdisciplinary Minor in Latin American Studies

1. **Demonstrate foundational knowledge of Latin American cultures, histories, and languages**, including understanding regional diversity and the relationship of Latin America to global contexts.
2. **Analyze social, cultural, political, and economic issues** in Latin America using critical thinking skills, applying evidence-based reasoning to both academic questions and real-world problems.
3. **Communicate knowledge effectively**, presenting research findings and cultural insights clearly to both specialized and general audiences, and demonstrating intermediate-level proficiency in Spanish, Portuguese, or an Indigenous Latin American language.

Latina/Latino Studies Minor

for the Undergraduate Minor in Latina/Latino Studies

The Department of Latina/Latino Studies offers a campus-wide minor that provides students with the opportunity to critically explore various facets of U.S. Latina/o social, political, and cultural life. Students will also more generally gain a deeper understanding of race, ethnicity, and diversity in the United States. The Department of Latina/Latino Studies must approve a student's minor course plan.

for the Undergraduate Minor in Latina/Latino Studies

Code	Title	Hours
LLS 100	Intro Latina/Latino Studies	3
Thematic Areas		
Students must take one course in each of the following three areas. A list of courses is maintained in the Department's office.		
A. Literature, Media, and Culture		3
B. Race, Gender, and Sexuality		3
C. History, Politics, and Society		3
2 elective courses selected from the list of all LLS and cross-listed LLS classes		6
Total Hours		**18**

for the Undergraduate Minor in Latina/Latino Studies

1. Intellectual Reasoning and Knowledge: Students will become proficient in the field of Latina/Latino Studies, which includes, but is not limited to, interdisciplinary, intersectional, and transnational knowledge about:
   a. sociohistorical, political, economic and cultural processes that affect Latina/Latino groups in contemporary society;
   b. Latina/Latino social movements;
   c. Latina/Latino cultural productions;
   d. the relationship between class, gender, sexuality, race/ethnicity and migration in the construction of Latina/Latino cultural and racial formations; and
   e. Latina/Latino Studies theories and methods. Students will learn that Latina/Latino Studies is a body of critical inquiry that encompasses a wide range of topics and objects of study, and that leverages multiple forms of knowledge production.
2. Critical and Creative Inquiry: Students will apply Latina/Latino Studies theories in developing their capacities for critical and creative inquiry. Specifically, students will exercise their oral and written communication skills as they express new ideas and generate projects that build upon Latina/Latino Studies theories and draw from the range of interdisciplinary Latina/Latino Studies methods.
3. Self-Reflexivity and Community Engagement: To help promote effective leadership and community engagement, students will demonstrate self-reflexivity about their ideas as well as about their social and political positions in their classrooms and communities. They will also learn to build and sustain relationships and take leadership towards the elimination of social inequities at the local, national, and global levels.
4. Social Awareness and Understanding Power: Student will recognize that Latina/Latino lives and communities unfold within historically unequal and racialized social, cultural, economic, and political power relations. Students will become familiar with Latina/Latino theories and social movements that consider indigeneity, race, class, gender, sexuality and citizenship to understand and intervene on historical and contemporary power formations.
5. Global Consciousness: Students will understand how complex and interdependent historical and contemporary global forces—environmental, social, cultural, economic, and political— impact and are impacted by Latinas/Latinos. They will learn to apply Latina/Latino Studies critiques to these forces, including but not limited to those related to migration and transnationalism.

Leadership Studies Minor

for the Undergraduate Minor in Leadership Studies

The Leadership Studies Minor is available to all undergraduate students in good standing at the University of Illinois at Urbana-Champaign. Drawing from social psychology, philosophy, organizational development, communication, and educational theory, the minor enhances your understanding of the social and organizational processes that influence effective leadership across diverse contexts.

for the Undergraduate Minor in Leadership Studies

The minor in Leadership Studies provides instruction in leadership theories and their applications and is open to all undergraduate students who have a minimum 2.0 GPA. The minor requires a total of seventeen or eighteen semester hours: nine hours of required foundation courses, five to six hours of elective context courses, and three hours in a capstone course. Students within the Organizational Community Leadership concentration of the ALEC major are unable to add this minor.

To declare the Leadership Studies Minor, students need to complete the online Minor Declaration Form (https://apps.atlas.illinois.edu/FormBuilderSurvey/Survey/las_administration/student_academic_affairs/minor_declaration_form/).

LGBT/Queer Studies Minor

for the Undergraduate Minor in LGBT/Queer Studies

The LGBT/Queer Studies minor provides students the opportunity to explore how various political, social, and cultural definitions of sexual identities and their expression have been constructed and challenged in different places and points in time. Attention is given to queer politics, and interactions with nation, race, ethnicity, and gender. A minor in LGBT/Queer Studies provides complementary tools for many majors in the humanities, arts and sciences.

The Department of Gender and Women's Studies must approve a student's minor course plan. Students must register their minor with the Gender and Women's Studies advisor.

Code	Title	Hours
GWS 202	Sexualities	3
or GWS 255	Queer Lives, Queer Politics	
GWS 370	Queer Theory	3
Additional Coursework- Select three of the following: [1]		9
GWS 385	Transnational Sexualities	
GWS 387	History of Sexuality in U.S.	
GWS 459	Gender, Sex, & Postcoloniality	
GWS 467	Locating Queer Culture	
GWS 470	Transgender Studies	
GWS 478	Sex, Power and Politics	
Area electives at any level. For a list of approved courses contact the GWS Department office or the GWS advisor.		3
Total Hours		**18**

[1] *Topics courses (GWS 395, GWS 495) may count up to 3 hours toward additional coursework with consent of the GWS advisor. GWS 390 or GWS 490 may count up to 3 hours toward additional coursework with consent of the GWS advisor.*

At least 6 hours of advanced coursework must be distinct from credit earned for the student's major or another minor.

Students may choose to major in Gender & Women's Studies and Minor in LGBT/Queer Studies, but classes may not count towards both.

for the Undergraduate Minor in LGBT/Queer Studies

Students completing the minor will be able to:

1. **Analyze the construction and contestation of sexual identities and expressions** across historical and cultural contexts, considering intersections with nation, race, ethnicity, and gender.
2. **Apply queer theoretical frameworks** to examine social, political, and cultural phenomena, integrating these insights with other disciplines in the humanities, arts, and sciences.

Linguistics Minor, UG

for the Undergraduate Minor in Linguistics

The Linguistics Minor is designed for students who seek a basic familiarity with the field and is especially suited for students with majors in foreign language and other language-related fields such as anthropology, computer science, English, psychology, communication, and for anyone interested in the nature of language.

for the Undergraduate Minor in Linguistics

Code	Title	Hours
LING 100	Intro to Language Science	3
Select two of the following:		6
LING 301	Elements of Syntax	
LING 302	Elements of Phonology	
LING 307	Elmnts Semantics & Pragmatics	
Nine additional hours of linguistics courses, including at least six hours chosen from the following:		9
LING 301	Elements of Syntax (if not chosen for the second requirement above)	
LING 302	Elements of Phonology (if not chosen for the second requirement above)	
LING 307	Elmnts Semantics & Pragmatics (if not chosen for the second requirement above)	
LING 210	Language History	
LING 225	Language, Mind, and Brain	
LING 250	American Voices: Linguistic Diversity in the US	
LING 400	Intro to Linguistic Structure	
LING 401	Intro to General Phonetics	
LING 406	Introduction to Computational Linguistics	

for the Undergraduate Minor in Linguistics

1. Analyze the phonological, morphological, syntactic, and semantic systems of language.
2. Compare how these systems vary across languages and change over time.
3. Formulate hypotheses about how languages are processed, how they are learned, and how they express social identity.
4. Apply linguistics to solve practical problems like how to teach languages effectively or how to implement language technologies.
5. Describe linguistic analyses and defend them using reproducible empirical evidence.

Materials Science & Engineering Minor

for the Undergraduate Minor in Materials Science & Engineering

Materials are the basis for all engineering and also are the basis for much of the research in various areas of science. The Minor in Materials Science and Engineering is designed to give students in other areas of engineering and science both a broad view of all materials as well as several courses in a particular area of materials, knowledge that will be of value whether the student pursues a career in industry, government, or academia.

The courses, listed below, have been selected to give an undergraduate student both a strong background in all types of materials as well as more detailed knowledge of a particular area of materials (e.g., ceramics, metals, polymers, electronic materials or biomaterials).

Minor Requirements:

Code	Title	Hours
Core Course Work		
MSE 280	Engineering Materials	3
MSE 401	Thermodynamics of Materials (Other thermodynamics courses may be substituted upon petition.)	3
One additional course chosen from an approved list below:		3
MSE 304	Electronic Properties of Matls	
MSE 402	Kinetic Processes in Materials	
MSE 403	Synthesis of Materials	
MSE 405	Microstructure Determination	
MSE 406	Thermal-Mech Behavior of Matls	
Nine additional hours in advanced courses selected from:		9
MSE 404	Laboratory Studies in Materials Science and Engineering	1.5
MSE 420	Ceramic Materials & Properties	3
MSE 421	Ceramic Processing	3 or 4
MSE 422	Electrical Ceramics	3
MSE 440	Mechanical Behavior of Metals	3
MSE 441	Metals Processing	3
MSE 443	Design of Engineering Alloys	3
MSE 450	Polymer Science & Engineering	3 or 4
MSE 453	Plastics Engineering	3
MSE 455	Macromolecular Solids	3
MSE 456	Mechanics of Composites	3
MSE 457	Polymer Chemistry	3 or 4
MSE 458	Polymer Physics	3 or 4
MSE 460	Electronic Materials I	3
MSE 461	Electronic Materials II	3
MSE 466	Electrochemical Energy Conversion	3
MSE 470	Design and Use of Biomaterials	3
MSE 473	Biomolecular Materials Science	3
MSE 474	Biomaterials and Nanomedicine	3
MSE 480	Surfaces and Colloids	3 or 4
MSE 481	Electron Microscopy	3 or 4
MSE 485	Atomic Scale Simulations	3 or 4
MSE 487	Materials for Nanotechnology	3 or 4
MSE 488	Optical Materials	3 or 4
MSE 489	Matl Select for Sustainability	3 or 4
ECE 444	IC Device Theory & Fabrication	4

Mathematics Minor, UG

for the Undergraduate Minor in Mathematics

Students must complete MATH 241, and at least one 400-level MATH course for admission into the minor. The Mathematics minor is designed to prepare students majoring in some other discipline with a background

in mathematics that is both broad and deep. Students interested in pursuing the minor should have completed the calculus sequence through MATH 241, and one additional Math course at the 400-level demonstrating a strong record of success in college-level mathematics courses. Given the cumulative character of mathematics preparation, students earning grades of C or below in previous mathematics courses are advised not to pursue the minor.

for the Undergraduate Minor in Mathematics

Code	Title	Hours
MATH 241	Calculus III	4
Five courses chosen from the following lists:		15
Algebra		
ASRM 406	Linear Algebra with Financial Applications (formerly MATH 410)	
MATH 257	Linear Algebra with Computational Applications	
MATH 415	Applied Linear Algebra	
MATH 416	Abstract Linear Algebra	
MATH 417	Intro to Abstract Algebra	
MATH 418	Intro to Abstract Algebra II	
MATH 427	Honors Abstract Algebra	
MATH 453	Number Theory	
Discrete Mathematics		
MATH 412	Graph Theory	
MATH 413	Intro to Combinatorics	
MATH 414	Mathematical Logic	
MATH 482	Linear Programming	
Analysis		
MATH 284	Intro Differential Systems	
MATH 285	Intro Differential Equations	
MATH 424	Honors Real Analysis	
MATH 425	Honors Advanced Analysis	
MATH 441	Differential Equations	
MATH 442	Intro Partial Diff Equations	
MATH 444	Elementary Real Analysis	
MATH 446	Applied Complex Variables	
MATH 447	Real Variables	
MATH 448	Complex Variables	
CS 450	Numerical Analysis	
MATH 484	Nonlinear Programming	
MATH 487	Advanced Engineering Math	
MATH 489	Dynamics & Differential Eqns	
Fundamentals		
MATH 314	Introduction to Higher Mathematics	
MATH 347	Fundamental Mathematics	
Geometry		
MATH 402	Non Euclidean Geometry	
MATH 403	Euclidean Geometry	
MATH 423	Differential Geometry	
MATH 428	Honors Topics in Mathematics	
MATH 432	Set Theory and Topology	
MATH 481	Vector and Tensor Analysis	
Probability and Statistics		
MATH 461	Probability Theory	
STAT 400	Statistics and Probability I	
STAT 410	Statistics and Probability II (Students may use STAT 410 or STAT 420, but not both toward the minor)	
or STAT 420	Methods of Applied Statistics	
Total Hours		**19**

for the Undergraduate Minor in Mathematics

Upon successful completion of the Minor in Mathematics students will be able to:

1. Construct correct and rigorous mathematical proofs, and evaluate proofs as proper or not.
2. Use mathematical theorems to solve problems.
3. Show technical proficiency in calculus and linear algebra.
4. Transfer abstract mathematical results to real-world applications.

Media Minor

for the Undergraduate Minor in Media

The Minor in Media offers students breadth and depth in the study of media in the 21st century. Students take one introductory course in each of three disciplines in the College of Media (Advertising, Journalism, and Media & Cinema Studies), for a total of 9 hours. Completion of the minor requires an additional 9 hours of advanced (300- and 400-level) courses coming from at least two different departments within the College of Media. Thematic areas have been designed to help students pursuing the Media Minor choose classes that align with student interest and career goals. Themes are suggestions and students are not required to choose a theme to complete the Media Minor.

Students pursuing a major in the College of Media are not eligible for a minor in Media.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the Undergraduate Minor in Media

To complete the Media Minor students will take one introductory course in each of three disciplines in the College of Media (Advertising, Journalism, and Media & Cinema Studies), for a total of 9 hours. Completion of the minor requires an additional 9 hours of advanced (300- and 400-level) courses. The advanced courses must be from at least two departments within the College of Media. Prerequisite courses will be enforced for advanced-level courses. Students may choose to follow a thematic area, but are not required to do so. Please see the College of Media website (https://media.illinois.edu/media-minor/) for thematic areas and related courses.

Students pursuing a major in the College of Media are not eligible to pursue a minor in Media.

Code	Title	Hours
100- or 200-level Advertising Course		3
100- or 200-level Journalism Course		3
100- or 200-level Media and Cinema Studies Course		3
Additional 300- or 400-level Courses - Must be from at least two different College of Media departments		9
Total Hours		**18**

for the Undergraduate Minor in Media

The Media Minor will contribute to the student learning objective of Intellectual Reasoning and Knowledge. The minor will provide students a breadth and depth of knowledge related to overall field of media and focused on advertising, journalism and the study of media and cinema.

Courses within the Media minor will encourage student learning related to social and cultural differences. These will address the Social Awareness and Cultural Understanding learning objective.

Interdisciplinary Minor in Medieval Studies

for the Undergraduate Interdisciplinary Minor in Medieval Studies

---

This minor introduces students to societies across the medieval world (ca. 500- ca. 1500 CE), providing them with an understanding of the periods and movements, institutions, material culture, ideas, beliefs, and values of diverse cultures around the globe, with particular attention to premodern Afro-Eurasia as an integrated space of encounter. Coursework spans geographical regions and disciplines to capture the breadth of medieval cultures as well as the diversity of methods and perspectives for their study.
The minor includes a minimum of 21 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework; and (III) advanced medieval coursework selected by the student in consultation with a faculty advisor. 3 hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

for the Undergraduate Interdisciplinary Minor in Medieval Studies

---

Includes a minimum of 21 hours, divided into (I) an introductory course in global medieval literatures and cultures; (II) geographical distribution coursework as specified below; and (III) advanced medieval coursework selected by the student in consultation with a faculty advisor. 3 hours of appropriate language study can be applied to the Additional Medieval Studies Coursework.

Code	Title	Hours
Introduction to Medieval Studies		**3**
ENGL 202/ MDVL 201/ CWL 253	Medieval Literature and Culture	
Geographical Distribution Coursework		
(A student may substitute 3 hours in geographical distribution coursework with a course on the medieval civilizations of Oceania or the Americas, including ANTH 278.)		
Medieval Europe (choose one from the following):		3

Minoritarian Aesthetics Minor

for the Undergraduate Minor in Minoritarian Aesthetics

The Minoritarian Aesthetics undergraduate minor will provide students with a blueprint for understanding the connection between everyday life practices and acts across performance stages. The minor pays close attention to aesthetic practices across minor voices by working across media, genre, discipline, and practice-based pedagogy, and across differences from race, gender and sexuality to disability and class. Working alongside artists, scholars, pedagogues, and art building initiatives, the minor will highlight expressive cultures by moving with and across mediums such as theater, dance, music, and art to name a few. This minor is open to students in all majors, but all minor requirements must be completed before graduation.

for the Undergraduate Minor in Minoritarian Aesthetics

Molecular and Cellular Biology Minor

for the Undergraduate Minor in Molecular & Cellular Biology

The minor, administered by the School of Molecular and Cellular Biology, is designed to provide students with an understanding of foundational principles of physiology, cellular and developmental biology, microbiology, molecular genetics and biochemistry. A minor in Molecular and Cellular Biology will prepare students for training in medicine and other health sciences, graduate studies in related disciplines, as well as for employment opportunities in pharmaceutical and biotechnology industries.

Students must contact an MCB advisor (https://mcb.illinois.edu/academics/undergraduate-programs/school-mcb-center-advising/) for acceptance into the minor. MCB 150 must be completed or in progress before acceptance into the minor.

for the Undergraduate Minor in Molecular & Cellular Biology

or MCB 246	Human Anatomy & Physiology II	
MCB 250	Molecular Genetics	3
MCB 251	Exp Techniqs in Molecular Biol	2
MCB 252	Cells, Tissues & Development	3
MCB 253	Exp Techniqs in Cellular Biol	2
MCB 354	Biochem & Phys Basis of Life	3
or MCB 450	Introductory Biochemistry	
Choose one additional 3-5 credit hour course from the approved list of 300- and 400-level courses for MCB majors.		3-5
Total Hours		**19-21**

for the Undergraduate Minor in Molecular & Cellular Biology

Upon successful completion of the Molecular & Cellular Biology undergraduate minor, students will be able to:

1. Understand and appreciate the diversity of life as it evolved over time by processes of mutation, selection and genetic change.
2. Illustrate that fundamental structural units define the function of all living things.
3. Explain that the growth, development, and behavior of organisms are activated through the expression of genetic information in context.
4. Illustrate that living systems are interconnected and interacting across scales of space and time.
5. Design a scientific process and employ the scientific method, demonstrating that biology is evidence based and grounded in the formal practices of observation, experimentation, and hypothesis testing.
6. Execute quantitative analysis to interpret biological data.
7. Communicate biological concepts and understanding to members of a diverse scientific community as well as to the general public.

Music Minor, UG

for the Minor in Music

The School of Music offers non-music majors an exposure to music through courses in musicology and ethnomusicology, music theory, music composition, music technology, jazz history and studies, and performance studies (through applied lessons and ensemble). The Music Minor is intended for student musicians with previously established, fundamental musical experiences - individuals who wish to expand upon already obtained musical skills and related study - and is not intended to be an introduction to music.

for the Minor in Music

The Music Minor requires the successful completion of 18 semester hours of courses in music according to the following requirements:
Course Requirements

Code	Title	Hours
Music Theory		
MUS 101	Music Theory and Practice I	2-3
or MUS 102	Music Theory and Practice II	
or MUS 103	Rudiments of Music Theory I	
Musicology		
MUS 110	Introd Art Mus: Intl Perspect	3

Upper Division Music Courses (300- and 400-level)	
MUS 300- and 400-level courses will be selected in consultation with a School of Music advisor in accordance with student interest.	6
Ensemble courses (MUSC 447 through 498) do not satisfy the six-hour upper-division requirement. MUSC applied lessons at the 400-level will satisfy this requirement providing the student has taken four semesters of MUSC applied lessons at the 100-level in the same applied area.	
Music Electives	**6-7**
Any MUS or MUSC course may satisfy elective credits, however, only three (3) credit hours of ensemble courses (MUSC 447 through 498) may be used for elective credit.	
Registering for non-major applied lessons requires communicating with the appropriate music professor and the availability of teaching staff. It also requires a nominal semester fee for weekly lessons.	
Total Hours	**18**

for the Minor in Music

Upon successful completion of the Music Minor, students should be able to:

1. Understand and apply foundational concepts of music theory and do so independently and cooperatively.
2. Acquire a basic understanding of diverse musical systems and traditions across the world, and develop a sensitivity to and awareness of cultural and societal differences, and their contribution to an interdependent global consciousness.
3. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
4. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.

Musical Theatre Minor for Performing Artists

for the degree of Minor in Musical Theatre in Performing Arts

The Musical Theatre Minor is intended for students in the performing arts who are majoring in either dance or the acting concentration of the theatre major in the College of Fine and Applied Arts. These are individuals who wish to expand upon their performance skills in a related study, which has an emphasis in Musical Theatre.

This minor is not intended for students outside the College of Fine and Applied Arts.

Admission Requirements

Applicants must be dance or acting majors who have completed at least 30 credit hours prior to the January application period to become eligible for admission review.

1. Applicants must complete all prerequisite courses (http://catalog.illinois.edu/undergraduate/faa/minors/musical-theatre-performing-artists/#degreerequirementstext) prior to the January application period to become eligible for admission review and must have Academic Good Standing status (2.0 cumulative GPA or higher), plus have a cumulative 2.5 GPA or higher in prerequisite courses.
2. Formal application is made through the School of Music Admissions Office in the Music Building. The school of Music Admissions Office can be reached via email (musicadmissions@illinois.edu).
3. Applications are reviewed in February, and successful applicants are invited to audition for the Lyric Theatre faculty. Final decision of all applicants is made by the end of March.
4. Only those students officially admitted into the Musical Theatre Minor Program by the School of Music may earn the Musical Theatre Minor.

for the degree of Minor in Musical Theater in Performing Arts

Requirements for Dance Majors

Code	Title	Hours
Prerequisite Courses for Dance Majors		
MUS 101	Music Theory and Practice I	2 or 3
or MUS 102	Music Theory and Practice II	
or MUS 103	Rudiments of Music Theory I	
MUS 222	Singing in Musical Theatre	1
THEA 170	Fundamentals of Acting I	3
Required Courses for Dance Majors		
MUSC 105	Voice (two semesters)	4
MUS 107	Musicianship I	2
DANC 209	Lyric Theatre Dance	2 or 1
or DANC 212	Musical Theater Dance	
Elective Courses for Dance Majors		**6**
Choose six (6) hours from these courses:		
MUSC 468	LTI Studio	2
MUSC 469	LTI Main Stage	1 to 2
MUS 125	English Diction and Dialects	1
MUS 422	Musical Theatre Repertoire	2
MUS 472	Senior Project Showcase (Requires permission of instructor)	1
Total Minimum Hours for Dance Majors to Complete the Minor		**19**

Requirements for Theatre Majors in the Acting Concentration

Code	Title	Hours
Prerequisite Courses for Theatre Majors, Acting Concentration		
MUS 101	Music Theory and Practice I	2 or 3
or MUS 102	Music Theory and Practice II	
or MUS 103	Rudiments of Music Theory I	
MUS 222	Singing in Musical Theatre	1
DANC 116	Dance I (two semesters of dance, any style)	4
or DANC 216	Dance II	
Required Courses for Theatre Majors, Acting Concentration		
MUSC 105	Voice (two semesters)	4
MUS 107	Musicianship I	2
DANC 209	Lyric Theatre Dance	2 or 1
or DANC 212	Musical Theater Dance	
Elective Courses for Theatre Majors, Acting Concentration		**6**
Choose six (6) hours from these courses:		
MUSC 468	LTI Studio	2
MUSC 469	LTI Main Stage	1 to 2
MUS 125	English Diction and Dialects	1

MUS 472	Senior Project Showcase (Requires permission of instructor)	1
Total Minimum Hours for Theatre Majors, Acting Concentration to Complete the Minor		**20**

for the degree of Minor in Musical Theatre in Performing Arts

Upon successful completion of a Minor in Musical Theatre in Performing Arts, students will:

1. Understand, apply, and integrate foundational concepts of study in music theory, aural skills, dance, and acting, and do so independently and cooperatively.
2. Demonstrate the ability to learn independently, make inquiries, think critically, discover solutions, and integrate knowledge across both similar and varied areas of musical study.
3. Develop and demonstrate effective performance skills (technical and expressive) using critical thinking to inform historical and stylistic performance practices and artistic expression.
4. Develop and demonstrate effective communication skills, including artistic self-expression, with diverse audiences through multiple media.
5. Acquire an understanding of professional and ethical responsibility as musicians and citizens, and demonstrate the ability to work professionally and effectively as leaders and collaborators.
6. Appreciate how music interacts with communities to enhance and engage social and cultural identities and enrich lifelong learning.

