500 level Hours	12 (min)

for the degree of Master of Veterinary Science in Applied Veterinary Sciences

1. Interpret and apply the foundational principles of veterinary husbandry and animal health to real-world problems.
2. Concisely define, assess, and prioritize problems, formulate specific testable questions about problems, and seek out and critically evaluate evidence to support conclusions about answers to questions.
3. Understand how structured problem-solving and solution design methods are used to generate, communicate, and implement solutions for complex problems.

for the degree of Master of Veterinary Science in Applied Veterinary Sciences

Architectural Studies, MS

for the Master of Science in Architectural Studies

Master of Science in Architectural Studies

The Master of Science in Architectural Studies program is open to students holding a degree in architecture, as well as students with experience and degrees in allied fields who seek new ways to engage environmental design through advanced research skills. Students develop a specialized focus in one of the school's program areas or craft their own focus through courses within the college and across campus. To earn this degree, students must complete a total of 32 hours of graduate credit. The program length varies from one to one-and-a-half years and, depending on focus area, may include fieldwork or internships.

Each Master of Science student develops an individualized program of study in consultation with the chair of the program area (https://arch.illinois.edu/programs-applying/program-areas/) to which the student has been admitted. The program of study is then reviewed by the Associate Director for Graduate Studies and registered in the student's academic file.

Current areas of study include:

- Urbanism
- Health and Wellbeing
- Detail and Fabrication
- Sustainable Technologies
- Systems Optimization
- Building Structures
- Preservation + Heritage
- Architectural History

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the Web site here: Admissions and Applying - School of Architecture (https://arch.illinois.edu/programs-applying/admissions/). Application may be made on-line. Graduate Record Examination (GRE) scores are NOT required for Master of Science applicants but are strongly recommended and if taken are recorded in the applicant's record.

All applicants to the Illinois School of Architecture whose first language is not English must submit the Test of English as a Foreign Language (TOEFL), IELTS or another acceptable score listed at the Graduate College (https://grad.illinois.edu/admissions/instructions/04c/) website.

In order to issue an I-20 the Graduate College will need the following: funding documentation, declaration and certification of finances form, and passport. Please refer to this information regarding funding requirements (https://grad.illinois.edu/admissions/instructions/04d/).

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

for the Master of Science in Architectural Studies

Admitted students must complete a total of 32 hours of graduate credit. The program length varies from one to one-and-a-half years and, depending on focus area, may include fieldwork or internships.

For additional details and requirements refer to the program page (https://arch.illinois.edu/programs-applying/graduate-degrees/master-of-science/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

There are traditionally three different ways this degree can be achieved after deciding on an area of study with your advisor.

Coursework-based degree completion

Requirements are basic so students can tailor their degree program towards their area of study. These basic requirements are as follows: 16 credit hours must be achieved through ARCH courses. The other 16 credit hours can be ARCH or any other University of Illinois Urbana-Champaign course offering outside of the School of Architecture.

Internship or fieldwork experience degree completion

These requirements are similar to the coursework-based degree path, but fieldwork credit will be part of the program. It will be up to the student to find an internship or fieldwork that will support their area of study. This internship will need to be unpaid in order to receive credit for the degree completion requirements. This will need to be reviewed and approved by the architecture office. This path is customized to each student and will need to be discussed with the student's advisor.

Concentration in Structures degree completion

There are specific degree requirements (https://uofi.app.box.com/s/twaqebq2rr8qojdkkfo92lhp122mvzlx/) for this degree path.

This degree program can be completed with or without a thesis, the requirements are listed below:

Code	Title	Hours
Thesis Option:		
Architectural Electives from dept. list		0-16
Electives		16
ARCH 599	Thesis Research (min/max applied toward degree)	0-16
Thesis Option Total Hours:		**32**
Non-Thesis Option:		
Architectural Electives from dept. list		16
Electives		16
Non-Thesis Total Hours:		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Candidates must spend at least two semesters and earn at least half of the required graduate hours in residence.	
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	2.75

for the Master of Science in Architectural Studies

The school must provide evidence that its graduates have satisfied each criterion through required coursework. If credits are granted for courses taken at other institutions or online, evidence must be provided that the courses are comparable to those offered in the accredited degree program.

When students complete the MS degree program, they will be able to:

1. **Apply Specialized Knowledge**
   a. Engage in the practice of architecture in its many forms.
   b. Employ design processes to understand, conceive, and create the many facets of built environments.
   c. Utilize the interplay of form and space to create compelling experiences in the built environment.
   d. Address environmental, social, political, cultural, and economic challenges through the application of design inquiry.
   e. Apply advanced documentation, research, analysis, and design techniques to create innovative design solutions to pressing global challenges.
2. **Apply Broad and Integrative Knowledge**
   a. Solve complex problems through the use of advanced design techniques.
   b. Communicate complex ideas and concepts through a mastery of graphic, verbal, physical, and digital means.
   c. Integrate community voices, cultural perspectives, and participatory practices into design solutions.

   d. Employ an understanding of the complex intersections between design and environmental, social, economic, political, and cultural phenomena in historical and contemporary contexts.
   e. Use scholarly inquiry to answer questions in support of design solutions.
3. **Utilize Differentiated Modes of Thinking**
   a. Understand, differentiate, and apply analytical, critical, and conceptual thinking to the design challenges of the twenty-first century.
   b. Evaluate and apply theories of the built environment to understand their impacts on global ecology, human experience, and wellbeing.
   c. Research and critically analyze historic and contemporary humanistic conditions related to the built environment in local, regional, and global geographies.
4. **Collaborate Successfully**
   a. Foster teamwork and consensus decision-making.
   b. Lead and steer complex processes to completion.
   c. Value and integrate interdisciplinarity as well as diverse disciplinary approaches in the realm of design,
5. **Contributing to Community, Civic, and Global Equity**
   a. Demonstrate the ability to make empathic and ethical decisions throughout the design process.
   b. Work toward a more inclusive profession that welcomes practitioners of all genders, abilities, races, ethnicities, and ages.
   c. Foreground social, environmental, and economic justice in the design of the environment to contribute to greater equity, diversity, and inclusion.

Architectural Studies: Structures, MS

for the degree of Master of Science in Architectural Studies, Structures Concentration

The School of Architecture offers a Structures Concentration (available online or in-person) under its MS in AS degree program. The online and in-person programs feature identical program contents and admission criteria. Completion of this in-depth plan of study will result in recording of Structures as a Concentration on the student's transcript under the MS in AS degree.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

Application forms for graduate admission and financial aid may be obtained from the website (https://arch.illinois.edu/programs-applying/admissions/). Application may be made on-line. Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants; the GRE is required for all Doctor of Philosophy applicants.

All international degree-seeking applicants are required to submit the results of an accepted test as evidence of English proficiency unless they qualify for an exemption. Official scores are required to be submitted directly from the testing agency. All scores must be dated within two years of the beginning of the proposed admission term. English proficiency requirements for graduate admission (https://grad.illinois.edu/admissions/instructions/04c/) are detailed on the Graduate College website.

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

for the degree of Master of Science in Architectural Studies, Structures Concentration

Students interested in participating in the Structures Concentration must be admitted to the School of Architecture's MS in AS degree program, register their intent to enter the Structures Concentration with the School's Graduate Office prior to completing their first semester in their degree program, and complete a total of 32 hours with 27 graduate credit hours of architectural structures courses from the required courses list below. Prerequisite subjects for the Structures Concentration include the following:

- Undergraduate engineering requirements such as physics, calculus series, statics, and mechanics of materials
- Structural analysis
- One semester each in structural steel design and reinforced concrete design

Equivalents to these courses may be accepted if approved by the faculty member in charge of the subject matter. Documentations such as syllabus, course notes, textbook, and other information may be required for such approvals.

Courses taken on design of structural steel and reinforced concrete need to be according to the standards developed by the American Institute of Steel Construction (AISC) and American Concrete Institute (ACI). Students not having learned these standards may be required to take courses in those subjects before taking certain core courses.

Applicants lacking any of the subject requirements will be asked to complete prerequisites before taking courses required for this degree. Such situations may extend the duration of completion of the degree. Prerequisite undergraduate courses will not count toward a graduate degree, but graduate courses may be considered as electives with the consent of the student's advisor.

Architecture, MArch

for the degree of Master of Architecture in Architecture

The School of Architecture offers a graduate program leading to a Master of Architecture degree.

Here students can develop a specialized professional focus in one of the school's Program Areas (https://arch.illinois.edu/programs-applying/program-areas/), or craft their own focus through courses within our college and across campus. Students may also elect to enroll in one of the school's Joint Degree Programs (https://arch.illinois.edu/programs-applying/graduate-degrees/joint-degrees/). Located within a world-class research university, the M.Arch curriculum gives students the opportunity to work with faculty in an atmosphere of scholarship and innovation.

STEM Classification and OPT Employment

Our M.Arch degree is STEM-classified. International students with an F-1 visa are eligible to remain in the US for OPT (Optional Practical Training) employment for up to three years and two months after graduation, and those granted an H-1b visa can stay an additional six years, for a possible total of 9 years.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

To apply, go to the Graduate College online application. (https://grad.illinois.edu/admissions/apply/) Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants. Please review the English proficiency requirements for graduate admission. (https://grad.illinois.edu/admissions/instructions/04c/)

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

for the degree of Master of Architecture in Architecture

The M.Arch is the School's accredited degree program and must demonstrate that each graduate possesses the knowledge and skills defined by the learning outcomes set out below. The knowledge and skills are the minimum for meeting the demands of an internship leading to registration for architectural practice.

The school must provide evidence that its graduates have satisfied each criterion through required coursework. If credits are granted for courses taken at other institutions or online, evidence must be provided that the courses are comparable to those offered in the accredited degree program.

When students complete the M.Arch degree program, they will be able to:

1. **Apply Specialized Knowledge**
   a. Engage in the practice of architecture in its many forms.
   b. Employ design processes to understand, conceive, and create the many facets of built environments.
   c. Utilize the interplay of form and space to create compelling experiences in the built environment.

Admissions

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Architecture: 2 Year Program, MARCH

for the degree of Master of Architecture in Architecture, 2 Year Program Concentration

2-year Professional Master of Architecture Degree

The Master of Architecture is a NAAB-accredited professional degree with STEM designation designed for students with a four-year baccalaureate in architectural studies. This two-year program builds on undergraduate foundations to develop the knowledge and skills required in today's architecture profession. Students can pursue individual interests through 16 elective credit hours and thematic studio options offered each semester, with opportunities to focus on areas that align with faculty research and available coursework.

Students admitted to the two-year professional degree program must complete at least 62 credit hours of graduate work, typically completed in two years of full-time study.

The School of Architecture, together with the graduate programs of computer science, urban and regional planning, and civil and environmental engineering, offers graduate programs leading to the following joint degrees: Master of Architecture and Master of Computer Science, Master of Architecture and Master of Urban Planning, and Master of Architecture and Master of Science in Civil and Environmental Engineering (Construction Engineering and Management) (Structures).

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

To apply go to the Graduate College online application (https://grad.illinois.edu/admissions/apply/). Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants. Please review the English proficiency requirements for graduate admission (https://grad.illinois.edu/admissions/instructions/04c/).

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

for the degree of Master of Architecture in Architecture, 2 Year Program Concentration

The two-year professional degree program, intended for students entering with a four-year baccalaureate in architectural studies, emphasizes further study in architectural disciplines. Students may elect to concentrate in any one of several areas of specialization aligned with research-oriented program areas.

Candidates admitted with full or limited status to the two-year professional degree program must complete at least 62 hours of graduate work. Candidates admitted with full status may complete the program in two years of full-time academic study.

A list of programs and additional requirements can be found on the program's website (https://arch.illinois.edu/degrees/master-architecture-2/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Admissions

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Architecture: Building Performance, MARCH

for the Master of Architecture in Architecture, Building Performance Concentration

The concentration in Building Performance in the Master of Architecture (M.Arch) Program at the University of Illinois Urbana-Champaign provides students the opportunity to develop a deep understanding of building performance through the integrated design and analysis of environmental, enclosure, structural and related systems. Coursework enables students to engage contemporary architectural issues related to sustainability, environmentally responsible use of energy and materials, human comfort and health, and constructability. In addition to completing architectural design studios focused on technology and performance, students will select from a series of specialized elective courses in building technologies, energy modeling and simulation, building envelope design, climate responsive design, daylighting, advanced structural design and analysis, and integrated design processes. The concentration thus gives students a strong foundation and expertise in the various principles and technologies that contribute to the design of high performance buildings in contemporary architectural practice.

Students who declare the concentration in Building Performance are required to submit to their advisor, at the end of their first semester of study and not later than the first day of classes of the second semester, a Plan of Study that outlines their intended coursework during each semester of the M.Arch program. This plan must be signed by the student and the advisor and submitted to the Chair of the Building Performance Program Area and the Director of Graduate Studies not later than the second week of classes in the student's second semester of study.

This concentration can be completed within the normal timeframe of the M.Arch degree. Successful completion of the concentration will be noted on the student's official transcript.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

To apply, go to the Graduate College online application (https://grad.illinois.edu/admissions/apply/). Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants. Please review the English Proficiency Requirements for Graduate Admission (https://grad.illinois.edu/admissions/instructions/04c/).

for the Master of Architecture in Architecture, Building Performance Concentration

Students who declare the Concentration must complete a minimum of 21 credit hours of coursework with a focus on building performance.

Code	Title	Hours
Required Architecture Studios		**12**
To be taken from a faculty member whose primary Program Area affiliation is Building Performance or as approved by the chair of the Building Performance Program Area		
ARCH 573	Design: Technology and Performance	6
ARCH 573	Design: Technology and Performance	6
If a 573 course is cross-listed as ARCH 575, then it will also satisfy the M.Arch core requirement for one semester of 575.		

Code	Title	Hours
Elective Courses		**9**
These courses also fulfill elective requirements for the M.Arch. degree.		
Students must complete 9 hours of coursework in the School of Architecture focused on issues of building performance and taught by Faculty in the Building Performance Program area. Faculty offer a wide variety of graduate courses that vary by semester. Students should consult with their advisor on a course of study that includes coursework suited to the student's interests.		
Other Graduate Courses		

Faculty in other Program Areas may on occasion offer 400- or 500-level courses that are appropriate for the Building Performance Concentration. Courses offered in other units of the University may also address topics in Building Performance. With prior approval, students may fulfill up to 3 credit hours for the Concentration with such coursework. In such cases, the Chair of Building Performance in consultation with the student's Advisor and after reviewing a formal written request from the student may approve the course for fulfillment of the Concentration.

Students may fulfill up to 3 credit hours for the Concentration with an Independent Study project or projects under the supervision of a faculty member whose primary Program Area affiliation is Building Performance or as approved by the Chair of the Building Performance Program Area.

Architecture Graduate Courses		**9**
These courses may also fulfill elective requirements for the M.Arch. degree. Students will complete three, 3 credit hour courses to earn the 9 hours for this section.		
ARCH 518	Recording Historic Buildings	3
ARCH 519	Conserv of Building Materials	3
ARCH 576	Architectural Design Seminar (Students may select from seminars taught by Detail and Fabrication faculty, including section FAB Age of Digital Reproduction, section PUP Picking Up the Pieces, section WFW Wood Furniture Workshop, and new ARCH 576 courses in Detail and Fabrication as they become available)	3
ARCH 593	Special Problems in Detail and Fabrication (Students may select from courses taught by Detail and Fabrication faculty. New ARCH 593 courses as they become available.)	3
ARCH 590	Directed Research (Students may fulfill up to 6 credit hours for the Concentration with a Faculty Directed Research Project or Projects under the supervision of a faculty member whose primary Program Area affiliation is Detail and Fabrication or as approved by the Chair of the Detail and Fabrication Program Area. Students must complete an ARCH 590 Faculty Directed Research Proposal Form, obtain signed approval from the faculty member who will supervise the study, and submit the proposal to the Graduate Office for final approval and enrollment permission.)	0 to 6
Other Graduate Courses		

Faculty in other Program Areas may on occasion offer 400 or 500 level courses that are appropriate for the Detail and Fabrication Concentration. Courses offered in other departments of the University, such as Art and Design and Engineering, may also address topics in Detail and Fabrication. With prior approval, students may fulfill up to 3 credit hours for the Concentration with such coursework. In such cases, the Chair of Detail and Fabrication in consultation with the student's Advisor and after reviewing a formal written request from the student may approve the course for fulfilment of the Concentration.

Total Hours to earn the Concentration in Detail and Fabrication for the M.Arch.		**21**

for the Master of Architecture in Architecture, Detail & Fabrication Concentration

Upon completion of this Concentration the students will have an understanding of the following:

1. Understanding of combined conceptual development of design, details, and materials.
2. Hands-on material experience.
3. Understanding of the possibilities available through custom-made and mass-produced fabrication methods.
4. Understanding of scale as part of the conceptual approach and fabrication and technology.
5. Knowledge of digital tools such as 3D printers, robotic arms, scanners, and other fabrication equipment.
6. Understanding of methods to help resolve and contribute to the design process and environment.
7. Understanding and applicability of design at a human scale.
8. Understanding how to make positive and long-lasting contributions to the built environment.

Admissions

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Architecture: Health and Wellbeing, MARCH

for the Master of Architecture in Architecture, Health & Wellbeing Concentration

The Health and Wellbeing Concentration in the Master of Architecture Program at the University of Illinois Urbana-Champaign provides students with the opportunity to develop an in depth understanding of the relationship between conditions in the built environment and individual performance and population health, well-being, and quality of life. A series of required and elective courses exposes students to a growing base of knowledge at the nexus of architecture, planning, medicine, public health, psychology, and numerous other fields. Concentration coursework enables students to develop expertise in research and strategies for environmental design, planning, and policy to improve human health and wellbeing outcomes through interventions in diverse environment types and contexts, at a range of scales. Responding to an unmet need in the profession, students completing the concentration will be prepared to work on interdisciplinary teams addressing complex societal problems involving the built environment's critical role in human health and wellbeing in the US and internationally.

Students can declare the Health and Wellbeing Concentration in any of their first three full-time semesters in their M.Arch program. Approval will not be granted if submitted during the student's last full-time semester in the program.

This concentration can be completed within the normal timeframe of the M.Arch degree. Successful completion of the concentration will be noted on the student's official transcript.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

To apply, go to the Graduate College online application (https://grad.illinois.edu/admissions/apply/). Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants. Please review the English Proficiency Requirements for Graduate Admission (https://grad.illinois.edu/admissions/instructions/04c/).

for the Master of Architecture in Architecture, Health & Wellbeing Concentration

Students who declare the Concentration must complete a minimum of 22 hours of coursework with a focus on health and wellbeing.

Code	Title	Hours
Required Architecture Studios		**6**
This studio also forms part of the standard M.ARCH Core curriculum.		

ARCH 572	Design: Health and Well-being (To be taken from a faculty member whose primary program area affiliation is Health and Wellbeing or as jointly approved by the chair of the Health and Wellbeing Program Area and the Concentration Advisor. Studios with the ARCH 572/575 rubric may be used to fulfill this concentration requirement.)	6
Students in the concentration are strongly encouraged to consider participation in the Chicago Studio during their MARCH program to explore health and wellbeing topics in the context of urban neighborhoods and communities.		

Code	Title	Hours
Architecture Graduate Courses		**16**
These courses may also fulfill elective requirements for the M.Arch. degree. Complete 4 or more courses at 2-6 hours for a total of 16 hours.		
Required Coursework		
ARCH 563	Human-centric Research for Designed Environments	4
ARCH 521	Applications in the Built Environment, Architecture and Global Health and Well-Being	4
or ARCH 522	Advanced Research in Environment, Architecture & Global Health	
Elective Health and Wellbeing course		
In consultation with the Health and Wellbeing Advisor, students may take a course within the School of Architecture or select a course from a unit outside the School of Architecture that addresses a health and wellbeing topic or other topical course.		3-6
Additional Elective Coursework from outside The School of Architecture		
Students must take one or more courses from a unit outside the School of Architecture. Course(s), approved in advance by the Health and Wellbeing Advisor, must be focused on Health and Wellbeing.		2-6

Admissions

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Architecture: Track 3, MARCH

for the degree of Master of Architecture in Architecture, Track 3 Concentration

Master of Architecture Degree - Track 3

The School of Architecture offers an NAAB-accredited professional M.Arch degree program designed for students holding a bachelor's degree in a field other than architecture, or in architecture but not equivalent to a Bachelor of Science in Architecture. Students develop an individualized curriculum in consultation with their advisor, resulting in a program that varies in length and generally exceeds 2 years. Upon completion of requisite background course work lasting between one semester and two years, students enrolled in the M. Arch Track 3 degree program follow the M.Arch program of study. The M.Arch Track 3 program brings together students with diverse backgrounds to explore and grapple with the complexities of the environment and innovate through the design process.

To be eligible for admission to the M.Arch Track 3 program, the student must have by the term of enrollment:

1. Earned a four-year, baccalaureate degree
2. Completed one calculus class equivalent to the University of Illinois Urbana-Champaign's MATH 220 course, worth five credit hours.

Joint Degrees

The School of Architecture, together with the graduate programs of computer science, urban and regional planning, and civil and environmental engineering, offers graduate programs leading to the following joint degrees: Master of Architecture and Master of Computer Science, Master of Architecture and Master of Urban Planning, and Master of Architecture and Master of Science in Civil and Environmental Engineering (Construction Engineering and Management) (Structures).

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

To apply, go to the Graduate College online application (https://grad.illinois.edu/admissions/apply/). Graduate Record Examination (GRE) scores are not required for School of Architecture Masters

Degree applicants. Please review the English Proficiency Requirements for Graduate Admission. (https://grad.illinois.edu/admissions/instructions/04c/)

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

for the degree of Master of Architecture in Architecture, Track 3 Concentration

Limited Standing

The School of Architecture offers an NAAB-accredited professional MARCH 2+ Year degree program designed for students holding a bachelor's degree in a field other than architecture, or in architecture but not equivalent to a Bachelor of Science in Architecture. Students develop an individualized curriculum in consultation with their advisor, resulting in a program that varies in length and generally exceeds 2 years. Upon completion of requisite background course work lasting between one semester and two years, students enrolled in the MARCH 2+ Year degree program follow the MARCH program of study. The MARCH 2+ Year program brings together students with diverse backgrounds to explore and grapple with the complexities of the environment and innovate through the design process.

To be eligible for admission to the M.ARCH 2+ Year degree program, the student must have by the term of enrollment:

1. Earned a four-year, baccalaureate degree
2. Completed one calculus class equivalent to Illinois' MATH 220, five semester hours

For additional details and requirements refer to the School of Architecture's Master of Architecture 2+ Year program page and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed with or without a thesis, the requirements are listed below:

Code	Title	Hours
Thesis Option		
One course in architectural practice		
One core elective each from a select list of courses in architectural thought		
One core elective each from a select list of courses in professional practice		
Four studios including two semesters of comprehensive design		
One course in structural planning		
Students must also complete prerequisites, which are determined individually and do not count toward the required number of hours required		
ARCH 599	Thesis Research (min/max applied toward degree)	0
Thesis Option Total Hours		**54**
Non-Thesis Option		
One course in architectural practice		
One core elective each from a select list of courses in architectural thought		
One core elective each from a select list of courses in professional practice		
Four studios including two semesters of comprehensive design		
One course in structural planning		
Students must also complete prerequisites, which are determined individually and do not count toward the required number of hours required		
Non-Thesis Total Hours:		**54**

Admissions

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Architecture: Urbanism, MARCH

for the Master of Architecture in Architecture, Urbanism Concentration

The Urbanism Concentration in the Master of Architecture Program at the University of Illinois Urbana-Champaign provides students with the opportunity to develop a deep understanding of the issues facing cities and urban residents in the 21st century. With complex environmental, political, technological and economic factors and accelerating urbanization, architects will increasingly be called on to understand and solve urban problems at a variety of scales, from the building to the region. These solutions require understanding across a breadth of issues as well as competency in the appropriate tactics and strategies that can lead to such solutions. The Urbanism Concentration

provides students with the opportunity to develop these skills across a range of scales.

Students can declare the Urbanism Concentration during any of their first three full-time semesters in the M.Arch program. No approval will be given if submitted during the student's last full-time semester in the program.

This concentration can be completed within the normal timeframe of the M.Arch degree. Successful completion of the concentration will be noted on the student's official transcript.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

Applicants are selected for admission on the basis of undergraduate academic performance and profession-related experience. Application material is evaluated by faculty members. The faculty's recommendations are based upon an appraisal of the admission grade point average determined from official transcripts, a portfolio or brochure of applicant's past work in architecture, a statement of objectives, three letters of recommendation, and relevant professional work experience.

To apply, go to the Graduate College online application (https://grad.illinois.edu/admissions/apply/). Graduate Record Examination (GRE) scores are not required for School of Architecture Masters Degree applicants. Please review the English Proficiency Requirements for Graduate Admission (https://grad.illinois.edu/admissions/instructions/04c/).

for the Master of Architecture in Architecture, Urbanism Concentration

Students who declare the Concentration must complete a minimum of 21 hours of coursework with a focus on urbanism.

Code	Title	Hours
Architecture Studios		**12**
To be taken from a faculty member whose primary Program Area affiliation is Urbanism or as approved by the chair of the Urbanism Program Area		
ARCH 574	Design: Architecture and Urban Design	6
ARCH 574	Design: Architecture and Urban Design	6
If a 574 studio is cross-listed as ARCH 575, then it will also satisfy the M.ARCH core requirement for one semester of 575.		
Students are strongly encouraged to consider participation in the Chicago Studio in the first semester of the second year.		

Code	Title	Hours
Architecture Graduate Courses		**6**
These courses may also fulfill elective requirements for the M.Arch. degree. Students will complete two, 3 credit hour courses to earn the 6 hours for this section.		

400-level and 500-level ARCH coursework

Coursework taken for completion of the Urbanism Concentration must focus on issues of urbanism. Faculty in the Urbanism Program area offer a wide variety of graduate courses. In any given semester, these may have an appropriate focus for the Urbanism Concentration in other semesters they may not. Each semester Urbanism Faculty determine collectively which courses will be accepted for the Urbanism Concentration.

Other Graduate Courses

In addition, Faculty in other Program Areas may on occasion offer 400 or 500-level courses that are appropriate for the Urbanism Concentration. In such cases the Chair of Urbanism in consultation with the student's advisor and after reviewing a formal request from the student may approve seminars taught by Architecture Faculty not in the Urbanism Program Area.

Code	Title	Hours
Additional Elective Coursework		**3**
Students must complete a minimum of 3 additional elective hours in course work related to urbanism. These hours must be acquired outside the School of Architecture. These hours may also fulfill elective requirements for the M.Arch. degree. Students may tailor this course to their own interests within the concentration. Students are encouraged to seek out special topics courses that vary by semester in other units and that are applicable to the urbanism concentration and the interest of the student. Courses must be approved by the advisor.

College website (http://faa.illinois.edu)

Admissions

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

This program offers advanced training for those students whose goal is a career of research and scholarship in academia, industry, or government. Four areas of focus are offered: History and Theory, Environment and Technology, Health and Wellbeing, and Urbanism. The program is administered jointly with the Department of Landscape Architecture.

Admission

The admission grade point average for full standing in the Graduate College and the school must be at least 3.0 (A = 4.0). For applicants who meet the other requirements but have an admission GPA under 3.0, admission with limited standing may be permitted if evidence of exceptional qualification is presented.

The application process is highly selective. Potential applicants are encouraged to correspond with the chair of the Ph.D. program and or with prospective advisors. Applicants are selected for admission on the basis of academic performance and relevant experience. Application material is evaluated by the Ph.D. Committee and members of the faculty as necessary. Recommendations for admission are based upon an appraisal of prior academic work determined from official transcripts, the statement of research objectives, three letters of recommendation, and relevant professional work experience.

To apply go to the Graduate College online application (https://grad.illinois.edu/admissions/apply/). Graduate Record Examination (GRE) scores are required for all PhD applicants.

Please review the English proficiency requirements for graduate admission (https://grad.illinois.edu/admissions/instructions/04c/).

Graduate Teaching Experience

While teaching is not required by the Graduate College, it is an important part of the graduate experience in this program.

Financial Aid

Financial aid for graduate students in architecture is available in the form of fellowships and assistantships (teaching, research, and graduate or resource). Qualified candidates are considered for financial support upon application and in subsequent years of study.

Degree Requirements

The requirements may vary slightly according to students' area of focus. Please consult the (https://web.faa.illinois.edu/app/uploads/sites/3/2023/09/PhD-Handbook-2023-2024.pdf)PhD Handbook (https://web.faa.illinois.edu/app/uploads/sites/3/2023/09/PhD-Handbook-2023-2024.pdf) for more explicit details.

Students are required to defend their dissertation; Policies on format of the doctoral examination can be found in the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Doctor of Philosophy in Architecture

For additional details and requirements refer to the department's program page (http://www.arch.illinois.edu/degrees/phd-architecture/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Doctor of Philosophy in Architecture

Theory & Knowledge

- Students will understand the major theoretical approaches in their architectural subdiscipline, and the assumptions inflected on research situated within any one approach.
- Students will develop mastery of the knowledge in a major architectural subdiscipline and substantial comprehension of knowledge in a minor field outside of architecture.
- Students can identify and describe key theories, concepts, and issues associated with the major theoretical approaches in their architectural subdiscipline.
- Students can combine theoretical approaches to explain phenomena they intend to study.
- Students can select the theoretical approach that is most applicable to a phenomenon and explain why they have selected that perspective.

Research

- Students will be able to identify, interpret, and synthesize research and describe the gaps in research conducted by other scholars in a particular area of focus.

- Students will comprehend the primary quantitative and qualitative research methods employed in systematic study of the built environment.
- Students will be versed in research ethics pertinent to their architectural subdiscipline.
- Students will be able to design and carry out a major original research project that contributes new knowledge to the discipline.
- Students will be able to articulate to scholars outside the field the value of including architectural perspectives in interdisciplinary research.

Dissemination of Scholarship

- Students will understand the value and obligation for scholars to engage in all aspects of the peer-review process.
- Students informally share their work-in-progress with peers.
- Student can engage peer-review conference and journal venues where they disseminate their research.

Professional Development

- Students explore academic and professional post-graduation possibilities for applying their expertise in productive employment.
- Students understand the different types of academic institutions and the expectations of faculty and staff in these different institution settings.
- Students can design and deliver a lecture.
- Students can identify and describe different methods of academic instruction and explain their differential goals.

Art & Design, MFA

for the degree of Master of Fine Arts in Art and Design

The degree of Master of Fine Arts in Art and Design is designed to prepare qualified individuals for distinctive achievement in the professional area of their choice. Fields of concentration include Design for Responsible Innovation, Industrial Design, or Studio Art.

A minimum of 64 hours of graduate credit is required for the M.F.A. degree. Individual studio space and specialized resources essential to the acquisition of a high-quality professional education are available to students in all areas of study. The interdisciplinary Studio which includes Painting, Sculpture, Photography and New Media require a graduation exhibition of creative work and a written thesis approved by a thesis committee for deposit in the School of Art and Design's graduate office. The Industrial Design and Design for Responsible Innovation programs require a graduation exhibition, a written thesis approved by a thesis committee and a thesis deposit in the Graduate College Thesis Office. Admission for all programs is determined by a faculty review of a portfolio of the applicant's creative work, records of previous education and experience, letters of recommendation, and other significant achievements that may be viewed as predictors for success in the program.

Admission

Applications are considered for Fall Semester admissions only. For international applicants a recent English Proficiency test score of 96 (TOEFL) or 6.5 (IELTS) (or an exemption) is needed for admissions.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources

Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant's grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

for the degree of Master of Fine Arts in Art and Design

MFA in Art & Design, concentration in Industrial Design

1. Inquiry and insight: Select and use appropriate research and experimental methods, to access existing data or to generate new data, to analyze and draw insights, with a particular emphasis on user needs.
2. Ideation: Produce creative proposals to identified design opportunities, using design thinking, modelling, and prototyping strategies, with an appropriate integration of functional, technical, ergonomic and visual factors.
3. Implementation: Select and use appropriate making and manufacturing processes with an understanding of the potential of new technologies, and the demands of sustainability.
4. Informing: Use visual and verbal communication, to explain and persuade, as appropriate for different audiences.
5. Self development: Carry out independent learning and reflexive evaluation of your work, as well as to plan and implement action, individually or in teams, effectively managing self and others.
6. Contextualisation: Locate your own activity within the multiple contexts of design practice, including the theoretical, professional, cultural, environmental and technological contexts.