Natural Resource Conservation Minor

for the Undergraduate Minor in Natural Resource Conservation

The Natural Resource Conservation minor offers an integrated approach to managing natural resources from a sustainability perspective. This minor addresses the diverse biological, physical, social, economic, and political aspects of natural resources and stewardship. Ultimately, this curriculum offers students interested in the conservation of natural resources a challenging and rewarding experience while simultaneously preparing them for future careers requiring a fundamental and strong background in the management and conservation of natural resources. A minimum of 18 hours are required for this minor, of which at least 6 credit hours must be 400-level. Courses taken to fulfill the minor may not be counted toward the major in Natural Resources and Environmental Sciences.

for the Undergraduate Minor in Natural Resource Conservation

Code	Title	Hours

for the Undergraduate Minor in Natural Resource Conservation

The Natural Resource Conservation Minor provides a fundamental and strong background in the management and conservation of natural resources. Courses in the minor are also part of the NRES major and each course addresses one or more of the following NRES major learning outcomes:

1. Understand the scientific method/ways of knowing and critically evaluate information.
2. Integrate principles of biological, chemical, physical, and social sciences and apply them to resource and environmental issues using a systems approach.
3. Understand ecological principles underpinning management of resources, populations, communities, and ecosystems.
4. Use data collection and analysis tools (such as field methods, GIS, modeling, and statistics) to develop plans for managing resource/environmental challenges and adapt plans in response to rapid change.
5. Understand the policies governing resources and the environment and identify social dimensions (stakeholders, interests, trade#offs, synergies, ethical principles) to consider in the development of management plans.
6. Communicate effectively with colleagues, stakeholders, and the public about environmental and resource management issues.
7. Recognize how diverse groups understand the environment, experience positive and negative environmental impacts, and perceive just and equitable solutions.

Human Nutrition Minor

for the Undergraduate Minor in Human Nutrition

The minor in Human Nutrition is designed to broaden the student's knowledge of the biological sciences, with a particular emphasis on the interdisciplinary nature of nutrition. A minor in nutrition would benefit those who intend to pursue careers in the food, health, and fitness industries, or those planning to enter medicine, dentistry, nursing, and other health professions such as physician's assistant, physical or occupational therapy, nutrition research, and nutrition communication.

Philosophy Minor, UG

for the Undergraduate Minor in Philosophy

The philosophy minor is an excellent complement to majors in the sciences and humanities. Students can hone their critical thinking, reading, and writing skills and improve their ability to analyze complex issues—skills that will enhance their career success. The minor requires only 20 hours of coursework and allows you the flexibility to follow your interests.

for the Undergraduate Minor in Philosophy

Code	Title	Hours
PHIL 203	Ancient Philosophy	4
PHIL 206	Early Modern Philosophy	4
Two advanced level courses in philosophy at the 300- or 400-level		6
PHIL 103	Logic and Reasoning QR II	3
or PHIL 202	Symbolic Logic	
One additional course in philosophy at any level (100- to 400-)		3
Total Hours		**20**

for the Undergraduate Minor in Philosophy

Students completing the minor will be able to:

1. **Apply critical thinking and logical reasoning** to analyze complex philosophical, scientific, and ethical questions, identifying assumptions and evaluating arguments rigorously.
2. **Communicate philosophical ideas effectively**, both in writing and orally, conveying complex concepts clearly to diverse audiences.
3. **Explore interdisciplinary connections and ethical implications**, applying philosophical methods to issues in science, law, society, and everyday life, and reflecting on their broader significance.

Physics Minor

for the Minor in Physics

Physics and technology go hand in hand, with physics providing the foundation for a broad range of technical fields. This minor is intended to encourage you to expand your understanding of physics beyond the introductory level, to deepen your understanding of fundamental principles, and to enhance your ability to keep abreast of an ever-changing technological world. Depending on your choice of 300- and 400-level physics courses, a total of 21-25 hours is required.

Code	Title	Hours
PHYS 211	University Physics: Mechanics	4

Political & Civic Leadership Minor, UG

for the Undergraduate Minor in Political and Civic Leadership

The minor in Political and Civic Leadership offers students an informed appreciation of American democracy, the values and structures on which it is based, its successes and its weaknesses, and the challenges it will face in the 21st century. Because the potential benefits of democratic governance cannot be realized without an abundant supply of capable and committed civic leaders, the minor takes on the mission of generating a stream of highly motivated, exceptionally capable, ethically aware, and broadly-trained individuals who will be prepared to assume leadership positions in civic affairs in both the private and the public domains.

The Political and Civic Leadership minor is designed to appeal to students with interests in American politics, public policy, and civic engagement. The curriculum points students toward coursework inside and outside the Department of Political Science that will provide them with the substantive background and theoretical foundations to understand leadership and policymaking in the U.S. context and to participate as civic leaders.

The minor in Political and Civic Leadership is for students who are not political science majors. Students must be admitted to the minor and meet all of its requirements (17 hours). At least three courses (9 hours) must be at the advanced level.

Code	Title	Hours
PS 100	Intro to Political Science	3
PS 101	Intro to US Gov & Pol	
GLBL 100	Intro to Global Studies	
GLBL 220	Governance	
An intermediate (200 level) or advanced (300 level) course in public policy [1]		3
A course examining the construction and consequences of social identity relating to race, religion, ethnicity, or gender		3
A course exploring different perspectives on a just, ordered, and moral society		3
PS 491 or approved internship course in another department		3
At least two sections of PS 191 designated as pertaining to the Civic Leadership Program. A list of such sections is available in the Undergraduate Studies Office of the Department of Political Science.		2
Total Hours		**17**

[1] *Choose from a list maintained by the Department of Political Science.*

for the Undergraduate Minor in Political and Civic Leadership

Students completing the minor will be able to:

1. **Demonstrate knowledge of American democracy**, including its values, institutions, successes, challenges, and the theoretical foundations of leadership and policymaking.
2. **Apply civic leadership skills and ethical reasoning**, preparing to participate effectively in public and private sectors and to engage responsibly in civic life.
3. **Analyze and evaluate political and policy issues**, integrating interdisciplinary perspectives to inform decision-making and foster active, informed participation in American civic life.

Political Science Minor, UG

for the Undergraduate Minor in Political Science

A minor in political science is designed for students who want to improve their ability to deal intelligently and critically with issues and ideas about government and politics. The minor introduces students to courses involving important theoretical and applied questions about the role of citizens, associations, and states in the application of political power. Students will be exposed to advanced courses that build on relevant introductory courses.

for the Undergraduate Minor in Political Science

Code	Title	Hours
PS 100	Intro to Political Science	3
Select two additional 100- or 200-level Political Science courses		6
Select three 300- or 400-level Political Science courses from courses offered on the Urbana-Champaign campus		9
Total Hours		**18**

for the Undergraduate Minor in Political Science

1. Students will be able to apply central concepts of the scientific method to the study of politics, and demonstrate an ability to draw inferences from data.
2. Students will have a foundational knowledge of facts, concepts, and typologies in their chosen subfield in political science.
3. Students will be able to demonstrate basic knowledge of central theories in their chosen subfield and show how to evaluate those theories.
4. Students will be able to define political science and its subfields, drawing contrasts with other social sciences.
5. Students will be able to apply concepts, methods, and theories to research projects, internships, and/or off-campus experiences.

Portuguese Minor

for the Undergraduate Minor in Portuguese

"Brazil is not for beginners," once mused the world-renowned music composer and singer, Antônio Carlos Jobim. Portuguese minors gain an understanding of Brazil and a world connected through the circulation of Brazilian ideas, goods, and migrants. In the Portuguese minor, students gain knowledge of the language and hone communicative skills through a range of approaches, including diaspora and transnational studies; intersectional, cultural, and historical understandings of class, gender, race, and sexuality; and postcolonial studies. One of our strengths is that a Portuguese minor may include courses with Brazilian content taken in anthropology, comparative literature, ethnomusicology, global studies, history, and Latin American and Caribbean studies, among other fields. Not only from LAS, but also from ACES, Business, and Engineering, our minors follow local and global career paths and foster new visions of the world from a Brazilian and Portuguese-language standpoint.

for the Undergraduate Minor in Portuguese

Code	Title	Hours
PORT 401	Intensive Intermediate Portuguese	4
PORT 402	Advanced Grammar	3
Select at least 9 hours from the following list:		9
PORT 403	Readings in Portuguese	
PORT 404	Studies in Luso-Brazilian Culture (may be repeated)	
PORT 406	Brazilian Film	
PORT 410	Topics in Brazilian Literature	
Total Hours		**16**

for the Undergraduate Minor in Portuguese

1. Students learn and practice the language in written and spoken modes, formally and informally.
2. Students demonstrate cultural and linguistic literacy in relation to Portuguese and the ability to use concepts and methods across disciplines.
3. Students exhibit critical awareness of the tensions and opportunities inherent to globalist and universalist understandings.
4. Students evaluate power relations between dominant and subordinate groups in Brazil, especially in terms of class, ethnicity, gender, race, and sexuality.
5. Students gain a perspective on civil society and social justice in Brazil, Latin America, and what is sometimes called the Lusophone world.

Psychology Minor

for the Undergraduate Minor in Psychology

The minor in psychology should be tailored to each student's individual needs. The Psychology minor is suitable for students who intend to pursue careers in a wide variety of fields including business, medicine, law, political science, and education. Students should work with their major advisor to determine the Psychology courses that best fit their interests and career goals.

for the Undergraduate Minor in Psychology

Code	Title	Hours
PSYC 100	Intro Psych [1]	3-4
PSYC 235	Intro to Statistics (or equivalent) [2]	3
Biological/Cognitive Psychology Course		**3**
Select one from the following:		
PSYC 204	Intro to Brain and Cognition	

PSYC 210	Behavioral Neuroscience	
PSYC 220	Images of Mind	
PSYC 224	Cognitive Psych	
PSYC 230	Perception & Sensory Processes	
PSYC 248	Learning and Memory	
Clinical/Developmental/Social Psychology Course		**3**
Select one from the following:		
PSYC 201	Intro to Social Psych	
PSYC 216	Child Psych	
PSYC 238	Psychopathology and Problems in Living	
PSYC 239	Community Psych	
PSYC 245	Industrial Org Psych	
PSYC 250	Psych of Personality	
Select two 300- or 400- level Psychology courses		6
Total Hours		**18-19**

The Psychology Minor requires 18 hours of Psychology courses. PSYC 290, PSYC 340, PSYC 341, PSYC 398, PSYC 492, PSYC 494, PSYC 498, and PSYC 499 credit hours cannot be counted toward the minor requirement.

1 Students who transfer credit from another institution only receive 3 credits for PSYC 100.

2 Current equivalent courses include: STAT 100, ECON 202, EPSY 480, PSYC 301, and SOC 485. Contact the Psychology Advising Office to consult on other equivalents. Students who do not take PSYC 235 or PSYC 301 to satisfy their statistics requirement will need to take an additional Psychology course to meet the minimum of 18 hours of Psychology courses.

for the Undergraduate Minor in Psychology

Upon completion of the minor:

1. Students will demonstrate a basic understanding of key psychological concepts, major areas of study, and how psychological principles help explain everyday behavior.

2. Students will use scientific reasoning to interpret psychological information, demonstrate basic information literacy, and understand how research methods are used to study behavior.

3. Students will recognize ethical issues in psychological science and practice, appreciate diverse perspectives, and apply principles that support respectful and inclusive interactions.

4. Students will apply psychological knowledge to personal, academic, and career contexts, demonstrate effective collaboration and project skills, and articulate how the minor supports their future goals.

Public Health Minor

for the Undergraduate Minor in Public Health

The Public Health Minor is directed toward undergraduate students across campus, and within the College of Applied Health Sciences, who seek an introduction to the field and its disciplines, and for those who anticipate knowledge in public health will help them succeed in their careers. The COVID-19 pandemic has underscored the importance of public health to the successful functioning of society.

The requirements for the Public Health Minor include four required courses that will provide students with foundational knowledge and expose them to the concepts, core functions, and applications of public health in a variety of the specific disciplines including health promotion and education, epidemiology, and environmental health. The requirements represent 13 credit hours of coursework, 7 of which are offered at an advanced level. In addition, students will complete 6 hours from a list of elective courses which will provide students with flexibility in crafting a program that will allow them to gain additional knowledge in a specific area of public health, if so desired. More information about the Public Health Minor can be found here on the Department of Health and Kinesiology minor's page (https://hk.illinois.edu/academics/undergrad-programs/minors/#public-health).

for the Undergraduate Minor in Public Health

The requirements for the Minor in Public Health include four required courses that will provide students with foundational knowledge. HK 423	Social Marketing and Comm in Health Education & Promotion	3
HK 424	Emergency Preparedness, Planning, and Response	3
HK 472	Health and Kinesiology Study Abroad	3
HK 474	Public Health Nutrition	3
Total Hours		**19**

for the Undergraduate Minor in Public Health

1. Demonstrate a basic understanding of public health including basic concepts and core functions of public health, the scope of applications, and the variety of service organizations (both public and private) that shape public health.
2. Demonstrate a basic understanding of epidemiology, including basic concepts and methods, patterns of disease occurrence, applications of epidemiology to health education, health services administration and planning, health policy, and environmental health.
3. Demonstrate an ability to apply knowledge of public health. Understand theory and practice of public health promotion as they relate to educational approaches in solving community health problems.
4. Demonstrate a basic understanding of environmental health that includes concepts and mechanisms used to prevent or control environmental conditions that may lead to infectious or other environmentally induced diseases. In addition, gain understanding of topics from a public health perspective such as air pollution, water supply management, waste management, radiation protection, food hygiene, occupational health and disaster management.

Public Relations Minor

for the Undergraduate Minor in Public Relations

The Public Relations (PR) minor is designed to provide undergraduate students with a foundational understanding of how public relations practitioners manage relationships between organizations and their stakeholders and manage the reputations of those organizations. Courses within the PR minor will help students develop skills in writing, research, strategic planning, relationship management, and crisis communication that can be applied in business, nonprofit, or government contexts.

Students who plan to pursue careers in public relations, advertising, journalism, communications, marketing, or other related fields will find that the PR minor serves as a valuable complement to the courses in their major. Students from other majors who wish to have a better understanding of the role public relations plays in organizations and who wish to sharpen skills in writing, persuasion, strategic planning, and public communication will also benefit from the minor. The minor requires a minimum of 18 credit hours. Students must complete at least six hours of advanced course work for the minor distinct from credits earned for their major.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the Undergraduate Minor in Public Relations

Code	Title	Hours
Foundations of public relations		**9**
Courses all students must complete:		
JOUR 200	Introduction to Journalism	
ADV 310	Intro to Public Relations	
ADV 410	Public Relations Strategies	
Writing for public relations and media		**3-4**

[1] Will be announced in course description as "Eligible for PR minor."

for the Undergraduate Minor in Public Relations

Students in the Public Relations minor will:

1. Understand the ways in which public relations as a field, together with its unique and original practices, is different from, and yet similar to, other fields (e.g., advertising, marketing, journalism).
2. Apply scholarly theory and methods to design, implement, and assess public relations campaign effectiveness.
3. Recognize the ethical and legal concerns impacting the practice of public relations. They will conform to the ethical guidelines of the Public Relations Society of America and to relevant state and federal laws.
4. Identify, describe, and employ public relations in specialized areas such as entertainment, health, government, tourism, sports, or environmental sustainability.
5. Learn the importance of inclusivity in the historical evolution of PR and foster innovation through increased diversity in the workplace.
6. Acquire communication skills in content creation specific to PR's traditional and innovative formats, including oral, written and visual media.

Recreation, Sport & Tourism Minor, UG

for the Undergraduate Minor in Recreation, Sport & Tourism

The RST Minor is open to students both inside and outside the College of Applied Health Sciences. This minor is directed towards students who have an interest in working in the sports, recreation and/or tourism industries, or students who feel knowledge in these areas will help them succeed in their careers.

The course requirements for the minor are 19-21 hours. This includes three foundational courses (9 hours) that all students are required to take followed by 10-12 credit hours from a list of approved electives. The foundational courses will enable students to acquire knowledge about the broad range of the field and introduce them to the different areas of the industry. At least 6 hours will be advanced (300 or 400 level course), meeting the requirement for all minors. The elective courses will allow students to gain expertise in a particular area of the field, or develop a deeper knowledge base of the field and industry. Some electives may require completion of prerequisites.

for the Undergraduate Minor in Recreation, Sport & Tourism

Minimum required course work: Students must complete 9 hours of foundational courses and 10-12 hours from approved electives, including at least six hours of advanced (300-level or 400-level courses) and six hours of coursework must be distinct from credit earned for the student's major or another minor.
Minimum hours required for completion: 19 hours.

Code	Title	Hours

RST 100	Recreation, Sport, and Tourism in Modern Society	3
RST 210	Management in Recreation, Sport and Tourism	3
One of the following:		3
RST 120	Parks, Recreation, and Environments	
RST 130	Foundations of Sport Mgt	
RST 150	Foundations of Tourism	
RST Electives		**4 to 6**
RST 120	Parks, Recreation, and Environments (if not taken to satisfy the Foundational Coursework requirement)	
RST 130	Foundations of Sport Mgt (if not taken to satisfy the Foundational Coursework requirement)	
RST 150	Foundations of Tourism (if not taken to satisfy the Foundational Coursework requirement)	
RST 180	Professional Applications	
RST 185	Professional Field Experiences	
RST 200	Leadership in Recreation, Sport and Tourism	
RST 204	Issues in Sport & Higher Education	
RST 205	Issues in Intercollegiate Athletics: The Big Ten Conference	
RST 216	Technology in Recreation, Sport and Tourism	
RST 226	Esports Foundations	
RST 230	Diversity in Recreation, Sport, and Tourism	
RST 238	Professional Sports: Front Office Management	
RST 240	Financial Resource Management in Recreation, Sport and Tourism	
RST 242	Nature and American Culture	
RST 255	Ethical Issues in Recreation, Sport and Tourism	
RST 260	Disability in Recreation, Sport and Tourism	
RST 290	Experiencing Agritourism	
Six (6) hours from the following:		**6**
RST 301	Sport Brand Management	
RST 316	Human Development and Recreation, Sport and Tourism	
RST 317	Designing Parks and Recreation Experiences	
RST 325	Marketing in Recreation, Sport and Tourism	
RST 335	Leisure and Consumer Culture	
RST 340	Facility Management in Recreation, Sport and Tourism	
RST 350	Tourism and Culture	
RST 354	Legal Aspects of Sport	
RST 360	Communication in Recreation, Sport & Tourism	
RST 370	Research Methods & Analysis	
RST 407	Sport Analytics: Data-Driven Decision Making	
RST 440	HR Management in RST	
Total Hours:		**19**

for the Undergraduate Minor in Recreation, Sport & Tourism

1. Demonstrate a basic understanding of the history and theoretical underpinnings of recreation, sport and tourism in modern society.
2. Demonstrate a basic understanding of the essential management functions necessary to deliver and manage services in recreation, sport and tourism organizations.
3. Demonstrate an ability to apply knowledge of basic management principles to professional practice.

Religion Minor

for the Undergraduate Minor in Religion

The Minor in Religion is designed to give students the opportunity either to gain a broad knowledge of a number of religious traditions or to emphasize one field in the academic study of Religion. Completion of the minor requires 6 courses selected by the student in consultation with the director of undergraduate studies.

Code	Title	Hours
Six REL courses, at least 6 hours at the 300- or 400-level, no more than 6 hours at the 100-level		18
Total Hours		**18**

for the Undergraduate Minor in Religion

1. Students will be able to understand and explain how global religious traditions reflect the social contexts in which they emerged, and in turn how the traditions have affected and continue to affect those societies;
2. Students will be able to analyze, and interpret (in both written and oral communication) the relationship between religious traditions and other forms of human cultural and social activity, including languages, literature, arts, political and social movements;
3. Students will be able to appreciate the diversity of global religious traditions and express that appreciation in activities and experiences meaningful to them.
4. Students will be able to develop sound and well-formed written arguments on matters of interest to them that respond insightfully to scholarship significant to their field of study.
5. Students will be able critically to assess and evaluate theories, arguments, and positions that have shaped the fields of the study of religion and individual global traditions.

Russian Language & Literature Minor

for the Undergraduate Minor in Russian Language & Literature

A minor in Russian language and literature may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theater to engineering and mathematics. The 18- to 20-hour program listed below provides considerable flexibility within a general structure. Additional information may be obtained from the undergraduate advisor in the Department of Slavic Languages and Literatures.

6 hours must be advanced (300- or 400-) level courses.

for the Undergraduate Minor in Russian Language & Literature

Code	Title	Hours
Introduction to Slavic culture. Select from:		3
RUSS 115	Intro to Russian Culture	
RUSS 261	Introduction to Jewish Culture in the Russian Empire	
SLAV 117	Russ & E Euro Science Fiction	
SLAV 120	Russian & E Euro Folktales	
Intermediate Russian Language:		6-8
RUSS 201	Second-Year Russian I	
RUSS 202	Second-Year Russian II (or equivalent)	
Russian literature and culture: Three 200-, 300- or 400-level courses from the list maintained by the undergraduate advisor, including at least one at the 300- or 400-level. Advanced Russian language (RUSS 301, 302, 305, or equivalent) can substitute for one course in this requirement.		9
Total Hours		**18-20**

for the Undergraduate Minor in Russian Language & Literature

- Proficiency in the target language associated with the minor track of at least intermediate level on the ACTFL scale, with some control of intermediate high functions.
- Improved and effective writing and communication skills in the English language.
- Coherent knowledge and functional grasp of the culture(s) and history(ies) of the region or regions and peoples targeted by the minor track.
- Analytical and interpretive abilities making use of the critical tools and methodologies taught in our courses of literary and cultural study.

Russian, East European, & Eurasian Studies Minor

for the Undergraduate Interdisciplinary Minor in Russian, East European, & Eurasian Studies

The interdisciplinary minor in Russian, East European, and Eurasian studies allows students in diverse fields to complement their programs with a study of Russia, Eastern Europe, and Eurasia. Programs of study can be tailored to the needs and interests of individual students, in consultation with the undergraduate advisor.

Code	Title	Hours
The equivalent of three semesters of college-level language study in Russian or another language of Eastern Europe or Eurasia. This stipulation may be satisfied through partial fulfillment of the LAS two-year language requirement if a regionally appropriate language is chosen for that purpose. If a non-REEE language is selected to meet the LAS requirement, then the three semesters of REEE language study specified here must be taken in addition to those completed to satisfy the LAS requirement. Only those hours earned in the second and third semester of language study are calculated into the degree, as the first semester represents a prerequisite for the other two.		6-8
Courses on Russia, Eastern Europe, or Eurasia from at least three different academic units. (Literature courses are acceptable for this requirement; language courses are not.) No more than 6 hours may be counted from any one unit; 6 hours must be at the 300- or 400-level.		15
Total Hours [2]		**21**

[1] *The Center maintains a list of applicable courses.*

[2] *No more than 9 hours may be taken at the 100-level.*

for the Undergraduate Interdisciplinary Minor in Russian, East European, & Eurasian Studies

1. **Global Competence and Intercultural Skills**
   - Definition: REEES minors will engage and build productive relationships, founded in proficient language skills, with communities, organizations, and individuals across cultures, both at home and abroad.
2. **Interdisciplinary Perspective**
   - Definition: REEES minors will recognize and mobilize multiple types of data and forms of analysis, drawn from paradigms in the humanities and social sciences, to propose solutions to complex problems.
3. **Analytical Reasoning and Broad Knowledge Base**
   - Definition: REEES minors will critically analyze and evaluate interpretations of social, cultural, political, and economic phenomena, drawing on a broad knowledge base and research experience.

Semiconductor Engineering

for the Undergraduate minor in Semiconductor Engineering

Semiconductor engineering is a broad field which encompasses many areas of science and technology. The semiconductor industry relies on scientists and engineers having a broad swath of knowledge that spans multiple disciplines. Correspondingly, there are many possible directions in industry and research which share the same fundamentals but branch out into an extraordinarily diverse range of applications. The minor in Semiconductor Engineering brings together courses from across different academic departments to provide students with additional breadth and depth in the field that they would not be able to obtain through completion of their respective majors alone. Completion of the minor allows students to develop expertise in diverse areas of semiconductor design, manufacturing, and applications in order to meet the growing demands and expectations from the semiconductor industry.

for the Undergraduate minor in Semiconductor Engineering

Students may fulfill the requirements for a minor in Semiconductor Engineering by completing the following course sequence with a minimum of 16 credit hours. At least six hours of coursework for the minor should be advanced (300-level or 400-level courses) and must be distinct from credit earned for the student's major or another minor. A minimum of two courses should be 400-level.

Students may apply up to 3 credit hours of independent study towards the "semiconductor elective courses" requirement of the minor, to enable them to pursue advanced topics under the guidance of a faculty member. Topics for the independent study must be approved by the minor's faculty oversight committee in order to apply towards the minor requirements. Students can contact the program advisor to learn how to get an independent study course approved.

Code	Title	Hours
Semiconductor Core Courses. Select 9 hours from list below.		**9**
ECE 340	Semiconductor Electronics	
or MSE 304	Electronic Properties of Matls	

IE 330	Industrial Quality Control	
or IE 361	Production Planning & Control	
ECE 444	IC Device Theory & Fabrication	
or ME 487	MEMS-NEMS Theory & Fabrication	
MSE 460	Electronic Materials I	
NPRE 429	Plasma Engineering	
ME 432	Fundamentals of Photovoltaics	
or ECE 443	LEDs and Solar Cells	
Semiconductor Elective courses. Select 7 hours from list below.		**7**
ECE 304	Photonic Devices	
ECE 441	Physcs & Modeling Semicond Dev	
ECE 442	Silicon Photonics	
ECE 460	Optical Imaging	
ECE 481	Nanotechnology	
ECE 488	Compound Semicond & Devices	
ECE 495	Photonic Device Laboratory	
IE 360	Facilities Planning and Design	
IE 412	OR Models for Mfg Systems	
IE 431	Design for Six Sigma	
SE 411	Reliability Engineering	
MSE 461	Electronic Materials II	
MSE 485	Atomic Scale Simulations	
MSE 487	Materials for Nanotechnology	
MSE 488	Optical Materials	
ME 453	Data Science in Manufacturing Quality Control	
ME 455	Micromanufacturing Process & Automation	
NPRE 321	Introduction to Plasmas and Applications	
NPRE 423	Plasma Laboratory	
PHYS 370	Introduction to Quantum Information and Computing	
PHYS 402	Light	
PHYS 404	Electronic Circuits	
PHYS 427	Thermal & Statistical Physics	
PHYS 460	Condensed Matter Physics	
PHYS 486	Quantum Physics I	
PHYS 487	Quantum Physics II	
Independent Study - Students may apply up to 3 credit hours towards this requirement, once approved.		
Total Hours		**16**

for the Undergraduate minor in Semiconductor Engineering

Students earning the minor in Semiconductor Engineering will have:

1. A holistic view of the semiconductor industry from both a technical point of view and in the global societal context and how different engineering disciplines contribute to the field;
2. A rigorous foundation and broad competency in the field of semiconductors based on an understanding of the underlying physics, material properties, and manufacturability of semiconductor devices; and
3. A depth of knowledge in one area of semiconductor design, manufacturing, or applications to prepare them to meet the growing demands and expectations from the semiconductor industry.

Scandinavian Studies Minor

for the Undergraduate Minor in Scandinavian Studies

The Minor in Scandinavian Studies offers students exposure to the study of a Scandinavian language and broad knowledge of Scandinavian culture, literature, film, art, and history. Prerequisite: SCAN 101 or the equivalent.

for the Undergraduate Minor in Scandinavian Studies

Code	Title	Hours
SCAN 102	Beginning Scandinavian II	4
Any of the following, with at least 6 credits at the 300- or 400-level		18-22
SCAN 103	Intermediate Scandinavian I	
SCAN 104	Intermediate Scandinavian II	
SCAN 215	Madness, Myth, and Murder	
SCAN 225	Vikings to Volvos: Scandinavia	
SCAN 251	Viking Mythology	
SCAN 252	Viking Sagas in Translation	
SCAN 305	Old Norse - Icelandic I	
SCAN 306	Old Norse - Icelandic II	
SCAN 376	Children and Youth Literature	
SCAN 463	Modern Scandinavian Drama	
SCAN 470	Scandinavian Politics and Society	
SCAN 472	Kierkegaard and the Self	
SCAN 490	Green Screen: Film and Nature	
SCAN 492	Scandinavian Cinema	
SCAN 494	Topics in Scan Languages	
SCAN 496	Special Topics in Scan Studies	

for the Undergraduate Minor in Scandinavian Studies

1. *Language ability:* Students develop and improve their foreign language abilities, i.e., their ability to read, speak, write, and listen in a modern

Scandinavian language in order to work with texts and communicate with others in the language.

2. *Cultural-historical literacy and knowledge:* Students develop and improve their ability to function in non-native cultural-historical and linguistic contexts and communities in order to respect and navigate cultural differences and build upon similarities.
3. *Analytical and argumentative skills:* Students develop and improve their abilities to analyze diverse cultural artifacts in order to apply analytical thinking and discursive skills to the construction of sound, supported, factual argumentation rather than merely expression of opinion, completely or in part.
4. *Writing development:* Students will demonstrate and produce well-written, communicative, argumentative, and interpretive texts in Swedish and/or English in order to competently meet diverse writing tasks.

Slavic Language, Literature, & Culture Minor

for the Undergraduate Minor in Slavic Language, Literature & Culture

A minor in Slavic language, literature, and culture may be useful and enriching for students in many disciplines, from economics and political science through comparative literature and theater to engineering and mathematics. The 18- to 20-hour program listed below provides considerable flexibility within a general structure. In completing the requirements for the minor, students may choose to pursue study of a particular Slavic language and culture, or may combine study of a single language with other courses that treat the region more broadly. For example, a student could specialize in Polish by taking POL 201, POL 202, POL 301 for the language and POL 115, POL 245, and HIST 467 for the literature and culture requirements. Please consult the Undergraduate Advisor to choose coursework.

6 hours must be advanced (300- or 400-) level courses.

for the Undergraduate Minor in Slavic Language, Literature & Culture

Code	Title	Hours
Introduction to Slavic culture. Select from:		3
BCS 115	South Slavic Cultures	
POL 115	Intro to Polish Culture	
REES 200	Intro to Russia and Eurasia	
REES 201	Introduction to Eastern Europe	
RUSS 261	Introduction to Jewish Culture in the Russian Empire	
SLAV 117	Russ & E Euro Science Fiction	
SLAV 120	Russian & E Euro Folktales	
UKR 113	Ukrainian Culture	
Intermediate Slavic Language:		6-8
BCS 201 & BCS 202	Second Year Bosnian-Croatian-Serbian I and Second Year Bosnian-Croatian-Serbian II	
CZCH 201 & CZCH 202	Second-year Czech I and Second-year Czech II	
POL 201 & POL 202	Second Yr Polish I and Second Yr Polish II	
UKR 201 & UKR 202	Second-Year Ukrainan I and Second-Year Ukrainian II	
Slavic Literature and Culture: Three 200-, 300- or 400-level courses from the list maintained by the undergraduate advisor, including at least one at the 300- or 400-level. Advanced Slavic language (the 301 or 302 level of the language of specialization, or equivalent) can substitute for one course in this requirement. Also, one course at the same level in another department, chosen in consultation with the advisor, that treats the history, culture, and society of the region can count toward this requirement.		9
Total Hours		**18-20**

for the Undergraduate Minor in Slavic Language, Literature & Culture

- Proficiency in the target language associated with the minor track of at least intermediate level on the ACTFL scale, with some control of intermediate high functions.
- Improved and effective writing and communication skills in the English language.
- Coherent knowledge and functional grasp of the culture(s) and history(ies) of the region or regions and peoples targeted by the minor track.
- Analytical and interpretive abilities making use of the critical tools and methodologies taught in our courses of literary and cultural study.

Sociology Minor

for the Undergraduate Minor in Sociology

A minor in sociology requires that students learn the basic theoretical and methodological approaches in sociology. Students must also learn about the substance of sociology in some depth and are thus required to take at least two sociology courses at an advanced level and a total of at least 18 hours of sociology courses. The course work must include the requirements listed below.

Code	Title	Hours
SOC 100	Introduction to Sociology	4
SOC 200	Introduction to Sociological Theory	3
SOC 280	Intro to Social Statistics [1]	4
At least two Sociology courses at the 300- or 400-level		6
Elective Sociology hours as needed to fill the 18 hour requirement		3-6
Total Hours		**18**

[1] *If a statistics course is taken outside the Department of Sociology to fulfill this requirement, that course does not count toward the 18 hours of Sociology courses.*

for the Undergraduate Minor in Sociology

Students completing the minor will be able to:

1. Apply sociological theories to understand social phenomena.
2. Critically evaluate explanations of human behavior and social phenomenon.
3. Apply scientific principles to understand the social world.
4. Evaluate the quality of social scientific methods and data.
5. Rigorously analyze social scientific data.
6. Use sociological knowledge to inform policy debates and promote public understanding.

Interdisciplinary Minor in South Asian Studies

for the Undergraduate Interdisciplinary Minor in South Asian Studies

The Center for South Asian and Middle Eastern Studies (http://www.csames.illinois.edu/) offers an Interdisciplinary Minor in South Asian Studies. The minor is especially suited for students interested in a program of studies with focus on South Asia, as a complement to their disciplinary study. The structure of the minor provides students a great amount of flexibility; possible areas of emphasis include language and literature, as well as history and social sciences. A minimum grade-point average of 2.75 in South Asian Studies courses is required for completion of the minor. The 18-20 hours of courses selected by students for the South Asian Studies Minor should form a coherent program of study and must meet the approval of an advisor in the Center for South Asian and Middle Eastern Studies. The program must include at least 6 hours of 300- or 400-level courses. A student's plan of courses for the minor must be approved by the program.

For a list of approved courses, visit CSAMES Course Archive (https://csames.illinois.edu/all-courses-archive/).

for the Undergraduate Interdisciplinary Minor in South Asian Studies

Code	Title	Hours
Language		**3-5**
Fourth-semester course work in an area-relevant language. A course that meets this requirement and is currently offered on a regular basis is HNDI 404 (4 hours). In consultation with your advisor, the requirement may also be met by comparable courses in these and other South Asian and South Asia-related languages, taught at UIUC or at other universities, through online courses (where available), and through a proficiency examination.		
Core Course		**3**
HIST/ANTH 130	History of South Asia	
Electives		**12**
Courses on South Asian history, language, literature, culture, and society from the following list: (Other area-relevant courses may be substituted as they are offered, with approval of the advisor. These include courses in languages other than Hindi and independent study courses with South Asia teaching faculty and with appropriate topics, such as the following ANTH 390, HIST 490, LING 290, PS 490, REL 390, SOC 390. Students wanting to take such independent study courses need to get permission from the instructor; not more than two independent study courses may be taken to meet the degree requirements.)		
ANTH 221	Archaeology of South Asia	
CWL 207	Indian Cinema in Context	
CWL 208	Cultures & Literatures of South Asia	
HNDI 405	Advanced Hindi I	
HNDI 406	Advanced Hindi II	
HNDI 408	Intro to South Asian Lit	
HNDI 412	Business Hindi	
HIST 430	India from Colony to Nation	
LING 115	Language and Culture in India	
PS/ASST 346	Gov & Pol of South Asia	
REL 104	Asian Mythology	
REL 260	Mystics and Saints in Islam	
REL 286	Introduction to Hinduism	
REL 287	Introduction to Buddhism	
REL 291	Hinduism in the United States	
REL 350	South Asian Goddesses	
REL 401	Gender and Hinduism	
REL 403	Women in Muslim Societies	
REL 408	Islam & Politics in Mid. East	
REL 495	Topics in Asian Religions	
REL 520	Hindu Pilgrimage, Power & Place	
REL 567	Mahayana Buddhism	
Minimum Total Hours		**18**

for the Undergraduate Interdisciplinary Minor in South Asian Studies

1. Introductory interdisciplinary knowledge of South Asian (SA) area studies in terms of the cultures and societies of these regions in a broader international and global context, including:
   a. Various historical, cultural, social, economic and political conditions that shaped the development of SA region.
2. Proficiency in a SA language.
   a. Student should develop knowledge of a region or country in SA, acquire proficiency in a relevant language of that region or country.
3. Interdisciplinary knowledge of South Asian (SA) area studies in terms of the cultures and societies of these regions in a broader international and global context.
   a. Students should have a basic understanding of the various historical, cultural, social, economic and political conditions that shaped the development of South Asia.
   b. Students should be able to place their knowledge of SA in a broader world context and from a multidisciplinary perspective.
4. Proficiency in SA or ME languages and knowledge of research methodologies.
   a. Student should develop appropriate expertise in a South Asian language, acquire proficiency in a relevant language of that region or country, and equip themselves with a basic understanding of the appropriate research tools to study that region/country.

Spanish Minor

for the Undergraduate Minor in Spanish

The Spanish minor allows students to continue developing their language skills and cultural insights, regardless of their major. Electives include coursework in linguistics, literature, and cultural studies, as well as courses that prepare students to use Spanish in professional settings including healthcare, business, and the non-profit sector.

for the Undergraduate Minor in Spanish

Code	Title	Hours
Minimum 18 hours of Spanish Courses		
SPAN 228	Spanish Composition	3
2 to 3 additional SPAN courses at the 200-level [1]		6-9
2 to 3 SPAN courses at the 300- or 400-level		6-9
Total Hours		**18**

[1] With permission of the advisor, students will be able to take one SPAN course at the 200-level or higher that is taught in a language other than Spanish. Or, one 200-level SPAN course can be substituted with a language course in CATL, BASQ, PORT or LAST (Quechua), from among the following options: BASQ 401, BASQ 402; CATL 401, CATL 402, PORT 401, PORT 402; and LAST 445. This course does not count for advanced hours and does not substitute for SPAN 228.

for the Undergraduate Minor in Spanish

1. **Intellectual Reasoning and Knowledge**
   a. Minors in Spanish will acquire and apply broad knowledge about the Spanish language and the cultures of the Spanish-speaking world.
2. **Translingual competence**
   a. Minors in Spanish will gain an understanding of the Spanish language, "languages" in general, the social nature of languages and demonstrate intercultural communicative competence.
3. **Transcultural competence**
   a. Through critical reflection, minors in Spanish will gain insights on the products, practices and perspectives of their own culture, cultures of the Spanish-speaking world and the nature of "culture" itself.
4. **Communicative Competence in Spanish**
   a. In reading, writing, listening comprehension and speaking, students will acquire intermediate proficiency in Spanish as described by the standards set by the American Council on the Teaching of Foreign Languages (ACTFL).

Spatial & Quantitative Methods in Natural Resources & Environmental Sciences Minor

for the Undergraduate Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

The Spatial and Quantitative Methods in Natural Resources and Environmental Sciences minor is ideal for students in NRES and allied fields seeking preparation for careers requiring skills in geographic information systems, statistics, research design, and/or mathematical modeling. This minor is open to students in all majors and is especially relevant for those pursuing a major related to natural resource and environmental issues who want to distinguish themselves with more advanced analytical skills. In order to be eligible to declare this minor, a student must have successfully completed:

1. MATH 220, MATH 221 or MATH 234
2. CPSC 241, ECON 202, PSYC 235, SOC 280 or STAT 100

The minor requires the completion of an additional 18 hours of coursework selected from the required courses list (p. 1022). Students must earn credit for at least three hours in each of the three categories. At least six hours of 400-level courses must be distinct from any credit earned for the student's major, concentration, and any other minor.

for the Undergraduate Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

Code	Title	Hours
Required Courses for a Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences		
Statistics & Research Design		
Select one of the following:		3-4
NRES 340	Environ Social Sci Res Meth	
NRES 421	Quantitative Methods in NRES	
CPSC 440	Applied Statistical Methods I	
NRES 445	Statistical Methods	
STAT 200	Statistical Analysis	
Mathematical Modeling		
Select one of the following:		3-4
NRES 401	Watershed Hydrology	
NRES 403	Watersheds and Water Quality	
NRES 407	Wildlife Population Ecology	
NRES 427	Modeling Natural Resources	
NRES 482	Aquatic Biogeochemistry	
NRES 490	Surface Water System Chemistry	
IB 494	Theoretical Biology + Models	
ABE 227	Computer-Aided Problem-Solving for ABE I	
ABE 228	Computer-Aided Problem-Solving for ABE II	
Spatial Analysis		
Select one of the following:		3-5
CPSC 444	Introduction to Spatial Analytics	
NRES 454	GIS in Natural Resource Mgmt	
NRES 455	Advanced GIS for Environmental Management	
NRES 465	Landscape Ecology	
GGIS 460	Aerial Photo Analysis	
GGIS 476	Environmental Remote Sensing	
GGIS 477	Introduction to Remote Sensing	
GGIS 478	Techniques of Remote Sensing	
GGIS 489	Programming for GIS	
Minimum hours required for the minor		**18**

for the Undergraduate Minor in Spatial and Quantitative Methods in Natural Resources and Environmental Sciences

The Spatial and Quantitative Methods in Natural Resources and Environmental Sciences Minor provides students skills in geographic information systems, statistics, research design, and/or mathematical modeling. Courses in the minor are also part of the NRES major and each course addresses one or more of the following NRES major learning outcomes.

1. Understand the scientific method/ways of knowing and critically evaluate information.
2. Integrate principles of biological, chemical, physical, and social sciences and apply them to resource and environmental issues using a systems approach.
3. Understand ecological principles underpinning management of resources, populations, communities, and ecosystems.
4. Use data collection and analysis tools (such as field methods, GIS, modeling, and statistics) to develop plans for managing resource/environmental challenges and adapt plans in response to rapid change.
5. Understand the policies governing resources and the environment and identify social dimensions (stakeholders, interests, trade#offs, synergies, ethical principles) to consider in the development of management plans.
6. Communicate effectively with colleagues, stakeholders, and the public about environmental and resource management issues.
7. Recognize how diverse groups understand the environment, experience positive and negative environmental impacts, and perceive just and equitable solutions.

Speech & Hearing Science Minor

for the Speech & Hearing Science Minor

The undergraduate Speech and Hearing Science Minor is designed for students who seek a basic familiarity with the physical, behavioral, biological, and social aspects of human communication. The minor is tailored to each student's individual needs, thus accommodating students from different disciplines across the campus. There are no prerequisites for this minor. For more information contact the academic advisor, Cathy Warnes (cwarn@illinois.edu).

Minimum required major and supporting course work: Students must meet the following course requirements for a total of 17-19 hours.

Code	Title	Hours
SHS 170	Intro Hum Comm Sys & Disorders	3
Select two of the following:		6-7
SHS 222	Language & Culture of Deaf Communities	
SHS 240	Intro Sound & Hearing Science	
SHS 300	Anat & Physiol Spch Mechanism	
SHS 320	Development of Spoken Language	
SHS 352	Hearing Health and Society	
Eight (8) to nine (9) additional hours of speech and hearing science courses chosen from the following list, with at least six (6) credit hours at the 300-400 level.		8-9
SHS 120	Child, Comm, & Lang Ability	
SHS 200	General Phonetics	
SHS 271	Communication and Aging	
SHS 280	Communication Neuroscience	
SHS 301	General Speech Science	
SHS 375	Communication Partners and Health	
SHS 380	Comm Competence and Disorders	
SHS 389	Neuroplasticity and Communication	
SHS 427	Language and the Brain	
SHS 433	Children with Neurodevelopmental Disorders Across Communication Contexts	
SHS 450	Intro Audiol & Hear Disorders	
SHS 451	Aural Rehab Children to Adults	
SHS 473	Augmentative & Alternative Communication

Statistics Minor

for the Undergraduate Minor in Statistics

The minor, administered by the Department of Statistics, is designed to provide students with an understanding of the concepts of statistical inference and a familiarity with the methods of applied statistical analysis. A minor in statistics will assist students with their major field of study to better prepare them for a career in their chosen field. It will also prepare students for graduate studies in statistics or in one of many areas where data analysis plays an important role. Interested students should contact the Statistics undergraduate advisor for admission into the minor. Students should have completed the calculus sequence through MATH 231 before entering the minor.

for the Undergraduate Minor in Statistics

Code	Title	Hours
Three courses (9-12 hours), including at least one from the Advanced Statistical methods group, must be STAT courses.		
Statistics Concepts -Select one of the following:		**3-4**
CPSC 241	Intro to Applied Statistics	
ECON 202	Economic Statistics I	
EPSY 280	Elements of Statistics	
PSYC 235	Intro to Statistics	
STAT 100	Statistics	
STAT 107	Data Science Discovery	
SOC 280	Intro to Social Statistics	
Data Analysis -Select one of the following:		**3**
STAT 200	Statistical Analysis	
STAT 207	Data Science Exploration	
STAT 212	Biostatistics	
ECON 203	Economic Statistics II	
Linear Algebra -Select one of the following:		**2-3**
MATH 225	Introductory Matrix Theory	

MATH 257	Linear Algebra with Computational Applications	
MATH 415	Applied Linear Algebra	
Mathematical Statistics -Select one of the following:		**3-4**
STAT 400	Statistics and Probability I	
STAT 408	Actuarial Statistics I	
MATH 461	Probability Theory	
Advanced Statistical Methods		**6**
Select two 300- or 400- level STAT courses. STAT courses numbered 409 and above meet this requirement.		
Total Hours		**17-20**

for the Undergraduate Minor in Statistics

Statistics students will:

1. Understand of the concepts of statistical inference and basic methods of applied statistical analysis.
2. Communicate the results of a statistical analysis effectively.
3. Be competent in the use of statistical software.