MFA in Art & Design, concentration in Design for Responsible Innovation

1. Demonstrate familiarity with the design research literature relevant to their topic.
2. Create prototypes for research purposes.
3. Explain the different epistemological modes of knowledge production.
4. Select research methods appropriate to the thesis topic.

MFA in Art & Design, concentration in Studio Art

1. Demonstrate a practical and theoretical understanding of contemporary art and related practices.
2. Articulate studio and conceptual concerns orally and in writing that makes critical connections between individual works and practices and the larger contexts that inform them.
3. Produce and exhibit a comprehensive body of artwork that demonstrates conceptual rigor and appropriate technical skill.
4. Demonstrate the intention, motivation and skills required to pursue and sustain a career as an artist.
5. Acquire practical pedagogical and technical skills necessary for employment in the field.

Art & Design: Design for Responsible Innovation, MFA

for the degree of Master of Fine Arts in Art and Design, Design for Responsible Innovation Concentration

MFA in Design for Responsible Innovation

The three-year MFA in Design for Responsible Innovation at the University of Illinois at Urbana-Champaign cultivates designers who envision and create inclusive futures in academia, industry, and communities. We invite students with design or design-adjacent* academic or professional backgrounds to apply. We prepare our graduates to drive responsible innovation in design practice and pedagogy by addressing pressing contemporary questions around climate change, ethics and social justice, equity, technology access, identity, and cultures. We equip our students with the knowledge and skills to build a more equitable and sustainable world through traditional and emerging practices including, but not limited to, graphic design, visual analytics, systems and service design, multimodal interaction, and visual communication and narrative.

** Students without an undergraduate design degree will enroll in design studio electives focused on tools, methods, and skill building in their first graduate year.*

The MFA DRI consists of three years of coursework totaling 64 credit hours and a thesis project which can be delivered in either of these ways:

- Option 1: A written thesis document + exhibition in the the Krannert Art Museum
- Option 2: A written thesis document + two national peer-reviewed conference presentations + public on-campus lecture here at Illinois

Admission

Applications are considered for Fall Semester admissions only. International applicants need to submit a recent English Proficiency test score of 96 (TOEFL) or 6.5 (IELTS), or an exemption, for admissions.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources

Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant's grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

Art & Design: Industrial Design, MFA

for the degree of Master of Fine Arts in Art and Design, Industrial Design Concentration

---

The School of Art & Design and Industrial Design program are accepting applications for Fall 2025 admission to the MFA in Art & Design, Industrial Design concentration.

Overview

Industrial Design is a human-centered design activity that determines the nature of products, services, and experiences produced by industry. This approach to design reconciles the needs of the user and the producer, combining desirability, viability, feasibility, and responsibility. Industrial Designers also champion the use of design thinking. This user-centered approach has broad application in many social and business contexts. Our definition of Industrial Design encompasses the design of products, interfaces, interactions, and user experiences.

The degree of Master of Fine Arts (MFA) with specialization in Industrial Design (ID) prepares you for a professional career in higher education or entrepreneurial design practice. The program of study is highly individualized to help you achieve professional excellence by matching your interests, skills, and career goals with the challenges of advanced academic study in design, while also acknowledging the range of opportunities for interdisciplinary research at the Illinois. The program is international in scope, emphasizing the development of design solutions that are human-centered and culturally responsive.

The three-year MFA is recognized as a terminal qualification in design, which enables you to teach Industrial Design at the university level. The MFA program includes opportunities to assist faculty and to teach courses to undergraduate students. It also acts as preparation for advanced research degrees. Because the MFA in ID incorporates a teaching practice component, securing funding through Teaching Assistant appointments is an essential aspect of pursuing the MFA in ID.

By contrast, the two-year MDes (http://catalog.illinois.edu/graduate/faa/industrial-design-mdes/) program is an advanced professional qualification suited to developing your future design career in practice. First year content of both programs is broadly similar, and students in both programs enroll in some of the same classes and studios. However, there are no funding opportunities for students in the two-year MDes (http://catalog.illinois.edu/graduate/faa/industrial-design-mdes/) program.

Both study options are available to those with undergraduate degrees in Industrial Design or a relevant discipline (e.g., Graphic Design, Architecture, Engineering, or Business), and ideally, those with appropriate professional experience.

Individuals interested in pursuing a career in design who lack prior design education and/or relevant professional experience should consider the Graduate Certificate in Advanced Design Thinking (p. 2067). This certificate program provides an introduction to Design Thinking. It offers graduate credits that can be applied towards the MFA or MDES degree.

Admission

Applications are considered for Fall Semester admissions only. International applicants or applicants who are not native English speakers must meet the University of Illinois Graduate College English Proficiency for Teaching Assistants requirements (https://grad.illinois.edu/admissions/application-instructions/additional-instructions-international-applicants/) for admission to the MFA in ID degree program.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for MFA and doctoral students.

Facilities and Resources

Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant's grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

for the degree of Master of Fine Arts in Art and Design, Industrial Design Concentration

---

The ID Graduate Coordinator will advise you from the outset to develop a plan of study including elective and seminar courses.

You must register for at least 12 hours of credit each semester to maintain full-time student status (particularly important for visa status). Requests for part-time status must be made before the semester needed by contacting the School Graduate office. The two-year program averages out as 16 credits a semester to make up 64 credits required for graduation. The three-year program involves study for 12 credits for five of the semesters, including a 300/400 level Design Elective with credits not counting toward the degree, and only 8 credits for Thesis completion in the final semester.

For additional details and requirements refer to the department's graduate studies requirements and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours

for the degree of Master of Fine Arts in Art and Design, Industrial Design Concentration

---

At the end of the program, students will be able to:

1. **Inquiry and insight**: Select and use appropriate research and experimental methods, to access existing data or to generate new data, to analyze and draw insights, with a particular emphasis on user needs.
2. **Ideation**: Produce creative proposals to identified design opportunities, using design thinking, modelling, and prototyping strategies, with an appropriate integration of functional, technical, ergonomic and visual factors.
3. **Implementation**: Select and use appropriate making and manufacturing processes with an understanding of the potential of new technologies, and the demands of sustainability.
4. **Informing**: Use visual and verbal communication, to explain and persuade, as appropriate for different audiences.
5. **Self development**: Carry out independent learning and reflexive evaluation of your work, as well as to plan and implement action, individually or in teams, effectively managing self and others.
6. **Contextualization**: Locate your own activity within the multiple contexts of design practice, including the theoretical, professional, cultural, environmental and technological contexts.

Student Learning Outcomes

1. Demonstrate a practical and theoretical understanding of contemporary art and related practices.
2. Articulate studio and conceptual concerns orally and in writing that makes critical connections between individual works and practices and the larger contexts that inform them.
3. Produce and exhibit a comprehensive body of artwork that demonstrates conceptual rigor and appropriate technical skill.
4. Demonstrate the intention, motivation and skills required to pursue and sustain a career as an artist.
5. Acquire practical pedagogical and technical skills necessary for employment in the field.

Art Education, EdM

for the degree of Master of Education in Art Education

The program of study leading to the degree of Master of Education (EdM) in Art Education is designed to provide advanced level study for students of two main kinds. It serves as professional development for art teachers and supervisors in the public schools and as preparation for those interested in a variety of careers in art education in contexts such as schools, museums, community arts, arts advocacy, or arts policy.

In addition to required courses in art education, students may choose electives in studio art, art education, art history, and other graduate courses offered by the university that complement their studies or professional aspirations. Specific course selection is determined in consultation with the student's advisor. Students may simultaneously study for teaching certification, but graduate credit is not usually granted for such study. A thesis is not required for the EdM degree.

Applicants for admission must hold a bachelor's degree in art education or a related field from an accredited institution. Admission is determined by a review of transcripts, letters of recommendation, resume, personal statement, and a writing sample.

Admission

Applications are considered for Fall Semester admissions only.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Art Education, PhD

for the degree of Doctor of Philosophy in Art Education

The PhD program in art education is designed for advanced graduate students who want to pursue scholarly study and research in art education. Doctoral level coursework includes studies in both art education and in other relevant disciplines and departments within the university.

In addition to required courses in art education, students may choose electives in studio art, art education, art history, and any graduate courses offered by the university that complement their studies or professional aspirations. Doctoral students will also complete a graduate minor as part of their studies. Specific course selection is determined in consultation with the student's advisor. A dissertation is required for the PhD degree.

Applicants for admission must hold a master's degree in art education or a related field from an accredited institution. Admission is determined by review of transcripts, letters of recommendation, resume, personal statement, and a writing sample.

Admission

Applications are considered for Fall semester admissions only.

Graduate College Admissions Requirements (https://grad.illinois.edu/admissions/apply/)

Art History, MA

for the degree of Master of Arts in Art History

This program provides basic preparation for teaching at the college level, background in the history of art for museum work, and preliminary study for the doctoral degree. In addition to the general requirements, the prerequisite for admission is ordinarily an undergraduate degree in art history or a strong preparation in related humanistic studies. Applicants with little background in art history but who have done exceptionally well as undergraduates in other disciplines will be seriously considered. A thesis or scholarly essay is required for completion of the degree.

Admission

Applications are considered for Fall Semester admissions only. Submitting GRE test scores is currently optional. International applicants need to submit a recent English Proficiency test score of 96 (TOEFL) or 6.5 (IELTS), or an exemption, for admissions.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources

Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant's grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

for the degree of Master of Arts in Art History

for the degree of Master of Arts in Art History

1. Students will be able to demonstrate familiarity with key artistic monuments and modes of art production from various global contexts.
2. Students will be able to analyze and interpret works of art and architecture situated in a variety of historical and social contexts, and in comparative perspective.
3. Students will be able to use visual and verbal primary sources, secondary sources, and core critical frameworks of art historical analysis to develop and articulate persuasive arguments about works of art and the cultures that produced them.
4. Students will be able to engage in art historical writing at the level of an emerging professional scholar. This involves the critical application of standard art historical methods and marshaling visual and textual evidence to support interpretive claims.

Graduate College Admissions Requirements (https://grad.illinois.edu/admissions/apply/)

Art History, PhD

for the degree of Doctor of Philosophy in Art History

The program leading to the degree of Doctor of Philosophy in Art History is designed to prepare students for scholarship and for teaching at the college level. Applicants must have the Master of Arts in Art History. Students earning the master's degree at Illinois must write a thesis or research paper of superior quality in order to be admitted to the doctoral program. Students taking the master's degree elsewhere must satisfy the Graduate Committee on the History of Art and Architecture as to their preparation to undertake work on a doctoral level. Students usually elect to major and write a dissertation in one of various fields:

- Classical
- Medieval
- Renaissance
- History of Photography
- American
- Baroque
- Modern
- Contemporary
- African
- Asian or Latin American

Admission

Applications are considered for Fall Semester admissions only. Submitting GRE test scores is currently optional. International applicants need to submit a recent English Proficiency test score of 96 (TOEFL) or 6.5 (IELTS), or an exemption, for admissions.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience for master and doctoral students.

Facilities and Resources

Resources for graduate students in art and design include the Krannert Art Museum's excellent permanent collections and changing exhibitions; the Ricker Library of Art and Architecture, one of the largest art and architecture libraries in the nation; the Krannert Center for the Performing Arts; School of Art and Design facilities, which include extensive computer laboratories, digital photography and video editing equipment, wireless networking, ink-printing facilities, ceramic, woodworking, and metal shops, rapid prototyping and laser cutting, black/white and color darkrooms, shooting studios, and a wide selection of production and presentation equipment via reservation and checkout facility. A variety of lectures, symposia, musical programs, dramatic productions, and other cultural events associated with a large and progressive university complement the Art and Design Facilities.

Financial Aid

Fellowships, assistantships, and tuition and service fee waivers are awarded each year on a competitive basis, with consideration given to the applicant's grade point average and, in the case of applicants for the M.F.A. programs, quality of creative work.

Graduate College Admissions Requirements (https://grad.illinois.edu/admissions/apply/)

Astronomy, MS

for the degree of Master of Science in Astronomy

The Department of Astronomy offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The goal of the graduate program in astronomy is to provide broadly based training in modern astrophysics and astronomy. Individually designed programs involving close contact with faculty members are encouraged, and an understanding of fundamental principles and techniques and their applications to research problems of current interest is emphasized. Students are expected to acquire a solid knowledge of astrophysical theory and astronomical methods. A major objective is to maintain an exciting intellectual environment in which students can develop their scientific creativity and their enthusiasm for astronomy.

Admission

Admission to the astronomy graduate program requires an outstanding record of accomplishment and clear evidence of considerable academic promise, as judged by undergraduate transcripts, resume (or c.v.), letters of recommendation, personal statement, and strong intellectual achievements. A bachelor's degree or its equivalent in astronomy, physics, chemistry, mathematics, or another related technical field from an accredited college or university in the U.S. or an approved institution of higher learning abroad is required for admission.

A minimum grade point average of 3.0 (A = 4.0) is required for admission. Course preparation in intermediate and advanced undergraduate physics and astronomy are essential. Students are expected to make up deficiencies during the first graduate year.

All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency, as required by Graduate College policy. More information on the English Proficiency Requirement can be found at the Graduate College Admissions website (http://www.grad.illinois.edu/admissions/instructions/04c/).

Admission decisions are normally made once a year in the spring. Applications for admission and financial assistance must be received by January 15. In rare circumstances, applicants may be admitted for the spring semester, in addition to the customary fall semester admissions.

See the Astronomy graduate admissions website (https://astro.illinois.edu/admissions/graduate-applications-and-admissions/) for more information and application materials.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Research activity in the Department of Astronomy includes observational and theoretical investigations across a vast range of size scales and spanning the full history of the universe. Use of emerging techniques including time-domain and multi-messenger astronomy and machine learning are strongly encouraged. Research areas include:

- Early-universe cosmology and the large-scale structure of the universe, including the cosmic microwave background, galaxy formation, and galaxy clusters;
- Extragalactic astronomy, including galaxy structure and evolution, active galaxies, supermassive black holes, and the regulation and quenching of star formation;
- Theory and observations of the interstellar medium, including molecular clouds, HII regions, and the role of magnetic fields in star formation;
- Star formation and stellar evolution, including protoplanetary disks, binary systems, supernovae, and nucleosynthesis;
- Exoplanetary systems and their evolution; and
- Compact objects (black holes, neutron stars, white dwarfs) and gravitational wave sources.

In addition, faculty in the Department of Astronomy and the Department of Physics have long-standing expertise in modeling relativistic systems, and faculty in the Physics Department can supervise student research.

Facilities and Resources

- Sloan Digital Sky Survey V
- South Pole Telescope
- Subaru Prime Focus Spectrograph
- Astronomy students and faculty successfully compete for time on national facilities. These include ground-based telescopes of the National Radio Astronomy Observatory, such as the Atacama Large Millimeter Telescope and the Very Large Array, and the National Optical Astronomy

Observatory telescopes. Illinois research involves many space-based telescopes, including the Hubble and Webb Space Telescopes and the Chandra X-ray Observatory.

- A number of projects in the Department of Astronomy partner with the National Center for Supercomputing Applications (NCSA) at Illinois. Such projects often require high-performance computing or leverage NCSA's pioneering development of cyberinfrastructure environments.
- Faculty from NCSA, and Astronomy and Physics Departments are also involved in the Center for Astrophysical Surveys (CAPS), applying novel algorithms to the rich large datasets from several major projects including the Sloan Digital Sky Survey (SDSS), the Dark Energy Survey(DES), the Young Supernova Experiment (YSE), the Laser Interferometric Gravitational Wave Observatory (LIGO), the Vera Rubin Observatory (VRO), and the South Pole Telescope (SPT).

Financial Aid

University fellowships are available and may be combined with part-time teaching assistantships. Most students are supported by half-time teaching or research assistantships. More information is available from the Astronomy Department website (https://astro.illinois.edu/admissions/graduate/financial-aid/).

for the degree of Master of Science in Astronomy

Research/Project/Independent Study Hours (e.g. ASTR 590; 4 min/8 max applied toward degree.) Students complete a research project with an Astronomy Department faculty member. A paper reporting the results is required, which must be prepared in scientific journal style and approved by the faculty member.		4-8
Demonstrated Proficiency in Astronomy: A maximum of 8 hours of these courses may be applied to the degree (See details below.)		8
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Demonstrated Proficiency in Astronomy: Students must show proficiency in ASTR 404, ASTR 405, ASTR 406 and ASTR 414 by one of the following options:	
-Pass the appropriate section of the placement exam (four sections aligned to the four courses), which is offered at the start of every Fall semester. A student can petition to take the exam once more the following year. The decision on petition approval by the graduate advisor will depend on the student's background and proficiency plan.	
-Pass the course with a B grade or better.	
-Students who have had an equivalent course at another institution (B grade or better) may petition for those courses to count as proficiency.	
Of the additional formal coursework, the minimum number of hours in the unit (excluding thesis research, non-thesis research, and independent study credit hours)	8
Of the additional formal coursework, the minimum number of 500-level hours (excluding thesis research, non-thesis research, and independent study credit hours)	4
Minimum GPA:	3.0

for the degree of Master of Science in Astronomy

---

1. Infer and characterize the physical mechanisms that govern the observable properties of the Universe and its constituents, including galaxies, stars, and planets, as well as the changes in those properties over time.
2. Understand how the observational, statistical, and computational methods of modern astronomy are used to generate the scientific knowledge referred to in LO1.
3. Plan and perform original research in astronomy and astrophysics.
4. Effectively communicate astronomy knowledge and research results in both oral and written form to a variety of audiences.
5. Demonstrate the ability to formulate and write a research proposal.

Atmospheric Sciences, MS

for the Master of Science in Atmospheric Sciences

Graduate programs leading to the Master of Science and Doctor of Philosophy degrees are offered. Opportunity also exists for specializing in computational science and engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option.

Admission

Applications for admission are encouraged from students with bachelor's degrees in atmospheric sciences, meteorology, physics, mathematics, computer science, geography, engineering, oceanography, and related fields. It is strongly recommended that students who intend to study for advanced degrees in atmospheric sciences know the fundamentals of classical physics and applied mathematics. Applicants whose native language is not English are required to take the English Placement Test if accepted. All applicants are required to submit three letters of reference.

Faculty Research Interests

The atmospheric science degree programs are designed for students interested in research and applications on a wide variety of atmospheric topics. Faculty areas of research include atmospheric chemistry and aerosols; climate modeling, processes, change, and assessments; cloud physics and radiative processes; convective-storm dynamics and modeling; extratropical cyclones and winter storms; precipitation and hydrometeorological processes; satellite and radar remote sensing; tropical meteorology and hurricanes; and weather and climate risk. This research is carried out in national field campaigns, in theoretical studies, and in numerical modeling efforts using a wide range of models.

Research Facilities

The Department maintains an extensive computing infrastructure, which is a vital component of all of its educational, research and outreach endeavors. A Departmental computer lab is available for hands-on class exercises. Computers and display projectors are provided in classroom areas, and wireless access exists throughout the buildings. The Department hosts a synoptic/GIS laboratory, a data visualization laboratory, and an instruments lab all within the Natural History Building. A high-capacity network connects these to various computing resources on campus as well as within the Department.

The cornerstone of the Department's research computing capabilities is the compute cluster *Keeling,* which currently is composed of several thousand CPU cores and TB of storage. *Keeling* allows for numerical simulation and analysis of atmospheric processes ranging from the formation of individual ice crystals to century long climate simulations over the globe and are used for storing, analyzing and visualizing the results. Our faculty research groups regularly take advantage of high-performance computing resources, including the Blue Waters Petascale computing facility, and the NCAR Supercomputing facility.

We receive and process a large quantity of real-time meteorological data and numerical forecasts from a variety of sources including NOAA, UCAR, peer institutions, and international vendors. These are analyzed and visualized with a variety of tools to aid in the understanding of current weather events and case studies of recent major events.

Finally, the Department has numerous capabilities for meteorological observations and measurement in teaching and research. This includes three Doppler on Wheels (DOW) mobile radars, one C-band on Wheels (COW) deployable radar, and three "mobile mesonet" vehicles. Additionally, we have: a QuantAQ system, used to collect data on air quality; two iMET mobile sounding systems; a trailer-mounted, 915 MHz radar wind profiler, manufactured by Radiometrics; and SCAMP (System for Characterizing and Measuring Precipitation (SCAMP), which is designed to quantitatively characterize the vertical profile of precipitation particles, measure the particle size distributions and surface precipitation, and also document the scavenging of air particulates by the falling precipitation. SCAMP includes a Micro Rain Radar, an OTT Parsivel Optical Disdrometer, an MPS Particle Spectrometer, a Geonor T-200B Precipitation Gauge, a TSI Optical Particle Sizer, and a Lufft Ultrasonic Weather Station. All of these instruments can be mounted on a flatbed trailer, and transported by the Department's Ford Cargo Van.

1. All graduate students will have a fundamental understanding of the core theoretical underpinnings of atmospheric sciences.
2. All graduate students will have a high level of expertise in their chosen research field within the atmospheric and related sciences, and the ability to apply theoretical and technical skills to novel and long-standing problems relevant to society.
3. All graduate students will have the ability to formulate a research problem, demonstrate the value of its solution in advancing knowledge, and develop an approach towards solving that problem.
4. All graduate students will have ethically responsible and effective communication skills, written and verbal, at a professional scientific level.
5. All graduate students will have knowledge of the frontiers in atmospheric science research.

Admission

Applications for admission are encouraged from students with bachelor's degrees in atmospheric sciences, meteorology, physics, mathematics, computer science, geography, engineering, oceanography, and related fields. It is strongly recommended that students who intend to study for advanced degrees in atmospheric sciences know the fundamentals of classical physics and applied mathematics. Applicants whose native language is not English are required to take the English Placement Test if accepted. All applicants are required to submit three letters of reference.

Faculty Research Interests

The atmospheric science degree programs are designed for students interested in research and applications on a wide variety of atmospheric topics. Faculty areas of research include atmospheric chemistry and aerosols; climate modeling, processes, change, and assessments; cloud physics and radiative processes; convective-storm dynamics and modeling; extratropical cyclones and winter storms; precipitation and hydrometeorological processes; satellite and radar remote sensing; tropical meteorology and hurricanes; and weather and climate risk. This research is carried out in national field campaigns, in theoretical studies, and in numerical modeling efforts using a wide range of models.

Research Facilities

The Department maintains an extensive computing infrastructure, which is a vital component of all of its educational, research and outreach endeavors. A Departmental computer lab is available for hands-on class exercises. Computers and display projectors are provided in classroom areas, and wireless access exists throughout the buildings. The Department hosts a synoptic/GIS laboratory, a data visualization laboratory, and an instruments lab all within the Natural History Building. A high-capacity network connects these to various computing resources on campus as well as within the Department.

The cornerstone of the Department's research computing capabilities is the compute cluster *Keeling,* which currently is composed of several thousand CPU cores and TB of storage. *Keeling* allows for numerical simulation and analysis of atmospheric processes ranging from the formation of individual ice crystals to century long climate simulations over the globe and are used for storing, analyzing and visualizing the results. Our faculty research groups regularly take advantage of high-performance computing resources, including the Blue Waters Petascale computing facility, and the NCAR Supercomputing facility.

We receive and process a large quantity of real-time meteorological data and numerical forecasts from a variety of sources including NOAA, UCAR, peer institutions, and international vendors. These are analyzed and visualized with a variety of tools to aid in the understanding of current weather events and case studies of recent major events.

Finally, the Department has numerous capabilities for meteorological observations and measurement in teaching and research. These include: a QuantAQ system, used to collect data on air quality; two iMET mobile sounding systems; a trailer-mounted, 915 MHz radar wind profiler, manufactured by Radiometrics; and SCAMP (System for Characterizing and Measuring Precipitation (SCAMP), which is designed to quantitatively characterize the vertical profile of precipitation particles, measure the particle size distributions and surface precipitation, and also document the scavenging of air particulates by the falling precipitation. SCAMP includes a Micro Rain Radar, an OTT Parsivel Optical Disdrometer, an MPS Particle Spectrometer, a Geonor T-200B Precipitation Gauge, a TSI Optical Particle Sizer, and a Lufft Ultrasonic Weather Station. All of these instruments can be mounted on a flatbed trailer, and transported by the Department's Ford Cargo Van.

Financial Aid

More information is available on the Department Website (https://atmos.illinois.edu/admissions/graduate/graduate-financial-aid/).

for the Doctor of Philosophy in Atmospheric Sciences

For additional details and requirements refer to the department's Graduate Programs (https://www.atmos.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Atmospheric Sciences, PhD

Entering with approved B.S. (Direct to Ph.D.)

Code	Title	Hours
Students are required to take 5 of the 6 courses listed below:		**20**
ATMS 420	Atmospheric Chemistry	
ATMS 500	Dynamic Meteorology	
ATMS 505	Weather Systems	
ATMS 507	Climate Dynamics	
ATMS 510	Precipitation Physics	
ATMS 511	Atmospheric Radiation	
ATMS 599	Thesis Research	16
Additional approved graduate level courses (excluding ATMS 599)		28
Additional approved graduate level courses (including ATMS 599)		32
Total Hours		96

Entering with an approved M.S. degree

Code	Title	Hours
Stage I Equivalent (32 Hours) Satisfied by previous Masters degree (from either within the ATMS department or an approved MS from outside the ATMS department)		
Core courses (or equivalents) required if not completed during their M.S. degree:		0-24
ATMS 420	Atmospheric Chemistry	
ATMS 500	Dynamic Meteorology	
ATMS 505	Weather Systems	
ATMS 507	Climate Dynamics	
ATMS 510	Precipitation Physics	
ATMS 511	Atmospheric Radiation	
ATMS 599	Thesis Research	16
Additional approved graduate level courses (excluding ATMS 599)		24
Additional approved graduate level courses (including ATMS 599)		24
Total Hours		**64-88**

Graduate Other Degree Requirements

Requirement	Description
Other requirements may overlap	
Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

for the Doctor of Philosophy in Atmospheric Sciences

1. All graduate students will have a fundamental understanding of the core theoretical underpinnings of atmospheric sciences.
2. All graduate students will have a high level of expertise in their chosen research field within the atmospheric and related sciences, and the ability to apply theoretical and technical skills to novel and long-standing problems relevant to society.
3. All graduate students will have the ability to formulate a research problem, demonstrate the value of its solution in advancing knowledge, and develop an approach towards solving that problem.
4. All graduate students will have ethically responsible and effective communication skills, written and verbal, at a professional scientific level.
5. All graduate students will have knowledge of the frontiers in atmospheric science research.

Biochemistry, MS

for the Master of Science in Biochemistry

The Department of Biochemistry does not admit students to the Biochemistry MS degree program. Admission to graduate study is only through the PhD degree program. Information about the Biochemistry PhD program can be found here (p. 1166).

The Department of Biochemistry offers graduate programs leading to the Doctor of Philosophy degree. For an application and departmental materials that provide greater detail on programs, offerings, admission, degree requirements, and financial aid, visit our website (https://mcb.illinois.edu/academics/phd-programs/). The Department of Biochemistry is a part of the School of Molecular and Cellular Biology (MCB), which also includes the Departments of Cell and Developmental Biology, Microbiology, Molecular and Integrative Physiology, as well as Programs in Biophysics and Neuroscience. The Department is part of an umbrella program in MCB that encompasses over 70 different research laboratories. Students admitted into any of these departmental graduate programs can select faculty thesis advisors from these active research laboratories in the School. Close ties are also maintained with the School of Integrative Biology, the School of Chemical Sciences, the College of Medicine, and the College of Veterinary Medicine.

Admission

Applicants interested in the Biochemistry, PhD program will need to apply directly to the School of Molecular and Cellular Biology (MCB) PhD program (https://mcb.illinois.edu/academics/phd-programs/apply-our-mcb-phd-program/). The MCB PhD program is an umbrella program that requires admitted students to spend their first semester rotating among three different labs to explore their interests before joining one of our four departments.

MCB Admission requirements include a bachelor's degree in biological or physical sciences, a grade point average of a 3.0 or higher (A = 4.0), prior research experience and three letters of recommendation from individuals who can attest to the applicant's academic and research background. The Graduate Record Examination (GRE) is **not** required. Applicants interested in pursuing a PhD in Biochemistry should have a strong background in chemistry, biology, physics, and calculus. **In addition to these requirements, non-native English-speaking applicants must attain a minimum Test of English as a Foreign Language (TOEFL) overall score of 96, with at least a score of 22 on the speaking section**. MCB does **not** accept the International English Language Testing System (IELTS) to show English proficiency. Graduate College requirements also apply.

for the Master of Science in Biochemistry

The Department of Biochemistry does not admit students to the Biochemistry MS degree program. Admission to graduate study is only through the PhD degree program. Information about the Biochemistry PhD program can be found here (p. 1166).

For additional details and requirements refer to the department's Graduate Student Handbook (https://mcb.illinois.edu/academics/phd-programs/) and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

Minimum GPA:	3.0

for the Master of Science in Biochemistry

At the conclusion of the degree program students will be able to:

1. Develop and demonstrate an in-depth knowledge of a specific area of biochemical research, which may include (but is not limited to) protein, nucleic acid and/or membrane biochemistry, cancer and molecular immunology, computational and quantitative biology, etc.
2. Demonstrate independent and critical skills necessary to formulate specific experiments aimed at understanding molecular processes.
3. Gain the necessary experience and skills to train others in the performance of experiments.
4. Develop communication skills suitable to discuss scientific outcomes at a level for the layperson to understand but critical enough for peers. Typically, such training is developed through writing and editing scientific manuscripts, with input from a faculty advisor.
5. Deliver effective oral and written presentations of the results and conclusions of experimental work.
6. Be able to ask and answer questions within the research areas of Biochemistry.
7. Develop skills and abilities for effective teaching of Biochemistry in a course room setting.
8. Develop the skills and intellectual background to succeed at postdoctoral work in academics or in the commercial sector.
9. Demonstrate ethical conduct within the research process and the responsibilities of the scientist.

MCB does **not** accept the International English Language Testing System (IELTS) to show English proficiency. Graduate College requirements also apply.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Centers, Programs, and Institutes

Biochemistry faculty are appointed and active in several cross-campus academic and research units, including the Center for Biophysics & Computational Biology, the Beckman Institute for Advanced Science and Technology, the Institute for Genomic Biology, as well as the interdepartmental graduate programs in Biophysics & Computational Biology, and Neuroscience.

Faculty Research Interests

Faculty research in the Department of Biochemistry covers a broad spectrum of the most dynamic areas of current research in biological chemistry and molecular biology: physical approaches to the structure and function of macromolecules and membranes; nucleic acid biochemistry and enzymology, enzyme mechanisms and evolution; membrane biochemistry and bioenergetics; protein-lipid interactions; protein-nucleic acid interactions and molecular recognition; molecular biological approaches to gene organization and expression; immunology; microbial physiology, and signal transduction.

Facilities and Resources

Campus resources for science research are state-of-the-art and available to all faculty research programs. Notably among these is the Roy J. Carver Biotechnology Center, which comprises the W.M. Keck Center for Comparative and Functional Genomics (Custom Library Services, High-Throughput Sequencing and Genotyping, DNA Core Sequencing, Fragment Analysis, Oligonucleotide Synthesis, Functional Genomics and Bioinformatics), Proteomics Services (Protein Science Facility, Immunological Resource Center, SPR and Flow Cytometry Facility), a Metabolomics Center and a Transgenic Mouse Facility. Additional resources include a Titan Glacios CryoEM instrument housed in the Materials Research Laboratory.

Financial Aid

Financial aid for Ph.D. graduate students in biochemistry is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. In addition, interdepartmental training grants from the National Institutes of Health support multidisciplinary training programs. Qualified candidates are considered for financial support upon application.

for the Doctor of Philosophy in Biochemistry

For additional details and requirements refer to the department's Graduate Program Handbook (https://mcb.illinois.edu/media/1092/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Biochemistry, PhD

Code	Title	Hours
Biochemistry/MCB core courses and advanced elective courses		32
BIOC 599	Thesis Research (min/max applied toward degree)	64
Total Hours		**96**

Other Requirements

Requirement	Description
Other requirements may overlap	
A minimum of one semester at 50% FTE or two semesters of 25% FTE of teaching in lecture or laboratory courses is required.	
A thesis based on original research must be presented to a review committee at least two weeks before the final oral examination.	
Masters Degree Required Before Admission to PhD?	No, but Masters level requirements must be met (32 hours)
Preliminary Exam Required	Yes, administered by the end of the second year.
Final Exam/Dissertation Defense Required	Yes, and the final examination is limited to a defense of the thesis research.
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

for the Doctor of Philosophy in Biochemistry

The Biochemistry Department has the following expectations and goals for graduates of its Ph.D. degree program: Many basic outcomes from Standards for the Ph.D. Degree in Biochemistry and Molecular Biology. Recommendations of the Education Committee of the International Union of Biochemistry. TIBS(1989)14:205-209.