Interdisciplinary Minor in the Study of the Islamic World

for the Undergraduate Interdisciplinary Minor in the Study of the Islamic World

An interdisciplinary minor in the Study of the Islamic World is offered by the Center for South Asian and Middle Eastern Studies. It is designed for students interested in developing an expertise in one or more parts of the Islamic world or in Islamic culture generally, as a complement to their disciplinary major. Completion of the minor requires 19 credit hours in applicable courses with a minimum grade-point average of 2.75.

for the Undergraduate Interdisciplinary Minor in the Study of the Islamic World

Code	Title	Hours
Completion of a fourth semester course in an Islamic language (e.g. Arabic, Turkish, Swahili, Wolof). Select courses from the approved course list.		4
Select one of the following:		3
HIST 135	History of Islamic Middle East	
SAME 152	The New Middle East	
REL 214	Introduction to Islam	
Additional courses chosen from the approved course list. The courses must come from at least two disciplines. At least six hours must be at the 300- or 400-level.		12
Total Hours		**19**

for the Undergraduate Interdisciplinary Minor in the Study of the Islamic World

Students completing the minor will be able to:

1. **Demonstrate foundational knowledge of the Islamic World**, including its cultures, histories, and societies, and develop focused expertise in a specific region or thematic area.
2. **Apply language skills in context**, demonstrating proficiency at the fourth-semester level or equivalent in an Islamic World language (e.g., Arabic, Persian, Turkish, Swahili, Wolof) to engage with primary sources and cultural materials.

Sub-Saharan African Languages Minor

for the Undergraduate Minor in Sub-Saharan African Languages

The minor in Sub-Saharan African Languages is designed for students who are interested in developing proficiency in any one of the languages for which there is faculty expertise, and to develop their understanding of the region, as a complement to their disciplinary major. Available African

Languages include: Bamana, Lingala, Swahili, Wolof and Zulu. Completion of the minor requires at least 18 hours.

for the Undergraduate Minor in Sub-Saharan African Languages

Code	Title	Hours
Language		6
Advanced African Language courses beyond the second year courses chosen in consultation with the minor advisor. Only one African Language can be chosen to fulfill this requirement.		
African Linguistics		6
3 hours: Introductory course chosen from the following:		
LING 100	Intro to Language Science	
LING 400	Intro to Linguistic Structure	
3 hours: 300 or 400-level course chosen from the following:		
LING 412	Lang in African Culture & Soc	
A similar course at the 300- or 400-level approved by the advisor		
African Studies		6
Courses must be selected in consultation with the advisor.		
One course chosen from the list of approved introductory courses; and		
One course chosen from the list of approved courses at the 300 or 400-level.		
Note that many courses on the list require a prerequisite such as AFST 222 or HIST 110.		
Total Hours		**18**

for the Undergraduate Minor in Sub-Saharan African Languages

1. Students will demonstrate linguistic proficiency and cultural understanding in the target language and be able to communicate effectively in diverse settings.
2. Students will be able to apply their political, social, historical, and cultural knowledge to contribute to evolving perspectives and ideas about Sub-Saharan Africa.
3. Students will gain communicative competencies that provide rewarding opportunities, including meaningful employment or post-graduate study.

Sustainability, Energy, and Environment Fellows Program Minor

for the Undergraduate Minor in the Sustainability, Energy, and Environment Fellows Program

Why is true sustainability so hard to achieve? Behind every environmentally friendly practice is a web of consequences, trade-offs, feedbacks, and barriers — and this undergraduate minor administered by the Institute for Sustainability, Energy, and Environment (iSEE) will help you develop a systems-level perspective of the economic, environmental and social dimensions of sustainability to help you navigate them.

The Sustainability, Energy, and Environment Fellows Program (SEE FP) is a campuswide undergraduate minor that prepares students for pursuing careers in the corporate sector, nonprofit organizations, government agencies and environmental advocacy groups.

To find out more about the minor and the enrollment process, email Eric Green, iSEE Instructor/Advisor, at see-fellows@illinois.edu.

for the Undergraduate Minor in the Sustainability, Energy, and Environment Fellows Program

Sustainability touches many different academic disciplines all with the underpinnings of understanding environmental impacts. Through this minor, students will be able to:

1. Recall a variety of environmental impacts.
2. Discuss the social and natural phenomenon that create those impacts.
3. Apply their disciplinary lens when determining methodologies to study those phenomenon.
4. Devise technical and social solutions to those negative environmental impacts.
5. Provide those solutions in real-world contexts with external evaluation.

Teacher Education in English as a Second Language Minor

for the Undergraduate Minor in Teacher Education in English as a Second Language

For those in another teacher education curriculum who want to prepare themselves to gain a subsequent endorsement in ESL on their professional educator license endorsed in a teaching field. Teacher education minors are available only to students seeking to add additional teaching fields to their teaching majors.

for the Undergraduate Minor in Teacher Education in English as a Second Language

The Minor in Teacher Education in English as a Second Language also fulfills coursework necessary for the State of Illinois ESL Endorsement for those teachers who hold a Professional Educator License and who wish to teach ESL in the public school system to students whose native language is not English. The endorsement program provides the course work and clinical experience that meet State of Illinois ESL Endorsement.

Code	Title	Hours
LING 100	Intro to Language Science	3
EIL 411	Intro to TESL Methodology	3
LING 489	Theoretical Foundations of SLA	3
EIL 460	Principles of Language Testing	3
Select one of the following:		3
LING 450	Sociolinguistics I	
EIL 456	Lang and Social Interaction I	
CI 446	Culture in the Classroom	
Select one of the following:		3
EIL 422	Engl Grammar for ESL Teachers	

EIL 488	Phonology for Second Language Teachers	
Select one of the following:		3
EIL 214	TESL in the Elementary School	
EIL 215	TESL in the Secondary School	
Total Hours		**21**

for the Undergraduate Minor in Teacher Education in English as a Second Language

1. Students will receive grounding in core areas of Teaching English as a Second Language.
2. Students will receive grounding in linguistic theory.
3. Students will gain theoretical and practical grounding in pedagogy
4. Students will gain knowledge on and the ability to assess student learning at a number of levels.
5. Students will receive grounding on multi-cultural and multi-lingual practices amongst their potential student populations.
6. Students will gain 'hands-on' practice in teaching.

Technology & Management Minor

for the Undergraduate Minor in Technology & Management

Successful management of technology-driven businesses today requires that employees work effectively in interdisciplinary teams. Team-based project management requires that each member of the team contribute not only in his or her own area of expertise, but in other aspects of the project as well. The better equipped a new employee is to reach this level of competency quickly, the more valuable will be his or her contributions. Moreover, an employee having such competency will be better prepared to assume positions of increased responsibility and challenge.

The Hoeft Technology & Management Program offers a minor in Technology & Management to undergraduate students in Gies College of Business and The Grainger College of Engineering. Students in the Colleges of ACES and LAS may also be eligible based on their major. The minor is designed to prepare students for success in a wide variety of careers. Today, more than ever, employers have high expectations of undergraduate hires. The T&M Program provides a comprehensive experience to ready graduates for early career success.

Students in the minor are able to acquire a thorough foundation in their major course of study and a comprehensive understanding of the fundamental elements of a cross-discipline education. The course of study leading to a minor in Technology & Management is comprised of the following:

Code	Title	Hours
Required Courses Taken by Engineering Students Only (in order taken)		
BADM 365	New Product Marketing	3
ACCY 200	Fundamentals of Accounting	3
Required Course Taken by Engineering Students Only (taken at any time)		
FIN 221	Corporate Finance	3
Required Courses Taken by Business Students Only (in order taken)		

MSE 101	Materials in Today's World	3
ECE 317	ECE Technology & Management	3
TAM 201	Mechanics for Technol & Mgmt	3
Required Courses Taken by Engineering and Business Students Together (in order taken)		
TMGT 367	Mgmt of Innov and Technology	3
TMGT 366	Product Design and Development	3
TMGT 460	Business Process Modeling	3
TMGT 461	Tech, Eng, & Mgt Final Project	2

Throughout the minor, emphasis is placed on an interdisciplinary team approach to the development of comprehensive solutions to real-world problems. In many cases, the problems are provided by industry sponsors who, along with business and engineering faculty advisors, provide assistance and guidance to student teams.

The T&M Program is sponsored by leading companies in a variety of industries. These companies provide strategic guidance, access to senior executives, real-world business problems, and internship and full-time employment opportunities. As of Spring 2021, T&M corporate affiliates include Abbott, Anheuser-Busch, Boeing, bp, Caterpillar, John Deere, Motorola Solutions, Synchrony, and T-Mobile.

In addition to formal courses, the T&M Program offers a comprehensive set of co-curricular activities to develop skills and provide valuable experiences to students. These include leadership development, career development, and professional development workshops (for example, professional branding and etiquette, improvisation training, and negotiation training), an international immersion experience, and an international business plan competition.

The Hoeft Technology & Management Program aims to prepare graduates for successful careers in a variety of functions and roles. T&M students have pursued careers in a wide range of industries and fields.

Students who wish to pursue this minor must apply for admission to The Hoeft Technology & Management Program during winter break of their sophomore year. Enrollment in the minor is limited and admission is competitive. Applications are reviewed by the program staff, academic directors, current students in the program, and alumni of the program. Offers of admission are based on the student's personal and professional goals, academic record, extracurricular involvement, teamwork experience, leadership potential, and commitment to making the T&M Program's courses and co-curricular offerings a high priority.

Theatre Minor

for the Undergraduate Minor in Theatre

The Minor in Theatre offers students a comprehensive overview of the study of theatre. The purpose is to expose undergraduate students to the field by reinforcing the integrated nature of theatre as a scholarly and aesthetic pursuit. Students are required to take a core of required courses totaling ten hours and a minimum of six hours of electives in two general areas: History/Criticism and Production/Performance with at least one course from each area.

Contact the Department of Theatre for admission information.

for the Undergraduate Minor in Theatre

At least six hours of coursework for the minor should be advanced (300-level or 400-level courses) and must be distinct from credit earned for the student's major or another minor.

Code	Title	Hours
Required Courses		**10**
THEA 100	Practicum I	1
THEA 101	Introduction to Theatre Arts	3
THEA 208	21st Century Dramaturgy	3
Select one of the following courses to fulfill the theatre history requirement:		3
THEA 304	Global Theatre Performance	
THEA 364	Topics in Theatre History	
Elective Courses		**6**
Courses may not count toward both the Theatre History requirement and the Theatre Elective requirements for the minor.		
Select one course from History/Criticism:		
THEA 110	Broadway Musicals	
THEA 209	Writing Performance & Culture	
THEA 211	Introduction to Playwriting	
THEA 218	Intro to Social Issues Theatre	
THEA 260	Intro Asian American Theatre	
THEA 263	Introduction to African American Theatre	
THEA 304	Global Theatre Performance	
THEA 323	The Comic Imagination	
THEA 362	Chekhov	
THEA 364	Topics in Theatre History	
THEA 410	Dramaturgs Workshop	
THEA 411	Playwrights' Workshop	
THEA 417	Leading Post-Perform Dialog	
THEA 418	Devising Social Issues Theatre (can count as Prod/Perf OR History/Crit)	
THEA 467	Contemporary Theatrical Forms	

THEA 483	Modern Scandinavian Drama
Select one course from Production/Performance:	
THEA 100	Practicum I
THEA 126	Stagecraft
THEA 153	Introduction to Theatre Sound
THEA 170	Fundamentals of Acting I
THEA 175	Fundamentals of Acting II (non-major section)
THEA 220	Survey of Theatrical Design
THEA 222	Introduction to Scenic Design
THEA 231	Intro to Lighting Design
THEA 270	Relationships in Acting I (non-major section)
THEA 402	Designing Immersive Adventures: Escape Rooms
THEA 407	Production Management
THEA 418	Devising Social Issues Theatre (can count as Prod/Perf OR History/Crit)
THEA 433	Business of Entertainment Design
THEA 452	Principles of Arts Management
THEA 456	Properties Design
Total	**16**

for the Undergraduate Minor in Theatre

1. Develop a comprehensive overview of the study of theatre.
2. Understand the integrated nature of theatre as a scholarly and aesthetic pursuit.
3. Understand the theoretic and historical basis of the art of theatre.

REL 403	Women in Muslim Societies	
REL 408	Islam & Politics in Mid. East	
REES 201	Introduction to Eastern Europe	
SOC 483	Middle Eastern Societies & Cultures	
Study Abroad course(s) relevant to Turkey (maximum of 3 hours; must be approved by the advisor)		
TURK 490	Special Topics in Turkish	
Total Hours		**18**

for the Undergraduate Minor in Turkish Studies

Upon completing a minor in Turkish Studies, students will be able to:

- Produce Turkish across the skills of reading, writing, listening, and speaking at an intermediate level of proficiency and accuracy in interpretive, interpersonal, and presentational modes of communication, especially in familiar and everyday contexts.
- Identify, analyze, and make effective use of authentic Turkish sources, including texts, media, and digital resources, for academic or professional purposes.

- Explain key products, practices, and perspectives of the Turkish-speaking culture and compare them with their own and other cultural contexts.

Urban Studies & Planning Minor

for the Undergraduate minor in Urban Studies & Planning

Urban Planning is an interdisciplinary field that emphasizes cohesion, cooperation, and compassion. As such, an Urban Studies and Planning Minor enhances many other program majors. Our students explore current issues impacting the development and functioning of communities worldwide.

Are you interested in making a positive change for the future but already have another major in mind? We invite you to learn more about a minor in Urban Studies and Planning.

For admission criteria and process, see the Department of Urban and Regional Planning website (https://urban.illinois.edu/) or contact the department via email (urbplan@illinois.edu).

for the Undergraduate minor in Urban Studies & Planning

Minimum required major and supporting course work: Admission criteria: 2.75 GPA, as space is available.

Code	Title	Hours
UP 101	Introduction to City Planning	3
UP 203	Cities: Planning & Urban Life (prerequisite: UP 101)	3
or UP 204	Chicago: Planning & Urban Life	
Elective courses offered by UP. At least six (6) hours of coursework must be advanced courses (300- or 400-level) and distinct from credit earned for the student's major or another minor.		12
Total Hours		**18**

for the Undergraduate minor in Urban Studies & Planning

By enriching your college major with an Urban Studies and Planning Minor, you will:

- apply problem-solving skills and policy development techniques
- explore a broad range of communities—from local neighborhoods to international “mega-cities”
- explore the historical core of planning
- be introduced to cutting-edge research in urban studies & planning

Wildlife & Fisheries Conservation Minor

for the Undergraduate Minor in Wildlife & Fisheries Conservation

The Wildlife and Fisheries Conservation minor is ideal for students in biology-centered fields who seek additional instruction related to the management and conservation of undomesticated fish and animals. This minor is not available to NRES majors, but it is open to students in all other majors.

for the Undergraduate Minor in Wildlife & Fisheries Conservation

The minor requires the completion of 17-19 hours of coursework selected from the following list. Six hours of advanced course work must be distinct from credit required in major or another minor.

Code	Title	Hours
Required Courses for a Minor in Wildlife & Fisheries		
NRES 219	Applied Ecology	3
or IB 203	Ecology	
NRES 348	Fish and Wildlife Ecology	3

Pick one:	
NRES 407	Wildlife Population Ecology
NRES 409	Fishery Ecol and Conservation
Pick one:	
NRES 465	Landscape Ecology
NRES 420	Restoration Ecology
NRES 429	Aquatic Ecosystem Conservation
NRES 480	Human-Wildlife Interactions
NRES 485	Stream Ecology
Pick one:	
NRES 302	Dendrology
IB 407	Plant Diversity and Evolution
NRES 415	Native Plant ID and Floristics
IB/NRES 461	Ornithology
IB 462/NRES 442	Mammalogy
IB/NRES 463	Ichthyology
IB/NRES 464	Herpetology
Total Hours	**17**

for the Undergraduate Minor in Wildlife & Fisheries Conservation

The Wildlife & Fisheries Conservation Minor provides students in biology-centered fields instruction related to the management and conservation of undomesticated animals. Courses in the minor are also part of the NRES major and each course addresses one or more of the following NRES major learning outcomes.

1. Understand the scientific method/ways of knowing and critically evaluate information.
2. Integrate principles of biological, chemical, physical, and social sciences and apply them to resource and environmental issues using a systems approach.
3. Understand ecological principles underpinning management of resources, populations, communities, and ecosystems.
4. Use data collection and analysis tools (such as field methods, GIS, modeling, and statistics) to develop plans for managing resource/environmental challenges and adapt plans in response to rapid change.
5. Understand the policies governing resources and the environment and identify social dimensions (stakeholders, interests, trade#offs, synergies, ethical principles) to consider in the development of management plans.
6. Communicate effectively with colleagues, stakeholders, and the public about environmental and resource management issues.
7. Recognize how diverse groups understand the environment, experience positive and negative environmental impacts, and perceive just and equitable solutions.

ROTC Programs

The Reserve Officer's Training Corps is a means for interested students to earn a degree while preparing to commission as an officer into one of the branches of military service. Officers in today's military must have a four-year college degree so typically students that complete their ROTC requirements commission shortly after earning their Illinois degree. All programs have options that serve both undergraduate and graduate students.

The University of Illinois Urbana-Champaign began as a land grant university in 1867 and military training was mandatory for all male undergraduates until the program became entirely voluntary in 1964. U. of I. expanded its curriculum to add Naval ROTC in 1945 and Air Force ROTC in 1949. Since then, all three departments have been represented at Illinois.

Participation in the ROTC is open to all university students, regardless of their academic majors or levels. During your courses of study, each department has a requirement that interested students must contract with the Department of Defense to continue towards an officer's commission.

Along with earning an officer's commission, ROTC is an elective program that provides career opportunities, hands-on leadership experience, adventure training, and financial assistance to participating students. The program is a consecutive series of elective courses and other training, including leadership laboratories designed to prepare students for leadership positions as officers on active duty or in the reserves. The leadership principles and management techniques presented are equally applicable to any career field. Financial support is provided both by the federal government and the State of Illinois.

Financial Assistance

Enrollment in ROTC can provide significant financial support to interested students. All ROTC departments offer merit scholarships, not need based. Also, all contracted cadets and midshipmen receive some financial assistance while attending college. See specific military branch ROTC departments for more information on these financial opportunities.

Illinois State Tuition Waiver

One of the financial assistance options that is available for all ROTC departments is the Illinois State Tuition Waiver. The ISTW covers the cost **tuition** for enrolling and participating in ROTC. Unlike a military scholarship, this benefit comes with **no military commitment** so it is a means to determine whether serving as a military officer after graduation is right for you. Each ROTC department has specific requirements to earn this waiver but in general, you acquire it by (1) being an Illinois resident, (2) registering and attending ROTC courses, (3) have a minimum of 2.5 cumulative GPA at college or a 3.0 cumulative High School GPA for incoming Freshmen, (4) you must be a full-time student, (4) and maintain a 2.0 cumulative GPA to retain. You must also reapply every semester.

For more information about a specific ROTC department, click the corresponding tab on the left.

Air Force ROTC Department website (https://publish.illinois.edu/afrotc/)
airforce-rotc@illinois.edu
(217) 333-1927
Air Force ROTC Detachment 190
505 East Armory Ave., Ste 229
Champaign, IL 61820

Air Force ROTC

The Air Force ROTC program is a professional educational opportunity in which a student can earn a commission in the U.S. Air Force or Space Force while pursuing a baccalaureate degree, and in some cases a Master's degree. This professional foundation is then developed and broadened during active service as a commissioned officer after graduation and commissioning.

A student may be enrolled as a scholarship selectee (Scholarship Program) or non-scholarship (College Program). Students may receive a scholarship prior to arrival as a freshman via the High School Scholarship Program (HSSP) or they may be awarded a scholarship during their freshman or sophomore year via the In-College Scholarship Program (ICSP). There are also other programs for those currently serving in the military to join AFROTC via the Enlisted Commissioning Program (ECP). Non-scholarship students in good standing in the program will have an annual opportunity to compete for scholarship boards.

For Scholarship Program students, no military obligation is incurred until the beginning of sophomore year. College Program students selected to continue in the curriculum incur the military obligation at the commencement of their junior year. The instructors understand unusual cases exist. Please speak with the staff to best understand your particular case.

Aerospace studies courses are open to ALL students, upon consent of the Department of Air Force cadre, even if they are not enrolled in either of these programs.

Requirements for an Officer's Commission

In addition to mental, physical and aptitude requirements, each potential student in the Air Force ROTC program must:

- Be at least the age of 17 with a maximum age of 39* depending on the specific program; if younger than the age of 18, the student must receive the consent of his or her parents (*Scholarships have varying age limits)
- Be a citizen of the United States (provide proof of citizenship)
- Enroll as a full-time student
- Enroll, participate and pass Air Force Aerospace Studies (AFAS) classes, Leadership Laboratory (LLAB) and Physical Training (PT)
- Complete a sports physical
- Be able to complete at least three years of ROTC
- Have no moral obligations or personal convictions that will prevent him or her from executing the oath of office

Scholarship Programs, Types, and Categories

AFROTC scholarships are offered through three primary programs consisting of the High School Scholarship Program (HSSP), the In-College Scholarship Program (ICSP) and the Enlisted Commissioning Program (ECP). Scholarship cadets must major in an academic discipline that qualifies for an Air Force Specialty Code (AFSC) as listed in the Air Force Officer Classification Directory (AFOCD). A scholarship cadet must major in the category for which the scholarship was awarded. AFROTC scholarship programs may offer various types and categories of scholarships to balance recruitment incentives, production requirements and funding availability.

The first type of scholarship that may be offered is a Type 1, covering full tuition and fees (no cap). Type 2 is the next scholarship that may be offered, covering up to $18,000 per year ($9,000 per semester) toward tuition and fees. If tuition and fees are over the scholarship cap, students must cover the difference. Cadets not previously awarded a scholarship and allowed to continue in AFROTC in their junior and senior years will automatically be awarded the General Charles McGee Leadership Award (CMLA). This scholarship has the same characteristics as the Type 2 scholarship previously described. All scholarship types can be converted into a $10,000/year housing scholarship. The housing scholarship covers up to $10,000/year in University-owned housing and only covers room; board is not included. Additionally, all scholarships include a book stipend (as of 2024: $900 per academic year) and subsistence allowance (as of 2024: between $300–$500 per month). For further details on scholarships, visit the AFROTC.com/scholarships website.

A student in good standing and enrolled in a degree program that requires longer than four years for completion may apply for, but is not guaranteed, an extra year of scholarship benefits. Upon graduation, scholarship students are commissioned in the U.S. Air Force or U.S. Space Force and typically serve four years on active-duty dependent upon the career field they have selected.

Out-of-state scholarship students in their first year at the university have the opportunity to compete for a University Room and Board (R&B) Scholarship, as funds are available on an annual basis. The University R&B ROTC Scholarship is awarded on a competitive basis, determined by the Professor of Aerospace Studies.