At the conclusion of the degree program students will be able to:

1. Develop and demonstrate an in-depth knowledge of a specific area of biochemical research, which may include (but is not limited to) protein, nucleic acid and/or membrane biochemistry, cancer and molecular immunology, computational and quantitative biology, etc.
2. Demonstrate independent and critical skills necessary to formulate specific experiments aimed at understanding molecular processes.
3. Gain the necessary experience and skills to train others in the performance of experiments.
4. Develop communication skills suitable to discuss scientific outcomes at a level for the layperson to understand but critical enough for peers. Typically, such training is developed through writing and editing scientific manuscripts, with input from a faculty advisor.

Bioengineering, MEng

for the degree of Master of Engineering in Bioengineering (on campus & online)

The MEng in Bioengineering is a professionally-oriented degree designed to bridge the skills gap by developing students with advanced technical know-how, a better understanding of the medical healthcare industry and more business acumen through coursework and project work, which provides students exposure to real world industry issues.

Students pursuing this major must select one of two concentrations:

- Bioinstrumentation (p. 1170)
- General Bioengineering (p. 1172)

Department Research

Bioengineering faculty perform research in the areas of Bio-Imaging at Multi-Scale; Molecular, Cellular and Tissue Engineering; Bio-Micro and Nanotechnology; Computational and Systems Bioengineering; and Synthetic Bioengineering. MEng students are able to do independent study research projects with Bioengineering faculty and affiliate faculty (https://bioengineering.illinois.edu/directory/) for class credit.

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioengineering (MEng), the Master of Science in Bioengineering (MS), the Master of Science in Biomedical Image Computing (MS in BIC), and the Doctor of Philosophy (PhD) in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. For the MS and PhD programs, areas of focus include Bio-imaging, Cell & Tissue Engineering, Micro and Molecular Technologies, and Computational Biology.

for the degree of Master of Engineering in Bioengineering (on campus & online)

Students pursuing this major must select one of two concentrations:

- Bioinstrumentation (p. 1170)
- General Bioengineering (p. 1172)

For additional details and requirements for all degrees, please refer to the department's Graduate Studies website (https://bioengineering.illinois.edu/academics/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

for the degree of Master of Engineering in Bioengineering (on campus & online)

By the end of the program, students will be able to:

1. Apply quantitative skills and engineering principles to propose novel and practical solutions to medical/human health problems.
2. Foster collaboration with a diverse team.
3. Demonstrate a basic understanding of business operations, financial decision-making, intellectual property, and regulatory matters.
4. Employ the highest standards of academic, professional, and ethical responsibility from conscientious design to research and development processes and ethical decision-making processes.
5. Effectively communicate (both orally and in writing) real-world scientific problems with a bigger vision and offer solutions, as well as their impact, to a diverse audience and stakeholders.
6. Demonstrate mastery of the design process including defining the problem and implementing the solutions, while taking into consideration the needs of the user demographic at the core of concept development.
7. Explore factors of innovation and commercialization possibilities of solutions.
8. Develop practical client and project management skills, as well as effective leadership and other professional skills.

for the degree of Master of Engineering in Bioengineering (on campus & online)

Admission Requirements

Students must select one of the concentrations under the MEng in Bioengineering program to apply to and will not be able to complete multiple concentrations. Students should have an undergraduate degree in an engineering or a science related field or must have taken engineering or science related coursework. Applicants should have a minimum grade point average of 3.00 (A = 4.00) or equivalent for the last two years of undergraduate study and show evidence of strong quantitative skills and of serious interest in the life sciences through their personal statement. Students with less than a 3.0 GPA may be considered for a limited status admission. Students in the program do not have automatic admission to the PhD program in any engineering department.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English (http://www.ielts.org/) Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) for English proficiency are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/)are met. Applicants with lesser scores may still apply. Limited status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (https://linguistics.illinois.edu/languages/english-second-language/) based on an ESL Placement Test (EPT) taken upon arrival to campus.

For additional application information, view our Application Information (https://bioengineering.illinois.edu/admissions/graduate/meng/).

Financial Aid

For tuition information and external funding resources, please visit the program's tuition and fees website (https://registrar.illinois.edu/tuition-fees/tuition-fee-rates/), specifically the tuition for "MENG Bioengineering". Students in the MEng in Bioengineering program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois Urbana-Champaign.

Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) for English proficiency are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/)are met. Applicants with lesser scores may still apply. Limited status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (https://linguistics.illinois.edu/languages/english-second-language/) based on an ESL Placement Test (EPT) taken upon arrival to campus.

For additional application information, view our Application Information here (https://bioengineering.illinois.edu/admissions/graduate/meng/).

Financial Aid

For tuition information and external funding resources, please visit the program's tuition and fees website (https://registrar.illinois.edu/tuition-fees/tuition-fee-rates/), specifically the tuition for "MENG Bioengineering". Students in the MEng in Bioengineering program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois Urbana-Champaign.

Bioengineering, MS

for the degree of Master of Science in Bioengineering

The Department of Bioengineering offers both an MS with thesis and an MS non-thesis program. Students in the MS with thesis program are required to have a research advisor and competitive applicants are encouraged to review the research websites and publications of those bioengineering graduate program faculty (https://bioengineering.illinois.edu/people/faculty/grad-program/) they are most interested in working with.

Department Research

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioengineering (MEng), the Master of Science in Bioengineering (MS), Master of Science in Biomedical Image Computing (MS in BIC), and the Doctor of Philosophy (PhD) in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. For the MS and PhD programs, areas of focus include Bio-Imaging at Multi-Scale, Bio-Micro and Nanotechnology, Computational and Systems Bioengineering, Molecular, Cellular and Tissue Engineering, Neural Engineering, Research in BME Education and Synthetic Bioengineering. In addition to Bioengineering faculty, the Department of Bioengineering has more than 50 affiliate faculty (https://bioengineering.illinois.edu/people/faculty/grad-program/).

for the degree of Master of Science in Bioengineering

For additional details and requirements for all degrees, please refer to the department's Graduate Studies website (http://bioengineering.illinois.edu/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Minimum GPA:	3.0
A minimum of 12 hours of 500 level coursework is required	12

for the degree of Master of Science in Bioengineering

Thesis Option

1. Ability to apply **quantitative skills and engineering principles** to propose novel and practical solutions to medical/human health problems.
2. Understanding of **professional and ethical responsibilities.**
3. Ability to **communicate** scientific problems and solutions, as well as their impact, effectively to a diverse audience and stakeholders, both orally and in writing.
4. Demonstrate moderate **technical** mastery in chosen research area, shown by the ability to identify an important scientific problem, formulate a hypothesis, and design experiments to conduct research and data analysis to test the hypothesis. The student should also be able to formulate alternatives.
5. Develop effective **leadership** skills in order to foster the ability to conduct **collaborative** research and work with a diverse team.

Non-Thesis Option

1. Ability to apply quantitative skills and engineering principles to propose novel and practical solutions to medical/human health problems.
2. Understanding of professional and ethical responsibilities.
3. Ability to communicate scientific problems and solutions, as well as their impact, effectively to a diverse audience and stakeholders, both orally and in writing.
4. Demonstrate moderate conceptual mastery in chosen research area, with the capability of expanding it into a future research project in preparation for an industry career or PhD degree.
5. Develop effective leadership skills in order to foster the ability to conduct collaborative research and work with a diverse team.

for the degree of Master of Science in Bioengineering

Admission Requirements

Applicants should have an undergraduate or graduate degree in a natural science, computer science, or engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. Applicants should show evidence of strong quantitative skills and of serious interest in the life sciences. GRE scores are optional.

Financial Aid

Qualified students may apply for financial aid in the form of fellowships, teaching and research assistantships, and waivers of tuition and service fees.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the TOEFL iBT or IELTS, a minimum score of 3 is required on the OEAI test, (https://linguistics.illinois.edu/testing/oral-english-assessment-interview-oeai-ita-certification-test/) offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/graduate-academy-college-teaching/) conducted prior to the start of the semester.

Bioengineering, PhD

for the degree of Doctor of Philosophy in Bioengineering

The Department of Bioengineering offers both a traditional doctoral program (for students with a previous master's degree) and a direct doctoral program (for students with only a bachelor's degree). Students in both programs are required to have a research advisor and competitive applicants are encouraged to review the research websites and publications of those bioengineering graduate program faculty (https://bioengineering.illinois.edu/people/faculty/grad-program/) they are most interested in working with.

Opportunity exists for specializing in i) computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration, and iv) data science and engineering via the Data Science & Engineering (p. 2008) optional graduate concentration.

Department Research

Bioengineering faculty perform research in the areas of Bioimaging at Multi-Scale; Bio-Micro and Nanotechnology; Computational and Systems Biology; Molecular, Cellular, and Tissue Engineering; Neural Engineering; Research in BME Education; and Synthetic Bioengineering. In addition to Bioengineering faculty, the Department of Bioengineering has more than 50 affiliate faculty (https://bioengineering.illinois.edu/people/faculty/grad-program/).

for the degree of Doctor of Philosophy in Bioengineering

For additional details and requirements for all degrees, please refer to the department's Graduate Studies website (http://bioengineering.illinois.edu/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Bioinformatics, MS

for the degree of Master of Science in Bioinformatics

Students pursing this major must choose one of these concentrations:

- Animal Sciences (p. 1182)
- Crop Sciences (p. 1187)
- Computer Science (p. 1184)
- Information Sciences (p. 1190)

The MS degree can be taken in a thesis or non-thesis format, depending on the department. For either format, the research adviser must be affiliated with the Bioinformatics program.

Admission

Applicants must hold a bachelor's degree equivalent to that granted by the University of Illinois Urbana-Champaign. The recommended background for graduate students entering the Bioinformatics degree program is a bachelor's or master's degree in life sciences, computer and mathematical sciences, or engineering, with a minimum of five hours of molecular and cell biology, six hours of general chemistry, nineteen hours of mathematics and statistics, and three hours of introduction to computing. Prerequisites vary somewhat for the different departmental concentrations. Students should view the web page of the specific department they wish to apply to for detailed information about admission criteria and degree requirements. Those links are below:

- Department of Animal Sciences (http://www.ansci.illinois.edu)
- Department of Computer Science (http://cs.illinois.edu)
- Department of Crop Sciences (http://www.cropsci.illinois.edu)
- School of Information Sciences (http://ischool.illinois.edu)

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis by the admitting department. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must submit minimum test scores (https://grad.illinois.edu/admissions/taengprof.htm) as determined by university policy.

Bioinformatics: Animal Sciences, MS

for the Master of Science in Bioinformatics, Animal Sciences Concentration

Research Areas

The Department of Animal Sciences offers graduate studies with a focus on bioinformatics, quantitative and computational biology, leading to the Master of Bioinformatics. Fields of bioinformatics application and specialization include:

- animal breeding, genetics, and bioinformatics
- animal behavior
- environmental, lactation, and reproductive physiology
- immunobiology
- meat science and muscle biology
- microbiology
- nutrition
- systems of animal management and production, precision management

Beef and dairy cattle, horses, poultry, sheep, swine, and companion and laboratory animals are available for study. Experience in teaching, extension, or outreach is encouraged as part of the academic work.

Admission

Candidates for admission to the M.Sc. in Bioinformatics program must have a bachelor's degree from an accredited institution equivalent to those from the University of Illinois Urbana-Champaign. A grade point average of 3.0 or higher (A = 4.0) for the last two years of undergraduate work and for any graduate study is required for admission. Candidates for admission who have a GPA between 2.75 and 2.99 can request special consideration of the application materials submitted. Graduate Record Examination (GRE) scores are not required for admission. English proficiency requirements for admission follow Graduate College requirements. Application materials include baccalaureate degree transcripts, a resume, a personal statement, and three letters of recommendation. Admission is possible for fall (mid-August), spring (mid-January), and summer (mid-June) semesters. Candidates for admission are encouraged to submit the complete application package no later than 2 months before the start of the desired admission semester.

for the Master of Science in Bioinformatics, Animal Sciences Concentration

For additional details and requirements refer to the department's Graduate Handbook (https://ansc.illinois.edu/academics/graduate-degrees/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Minimum GPA: 3.0

for the Master of Science in Bioinformatics, Animal Sciences Concentration

1. Graduate-level understanding of essential concepts and approaches in the area of bioinformatics with application to animal sciences. The essential bioinformatics concepts will enable the graduate to secure a mid-management position in industry or federal agencies or pursue Ph.D. studies and to advance throughout the professional ranks.
2. Capacity to execute supervised thesis research including:
   a. understanding of the scientific method, research objectives, materials and methods, advanced data analysis, and appreciation of the findings; and
   b. leadership on the implementation of essential research activities.
3. Ability to effectively communicate essential bioinformatics and animal sciences knowledge and thesis research findings in oral and written formats.
4. Aptitude to advocate for interdisciplinary research and education efforts to advance food security, food safety, animals and human health and wellbeing or environmental stewardship.

Bioinformatics: Computer Science, MS

for the degree of Master of Science in Bioinformatics, Computer Science Concentration

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program.

The MS in Bioinformatics, Computer Science Concentration is an interdisciplinary degree that can be counted toward the PhD in Computer Science.

Admission Requirements

Applicants must hold a bachelor's degree equivalent to that granted by the University of Illinois Urbana-Champaign. The recommended background for students entering a Computer Science graduate degree program is a bachelor's degree in computer science or computer engineering. The Graduate Record Examination (GRE) (http://www.ets.org/) general aptitude tests (Verbal, Quantitative, and Analytical) are no longer required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the Computer Science Concentration of the MS in Bioinformatics program must have a minimum grade point average (GPA) of 3.20 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department's Prospective Graduate Student Information website (http://cs.illinois.edu/admissions/graduate/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Research assistantships and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships (one of the most common forms of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS (academic exam). Students who are unable to take the TOEFL iBT or IELTS are required to receive a minimum score of 5 on the OEAI test (https://linguistics.illinois.edu/testing/oeai/), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

for the degree of Master of Science in Bioinformatics, Computer Science Concentration

---

The Computer Science concentration for the MS in Bioinformatics is an interdisciplinary degree that can be counted toward the Computer Science PhD.

For additional details and requirements refer to the department's Graduate Degree Requirements (http://cs.illinois.edu/academics/graduate/ms-bioinformatics-program/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Other Requirements and Conditions may overlap		
A minimum of 12 500-level credit hours overall.		

The minimum program GPA is 3.0

All degree requirements must be completed within five consecutive semesters (only fall and spring semesters are counted).

for the degree of Master of Science in Bioinformatics, Computer Science Concentration

1. Apply the essential concepts in algorithm design and analysis, and the ways in which those concepts impact bioinformatics.
2. Demonstrate the ability to read, analyze, discuss, and critique scientific advances and limitations described in the research literature.
3. Implement bioinformatics software tools and use these tools in biological data analysis.
4. Effectively and accurately communicate to an interdisciplinary audience in both oral and written formats.
5. Demonstrate an understanding of and ability to follow ethical standards in research and professional service.

Bioinformatics: Crop Sciences, MS

for the Master of Science in Bioinformatics, Crop Sciences Concentration

The genomic and proteomic projects are generating large amounts of complex biological data that require effective storage, retrieval, analysis and interpretation. The bioinformatics degree program provides students with the skills necessary to augment the understanding and use of agricultural, biological and medical information and resources through the application of molecular, chemical, physical, computational, statistical, mathematical and informatic techniques. Students interested in this program may come with undergraduate training in one of the following areas:

1. biological and agricultural sciences,
2. statistical, mathematical and computer sciences,
3. informatics and engineering sciences.

Graduates from the bioinformatics program will be able to integrate basic and applied concepts in the three areas and apply them to biotechnology and medical research. For additional information, please see our website (https://cropsciences.illinois.edu/academics/graduate-degrees/master-science-bioinformatics/).

Admission

Applicants are considered for admission to the Master of Science program if they have a bachelor's or equivalent degree comparable to that granted by the University of Illinois Urbana-Champaign. Strong letters of reference, evident motivation to undertake graduate study, and good preparation in basic science courses enhance an applicant's credentials. For some programs, greater emphasis is given to previous training in plant sciences, chemistry, or mathematics. A grade point average equivalent to at least a B in the last 60 semester hours of undergraduate course work plus any graduate level work completed is required. All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official scores are required to be submitted directly from TOEFL/ETS or IELTS to the University. Additional information for international applicants can be found online (https://grad.illinois.edu/admissions/apply/begin/international/). Please see our website for additional information (https://cropsciences.illinois.edu/graduate/admissions/). (https://cropsciences.illinois.edu/academics/graduate-degrees/master-science-bioinformatics/)

Graduate Teaching Experience

Experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Please refer to the following webpage for a detailed listing of our faculty and their areas of interest (https://cropsciences.illinois.edu/people/faculty/).

Financial Aid

Fellowships and assistantships are available to outstanding students on a competitive basis. Awards for financial assistance are based principally on a candidate's academic record, statement of plans, and letters of reference.

for the Master of Science in Bioinformatics, Crop Sciences Concentration

The Crop Sciences concentration within the M.S. degree in Bioinformatics can be earned with a thesis option or a non-thesis option, which requires optional supervised research experiences.

For additional details and requirements refer to the department's graduate handbook (https://cropsciences.illinois.edu/academics/graduate-degrees/graduate-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the Master of Science in Bioinformatics, Crop Sciences Concentration

Thesis

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of their particular disciplinary research area (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will assume responsibility and ownership in research project development and execution.
3. Students will acquire professional scientific writing and communication skills.
4. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
5. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

Non-Thesis

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of their particular disciplinary research area (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will acquire professional scientific writing and communication skills.
3. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
4. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

Bioinformatics: Information Sciences, MS

for the degree of Master of Science in Bioinformatics, Information Sciences Concentration

A typical student will take 6 required courses (24 hours) 1 Biology, 1 Computer Science, 1 Fundamental Bioinformatics, and 3 Information Sciences. The student must then choose 3 courses (12 hours) of electives to complete the degree. It is strongly encouraged that up to 2 courses of these electives (8 hours) are thesis. Our expectation is that each student will arrange a custom program of study, suitable for the information management of their particular biological informatics application. Currently, this program requires students to be in residence in Champaign-Urbana.

The School of Information Sciences (iSchool) offers programs of study leading to the Master of Science (M.S.), the Certificate of Advanced Study (C.A.S), and the Doctor of Philosophy degrees. Three Master of Science (M.S.) degrees are available. The M.S. in Library and Information Science (L.I.S.) prepares students for professional careers in all types of information organizations, including libraries. The M.S. in Information Management (I.M.) will prepare the students for information-intensive professional roles in a broad range of sectors. The Information Sciences concentration of the campus-wide M.S. in bioinformatics program emphasizes multidisciplinary skills that are required for a career developing and managing information systems for the biological sciences community. The C.A.S. program provides the opportunity

1. to study an aspect of information sciences in greater depth than is possible in the M.S. program,
2. to refresh and upgrade one's professional training several years after completing a M.S. program, or
3. to redirect one's career into a different area of library and information science.

School Librarian Licensure is available in conjunction with both the M.S. in L.I.S. and C.A.S. The Ph.D. is a research degree program.

Admission

The general admission requirements of the Graduate College apply. Consideration is also given to language study and computer skills, relevant work experience, letters of reference, and evidence of leadership. International students must score at least 620 on the paper-based Test of English as a Foreign Language (TOEFL) (260 on the computer-based test; 104 on the iBT version); or 7 on each section of the IELTS. The M.S. in bioinformatics requires a strong background in information science including undergraduate-level computing and mathematics. The C.A.S. requires a master's degree in library and information science and a grade point average of at least 3.0 (A = 4.0) in the master's program.

School Librarian Licensure

Candidates interested in the School Librarian Licensure program must first be admitted and enrolled as a degree-seeking student within the School of Information Sciences before their application to the School Librarian Licensure program is reviewed. Accepted students must successfully pass two Illinois State Board of Education testing requirements prior to registration for the final fieldwork experience.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in the Ph.D. program for those interested in faculty careers.

Facilities and Resources

Among the major areas of faculty research are:

- community informatics
- data analytics
- data curation
- digital humanities
- digital libraries
- history of information
- information retrieval
- organization of knowledge and information
- privacy, security, and trust
- ethics and values for information
- youth literature, culture, and services

The iSchool's Center for Informatics Research in Science and Scholarship (CIRSS) conducts research on information problems that impact scientific and scholarly inquiry. The Center for Children's Books (CCB) provides a review and research collection of the newest literature for children and young adults. The Communications Office produces two high-quality publications, Library Trends and The Bulletin of the Center for Children's Books. The staff of each of these units is available to students and faculty for consultation and guidance. A computer network with Internet connectivity is integral to teaching and learning activities. The University Library provides a vast reservoir of resources for all types of study and research in library and information science.

The School maintains an ongoing commitment to continuing education through conferences, institutes, workshops, and course offerings.

Financial Aid

Financial aid may be available from the iSchool, the University Library, and elsewhere in the university in the form of graduate assistantships, teaching assistantships, research assistantships, and hourly paid work. Area libraries may provide pre-professional or hourly positions. Also, the iSchool offers a limited number of fellowships for which doctoral students tend to be favored over C.A.S. and master's degree students. Students in the joint program that do not hold a FLAS fellowship are eligible for, but not guaranteed, fellowship or assistantship support in the semesters in which they are enrolled in the iSchool. Any assistantship awarded to these students provides a waiver of the base in-state tuition and service fee as well as a stipend. Non-Illinois residents must pay the difference between in- and out-of-state tuition.

for the degree of Master of Science in Bioinformatics, Information Sciences Concentration

For additional details and requirements, refer to the unit's Graduate Programs of Study (https://ischool.illinois.edu/degrees-programs/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Upon completion of the MS in Bioinformatics program, students will be able to:

1. Manage health, medical, and bio-informatics information using best practices in data stewardship; data science and data analytics; and human-centered design and systems.
2. Define and successfully address a tractable research question or real-world problem in health, medical, and bio-informatics using the appropriate scientific and/or research methods.
3. Accurately convey the implications of analytical results (in both oral and written modalities) to diverse stakeholders.
4. Maintain the highest level of ethical standards.
5. Apply best practices for providing value, leadership and team building in health, medical, and bio-informatics.
6. Stay up-to-date by learning how to read, analyze, discuss, synthesize, and critique advances reported in the health, medical, and bio-informatics research literature.

Overview of MS in Bioinformatics requirements (https://ischool.illinois.edu/degrees-programs/ms-bioinformatics/apply/)

Biomedical Image Computing, MS

for the degree of Master of Science in Biomedical Image Computing (on-campus and online)

The M.S. in Biomedical Image Computing blends together the fields of biomedical imaging science and machine learning. Students will receive a rigorous training in imaging systems and analysis, computational imaging, and machine learning, in preparation for an industry career.

Department Research

Bioengineering faculty perform research in the areas of Bio-Imaging at Multi-Scale, Molecular, Cellular and Tissue Engineering, Bio-Micro and Nanotechnology, Computational and Systems Bioengineering, and Synthetic Bioengineering. In addition to Bioengineering faculty, the Department of Bioengineering has more than 50 affiliate faculty (http://bioengineering.illinois.edu/directory/).

The Department of Bioengineering offers studies leading to the Master of Engineering in Bioengineering (MEng), the Master of Science in Bioengineering (MS), the Master of Science in Biomedical Image Computing (MS in BIC), and the Doctor of Philosophy (PhD) in Bioengineering. The Bioengineering Graduate Program provides students with educational and research experiences that integrate the sciences of biology and medicine with the practices and principles of engineering. For the MS and PhD programs, areas of focus include Bio-Imaging at Multi-Scale, Molecular, Cellular and Tissue Engineering, Bio-Micro and Nanotechnology, Computational and Systems Bioengineering, and Synthetic Bioengineering.

Some elective courses may not be available online. Check the course schedule.

for the degree of Master of Science in Biomedical Image Computing (on-campus and online)

Student learning objectives will be as follows:

1. Ability to apply quantitative skills, engineering principles, and computational principles to propose novel and practical solutions to biomedical imaging problems.
2. Ability to recognize and understand professional and ethical responsibilities.
3. Ability to identify and communicate real-world biomedical imaging problems with bigger vision and offer solutions, as well as their impact, effectively to a diverse audience and stakeholders, both orally and in writing.
4. Ability to develop effective leadership skills in order to foster the ability to collaborate and work with a diverse team, which is essential for a career in either academia or industry.

for the degree of Master of Science in Biomedical Image Computing (on-campus and online)

Admission Requirements

Applicants should have a bachelor's degree in an engineering or other quantitative discipline from an accredited college or university. Students should have a minimum grade point average of 3.00 (A=4.00) or equivalent for the last two years of undergraduate study and show evidence of strong quantitative skills and of serious interest in imaging and machine learning through their personal statement. Students in the program do not have automatic admission to the Ph.D. program in any engineering department.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) for English proficiency are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Applicants may be exempt from the English proficiency requirements if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. Applicants with lesser scores may still apply. Limited status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (https://linguistics.illinois.edu/languages/english-second-language/) based on an ESL Placement Test (EPT) taken upon arrival to campus.

For additional application information, view our Application Information here (https://bioengineering.illinois.edu/admissions/graduate/msbic/).

Financial Aid

The tuition and fees for the M.S. in Biomedical Image Computing are the standard Graduate and Professional Programs rates for the College of Engineering. Students in the M.S. in Biomedical Image Computing program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois Urbana-Champaign.

Biophysics & Quantitative Biology, MS

for the degree of Master of Science in Biophysics and Quantitative Biology

The Center for Biophysics and Quantitative Biology does not admit students to the Biophysics and Quantitative Biology MS degree program. Admission to graduate study is only through the PhD degree program. See Biophysics and Quantitative Biology PhD (p. 1202) for more information about the PhD program.

Admission

The objective of the program in biophysics is to give students sufficient training in physics, chemistry, and biology to enable them to apply the conceptual, instrumental, and mathematical approaches of the physical sciences for solving biological problems. The curriculum is broadly based and provides sufficient flexibility for students entering with either previous training in the physical sciences or for students with a background in biology and some experience in the physical sciences.

Admission requirements are usually one year of college biology, one year of college physics, chemistry through organic chemistry, and mathematics through calculus; however deficiencies in one of these areas can be corrected during the first two years of study. The Biophysics and Quantitative Biology Program does not require the subject GRE for admission. The Test of English as a Foreign Language (TOEFL iBT) or IELTS is required for international applicants.

Please refer to the Biophysics and Quantitative Biology Admissions web page (http://www.life.illinois.edu/biophysics/program/admissions.html) for additional information and application deadlines.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. Every biophysics student is required to serve as a teaching assistant for one semester at the quarter time level or higher.

Faculty Research Interests

Over 40 faculty members from the Schools of Molecular and Cellular Biology, Chemical Sciences, and Medicine, and the Colleges of Engineering and Veterinary Medicine, are affiliated with the Center for Biophysics and Quantitative Biology. Faculty interests range from experimental biophysics (single molecule spectroscopy, protein and RNA folding, molecular dynamics, cellular biophysics, imaging, etc.) to computational and theoretical biophysics (utilizing a wide range of computer platforms to simulate diverse biological phenomena at many levels as well as bioinformatics). Individual faculty interests can be found on the Biophysics website (https://biophysics.illinois.edu/).

Facilities and Resources

Center faculty and students have access to world-class research facilities at the University of Illinois Urbana-Champaign, including the Beckman Institute, the Carl R Woese Institute for Genomic Biology, Blue Waters Sustained Petascale Computing, the National Center for Supercomputing Applications, the Biomedical Imaging Center, the Roy J Carver Biotechnology Center, and the School of Chemical Sciences' Mass Spectroscopy Center and Electron Paramagnetic Resonance (EPR) Research Center.

Financial Aid

All incoming graduate students in biophysics will be supported by the Center for the first semester in the program. Continuing support for subsequent years will be granted as long as students remain in good standing and continue to make satisfactory academic progress, contingent upon the availability of funds. This support can be in the form of research assistantships, teaching assistantships, traineeships, or fellowships. After the first semester of study, most students are supported directly by their research advisor in the form of a research assistantship.

for the degree of Master of Science in Biophysics and Quantitative Biology

For additional details and requirements refer to the department's Student Handbook (http://biophysics.illinois.edu/program/courses/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
10 hours of 500-level biophysics courses with a minimum GPA of 3.25 (does not include seminar courses and/or research units and can include no more than 2 hours of tutorials). 500-level courses in other departments count towards this 500-level formal course requirement if they are on the approved Biophysics course list.		10
BIOP 401	Introduction to Biophysics (or equivalent)	3

Elective hours approved by Center Director to bring total hours to		32
BIOP 599	Thesis Research (4 min applied toward degree)	4

---

The Center for Biophysics and Quantitative Biology does not admit students to the Biophysics and Quantitative Biology MS degree program. Admission to graduate study is only through the PhD degree program. See Biophysics and Quantitative Biology PhD (p. 1202) for more information about the PhD program.

The Biophysics and Quantitative Biology program offers a direct doctoral (PhD) program for incoming students with a bachelor's degree. Students graduating with a PhD in Biophysics and Quantitative Biology are expected to demonstrate the ability to:

- Apply the close interactions between theory and experiments to fundamental advances in our understanding of the physical basis of life using quantitative methods.
- Develop and demonstrate an in-depth knowledge of an interdisciplinary research area in experimental biophysics and quantitative and computational biology, such as systems biology, structural biology, molecular dynamics, neurophysiology, enzyme mechanisms, fluorescence microscopy, magnetic resonance, and others.
- Utilize a wide range of platforms to simulate diverse biological phenomena at many levels - from individual macromolecules, to membranes and single cells, to networks of neurons and higher order structures.
- Identify scientific problems, formulate hypotheses, design experiments and perform data analysis to test proposed hypotheses.
- Work in collaborative enterprises at the leading edge of interdisciplinary science, as well as in their specialized areas of expertise.
- Communicate research findings and their impact effectively to multiple stakeholders, both verbally and in writing.
- Develop effective leadership skills and intellectual potential to conduct collaborative research and work with a diverse team, both in academia and industry.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Biophysics & Quantitative Biology, PhD

for the degree of Doctor of Philosophy in Biophysics and Quantitative Biology

The Ph.D. degree is a research degree, and the program is designed with a major emphasis on individual research.

Biophysics and Quantitative Biology offers a PhD (doctor of philosophy) degree program. In rare circumstances and with special permission of the director and advisor, a current student may obtain a terminal master's degree after meeting the requirements of the degree. Biophysics students are not admitted initially into the program for a master's degree. Opportunity also exists for specializing in computational science and engineering within the department's graduate program via the Computational Science and Engineering (CSE) Concentration (http://www.cse.illinois.edu/education/minor-and-concentration/graduate-concentration/).

Admission

The objective of the program in biophysics is to give students sufficient training in physics, chemistry, and biology to enable them to apply the conceptual, instrumental, and mathematical approaches of the physical sciences for solving biological problems. The curriculum is broadly based and provides sufficient flexibility for students entering with either previous training in the physical sciences or for students with a background in biology and some experience in the physical sciences.

Admission requirements are usually one year of college biology, one year of college physics, chemistry through organic chemistry, and mathematics through calculus; however deficiencies in one of these areas can be corrected during the first two years of study. The Biophysics and Quantitative Biology Program does not require the subject GRE for admission. The Test of English as a Foreign Language (TOEFL iBT) or IELTS is required for international applicants.

Please refer to the Biophysics and Quantitative Biology Admissions webpage (http://www.life.illinois.edu/biophysics/program/admissions.html) for additional information and application deadlines.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. Every biophysics student is required to serve as a teaching assistant for one semester at the quarter time level or higher.