College Program

A College Program non-scholarship student receives all required uniforms while undertaking the same training and education as Scholarship Program students. The College Program students can then use this valuable experience to gain advantage for selection into the Scholarship Program. If not selected for scholarship but allowed to continue (receiving an Enrollment Allocation) into their junior and senior years, students will be awarded the CMLA scholarship as previously described. College Program students (and Scholarship Program students) selected to continue by receiving an Enrollment Allocation (EA) usually attend one summer training session before their junior year. Upon graduation, these students are still commissioned in the U.S. Air Force or Space Force and serve a minimum obligation similar to scholarship students, dependent upon the career field they have selected.

In addition to gaining opportunities for scholarship and future Service, College Program students who are residents of Illinois are eligible to receive the Illinois State Tuition Waiver (ISTW). These waivers are awarded annually by the Professor of Aerospace Studies on a competitive basis and cover tuition only. Generally, those on scholarship will not be considered for the ISTW.

A student may apply for admission to the College Program through the Department of Aerospace Studies. The Professor of Aerospace Studies makes the final selection based on academic, physical and military aptitude criteria.

Army ROTC

ARMY ROTC is an elective program that develops a student's leadership potential and prepares them to serve after college graduation as an officer in the U.S. Army, Army Reserve, and Army National Guard. Students typically take a military science class and a corresponding leadership laboratories each semester. These classes along with other military training opportunities, evaluates students' leadership potential in a variety of leadership roles and provides immediate feedback to students. Emphasis is on hands-on leadership experience. Cadets plan, organize, and evaluate much of the laboratory and field training.

Requirements for an U.S. Army Officer's Commission

Code	Title	Hours
Basic Course (MS-I and MS-II cadets)		
Options for completing the basic course include 1) complete MILS 100 and 200 level coursework described below, 2) graduate from 30-Day Basic Camp 3) Prior or current military service. Contact department for details.		
First Year		
MILS 101	Introduction to the Army	
MILS 112	Leadership Laboratory	
MILS 102	Introduction to the Profession of Arms	
MILS 114	Leadership Laboratory	
Second Year		
MILS 201	Leadership and Ethics	
MILS 212	Leadership Laboratory	
MILS 202	Leadership and Teamwork	
MILS 214	Leadership Laboratory	
Advanced Course (MS-III and MS-IV cadets)		
Third Year		
MILS 301	Training Management and the Warfighting Functions	
MILS 312	Leadership Laboratory	
MILS 302	Leadership and Ethics	
MILS 314	Leadership Laboratory	
Advanced Camp- Summer Training		
Fourth Year		
MILS 341	Leadership and Management	
MILS 322	Leadership Laboratory	
MILS 342	Officership	
MILS 324	Leadership Laboratory	
Military History Course		
MILS 120	Intro to US Armed Forces	
or HIST 251	Warfare Milit Insts & Soc	
Enrollment of the third and fourth year courses and labs require instructor approval, must be a U.S. citizen and the student must be contracted to commission upon graduation from UIUC. Non-U.S. citizens may be enrolled as ROTC students within the Basic Course.		

Financial Assistance

Along with the Illinois State Tuition Waiver mentioned on the overview page, Army ROTC has specific financial assistance opportunities that can greater reduce college expenses. Enrollment in Army ROTC can provide significant financial support to interested students. All ROTC scholarships are merit-based. Army ROTC offers three financial aid programs to support Army ROTC cadets earn their college degrees: the Army ROTC Federal Scholarship, the Guaranteed Reserve Forces Duty ROTC Scholarship, and the Simultaneous Membership Program (SMP) with the Illinois Army National Guard or Army Reserve.

Federal Scholarship:

This scholarship covers **FULL** Tuition and Fees **OR** Room and Board; a $600/Semester allowance for books; and $420/month stipend for subsistence while college is in session. This is usually 9-10 months each academic year. There are 4-year, 3.5-year, 3-year, 2.5-year and 2-year variations of this scholarship. However, this scholarship may only cover one degree. To accept this scholarship, you are required to sign a contract for military service upon graduation from college. While receiving scholarship benefits, you must register for the Military Science courses, have a minimum of 2.5 to be awarded, and maintain a 2.0 to retain. **Freshman Applicants** must have a 19 or higher on the ACT or a 920 or higher on the SAT.

GRFD (Guaranteed Reserve Forces Duty) Scholarship:

This scholarship is very similar to the Federal Scholarship except the student must also be a member of the U.S. Army Reserves or the Illinois Army National Guard. Students with a GRFD scholarship are required to sign a contract for Reserve or National Guard duty prior to accepting the scholarship. The student will attend one monthly weekend drill and train for two weeks over the summer with his/her assigned unit while attending college. This scholarship covers **FULL** Tuition and Fees **OR** Room and Board; a $600/Semester allowance for books; and $420/month stipend for subsistence while college is in session. This is usually 9-10 months each academic year. There is a 4-year version that must be applied for prior to joining Army ROTC but if you are already an Illinois student, there are still 3-year, 2.5-year and 2-year variations of this scholarship as well. You also receive all of the Simultaneous Membership Program (SMP) benefits listed below.

Nursing Scholarship:

At Illinois, the Nursing program is part of the University of Illinois at Chicago and students apply for entrance into the nursing program during their first semester of their sophomore year. If accepted, Army ROTC has scholarships that will cover the last two years needed to obtain a Nursing degree. Like the two scholarships above, this scholarship covers **FULL** Tuition and Fees **OR** Room and Board; a $600/Semester allowance for books; and $420/month stipend for subsistence while college is in session. This is usually 9-10 months each academic year. Should you earn this scholarship, you will sign a contract for military service as an Army nurse upon your graduation.

Simultaneous Membership Program (SMP):

The purpose of the SMP Program is to give eligible enlisted members of the Reserve Component an opportunity to participate in a college-level ROTC Program and earn an officer's commission upon graduation. The name, SMP, originates from a student simultaneously being under contact with a ILARNG or US Army Reserve contract and an Army ROTC contract. This agreement may be with a GRFD scholarship or with a non-scholarship contract. Once a Illinois student has completed basic training, or an equivalent qualification (Basic Camp through Army ROTC), and is an academic sophomore, he/she can join the SMP and earn an officer's commission while completing their college degree. While in the SMP, the cadet earns E-5 (Sergeant) pay while attending drill and annual training. Financial assistance includes (1) E-5 pay, typically around $350 per drill weekend; (2) roughly $380 per month GI Bill pay; and (3) $350 per month as a GI Bill college kicker. ILARNG SMP Soldiers also earn four years of paid tuition if they attend a state university in Illinois. The University of Illinois Urbana-Champaign is one of these colleges.

Other Scholarships:

ROTC awards numerous other cash award scholarships annually to cadets. If interested in learning more about these scholarships, contact the Army ROTC office for further details.

Non-Scholarship Contracts:

A student may contract without a scholarship and still earn $420 per month stipend to help with expenses while the college is in session. A cadet must have a minimum of 30 college credits to qualify for this contract.

ALL contracts (scholarship or non-scholarship) are contingent upon an applicant being medically qualified, physically fit, and participating in Army ROTC training events.

For additional information regarding any of these programs, contact the Professor of Military Science (arotc@illinois.edu), University of Illinois at Urbana-Champaign, 113 Armory Building, 505 East Armory Street, Champaign, IL 61820; (217) 244-1407.

Champaign, IL 61820

Naval ROTC

The Naval ROTC program is a professional educational opportunity in which a student can earn a commission in the U.S. Navy or U.S. Marine Corps while pursuing a baccalaureate degree. This professional foundation is then developed and broadened during active service as a commissioned officer after graduation and commissioning. A student may be enrolled as a scholarship selectee (Scholarship Program) or non-scholarship (College Program). Students must be on scholarship by junior year or be granted an exception by a board to continue in the program. Non-scholarship

students in good standing in the program will have an annual opportunity to apply for scholarships or selection to continue into their junior and/or senior years.

For scholarship students, no military obligation is incurred until the beginning of the sophomore year. Non-scholarship students selected to continue in the program incur the military obligation at the commencement of their junior year.

Naval science courses are open to all students, upon consent of the Department of Naval Science, even if they are not enrolled in either of these programs.

Requirements for an Officer's Commission

In addition to mental, physical, and aptitude requirements, potential students in the Naval ROTC program must:

- Be citizens of the United States.
- Be between 17 and 21 years of age by September 1 of the year in which enrollment begins (those contemplating a bachelor's degree that requires five years to complete must be younger than age 20 on June 30 of that year). If younger than age 18, they must have the consent of their parents. Scholarship students must be younger than age 25 on June 30 of the calendar year in which they are commissioned. College program students must meet identical requirements except that they must be younger than age 27 on June 30 of the calendar year in which commissioned.
- Have no moral obligations or personal convictions that will prevent them from executing the oath of office.

Code	Title	Hours
All Semesters		
Each week, Naval ROTC students have a two-hour naval science laboratory course for which there is no credit		
NS 100	Leadership Laboratory (must take each semester)	
Naval ROTC must also take the following naval science and University academic courses (provided plan is typical but may be scheduled differently depending on student and availability)		
First Year		
NS 101	Introduction to Naval Science (All students)	
NS 102	Sea Power and Maritime Affairs (All students)	
NROTC students may substitute NS 102 with NS 120, Intro to US Armed Forces		
Second Year		
NS 303	Leadership and Management (All students)	
NS 204	Navigation/Naval Operations I (Navy options only)	
Third Year		
NS 305	Introduction to Naval Engineering (Navy options only)	
NS 323	Maneuver Warfare Fundamentals (Marine options only)	
NS 306	Naval Weapons Systems (Navy Options only)	
NS 321	Evolution of Warfare (Marine options only)	
Fourth Year		
NS 307	Navigation/Naval Operations II (Navy options only)	
NS 308	Leadership and Ethics (all students)	
Each student's degree program must also include the following University courses		
6 hours Calculus (Navy options only)		
6 hours Physics, calculus-based (Navy options only)		
6 hours English (all students)		
3 hours American History or National Security Policy (Navy and Marine options only)		
3 hours World Culture and Regional Studies (Navy options only)		

Program Options

Scholarship Program (Navy/Marine Corps)

The Scholarship Program provides the student with their choice of either full tuition or room and board (as of 2024: maximum R&B of $11,500 per year). Additionally, the program provides fees, a book stipend (as of 2024: $750 per academic year), uniforms, and a subsistence allowance (as of 2024: between $250-$400 per month). A student in good standing and enrolled in a degree program that requires longer than four years for completion may apply for an extra year of scholarship benefits. Upon graduation, scholarship students are commissioned in the U.S. Navy or U.S. Marine Corps and typically serve five years on active-duty with an additional three years in the Reserves, dependent upon the warfare field they have selected.

Scholarship students have an opportunity during summers to train with the U.S. Navy or Marine Corps. Students are paid for summer training periods of approximately four to six weeks onboard naval vessels, in aviation squadrons, on amphibious bases, or with nuclear submarines. Students who choose to enter the U.S. Marine Corps spend their last summer training period at the Marine Corps Officer Candidate School in Quantico, Virginia.

Scholarship Program students who are residents of Illinois are eligible to receive the Illinois State Tuition Waiver (ISTW). These waivers are awarded annually by the Professor of Naval Science on a competitive basis and cover tuition only. The scholarship students that also receive the ISTW are encouraged to apply their NROTC scholarship toward room and board, covering the vast majority of cost for attendance.

Out-of-state scholarship students in their first year at the University have the opportunity to compete for a University Room and Board (R&B) Scholarship, as funds are available on an annual basis. The University R&B ROTC Scholarship is awarded on a competitive basis, determined by the Professor of Naval Science.

The Four-Year National Scholarship is available for entering freshmen with applications due typically between 18 and 6 months prior to matriculation. Scholarship selection in national competition is based on the applicant's Scholastic Aptitude Test (SAT) or American College Testing (ACT) program score; high school and college records; aptitude for naval service, as judged by interviews; and by prescribed physical qualifications. Potential students may apply online by accessing the NROTC site (https://www.netc.navy.mil/Commands/Naval-Service-Training-Command/NROTC/Apply/).

Students may apply for three-year or less scholarships through the Department of Naval Science, whether or not enrolled in the College Program, assuming eligibility requirements are met.

College Program (Navy/Marine Corps)

A College Program non-scholarship student receives all required uniforms and naval science textbooks while undertaking the same training and education as Scholarship Program students. The College Program students can then use this valuable experience to gain advantage for selection into the Scholarship Program. If not selected for scholarship but allowed to continue (on Advanced Standing) into their junior and senior years, students will be given a stipend (as of 2024: between $350-$400 per month). College Program students selected to continue on Advanced Standing usually attend one summer training session before their senior year. Upon graduation, these students are still commissioned in the U.S. Navy or U.S. Marine Corps and serve a minimum obligation similar to scholarship students, dependent upon the warfare field they have selected.

In addition to gaining opportunities for scholarship and future Service, College Program students who are residents of Illinois are eligible to receive the Illinois State Tuition Waiver as described above.

A student may apply for admission to the College Program through the Department of Naval Science (NROTCStaff@illinois.edu). The Professor of Naval Science makes the final selection based on academic, physical, and military aptitude criteria.

Veterinary Medicine

Veterinary Medicine is a professional goal at the University of Illinois Urbana-Champaign. Students pursuing veterinary medicine can choose any major and be competitive for admission to veterinary medicine programs.

Health Professions advising is recommended for any student pursuing veterinary medicine. It is part of The Career Center (https://www.careercenter.illinois.edu/) at the University of Illinois Urbana-Champaign.

For more information on pre-veterinary medicine coursework and preparation, visit the website (https://www.careercenter.illinois.edu/healthprofessions/vetmed/).

For information regarding the University of Illinois College of Veterinary Medicine visit their website (https://vetmed.illinois.edu/prospective-students/).

All information on Health Professions advising is available on their website (https://www.careercenter.illinois.edu/instructable/pre-health-illinois/).

Teacher Education

The Council on Teacher Education is a central administrative unit that serves as the liaison between campus teacher, school support, and administrator preparation programs and the Illinois State Board of Education. In this liaison role, the Council is responsible for ensuring that state-mandated licensure and program requirements are met. The Council also oversees the review and approval of Illinois State Board of Education-approved professional development activities offered by Illinois personnel for licensed educators.

Requirements

Licensure requirements may change at any time in response to new mandates from the Illinois State Board of Education or the Illinois General Assembly.

Admissions

Applicants to educator preparation programs must satisfy the admission criteria established by the college and department that offer their chosen curricula.

Admission to an educator preparation program does not imply eligibility for Illinois licensure. Certain criminal convictions - specified in Articles 10-21.9 and 21B-80 of the School Code of Illinois (http://www.ilga.gov/legislation/ilcs/ilcs3.asp?ActID=1005&ChapAct=105%C2%A0ILCS&160;5/&ChapterID=17&ChapterName=SCHOOLS&ActName=School+Code.) - may temporarily or permanently disqualify an individual from obtaining a teaching license or working in Illinois public schools. Questions regarding these restrictions should be directed to the Council on Teacher Education.

Continuation in an Educator Preparation Program

GPA Requirements

- Undergraduate candidates must maintain a cumulative GPA of at least 2.5 (A=4.0)
- Graduate candidates must maintain a cumulative GPA of at least 3.0 (A=4.0)

The Council on Teacher Education reviews each student's academic record at the end of the fall and spring semesters. Students whose GPAs fall below the minimum receive a warning letter indicating that continuation in the program, enrollment in student teaching or internships, and recommendation for licensure are at risk. If the minimum GPA is not restored in the subsequent term, the Council may remove the student from the licensure program.

Professional Dispositions and Behaviors

Teaching effectiveness depends not only on academic performance but also on professional dispositions and behaviors. Faculty evaluations of these characteristics inform decisions about program continuation and licensure recommendations.

Health and Well-Being

Recognizing that physical and mental health can influence teaching effectiveness, faculty and advisors may refer students to campus counseling and medical services as needed; students may choose to access these services. In exceptional cases, the Council may require evidence of a student's physical and mental health fitness for continued participation in an educator preparation program.

Criminal Background Investigation

Illinois law requires school districts to conduct background checks on all students participating in field experiences. Accordingly, each educator preparation student must authorize school districts in which they are completing field experience placements to initiate a criminal background check, which may include fingerprinting. Students are responsible for any associated fees. A school district may not host a student with a licensure-disqualifying offense on record.

Student Teaching and Internships

Student teaching and internship placements require enrollment in a designated course specified by the educator preparation program, successful completion of all academic and professional prerequisites, and faculty recommendation. Programs make every effort to secure placements; however, school districts determine whether to accept a student, and placements cannot be guaranteed. Because student teaching and most internships require a full-time commitment, students should plan ahead to meet scheduling and financial obligations, including any additional expenses such as transportation to and from placement sites.

Students admitted to an approved licensure program progress toward licensure by completing all required coursework, field experiences, and state licensure tests. All professional education and content-area courses counting toward licensure, endorsements, or approvals must be completed with a grade of C- or higher.

During their final term, students apply for licensure through their Council on Teacher Education portal. After the Council processes this application, students must claim and register their license through the Illinois State Board of Education's Educator Licensure Information System (ELIS). Students should be aware that licensure requirements may change at any time by action of the Illinois State Board of Education or the legislature; if they delay claiming their license, they may be required to meet updated requirements before becoming licensed.

Students who complete degree requirements but do not meet all licensure requirements, may, at their program's discretion, still be awarded a degree without being recommended for licensure. Students who believe that a decision affecting their progression or recommendation for licensure was made unfairly or in error may file a complaint or purse a grievance through the Council's established procedures.

State Approved Licensure Programs

Undergraduate

College of Agriculture, Consumer and Environmental Sciences (http://catalog.illinois.edu/undergraduate/aces/)

- Agricultural Education, Grades 5-12
- Family and Consumer Sciences, Grades 5-12

College of Applied Health Sciences (http://catalog.illinois.edu/undergraduate/ahs/)

Accountancy, MAS

for the degree of Master of Accounting Science in Accountancy

The M.A.S. program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from an accredited U.S. institution. Each student will select either Taxation (p. 2059) or Financial Reporting & Assurance (p. 1053) for their core accounting concentration. Students are also required to select a secondary graduate elective concentration. By design, the program emphasizes the emerging trend of data analytics in the practice of accounting, with a standard course plan that leads to a graduate concentration in Data Analytics in Accountancy (p. 2005) to fulfill the graduate electives. Students have the choice of remaining in the standard course plan or selecting from among the following alternative graduate concentrations to fulfill the graduate elective requirement: Corporate Governance and International Business, Finance (p. 2024), Financial Reporting & Assurance (p. 1053), Information Technology & Control (p. 2036), Real Estate (http://catalog.illinois.edu/graduate/graduate-majors/finance/graduate_concentration_in_real_estate/), Taxation (p. 2059), and Supply Chain Management (p. 2057). Students who wish to deviate from the standard course plan, but do not wish to pursue a listed graduate concentration, may petition to take other graduate courses of interest subject to approval of an Accountancy Advisor. Admission to a concentration requires application to the Department. Admission to some concentrations may be competitive.

Admission

All applicants to the Master of Accounting Science program should refer to MAS program (https://giesbusiness.illinois.edu/mas/admissions/).

for the degree of Master of Accounting Science in Accountancy

For additional details and requirements refer to the department's program information online (https://business.illinois.edu/mas/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Choose one (1) from:		**4**
ACCY 410	Advanced Financial Reporting	
ACCY 451	Advanced Income Tax Problems	
NOTE: ACCY 451 and ACCY 410 are currently offered for differential credit (3 hours undergraduate or 4 hours graduate credit). Students in the Taxation concentration that complete both of these courses during the undergraduate timeframe will take ACCY 510, ACCY 517, or an approved elective. Students in the Financial Reporting & Assurance concentration that complete both ACCY 451 and ACCY 410 for 3 hours of undergraduate credit would either take ACCY 518 or ACCY 574, or an approved elective. All graduate electives must be approved by an Accountancy Advisor.		
Choose one (1) Accounting elective from this list:		**4**
ACCY 510	Financial Reporting Standards	
ACCY 512	Data Analytics for Management Accounting	
ACCY 515	Auditing & Assurance Standards

Supply Chain Management (p. 2057)	
Taxation (p. 1054)	
Total Hours	**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
The prescribed courses may only be used to satisfy the requirements of one concentration.	
All 32 graduate hours must be completed at the University of Illinois at Urbana-Champaign.	
Minimum GPA:	3.0

for the degree of Master of Accounting Science in Accountancy

1. **Disciplinary Competence:** Students will build on their undergraduate education by acquiring advanced accounting and data analytics knowledge to manage advanced, complex transactions and business problems.
2. **Advanced Professional Research skills:** Students will be able to identify, interpret, and apply relevant authoritative guidance and data to address complex accounting problems.
3. **Professional Preparation:** Students will develop advanced knowledge of an accountant's professional responsibilities and the value of diversity and inclusion.

Accountancy: Taxation, MAS

for the degree of Master of Accounting Science in Accountancy, Taxation concentration

The MAS program is a one-year program for students who have completed or are pursuing a Bachelor of Science in Accountancy from a regionally accredited U.S. institution. The Concentration in Taxation is one of the core concentrations available within the MAS program.

Students in the Taxation concentration are also required to choose a secondary concentration. Elective concentration options include: Corporate Governance & International Business (p. 2003), Data Analytics in Accountancy (p. 2005), Finance (p. 2024), Financial Reporting & Assurance (p. 2005), Information Technology & Control (p. 2036), Real Estate (p. 2047), and Supply Chain Management (p. 2057).

Graduate Degree Programs in Accountancy

Graduate Majors:

- Accountancy, MAS (p. 1052)
  - with optional concentrations:
    - Corporate Governance & International Business (p. 2003)
    - Data Analytics in Accountancy (p. 2005)
    - Finance (p. 2024)

    - Information Technology & Control (p. 2036)
    - Real Estate (p. 2047)
    - Supply Chain Management (p. 2057)
    - Taxation (p. 1054)
- Accountancy, MS (p. 1056) (on campus & online)
    - with optional concentrations:
        - Corporate Governance & International Business (p. 2003)
        - Data Analytics in Accountancy (p. 2005)
        - Finance (p. 2024)
        - Information Technology & Control (p. 2036)
        - Supply Chain Management (p. 2057)
- Accountancy, PhD (p. 1060)

Graduate Minors:

- Accountancy (p. 2125)

Graduate Concentrations:

- Accountancy (p. 1993)
- Data Analytics in Accountancy (p. 2005)

for the degree of Master of Accounting Science in Accountancy, Taxation concentration

Accountancy, MS

for the degree of Master of Science in Accountancy (on campus & online)

The Master of Science in Accountancy can be completed either on campus or online.

The University of Illinois at Urbana-Champaign has consistently ranked among the top accountancy schools in the United States. The Public Accounting Report and Accounting Degree Review have rated the Illinois graduate accounting program as one of the top accountancy masters programs in the United States.

The MS in Accountancy (MSA) program (https://giesonline.illinois.edu/explore-programs/online-masters-in-accounting/) is a one year (STEM Designated) accounting degree. Our students include those with limited prior accounting education as well as students with an undergraduate degree in accounting. The MSA core curriculum applies to all of our students. However, for those students who have previously taken significantly equivalent courses to any of those in our core curriculum, we will work with our students to find a suitable replacement to recognize the sufficiency of their prior accounting education.

The online Master of Science in Accountancy (https://giesonline.illinois.edu/explore-programs/online-masters-in-accounting/) (iMSA) is a fully online program that can be completed in 18 to 36 months. The highly-engaging delivery format and our world-renowned faculty provide students with a hands-on and practice-oriented learning experience. The iMSA is designed for those already working in the accounting field looking to refresh their skill set and for those who intend to use the degree to enter the field for the first time. A mirror of the on-campus Master of Science in Accountancy (MSA) curriculum, the online MSA (iMSA) uses a flexible program format. It allows students to balance academic life with other obligations.

The MSA program (https://giesbusiness.illinois.edu/msa/) begins in June each year with Summer Session II.

The iMSA program (https://giesonline.illinois.edu/explore-programs/online-masters-in-accounting/) begins in August and in January each year.

Admission

All applicants to the Master of Science in Accountancy program should refer to the MSA program (https://giesbusiness.illinois.edu/msa/admissions/) or the iMSA program (https://giesonline.illinois.edu/explore-programs/online-masters-in-accounting/) for the online program.

for the degree of Master of Science in Accountancy (on campus & online)

For additional details and requirements refer to the department's program information online (https://giesbusiness.illinois.edu/accountancy/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; the requirements are listed below:

Code	Title	Hours
ACCY 501	Accounting Analysis I	4
ACCY 502	Accounting Analysis II	4
ACCY 503	Managerial Accounting	4
ACCY 504	Auditing	4
ACCY 505	Federal Taxation	4
or substitute graduate accountancy courses approved by a program advisor		
Graduate electives with at least 4 hours credit in a non-accountancy graduate course		12
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall: 20 (of the total 32 required)	
Students shall earn at least 24 of the 32 total graduate hours while enrolled in the Graduate College at Urbana-Champaign.	

Electives shall form a coherent program of study approved by a program advisor.	
Minimum MSA program coursework cumulative GPA, both by semester and program overall	3.0
Minimum MSA accountancy coursework cumulative GPA, both by semester and program overall	3.0

An optional CPA Review course (ACCY 398) is available. The credit hours for the CPA Review Course do not count towards the 32 credit hours required to graduate.

International students with TOEFL scores below 613 (paper-based), 257 (computer-based), or 103 (internet-based), or IELTS score below 7.0, are required to take the English Placement Test (EPT) when they arrive on campus. After taking the EPT, most students are required to take a Business English course sequence. For these students, completion of the ESL course sequence is **mandatory** but does not count towards the 32 hour degree requirement.

for the degree of Master of Science in Accountancy (on campus & online)

---

1. **Learning Objective #1: Discipline-based competency**
   a. One goal of the MSA degree is to impart competency in traditional accountancy topics (financial reporting, cost accounting, federal income tax, and auditing), with an expectation of performance at a level higher than undergraduates. Besides providing a technical foundation for career success, a secondary goal of this learning objective is to prepare students to pass the AICPA Uniform CPA examination.
2. **Learning Objective #2: Social and Communication Skills**
   a. Students should be able to communicate with others regarding technical accounting topics.
3. **Learning Objective #3: Teamwork**
   a. Students should demonstrate the ability to collaborate as an effective team member in varying roles in a diverse group in and in diverse tasks.

Accountancy: Accountancy Analytics, MS

for the degree of Master of Science in Accountancy, Accountancy Analytics concentration (online)

The Accountancy Analytics concentration can be completed online.

The Accountancy Analytics Concentration is designed to develop leaders who understand (1) how to apply data analytics in a variety of accounting and business contexts, (2) critically solve business problems using data-intensive business and accounting information, and (3) synthesize and effectively communicate data-intensive information, findings, and conclusions to other environment-constituents, including supervisors, peers and subordinates, clients, and regulatory agencies. This concentration will not only provide a strong foundational knowledge of data analytics, but also provide students multiple opportunities to apply this knowledge via experiential learning opportunities.

Admission

All applicants to the Master of Science in Accountancy program should refer to the MSA program (https://giesbusiness.illinois.edu/msa/admissions/) or the iMSA program (https://giesonline.illinois.edu/explore-programs/online-masters-in-accounting/) for the online program.

Accountancy, PhD

for the degree of Doctor of Philosophy in Accountancy

The student's doctoral program is determined in consultation with a faculty advisory committee. The student's evolving plans for the doctoral thesis serve as a guide in planning the program. Program coursework is comprised of two general categories: core studies and advanced studies within an area of specialization (i.e., a supporting field). The latter coursework is tailored to facilitate the student's dissertation.

In addition, candidates must pass a written accountancy core examination and both oral preliminary and oral final examinations on the doctoral thesis. In the accountancy core examination, candidates must demonstrate a thorough knowledge of research methods and accounting theory; a general acquaintance with the subject matter of the variety addressed within accountancy doctoral core studies; and proficiency in the required areas of economic theory, quantitative methods, behavioral science and financial economics.

Admission

All applicants to the Accountancy doctoral program should refer to the PhD program (https://giesbusiness.illinois.edu/graduate-hub/doctoral/accountancy/).

for the degree of Doctor of Philosophy in Accountancy

For additional details and requirements refer to the department's program information online (https://giesbusiness.illinois.edu/graduate-hub/doctoral/accountancy/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Graduate study, at least 16 hours of which are in a supporting field (e.g., economics, finance, psychology).		24
A two-course introduction to mathematical statistics and probability theory		8
Accountancy core doctoral seminars:		16
ACCY 592	Introduction to Accounting Research	
ACCY 593	Special Research Problems (section B)	
ACCY 593	Special Research Problems (section C)	
ACCY 594	Doctoral Research Seminar (in area of specialization)	
ACCY 593	Special Research Problems (section SP1)	4
ACCY 593	Special Research Problems (section SP2)	4
Microeconomics at the graduate level (ECON 500), and another economics course at the graduate level from an approved listing		8
ACCY 599	Thesis Research	32
Total Hours		**96**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum Hours Required Within the Unit:	56
Minimum 500-level Hours Required Overall:	60
Students must present a research paper at the Accountancy Research Forum in the beginning of their third year.	
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the accountancy Ph.D. program.	
Masters Degree Required for Admission to PhD?	No
Qualifying Exam Required (Accountacy Core Examination)	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes

Dissertation Deposit Required	Yes
Minimum GPA:	3.0

for the degree of Doctor of Philosophy in Accountancy

1. **Learning Objective #1: Interdisciplinary knowledge, skills and attitudes**
   a. Students should possess sufficient knowledge of the economics and other behavioral science theories that are the roots of the accountancy discipline, knowledge of relevant accountancy research literatures, knowledge of the institutional features that characterize the production and utilization of accounting information, and knowledge of design and analysis methods necessary to conduct research in accountancy.
2. **Learning Objective #2: Functioning as a competent researcher**
   a. Students should be able to design and conduct a research study in an accountancy related area and to write and present a research paper based on this study to the accountancy faculty. Students should demonstrate accomplishment of this goal in a research study other than their dissertation.
3. **Learning Objective #3: Functioning as a competent educator at the undergraduate level**
   a. Students should possess the knowledge, skills and attitudes necessary to teach an undergraduate course based on a common course syllabus developed by a faculty team. These knowledge, skills and attitudes include planning and delivering a class lecture, planning and supervising class activities, and planning and performing assessments of student learning.

Advertising, MS

for the degree of Master of Science in Advertising

Advertising education was founded at the University of Illinois in 1946, when Charles H. Sandage, the "father of advertising", arrived on campus. His vision of educating the future of the industry was grounded in theoretical and foundational courses emphasizing the "why of advertising" - not just the "how."

Our courses provide the theoretical, research, and strategic decision-making skills essential for any career in advertising or advanced degree program. Our program allows for flexibility of specialized interest through electives within and outside the department.

Admission

Students are required to complete 36 hours towards the degree, including a professional project or thesis requirement. Full-time status requires 12 hours per semester, making it possible to complete the degree in three semesters. Admission is only granted for fall semester.

View all College of Media undergraduate (https://catalog.illinois.edu/schools/media/#undergraduatetext) and graduate (https://catalog.illinois.edu/schools/media/#graduatetext) degree programs.

for the degree of Master of Science in Advertising

1. Intellectual reasoning and knowledge
   a. MS graduates will develop an understanding of the “why of advertising” not just the “how”.
   b. MS graduates will demonstrate critical thinking skills, making the intellectual connection between quantitative and qualitative tools, theories and context to properly and effectively solve problems and make decisions related to the fast-changing media and advertising industries.
2. Creative inquiry and discovery
   a. MS graduates will have a strategic understanding of advertising and be able to take into account the relationships between this discipline and other related disciplines.
   b. MS graduates will assess the interdependent, fast-changing, and diverse world of media and advertising.
   c. MS graduates will demonstrate proficiency in analyzing and interpreting research data that is fundamental to innovative problem solving and strategic thinking.
3. Effective leadership and community engagement
   a. MS graduates will utilize interpersonal and group leadership skills (through taking classes with the same cohort every semester and group projects) to be highly effective advertising managers and leaders; demonstrating curiosity, visionary and strategic thinking, teamwork, and knowledge transfer skills.
4. Social awareness and cultural understanding
   a. MS graduates will demonstrate ethical reasoning skills, generate new knowledge, and strengthen professional development.
   b. MS graduates will demonstrate a strong work ethic to foster individual and professional integrity and mutual respect.
   c. MS graduates will be able to think critically and creatively and to apply theory to practice in an atmosphere of inquiry and dynamic exchange with faculty and their peers.
   d. MS graduates will have opportunities for learning outside the classroom.
5. Global consciousness
   a. MS graduates will have opportunity to learn about the fast-changing international and global advertising industry.
6. Professional development
   a. MS graduate students will have the opportunity at least twice per semester to meet with advertising professionals to discuss career goals (i.e., presentations, workshops and collaborations)

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Aerospace Engineering, MS

for the degree of Master of Science in Aerospace Engineering (on campus & non-thesis online)

The Department of Aerospace Engineering offers both MS with thesis (https://aerospace.illinois.edu/academics/graduate/ms-degree-program/ms-degree-thesis/) and MS non-thesis (https://ae.illinois.edu/academics/graduate/ms-degree-program/ms-degree-non-thesis-campus/) programs. Students in the MS with thesis program are required to have a research advisor and applicants are encouraged to contact department faculty (https://aerospace.illinois.edu/directory/faculty/) in their areas of interest to inquire about possible research and funding opportunities.

Interested students may specialize in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Graduate Teaching Experience

MS students are not required to hold a teaching assistantship.

Department Research

Research activities in the Department of Aerospace Engineering encompass a wide range of problem areas in aerospace engineering and related engineering disciplines as described on the department's research area website (https://aerospace.illinois.edu/research/).

There are several nationally-renowned interdisciplinary centers in The Grainger College of Engineering where Aerospace Engineering faculty members engage in research along with many other campus faculty members. A list of these, along with links to full descriptions, appears at the department's interdisciplinary centers website (https://aerospace.illinois.edu/research/interdisciplinary-centers/).

Members of the Aerospace Engineering Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department's research facilities website (https://aerospace.illinois.edu/research/research-facilities/).

for the degree of Master of Science in Aerospace Engineering (on campus & non-thesis online)

The MS in Aerospace Engineering is also offered online. The degree requirements are the same as for the on-campus MS non-thesis program and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

Online students should develop a course program plan in consultation with their advisor. Suggested program tracks (https://aerospace.illinois.edu/academics/graduate/suggested-program-tracks/) are provided for each of the three main technical divisions in the department:

1. Aerodynamics, Fluid Mechanics, Combustion and Propulsion (AFMCP);
2. Astrodynamics, Controls and Dynamical Systems (ACDS); and
3. Structural Mechanics and Materials (SMM).

For additional details and requirements, refer to the department's website (https://aerospace.illinois.edu/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

	A maximum of 4 hours of AE 597 (or other independent study) may be applied toward the elective course work requirement.
	Attendance at all Aerospace Engineering AE 590 seminars each semester while on campus.
Minimum GPA:	3.0
	Generally, students holding a research assistantship will not be allowed in the non-thesis option.
	A departmental petition is required to change from the thesis to the non-thesis option and vice-versa.

for the degree of Master of Science in Aerospace Engineering (on campus & non-thesis online)

By the end of the program, students will be able to:

1. Identify, formulate and solve advanced problems in aerospace engineering using advanced mathematical, computational, design and/or experimental skills.
2. Effectively communicate technical ideas through written reports, oral presentations with visual media, or through other media.
3. Understand ethical standards of conducting research, analyzing data and disseminating information within the engineering profession.
4. Understand deep contemporary and historical knowledge in one or more sub-disciplines associated with aerospace engineering in their research area. (M.S. Thesis students).
5. Conduct research, analyze results, report findings, and draw conclusions that result in original contributions to knowledge in aerospace engineering and/or related fields. (M.S. Thesis students).

for the degree of Master of Science in Aerospace Engineering (on campus & non-thesis online)

Admission Requirements

The Department of Aerospace Engineering accepts applications for admission to the MS with thesis and MS non-thesis graduate programs per the following deadlines:

Fall Admission

For MS with thesis admission and full consideration for funding opportunities: December 1
For MS non-thesis admission: July 1

Spring Admission

For MS with thesis admission and full consideration for funding opportunities: October 1
For MS non-thesis admission: December 1

Typically, the prerequisite for graduate study is the equivalent of the BS in Aerospace Engineering (https://aerospace.illinois.edu/academics/undergraduate/); however, graduates of curricula leading to degrees in other fields of engineering, the physical sciences, or mathematics may also be admitted to advanced study. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, having a GPA higher than the minimum is no guarantee of admission. Scores on the Graduate Record Examination (GRE) (http://ets.org/) general test are accepted, but not required, unless noted on the graduate programs website (https://aerospace.illinois.edu/admissions/graduate/admissions-requirements-and-process/). There are no minimum GRE score requirements.

Applicants to the Aerospace Engineering graduate program are asked to complete a supplemental form that will capture additional information about their specific interests. Applicants receive an email after submitting the online application which contains the link to the supplemental form. Applicants may select up to three areas of interest.

All applicants whose native language is not English are required to submit the results of the TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) as evidence of meeting the English proficiency requirements for full admission status (http://grad.illinois.edu/admissions/instructions/04c/). Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOEFL/IELTS requirement.

Applicants who are non-native speakers of English and who wish to be considered for teaching assistantships must provide evidence (https://grad.illinois.edu/admissions/taengprof.htm) of spoken English language proficiency. Specifically, they must score 24 or higher on the SPEAK portion of the TOEFL exam and 8 or higher on the speaking sub-section of the IELTS.

For full information on admission requirements and how to apply, see the department's graduate programs website (https://aerospace.illinois.edu/academics/graduate/).

Financial Aid

Students in the MS non-thesis program are not eligible for funding from the department. Financial aid for graduate students in thesis graduate programs is available in the form of fellowships (https://grad.illinois.edu/fellowships/about/), as well as teaching and research assistantships (https://grad.illinois.edu/assistantships/). Exceptionally qualified MS with thesis candidates will be considered for support upon application.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the TOEFL or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Admissions

Aerospace Engineering, Graduate Admissions & Requirements
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Aerospace Engineering, PhD

for the degree of Doctor of Philosophy in Aerospace Engineering

The Department of Aerospace Engineering offers a traditional doctoral program and a direct doctoral program (https://aerospace.illinois.edu/academics/graduate/phd-program/direct-phd/). Students in either program are required to have a research advisor and applicants are encouraged to contact department faculty (https://aerospace.illinois.edu/directory/faculty/) in their areas of interest to inquire about possible research and funding opportunities.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research

Research activities in the Department of Aerospace Engineering encompass a wide range of problem areas in aerospace engineering and related engineering disciplines as described on the department's research area website (https://aerospace.illinois.edu/research/).

There are several nationally-renowned interdisciplinary centers in The Grainger College of Engineering where Aerospace Engineering faculty members engage in research along with many other campus faculty members. A list of these, along with links to full descriptions, appears at the department's interdisciplinary centers website (https://aerospace.illinois.edu/research/interdisciplinary-centers/).

Members of the Aerospace Engineering Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department's research facilities website (https://aerospace.illinois.edu/research/research-facilities/).

Graduate Teaching Experience

PhD students are required to hold a 25% or higher teaching assistantship for at least one semester in order to meet the requirements for the Department of Aerospace Engineering doctoral program. Information about teaching assistantships can be found on the department's teaching assistantships website (https://aerospace.illinois.edu/academics/graduate/funding/teaching-assistantships/).

for the degree of Doctor of Philosophy in Aerospace Engineering

For additional details and requirements, refer to the department's website (http://aerospace.illinois.edu/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Entering with an approved M.S. Degree

Code	Title	Hours
AE 599	Thesis Research (min-max applied toward degree)	40
AE 590	Seminar (continuous registration through the 4th semester after the qualifying exam for 0 hours)	0
One advanced 500-level mathematics course from an approved list .		3-4
Elective courses -- chosen in consultation with advisor (subject to Other Requirements and Conditions below).		20-21
Total Hours		**64**

Other Requirements and Conditions

Requirement	Description
Minimum GPA:	3.0
A minimum of 8 hours of AE course credit overall at the 500-level, byond the master's degree.	
A minimum of 16 credit hours overall at the 500 level, byond the master's degree, including the 8 hours of 500-level AE courses.	
A maximum of 4 hours of AE 597 (or other independent study) may be applied toward the elective coursework requirement.	
A 25% or more teaching assistantship for at least one semester.	
Qualifying exam	Yes
Preliminary exam	Yes

Information listed in this catalog is current as of 02/2026

Final exam or dissertation defense	Yes
Dissertation deposit	Yes

Entering with an approved B.S. degree

Code	Title	Hours
AE 599	Thesis Research (min-max applied toward degree)	48
Coursework:		48
24 Hours of 500-level coursework, including 12 hours of 500-level AE coursework		
7-8 hours of Math (4 of the 7-8 taken must be at the 500-level and count toward the 24 hour requirement)		
20-21 hours of 400/500 elective AE coursework per advisor approval		
AE 590	Seminar (continuous registration through the 4th semester after the qualifying exam for 0 hours)	0
Total Hours		**96**

Other Requirements and Conditions

Requirement	Description
Minimum GPA:	3.0
A maximum of 4 hours of AE 597 (or other independent study) may be applied toward the elective course work requirement.	
A 25% or more teaching assistantship for at least one semester.	
Qualifying exam	Yes

Admission Requirements

The Department of Aerospace Engineering accepts applications for admission to both the traditional doctoral program and the direct doctoral program per the following deadlines:

Fall Admission

For admission and full consideration for funding opportunities: December 1

Spring Admission

For admission and full consideration for funding opportunities: October 1

Typically, the prerequisite for graduate study is the equivalent of the BS in Aerospace Engineering (https://aerospace.illinois.edu/academics/undergraduate/); however, graduates of curricula leading to degrees in other fields of engineering, the physical sciences, or mathematics may also

be admitted to advanced study. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, having a GPA higher than the minimum is no guarantee of admission. Scores on the Graduate Record Examination (GRE) (http://ets.org/) general test are are accepted, but not required, unless noted on the graduate programs website (https://aerospace.illinois.edu/admissions/graduate/admissions-requirements-and-process/). There are no GRE minimum score requirements.

Applicants to the Aerospace Engineering graduate program are asked to complete a supplemental form that will capture additional information about their specific interests. Applicants receive an email after submitting the online application which contains the link to the supplemental form. Applicants may select up to three areas of interest.

All applicants whose native language is not English are required to submit the results of the TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) as evidence of meeting the English proficiency requirements for full admission status (http://grad.illinois.edu/admissions/instructions/04c/). Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOEFL/IELTS requirement.

Applicants who are non-native speakers of English and who wish to be considered for teaching assistantships must provide evidence (https://grad.illinois.edu/admissions/taengprof.htm) of spoken English language proficiency. Specifically, they must score 24 or higher on the SPEAK portion of the TOEFL exam and 8 or higher on the speaking sub-section of the IELTS.

For full information on admission requirements and how to apply, see the department's graduate programs website (https://aerospace.illinois.edu/academics/graduate/).

Financial Aid

Financial aid for graduate students in thesis graduate programs is available in the form of fellowships (https://grad.illinois.edu/fellowships/about/), as well as teaching and research assistantships (https://grad.illinois.edu/assistantships/). Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend. Exceptionally qualified candidates are considered for fellowship financial support upon application.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the TOEFL or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

African Studies, MA

for the Master of Arts in African Studies

The Center for African Studies administers a two-year program of area studies courses and intensive African language instruction leading to a Master of Arts degree designed to give students an interdisciplinary perspective on the study of Africa. The program provides both language and area training for three constituencies of students: those seeking to match area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those for whom the degree would stand on its own. For more information about the Center's graduate programs, please visit our website (https://afrst.illinois.edu/academics/graduate-programs/).

Admissions

The Center for African Studies admits students in the fall term only. Applicants to the Masters degree in African Studies should hold at least a Bachelor's degree from an accredited college or university in the United States or from a recognized institution of higher education abroad. All graduate college admission requirements also apply. The Center does not require the Graduate Record Examination (GRE) scores, but it is highly recommended for students applying for the Foreign Language and Area Studies (FLAS) fellowship. Successful applicants should have a grade point average of at least 3.0 (4.0=A) calculated for the last 60 semester hours of undergraduate course work. International applicants or applicants whose native language is not English must have a minimum TOEFL score of 550 on the paper-based test (PBT) -- 213 on the computer-based test (CBT) or 79 on the internet-based test (IBT). For information about the application process and to access both domestic and international student applications, start here (https://grad.illinois.edu/admissions/apply/).

For more information about the Center's admission requirements and procedures, and deadlines please visit our website (https://afrst.illinois.edu/academics/graduate-programs/how-apply/).

Students interested in the graduate minor in African Studies must be in good standing in a graduate program, have permission from the major program, and demonstrate an interest in African Studies. For more information, contact Dr. Maimouna Barro (barro@illinois.edu).

Faculty Research

The Center for African Studies' has both core and affiliate faculty represented in over 34 units across campus encompassing various disciplines in the humanities and social sciences, as well as in professional schools. The faculty is the backbone of the Center and constitutes the most critical element of the graduate experience. They excel in teaching at all levels and have a strong commitment to innovative research. Both Center faculty and teaching assistants have received numerous college and campus teaching awards. For more information about the Center faculty, please visit our website (https://afrst.illinois.edu/directory/faculty/).

Facilities and Resources

Established since 1970, the Center for African Studies is one the largest and most dynamic African National resource Centers in the country. The Center promotes excellence in research and teaching on Africa in all disciplines. The Center also exists to increase and disseminate knowledge about Africa to the larger community through various outreach activities to colleges, schools, community groups and businesses. At a time when the Illinois is expanding its international dimension, the Center for African Studies is dedicated to promoting a vibrant African Studies program and to fostering an understanding of Africa and African peoples through research, teaching and various Africa-related programs and events. The Center organizes a wide range of activities including conferences, lectures, film festivals, art exhibits, language institutes, workshops, and symposia. In addition, the Center regularly hosts visitors from the United States and abroad, namely Africa, and is strongly committed to developing linkages with individuals and institutions based in the African continent.

In 2012, the University of Illinois Library reorganized its international and area studies units into one large International and Area Studies Library (IASL) in an excellent renovated space. This new unit includes the African Studies library and other world areas library collections. The University Library has supported a full-time African Studies Bibliographer since 1969, and has provided the necessary acquisitions, cataloging, and processing staff since then.