Faculty Research Interests

Over 40 faculty members from the Schools of Molecular and Cellular Biology, Chemical Sciences, and Medicine, and the Colleges of Engineering and Veterinary Medicine, are affiliated with the Center for Biophysics and Quantitative Biology. Faculty interests range from experimental biophysics (single molecule spectroscopy, protein and RNA folding, molecular dynamics, cellular biophysics, imaging, etc.) to computational and theoretical biophysics (utilizing a wide range of computer platforms to simulate diverse biological phenomena at many levels as well as bioinformatics). Individual faculty interests can be found on the Biophysics website (https://biophysics.illinois.edu/).

Center faculty and students have access to world-class research facilities at the University of Illinois Urbana-Champaign, including the Beckman Institute, the Carl R Woese Institute for Genomic Biology, Blue Waters Sustained Petascale Computing, the National Center for Supercomputing Applications, the Biomedical Imaging Center, the Roy J Carver Biotechnology Center, and the School of Chemical Sciences' Mass Spectroscopy Center and Electron Paramagnetic Resonance (EPR) Research Center.

Financial Aid

All incoming graduate students in biophysics will be supported by the Center for the first semester in the program. Continuing support for subsequent years will be granted as long as students remain in good standing and continue to make satisfactory academic progress, contingent upon the availability of funds. This support can be in the form of research assistantships, teaching assistantships, traineeships, or fellowships. After the first semester of study, most students are supported directly by their research advisor in the form of a research assistantship.

for the degree of Doctor of Philosophy in Biophysics and Quantitative Biology

A qualifying examination is offered each spring. This qualifier must be passed by the end of the second year. By the end of the third year, after formulating a definite research problem, the student takes a preliminary examination where the chosen research topic is presented to the student's faculty committee. The committee also examines the candidate on their chosen general research area. The Ph.D. thesis is based on original work of

the student and is defended at a final public examination. The thesis and the exam must demonstrate a thorough knowledge of theory and techniques in one of the areas of biophysics.

For additional details and requirements refer to the department's Student Handbook (http://biophysics.illinois.edu/program/courses/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Bioprocessing & Bioenergy, MS - Professional Science Master's

for the degree of Master of Science in Bioprocessing & Bioenergy, Professional Science Master's Concentration

The PSM in Bioprocessing and Bioenergy integrates science and business, preparing you for a career in the bioenergy life cycle—from feedstock supply to biofuel transportation and distribution. As both consumption and demand for renewable energy increase, our students will be prepared as scientists, managers, and engineers with leadership, entrepreneurship, technology management, and other business skills needed to take on significant career challenges and opportunities.

The curriculum requires 42 graduate hours, consisting of a core and elective program, in addition to the required PSM concentration. The areas of specialty are Plants, Soils and Feedstocks; Production, Processing and Use; Environment, Economics and Policy & Law, and Tools and Methods.

Total Hours for the Bioprocessing & Bioenergy, MS-PSM	42

for the degree of Master of Science in Bioprocessing & Bioenergy, Professional Science Master's Concentration

1. Advanced knowledge in bioprocessing and bioenergy. There is no specific undergraduate major that focuses on either bioprocessing or bioenergy, so introducing the scientific basis for converting biomass to value-added products is the key component of the bioprocessing and bioenergy curriculum.
2. Business: Introduce students with strong technical undergraduate degrees to business fundamental concepts such as project management, finance, and accounting.
3. Industry experience that gives the students a realistic view of job opportunities and the hurdles faced by bioprocessing and bioenergy companies.
4. PSM: ability to identify career interests, career path, goals to reach career aspirations, materials and knowledge for a successful internship & career search.
5. PSM: ability to communicate science to a non-science audience; ability to work on a team.

Business Administration, MBA - Online (iMBA)

for the Master of Business Administration in Business Administration (online)

Gies College of Business currently offers an online degree program leading to the Master of Business Administration (M.B.A.) **The residential MBA and Professional MBA programs are no longer accepting applications.**The MBA requires 72 hours of credit.

The#Online MBA (iMBA)#features a flexible program format. During each course, virtual study teams are created that are designed to draw upon the diverse academic and professional backgrounds of the class. The iMBA caters to a segment of the population that values mobility, convenience, and believes that online programs better fit their learning styles and life circumstances.

Admission

Applicants to the**Online MBA (iMBA)**program must have completed an undergraduate degree and have a minimum of 3 years full-time, rich work experience. Two letters of recommendation and essays are also required. Applicants whose native language is not English are required to submit scores from the Test of English as a Foreign Language (TOFEL) or the IELTS.

Scholarships/Financial Aid

Scholarships are generally not available for the iMBA.

for the Master of Business Administration in Business Administration (online)

The goal for the iMBA program at Illinois is to deliver a high-quality program that is accessible to global audiences. A mirror of the EMBA curriculum, the online MBA (iMBA) uses a flexible program format. During each iMBA course, virtual study teams are created that are designed to draw upon the diverse academic and professional backgrounds of the class. The program caters to a segment of the population that values mobility, convenience, and believes that the online programs better fit their learning styles and life circumstances.

For additional details and requirements refer to the department's curriculum overview (https://onlinemba.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the Master of Business Administration in Business Administration (online)

By the end of the program, students will be able to:

1. Critical and Analytical Problem Solving: Employ appropriate analytical models and apply reasoning to evaluate evidence, select among alternatives, and generate creative solutions for real-world business problems.
2. Teamwork: Work well in teams and to assess the contributions made by themselves and by their peers.
3. Effective Leadership: Leadership: Apply leadership skills to organize and engage others, to work more effectively together, and to set an achieve organizational goals.
4. Effective Management: Apply management tools, techniques, and behaviors to demonstrate effective management skills.
5. Communication: Demonstrate the ability to listen and to read attentively, and to express ideas with clarity in both oral and written communications, and to communicate effectively in diverse business settings

Business Administration, PhD

for the Doctor of Philosophy in Business Administration

This program offers an in-depth education in teaching and research in selected areas of business and administration. Doctoral students can specialize in marketing, organizational behavior/theory, management science/process management, information systems, and strategic management. The program is intensive, flexible, and adapted to individual needs.

Each student's program entails sufficient study and preparation to achieve the following:

1. competence in a common core covering substantive and research methods courses, which are formulated by the faculty in each area;
2. in-depth expertise in a major area;
3. expertise in at least one area in addition to the chosen major area, with this minor area selected from within or outside the department;
4. teaching experience; and
5. research or problem-solving competence.

Competency is determined by comprehensive written and/or oral examinations. Following successful completion of all coursework and comprehensive examinations in major and minor areas, students must propose and gain approval of a thesis topic at a public colloquium. The final program requirement is the successful oral defense of the thesis. Applicants should contact the department for current requirements and program design.

The program usually is completed in five years. Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Admission

Admission to the Ph.D. program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours, acceptable scores on the Graduate Management Admission Test (GMAT) or Graduate Records Examination (GRE), three letters of recommendation, and a statement of career goals including research interests.

Applicants whose native language is not English are also required to submit scores from the Test of English as a Foreign Language (TOEFL) or IELTS. Ph.D. candidates must achieve the University minimum scores on these examinations.

The Ph.D. program allows Fall admission only. Please check the Departmental listing for current requirements and program information (https://giesbusiness.illinois.edu/programs/doctoral/business-administration/).

Faculty Research Interests

Faculty research interests are in the areas of marketing, organizational behavior, organization theory, decision sciences, information systems, strategic management, risk analysis, judgment under uncertainty, international business, production and operations management, accounting, economics, entrepreneurship, and finance. The Gies College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

Financial Aid

Most Ph.D. students receive some form of financial assistance. This assistance is likely to be in the form of a teaching or research assistantships, which includes a waiver of tuition and some fees, and/or the award of a merit-based fellowship.

for the Doctor of Philosophy in Business Administration

Business Analytics, MS

for the Master of Science in Business Analytics

The Master of Science (MS) in Business Analytics prepares students to master and apply contemporary analytics approaches to identify and address business problems and opportunities. The course work includes foundations in managing, analyzing, and conveying patterns and implications of business data, followed by an array of analytics elective courses that enable students to deepen their skills and understanding in business application areas such as finance, accountancy, and marketing, among others. This is an intensive program for those interested in making decisions and innovating through the use of business analytics approaches.

Admission

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Financial Aid

Most Ph.D. students receive some form of financial assistance. This assistance is likely to be in the form of a teaching or research assistantship, which includes a waiver of tuition and some fees, and/or the award of a merit-based fellowship. The M.S. in Business Administration, the M.S. in Management, the M.S. in Strategic Brand Communication, and the M.S. in Technology Management do not provide assistantships.

for the Master of Science in Business Analytics

The MS in Business Analytics requires a minimum of 36 hours. The program rests on three required courses (12 credit hours) covering foundations of business data management, analysis, and communication. Students need to take at least four analytics elective courses (at least 20 credit hours) that will enable them to deepen their understanding of analytics methods and tools as well as to specialize in existing and emerging application areas. Finally, students are able to take general elective courses (up to 4 credit hours) to provide foundations in application areas. Students with sufficient background may petition the academic director to replace core classes, with analytics electives. Additional analytics elective and general elective graduate course offerings may be approved by a program advisor.

For additional details and requirements, refer to the department's Program Curriculum and the Graduate College Handbook.

Code	Title	Hours
Core Courses:		
BADM 554	Enterprise Database Management	4
FIN 550	Big Data Analytics in Finance for Predictive and Causal Analysis	4
BDI 513	Data Storytelling	4
Analytics Electives		**20-24**
BADM 550	Business Practicum	
BADM 557	Topics in Business Intelligence	
BADM 562	Social Media Strategy	
BADM 571	Digital Business & IT Strategy	
BADM 572	Stat for Mgt Decision Making	
BADM 573	Decision Analytics	
BADM 575	Supply Chain Analytics	
BADM 576	Data Science and Analytics	
BADM 577	Predictive Data Analytics	
BADM 590	Seminar in Business Admin	
FIN 537	Financial Risk Management	
FIN 552	Applied Financial Econometrics	
FIN 553	Machine Learning in Finance	

FIN 555	Financial Innovation	
FIN 580	Special Topics in Finance	
ACCY 512	Data Analytics for Management Accounting	
ACCY 569	Data Driven Decisions in Accounting	
ACCY 570	Data Analytics Foundations for Accountancy	
ACCY 571	Statistical Analyses for Accountancy	
ACCY 575	Data Analytics Applications in Accountancy	
ACCY 576	Data Preparation for Accounting	
ACCY 577	Machine Learning for Accounting	
ACCY 593	Special Research Problems	
General Graduate Electives		**0 to 4**
Total Hours		**36**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall	12
Minimum GPA:	3.0
International students with TOEFL scores below 613 (paper-based), 257 (computer-based), or 103 (internet-based), or IELTS score below 7.0, are required to take the English Placement Test (EPT) when they arrive on campus. After taking the EPT, most students are required to take a Business English course sequence. For these students, completion of the ESL course sequence is mandatory but does not count towards the 36 hour degree requirement.	

for the Master of Science in Business Analytics

Upon graduation, students will be able to:

1. Identify research questions to be answered by data
   a. Identify and frame the business situation
   b. Specify the problem/question/hypothesis
   c. Plan the analytics approach
2. Source Data
   a. Plan data sourcing activities
   b. Identify Data Sources
   c. Perform data setup, access and preparation
3. Analyze Data
   a. Perform exploratory analysis
   b. Select and apply causal and predictive models
   c. Evaluate and adjust analysis process to answer the research question
4. Interpret/Report Results
   a. Derive insights from the analysis and create a narrative with visualizations to communicate the recommendations

Cell & Developmental Biology, MS

for the Master of Science in Cell & Developmental Biology

The Department of Cell & Developmental Biology does not admit students to the Cell & Developmental Biology MS degree program. Admission to graduate study is only through the PhD degree program. Information about the Cell & Developmental degree PhD program can be found here (p. 1223).

Graduate Degree Program in Cell & Developmental Biology

- **Cell & Developmental Biology, PhD (p. 1223)**

The graduate curriculum in Cell and Developmental Biology is designed to educate students for careers in research and teaching in the biological sciences. Departmental faculty are concerned with the structural and functional relationships of cells and organisms, with research emphases upon eukaryotic cell and molecular biology, developmental biology, and molecular genetics.

Admission

Applicants interested in the Cell & Developmental Biology, PhD program will need to apply directly to the School of Molecular and Cellular Biology (MCB) PhD program (https://mcb.illinois.edu/academics/masters-program/). The MCB PhD program is an umbrella program that requires admitted students to spend their first semester rotating among three different labs to explore their interests before joining one of our four departments.

MCB Admission requirements include a bachelor's degree in biological or physical sciences, a grade point average of a 3.0 or higher (A = 4.0), prior research experience and three letters of recommendation from individuals who can attest to the applicant's academic and research background. The Graduate Record Examination (GRE) is **not** required. Applicants interested in pursuing a PhD in Cell & Developmental Biology should have a strong background in biology, chemistry, and mathematics. In addition to these requirements, non-native English-speaking applicants must attain a minimum Test of English as a Foreign Language (TOEFL) overall score of 96, with at least a score of 22 on the speaking section. MCB does **not** accept the International English Language Testing System (IELTS) to show English proficiency. Graduate College requirements also apply.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all PhD candidates in this program.

Facilities and Resources

Facilities include modern, well-equipped laboratories for cellular, developmental, genetic, molecular, and structural studies. The University offers exceptional and broadly based research support services. The Roy J. Carver Biotechnology Center provides state-of-the art facilities to support genomics, proteomics, metabolomics, bioinformatics, flow cytometry, and translational medical research. The University offers outstanding computer services and is home to the National Center for Supercomputing Applications. The Beckman Institute for Advanced Science and Technology and the Carl R. Woese Institute for Genomic Biology foster interdisciplinary research across the campus. Opportunities for interaction in the cellular and molecular sciences are also available in many other units within the Schools of Molecular and Cellular Biology, Integrative Biology, Chemical Sciences, the Cancer Center, College of Engineering, and the Carle Illinois College of Medicine.

Financial Aid

Financial aid is available to qualified applicants in the form of university fellowships (awarded on a competitive basis), teaching assistantships (awarded by the department), research assistantships, and tuition and fee waivers.

for the Master of Science in Cell & Developmental Biology

The Department of Cell & Developmental Biology does not admit students to the Cell & Developmental Biology MS degree program. Admission to graduate study is only through the PhD degree program. Information about the Cell & Developmental degree PhD program can be found here (http://catalog.illinois.edu/graduate/las/cell-developmental-biology-phd/).

For additional details and requirements refer to the department's Graduate Student Handbook (https://mcb.illinois.edu/academics/masters-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Requirement	Description
Other requirements may overlap	
Completion of one of the following: Pass the Preliminary Exam, or approval of the graduate program committee (chaired by a tenured CDB faculty member and comprised of at least 5 CDB faculty members), or by approval of the research advisor and department head.	
Minimum GPA:	3.00

for the Master of Science in Cell & Developmental Biology

Cell & Developmental Biology graduates will:

1. Have mastered the foundational knowledge that defines the fields of cell and developmental biology.
2. Be able to write clearly and effectively about cell and developmental biology at the graduate level as well as in layperson terms.
3. Be able to explain cell and developmental biology orally to professional scientists, students of the discipline, and to a lay audience.
4. Be prepared to teach foundational cell and developmental biology at the college level.
5. Be able to analyze scientific data and draw conclusions from it.
6. Be able to identify important unsolved problems in cell and developmental biology.
7. Be able to articulate a hypothesis of an unsolved problem and design a research plan to test the hypothesis.
8. Be able to perform controlled experiments to test hypotheses.
9. Be able to organize results from experiments into a clear narrative that advances the field.
10. Be able to articulate the significance of their research in the broader context of the field.

for the degree of Master of Science in Chemical Engineering

1. Knowledge of the concepts and problem-solving skills in mathematics, science, and engineering that are relevant to identifying, formulating, and solving defined research problems in the field of chemical and biomolecular engineering.
2. Ability to clearly and persuasively communicate (orally and in writing) the motivation for a research project, relevant scientific and engineering concepts, approach, experimental data, data interpretation, conclusions drawn from the research, and the significance of the findings to both experts in the field and non-expert scientists and engineers.

3. Ability to develop and conduct appropriate experimentation or computer simulation, analyze and interpret data, and use engineering judgment to draw conclusions.
4. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Chemical Engineering, PhD

for the degree of Doctor of Philosophy in Chemical Engineering

Admission Requirements

Ideal candidates for advanced degrees in chemical engineering should have a background in chemistry and chemical engineering comparable to the training offered in the undergraduate chemical engineering curriculum at the University of Illinois Urbana-Champaign. Students whose prior training is deficient in one or more basic areas of chemistry or chemical engineering may be admitted with the understanding that extra coursework will be required to address their deficiencies. Graduate College admission requirements also apply.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Students who remain in good standing and continue to make satisfactory academic progress are guaranteed a funded appointment that includes a full tuition waiver, a partial fee waiver, and a stipend for the duration of their studies in the program.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the Chemical & Biomolecular Engineering PhD program. As part of their academic work, all students in the program are required to serve as a teaching assistant for at least three semesters.

In order to satisfy this requirement, all students whose native language is not English, regardless of US citizenship, must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Department Research

Please see our website (https://chbe.illinois.edu/research/).

Chemical Engineering, PhD

Code	Title	Hours
Minimum four of graduate-level courses in chemical engineering		16
A coherent program of four additional graduate level courses		16
CHBE 599	Thesis Research (0 min applied toward degree)	0
Total Hours		**96**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum Hours Overall Required Within the Unit:	16
Minimum 500-level Hours Required Overall:	20
Teaching experience is required	
Requirements include satisfactory performance on qualifying and certification examinations, and a thesis.	
Masters Degree Required for Admission to PhD?	No

Qualifying Exam Required	Yes, the qualifying examination is a written test usually taken during the first year of study.
Preliminary Exam Required	Yes, the preliminary examination is an individual oral examination taken after the student has satisfied the course requirements.
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	2.75

for the degree of Doctor of Philosophy in Chemical Engineering

---

Upon completion of the program, students will be able to:

1. Apply problem-solving skills in mathematics, science, and engineering to identify, formulate, and solve extensive research problems in the field of chemical and biomolecular engineering.
2. Clearly and persuasively communicate (orally and in writing) the motivation for a research project, relevant scientific and engineering concepts, approach, experimental data, data interpretation, conclusions drawn from the research, and the significance of the findings to both experts in the field of chemical and biomolecular engineering and non-expert scientists and engineers.
3. Develop and conduct appropriate experimentation or computer simulation that addresses a research question in the field of chemical and biomolecular engineering, analyze and interpret the resulting data, and use engineering judgment to draw conclusions.
4. Acquire and apply new knowledge as required to solve extensive problems relevant to the field of chemical and biomolecular engineering.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Chemistry, MS

for the degree of Master of Science in Chemistry

Admission

For those interested in pursuing a Master's degree, applications are not encouraged except for the Master's Program in the Teaching of Chemistry.

Graduate College requirements apply. Further, applicants should have at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), to be considered for admission to the graduate programs. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis.

International students whose native language is not English are required to submit passing scores from the internet-based Test of English as a Foreign Language (TOEFL iBT) or International English Language Testing System (IELTS) to qualify for admission and to be eligible for in person teaching duties, which is required by the department of Chemistry. The following are the minimum passing scores for each test:

- TOEFL (iBT) minimum scores: 103 overall, 24 on the speaking subsection
- IELTS minimum scores: 7 overall, 8 on the speaking subsection, and no less than 6 on any subsection.

Students might be admitted without a degree from their current institution under exceptional circumstances that will need to be described in detail via a letter from the applicant and a separate statement from the department head of the student's current graduate program.

Contact chemistry graduate admissions for further information.

Financial Aid

Support for graduate students is available through fellowships and assistantships. All candidates are considered for these upon application. Graduate students making normal progress toward their degrees generally receive a tuition waiver as well as a stipend.

for the degree of Master of Science in Chemistry

The program leading to the degree of Master Science in Chemistry is designed to be completed in one year of full-time study by students entering without deficiencies. A research thesis is optional.
For additional details and requirements refer to the department's Graduate Programs (https://chemistry.illinois.edu/academics/graduate-studies/)and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
CHEM 599	Thesis Research (12 max applied toward degree)	12
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

Non-Thesis Option

Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall:	20 (16 in CHEM)
Minimum GPA:	3.0

for the degree of Master of Science in Chemistry

NOTE: Some of the learning outcomes below were taken or adapted from the 2013 American Chemical Society Presidential Commission on Graduate Education in the Chemical Sciences. The Department of Chemistry uses these as its main guidelines.

1. To have a deep working knowledge of the principles, techniques, and concepts of contemporary chemistry.
2. To be able to effectively design and carry out independent research leading to new knowledge or a practical, applicable result.
3. To be able to communicate clearly and effectively within and across disciplinary lines.
4. To be able to educate students interested in chemical sciences.
5. To be aware of and prepare for various career opportunities with an advanced degree in chemistry.
6. To clearly understand the ethical conduct of research.
7. To understand and adopt the best safety practices in chemical research.

Chemistry, PhD

for the degree of Doctor of Philosophy in Chemistry

Admission

Graduate College requirements apply. Further, applicants should have a bachelor's degree or its equivalent from an accredited college or university in the U.S. or an approved institution of higher learning abroad, with at least 25 semester hours in chemistry (properly distributed) and a grade point average of 3.0 (A = 4.0), is required to be considered for admission to the graduate programs. Applications from students with less than the usual preparation in chemistry or with grade point averages below 3.0 may be considered on an individual basis.

International students whose native language is not English are required to submit passing scores from the internet-based Test of English as a Foreign Language (TOEFL iBT) or International English Language Testing System (IELTS) to qualify for admission and to be eligible for in person teaching duties, which is required by the department of Chemistry. The following are the minimum passing scores for each test:

- TOEFL (iBT) minimum scores: 103 overall, 24 on the speaking subsection
- IELTS minimum scores: 7 overall, 8 on the speaking subsection, and no less than 6 on any subsection.

Graduate Record Exam (GRE) scores (general or subject) are not required. Please do not submit them.

Students who are currently enrolled in graduate programs at other institutions are advised that they should first complete degree work at their current institution before they will be considered for admission to the chemistry PhD program at the University of Illinois. In addition, we require a statement from the applicant and a letter from the applicant's research adviser or department head detailing the situation. Students might be admitted without a degree from their current institution under exceptional circumstances that will need to be described in detail via a letter from the applicant and a separate statement from the department head of the student's current graduate program.

Contact chemistry graduate admissions for further information.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program.

Financial Aid

Support for graduate students is available through fellowships and assistantships. All candidates are considered for these upon application. Graduate students making normal progress toward their degrees generally receive a tuition waiver as well as a stipend.

for the Doctor of Philosophy in Chemistry

Doctoral programs are offered in a wide range of specialties, including the traditional areas of analytical, inorganic, organic, and physical chemistry as well as materials chemistry and chemical biology. The formal course requirements involve 12 or more hours of 500-level courses, plus 8 or fewer hours of 400-level coures, for a total of 20 hours in chemistry and allied relevant fields. Besides completing formal coursework, students will present a literature seminar, have a formal review of progress following the completion of coursework, pass an oral preliminary examination on research preparation, present and defend an original research proposal not related to their thesis research, and submit a thesis on original research, which is defended at a final oral examination.

For additional details and requirements refer to the department's Graduate Programs (https://chemistry.illinois.edu/academics/graduate-studies/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Entering with M.S./M.A. degree

Code	Title	Hours

Civil Engineering, MS

for the degree of Master of Science in Civil Engineering (on campus & online)

The Department of Civil and Environmental Engineering, consistently ranked as having one of the best graduate programs in the country, offers graduate work leading to master's and doctoral degrees. These are in a variety of specialized areas through departmental and joint programs which are described on this page.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research

Areas of study and research pursued by our world-renowned faculty are focused in the following ten specializations:

- Construction Engineering Management
- Construction Materials
- Energy-Water-Environment Sustainability
- Environmental Engineering and Science
- Geotechnical Engineering
- Societal Risk and Hazard Mitigation
- Structural Engineering
- Sustainable and Resilient Infrastructure Systems
- Transportation Engineering
- Water Resources Engineering and Science

More information about these specialized areas may be found at the department's research website (https://cee.illinois.edu/areas/).

Through the research centers based in the department, CEE students participate in a wide range of groundbreaking research projects with immediate relevance to real-world engineering applications. For more information, see the department's research centers website (https://cee.illinois.edu/research/research-centers/).

CEE at Illinois is one of the nation’s best-equipped programs, with a broad range of facilities for civil and environmental engineering education and research. For more information, see the department's research facilities website (https://cee.illinois.edu/research/research-facilities/).

for the degree of Master of Science in Civil Engineering (on campus & online)

The degree requirements for the online programs are the same as for the on-campus non-thesis M.S. program—36 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

The M.S. degree in Civil Engineering offered online is currently available for specialization in Construction Management, Infrastructure, Structural Engineering, and Transportation Engineering. Students can also develop cross-disciplinary programs in consultation with their advisers. Additional courses are available online in the following areas of concentration to complement the student’s area of specialty above: Construction Materials, Environmental Engineering and Science, Environmental Hydrology and Hydraulic Engineering, and Geotechnical Engineering.

For additional details and requirements refer to the department's Graduate Handbook (https://cee.illinois.edu/academics/graduate-programs/graduate-handbook/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; with or without a thesis, the requirements are listed below:

Code	Title	Hours
Non-Thesis Option		
Elective courses	36 hours subject to Other Requirements and Conditions below	
Total Hours	**Non-Thesis Option**	**36**
Thesis Option		
CEE 599	Thesis Research (4 to 12 hours)	

Elective courses	20-28 hours subject to Other Requirements and Conditions below	
Total Hours	**Thesis Option**	**32**

Other Requirements

Requirement	Description
Other Requirements may overlap	
Individual programs are developed by the students in consultation with their academic advisors.	
A minimum of 16 hours of credit within the major field with 8 graded and at the 500 level.	
A minimum of 12 hours at the 500-level overall.	
A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement.	
At least half of the minimum hours required for the degree must be in Illinois courses meeting on the Urbana-Champaign campus or in courses meeting in other locations approved by the Graduate College for residency credit for the degree.	
Minimum program GPA	2.75

for the degree of Master of Science in Civil Engineering (on campus & online)

1. Ability to identify and utilize advanced mathematical, computational, design and/or experimental skills to solve complex problems in civil and environmental engineering.
2. Demonstrate technical knowledge and depth in at least one or more CEE subject areas and breadth of knowledge in at least one additional area.
3. Demonstrate the ability to communicate effectively (written, oral presentation, and other media) technical ideas, design concepts, or research results.
4. Understanding of the student's professional and scientific ethical responsibilities.
5. Propose, plan, and execute original research idea that target current or future societal challenges related to civil and environmental engineering.
6. Demonstrate skills to teach technical subjects in CEE at the university level.

for the degree of Master of Science in Civil Engineering (on campus & online)

Admission Requirements

The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

A prerequisite for graduate study in civil engineering is the equivalent of the BS in Civil Engineering (p. 176) from an accredited institution whose requirements for the bachelor's degree are substantially equivalent to those of the University of Illinois Urbana-Champaign and their cumulative grade point average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (https://www.ets.org/gre.html) is currently optional. CEE recommends the GRE test for MS applications, particularly for students applying from international universities, MS applicants looking for potential funding support, or MS applicants whose GPA falls below the average GPA of admitted students. If GRE scores are submitted, CEE does not have minimum scores for admission. GRE scores are only valid for five years prior to the proposed term of entry.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Applicants to the joint programs with Architecture or Urban Planning must meet the admissions standards for both degree programs and be accepted by both programs. For more information on the joint degree program, please see Civil Engineering, MS & Architecture, MARCH (p. 2188) or Urban Planning, MUP & Related majors, MS (p. 2235)

Financial Aid

Financial aid is available in the form of fellowships and research and teaching assistantships. All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test

(http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

CEE at Illinois is one of the nation’s best-equipped programs, with a broad range of facilities for civil and environmental engineering education and research. For more information, see the department's research facilities website (https://cee.illinois.edu/research/research-facilities/).

for the degree of Doctor of Philosophy in Civil Engineering

The degree of Doctor of Philosophy, primarily a research degree, requires from three to four years of graduate study beyond the master's degree. The major area of specialization encompasses courses and research that are closely related, but the courses need not be offered by a single major department. Candidates must demonstrate a capacity for independent research by preparing an original thesis on a topic within the major field of study, must meet the qualifying requirements or examination in the area of specialization, and must pass both preliminary and final examinations.

For additional details and requirements refer to the department's Graduate Handbook (https://ws.engr.illinois.edu/sitemanager/getfile.asp?id=3334)and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/). Qualifying Exam information can be found here. (http://cee.illinois.edu/academics/graduate-programs/phd-degree-and-curriculum/)

Entering with an approved Master's Degree:

Code	Title	Hours
CEE 599	Thesis Research (min-max applied toward degree)	32
Elective courses (subject to Other Requirements and Conditions below)		32
Total Hours		**64**

Other Requirements

Requirement	Description
Other Requirements and Conditions may overlap	
A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement; approval required.	
There is no department-wide foreign language requirement. However, the faculties of some areas of specialization may require foreign language proficiency if essential to the conduct of research in that area.	
64 graduate hours must be completed in residence.	
A Masters degree is required for admission to the Ph.D. program.	
Ph.D. exam and dissertation requirements:	
Qualifying exam	
Preliminary exam	
Final exam or dissertation defense	
Dissertation deposit	
The minimum program GPA is 2.75.	

Entering with an approved Baccalaureate Degree:

Code	Title	Hours
CEE 599	Thesis Research	32-40
Elective Courses (subject to Other Requirements and Conditions below)		56-64
Total Hours		96

Other Requirements

Requirement	Description
Other Requirements and Conditions may overlap	
A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement; approval required.	
There is no department-wide foreign language requirement. However, the faculties of some areas of specialization may require foreign language proficiency if essential to the conduct of research in that area.	
24 credit hours must be in major field. 24 credit hours of elective coursework must be at the 500-level, with at least 12 hours in major field.	
64 graduate hours must be completed in residence.	
Ph.D. exam and dissertation requirements:	
Qualifying exam	
Preliminary exam	
Final exam or dissertation defense	
Dissertation deposit	
The minimum program GPA is 2.75.	

for the degree of Doctor of Philosophy in Civil Engineering

---

1. Ability to identify and utilize advanced mathematical, computational, design and/or experimental skills to solve complex problems in civil and environmental engineering.
2. Demonstrate technical knowledge and depth in at least one or more CEE subject areas and breadth of knowledge in at least one additional area.
3. Demonstrate the ability to communicate effectively (written, oral presentation, and other media) technical ideas, design concepts, or research results.
4. Understanding of the student's professional and scientific ethical responsibilities;
5. Propose, plan, and execute original research idea that target current or future societal challenges related to civil and environmental engineering.
6. Demonstrate skills to teach technical subjects in CEE at the university level.

for the degree of Doctor of Philosophy in Civil Engineering

Admission Requirements

The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

Admission to the Graduate College with full status in civil engineering is granted to graduates of accredited institutions whose requirements for the master's degree are substantially equivalent to those of the University of Illinois, provided the applicant's preparation is appropriate for advanced study in his or her chosen major field and his or her cumulative grade point average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) is currently optional. However, it is strongly recommended that the GRE test be submitted to help faculty with admission and funding decisions for all PhD applicants. If GRE scores are submitted, CEE does not have minimum scores for admission. GRE scores are only valid for five years prior to the proposed term of entry. For additional information, see the departmental website (https://cee.illinois.edu/admissions/graduate/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Financial aid is available in the form of fellowships and research and teaching assistantships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Classical Philology, PhD

for the degree of Doctor of Philosophy in Classical Philology

The Doctor of Philosophy is offered only in classical philology, which requires advanced work in both Greek and Latin. Candidates for the Ph.D. program are eligible for acceptance upon completion of the master's degree in classics or its equivalent. Once admitted, they must complete at least 64 additional graduate hours of coursework. Admission to Stage III requires passing examinations in the translation of Greek and Latin into English, the history of Greek and Latin literature, and a special author, as well as a preliminary oral examination (dissertation prospectus).

Admission

Applicants for admission to the MA in Classics (Greek and Latin) must ordinarily present a minimum of 20 semester hours in one of the two languages (Greek or Latin) and 15 semester hours in the other language; candidates for admission to the MA with specialization in either Greek or Latin, or the MAT in Latin, must ordinarily present at least 20 semester hours in the relevant language. Previous work in ancient history, ancient art and archaeology, philosophy, literary criticism, or linguistics is desirable.