The African Studies collection include over 354,000 items in all formats, with more than 300,000 in printed volumes and in English and French and a smaller number in Portuguese, German and other European languages. The Library adds about 900 items written in African languages each year. About 16,000 volumes written in Arabic deal with topics related to Africa, and more than 7000 are in Amharic, Bamana, Hausa, Lingala, Swahili, Tigrinya, Wolof, and Zulu. There are roughly 2,900 serials and 46,000 maps, of which 2849 have been digitized, as well as 12,000 microforms, and more than 800 audio-visual materials. The collection covers all African countries and includes materials in about 80 African languages. Priority countries for collecting include: Burkina Faso, Côte d'Ivoire, Democratic Republic of the Congo, Egypt, Eritrea, Ethiopia, Gambia, Kenya, Morocco, Mozambique, Nigeria, Senegal, South Sudan, South Africa, Tanzania, Tunisia, Zambia, and Zimbabwe. The collection is interdisciplinary and concentrated mainly in the humanities, social sciences, human rights and law, and agriculture. Our large collection of primary source materials, covering all of Africa, includes 120,000 pages of Arabic manuscripts and thousands of United States, United Kingdom, and African government documents. The Africana film

collection is one of the finest in the US, and our African film database provides access to more than 800 films from or about Africa. UI's rich museum collections include the Krannert Art Museum and the Spurlock Museum and hold over 10,000 African artifacts. The museums present interesting exhibits and host African performances. Teacher kits on various African topics are also provided by the Krannert Art Museum.

The African studies bibliographer runs the Africana library and teaches IS 530, one of the Center's core courses and plays a key role in the Center's graduate program. For further information about the Africana library, please visit the library website (http://www.library.illinois.edu/ias/africana/).

Financial Aid

Students must apply and be admitted according to the set deadlines to be considered for assistantships and fellowships. The Center evaluates and ranks entering students on the basis of academic promise. This ranking becomes part of the basis for financial aid decisions. Funding is generally awarded to cover the fall and spring semesters and occasionally on a semester-by-semester basis. Multiple years of funding cannot be guaranteed, but the Center considers it a priority to fund students and see them through the program. Continued funding is based on academic (in the case of Foreign Language and Area Studies Fellowships) and job performance (in the case of assistantships), the availability of positions, and the Center's budget in a given year or US Department of Education Title VI funding cycle.

Students are encouraged to check the Graduate College's website (http://www.grad.illinois.edu/) for funding opportunities--whether they are fellowships or assistantships.

For information about available awards and application deadlines, visit this website (https://afrst.illinois.edu/academics/fellowship-opportunities/).

for the Master of Arts in African Studies

For additional details and requirements refer to the department's Graduate Programs (https://afrst.illinois.edu/academics/graduate-programs/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
IS 451	Bibliography of Africa	4
AFST 515	Practicum in African Studies (recommended)	2
AFST 522	Development of African Studies	4
Elective area studies courses, drawn from at least three different academic units		12-18
Independent Study (Optional; 4 max applied toward degree)		0-4
Language Requirement: Must study or demonstrate proficiency in a language indigenous to Africa at the advanced (third-year) level, but these hours cannot count toward the degree requirements.		0
AFST 599	Thesis Research (8 hours max applied toward degree)	8
Total Hours		**34**

Other Requirements

Requirement
Other requirements may overlap
Minimum 500-level Hours Required Overall: 16
Minimum GPA: 3.25

Non-Thesis Option

Code	Title	Hours
IS 451	Bibliography of Africa	4
AFST 515	Practicum in African Studies (recommended)	0 or 2
AFST 522	Development of African Studies	4
Elective area studies courses, drawn from at least three different academic units		20-26
Independent Study (Optional; 4 max applied toward degree)		0-4
Language Requirement: Must study or demonstrate proficiency in a language indigenous to Africa at the advanced (third-year) level, but these hours cannot count toward the degree requirements.		0

Requirement
Other requirements may overlap
Minimum 500-level Hours Required Overall: 16
Minimum GPA: 3.25

for the Master of Arts in African Studies

1. Strong interdisciplinary knowledge of African area studies, of Africa and its cultures and societies in a broader international and global context
   a. Students should have a good understanding of the various historical, cultural, social, economic and political conditions that shaped the development of the continent
   b. Students should be able to place their knowledge of Africa and African studies in a broader world context and from a multidisciplinary perspective.
2. Proficiency in African language and a solid knowledge of research methodologies
   a. Students should develop appropriate expertise in a region or country in African, acquire proficiency in a language of a particular region/country and equip themselves with a good understanding of the appropriate research tools to study that region/country.
3. Although international experience is not a requirement for the MA program, experience through study abroad is an integral part of the graduate experience, especially when fellowship opportunities for African language study do exist. Students should demonstrate commitment to conduct fieldwork whenever opportunities for study abroad are available.
4. Students should be able to demonstrate strong research skills. Completion of an MA thesis by the end of the second year is a good indication that they have acquired good research skills. However, participation in conferences will also be a good assessment of students' ability to conduct research.
5. Students should be able to make a practical contribution to the center and to African Studies through participation in internships. The Center for African Studies has strong partnerships with organizations and institutions of higher education based on the African continent and can help students identify international internship programs. In case a student is not able to do an internship by the time they graduate, an alternative option would be for them to complete our practicum course (AFST 515). Students enrolled in this course will complete independent projects and will be able to demonstrate their knowledge and practice their skills in real-world settings.

Agricultural & Applied Economics, MAAE

for the Master of Agricultural and Applied Economics in Agricultural and Applied Economics

The MAAE degree is a course-based (non-thesis) program that provides students with training in economic theory along with the quantitative skills needed to pursue careers as analysts and managers in industry, government, and related organizations. Available course offerings cover a broad range of potential specialization areas within agricultural and applied economics to suit student interests. Course plans must be approved by the student's academic advisor and the Director of Graduate Studies. In addition to coursework, the MAAE program includes a required internship component.

Admission

Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English must have a Test of English as a Foreign Language (TOEFL iBT) score of at least 88 (230 computer-based and 570 paper-based) or an International English Language Testing System (IELTS) academic examination overall score of at least 6.5 with a minimum sub-section score of 6 in each of the four modules (speaking, listening, writing, and reading). Graduate Record Examination (GRE) general test scores are suggested, but not required for MAAE applicants. Applicants should be able to demonstrate a strong background in mathematics, microeconomics, and statistics.

Financial Aid

MAAE students are not eligible for graduate assistantships. Limited scholarship funds may be available for outstanding applicants.

for the Master of Agricultural and Applied Economics in Agricultural and Applied Economics

Students must earn a 3.0 (A = 4.0) GPA for a minimum of 32 graduate hours of credit.

Code	Title	Hours
Microeconomic Theory		
ACE 500	Applied Economic Theory	4
Quantitative Methods		
ACE 562	Applied Regression Models I	2
ACE 564	Applied Regression Models II	2
At least 4 additional hours in approved quantitative methods course(s)		4
Field Specialization		
12 hours of approved graduate field courses		12
(Must include at least 8 hours in ACE, and at least 4 hours at the 500 level)		
Professional/Research Internship		
Select one of the following:		2
ACE 591	Independent Study	
ACE 592	Special Topics	
Graduate Electives		**6**
Total		**32**

Other Requirements

Requirement	Description
Other Requirements may overlap	
A minimum of 20 hours of credit within the unit.	
A minimum of 16 hours at the 500-level overall.	
Minimum program GPA	3.0

for the Master of Agricultural and Applied Economics in Agricultural and Applied Economics

1. Develop a knowledge base in, and demonstrate an understanding of how to use, microeconomic concepts to set up and analyze economic problems.
2. Develop mastery of quantitative methods which can be used to analyze and address economic problems.
3. Understand features of agriculture and natural resources (e.g., inherent risk, institutions, unique government policies, and cultural importance of food) that make them unique for applications of economic principles and methods.
4. Gain experience in applying skills developed in the program in a real-world professional setting.
5. Practice highest levels of professional conduct (e.g., in professional activities take responsibility, be accountable, show integrity, have strong ethics, and respect diversity).

Agricultural & Applied Economics, MS

for the Master of Science in Agricultural and Applied Economics

Program Overview

The ACE M.S. program offers considerable flexibility. Students using the degree as a foundation for a doctorate emphasize economic theory and analytical research tools. Students seeking the terminal master's degree focus their study on the concepts and analytical techniques used by analysts and managers in industries, governments, and other organizations.

Admission

Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English are required to follow the Graduate College's Minimum Requirements for Admission. Graduate Record Examination (GRE) general test scores are required for all M.S. program applicants. Applicants to the Ph.D. program are required to provide a sample of their academic writing; a writing sample is optional for M.S. applicants. Students having an inadequate background in theory or quantitative methods will be asked to take additional coursework to prepare for graduate study. Students may commence study in either semester, but initial enrollment in fall semester is preferable.

Student Thesis and Dissertation Research

Our students' research uses economics to address important social and economic challenges. Thesis and dissertation topics include designing policies for environmental protection and resource management, evaluating international efforts to reduce poverty and hunger, and enhancing the performance of commodity and speculative markets.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is strongly recommended for those intending to pursue an academic career.

Financial Aid

Graduate fellowships, assistantships, and tuition and fee waivers are awarded on a competitive basis.

Fellowships. The department offers fellowships from internal resources and by nominating students for college and campus fellowships. These fellowships, often combined with assistantship support, provide monetary stipends and, in most cases, exemptions from tuition and some student fees. Recipients must register for the equivalent of at least 12 hours of graduate credit in each semester and four hours in an eight-week summer session. Fellowship holders are encouraged to involve themselves with research and teaching in the department.

Assistantships. Research and teaching assistantships provide an opportunity for graduate students to work with faculty. Most research assistantships are funded by grants and contracts involving the analysis of contemporary issues. Most assistantships carry waivers of tuition and some fees.

Tuition and Fee Waivers. Waivers may be awarded. In most cases they are awarded to students with fellowship support from certain external programs.

for the Master of Science in Agricultural and Applied Economics

Students must earn a 3.0 (A = 4.0) GPA for a minimum of 32 graduate hours of credit. M.S. students entering the ACE graduate program will be admitted only to the Thesis Option. For the Thesis Option, a thesis is prepared under the supervision of a faculty advisory committee. The thesis is defended in a formal oral examination, which usually coincides with an open departmental seminar, administered by the thesis committee. The Non-Thesis Option requires advanced coursework in lieu of a thesis. The Non-Thesis Option is available only to students already enrolled in the Thesis Option of the ACE M.S. program or in the ACE Ph.D. program. Application for admission to the Non-Thesis Option is by petition to the Department after at least two semesters of graduate coursework have been completed.

For additional details and requirements refer to the department's Graduate Program information for the Master's degree (https://ace.illinois.edu/academics/graduate-degrees/master-science-agricultural-and-applied-economics/) and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

Thesis Option

Code	Title	Hours
ACE 500	Applied Economic Theory	4
6 hours in quantitative and research methods, selected in consultation with an advisor (these do not count toward the 500 level course requirement)		6
Electives		14
ACE 599	Thesis Research	8
Total Hours		**32**

Other requirements

Requirement
Other requirements may overlap
Minimum Hours Required Within the Unit: 8 at the 500 level, not including ACE 599 or independent study
Minimum 500-level Hours Required Overall: 12
Minimum GPA: 3.0

Non-Thesis Option

Code	Title	Hours
24 hours selected from the ACE doctoral core sequence, including at least 12 hours in applied economic theory and 8 hours in quantitative methods		24
Electives		8
Total Hours		**32**

Other Requirements

Requirement
Other requirements may overlap
Minimum Hours Required Within the Unit: 20 at the 500 level, not including ACE 599 or independent study
Minimum 500-level Hours Required Overall: 20
Minimum GPA: 3.0

for the Master of Science in Agricultural and Applied Economics

1. Develop a knowledge base in, and demonstrate an understanding of how to use, microeconomic concepts to set up and analyze economic problems.
2. Identify, summarize, interpret, and critique relevant scholarly literature.
3. Demonstrate the ability to identify important research problems and formulate well-defined research objectives (e.g., testable hypotheses).
4. Identify and use appropriate quantitative methods to accomplish research objectives.
5. Effectively use written and verbal communication skills to present economic concepts and analyses.
6. Understand features of agriculture and natural resources (e.g., inherent risk, institutions, unique government policies, and cultural importance of food) that make them unique for applications of economic principles.
7. Practice highest levels of professional conduct (e.g., in professional activities take responsibility, be accountable, show integrity, have strong ethics, and respect diversity).

Agricultural & Applied Economics, PhD

for the Doctor of Philosophy in Agricultural and Applied Economics

PhD Program Overview

The Doctor of Philosophy is a research-oriented degree that prepares successful candidates for positions in higher education, governmental agencies, nongovernmental organizations, and the research and management functions of the private sector. In consultation with a faculty advisor, students develop an area of specialization to fit their career aspirations. Typical areas of specialization include:

- agricultural finance
- environmental and natural resource economics
- family and consumer economics
- farm and agribusiness management
- international and policy economics
- price analysis and agricultural marketing
- regional economics and public policy

Students pursue coursework in theory, quantitative methods, and their area of specialization; pass a written core exam, a second-year research paper requirement, an oral preliminary examination which includes the formal proposal for dissertation research; and complete and defend a dissertation. The core courses cover the theory and quantitative methods upon which advanced research, teaching, and service in ACE are based. The specialty courses build on the knowledge gained in the core courses and provide an understanding of the application of economic theory and the tools of economic analysis. Students are encouraged to complete substantial coursework in other departments, such as economics, finance, and business administration.

Admission

Graduate College requirements apply, including a 3.0 (A = 4.0) GPA for the last two years of undergraduate coursework and any graduate work completed. International applicants whose native language is not English are required to follow the Graduate College's Minimum Requirements for Admission. Graduate Record Examination (GRE) general test scores are required for all applicants. Applicants to the Ph.D. program are required to provide a sample of their academic writing. Students having an inadequate background in theory or quantitative methods will be asked to take additional coursework to prepare for graduate study. Students may commence study in either semester, but initial enrollment in fall semester is preferable. An applicant with a master's degree in an appropriate discipline will be considered for the Ph.D. degree. Applicants with a baccalaureate degree can apply directly to the PhD program, but will need to demonstrate sufficient preparation to be admitted.

Student Thesis and Dissertation Research

Our students' research uses economics to address important social and economic challenges. Thesis and dissertation topics include designing policies for environmental protection and resource management, evaluating international efforts to reduce poverty and hunger, and enhancing the performance of commodity and speculative markets.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is strongly recommended for those intending to pursue an academic career.

Financial Aid

Graduate fellowships, assistantships, and tuition and fee waivers are awarded on a competitive basis.

Fellowships. The department offers fellowships from internal resources and by nominating students for college and campus fellowships. These fellowships, often combined with assistantship support, provide monetary stipends and, in most cases, exemptions from tuition and some student fees. Recipients must register for the equivalent of at least 12 hours of graduate credit in each semester and four hours in an eight-week summer session. Fellowship holders are encouraged to involve themselves with research and teaching in the department.

Assistantships. Research and teaching assistantships provide an opportunity for graduate students to work with faculty. Most research assistantships are funded by grants and contracts involving the analysis of contemporary issues. Most assistantships carry waivers of tuition and some fees.

Tuition and Fee Waivers. Waivers may be awarded. In most cases they are awarded to students with fellowship support from certain external programs.

Agricultural & Biological Engineering, MS

for the degree of Master of Science in Agricultural & Biological Engineering

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Admission Requirements

Admission requirements include completion of an undergraduate program equivalent to the Agricultural and Biological Engineering (ABE) curriculum with at least a 3.0 grade point average (A = 4.0) for the last two years of undergraduate course work. Applicants must submit Graduate Record Examination (GRE) scores.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org/) score of 88 (iBT), 230 (CBT) or 570 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org/) academic exam scores of 6.5 overall. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 7.0 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (http://linguistics.illinois.edu/students/esl/guidelines/) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Financial Aid

Fellowships, supported by University, College of Agricultural, Consumer and Environmental Sciences, and College of Engineering funds, are available on a competitive basis. A limited number of assistantships, providing both teaching and research experience, are often available on a half-time basis.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research

Current research interests of the faculty include off-road equipment engineering (robotics and machinery automation, remote sensing and precision agriculture, machinery management systems, pesticide application technology, engines and biofuels); soil and water resources (hydrology, erosion and sediment transport, water management, wetlands, and water quality); bioenvironmental engineering (building environment and energy conservation, air quality, renewable energy, biomass to bioenergy conversion, structural analysis and facility design, building materials evaluation, environmental control and ergonomic design for plant, animal, and human housing systems and facilities); food and bioprocess engineering (engineering properties of foods, physical properties of biological products, grain drying, grain quality evaluation, dry-grind corn processing, wet and dry milling, modified bioprocesses for improved co-products, fuel and chemicals, fermentation, and transport phenomenon in biological materials); or electronic and electrical systems (biosensors and controls, energy systems, machine vision, near-infrared spectroscopy applications, bionanotechnology, microfabricated devices, bioconjugation techniques, transcriptional control, modeling life support systems, and multiscale biological processes). For more details, visit the department's research website. (https://abe.illinois.edu/research/areas/)

for the degree of Master of Science in Agricultural & Biological Engineering

For additional details and requirements refer to the department's Graduate Handbook (https://abe.illinois.edu/academics/graduate-degrees/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Other Requirements and Conditions may overlap	
	A maximum of 4 hours of ABE 597 (or other independent study) may be applied toward the elective course work requirement.
	A minimum of 12 500-level credit hours applied toward the degree.
	The non-thesis option is only allowed with departmental approval at or before initiation of graduate study, and a final report is required.
Minimum GPA:	3.0

for the degree of Master of Science in Agricultural & Biological Engineering

---

Student learning outcomes are based on educational outcomes suggested by the Accreditation Board for Engineering and Technology (ABET) and the objectives of the program:

1. An ability to apply knowledge of mathematics, science, and engineering;
2. An ability to design and conduct experiments, as well as to analyze and interpret data;
3. An ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability;
4. An ability to function in multidisciplinary teams;
5. An ability to identify, formulate, and solve engineering problems;
6. An understanding of professional and ethical responsibility;
7. An ability to communicate effectively;
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. A recognition of the need for and an ability to engage in life-long learning;
10. A knowledge of contemporary issues;
11. An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;

12. Conduct independent research with expertise in research design, methods, and analysis;
13. Function effectively in leadership roles in their professional careers and activities in professional societies.

Agricultural & Biological Engineering, PhD

for the degree of Doctor of Philosophy in Agricultural & Biological Engineering

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Admission Requirements

Admission to the PhD program is limited to individuals who have demonstrated exceptional ability through outstanding performance in obtaining an MS degree and/or through a high degree of technical and professional accomplishment. Candidates must also satisfy entrance requirements for the MS degree program.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org/) score of 88 (iBT), 230 (CBT) or 570 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org/) academic exam scores of 6.5 overall. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 7.0 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (https://linguistics.illinois.edu/testing/english-placement-test-ept/) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Financial Aid

Fellowships, supported by University, College of Agricultural, Consumer and Environmental Sciences, and The Grainger College of Engineering funds, are available on a competitive basis. A limited number of assistantships, providing both teaching and research experience, are often available on a half-time basis. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all PhD candidates in this program. For details of expectations, see the department's Graduate Handbook (https://abe.illinois.edu/academics/graduate-degrees/).

Department Research

Current research interests of the faculty include off-road equipment engineering (robotics and machinery automation, remote sensing and precision agriculture, machinery management systems, pesticide application technology, engines and biofuels); soil and water resources (hydrology, erosion and sediment transport, water management, wetlands, and water quality); bioenvironmental engineering (building environment and energy conservation, air quality, renewable energy, biomass to bioenergy conversion, structural analysis and facility design, building materials evaluation, environmental control and ergonomic design for plant, animal, and human housing systems and facilities); food and bioprocess engineering (engineering properties of foods, physical properties of biological products, grain drying, grain quality evaluation, dry-grind corn processing, wet and dry milling, modified bioprocesses for improved co-products, fuel and chemicals, fermentation, and transport phenomenon in biological materials); or electronic and electrical systems (biosensors and controls, energy systems, machine vision, near-infrared spectroscopy applications, bionanotechnology, microfabricated devices, bioconjugation techniques, transcriptional control, modeling life support systems, and multiscale biological processes). For more details, visit the department's research website. (https://abe.illinois.edu/research/areas/)

for the degree of Doctor of Philosophy in Agricultural & Biological Engineering

Agricultural Leadership, Education, & Communications, MS

for the degree of Master of Science in Agricultural Leadership, Education, & Communications (on campus & online)

The M.S. in Agricultural Leadership, Education, and Communications is a professional degree for training community and organizational developers, professional trainers, Extension agents, communications officers, educational assessment professionals, customer service specialists, and agriculture classroom teachers to address issues as they pertain to teaching and learning in and about food, agriculture, natural resources, and the environment. Students are typically interested in either furthering their career in Extension, agricultural organizations and community agencies, and agricultural classrooms in secondary education. We also provide a degree option for students interested in gaining licensure for teaching agriculture in Illinois public schools for grades 5-12.

Agricultural Leadership, Education, and Communications can be pursued as an online degree. Please refer to our website (https://alec.illinois.edu/graduate/online-ms/) for more information.

Admission

We are looking for highly motivated students with strong academic records. Students with backgrounds in agriculture, education, behavioral or social sciences are especially encouraged to apply. The minimum undergraduate grade-point average for admission is 3.0 (A = 4.0). Applicants for the online/off-campus program are not required to take the Graduate Record Examination (GRE). International applicants from non-English-speaking countries must have official TOEFL scores of at least 575 (written version) or 233 (computer-based version) to be eligible for admission. To receive full consideration for admission (and financial aid opportunities if you are applying for the full-time, on-campus program), please apply by February 15 for possible admission the following fall semester. We utilize a rolling admission process for people applying to the part-time online MS Degree.

Previous transcripts of candidates admitted for teacher licensure will be audited for completion of required technical courses. Coursework to address any deficiencies must be completed before entitlement for licensure.

Financial Aid

We are committed to funding as many of full-time on-campus students who are making timely progress as possible. The duration and amount of our commitment varies. Funding may include fellowships, research assistantships, and/or teaching assistantships. These opportunities typically include stipends and tuition waivers. In some cases, fees are also waived. All applicants are automatically considered for all department funding opportunities; there is no separate application process. Federal and state financial aid is completely separate from the support provided by our department. For information regarding federal and state financial aid, please refer to the Office of Student Financial Aid (https://osfa.illinois.edu/).

for the degree of Master of Science in Agricultural Leadership, Education, & Communications (on campus & online)

This degree program lists three options: A Research option (that includes completing a Master's Thesis), a Practice Option, and Teaching Licensure Option (State of Illinois licensure course requirements may differ from what is listed below).