Applicants should (apply online (http://www.grad.illinois.edu/admissions/apply/)) and submit a personal statement of 2-3 pages, a resume or CV, transcripts showing all undergraduate and graduate work completed, and a writing sample of approximately 20 pages (one or two papers) that showcases the applicant's ability to work in the original classical languages and incorporates relevant scholarship as appropriate. Three letters of recommendation are also required.

Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (http://www.grad.illinois.edu/Admissions/instructions/04c/)). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Certifications

Students wishing to add teacher certification in Latin to an MAT, M.A. in Latin, or Ph.D. must apply to the Foreign Language Teacher Education Program (http://www.flte.illinois.edu).

In order to receive certification, students must complete an M.A. in Classics with a concentration in Latin, an M.A. in Classics with a concentration in Greek and Latin, or an M.A. in the Teaching of Latin.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and almost all students teach. Non-native English speakers must first pass a test of their oral English ability.

Faculty Research Interests

Greek and Latin literature of all periods; gender and sexuality; Latin poetry of the imperial period; Greek historiography and ethnography; Greek and Roman drama; reception of Classics, especially in film; animal studies; pedagogy. For further details see our website (http://www.classics.illinois.edu).

Facilities and Resources

We have a renowned university library which boasts the second largest number of volumes among US university libraries after Harvard. Housed within the main library building is our first-rate Classics collection (https://www.library.illinois.edu/litlang/classics/) with over 60,000 volumes on open shelves. The University of Illinois Library's Rare Book Room houses the Turyn Archive of Greek manuscript photographs and the American Center of the International Photographic Archive of Papyri. The Department of the Classics also publishes the widely circulating peer-reviewed journal *Illinois Classical Studies* and its Supplements. The Krannert Art Museum and the Spurlock Museum of World Cultures have outstanding collections of ancient vases and other artifacts.

Financial Aid

University fellowships are available for the academic year. Teaching assistantships are available for both the academic year and Summer Session II.

for the degree of Doctor of Philosophy in Classical Philology

For additional details and requirements refer to the department's graduate program requirements (http://www.classics.illinois.edu/programs/graduate/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
CLCV 550	Intro to Teaching of Classics (if not taken previously)	4
24 hours of Greek and Latin, with at least eight hours in each language and at least twenty at the 500 level, including:		24
GRK 595	Intro to Classical Studies (if not taken previously)	
or LAT 595	Intro to Classical Studies	
LAT 511	Advanced Prose Composition (if not taken previously)	
GRK 511	Advanced Composition (if not taken previously)	
LAT 580	Latin Seminar	
GRK 580	Greek Seminar	
Elective		4-8
Language Requirement: Reading knowledge of two ancillary languages: German, and either French or Italian. Knowledge of one of these languages must be demonstrated at the time of admission to Stage II and the second before the start of the second year at Stage II.		
GRK/LAT 599	Thesis Research	12-32
Total Hours		**64**

Classics, MA

for the degree of Master of Arts in Classics

The Department of the Classics offers programs of study leading to the Master of Arts in Classics. Within the master's degree program, students may choose from three options: both Greek and Latin (= Classics), Greek, or Latin. In addition, the department offers the Master of Arts in the Teaching of Latin and the Doctor of Philosophy in Classical Philology. A further concentration in Medieval Studies is available to students pursuing graduate degrees in the Classics.

Graduate students in Classics at Illinois may concentrate at different stages of their study on various aspects of the Greek and Latin languages, literatures, and cultures; classical archaeology; ancient philosophy; or, in conjunction with the appropriate department, comparative literature, ancient history, or linguistics. Additional information is available on our website (https://classics.illinois.edu/).

Admission

Applicants for admission to the MA in Classics (Greek and Latin) must ordinarily present a minimum of 20 semester hours in one of the two languages (Greek or Latin) and 15 semester hours in the other language; candidates for admission to the MA with specialization in either Greek or Latin, or the MAT in Latin, must ordinarily present at least 20 semester hours in the relevant language. Previous work in ancient history, ancient art and archaeology, philosophy, literary criticism, or linguistics is desirable.

Applicants should apply online (https://www.grad.illinois.edu/admissions/apply/) and submit a personal statement of 2-3 pages, a resume or CV, transcripts showing all undergraduate and graduate work completed, and a writing sample of approximately 20 pages (one or two papers) that showcases the applicant's ability to work in the original classical languages and incorporates relevant scholarship as appropriate. Three letters of recommendation are also required.

Communication, MA

for the degree of Master of Arts in Communication

The Department of Communication offers a broad curriculum in communication research. In consultation with an advisor, students assemble individualized programs, concentrating in organizational and group communication, interpersonal and family communication, health communication, communication technology, political communication, rhetoric and public discourse, communication in cultural contexts, or mediated communication. Interdisciplinary programs are also encouraged. The student's M.A. program typically culminates with a comprehensive examination.

Admission

An application must include official transcripts from every post-secondary institution the applicant has attended; at least three letters of recommendation, preferably from academic recommenders; a major paper or essay as a sample of academic writing; an academic statement of purpose that details their scholarly accomplishments and goals, and a personal statement of purpose that describes how the student's personal background and experiences influenced their decision to pursue a graduate degree. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. The department follows the Graduate College's recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department's website (https://communication.illinois.edu/admissions/apply-graduate-program/). Ordinarily, students are admitted to begin graduate study in the fall semester.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial aid is usually offered in the form of part-time teaching assistantships; some fellowships and research assistantships are available.

for the degree of Master of Arts in Communication

The entering student should present the equivalent of 16 semester hours of undergraduate work in communication or a related area. In some cases an oral examination is also stipulated. A thesis is optional.

For additional details and requirements refer to the department's Graduate Programs (http://www.communication.illinois.edu/prospective/grad/degrees/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)
Departmental Admissions Requirements (https://communication.illinois.edu/admissions/apply-graduate-program/)

Communication, PhD

for the degree of Doctor of Philosophy in Communication

To be accepted as a candidate for the Ph.D. degree, a student must either present a well-rounded undergraduate education with an emphasis in communication and a master's in a cognate discipline, or hold a master's degree in communication from an accredited institution.

The Department of Communication offers a broad curriculum in communication research. In consultation with an advisor, students assemble individualized programs, concentrating in organizational and group communication, interpersonal and family communication, health communication, communication technology, political communication, rhetoric and public discourse, communication in cultural contexts, or mediated communication. Interdisciplinary programs are also encouraged.

Admission

An application must include official transcripts from every post-secondary institution the applicant has attended; at least three letters of recommendation, preferably from academic recommenders; a major paper or essay as a sample of academic writing; an academic statement of purpose that details their scholarly accomplishments and goals, and a personal statement of purpose that describes how the student's personal background and experiences influenced their decision to pursue a graduate degree. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. The department follows the Graduate College's recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department's website (https://communication.illinois.edu/admissions/apply-graduate-program/). Ordinarily, students are admitted to begin graduate study in the fall semester.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Financial aid is usually offered in the form of part-time teaching assistantships; some fellowships and research assistantships are available.

for the degree of Doctor of Philosophy in Communication

In addition to meeting general requirements of the Graduate College, the student must satisfactorily complete written and oral preliminary examinations, an oral defense of the thesis prospectus, and an oral defense of the thesis. Students must demonstrate competency in research procedures and tools that may include proficiency in one or more foreign languages, various research methods, or cognate academic work. Students must enroll in CMN 595 in the semester of the preliminary examination and in CMN 599 (thesis hours) in semesters spent working on the dissertation.

For additional details and requirements refer to the department's Graduate Programs (http://www.communication.illinois.edu/prospective/grad/degrees/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Doctor of Philosophy in Communication

1. **Intellectual Reasoning and Knowledge:** Students will acquire broad and deep knowledge of communication research, theory, and practice.
2. **Creative Inquiry and Discovery:** Students will assimilate and conduct original research to generate new ideas about communication.
3. **Proficiency with diversity:** Students will engage in constructive discourse and deliberation about ideas from across the breadth of the field of communication and cognate fields.
4. **Career Preparedness:** Students will gain professional development experiences that afford them rewarding career opportunities in education, policy, business, and/or industry.

Communications & Media, PhD

for the Doctor of Philosophy in Communications & Media

Since its inception, the Institute of Communications Research's (ICR) doctoral program has encouraged interdisciplinary studies of communication and media. ICR faculty represent the three academic departments within the College of Media: Advertising (https://media.illinois.edu/advertising/), Journalism (https://media.illinois.edu/journalism/), Media & Cinema Studies (https://media.illinois.edu/media-cinema-studies/). ICR faculty are also active in a wide array of interdisciplinary campus initiatives which include but are not limited to: Illinois Informatics Institute, Beckman Institute, National Center for Supercomputing Applications (NCSA), Unit for Criticism and Interpretive Theory, Center for Advanced Study (CAS), Center for Latin American and Caribbean Studies, Illinois Program for Research in the Humanities (IPRH), and the Departments of Gender and Women's Studies, Latina/Latino Studies, Communication, Psychology and Business Administration. These affiliate networks allow ICR students to develop and pursue unique programs of research that extend the boundaries of current scholarship.

The ICR requires 64 credits of coursework and dissertation research for students entering with a Master's degree. Students are responsible for designing their own programs of coursework, which are submitted for approval by the Institute's Program Evaluation Committee. Although students are given the broadest latitude in designing interdisciplinary programs, they must include courses that fill certain requirements. Specifically, all new students will take a two course Proseminar sequence during their first year. Because students are admitted from diverse backgrounds, these courses introduce them to the history of and current trends in the field of media and communication research. This sequence also helps new students begin to locate their own research interests more precisely within the broad landscape of contemporary media and communication research.

Admission

Any student with a bachelor's or master's degree and with a substantial background in the humanities, social sciences, or physical sciences is eligible to apply to the doctoral program. It is suggested *but not required* that students have or will have a master's degree before starting the program. All candidates for admission must submit an application for admission along with the application fee, official transcripts of all undergraduate and graduate courses taken and grades earned, and three letters of recommendation.

Our application process is administered through the ApplyYourself (http://www.grad.illinois.edu/admissions/apply/) system managed by the Graduate College at the Illinois. Applicants should consult the instructions on the Graduate College's website and the guidelines to applicants available on the ICR web page.

Applicants from non-English-speaking countries are required to take the Test of English as a Foreign Language (TOEFL) before they come to the University. Depending on the results, they may be required to take further instruction in English after their arrival. Rules for "International Students & Applicants" can be found on the Graduate College website.

New students will begin the program during the fall term. All material for fall admission should be submitted by a date designated each year on the ICR website (https://media.illinois.edu/institute-communications-research/admission-requirements/).

Financial Aid

Financial aid is available in the form of assistantships and fellowships. Students from populations underrepresented in communications research are eligible for certain University fellowships. Currently, all admitted ICR students receive financial support, including a tuition waiver and stipend. Insofar as possible, the Institute makes financial aid and admission decisions simultaneously.

See also Graduate College Financial Aid (http://www.grad.illinois.edu/funding-jobs/) and Fellowship Office (http://www.grad.illinois.edu/fellowships/).

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

Total Hours		64

Other Requirements

Requirement	Description
Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

Research Methods

Students must complete at least 8 hours in research methods. In order to provide a competent background for constructively understanding the field's wide-ranging literature, students are required to take one quantitative and one qualitative course.

In addition to methodology courses taught by the College of Media faculty, students are encouraged to consider relevant courses in quantitative or non-quantitative methods elsewhere on campus. Listings of such courses are available in the ICR office.

Preliminary Exams

Students, in consultation with their chosen advisors, select a committee of four faculty members for their preliminary exams. Upon completion of coursework, students undertake preparing written examinations. Upon completing written answers for each examiner, along with a dissertation proposal, students undergo a 2-hour oral examination. Upon passing the preliminary examination, students proceed with work on their dissertations.

Dissertation

Because the Doctor of Philosophy degree is primarily a research degree, candidates are required to demonstrate a capacity for independent research by producing an original dissertation on a topic within the general area of communications and media research.

Final Examination

After students distribute polished drafts of their dissertations, they take final oral examinations administered by their chosen committees. The student is required to support and interpret the dissertation to the committee's satisfaction, as well as to show an adequate grasp of the selected area of concentration that it represents.

for the Doctor of Philosophy in Communications & Media

---

1. Students gain knowledge of both important historical themes and current trends in media and communication scholarship, such that they can recognize, relate, and evaluate their fundamental concepts, principles, and theories.
2. Students develop expertise in at least one research methodology, and general familiarity with both quantitative and qualitative methods, since both methods have informed research traditions in media and communication studies. Expertise in these two methods is one facet of our doctoral program's emphasis on interdisciplinary perspectives and research practices. Students in our program are encouraged to design a program of study across departments, within and beyond the College of Media.

3. Students apply their knowledge and skills to produce new inquiry and ideas in media and communication studies by formulating research questions, designing original research, and communicating conclusions.
4. Students successfully contribute to learning and instruction in media and communications studies, including by demonstrating pedagogical proficiency as a teaching assistant.
5. Students are able to recognize and employ professional academic practices such as presentations, feedback and review, organizational membership, conference participation, and publishing.

Graduate Degree Programs

- Community Health, MS (p. 1259)
- Community Health, PhD (p. 1261)
- Joint Degree Program: Community Health, PhD and Master of Public Health, MPH (p. 2219)

Admissions

Applications are due on **January 15** for Fall admissions. Applications are due **October 1** for Spring admissions.

Applicants should have a grade point average of at least 3.0 (A = 4.0) for the last 60 semester hours of their undergraduate degree work (excluding fieldwork, student teaching, and physical activity courses).

All applicants are required to submit three letters of recommendation, resume, official transcripts and a personal statement that addresses the following prompts:

- What developed your interest for graduate study.
- Who, from the designated faculty, would you like to work with.
- Why do you believe you would be a good fit with aforementioned faculty.
- What do you expect to gain from a graduate experience and how will this experience prepare you for your intended career.

Although the GRE scores are not required, the scores may provide helpful supporting information in some cases. Applicants who have taken the GRE and feel their scores would benefit their application are encouraged to submit the scores. If you would like to submit scores, we recommend you scan your official score report as a PDF file and attach it to your application. You do not need to submit official scores through ETS, but if you decide to, please use our University code of 1836.

- International and some domestic students may be required to show proof of English Proficiency (https://grad.illinois.edu/admissions/instructions/04c/).
- Students for whom English is not their native language and who wish to be considered for a teaching assistantship must achieve a score on the speaking sub-section of (TOEFL or IELTS). (https://grad.illinois.edu/admissions/taengprof.htm)

for the Doctor of Philosophy in Community Health

Graduate course experience in public health and statistics with grades of B or better is expected prior to admission. Before admission to the Ph.D. program, students may be required to take up to 12 hours of additional coursework to remedy deficiencies. The candidate is required to pass written preliminary examinations covering disciplinary and professional aspects of community health, the literature and theoretical perspectives in the major area of study and methological perspectives and research techniques. Students must also pass an oral preliminary examination on the area of specialization and dissertation proposal; and to pass an oral defense of dissertation research.

For additional details and requirements refer to the department's Graduate Handbook (http://kch.illinois.edu/kch-grad-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Comparative Literature, MA

for the degree of Master of Arts in Comparative Literature

The candidate must demonstrate a competency in at least two foreign languages as well as in English. Latin is required for students specializing in European and/or American literatures before 1800. Competence in the languages offered is measured either by the successful completion of one advanced course in the literature of each of the languages chosen or by passing an examination administered by the program in comparative literature with the assistance of an expert in the language concerned. This choice is intended to provide for languages that may not be taught in regular departments.

The Program in Comparative & World Literature offers graduate courses leading to the Doctor of Philosophy degree, and is designed to provide a systematic study of subjects and problems common to several literatures. Its purpose is to enable students who have varied linguistic competence and preparation to explore the theory of literature and criticism; the interrelations of several literatures; the main currents, periods, and movements in literary history; the development of literary themes and types; and the relations between literature and the other arts. Students are not normally admitted to a terminal master's degree program.

Admission

A student entering the program should have an undergraduate major in Comparative Literature, English, the classics, or a foreign language. Majors in history and philosophy or other humanistic areas that present suitable linguistic and literary competence may also be granted admission by the Admissions Committee.

Applicants should apply online (https://www.grad.illinois.edu/admissions/apply-now/), submit a statement of purpose, three letters of recommendation and a writing sample.

Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services, 3070 Literatures, Cultures, and Linguistics Bldg., 707 S. Mathews Ave., Urbana, IL 61801. Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 105 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT (https://complit.illinois.edu/academics/graduate-program/) with a minimum score of 24. Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Non-native English speakers must first pass a test of their oral English ability.

Financial Aid

The Program aims to support all graduate students for five years through a combination of fellowships, teaching, and other means, but support is always contingent on the student making timely progress to the degree. Such progress is measured by course load, taking exams on time, grades, and other factors.

for the degree of Master of Arts in Comparative Literature

The candidate must complete a minimum of 32 gh of credit, including two courses in the theory of literature (CWL 501 and CWL 502), and two seminars in comparative literature selected from CWL 551, CWL 561, CWL 571, and CWL 581. At least 12 of the other 16 gh should be taken in two or three national literatures in a distribution approved by the adviser. The candidate must pass a written examination based on a reading list, which is designed to test knowledge of literary history as well as ability to interpret a literary or critical text.

For additional details and requirements refer to the department's graduate handbook (https://complit.illinois.edu/academics/graduate-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Minimum GPA:	3.25

for the degree of Master of Arts in Comparative Literature

1. **Linguistic Mastery:** Mastery of at least three foreign languages (one of which can be English) and a research language.
2. **Comparative and Cross-Cultural Analysis:** Ability to analyze problems and questions that cut across national, linguistic, and cultural lines.
3. **Literary / Critical Theory:** Demonstration of mastery of major fields of theoretical inquiry current in the discipline, such as Marxism, psychoanalysis, post-structuralism, feminism / queer studies, post-colonialism.
4. **Teaching experience:** Ability to teach a wide range of literary topics; put together syllabi, tests, written assignments, and lectures. Familiarity with current trends in pedagogy for language, literature, and culture. Depending on the area of specialization, teaching in the target language or in the Rhetoric program.
5. **Professionalization:** Completion of CWL 582 (Proseminar), including learning to give talks, making a syllabus, converting seminar papers into conference presentations and journal articles, learning to write book reviews, learning to write cover letters, fellowship applications, and grant applications.Preparation for the academic job market in literary studies and other allied fields.Preparation for relevant non-academic jobs, including editing and publishing, museum work, journalism, artistic and creative careers.

Comparative Literature, PhD

for the degree of Doctor of Philosophy in Comparative Literature

A candidate for the Doctor of Philosophy degree must fulfill the general requirements of the Graduate College in addition to those specified for the master's degree. At least 12 additional gh of work, normally at the 500 level, should be taken in courses regularly offered by the literature departments; among these, courses cross listed with the program in comparative literature are especially recommended. The candidate is responsible for a knowledge of the history of the literature in one modern language. The student also selects a period of major interest and is responsible for a knowledge of two other literatures in this period, which are considered as minors. For Western literatures, the periods may be the Middle Ages, Renaissance, Neoclassicism and the Enlightenment, or the modern (nineteenth and twentieth centuries). Chronological variations in coordinating the minors will be allowed for students studying Asian and/or African literatures. A preliminary examination, i.e. a four-part written examination based on the individual program, and an oral examination with emphasis on the thesis project must be passed. The candidate must present an acceptable thesis embracing several national literatures and pass a final oral examination on the thesis.

The Program in Comparative & World Literature offers graduate programs leading to the degrees of Master of Arts and Doctor of Philosophy and is designed to provide a systematic study of subjects and problems common to several literatures. Its purpose is to enable students who have varied linguistic competence and preparation to explore the theory of literature and criticism; the interrelations of several literatures; the main currents, periods, and movements in literary history; the development of literary themes and types; and the relations between literature and the other arts. We consider the Master of Arts program to be the first step toward the Ph.D. degree; we expect students admitted to the M.A. program to receive the M.A. and go on to complete a Ph.D. We therefore do not offer a formal terminal M.A. program.

Admission

A student entering the program should have an undergraduate major in Comparative Literature, English, the classics, or a foreign language. Majors in history and philosophy or other humanistic areas that present suitable linguistic and literary competence may also be granted admission by the Admissions Committee.

Applicants should apply online (https://www.grad.illinois.edu/admissions/apply-now/), submit a statement of purpose, three letters of recommendation and a writing sample.

Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services, 3070 Literatures, Cultures, and Linguistics Bldg., 707 S. Mathews Ave., Urbana, IL 61801. Graduate Record Examination (GRE) scores are required and should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 105 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT (https://complit.illinois.edu/admissions/graduate-admissions/) with a minimum score of 24. Select three of the following: (One of these courses must be cross-cultural.) [1]		12
CWL 551	Seminar Lit Movements	
CWL 561	Seminar Genres - Forms	
CWL 571	Seminar in Literary Relations	
CWL 581	Seminar Lit Themes	

Two courses in the major literature		8
One course in each of the minor literatures of specialization		8
Language Requirement: Command of at least three languages besides English. Three of these four languages must coincide with the student's areas of specialization and with the dissertation field.		
CWL 599	Thesis Research (min/max applied toward degree)	24-32
Total Hours		**64**

Other Requirements

Requirement	Description
Other requirements may overlap	
Students must be enrolled in graduate seminars until the preliminary examinations are taken and passed.	
Masters Degree Required for Admission to PhD?	Yes
Qualifying Eaxam Required:	No
Preliminary Exam Required:	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	3.25

for the degree of Doctor of Philosophy in Comparative Literature

1. **Linguistic Mastery:** Mastery of at least three foreign languages (one of which can be English) and a research language.
2. **Comparative and Cross-Cultural Analysis:** Ability to analyze problems and questions that cut across national, linguistic, and cultural lines.
3. **Literary / Critical Theory:** Demonstration of mastery of major fields of theoretical inquiry current in the discipline, such as Marxism, psychoanalysis, post-structuralism, feminism / queer studies, post-colonialism.
4. **Teaching experience:** Ability to teach a wide range of literary topics; put together syllabi, tests, written assignments, and lectures. Familiarity with current trends in pedagogy for language, literature, and culture. Depending on the area of specialization, teaching in the target language or in the Rhetoric program.
5. **Professionalization:** Completion of CWL 582 (Proseminar), including learning to give talks, making a syllabus, converting seminar papers into conference presentations and journal articles, learning to write book reviews, learning to write cover letters, fellowship applications, and grant applications.Preparation for the academic job market in literary studies and other allied fields.Preparation for relevant non-academic jobs, including editing and publishing, museum work, journalism, artistic and creative careers.

Computer Science, MCS

for the degree of Master of Computer Science in Computer Science (on campus, in Chicago, or online)

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program.

The MCS in Computer Science is a professionally-oriented, coursework-based degree program offered as an on-campus program or online. The online option allows individuals to earn the MCS from a leader in information technology entirely online with no required campus visits. Online students have the option to complete the comprehensive MCS track or the MCS program with a data science track. All online classes are taught by our world-recognized faculty. Online students also receive additional instructional support from Computer Science Graduate Teaching Assistants and program staff. The on-campus MCS program is designed to allow students to complete the degree in as little as one year with a maximum of three continuous semesters. Effective Spring 2023, the MCS program is also delivered in Chicago. Online students and students in the Chicago program have 5 years in which to complete the program.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

for the degree of Master of Computer Science in Computer Science (on campus, in Chicago, or online)

For additional details and requirements refer to the department's Graduate Degree Requirements (https://cs.illinois.edu/academics/graduate/professional-mcs/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; the requirements are listed below:

Code	Title	Hours
Breadth Requirement (http://cs.illinois.edu/academics/graduate/professional-mcs-program/mcs-degree-requirements/)		12-16
Advanced courses – chosen from CS 500 - CS 590 and CS 598; CS 597, or an approved non-CS 500-level course may satisfy 4 credit hours of this requirement.		12
Select one of the following - CS 591 Prof. Development (or comparable work experience in CS); or ENG 572 Professional Practicum (CS); or Elective course (subject to Other Requirements and Conditions)		0-4
Elective courses (subject to Other Requirements and Conditions below)		0-8
Total Hours		**32**

Other Requirements and Conditions

Requirement
Other Requirements and Conditions may overlap
A minimum of 24 CS credit hours must be taken from the University of Illinois at Urbana-Champaign campus.
A minimum of 12 500-level credit hours overall.
A maximum of 4 hours of CS 591 and CS 491 may be applied toward the degree.
A grade of B- or higher is required for Breadth course work.
At most, 12 semester credit hours of previous graduate course work may be transferred and applied to the M.C.S. degree requirements and 12 credit hours of non-degree graduate courses completed in the Department of Computer Science at the University of Illinois at Urbana-Champaign campus may be transferred and applied to the M.C.S. degree requirements.
All degree requirements must be completed within three consecutive semesters (only fall and spring semesters are counted).
Off-campus students have 5 years in which to complete this degree.
The minimum program GPA is 3.0.

for the degree of Master of Computer Science in Computer Science (on campus, in Chicago, or online)

1. Demonstrate in-depth knowledge of a particular subject area and broad knowledge of other areas in Computer Science.
2. Analyze, design, and construct Computer Science-based solutions for current technological challenges.
3. Analyze and be able to articulate the scientific advances and limitations of results described in the research literature.
4. Demonstrate an understanding of and ability to follow ethical standards in research and professional service.

for the degree of Master of Computer Science in Computer Science (on campus, in Chicago, or online)

Admission Requirements

Applicants must hold a bachelor's degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for students entering a Computer Science graduate degree program is a bachelor's in computer science or computer engineering. The Graduate Record Examination (GRE) (http://www.ets.org/) general aptitude tests (Verbal, Quantitative, and Analytical) are not required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the MCS program must have a minimum grade point average (GPA) of 3.20 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department's Prospective Graduate Student Information website (http://cs.illinois.edu/admissions/graduate/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Research assistantships and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships (one of the most common forms of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. Students who are unable to take the iBT or IELTS are required to receive a minimum score of 5 on the OEAI Test (https://linguistics.illinois.edu/testing/oeai/), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

The Department of Computer Science does not offer research or teaching assistantships to students enrolled in our online programs, including the Online MCS.

Computer Science, MS

for the degree of Master of Science in Computer Science

The Department of Computer Science is one of the longest established computer science departments in the world and is consistently ranked as a top-5 graduate program.

The MS in Computer Science is a research-oriented degree that can be counted toward the PhD in Computer Science.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research

Illinois has been an international leader in computing research for almost five decades. Broadly organized around 11 research areas (http://cs.illinois.edu/research/), more than 120 faculty members (http://cs.illinois.edu/people/faculty/) conduct research with over 625 graduate students. They regularly collaborate with researchers across campus, in other departments or research units.

The home of the Department of Computer Science at Illinois is the Thomas M. Siebel Center for Computer Science (http://cs.illinois.edu/about-us/), a state-of-the-art building that opened its doors in 2004. On the north side of campus, home to The Grainger College of Engineering (https://grainger.illinois.edu/), Siebel Center is an interactive computing habitat, made possible by a gift from alumnus Tom Siebel. The vision for the building was not only to create a magnificent space to work in, but to offer opportunities to investigate and apply computing tools on the building itself. Advanced wireless and wired communication networks, sensors, actuators, video capture and display equipment, video walls and information panels and storage and computing capabilities within the building allow researchers to examine communication and computation issues related to pervasive computing, multimedia infrastructure, building intelligence, security and privacy, and art.

for the degree of Master of Science in Computer Science

The Master of Science (MS) in Computer Science is a research-oriented degree that can be counted toward the Computer Science PhD. For additional details and requirements refer to the department's Graduate Degree Requirements (https://cs.illinois.edu/academics/graduate/ms-program/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

The Master of Science (M.S.) in Computer Science is a research-oriented degree that can be counted toward the Computer Science Ph.D. For additional details and requirements refer to the department's Graduate Degree Requirements (http://cs.illinois.edu/academics/graduate/ms-program/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Requirements

Code	Title	Hours
CS 599	Thesis Research (minimum applied toward degree)	4
Breadth Requirement - One course from each of three different core areas (http://cs.illinois.edu/current-students/graduate-students/ms-thesis/)		9-12
Advanced courses – One 500-level course from one of the three areas selected in the Breadth Requirement; Remaining hours from any 500-level CS course (500-590 or 598) except CS 591 or CS 597. An approved 500-level non-CS course may satisfy 4 credit hours of this requirement; CS 599 (thesis) may satisfy 4 credit hours of this requirement.		12
Select one of the following - CS 591 Prof. Development (or comparable work experience in CS); or ENG 572 Professional Practicum (CS); or Elective course (subject to Other Requirements and Conditions)		0-4
Elective courses (subject to Other Requirements and Conditions below)		0-7
Total Hours		**32**

Other Requirements

Requirement
Other Requirements and Conditions may overlap
A minimum of 16 CS credit hours must be taken from the University of Illinois at Urbana-Champaign campus.
A minimum of 12 500-level credit hours overall.
A maximum of 4 hours of CS 591 and CS 491 may be applied toward the degree.
A grade of B- or higher is required for Breadth Requirement course work.

At most, 12 semester credit hours of previous graduate course work may be transferred and applied to the M.S. degree requirements and 12 credit hours of non-degree graduate courses completed in the Department of Computer Science at the University of Illinois at Urbana-Champaign may be transferred and applied to the M.S. degree requirements.

It is each student's responsibility to secure a M.S. thesis advisor and start thesis research no later than the beginning of the third semester in the program.

All degree requirements must be completed within five consecutive semesters (only fall and spring semesters are counted).

The minimum program GPA is 3.0.

for the degree of Doctor of Philosophy in Computer Science

1. Demonstrate in-depth knowledge of a particular subject area and broad knowledge of other areas in Computer Science.
2. Analyze and be able to articulate the scientific advances and limitations of results described in the research literature.
3. Plan and conduct original research that addresses questions of significance in a particular subject area in Computer Science.
4. Demonstrate the ability to effectively write research proposals and results.
5. Present research effectively through oral presentations inside the department as well as at external venues.
6. Demonstrate an understanding of and ability to follow ethical standards in research, teaching, and professional service.
7. Demonstrate the ability to teach concepts in Computer Science at the university level, including classroom management skills, techniques for effective lecturing, and methods for guiding and assessing students.

for the degree of Doctor of Philosophy in Computer Science

Admission Requirements

Applicants must hold a bachelor's degree equivalent to that granted by the University of Illinois at Urbana-Champaign. The recommended background for students entering a Computer Science graduate degree program is a bachelor's or a master's degree (only if applying to the PhD program) in computer science or computer engineering. The Graduate Record Examination (GRE) (http://www.ets.org/) general aptitude tests (Verbal, Quantitative, and Analytical) are no longer required. However, in some cases, GRE general scores may provide helpful supporting information.

Applicants to the computer science PhD program must have a minimum grade point average (GPA) of 3.40 (A = 4.00) in their undergraduate studies (international GPAs are systematically converted) to be considered. The department reserves the right to admit applicants with lower GPAs under rare and exceptional circumstances. If an applicant also holds a graduate degree, the minimum GPA for that degree must be 3.00. Full details of the programs offered by Computer Science, admissibility, application procedures, and deadlines can be found at the department's Prospective Graduate Student Information Web site (http://cs.illinois.edu/admissions/graduate/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) (including other temporary test options) are set by the Graduate College.

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships (one of the most common forms of financial aid for new graduate students in the department) must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. Students who are unable to take the TOEFL iBT or IELTS are required to receive a minimum score of 5 on the OEAI Test (https://linguistics.illinois.edu/testing/oeai/), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Creative Writing, MFA

for the degree of Master of Fine Arts in Creative Writing

The Department of English offers a program of study in Creative Writing leading to the Master of Fine Arts degree. We welcome qualified students who wish to pursue their interests in fiction or poetry writing.

Graduate Degree Programs in Creative Writing

Creative Writing, MFA (p. 1279)

Admission
A candidate for the MFA must spend at least four semesters or the equivalent in residence and complete at least 48 graduate hours. A full-time student typically completes this program in three academic years. Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College.

All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996).

The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, strong recommendations, and above all a compelling writing sample: in short, a demonstration of an academic record that shows promise of a student capable of doing outstanding work in the field and earning a degree within a reasonable time. Preference is given to applicants who will be full-time students and active degree candidates. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is December 1st.

Graduate Teaching Experience
Experience in teaching is considered a vital part of the graduate program and all MFA candidates will have ample opportunity to teach undergraduate writing classes.

Financial Aid
Financial aid is available to students in the form of fellowships, teaching assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website (https://english.illinois.edu/admissions/our-mfa-creative-writing/).

for the degree of Master of Fine Arts in Creative Writing

For additional details and requirements refer to the department's program requirements (http://creativewriting.english.illinois.edu/graduate/requirements/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Workshops		16
Craft course in the appropriate genre		4
Proseminar		4
Approved Literature courses at the 400 and 500 level		8
Electives		8
CW 595	Final Project	8
Total Hours		**48**

Four semesters in residence
Teaching experience is required.
A public reading from the completed project is required for graduation
Minimum 500-level Hours Required Overall: 12
Minimum GPA: 3.0

for the degree of Master of Fine Arts in Creative Writing

---

1. Writing: Students will focus on creating works of high literary quality, honing their own distinctive personal writing styles. They will demonstrate the ability to revise drafts of their work in response to useful critical commentary. Upon completion of the program, students will understand how to create and polish individual shorter works; they will also understand how to compile and complete a book-length manuscript in the genre of their choice.
2. Craft discussion: Students will demonstrate an advanced ability to read, analyze, and discuss published works of literature—especially contemporary literature—from a craft perspective, identifying authorial choices and evaluating the effect of those choices on the work.
3. Literary Community and Profession: Students will demonstrate an understanding of the professional creative writing field with regards to literary journals, presses, and other iterations of the literary community, and will have participated in one or more professional activities, including editorial work on Ninth Letter, giving a public reading, attending a writers' conference, etc.
4. Teaching: Students will learn best practices for leading creative writing workshops and mentoring beginning writers.

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Crop Sciences, MS

for the Master of Science in Crop Sciences (on campus & online)

Admission

Applicants are considered for admission to the Master of Science program if they have a bachelor's or equivalent degree comparable to that granted by the University of Illinois Urbana-Champaign. Admission to the Ph.D. program will be considered for applicants with the M.S., those nearing completion of the M.S., and in some cases, those with the B.S. Because of the diversity of programs in the Department of Crop Sciences, the preparation that is needed varies considerably. Strong letters of reference, evident motivation to undertake graduate study, and good preparation in basic science courses enhance an applicant's credentials. For some programs, greater emphasis is given to previous training in plant sciences, chemistry, or mathematics. A grade point average equivalent to at least a B in the last 60 semester hours of undergraduate course work plus any graduate level work completed is required. All applicants whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official scores are required to be submitted directly from TOEFL/ETS or IELTS to the university. Additional information for international applicants can be found at the Graduate College website (https://grad.illinois.edu/admissions/apply/begin/international/).

Graduate Teaching Experience

Experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Please refer to the following webpage for a detailed listing of our faculty and their areas of interest (https://cropsciences.illinois.edu/people/faculty/).

Financial Aid

Fellowships and assistantships are available to outstanding on campus MS students on a competitive basis. Awards for financial assistance are based principally on a candidate's academic record, statement of plans, and letters of reference.

for the Master of Science in Crop Sciences (on campus & online)

Candidates must complete 32 hours of graduate study as approved by their graduate guidance committee with at least a B average. An oral final examination is required of all M.S. candidates, and written examinations may be required at the option of the examining committee.

The Online M.S. in Crop Sciences program enables students to strengthen their education typically through part-time study, as most students are working professionals. Courses are delivered mainly through online and other distance education technologies and occasional site-based programming (site-based courses are optional and not required to complete the degree). The Crop Sciences Online M.S. degree program is completed as a non-thesis degree. The program has a 30-plus year history of providing high quality University of Illinois Urbana-Champaign courses and began granting off-campus MS degrees in 1986 to agriculture professionals across Illinois, as well as in neighboring states. Students may enroll in individual courses for personal or professional advancement or may apply for admission to the master's degree program in Crop Sciences. Students who successfully complete three qualifying courses may also receive a Professional Development Certificate in Crop Sciences.

The Online M.S. in Crop Sciences program also works in conjunction with the Natural Resources and Environmental Studies Online M.S. program and the Agriculture Education Online M.S. program to offer a diverse set of courses. The Department of Crop Sciences is looking to the future and the needs of non-traditional students. Therefore, new courses are continually in development for online delivery and blended formats. A student may complete their entire degree requirements online from anywhere in the world and they are available to in-state students and out-of-state students at the same tuition rates. For more information on Crop Sciences, the Online M.S. in Crop Sciences degree program or certificate offerings, please visit our programs online (https://cropsciences.illinois.edu/online/).

For additional details and requirements refer to the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; with or without a thesis, the requirements are listed below:

Code	Title	Hours
Thesis Option		
CPSC 594	Professional Orientation CPSC	1
CPSC 598	Seminar (required each semester; maximum applied toward degree)	4
Electives including at least 4 hours of graded coursework at the 500 level other than CPSC 599 (elective courses are chosen in consultation with faculty advisor)		20

CPSC 599	Thesis Research (minimum applied toward degree)	7
Total Hours Thesis		**32**
Non-Thesis Option		
CPSC 594	Professional Orientation CPSC	1
CPSC 598	Seminar (required each semester for on-campus MS program; not required for online MS program)	0 or 4
Electives including at least 4 hours of graded coursework at the 500 level other than CPSC 599 (elective courses are chosen in consultation with faculty advisor)		27-31
Total Hours Non-Thesis		**32**

Other Requirements

Requirement
Other requirements and conditions may overlap
Minimum 500-level Hours Required overall: 12
Minimum GPA: 3.0

for the Master of Science in Crop Sciences (on campus & online)

Thesis

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of their particular disciplinary research area (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will assume responsibility and ownership in research project development and execution.
3. Students will acquire professional scientific writing and communication skills.
4. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
5. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

Non-Thesis

1. Students will be able to read, understand, knowledgeably discuss and summarize in writing the primary scientific literature of one or more disciplinary areas (bioinformatics and statistics, crop genetic improvement, crop production, plant protection, sustainable food systems, and water quality and environmental systems).
2. Students will acquire professional scientific writing and communication skills.
3. Students will develop the capacity to communicate and collaborate across interdisciplinary boundaries.
4. Students will develop the interpersonal skills to be competitive for career opportunities in plant sciences and agriculture.

Online

1. Students will be able to evaluate crop research methods critically and significantly contribute in the research community.
2. Students will be able to apply principles of crop sciences to determine agronomic problems and formulate and implement practical management.
3. Students will be able to describe and critically review concepts and practices associated with agriculture and the environment.
4. Students will be able to critically assess scientific papers. Students will be able to synthesize concepts to solve complex scientific problems.

Please see our webpage (https://cropsciences.illinois.edu/graduate/admissions/) for additional information.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

Please refer to the following webpage for a detailed listing of our faculty and their areas of interest (https://cropsciences.illinois.edu/people/faculty/).

Financial Aid

Fellowships and assistantships are available to outstanding students on a competitive basis. Awards for financial assistance are based principally on a candidate's academic record, statement of plans, and letters of reference.

for the degree of Doctor of Philosophy in Crop Sciences

Students are required to pass a preliminary examination within five semesters of first enrolling, not including the summer terms, and after substantial completion of the Ph.D. graded coursework requirement. The preliminary examination is comprised of both an oral and written component and students are expected to defend their Thesis Proposal at the oral component of the examination. Those students on the BA to PhD plan must also pass a Qualifying Exam. An acceptable dissertation is required. Residence requirements are the same as those of the Graduate College.

For additional details and requirements refer to the department's graduate handbook (https://cropsciences.illinois.edu/academics/graduate-degrees/graduate-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Entering with approved M.S./M.A. degree

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Curriculum & Instruction, CAS

for the Certificate of Advanced Study in Curriculum and Instruction

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better-informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master's degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The four majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), Middle Grades Education (Grades 5-8), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master's students wishing to become licensed teachers in one of these areas should apply to the Early Childhood Education, Elementary Education, Middle Grades, or Secondary Education majors. Master's degree candidates who do not wish to become teachers, or who are already teachers, should apply to the major in Curriculum & Instruction. The EdM is attained through satisfactory completion of coursework, while the MA and MS degrees require the completion and defense of a thesis.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally combined with teacher education. The Ed.D. program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed by a student attending full-time in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require five years of full-time study.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, an updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/ci/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Facilities and Resources

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

for the Certificate of Advanced Study in Curriculum and Instruction

A list of additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search/programs/?degree=cas&department=ci) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education. (p. 1998)

If the student does not have a Master's degree from the University of Illinois Urbana-Champaign, the foundation courses listed below must be completed.

Code	Title	Hours
Foundations Hours		**0 or 8**
Choose at least two foundation courses from the Course List tab. At least one of these two courses must be a course from outside the degree-granting department.		
Elective Hours		**24-32**
General Coursework Required: 16 hours		
Project/Independent Study Hours (min/max applied toward degree): 0-8		
Total Hours		**32**

Other Requirements (may overlap)

Requirement	Description

Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Facilities and Resources

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

for the degree of Master of Education in Curriculum and Instruction

The Department of Curriculum and Instruction offers many programs leading to the degree of Master of Education (Ed.M.). A list of programs and additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search/programs/?degree=edm&department=ci) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/) or Digital Learning (http://catalog.illinois.edu/graduate/education/concentration/digital-learning/).

College of Education Admissions & Requirements (https://education.illinois.edu/programs/grad/how-to-apply/?url=/programs/grad)

Curriculum and Instruction: Trauma-Informed Practice and Pedagogy, EDM

for the Graduate Concentration in Trauma-Informed Practice and Pedagogy

The master's concentration in Trauma-informed Practice and Pedagogy will introduce students to the incidence, impact, and causes of trauma in children including individual trauma and systems of oppression, bias, and discrimination present in our education system. Participants will learn to recognize the signs of trauma and how to use trauma-informed practices, while recognizing and seeking to eliminate the causes of trauma in their circle of influence and in the larger education system.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, an updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/ci/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Facilities and Resources

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Curriculum & Instruction, MA

for the degree of Master of Arts in Curriculum and Instruction

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better-informed practitioners who serve as leaders for educational reform in local schools and school districts.

Also offered are master's degree programs leading to teacher licensure for individuals who have a degree in a field other than education and wish to become teachers. The four majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), Middle Grades Education (Grades 5-8), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master's students wishing to become licensed teachers in one of these areas should apply to the Early Childhood Education, Elementary Education, Middle Grades, or Secondary Education majors. Master's degree candidates who do not wish to become teachers, or who are already teachers, should apply to the major in Curriculum & Instruction. The EdM is attained through satisfactory completion of coursework, while the MA and MS degrees require the completion and defense of a thesis.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally combined with teacher education. The Ed.D. program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed by a student attending full-time in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require five years of full-time study.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, an updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as undergraduate students.

Only master's students wishing to become licensed teachers in one of these areas should apply to the Early Childhood Education, Elementary Education, Middle Grades, or Secondary Education majors. Master's degree candidates who do not wish to become teachers, or who are already teachers, should apply to the major in Curriculum and Instruction. The EdM is attained through satisfactory completion of coursework while the MA and MS degrees require the completion and defense of a thesis.

Two doctoral degree programs are offered. The Ph.D. program prepares degree candidates for careers involving research and scholarship, including those in colleges and universities where research is generally combined with teacher education. The Ed.D. program prepares scholarly practitioners for leadership positions in teacher training institutions, state education agencies, and public school districts.

Length of time for a degree: an Ed.M. program can be completed by a student attending full-time in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete. Doctoral programs usually require five years of full time study.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program. Note: The master's degree with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction's TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test, and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed program of study office (http://www.grad.illinois.edu/admissions/depts/) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook English Proficiency Requirements for Admission (http://grad.illinois.edu/admissions/instructions/04c/).

Faculty Research Interests

For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

Facilities and Resources

Departmental resources consist of cooperation with Children's Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: *International Journal of Education & the Arts, Journal of Curriculum Studies*, and *American Educational Research Journal.* The department also has available resources and some workshops provided during the academic year. Program areas (including CREATE, DELTA, Language & Literacy, and MSE) offer discipline-specific resources.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on university resources can be found at the GradMAP pages website (http://www.grad.illinois.edu/current-students/).

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://

Independent Study (min/max applied toward degree)		0-12
Research Coursework		16-20
All students will take a minimum of 16-20 credit hours, depending on area of methodology focus, in approved research methods courses. (https://education.illinois.edu/student-resources/graduate/coe-graduate-handbook/phd/)		
Total Hours		**64**

Other Requirements

Requirement	Description
Master's Degree Required for Admission to Ph.D.	
Residency	2 consecutive full-time (12 hours) semesters of study on campus
Early Research Requirement	
Qualifying Exams	
Human Subjects Approval	
Preliminary Exam	
Final Exam/Dissertation Defense	
Dissertation Deposit	
Minimum GPA	3.0

for the degree of Doctor of Philosophy in Curriculum & Instruction

1. Students will develop a deep knowledge of a content area connected to curriculum and instruction.
2. Students will demonstrate the ability to plan, implement, analyze data, and author academic papers.
3. Students will read, interpret, and critique scholarship in their academic field and across multiple fields.
4. Students will understand issues related to school and society including existing inequities.
5. Students will connect research with instructional practices that support learning.

CyberGIS and Geospatial Data Science, MS

for the degree of Master of Science in CyberGIS and Geospatial Data Science (online)

CyberGIS – a new generation of geographic information science and systems (GIS) in the era of artificial intelligence and big data – represents the latest innovative development in the fast-growing field of geospatial data science. Combining advances in high-performance and data-intensive computing with developments in geospatial data analysis, management, processing, and visualization, cyberGIS has rapidly emerged as a major force in private and public organizations and in higher education for harnessing the rapid geospatial data revolution. The fully-online masters degree program in CyberGIS and Geospatial Data Science requires 32 credit hours (no thesis required). Students will work with their program advisor to individualize their program and the required capstone research project.

Admission

Applicants must have a Bachelor's degree (BA or BS) from an accredited U.S. college or an approved institution of higher learning abroad, ideally in Geography, Computer and Information Sciences, or GIS but degrees in other fields will be considered; with a GPA of 3.0/4.0 or higher for the final 60 semester hours. Students who do not meet the GPA criterion may still be eligible to enroll if they have relevant experience outside of the classroom. Language test (IELTS or TOEFL) scores are required for applicants whose native language is not English.

Facilities and Resources

The department hosts several state-of-the-art research laboratories maintained by individual faculty members. The CyberInfrastructure and Geospatial Information (CIGI) Lab (https://cigi.illinois.edu/) researches and develops cutting-edge cyberinfrastructure to advance geospatial science and technologies. The department also sponsors the CyberGIS Center for Advanced Digital & Spatial Studies (https://cybergis.illinois.edu/) whose mission is to empower advanced digital and spatial studies through innovation of CyberGIS technologies and applications. The lab utilizes several high performance computers and servers for performing computationally-intensive geographic analysis and problem solving in various research, education, and outreach contexts.

Financial Aid

This online program is self-supporting and DOES NOT accept the following tuition and fee waivers (TFWs): Non-Academic waivers (including Illinois employees and employees of other state institutions); Academic waivers from Illinois, UIC and UIS employees; Related Agency waivers; waivers granted through fellowships/assistantships as governed by the Graduate College at Illinois; or Retiree waivers. Students in these programs are not eligible to hold a waiver-generating graduate appointment (assistantship or fellowship). Full-time employees may be admitted to these programs but their employee waiver is not eligible for use towards this program. This program does accept statutory waivers (veteran grants, etc.)

for the degree of Master of Science in CyberGIS and Geospatial Data Science (online)

Code	Title	Hours
Complete 2 of the following courses focusing on GIS:		6-7
GGIS 403	Geographic Information Science and Systems	
GGIS 477	Introduction to Remote Sensing	
GGIS 480	Principles of Geographic Information Science	
Complete 2 of the following courses focusing on core concepts of cyberGIS and geospatial data science topics:		8
GGIS 407	Foundations of CyberGIS & Geospatial Data Science	
GGIS 507	High-Performance Geospatial Computing	
GGIS 570	Advanced Spatial Analysis	
Complete the following 2 advanced courses in cyberGIS and geospatial data science:		8
GGIS 517	Geospatial Visualization & Visual Analytics	
GGIS 527	Geospatial Artificial Intelligence & Machine Learning	
Additional 400-500 level courses as needed to meet or exceed the minimum credit hour requirement of the program. Selected in consultation with the student's advisor; chosen from courses in the GIS and core concepts lists (if not taken to meet those requirements) or from a list of electives maintained by the department.		6
GGIS 598	Graduate Capstone Project	
Total Hours		**32**

Other Requirements

Code	Title	Hours
Other requirements may overlap		
Minimum Hours Overall Required Within the Unit		16
Requires a written capstone report		
At least 12 of the 32 required hours must be in 500-level courses (8 in GGIS).		
Course substitutions are permitted with the consent of the program coordinator.		
A maximum of 2 elective courses may be taken CR/NC.		
All students must maintain a minimum grade point average (GPA) of 3.0 (A = 4.0). If the GPA falls below this minimum after 12 or more graduate hours of graded coursework, it must be raised to 3.0 or above after the completion of 12 additional graduate hours of graded coursework and must be maintained at or above the minimum thereafter.

Dance, MFA

for the degree of Master of Fine Arts in Dance

The MFA Curriculum is designed to promote a candidate's progress through our stated objectives: Choreographing, Communicating, Moving, Teaching, Community Building, and Career Planning.

Included in these are courses in dance studies, somatics, pedagogy, and two semesters devoted to an innovative lab team taught by our faculty and designed in collaboration with students. The final year of study is devoted to synthesizing the above objectives evidenced by the production of the candidate's choreography, their written thesis document, oral presentation, and plans for propelling the student's career into the professional sphere.

The Department of Dance offers a graduate program leading to the Master of Fine Arts degree. The mission of the MFA Program is to foster substantive choreographic research that posits dance as a force in contemporary culture. The program embraces a wide spectrum of individual movement research and embodied practice to create a dynamic learning atmosphere for critical engagement with choreographic process.

The Dance Department expects MFA candidates to conduct a creative inquiry that leads to the development of a sophisticated sense of self-definition. Individual research and analysis should culminate in the development of a personal artistic process and mission and should be evident in the following contexts:

- Choreographing- Candidates will develop a distinctive choreographic research methodology and demonstrate its skillful application in a performative context. This ideology must establish solid foundation for ongoing research and engagement that contributes to the global dialogue about dance and contemporary culture.
- Communicating- Candidates will develop the ability to express their choreographic vision and process in verbal and written language that is clear, cogent, and convincing and demonstrates clear analytic skill, critical thinking, awareness of historical context, and knowledge of contemporary culture.
- Moving- Candidates will demonstrate a commitment to movement investigation and practice that defines, advances, and sustains their choreographic vision.
- Teaching- Candidates will apply their research vision in clear pedagogic principles while fostering a stimulating teaching/ learning environment.
- Career Planning- Candidates are assessed on their ability to develop innovative career strategies in order to advance their artistic mission in the field and demonstrate the capacity to implement these plans with professionalism in all the above contexts.
- Community Building- Candidates commit to sharing research, collectively solving problems, opening ourselves to new perspectives, offering well considered feedback to our peers, exploring collaborative teaching opportunities, engaging in vigorous debate, and bringing our full selves to the experience.

Admission Requirements

Prerequisites for admission to the MFA program are:

1. An undergraduate degree and significant experience in dance is required.
2. Demonstrated choreographic achievement and potential to make innovative contributions to the field.
3. Demonstrated potential to engage in critical thinking and writing.
4. A minimum grade point average of 3.0 on a 4 point scale, computed from the last 60 hours of undergraduate work and any graduate work completed.

International students must be eligible for full status admission. International students who receive a TOEFL score greater than 103 on the internet-based test, 257 on the computer-based test, or 613 on the paper test are eligible for full status admission. Students with these scores are exempt from the English as a Second Language Placement Test. The GRE is not required.

Faculty Research Interests

An extraordinary faculty of artists, researchers and scholars has gathered at Illinois, who are creating new paradigms for interactions between the professional arena and the academic training ground. Our group of professional artists includes Sara Hook, Betsy Brandt, Roxane D'Orleans Juste, Paige Cunningham Caldarella, Jennifer Monson, C. Kemal Nance Ph.D., Rebecca Nettl-Fiol, Tere O'Connor, Cynthia Oliver Ph.D., Alexandra Barbier, Rachel Rizzuto, Serouj Aprahamian Ph.D., and John Toenjes, all of whom share a commitment to teaching and preparing students for leadership roles in the field of dance.

Financial Aid

Two forms of financial aid are offered to graduate students by the Department of Dance:

- Teaching and administration assistantships are available to graduate students. Assistantships of 25% or greater qualify the student for a tuition waiver. All students are required to apply for Federal Work Study.

- A variety of Fellowships are available through The Graduate College each year, including: (A full listing of Fellowships (https://grad.illinois.edu/fellowships/about/) is available online.)
  - The Creative and Performing Arts Fellowship, which may include stipends up to a maximum of $6,000 for a student demonstrating outstanding choreographic and performance talent.
  - The Graduate College Fellowship for Underrepresented Students provides fellowships in the amount of $8,000 and are available to outstanding minority students.

Prospective MFA candidates are encouraged to apply for financial assistance through the Office of Student Financial Aid, 420 Student Services Bldg., University of Illinois Urbana-Champaign, Champaign, IL 61820. (217) 333-0100.

for the degree of Master of Fine Arts in Dance

The Department of Dance expects MFA candidates to conduct in-depth creative inquiries that culminate in the development of a personal artistic process and mission that are evident in the following contexts:

1. **Choreographing:** Candidates will develop a distinctive choreographic research methodology and demonstrate skillful application in a performative context. This ideology must establish solid foundation for ongoing research and engagement that contributes to the global dialogue about dance and contemporary culture.

2. **Communicating:** Candidates will develop the ability to express their choreographic vision and process in verbal and written language that is clear, cogent, and convincing and demonstrates analytical skill, critical thinking, awareness of historical context, and knowledge of contemporary culture.
3. **Moving:** Candidates will demonstrate a commitment to movement investigation and practice that defines, advances, and sustains their choreographic vision.
4. **Teaching:** Candidates will apply their research vision in clear pedagogic principles while fostering a stimulating teaching/learning environment.
5. **Career Planning and Professionalism:** Candidates are assessed on their ability to develop innovative career strategies to advance their artistic mission in the field and demonstrate the capacity to implement these plans with professionalism in all the above contexts. Community problem solving and conflict resolution is an invaluable leadership skill and is essential for success in a career in dance. Students will demonstrate a willingness to engage in community problem solving and transparent communication and be responsive to the power dynamics inherent in the fields of dance and academia.
6. **Community Building:** Candidates commit to sharing research, collectively solving problems, opening ourselves to new perspectives, offering well considered feedback to our peers, exploring collaborative teaching opportunities, engaging in vigorous debate, and bringing our full selves to the experience.

Early Childhood Education, EdM

for the degree of Master of Education in Early Childhood Education with teaching licensure

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Master's degree programs leading to teacher licensure are offered for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as do the undergraduate students in the programs.

Only master's degree students who wish to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master's candidates who do not wish to become teachers, or who already are teachers, should apply to the major in Curriculum and Instruction.

Length of time for a degree: An Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program. Note: The master's degree with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction's TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test, and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score, or evidence of spoken English language proficiency; contact your proposed program of study office (http://www.grad.illinois.edu/admissions/depts/) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook English Proficiency Requirement for Admission (http://www.grad.illinois.edu/admissions/instructions/04c/).

Faculty Research Interests

For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

Facilities and Resources

Departmental resources consist of cooperation with Children's Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: *International Journal of Education & the Arts, Journal of Curriculum Studies*, and *American Educational Research Journal.* The department also has available resources and some workshops provided during the academic year. Program areas (including CREATE, DELTA, Language & Literacy, and MSE) offer discipline-specific resources.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on university resources can be found at the GradMAP pages website (http://www.grad.illinois.edu/current-students/).

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). **Please note: Graduate students employed as Staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Award or Scholarship.**

for the degree of Master of Education in Early Childhood Education with teaching licensure

Additional requirements can be found on the program's website, (https://education.illinois.edu/ci/programs-degrees/ec/) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/), and the Field Placement Information (http://education.illinois.edu/sce/).

Students may select a concentration in Bilingual-Bicultural Education (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/) or Digital Learning (http://catalog.illinois.edu/graduate/education/concentration/digital-learning/).

East Asian Languages & Cultures, MA

for the degree of Master of Arts in East Asian Languages & Cultures

Admission

Applicants are expected to have a strong background in at least one East Asian language; normally, this means a minimum of two years of formal study. Applicants to the graduate program must submit an application for admission online (https://ealc.illinois.edu/academics/degree-programs/graduate/graduate-admissions/) and submit a statement of purpose, three letters of reference completed by teachers, advisers, or recent employers, and a 10-20 page writing sample. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
4080 LCLB
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are recommended but not required. They should be submitted to institution code 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 103 on the internet-based test (iBT) for admission with full standing; they must also pass the speaking sub-section of the iBT with a minimum score of 24 (https://grad.illinois.edu/Admissions/instructions/04c/). Students with a B.A. or B.S. only should apply to the M.A. Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Therefore, applicants are requested to include information on teaching background as part of the application, and students can normally be expected to teach at least one semester as part of their graduate experience. Non-native English speakers must first pass a test of their oral English ability.

Financial Aid

The Department makes every effort to assist graduate students in securing financial aid. Financial aid packages usually combine some form of fellowship support with teaching or research assistantships in a manner that allows for both teaching experience and timely completion of the degree. In recent years, almost all EALC graduate students have received some form of financial support. Financial aid for graduate students in the Department of East Asian Languages and Cultures may include:

- University Fellowships
- Foreign Language and Area Studies (FLAS) Fellowships
- Illinois Global Institute (IGI) Fellowships
- University Dissertation Completion Fellowships
- Minority Academic Partnership Plan (MAPP) Fellowships
- Teaching assistantships
- Research assistantships

for the degree of Master of Arts East Asian Languages and Cultures

For additional details and requirements refer to the department's guide to Graduate Programs (http://www.ealc.illinois.edu/programs/graduate/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
Two 500-level courses in the major field including one course designated as a research seminar in which the student produces a research paper using Asian language sources.		8
EALC 500	Proseminar in EALC	4
Distribution requirements. a minimum of two (8 hours) 400- or 500-level courses that are: 1. outside the major field of interest. 2. in an East Asian culture other than the major areas of interest. 3. in a Second Period (modern or premodern)		8
Elective hours		8

Language Requirement: Candidates must demonstrate a knowledge of one East Asian language at the fourth-year level by satisfactory completion of appropriate (400-level) coursework or examination and passage of a written examination covering material studied while in residence.

East Asian Languages and Cultures, PhD

for the degree of Doctor of Philosophy in East Asian Languages & Cultures

Admission

Applicants to the PhD program normally must hold a master's degree in East Asian studies or a related discipline with an East Asian concentration.

Candidates for the PhD may specialize in culture (e.g., religion, literature, history, anthropology), language acquisition, or language pedagogy, with a major concentration in China, Japan, or Korea.

Other general requirements include: an annual review of progress, including an evaluation of research capability; a written and oral preliminary examination in the major and two minor fields (after completion of coursework); presentation of a dissertation proposal (often as part of the preliminary exam).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. Therefore, applicants are requested to include information on teaching background as part of the application, and students can normally be expected to teach at least one semester as part of their graduate experience. Non-native English speakers must first pass a test of their oral English ability.

Financial Aid

The Department makes every effort to assist graduate students in securing financial aid. Financial aid packages usually combine some form of fellowship support with teaching or research assistantships in a manner that allows for both teaching experience and timely completion of the degree. Courses in the major field defined by culture and discipline (500-level)		16
Research seminars (500-level)		8
Elective 500-level courses		8
Two graduate courses in a second discipline and two in a second culture must be completed as part of the Ph.D. coursework		
Language Requirement:		
Candidates must demonstrate a knowledge of one East Asian language at the fourth-year level by satisfactory completion of appropriate (400-level) coursework or examination and passage of a written examination covering material studied while in residence.		
Demonstration of proficiency in a second language relevant to the student's course of study usually Chinese, Japanese, Korean evidenced by either a) completion of minimum of two years of an approved sequence courses; or b) by examination.

for the degree of Doctor of Philosophy in East Asian Languages & Cultures

1. **Learning goal in East Asian languages:** Language proficiency in two East Asian languages.
2. **Learning goal in East Asian disciplines:** Familiarity with a major field and at least one minor field outside of the student's focused area to broaden students' perspectives and ability to conduct interdisciplinary research and to teach general courses.
3. **Learning goal in East Asian periods:** Understanding of both modern and pre-modern periods of East Asian societies.
4. **Learning goal in teaching preparedness:** Proficiency in teaching methodologies to teach languages or to teach Gen-Ed courses.
5. **Learning goal in research:** Completion of MA thesis or qualifying exams in three fields for MA students. Three qualifying exams, oral exam, and the completion of the dissertation and defense for Ph.D. students.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Ecology, Evolution, & Conservation Biology, MS

for the degree of Master of Science in Ecology, Evolution & Conservation Biology

The Program in Ecology, Evolution and Conservation Biology (PEEC) is an interdepartmental program designed to provide individualized training in preparation for careers in these disciplines. Because of the breadth of fields covered by this program, there will be no fixed course requirements other than attendance at the program's seminar series and annual graduate student symposium. Courses taken by a student and the student's Advisory Committee generally will come from multiple departments. The goal of the program's regulations is to allow maximum flexibility while providing close supervision, with the outcome of producing scientists who are broadly educated and technically competent in ecology, evolutionary biology and associated disciplines. The program offers M.S. and Ph.D. degrees.

Admission

Prospective candidates must meet the requirements for admission set by the Graduate College of the University of Illinois Urbana-Champaign. Only applicants who have graduated from an accredited college or university and who hold or will be granted a baccalaureate degree (or its equivalent) comparable in content and completed credit hours to that granted by the University of Illinois Urbana-Champaign will be considered. Applicants must have a minimum grade-point average of 3.0 (A = 4.0) computed from the last two years of undergraduate (and any graduate) work completed. The program will give preference to candidates who hold a degree in biology or a closely related discipline and show promise of excellence in research and teaching. Typically, only students with strong letters of recommendation and a GPA well above the minimum stated above will be admitted. Demonstration of academic excellence by other means (e.g., extensive field or laboratory research experience) will also be considered. The Admissions Committee will make decisions concerning admission. For students whose native language is not English, the Program requires a minimum paper-based TOEFL score of 613 (257 on the computer-based test or 103-104 on the web-based test).

Financial Aid

Students admitted to the Program are typically offered two years of support for the M.S. degree and five years of support for the Ph.D. Support consists of fellowships, teaching assistantships or research assistantships. Such support typically comes with a waiver of tuition, service fees, or both. Continued offers of assistantships or fellowships each academic year will depend on an evaluation of satisfactory progress by the Director of the Program. Students who require more than two years to complete the M.S. degree or five years to complete the Ph.D. degree must submit a written petition to the Director of the Program, supported by their Advisor, to be considered for an additional year of support.

for the degree of Master of Science in Ecology, Evolution & Conservation Biology

All students must register for and attend the weekly PEEC seminar series (IB 546A) each semester in residence. An orientation seminar (IB 546B) must be taken the first fall semester in residence. Excuses because of conflicts must be approved by the Director of the Program. Graduation requires the completion of a thesis. Student research will be guided and approved by an Advisory Committee of three faculty from at least two departments, including the Major Advisor who will serve as chair. The director of the program must approve membership of the Masters Advisory Committee.

For additional details and requirements refer to the Program's g (http://sib.illinois.edu/peec/current/)raduate handbook (https://sib.illinois.edu/academics/graduate-programs/program-ecology-evolution-conservation-biology/graduate-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Science in Ecology, Evolution & Conservation Biology

Since the subject matter of our program is interdisciplinary and broad, there is no one set of subject-based learning outcomes that is suitable for the evaluation of our graduate students. Instead, we will focus on appropriate research and professional development skills.