Research Option

Code	Title	Hours
Required		**24**
ALEC 500	Foundations of Agricultural Leadership, Education and Communications	3
ALEC 510	Program Planning, Implementation and Evaluation	3
ALEC 505	Science and Art of Teaching and Learning	3
AGCM 495	Communicating Science	3
HDFS 590	Advanced Research Methods	4
HDFS 591	Qualitative Methods	4
or HDFS 594	Intermed Statistical Analysis	
ALEC 599	Thesis Research	4
Electives: 8 credit hours. Any graduate-level coursework that can be applied to and relevant for professional goals.		**8**
Total Hours		**32**

Practice Option

Code	Title	Hours
Required		**15**
ALEC 500	Foundations of Agricultural Leadership, Education and Communications	3
ALEC 510	Program Planning, Implementation and Evaluation	3
ALEC 505	Science and Art of Teaching and Learning	3
ALEC 545	Research Methods and Design	3
AGCM 495	Communicating Science	3
Electives: 17 total credit hours. 5 or more credit hours of ALEC, LEAD, AGED, or AGCM coursework not listed above. Up to 12 credit hours from outside the ALEC Program that can be applied to and relevant for professional goals.		**17**
Total Hours		**32**

Teacher Licensure Option

Code	Title	Hours
ALEC 500	Foundations of Agricultural Leadership, Education and Communications	3
ALEC 510	Program Planning, Implementation and Evaluation	3
ALEC 505	Science and Art of Teaching and Learning	3
ALEC 545	Research Methods and Design	3
AGED 410	Grad Early Field Experience	2
AGED 510	Education Program Management	4
AGED 511	Grad Professional Dev in Ag Ed	1
CI 473	Disciplinary Literacy	3
SPED 517	Disability Issues in Special Education	4
EDPR 442	Educational Practice in Secondary Education	5
ELECTIVES: 1 credit hour. Any graduate-level coursework that can be applied to and relevant for professional goals.		1
Total Hours		32

Other Requirements

Requirement	Description
Other requirements and conditions may overlap	
Minimum Hours Required within the Unit	5
Minimum 500-level Hours Required overall:	12
Minimum GPA	3.0

for the degree of Master of Science in Agricultural Leadership, Education, & Communications (on campus & online)

The learning outcomes for the M.S. Degree are:

1. Recognize, characterize, and apply theories of teaching and learning across a variety of formal and non-formal educational contexts.
2. Apply leadership and strategic communications strategies in professional and community settings.
3. Employ a cycle of planning, implementation, assessment, evaluation, and analysis in training and programming initiatives.
4. Evaluate scholarship within the contexts of food, agriculture, natural resources, and environmental sciences.
5. Support the creation of high-quality scholarship in the fields of food, agriculture, natural resources, or environmental sciences.

Animal Sciences, MANSC

for the Master of Animal Sciences in Animal Sciences (on campus & online)

Research, Teaching, and Extension Areas

The Department of Animal Sciences offers graduate work leading to the Master of Animal Sciences. Fields of specialization include:

- animal breeding, genetics, and bioinformatics
- animal behavior
- nutrition
- systems of animal management & production, precision management
- physiology of lactation and reproduction
- environmental physiology
- meat science & muscle biology
- immunobiology
- microbiology

Beef and dairy cattle, horses, poultry, sheep, swine, and companion and laboratory animals are available for study. Experience in teaching, extension, or outreach is encouraged as part of the academic work.

Admission

Candidates for admission to the MANSC program must have a bachelor's degree from an accredited institution equivalent to those from the University of Illinois Urbana-Champaign. A grade point average of 3.0 or higher (A = 4.0) for the last two years of undergraduate work and for any graduate study is required for admission. Candidates for admission that have a GPA between 2.75 and 2.99 can request special consideration of the application materials submitted. Graduate Record Examination (GRE) scores are not required for admission. English proficiency requirements for admission follow Graduate College requirements. Application materials include baccalaureate degree transcripts, a resume, a personal statement, and three letters of recommendation. Admission is possible for fall (mid-August), spring (mid-January), and summer (mid-June) semesters. Candidates for admission are encouraged to submit the complete application package no later than 2 months before the start of the desired admission semester.

for the Master of Animal Sciences in Animal Sciences (on campus & online)

In consultation with their Animal Sciences faculty advisor, students will select courses that support the individual research studies project and strengthen career opportunities.

The individual research studies project or internship experience and a written report will fulfill the ANSC 593 (Research Studies in Animal Sciences) capstone project requirement. The project or internship and the written product will be supervised by the Animal Sciences faculty mentor and provide evidence that the student can understand and apply the scientific method, interpret scientific information; and effectively communicate scientific information in a field of animal sciences.

For additional details and requirements refer to the department's Graduate Handbook (https://ansc.illinois.edu/academics/graduate-degrees/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Required courses:		
ANSC 590	Animal Sciences Seminar	2
or ANSC 591	Grad Bioinformatics Seminar	
ANSC 593	Res Studies in Animal Sciences	8

for the Master of Animal Sciences in Animal Sciences (on campus & online)

The recipient of a Master of Animal Sciences in Animal Sciences will demonstrate:

1. Graduate-level understanding of essential concepts and approaches in the area of animal science specialization. The essential concepts will enable the graduate to strengthen the application to a D.V.M, M.Sc., or Ph.D. program, advance throughout the employment ranks, or secure a mid-management position in industry or government agencies.
2. Capacity to execute a supervised independent studies project including a) understanding of the scientific method, research objectives, materials and methods, basic data analysis, and appreciation of the findings; and b) effectively assist on the implementation of essential research activities.
3. Ability to effectively communicate essential disciplinary knowledge and independent studies findings in written format.
4. Aptitude to advocate for interdisciplinary research and education efforts to improve food security, food safety, animal and human health and wellbeing or environmental stewardship.

for the Doctor of Philosophy in Animal Sciences

The recipient of a Doctor of Philosophy in Animal Sciences will demonstrate:

1. Graduate-level understanding of advanced concepts and approaches in the area of animal science specialization. The advanced concepts will enable the graduate to secure a leadership position in industry or government agencies or a professor position in academia and to advance throughout the professional ranks.
2. Capacity to independently execute dissertation research including:
   a. ability to formulate hypotheses and research objectives, to use appropriate materials, methods, and advanced data analysis approaches, and to evaluate the results; and
   b. leadership on the implementation of the scientific method and research activities, interpretation of findings, and identification of implications.
3. Ability to effectively communicate advanced disciplinary knowledge and dissertation research findings in oral and written formats.
4. Aptitude to lead interdisciplinary research and education efforts to improve food security, food safety, animal and human health and well-being or environmental stewardship.

for the Master of Arts in Anthropology

1. **Skills for independent research**. Graduate students will acquire professional-level research and reasoning skills to identify important research problems and to subsequently design, execute, and clearly report the results of independent research programs.
2. **Subfield-specific expertise**. Our program encompasses the four fields of anthropology, while our core curriculum grounds the separate graduate trajectories. Graduate students should develop an in-depth understanding of the differences and similarities of people through a combination of technical skills, language abilities, and theoretical approaches relevant to their chosen expertise.
3. **Contributions to discipline.** Graduate students will develop their intellectual skills to contribute to the discipline through service, research, teaching, and publishing.
4. **Ethical and professional standards.** Graduate students will abide by accepted ethical standards of professional anthropological conduct.

Anthropology, PhD

for the Doctor of Philosophy in Anthropology

The Department of Anthropology offers graduate programs leading to the Master of Arts and the Doctor of Philosophy degrees. We generally do not accept students for a terminal M.A.

Admission

Students without the equivalent of the department's undergraduate concentration may be admitted to either degree program, but they may be required to make up any deficiencies in their anthropological backgrounds. In addition to the Graduate College admission requirements, students whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) (http://www.grad.illinois.edu/admissions/instructions/04c/), with minimum scores set by the Graduate College. Students are admitted for the fall term only.

Students wishing to pursue the minor in Museum Studies must be in good standing in the graduate program of an academic department, and must apply for acceptance into the minor. Admission to the minor is contingent upon approval of the student's home department and the Museum Studies Steering Committee. Students may apply to the minor during the first week of the fall and spring semesters in any academic year, and should contact the Museum Studies Program Coordinator for application instructions or more information.

Application to the PhD Program Guidance

Introduction

The Illinois Department of Anthropology welcomes application to their PhD program for fall 2023. We welcome applicants from all subdisciplines and well as students whose research interests cross sub-disciplinary boundaries and those who are well-matched to the strengths of our faculty. We especially encourage students from underrepresented minority groups to apply as part of our diversity, equity, and inclusion efforts.

This application process aims to give you the opportunity to show us your best scholarly selves. Please read the information below for guidance on both required and optional materials, designed to give you ways of sharing your thinking that play to your strengths.

A few quick tips to increase your chances for success, in this program and many others:

- Contact potential advisors in advance of submitting your application. A short conversation can reveal whether you have shared interests and mentoring styles. This also saves you work if your preferred faculty is not taking students this year.
- Consider applying to programs where there are at least two faculty with whom you would be excited to work. We often encourage co-advisors because we find that distributing mentoring leads to more varied and constructive advice for our students.
- See if you can talk to graduate students in the program, as well as in the research group or lab (if you are bio/arch) that you are interested in joining.

Application Materials

- Description of Interests
- Statement of Research Interests and Objectives
- Personal statement
- Writing Sample (optional)
- Online conversation (optional)
- 3 Letters of recommendation
- Transcript (GPA 3.0 or higher)
- CV/Resume
- TOEFL score (for non-native English speakers)

Guidance on application materials

DESCRIPTION OF INTERESTS: This part of the application allows you to indicate your topical and geographical areas of interest and identify the faculty members with whom you are interested in working. Please do not write an essay, but rather provide a bulleted list of your interests and the names of at least two faculty with whom you would like to work. **Please also indicate in this document if you choose to participate in the optional online conversation (see below).** We want you to end up in a program that is best for you, and this information helps us to make this determination.

STATEMENT OF RESEARCH INTERESTS AND OBJECTIVES: This is the single most important item in your application. This essay should be 1000-1500 words and give the admissions committee a clear idea of 1) why you want to pursue a career in anthropology; 2) what anthropological questions or

problems interest you; 3) how you want to address these questions; and 4) why you want to pursue your graduate degree at the University of Illinois Urbana-Champaign. Submit your Statement of Research Interests and Objectives electronically by uploading it with your online application.

PERSONAL STATEMENT: The Personal Statement is a brief essay (maximum of 500 words) on how your personal background and life experiences, including social, cultural, familial, educational, or other opportunities or challenges, motivated your decision to pursue a graduate degree at the University of Illinois Urbana-Champaign. This is not an academic statement of research, but a discussion of the personal journey that has led to your decision to seek a graduate degree. This information will assist the Admissions Committee identify and nominate candidates for Graduate College Fellowships (https://grad.illinois.edu/fellowship/competitions/). Submit your Personal Statement with your online application.

WRITING SAMPLE (optional): Your writing sample should provide the Admissions Committee and relevant faculty with a substantive piece of scholarly work and demonstrate your ability to write clearly and to make a cogent argument. Applicants may submit a short research paper, an excerpt from a thesis, a journal article, essay, etc. Please do not send more than 8000 words.

ONLINE CONVERSATION (optional): As an alternative to, or in addition to the optional writing sample, we invite applicants to schedule a fifteen minute call with members of the faculty in their subfield (biological, sociocultural/linguistic, archaeology). If you select this option you will receive a link with options for times between December 2-9, 2020.

Admissions process and timeline

Admission decisions are made collectively by faculty in each subdiscipline in consultation with the Graduate Admissions Committee. We receive many worthy applications, and every year find ourselves putting truly excellent students on our wait list. Often being on this list has more to do with the priority of a given faculty member in admitting students to their group than anything else. If you are waitlisted, know that this means we think you would be wonderful for the program and would very much like to have you join us. We admit students off the wait list every year.

Our graduate process takes place in two phases. A first selection is made by December 10th when each subdiscipline ranks their top choices. A final selection is made by December 17th by the Graduate Admissions Committee. We will notify you by Dec 21st if you have been admitted or waitlisted. While the official acceptance date is April 1st, we strongly encourage admitted students to formally accept or decline our invitation as soon as they reasonably can so that we can invite wait listed students into the program.

Degree Requirements

Each subfield (Archaeology, Biological Anthropology, and Sociocultural/Linguistic Anthropology) requires a specific set of courses for graduation. Achieving doctoral candidacy in all three subfields entails passing (a) language (and/or skill) exam(s), (b) passing a set of preliminary examinations, and (c) successfully submitting a predissertation paper, and/or a doctoral proposal, all to be defended in an oral examination. For specific details and requirements for admission to and navigation of the Ph.D. program, please refer to the Anthropology Department Graduate Programs Handbook (https://anthro.illinois.edu/resources/graduate-program-handbook/) and the Illinois Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, the Anthropology department recognizes the importance of teaching experience as part of a graduate education. Most Anthropology graduate students will have the opportunity to work as teaching assistants, to learn to design their own classes, and possibly teach their own classes.

Faculty Research Interests and Facilities

Courses and individualized study provide broad coverage of sociocultural, linguistic, archaeological, and physical anthropology. The department provides special emphases in the analyses of state ideologies and cultural transformations; complex societies in transition; kinship and gender relations; politics, economics, and business studies; social movements and youth; border studies, criminalities, violence, and security; religion, race, and ethnicity; democracy, governance, and policing; social classification; performance and embodiment; food and environment; language and culture; discourse and narrative analysis; transnationalism and diasporas; human evolution; agricultural origins and development; landscape histories and heritage; hunter-gatherer adaptations; climate change and sustainability; diet and nutrition; paleoecology and paleobiology; evolutionary genetics; population genetics; peopling of the Americas; ancient DNA; biomechanics of locomotion; exercise and neurobiology; functional morphology; comparative and analytical osteology; forensics; demography; immunology; evolutionary medicine; microbe-host interaction; reproductive ecology; female reproductive physiology; conservation; and nonhuman primate evolution, morphology, behavior, and ecology. The department's research facilities include laboratories for archaeology, GIS and spatial computing, faunal analysis, casting, stable-isotope analysis, ethnography, ancient DNA, skeletal biology, locomotion and motion analysis, and endocrinology.

Departmental funds and a grant from the National Science Foundation, as well as from area studies centers, are available for graduate students' summer field research. An archaeology field school is held at various locations in Illinois and outside of the US (location varies from year to year). Graduate student programs are enriched by close departmental relationships with the various interdisciplinary units, including area studies centers on campus (African, East Asian and Pacific, European Union, Latin America and Caribbean, Russian and East European; South Asian and Middle Eastern Studies), the ethnic and gender studies units (the American Indian Studies Program and the departments of African-American Studies, Asian American Studies, Gender and Women's Studies, and Latina/Latino Studies), along with the Women and Gender in Global Perspectives Program,

Spurlock Museum, the Museum of Natural History, Krannert Art Museum, the Institute for Genomic Biology, and the Program in Ancient Technologies and Archaeological Materials.

Agreements between the university and various governments and institutes facilitate research in many nations. Training is available in various languages (some with funding available), including Arabic, Bengali, Burmese, Chinese, Hausa, Hebrew, Hindi, Indonesian, Japanese, Korean, Portuguese, Quechua, Lingala, Russian, Shona, Swahili, Thai, and Urdu. Students have ready access to the extensive computer facilities of the university and to the department's facilities.

Financial Aid

University fellowships, Graduate College fellowships for under-represented minorities, and teaching and research assistantships provide variable levels of funding for most graduate students who do not hold external awards. Tuition and service fee waivers accompany most fellowships and assistantships. Foreign Language and Area Studies (FLAS) fellowships are available through various area centers. The Illinois public archaeology programs, including the Illinois State Archaeological Survey and the Public Service Archaeology and Architecture Program, have provided support and research employment for graduate students in the past, as has the U.S. Army Construction Engineering Research Laboratory in Champaign.

for the Doctor of Philosophy in Anthropology

The preliminary examination consists of a pre-dissertation research paper, a proposal for doctoral research, and a written examination designed by the student's doctoral committee followed by a two-hour oral examination. The final examination is a defense of the doctoral thesis. Fieldwork is strongly recommended, although not required.

For additional details and requirements refer to the department and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Master's degree or equivalent number of hours		32
Electives		32
Language Requirement: High proficiency in one, or reading ability in two, foreign languages is required. Statistics, computer modeling, or similar expertise, however, may be used in lieu of one foreign language.		
ANTH 599	Thesis Research (min/max applied toward degree)	0-32
Total Hours		**96**

Other Requirements

Requirement	Description
Other requirements may overlap	
Masters Degree Required for Admission to PhD?	No
Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

for the Doctor of Philosophy in Anthropology

---

1. **Skills for independent research**. Graduate students will acquire professional-level research and reasoning skills to identify important research problems and to subsequently design, execute, and clearly report the results of independent research programs.
2. **Subfield-specific expertise**. Our program encompasses the four fields of anthropology, while our core curriculum grounds the separate graduate trajectories. Graduate students should develop an in-depth understanding of the differences and similarities of people through a combination of technical skills, language abilities, and theoretical approaches relevant to their chosen expertise.
3. **Contributions to discipline.** Graduate students will develop their intellectual skills to contribute to the discipline through service, research, teaching, and publishing.
4. **Ethical and professional standards.** Graduate students will abide by accepted ethical standards of professional anthropological conduct.

Applied Mathematics, MS

for the Master of Science in Applied Mathematics

The MS in Applied Mathematics program is intended for students wishing to pursue a career in applied mathematics. It is also suitable as preparation for a PhD program in Applied Mathematics. It is rare for students to enter the PhD program at the University of Illinois Urbana-Champaign after finishing this degree. Students may choose one of three tracks: Optimization and Algorithms, Applications to the Sciences, or Computational Science and Engineering. This degree program requires 32 credit hours and can normally be completed in 18 months. A master's thesis is optional. Applications are accepted for Fall semester. Financial aid is generally not available.

for the Master of Science in Applied Mathematics

Students pursuing the M.S. in Applied Mathematics have the opportunity to customize the their studies the following ways:

- Through the Computational Science and Engineering Concentration. (p. 2000)
- By completing the coursework for the option in Optimization and Algorithms;
- By completing the coursework for the option in Applications to the Sciences;
- By completing the coursework for the option in Computational Science and Engineering.

For additional details and requirements refer to the Department of Mathematics Graduate Guide (https://math.illinois.edu/academics/graduate-program/forms-guidebooks-handbooks-life-resources/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
For all options:		
Coursework to total 32 hours in MATH or ASRM (in consultation with advisor).		
MATH 599	Thesis Research	4
Choose one of these three (3) options:		
Optimization and Algorithms Option		
Courses from at least three (3) of the following areas: Optimization, Control Theory and Coding Theory, Combinatorics and Graph Theory, Algorithms and Theory of Computation, Statistics (including core courses listed below)		20
Select four (4) of the following:		12-16
MATH 412	Graph Theory	
MATH 413	Intro to Combinatorics	
MATH/CS 450	Numerical Analysis	
MATH/CS 473	Algorithms	
ASRM 450/STAT 420	Methods of Applied Statistics	
MATH 482	Linear Programming	
MATH 484	Nonlinear Programming	
Applications to the the Sciences Option		
Select three (3) of the following:		9-16
MATH 489	Dynamics & Differential Eqns	
MATH 550	Dynamical Systems I	
MATH 553	Partial Differential Equations	
MATH 558	Methods of Applied Mathematics	
Credit hours in a department other than Mathematics, providing substantive applications of differential equations and applied mathematics.		8
Computational Science and Engineering Option		
MATH 550	Dynamical Systems I	4
or MATH 553	Partial Differential Equations	
Choose one (1) advanced course in Algebra or Analysis:		3-4
MATH 418	Intro to Abstract Algebra II	
MATH 448	Complex Variables	

MATH 540	Real Analysis	
MATH 542	Complex Variables I	
12 hours from CSE courses (at least 4 in MATH, 4 not in MATH)		12
Total Hours		**32**

Other Requirements

Code	Title	Hours
MATH 405, MATH 415, MATH 444, and MATH 499 cannot be counted toward this graduate degree.		
Minimum hours required within the unit:		20
Minimum 500-level hours required overall:		12 (8 in Mathematics)
Minimum GPA:		3.0
Total Hours (graduate study)		**32**

Non-Thesis Option

Code	Title	Hours
For all options:		
Coursework to total 32 hours in MATH or ASRM (in consultation with advisor).		
Choose one of these three (3) options:		
Optimization and Algorithms Option		
Courses from at least three (3) of the following areas: Optimization, Control Theory and Coding Theory, Combinatorics and Graph Theory, Algorithms and Theory of Computation, Statistics (including core courses listed below)		20
Select four (4) of the following:		12-16
MATH 412	Graph Theory	
MATH 413	Intro to Combinatorics	
MATH/CS 450	Numerical Analysis	
MATH/CS 473	Algorithms	
ASRM 450/STAT 420	Methods of Applied Statistics	
MATH 482	Linear Programming	
MATH 484	Nonlinear Programming	
Applications to the the Sciences Option		
Select three (3) of the following:		9-16
MATH 489	Dynamics & Differential Eqns	
MATH 550	Dynamical Systems I	
MATH 553	Partial Differential Equations	
MATH 558	Methods of Applied Mathematics	
Credit hours in a department other than Mathematics, providing substantive applications of differential equations and applied mathematics.		8
Computational Science and Engineering Option		
MATH 550	Dynamical Systems I	4
or MATH 553	Partial Differential Equations	
Choose one (1) advanced course in Algebra or Analysis:		3-4
MATH 418	Intro to Abstract Algebra II	
MATH 448	Complex Variables	
MATH 540	Real Analysis	
MATH 542	Complex Variables I	
12 hours from CSE courses (at least 4 in MATH, 4 not in MATH)		12
Total Hours		**32**

for the Master of Science in Applied Mathematics

Optimization and Algorithms Track

1. Students will be able to explain and apply mathematical techniques from at least four of the seven core subjects of graph theory, combinatorics, numerical analysis, algorithms, applied statistics, linear programming, nonlinear programming.
2. Students will be able to apply mathematical concepts to solve problems in at least three of the following areas: optimization, control theory and coding theory, combinatorics/graph theory, algorithms/theory of computation, statistics.
3. For thesis track: Students will be able to effectively communicate extended arguments about the applications of mathematics in written form.

Applications to the Sciences Track

1. Students will be able to explain central definitions and theorems of differential equations and dynamical systems.
2. Students will be able to explain and apply mathematical modeling techniques that use differential equations and dynamical systems.
3. Students will be able to explain the application of mathematics to problem solving in one or more of the sciences.
4. For thesis track: Students will be able to effectively communicate extended arguments about the applications of mathematics in written form.

Computational Science and Engineering (CSE) Track

1. Students will be able to explain central definitions and theorems of differential equations and dynamical systems.
2. Students will be able to explain central definitions and theorems of at least one of the core subjects of abstract algebra or real/complex analysis.
3. Students will be able to use computational techniques to address mathematical problems in the sciences.
4. For thesis track: Students will be able to effectively communicate extended arguments about the applications of mathematics in written form.

Applied Veterinary Sciences, MVS

for the degree of Master of Veterinary Science in Applied Veterinary Sciences

The MVS degree program is designed with the primary objective of cultivating critical thinking skills, fostering a commitment to lifelong learning, and expanding the depth and breadth of knowledge within the animal health industry. The program is geared towards equipping students with the versatile skills required to excel in various career paths related to animal health.

for the degree of Master of Veterinary Science in Applied Veterinary Sciences

Code	Title	Hours
Required		
VCM 504	Introduction to Veterinary Science	3
VCM 565	Biostatistics, Information Management, and Data Analytics for Livestock Production Systems	4
VCM 507	Veterinary Form and Function	3
VCM 509	Biology of Veterinary Pathogen	3
VCM 594	Applied Veterinary Science Capstone (Applied Veterinary Science Capstone)	4
VCM 513	Science of Health Homeostasis	3
Electives (minimum 12 credit hours)