1. Design and implement independent research and integrate and apply core knowledge related to their field in 3 core areas out of 6 (behavior, conservation biology, ecology, evolution, genetics/ genomics, physiology/ anatomy).
2. Demonstrate effective oral and written communication skills

   a. Presentations
   b. Publications
   c. Grant writing
3. Apply rigorous statistics/analytical methods that typify their area of study
4. Professional skills
   a. Data management
   b. Citation management
   c. Mentoring
   d. Ethics
   e. Professionalism
   f. Networking
5. Teaching experience
   a. Lead Discussions/Lab Activities Effectively
   b. Effective in the presentation of information/lecture
   c. Consistent Grader with meaningful feedback to students
   d. Genuine concern for the learning outcomes of all students

Ecology, Evolution, & Conservation Biology, PhD

for the degree of Doctor of Philosophy in Ecology, Evolution & Conservation Biology

The Program in Ecology, Evolution and Conservation Biology (PEEC) is an interdepartmental program designed to provide individualized training in preparation for careers in these disciplines. Because of the breadth of fields covered by this program, there will be no fixed course requirements other than attendance at the program's seminar series and annual graduate student symposium. Courses taken by a student and the student's Advisory Committee generally will come from multiple departments. The goal of the program's regulations is to allow maximum flexibility while providing close supervision, with the outcome of producing scientists who are broadly educated and technically competent in ecology, evolutionary biology and associated disciplines. The program offers M.S. and Ph.D. degrees.

Admission

Prospective candidates must meet the requirements for admission set by the Graduate College of the University of Illinois Urbana-Champaign. Only applicants who have graduated from an accredited college or university and who hold or will be granted a baccalaureate degree (or its equivalent) comparable in content and completed credit hours to that granted Illinois will be considered. Applicants must have a minimum grade-point average of 3.0 (A = 4.0) computed from the last two years of undergraduate (and any graduate) work completed. The program will give preference to candidates who hold a degree in biology or a closely related discipline and show promise of excellence in research and teaching. Typically, only students with strong letters of recommendation and a GPA well above the minimum stated above will be admitted. Demonstration of academic excellence by other means (e.g., extensive field or laboratory research experience) will also be considered. The Admissions Committee will make decisions concerning admission. For students whose native language is not English, the Program requires a minimum paper-based TOEFL score of 613 (257 on the computer-based test or 103-104 on the web-based test).

Financial Aid

Students admitted to the Program are typically offered two years of support for the M.S. degree and five years of support for the Ph.D. Support consists of fellowships, teaching assistantships or research assistantships. Such support typically comes with a waiver of tuition, service fees, or both. Continued offers of assistantships or fellowships each academic year will depend on an evaluation of satisfactory progress by the Director of the Program. Students who require more than two years to complete the M.S. degree or five years to complete the Ph.D. degree must submit a written petition to the Director of the Program, supported by their Advisor, to be considered for an additional year of support.

for the degree of Doctor of Philosophy in Ecology, Evolution & Conservation Biology

All students must register for and attend the weekly PEEC seminar series (IB 546A) each semester in residence. The Director of the Program must approve excuses because of conflicts. An orientation seminar (IB 546B) must be taken the first fall semester in residence.

No later than their second semester in the program, the student in consultation with their Major Advisor will select members of the student's Doctoral Committee, which will meet annually with the student to plan coursework and research and to review and facilitate progress toward the degree.

The faculty constituting a student's Doctoral Committee must come from two or more departments, comprise a minimum of four members (including the Major Advisor), be familiar with the student's area of research interest, and be approved by the Director of the Program. The chair of the Doctoral Committee is typically the Major Advisor, provided that the advisor is both a member of the University's Graduate Faculty and the Program in Ecology, Evolutionary and Conservation Biology. If this is not the case, the Director of the Program will appoint a chairperson who fulfills these requirements from among the committee membership. The Doctoral Committee will be responsible for administering the necessary examinations. No later than their sixth semester in the program, and preferably in their fifth semester, doctoral students must take a Preliminary Examination. For this exam, a member of the Doctoral Committee other than the major advisor will be appointed chair by the Director of the Program. The first part of the three-hour oral exam will be general and cover the student's three core areas of emphasis. The second part of the exam will be a defense of the research proposal. Two weeks prior to the exam, the student must present to the Doctoral Committee a proposal describing the objectives of the research project, the experimental plan and rationale, the results of pilot studies, and a tentative timetable for its completion. The student will present evidence of feasibility and significance of the proposal along with any preliminary results, but the main research for the dissertation shall not have been performed prior to the Preliminary Examination. A detailed report of the exam and a copy of the research proposal shall be submitted to the Director of the Program. A passing evaluation qualifies the student as a Ph.D. candidate. A failing evaluation will require the student to take a second preliminary examination no later than the following semester. A second failure will result in dismissal from the program.

Upon completion of a dissertation and the other requirements of the program, the student shall be subject to a Final Examination, which shall consist of a defense of the dissertation. Copies of the completed dissertation, approved by the Major Advisor, should be submitted to the Doctoral Committee at least two weeks prior to the Final Examination. The dissertation will be judged in relation to published scholarly work in the field, and students are encouraged to begin publishing their results before taking their Final Examination. Passing this exam and presentation of the dissertation by the

student at a public seminar sponsored by the program qualifies the student for the Ph.D. degree. Failure will require the student to conduct additional research and to repeat the Final Examination.

For additional details and requirements refer to the Program's graduate handbook (https://sib.illinois.edu/academics/graduate-programs/phd-programs/program-ecology-evolution-conservation-biology/current/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Economics, MS

for the Master of Science in Economics

Admission
Admission to the Ph.D. program is available only for the fall semester. In addition to the standard undergraduate preparation in economics, students are expected to have had at least two semesters of calculus and one of linear algebra to be admitted to the Ph.D. program. The results of the Graduate Record Examination (GRE) should accompany applications for admission. Graduate College admission requirements apply. In addition, international students must submit Test of English as a Foreign Language (TOEFL) or IELTS results; if they wish to apply for a teaching assistantship, the Test of Spoken English (TSE) or completion of the speaking section of the TOEFL-iBT or IELTS is also required.

Graduate Teaching Experience
Experience in teaching is considered an important part of the graduate program and is encouraged as part of the academic work of all Ph.D. candidates in this program.

Financial Aid
In recent years, the Department of Economics has been able to offer assistantships to most students who meet the standards for admission or continuation in the Ph.D. program. In order to qualify for a teaching assistantship, non-native speakers of English must pass a speaking proficiency test of the English language.

for the Master of Science in Economics

1. Research Skills: The main objective of the program is to train students to become independent researchers, who are able to produce high-quality research for both academic and non-academic settings. This requires students to learn how to identify interesting questions, find creative solutions, and learn how to present the results of their work to the scientific community.
2. Analytical Skills: We want to make sure that students have all the mathematical and statistical tools necessary for their future careers. This includes a solid foundation in the core areas of Economics: Microeconomics, Macroeconomics, and Econometrics.
3. Problem Solving Skills: We want to teach students how to solve complex problems, by applying the technical tools that they have acquired, and by identifying and correctly using data sources.
4. Expertise in a Student's Field of Research: Students need to acquire a solid foundation in their chosen field of research. They should be familiar with the key past and present contributions in their area.
5. Presentation and Writing Skills: To be successful in the program and their future career, students must successfully present their work both in seminars and in written form.

Economics: Policy Economics, MS

for the Master of Science in Economics, Policy Economics Concentration

This is a specially designed one- to two-year program to address the needs of two groups of students. One is promising young professionals and administrators who need additional training in the areas of economic analysis and quantitative techniques. The other is students who are potentially interested in pursuing a Ph.D. degree but require additional qualification to enable them to do so. While earning the master's degree and acquiring the necessary tools for further studies, they will learn if the pursuit of a Ph.D. degree is within their reach and suits their purposes.

Students enter the program only in the fall term.

The required coursework is further enriched through

1. Academic advising wherein an academic advisor with an open-door policy allows the MSPE students to drop by his office at their convenience, discuss their academic questions with him, and re-optimize their program of study on a continual basis. The academic advisor also provides guidance on study plans beyond graduation and provides support in achieving them;
2. An orientation program that includes an intensive mathematics course; this course serves as a refresher for the math content to be utilized during the students' courses in the program;
3. Opportunities to participate in field trips to observe the operation of financial institutions, modern industrial production facilities, federal and state government agencies, and international institutions;
4. Scheduled lectures by outstanding, internationally known economists;
5. Discussion groups and tutoring for participants who are having difficulty;
6. Program staff assistance with visas, housing, and other nonacademic concerns; and
7. Participation in social activities, including graduation dinners, holiday parties, picnics, and special luncheons.

This is a designated full-cost recovery program and no financial aid is available for the students in this program.

Please see our website for detailed information on the MSPE Program (https://economics.illinois.edu/mspe/).

The minimum length of stay in the Program is one year (fall and spring semesters plus one summer session).	
Minimum Hours Required Within the Unit:	32
Minimum 500-level Hours Required Overall:	32
Minimum GPA:	3.0

for the Master of Science in Economics, Policy Economics Concentration

1. **Basic Training Economics:** Develop in-depth competency in the core areas of economics: microeconomic theory, macroeconomic theory, and econometrics. Develop additional expertise through elective coursework in one area of specialization such as advanced econometrics, development economics, international economics, monetary economics, public economics, and industrial organization.
2. **Quantitative Reasoning:** Develop mastery over statistical and econometric techniques with the objective of being able to construct economic arguments from empirical evidence. Specifically, students will learn how to obtain and/or collect data, apply the appropriate econometrics technique to develop empirical evidence, and interpret the results of such analyses.
3. **Critical Thinking:** Apply economic analysis to everyday problems in order to understand current and historical events, evaluate specific policy proposals, and compare arguments with different conclusions to a specific issue or problem while assessing the role played by assumptions behind the different conclusions.
4. **Preparation for Ph.D. programs:** Prepare students to pursue a doctorate in economics and provide the opportunity for those students who meet certain requirements to enter the Ph.D. program at UIUC.
5. **Global Consciousness and Cultural Awareness:** Enrich the student learning experience through seminars featuring guest speakers, through field trips to US corporations and US economic and political institutions, and through various social activities.

for the Doctor of Philosophy in Economics

Students must pass comprehensive qualifying examinations on Econometrics, Macroeconomics and Microeconomics. Those who fail the comprehensive examinations will have a 2nd chance in the start of the fall semester and a 3rd chance at the end of the fourth semester (in this 3rd chance they will take the exams with the first year students of the next cohort). Students who have failed the 3rd chance will not be allowed to register for the following year. Upon meeting course and GPA requirements, they will be eligible to receive a master's degree in Economics, provided they have not previously received such a degree from another institution.

Candidates must also successfully complete two fields through coursework and/or a written examination. A research paper must be submitted prior to the start of the third year and approved prior to the end of that year. Students who fail to meet these deadlines will have reduced financial support and be placed on academic probation. Unless they return to good standing by satisfying the requirement, they will be dropped from the program at the end of the following semester.

A dissertation is also required. In addition, candidates are required to give an oral defense of the dissertation proposal and pass an oral final examination covering the research. A student with an appropriate background who devotes full time to graduate work can complete the Ph.D. degree in four years beyond the bachelor's degree. An additional year or more is usually necessary, especially for those holding part-time assistantships. Students in the Ph.D. program may earn a master's degree as they work toward the Ph.D. degree.

The candidate for a Ph.D. may specialize in the following fields:

- microeconomic theory
- public economics
- macroeconomic theory
- international economics
- labor economics
- development economics
- mathematical economics
- econometrics
- industrial organization

Admission
Admission to the Ph.D. program is available only for the fall semester. In addition to the standard undergraduate preparation in economics, students are expected to have had at least two semesters of calculus and one of linear algebra to be admitted to the Ph.D. program. The results of the Graduate Record Examination (GRE) should accompany applications for admission. Graduate College admission requirements apply. In addition, international students must submit Test of English as a Foreign Language (TOEFL) or IELTS results; if they wish to apply for a teaching assistantship, the Test of Spoken English (TSE) or completion of the speaking section of the TOEFL-iBT or IELTS is also required.

Graduate Teaching Experience
Experience in teaching is considered an important part of the graduate program and is encouraged as part of the academic work of all Ph.D. candidates in this program.

Financial Aid
In recent years, the Department of Economics has been able to offer assistantships to most students who meet the standards for admission or continuation in the Ph.D. program. In order to qualify for a teaching assistantship, non-native speakers of English must pass a speaking proficiency test of the English language.

for the Doctor of Philosophy in Economics

Optional: A not-for-credit Math Camp after campus orientation, consisting of 12 hours of instruction. The aim of the Math Camp is to prepare students with no master's level coursework in mathematical economics for the program's first year classes. However, it will be open to all incoming students.

Additional information can be found on our program website (https://economics.illinois.edu/academics/phd-program/).

For additional details and requirements refer to the department's graduate programs (http://www.economics.uiuc.edu/programs/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the Doctor of Philosophy in Economics

1. Research Skills: The main objective of the program is to train students to become independent researchers, who are able to produce high-quality research for both academic and non-academic settings. This requires students to learn how to identify interesting questions, find creative solutions, and learn how to present the results of their work to the scientific community.
2. Analytical Skills: We want to make sure that students have all the mathematical and statistical tools necessary for their future careers. This includes a solid foundation in the core areas of Economics: Microeconomics, Macroeconomics, and Econometrics.
3. Problem Solving Skills: We want to teach students how to solve complex problems, by applying the technical tools that they have acquired, and by identifying and correctly using data sources.
4. Expertise in a Student's Field of Research: Students need to acquire a solid foundation in their chosen field of research. They should be familiar with the key past and present contributions in their area.

5. Presentation and Writing Skills: To be successful in the program and their future career, students must successfully present their work both in seminars and in written form.

Admissions
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Education Policy, Organization & Leadership, CAS

for the Certificate of Advanced Study in Education Policy, Organization & Leadership (on campus, off campus)

Degree programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Off-Campus Programs

The Ed.M., Ed.D., and C.A.S. degree options within the Education Administration and Leadership graduate concentration with Principal Endorsement option are offered in the Chicago region. An Ed.D. degree cohort also is available with a Superintendent Endorsement option. The Ed.M. and Ed.D. degree options are offered in an Online programs for students in the following graduate concentration areas: Diversity & Equity in Education, Global Studies in Education, Human Resource Development, and Learning Design and Leadership. Requirements for the off-campus and online programs are identical to the on-campus degrees.

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/epol/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Facilities and Resources

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

for the Certificate of Advanced Study in Education Policy, Organization & Leadership (on campus, off campus)

The Department of Education Policy, Organization & Leadership offers many programs leading to the degree of Certificate of Advanced Study (C.A.S.). A list of programs and additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search/programs/?department=epol) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in:

Diversity & Equity in Education (p. 2015), Educational Administration & Leadership (p. 2017), Global Studies in Education (p. 2028), Higher Education (p. 2030), History of Education (p. 2032), Human Resource Development (p. 2034), Learning Design & Leadership (p. 2039), Philosophy of Education (p. 2045), Social Sciences & Education Policy (p. 2055)

If the student does not have a Master's degree from the University of Illinois Urbana-Champaign, the foundation courses listed below must be completed.

Code	Title	Hours
Foundations Hours		**0 or 8**
Choose at least two foundation courses from the Course List tab. At least one of these two courses must be a course from outside the degree-granting department.		
Coursework		**24-32**

Instructional Design, Technology, & Organization Concentration

for the Graduate Concentration in Instructional Design, Technology, & Organization

The Instructional Design, Technology, & Organization (IDTO) graduate concentration is tailored for individuals with a passion for creating technology-infused learning systems for achieving learning and performance objectives in organizations. This concentration encompasses essential knowledge and skills in instructional system design and the integration of learning technologies. By fostering a strong foundation, IDTO coursework empowers students to devise inventive learning and development solutions. The coursework in IDTO concentration not only imparts expertise in instructional system design and technology but also cultivates proficiency in areas such as project management, program evaluation, and organization development. Graduates of IDTO emerge as capable professionals poised to meet the growing demands of workplaces and workforce development on innovative learning solutions for diverse populations.

This concentration is available for:

Education Policy, Organization and Leadership, EdM (on campus & online) (p. 1337)

for the Graduate Concentration in Instructional Design, Technology, & Organization

Upon the conclusion of the Ed.M. program in EPOL, students will be able to:

1. Demonstrate knowledge and skills in developing, implementing, and evaluating evidence-based programs and practices.
2. Comprehend current topics and trends in EPOL-wide fields that inform evidence-based practices to improve equity, diversity, and social justice across a wide range of educational, professional, and organizational contexts.

Additionally, graduates of the IDTO concentration will be able to:

1. Design scalable learning systems and solutions for developing working professionals' capabilities in the workplace.
2. Develop learning systems and solutions for broadly defined learning and performance outcomes in the workplace across industries.
3. Modify existing learning systems and solutions for remote and online delivery.
4. Facilitate adoptions of innovations in broadly defined learning and performance contexts in the workplace.
5. Evaluate the impact of learning systems and solutions in the workplace.
6. Manage the process and resources involved in instructional system design.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Off-Campus Programs

The Ed.M., Ed.D., and C.A.S. degree options within the Education Administration and Leadership graduate concentration with Principal Endorsement option are offered in a hybrid format, with two Saturdays a semester on campus in the first two years. An Ed.D. and C.A.S degree cohort is available with a Superintendent Endorsement option with one course per semester in the Chicago region and one course online in the first two years. The Ed.M. and Ed.D. degree options are offered in an online format for students in the following graduate concentration areas: Diversity & Equity in Education, Global Studies in Education, Human Resource Development, and Learning Design and Leadership. Requirements for the off-campus and online programs are identical to the on-campus degrees.

Facilities and Resources

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

for the Doctor of Education in Education Policy, Organization and Leadership (on campus, off campus & online)

A list of programs and additional requirements can be found on the program's website (https://education.illinois.edu/faceted-search/programs/?department=epol), the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in:

- African American Studies (p. 1997)
- Bilingual-Bicultural Education (p. 1998)
- Digital Learning (p. 2011)
- Diversity & Equity in Education (p. 2015)
- Educational Administration & Leadership (p. 2017)
- Global Studies in Education (p. 2028)
- Higher Education (p. 2030)

- History of Education (p. 2032)
- Human Resource Development (p. 2034)
- Instructional Design, Technology, & Organization (p. 1340)
- Learning Design & Leadership (p. 2039)
- Philosophy of Education (p. 2045)
- Social Sciences & Education Policy (p. 2055)
- Writing Studies (p. 2060)

This degree program can be completed either on campus or online; the requirements are listed below:

Required Courses:	Required Hours
Major subject coursework (includes concentration courses)	12
Research methods	12
Elective hours (includes 0-12 hours of independent study)	36
Dissertation research hours required (min/max applied toward degree)	4-16
Total minimum hours	64

Other Requirements

Requirement	Description
Other Requirements may overlap	
A concentration is not required	
Masters degree required for admission to Ed. D.	
Residency:	16 hours over 4 consecutive semesters of study
Qualifying exams	
Human subjects approval	
Preliminary exam	
Final exam/dissertation defense	
Dissertation deposit	
Minimum GPA:	3.0

for the Doctor of Education in Education Policy, Organization and Leadership (on campus, off campus & online)

Upon the conclusion of the Ed.D. program in EPOL, students will be able to:

1. Demonstrate advanced levels of knowledge and skills in developing, implementing, and evaluating evidence-based research as scholar-practitioners
2. Demonstrate leadership in improving equity, diversity, and social justice across a wide range of professional settings
3. Disseminate information about evidence-based practice and research to practitioner communities

Education Policy, Organization & Leadership, PhD

for the Doctor of Philosophy in Education Policy, Organization & Leadership (on campus)

Graduate Degree Programs

Degree programs in the Department of Education Policy, Organization and Leadership are designed to meet the academic and professional interests of individuals preparing for careers as academic professionals, adult educators, college professors, corporate trainers, educational policy analysts, governmental administrators, instructional designers/technologists, non-profit representatives, organizational development specialists, and university administration leaders.

Admission

The Department of Education Policy, Organization and Leadership carefully considers all applicants for graduate study. Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Facilities and Resources

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/epol/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

for the Doctor of Philosophy in Education Policy, Organization & Leadership (on campus)

The Department of Education Policy, Organization & Leadership offers many programs leading to the degree of Doctor of Philosophy (Ph.D.). A list of programs and additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search/programs/?department=epol)the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in:

Educational Psychology, EdM

for the degree of Master of Education in Educational Psychology

Admission

Students entering a Ph.D. program without a master's degree must first complete the requirements for a Master of Science (including a master's thesis).

The Department offers admission to two terminal on-campus Master of Science (M.S.) degrees focusing on Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES) and Mental Health Counseling. There is no admission to terminal masters degrees in Cognitive Science of Teaching and Learning (CSTL), Developmental Sciences, or Counseling Psychology areas of specialization.

The department accepts applications for the Ph.D. degree, from both applicants who have completed their bachelor's degrees and those who have a master's degree. Students who enter the program without a prior master's incorporate their master's class work and research into their doctoral program, and earn a master's degree as the first step toward their Ph.D (satisfying the "Early Research Project" requirement).

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Applications

Applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed on the college website (https://education.illinois.edu/programs/grad/how-to-apply/?url=/programs/grad). Applicants to our doctoral program and M.S. in Mental Health Counseling apply for fall enrollment. Current deadlines are posted on our application deadlines page (https://education.illinois.edu/programs/grad/how-to-apply/deadlines/).

Doctoral candidates are admitted into one of four divisions: CSTL, Developmental Sciences, QUERIES and Counseling Psychology. When making admission decisions, division committees consider academic performance (e.g., grade-point average, GPA), GRE scores (optional), letters of recommendation, and statement of purpose. Preference is given to those with research experience and research interests that are aligned with existing research programs in the Department.

Master's candidates are admitted into QUERIES and Mental Health Counseling.

Grade Point Average

The preferred department standard for grade point average is 3.0 on a 4.0 scale. The University calculates undergraduate GPAs on the last two years of grades for degreed applicants and in the last one year for students who have not yet completed their bachelor's degree. Graduate GPAs are calculated on the total of all graduate level courses taken beyond the undergraduate degree.

Test of English as a Foreign Language (TOEFL)

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Area of Study Affiliation

All applicants to the Educational Psychology doctoral program must specify one of four areas in which they wish to study:

- Cognitive Science of Teaching and Learning (CSTL)
- Counseling Psychology (Counseling);
- Developmental Sciences
- Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES)

Detailed information about each area and about the research interests of the faculty can be found on the department website (http://www.education.illinois.edu/edpsy/).

Although all Ph.D. students are admitted to a specific area of study, the actual coursework, research, and faculty often overlap area boundaries. Departmental policy makes it possible for a student to change advisers and affiliation from one area to another when interests and research foci become more clearly defined or change. Many faculty members are affiliated with more than one area of study.

Mental Health Counseling M.S. students must choose one of three areas of study for their practicum experience:

- Mental Health Counseling
- Career Counseling
- Counseling and Developmental Sciences

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/edpsy/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Center, Programs, and Institutes

Department faculty are affiliated with both research centers and institutes in the College of Education and across the university. These include The Beckman Institute, the Technology Innovation in Educational Research and Design initiative (TIER-ED), the Center for Culturally Responsive Evaluation and Assessment (CREA), the Center for the Study of Reading (CSR), the Center for Social and Behavioral Science (CSBR), and others.

Facilities and Resources

The Department of Educational Psychology puts a high priority on working with its graduate students to secure fellowships and other awards.

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

The department does not require a separate financial aid application.

for the degree of Master of Education in Educational Psychology

---

The Department of Educational Psychology offers many programs leading to the degree of Master of Education (Ed.M.). A list of programs and additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search/programs/?degree=edm&department=edpsy) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education (p. 1998), Digital Learning (p. 2011), or African American Studies (p. 1997).

for the degree of Master of Education in Educational Psychology

Counseling Psychology Division

1. Counseling Psychology students will possess a broad knowledge of the core areas of psychology.
2. Counseling Psychology students will have an understanding of the basic statistical analytical methods, research designs, measurement models, and research approaches.
3. Counseling Psychology students will demonstrate skills at independently designing, conducting, writing, and presenting research studies.
4. Counseling Psychology students will be skilled in psychological assessment in all aspects (design, psychometric evaluation, administering, and communicating results) as well as in a variety of contexts (e.g., both environmental and individual assessment).
5. Counseling Psychology students will have the ability to conceptualize clients from a variety of theoretical and scientifically-informed frameworks, present such a conceptualization to others and establish means and methods to evaluate its accuracy
6. Counseling Psychology students will possess theoretical and scientific knowledge regarding skills in the provision of interventions.
7. Counseling Psychology students will value and develop competence in aspects of diversity and individual differences.
8. Counseling Psychology students will have knowledge and appreciation of the ethical issues involved in being a psychologist.
9. Counseling Psychology students will adopt a critical, scientific approach to professional activities.

Developmental Sciences Division

1. Developmental Sciences students will obtain a broad knowledge of the core areas of developmental research across the lifespan.T his includes but is not limited to: a) social and emotional development; b) language and mathematical development; c) academic motivation and future planning/orientation; d) bullying and peer harassment; and e) identity formation with respect to gender, race, and ethnicity.

2. Developmental Sciences students will develop a deep expertise in a relevant specialized topic within or across these core areas. This includes mastering research findings in a topic area selected by the student, understanding the relevant theoretical perspectives related to this topic and learning about the appropriate methodological approaches to understanding the core area.
3. Developmental Sciences students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to scholarly literature in Developmental Sciences broadly and their specialized topic in particular. Specifically, they will develop skills to independently design, conduct, write, and present/publish research studies related to their area of focus/career path.

Cognitive Science of Teaching and Learning (CSTL) Division

1. CSTL students will obtain a broad knowledge of the core areas related to the cognitive science of teaching and learning. This includes knowledge of theoretical perspectives, methodological approaches, and key research findings in the core areas of (a) cognition and learning across the lifespan, (b) learning and the psychology of language, (c) multimodal information processing, and (d) sociocultural dimensions of learning.
2. CSTL students will obtain a deep expertise in a relevant topic within or cutting across these core areas. This involves mastering theoretical perspectives, methodological approaches, and key research findings in a topic selected by the student. In addition, they will develop skills at independently designing, conducting, writing, and presenting/publishing research studies.
3. CSTL students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to the professional literature and their chosen professional identity/career path. This involves understanding the basic statistical analytical methods, research designs, measurement models, and research approaches.

Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES) Division

1. QUERIES students will obtain a broad basic knowledge of the core areas of educational research methodologies, quantitative, qualitative, and evaluative research methods.
2. QUERIES students will obtain a sophisticated knowledge base of quantitative and/or qualitative research approaches and analytic tools necessary for contribution to the professional literature.
3. QUERIES students in Measurement will become skilled in the development and use of techniques for collecting and analyzing 'test' data through the study of measurement methods.
4. QUERIES students in Statistics will be skilled in traditional and modern quantitative analytic methods.
5. QUERIES students in Evaluation will have the skills required for Evaluation scholars –in education, social welfare, health services, community development, human resource development, and other domains.

Educational Psychology, MA

for the degree of Master of Arts in Educational Psychology

Admission

Students entering a Ph.D. program without a master's degree must first complete the requirements for a Master of Science (including a master's thesis).

The Department offers admission to two terminal on-campus Master of Science (M.S.) degrees focusing on Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES) and Mental Health Counseling. There is no admission to terminal masters degrees in Cognitive Science of Teaching and Learning (CSTL), Developmental Sciences, or Counseling Psychology areas of specialization.

The department accepts applications for the Ph.D. degree, from both applicants who have completed their bachelor's degrees and those who have a master's degree. Students who enter the program without a prior master's incorporate their master's class work and research into their doctoral program, and earn a master's degree as the first step toward their Ph.D (satisfying the "Early Research Project" requirement).

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Applications

Applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed in the department website (http://www.education.illinois.edu/edpsy/). Applicants to our doctoral program and M.S. in Mental Health Counseling apply for Fall enrollment. Current deadlines are posted on our department website (http://www.education.illinois.edu/edpsy/).

Doctoral candidates are admitted into one of four divisions: CSTL, Developmental Sciences, QUERIES and Counseling Psychology. When making admission decisions, division committees consider academic performance (e.g., grade-point average, GPA), GRE scores (optional), letters of recommendation, and statement of purpose. Preference is given to those with research experience and research interests that are aligned with existing research programs in the Department.

Master's candidates are admitted into QUERIES and Mental Health Counseling.

Grade Point Average

The preferred department standard for grade point average is 3.0 on a 4.0 scale. The university calculates undergraduate GPAs on the last two years of grades for degreed applicants and in the last one year for students who have not yet completed their bachelor's degree. Graduate GPAs are calculated on the total of all graduate level courses taken beyond the undergraduate degree.

Test of English as a Foreign Language (TOEFL)

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Area of Study Affiliation

All applicants to the Educational Psychology doctoral program must specify one of four areas in which they wish to study:

- Cognitive Science of Teaching and Learning (CSTL)
- Counseling Psychology (Counseling);
- Developmental Sciences
- Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES)

Detailed information about each area and about the research interests of the faculty can be found on the department website (http://www.education.illinois.edu/edpsy/).

Although all Ph.D. students are admitted to a specific area of study, the actual coursework, research, and faculty often overlap area boundaries. Departmental policy makes it possible for a student to change advisers and affiliation from one area to another when interests and research foci become more clearly defined or change. Many faculty members are affiliated with more than one area of study.

Mental Health Counseling M.S. students must choose one of three areas of study for their practicum experience:

- Mental Health Counseling
- Career Counseling
- Counseling and Developmental Sciences

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/edpsy/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Center, Programs, and Institutes

Department faculty are affiliated with both research centers and institutes in the College of Education and across the university. These include The Beckman Institute, the Technology Innovation in Educational Research and Design initiative (TIER-ED), the Center for Culturally Responsive Evaluation and Assessment (CREA), the Center for the Study of Reading (CSR), the Center for Social and Behavioral Science (CSBR), and others.

Facilities and Resources

The Department of Educational Psychology puts a high priority on working with its graduate students to secure fellowships and other awards.

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

The department does not require a separate financial aid application.

for the degree of Master of Arts in Educational Psychology

The Department of Educational Psychology offers many programs leading to the degree of Master of Arts (M.A.). A list of programs and additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search/programs/?degree=edm&department=edpsy) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education (p. 1998), Digital Learning (p. 2011), or African American Studies (p. 1997).

2. Counseling Psychology students will have an understanding of the basic statistical analytical methods, research designs, measurement models, and research approaches.3
3. Counseling Psychology students will demonstrate skills at independently designing, conducting, writing, and presenting research studies.
4. Counseling Psychology students will be skilled in psychological assessment in all aspects (design, psychometric evaluation, administering, and communicating results) as well as in a variety of contexts (e.g., both environmental and individual assessment).
5. Counseling Psychology students will have the ability to conceptualize clients from a variety of theoretical and scientifically-informed frameworks, present such a conceptualization to others and establish means and methods to evaluate its accuracy
6. Counseling Psychology students will possess theoretical and scientific knowledge regarding skills in the provision of interventions.
7. Counseling Psychology students will value and develop competence in aspects of diversity and individual differences.
8. Counseling Psychology students will have knowledge and appreciation of the ethical issues involved in being a psychologist.
9. Counseling Psychology students will adopt a critical, scientific approach to professional activities.

Developmental Sciences Division

1. Developmental Sciences students will obtain a broad knowledge of the core areas of developmental research across the lifespan.This includes but is not limited to: a) social and emotional development; b) language and mathematical development; c) academic motivation and future planning/orientation; d) bullying and peer harassment; and e) identity formation with respect to gender, race, and ethnicity.
2. Developmental Sciences students will develop a deep expertise in a relevant specialized topic within or across these core areas. This includes mastering research findings in a topic area selected by the student, understanding the relevant theoretical perspectives related to this topic and learning about the appropriate methodological approaches to understanding the core area.
3. Developmental Sciences students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to scholarly literature in Developmental Sciences broadly and their specialized topic in particular. Specifically, they will develop skills to independently design, conduct, write, and present/publish research studies related to their area of focus/career path.

Cognitive Science of Teaching and Learning (CSTL) Division

1. CSTL students will obtain a broad knowledge of the core areas related to the cognitive science of teaching and learning. This includes knowledge of theoretical perspectives, methodological approaches, and key research findings in the core areas of (a) cognition and learning across the lifespan, (b) learning and the psychology of language, (c) multimodal information processing, and (d) sociocultural dimensions of learning.
2. CSTL students will obtain a deep expertise in a relevant topic within or cutting across these core areas. This involves mastering theoretical perspectives, methodological approaches, and key research findings in a topic selected by the student. In addition, they will develop skills at independently designing, conducting, writing, and presenting/publishing research studies.
3. CSTL students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to the professional literature and their chosen professional identity/career path. This involves understanding the basic statistical analytical methods, research designs, measurement models, and research approaches.

Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES) Division

1. QUERIES students will obtain a broad basic knowledge of the core areas of educational research methodologies, quantitative, qualitative, and evaluative research methods.
2. QUERIES students will obtain a sophisticated knowledge base of quantitative and/or qualitative research approaches and analytic tools necessary for contribution to the professional literature.
3. QUERIES students in Measurement will become skilled in the development and use of techniques for collecting and analyzing 'test' data through the study of measurement methods.
4. QUERIES students in Statistics will be skilled in traditional and modern quantitative analytic methods.
5. QUERIES students in Evaluation will have the skills required for Evaluation scholars —in education, social welfare, health services, community development, human resource development, and other domains.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)
College of Education Admissions Requirements (https://education.illinois.edu/programs/grad/how-to-apply/?url=/programs/grad)

Educational Psychology, MS

for the degree of Master of Science in Educational Psychology

Admission

Students entering a Ph.D. program without a master's degree must first complete the requirements for a Master of Science (including a master's thesis).

The Department offers admission to two terminal on-campus Master of Science (M.S.) degrees focusing on Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES) and Mental Health Counseling. There is no admission to terminal masters degrees in Cognitive Science of Teaching and Learning (CSTL), Developmental Sciences, or Counseling Psychology areas of specialization.

The department accepts applications for the Ph.D. degree, from both applicants who have completed their bachelor's degrees and those who have a master's degree. Students who enter the program without a prior master's incorporate their master's class work and research into their doctoral program, and earn a master's degree as the first step toward their Ph.D (satisfying the "Early Research Project" requirement).

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Applications

Applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed on the college website (https://education.illinois.edu/programs/grad/how-to-apply/?url=/programs/grad). Applicants to our doctoral program and M.S. in Mental Health Counseling apply for fall enrollment. Current deadlines are posted on our application deadlines page (https://education.illinois.edu/programs/grad/how-to-apply/deadlines/).

Doctoral candidates are admitted into one of four divisions: CSTL, Developmental Sciences, QUERIES and Counseling Psychology. When making admission decisions, division committees consider academic performance (e.g., grade-point average, GPA), GRE scores (optional), letters of recommendation, and statement of purpose. Preference is given to those with research experience and research interests that are aligned with existing research programs in the Department.

Master's candidates are admitted into QUERIES and Mental Health Counseling.

Grade Point Average

The preferred department standard for grade point average is 3.0 on a 4.0 scale. The university calculates undergraduate GPAs on the last two years of grades for degreed applicants and in the last one year for students who have not yet completed their bachelor's degree. Graduate GPAs are calculated on the total of all graduate level courses taken beyond the undergraduate degree.

Test of English as a Foreign Language (TOEFL)

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Area of Study Affiliation

All applicants to the Educational Psychology doctoral program must specify one of four areas in which they wish to study:

- Cognitive Science of Teaching and Learning (CSTL)
- Counseling Psychology (Counseling);
- Developmental Sciences
- Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES)

Detailed information about each area and about the research interests of the faculty can be found on the department website (http://www.education.illinois.edu/edpsy/).

Although all Ph.D. students are admitted to a specific area of study, the actual coursework, research, and faculty often overlap area boundaries. Departmental policy makes it possible for a student to change advisers and affiliation from one area to another when interests and research foci become more clearly defined or change. Many faculty members are affiliated with more than one area of study.

Mental Health Counseling M.S. students must choose one of three areas of study for their practicum experience:

- Mental Health Counseling
- Career Counseling
- Counseling and Developmental Sciences

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/edpsy/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Center, Programs, and Institutes

Department faculty are affiliated with both research centers and institutes in the College of Education and across the university. These include The Beckman Institute, the Technology Innovation in Educational Research and Design initiative (TIER-ED), the Center for Culturally Responsive Evaluation and Assessment (CREA), the Center for the Study of Reading (CSR), the Center for Social and Behavioral Science (CSBR), and others.

Facilities and Resources

The Department of Educational Psychology puts a high priority on working with its graduate students to secure fellowships and other awards.

The College of Education offers a variety of resources to support graduate students throughout their academic journey. The Bureau of Educational Research assists students in securing research funding, and each student is assigned a graduate adviser to help plan their program of study, select courses, and track progress toward degree completion. Additional information about university-wide resources is available on the GradMAP (https://grad.illinois.edu/admissions/admitted-students/gradmap-canvas-community/) website.

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Please note: Graduate students employed as staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Fellowship. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/financial-aid/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/).

The department does not require a separate financial aid application.

for the degree of Master of Science in Educational Psychology

---

The Department of Educational Psychology offers many programs leading to the degree of Master of Science (M.S.). A list of programs and additional requirements can be found on the program's website, (https://education.illinois.edu/faceted-search/programs/?degree=edm&department=edpsy) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Students may select a concentration in Bilingual-Bicultural Education (p. 1998), Digital Learning (p. 2011), or African American Studies (p. 1997).

Code	Title	Hours
Foundations Hours		**8**
Choose at least two foundation courses from the Course List tab. At least one of these two courses must be a course from outside the degree-granting department.		
EPSY 599	Thesis Research (min/max applied toward degree)	2-8
Elective Hours		**16-22**
Students pursuing the Concentration in African American Studies are required to take 24 hours of Concentration courses, for a total of 56 hours.		

Research/Project/Independent Study Hours (min/max applied toward degree): 0-8	
Total Hours	**32**

Other Requirements

Requirement	Description
Human Subjects Approval	
Minimum GPA	3.0

for the degree of Master of Science in Educational Psychology

Counseling Psychology Division

1. Counseling Psychology students will possess a broad knowledge of the core areas of psychology.
2. Counseling Psychology students will have an understanding of the basic statistical analytical methods, research designs, measurement models, and research approaches.
3. Counseling Psychology students will demonstrate skills at independently designing, conducting, writing, and presenting research studies.
4. Counseling Psychology students will be skilled in psychological assessment in all aspects (design, psychometric evaluation, administering, and communicating results) as well as in a variety of contexts (e.g., both environmental and individual assessment).
5. Counseling Psychology students will have the ability to conceptualize clients from a variety of theoretical and scientifically-informed frameworks, present such a conceptualization to others and establish means and methods to evaluate its accuracy
6. Counseling Psychology students will possess theoretical and scientific knowledge regarding skills in the provision of interventions.
7. Counseling Psychology students will value and develop competence in aspects of diversity and individual differences.
8. Counseling Psychology students will have knowledge and appreciation of the ethical issues involved in being a psychologist.
9. Counseling Psychology students will adopt a critical, scientific approach to professional activities.

Developmental Sciences Division

1. Developmental Sciences students will obtain a broad knowledge of the core areas of developmental research across the lifespan.This includes but is not limited to: a) social and emotional development; b) language and mathematical development; c) academic motivation and future planning/orientation; d) bullying and peer harassment; and e) identity formation with respect to gender, race, and ethnicity.
2. Developmental Sciences students will develop a deep expertise in a relevant specialized topic within or across these core areas. This includes mastering research findings in a topic area selected by the student, understanding the relevant theoretical perspectives related to this topic and learning about the appropriate methodological approaches to understanding the core area.
3. Developmental Sciences students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to scholarly literature in Developmental Sciences broadly and their specialized topic in particular. Specifically, they will develop skills to independently design, conduct, write, and present/publish research studies related to their area of focus/career path.

Cognitive Science of Teaching and Learning (CSTL) Division

1. CSTL students will obtain a broad knowledge of the core areas related to the cognitive science of teaching and learning. This includes knowledge of theoretical perspectives, methodological approaches, and key research findings in the core areas of (a) cognition and learning across the lifespan, (b) learning and the psychology of language, (c) multimodal information processing, and (d) sociocultural dimensions of learning.
2. CSTL students will obtain a deep expertise in a relevant topic within or cutting across these core areas. This involves mastering theoretical perspectives, methodological approaches, and key research findings in a topic selected by the student. In addition, they will develop skills at independently designing, conducting, writing, and presenting/publishing research studies.
3. CSTL students will obtain a sophisticated knowledge base of research approaches and analytic tools necessary for contribution to the professional literature and their chosen professional identity/career path. This involves understanding the basic statistical analytical methods, research designs, measurement models, and research approaches.

Quantitative and Qualitative Methodology, Measurement, and Evaluation (QUERIES) Division

1. QUERIES students will obtain a broad basic knowledge of the core areas of educational research methodologies, quantitative, qualitative, and evaluative research methods.
2. QUERIES students will obtain a sophisticated knowledge base of quantitative and/or qualitative research approaches and analytic tools necessary for contribution to the professional literature.
3. QUERIES students in Measurement will become skilled in the development and use of techniques for collecting and analyzing 'test' data through the study of measurement methods.
4. QUERIES students in Statistics will be skilled in traditional and modern quantitative analytic methods.
5. QUERIES students in Evaluation will have the skills required for Evaluation scholars —in education, social welfare, health services, community development, human resource development, and other domains.

Electrical & Computer Engineering, MENG

for the degree of Master of Engineering in Electrical & Computer Engineering (on campus and online)

The MEng in Electrical & Computer Engineering is a professionally-oriented degree intended for students interested in extending the depth and/or breadth of their technical knowledge in Electrical and Computer Engineering or in a subfield thereof and is most appropriate for students who intend to enter the professional workforce after completing the degree.

for the degree of Master of Engineering in Electrical & Computer Engineering

For additional details and requirements refer to the department's Graduate Study Manual (https://ece.illinois.edu/academics/grad/meng-manual/)and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; the requirements are listed below:

Required Courses:	Required Hours
ECE 500-registration (0 hours) every term while in residence	0
500-level courses, including 8 hours of ECE 500-level courses and up to 4 hours of non-ECE 500-level courses (subject to Other Requirements and Conditions below)	12
Professional Development: ECE 596 Master's Project supervised by ECE (or affiliate) graduate faculty or course(s) in leadership, entrepreneurship, or other business-related topic approved by ECE Director of Graduate Studies	4
Elective courses (subject to Other Requirements and Conditions below)	16
Total credit hours for the degree	32

Other Requirements and Conditions (may overlap)

Requirement	Description
A minimum of 12 credit hours of coursework at the 500-level must be applied toward the degree, including at least 8 hours of ECE coursework. Up to 4 hours of ECE 596 and/or ECE 597 (or other individual study) may be applied toward this degree requirement. Up to 4 hours of non-ECE 500-level course(s) from approved list or as approved by the ECE Director of Graduate Studies may be applied toward this degree requirement.	
Coursework must include at least 18 credit hours of ECE courses; 15 of these hours must be from no more than 3 different focus areas. The ECE Graduate Committee maintains the focus area course lists.	
Credit in ECE 415, 445, 590, PHYS 404, 405, 435, 436, and STAT 400 do not count toward the degree.	
No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.	
This degree option is non-thesis only.	
Minimum program GPA:	3.0

for the degree of Master of Engineering in Electrical & Computer Engineering

We expect each graduate student to achieve at least five of the following outcomes:

1. To be able to identify technical challenges, and formulate problems in Electrical and Computer Engineering.
2. To be able to apply theoretical and/or experimental methods to solve problems in Electrical and Computer Engineering.
3. To have in-depth knowledge of at least one sub-area within Electrical and Computer Engineering.

4. To be able to effectively communicate findings to peers in written and oral form.
5. To be able to function as an engineer.

for the degree of Master of Engineering in Electrical & Computer Engineering (on campus and online)

Admission Requirements

Applicants must have completed an electrical engineering curriculum or a computer engineering curriculum substantially equivalent to those of the University of Illinois at Urbana-Champaign. Graduates of curricula in the physical sciences, mathematics, and computer science may be admitted if they are judged to have the necessary background to profit from graduate work in electrical and computer engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Students in the MEng in Electrical and Computer Engineering program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at Illinois.

Electrical & Computer Engineering, MS

for the degree of Master of Science in Electrical and Computer Engineering

Applicants with a bachelor's degree may apply to the MS program or to the direct PhD (p. 1369) program.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research
Research interests of the Electrical and Computer Engineering faculty include the broad areas of study described in the graduate programs section and more. Many faculty members hold affiliate status with other departments, and a number of faculty members from other departments hold affiliate status with the department. In addition, some faculty hold appointments in the Beckman Institute for Advanced Science and Technology, the Coordinated Science Laboratory, the Materials Research Laboratory, and the Holonyak Micro and Nanotechnology Laboratory. All these affiliations provide opportunities for graduate student appointments to conduct research. For a detailed list of current research interests of the faculty, visit the department's research website (https://ece.illinois.edu/research/).

There are numerous interdisciplinary programs, laboratories, and centers for research within the department. These are described at the department's research centers website (https://ece.illinois.edu/research/centers-and-groups/).

for the degree of Master of Science in Electrical and Computer Engineering

For additional details and requirements refer to the department's Graduate Study Manual (https://ece.illinois.edu/academics/grad/msphd-manual/)and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Required Courses:	Required Hours
Thesis research -- ECE 599 (min/max applied toward degree)	8
ECE Colloquium -- ECE 500 (registration for 0 hours every term while in residence)	0
Elective courses (subject to Other Requirements and Conditions below)	24
Total hours	32

Other Requirements and Conditions

Requirement	Description
Credit in ECE 415, ECE 445, ECE 590, ECE 596, PHYS 404, PHYS 435, PHYS 436, and STAT 400 does not count toward the degree.	
12 credit hours must be 500-level ECE courses other than ECE 590, ECE 596, ECE 597, and ECE 599.	
No course used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.	
A maximum of 4 hours of ECE 597 (or other individual study) may be applied toward the elective coursework requirement.	
There is no final examination for the M.S. degree.	
M.S. thesis deposit	
Minimum GPA:	3.0

for the degree of Master of Science in Electrical and Computer Engineering

We expect each graduate student to achieve at least five of the following outcomes:

1. To be able to identify technical challenges, and formulate problems in Electrical and Computer Engineering.
2. To be able to apply theoretical and/or experimental methods to solve problems in Electrical and Computer Engineering.
3. To have in-depth knowledge of at least one sub-area within Electrical and Computer Engineering.
4. To be able to effectively communicate findings to peers in written and oral form.
5. To be able to teach topics in Electrical and Computer Engineering at the university level.

6. To have broad understanding of the scope of research in Electrical and Computer Engineering.
7. To be able to function as an engineer.

for the degree of Master of Science in Electrical and Computer Engineering

---

Admission Requirements
Admission for the spring semester is possible, in addition to the usual fall semester admissions.

Applicants must have completed an electrical engineering curriculum or a computer engineering curriculum substantially equivalent to those of the University of Illinois at Urbana-Champaign. Graduates of curricula in the physical sciences, mathematics, and computer science may be admitted if they are judged to have the necessary background to profit from graduate work in electrical and computer engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required. However, because of space limitations, applicants with GPAs below 3.50 are rarely admitted. The Graduate Record Examination (GRE) (http://www.ets.org/)is optional.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid
Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are available for the majority of students who are admitted to the MS and PhD programs. International applicants generally are not awarded teaching assistantships, but are eligible for the other forms of financial aid.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 5 is required on the OEAI Test (https://linguistics.illinois.edu/testing/oeai/), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester and register for ECE 590TL.

Electrical & Computer Engineering, PhD

for the degree of Doctor of Philosophy in Electrical & Computer Engineering

The Department of Electrical & Computer Engineering offers both a traditional doctoral program (for students with a previous master's degree) and a direct doctoral program (for students with only a bachelor's degree). Applicants with master's degrees are admitted only if a faculty member is willing to serve as the PhD thesis advisor. Accordingly, such applicants should write, call, or e-mail prospective PhD advisors and discuss their research interests and potential PhD thesis topics well in advance of application deadlines.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research
Research interests of the Electrical and Computer Engineering faculty include the broad areas of study described in the graduate programs section and more. Many faculty members hold affiliate status with other departments, and a number of faculty members from other departments hold affiliate status with the department. In addition, some faculty hold appointments in the Beckman Institute for Advanced Science and Technology, the Coordinated Science Laboratory, the Materials Research Laboratory, and the Holonyak Micro and Nanotechnology Laboratory. All these affiliations provide opportunities for graduate student appointments to conduct research. For a detailed list of current research interests of the faculty, visit the department's research website (https://ece.illinois.edu/research/).

There are numerous interdisciplinary programs, laboratories, and centers for research within the department. These are described at the department's research centers website (https://ece.illinois.edu/research/centers-and-groups/).

for the degree of Doctor of Philosophy in Electrical and Computer Engineering

For additional details and requirements refer to the department's Graduate Study Manual (https://ece.illinois.edu/academics/grad/msphd-manual/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Entering with an approved Master's Degree:

Elementary Education, EdM

for the degree of Master of Education in Elementary Education with teaching licensure

Through the Master of Education and the Certificate of Advanced Study, experienced teachers are prepared to become more competent and better informed practitioners who serve as leaders for educational reform in local schools and school districts.

Master's degree programs leading to teacher licensure are offered for individuals who have a degree in a field other than education and wish to become teachers. The three majors leading to licensure are Early Childhood Education (Birth - Grade 2), Elementary Education (Grades 1 - 6), and Secondary Education (Grades 9 - 12). In addition to completing the courses required for an Ed.M. degree, students in these programs follow the same sequence of professional education courses as do undergraduate students in the programs.

Only master's degree students who wish to become licensed teachers in one of these three areas should apply to the Early Childhood Education, Elementary Education, or Secondary Education majors. Master's candidates who do not wish to become teachers, or who are already teachers, should apply to the major in Curriculum and Instruction.

Length of time for a degree: an Ed.M. program can be completed in a calendar year, while the M.S. or M.A. often takes longer. The Ed.M. with licensure typically takes two years to complete.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program. Note: The master's degree with teacher licensure program only admits students for the fall term.

International applicants must submit TOEFL scores. The Department of Curriculum and Instruction's TOEFL requirement for full status admission is greater than 102; the minimum score for limited status is 550 on the paper-based test, 79 on the internet-based test, and 213 on the computer-based test. International applicants must also submit a Declaration and Certification of Finances. Please note: TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry in order to be valid. In addition, individual academic programs may require a higher score or evidence of spoken English language proficiency. Contact your proposed program of study office (http://www.grad.illinois.edu/admissions/depts/) for the minimum TOEFL, TSE, or IELTS requirement for admission. For additional details, refer to the Graduate College Handbook English Proficiency Requirement for Admission (http://www.grad.illinois.edu/admissions/instructions/04c/).

Faculty Research Interests

For information about specific faculty research interests, current grants, and publications, please visit the Faculty Finder (https://education.illinois.edu/faculty-finder/).

Facilities and Resources

Departmental resources consist of cooperation with Children's Research Center, Center for Small Urban Communities, as well as other resources in the College. Students who are interested in second language acquisition can become a part of the SLATE program. The department is connected to the University of Illinois Writing Project and the following journals: *International Journal of Education & the Arts, Journal of Curriculum Studies*, and *American Educational Research Journal.* The department also has available resources and some workshops provided during the academic year. Program areas (including CREATE, DELTA, Language & Literacy, and MSE) offer discipline-specific resources.

The College of Education also has many resources to assist graduate students through their academic career. The Bureau of Educational Research works with students to secure research funding. The Council on Teacher Education (http://cote.illinois.edu/) entitles candidates seeking a Professional Educator License and provides accreditation of professional education programs. Each student completing a degree program is assigned a graduate adviser, who is available to assist the student with planning the program of study and determining degree requirements, courses and timelines for degree completion.

Information on university resources can be found at the GradMAP pages website (http://www.grad.illinois.edu/current-students/).

Financial Aid

Financial aid in the form of assistantships, scholarships, fellowships, and tuition waivers can be found throughout the college (https://education.illinois.edu/current-students/graduate/financial-aid/) and campus. Campus opportunities can be found at the Graduate College (http://www.grad.illinois.edu/funding-jobs/) and the Office of Student Financial Aid (http://www.osfa.illinois.edu/). **Please note: Graduate students employed as Staff by the University of Illinois Urbana-Champaign are not eligible for a College of Education Award or Scholarship.**

for the degree of Master of Education in Elementary Education with teaching licensure

Students may select a concentration in Bilingual-Bicultural Education (http://catalog.illinois.edu/graduate/education/concentration/bilingual-bicultural-education/) or Digital Learning (http://catalog.illinois.edu/graduate/education/concentration/digital-learning/).
Additional requirements can be found on the program's website, (https://education.illinois.edu/ci/programs-degrees/ele/) the College of Education Graduate Programs Handbook (https://education.illinois.edu/current-students/graduate/coe-graduate-handbook/), the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/), and Field Placement Information (http://education.illinois.edu/sce/).

Engineering, MEng

for the degree of Master of Engineering in Engineering

The Grainger College of Engineering offers a Master of Engineering (MEng) degree program for students whose primary intent is a professional career in industry or government. This degree differs from the Master of Science (MS) degree in that it is a professionally oriented master's degree that is not a pathway to a doctoral program. The Major in Engineering for the M.Eng. degree requires the selection of an interdisciplinary concentration, which must be identified at the time of application. Available concentrations are:

- Aerospace Systems Engineering (p. 1377)
- Autonomy & Robotics (p. 1379)
- Chemical Engineering Leadership (p. 1383)
- Digital Agriculture (p. 1386)
- Energy Systems (p. 1392)
- Instrumentation and Applied Physics (p. 1389)
- Plasma Engineering (p. 1394)

for the degree of Master of Engineering in Engineering

Students pursuing this major must select a concentration. For additional details and requirements, please refer to the Web page of the concentration's home unit and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Professional Development (an internship with a company, laboratory, or agency with a subsequent archiveable report; a design project; or business-oriented or leadership courses)		4
Concentration hours		**28**
Technical course work in primary area and one course from outside the primary area (12-20 hours)		
Elective courses 0-8 hours chosen in consultation with advisor.		
Total Hours		**32**

Other Requirements and Conditions

Requirement	Description
Other Requirements and Conditions may overlap	
A concentration is required.	
A minimum of 12 500-level credit hours with a minimum of 8 500-level credit hours applied toward the concentration.	
A minimum of 8 hours must be in ENG or the home unit of the concentration.	
Minimum program GPA:	3.0

for the degree of Master of Engineering in Engineering

Admission

Students with bachelor's or master's degrees in engineering or related sciences will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Admission is possible for the both the fall and spring semesters. Full details of admission requirements are on the Web page of the department offering the concentration.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Higher requirements may be imposed by specific concentrations. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. Full admission status (http://

grad.illinois.edu/admissions/instructions/04c/) is granted for those meeting the minimum requirements and having taken the TOEFL or IELTS since the scores required for admission to MEng are above the minimum scores demonstrating an acceptable level of English language proficiency.

Financial Aid

Students in concentrations under the MEng in Engineering major are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois. Students are encouraged to seek external funding for which they may be eligible, and refer to their program of interest's website to learn about potential funding resources.

A minimum of 20 credit hours must be taken from the University of Illinois Urbana-Champaign campus.		
A minimum of 12 500-level credit hours, with a minimum of 8 hours of 500-level coursework in AE.		
No courses used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.		
Minimum GPA:		3.0

for the degree of Master of Engineering in Engineering, Aerospace Systems Engineering Concentration (on campus & online)

Admission Requirements

The Department of Aerospace Engineering accepts applications for admission to the MEng graduate program per the following deadlines:

Fall Admission: December 1
Spring Admission: July 1

Students with bachelor's or master's degrees in engineering or related fields will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Admission is possible for the spring term, but most begin during the fall term. Full details of admission requirements are on the Aerospace Systems Engineering Concentration website (https://aerospacesystemsmeng.engineering.illinois.edu/).

All applicants whose native language is not English are required to submit the results of the TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) as evidence of meeting the English proficiency requirements for full admission status (http://grad.illinois.edu/admissions/instructions/04c/). Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOELF/IELTS requirement.

Applicants who are non-native speakers of English and who wish to be considered for teaching assistantships must provide evidence (https://grad.illinois.edu/admissions/taengprof.htm) of spoken English language proficiency. Specifically, they must score 24 or higher on the SPEAK portion of the TOEFL exam and 8 or higher on the speaking sub-section of the IELTS.

For full information on admission requirements and how to apply, see the department's graduate programs website (https://aerospace.illinois.edu/academics/graduate/).

Financial Aid

Students in concentrations under the MEng in Engineering major are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at Illinois.

for the degree of Master of Engineering in Engineering, Aerospace Systems Engineering Concentration (on campus & online)

By the end of the program, students will be able to:

1. Analyze and apply techniques for developing market and mission-based aerospace systems from the initial identification of customer needs to the delivery of an integrated product.
2. Gain a breadth of knowledge in aerospace system development outside of the undergraduate focus.
3. Integrate this knowledge in the design of complex aerospace systems through requirements development, optimization, and validation.
4. Obtain a systems perspective in the aerospace engineering discipline.

Engineering: Autonomy and Robotics, MEng

for the degree of Master of Engineering in Engineering, Autonomy and Robotics Concentration

The Master of Engineering (MEng) in Engineering, Autonomy and Robotics Concentration is a professionally oriented degree program for students whose primary intent is a career in industry or government. This degree differs from the Master of Science (MS) degree in that it is a professionally oriented master's degree that is not a pathway to a doctoral program. The Major in Engineering for the M.Eng. degree requires the selection of an interdisciplinary concentration, which must be identified at the time of application.

Available concentrations are:

- Aerospace Systems Engineering (p. 1377)
- Autonomy and Robotics (p. 1379)
- Digital Agriculture (p. 1386)
- Energy Systems (p. 1392)
- Instrumentation and Applied Physics (p. 1389)
- Plasma Engineering (p. 1394)

for the degree of Master of Engineering in Engineering, Autonomy and Robotics Concentration

For additional details and requirements, refer to the department's website (https://autonomy.illinois.edu/education/meng/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

for the degree of Master of Engineering in Engineering, Autonomy and Robotics Concentration

---

The learning objectives of the proposed Concentration in Autonomy and Robotics include professionally-oriented competence in the application of software systems, electronics, tools for algorithm design and machine learning, and physics-based dynamics, control and sensor systems to the integration of autonomy in robotic systems.

for the degree of Master of Engineering in Engineering, Autonomy and Robotics Concentration

Admission

Students with bachelor's or master's degrees in engineering or related fields will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Admissions are considered for the fall term only. Full details of admission requirements are on the Autonomy and Robotics (https://autonomy.illinois.edu/meng/) concentration website.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Students in concentrations under the MEng in Engineering major are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois.

Engineering: Chemical Engineering Leadership, MEng

for the degree of Master of Engineering in Engineering, Chemical Engineering Leadership Concentration (on campus & online)

The Grainger College of Engineering offers a Master of Engineering in Engineering (MEng) degree program for students whose primary intent is a professional career in industry or government. This degree differs from the Master of Science (MS) degree in that it is a professionally oriented master's degree that is not a pathway to a doctoral program.
The M.Eng. degree requires an interdisciplinary concentration, which must be selected at the time of application.

The Chemical Engineering Leadership MEng degree will be a 34-credit hour program for students with a Chemical Engineering BS degree. Students without a Chemical Engineering BS degree will need to take three additional 400-level Chemical Engineering core courses (11 hrs) to gain the fundamentals necessary to be successful in this MEng program. This program combines a chemical engineering technical core and a diverse collection of chemical engineering electives, with essential professional development components across a range of topics including financial analysis, leadership, management, and strategic planning to prepare students to take their career development to the next level.

The curriculum features two special-topic courses which will include in-person workshops (Fall and Spring semesters). These workshops will be two-day sessions where students will meet with experienced industry leaders and senior executives from world-class companies and organizations. The two-day in-person workshops will include pre-workshop class assignments and post-workshop projects designed to prepare students for workshop sessions and to apply skills developed in workshops. Through the workshops, students will learn how the skills, processes, and practices presented in the course materials have been successfully applied in a wide variety of real-world roles and situations. Each workshop participant will be expected to develop a personal leadership and development action plan to apply their learnings to their own career objectives.

for the degree of Master of Engineering in Engineering, Chemical Engineering Leadership Concentration (on campus & online)

Students in the program need to take the required courses listed in the table and take a minimum number of 34 credit hours to satisfy the concentration requirements. Students with BS degrees in fields other than CHBE may be required to take a selection of undergraduate CHBE courses as prerequisites prior to completing required core courses in MEng program.

Code	Title	Hours
Technical Core		**12**
CHBE 521	Applied Mathematics in CHBE	
CHBE 523	Heat and Mass Transfer	
or CHBE 513	Advanced Transport Phenomena	
CHBE 551	Chemical Kinetics & Catalysis	
or CHBE 516		
Management & Leadership Core		**10**
BADM 508	Leadership and Teams	
ACCY 503	Managerial Accounting	
CHBE 594	Special Topics	
Professional Electives		**4**
Choose from the following:		
ENG 572	Professional Practicum	
ENG 573	Capstone Project	
BADM 544, TE 450, TE 460, TE 461, TE 466, TE 565 (Additional courses may count with advisor approval)		
Technical Electives		**8**
Choose from ChBE 400- or 500-level courses in approved Technical Electives list (Up to 4 credit hours of non-ChBE technical elective course credit will be allowed with approval of ChE concentration advisor.)		
CHBE 453, CHBE 471, CHBE 472, CHBE 473, CHBE 475, CHBE 516, CHBE 522, CHBE 525, CHBE 551 (if not taken as Core course)		
CHBE 594: Special Topics: Graduate level enriched versions of the following courses:		
CHBE 455, CHBE 458, CHBE 476, CHBE 478		
Total Hours		**34**

Additional Required Courses for Students without a BS in Chemical Engineering

Code	Title	Hours
Technical Core Courses		**11**
CHBE 421	Momentum and Heat Transfer	
CHBE 422	Mass Transfer Operations	
CHBE 424	Chemical Reaction Engineering	

Other Requirements

Code	Title	Hours
Minimum 500-level hours required overall:		12
Minimum credit hours taken from the University of Illinois at Urbana-Champaign campus:		20
No courses used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.		
Minimum GPA:		3.0

for the degree of Master of Engineering in Engineering, Chemical Engineering Leadership Concentration (on campus & online)

The objectives of the ChBE Professional MEng program are to:

- Develop advanced engineering skills that apply to the student's area of interest
- Learn how experienced technical leaders and executives apply their skills to solve real-world challenges (context)
- Understand how to identify, define, and deliver high value technical solutions to various stakeholders
- Apply the learned skills through an industrial or research experience
- Become a team leader and a more effective team member of diverse, multi-discipline teams

for the degree of Master of Engineering in Engineering, Chemical Engineering Leadership Concentration (on campus & online)

Admission

Students with bachelor's or master's degrees in engineering or related sciences will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Admission is possible for the both the fall and spring semesters. Full details of admission requirements are on the Web page of the department offering the concentration.

All applicants whose native language is not English are required to submit TOEFL or International English Language Testing System (IELTS) scores as evidence of English proficiency. Minimum admission requirements are set by the Graduate College.

Check the MEng Program website (https://chbe.illinois.edu/admissions/masters/apply/) for the most up-to-date timelines and information regarding application deadlines and fees.

Application Materials

- Submit/upload unofficial transcripts for all completed university coursework in the Online Application. Official transcripts will be required upon admission and acceptance to the program. If you are offered admission, you must submit final, official academic credentials within one month of the start of the semester to the Graduate College.
- Submit a resume or curriculum vitae. This is a part of the online application form. Your resume should address your education, job experience, remarkable achievements, publications, organizations, awards, and leadership experiences.
- Submit an academic statement of purpose. This is a part of the online application form. Provide your Academic Statement of Purpose to describe in 1000 words:
  a. How has your academic and professional background, including any professional training, prepared you for graduate study?
  b. How will our program help you achieve your intellectual, professional, and career goals?
  c. What are your career interests and why do you wish to pursue graduate studies in this specific program?
  d. (Optional) Are there any personal experiences, achievements, strengths, or circumstances you would like to include or that you believe will help you succeed in our program?
- Submit 3 letters of recommendation. Individuals writing letters of recommendation on your behalf should submit their letters through the online application system.
- GRE scores are optional. If you have already taken or plan to take the GRE, you may submit your scores to the Graduate College using institution code number 1836. If GRE scores are submitted, they must be official. (Please follow the Graduate College instructions on submitting Test Scores.)

All applicants whose native language is not English:

- Proof of English proficiency is not required for admission for domestic applicants. All international degree-seeking applicants are required to submit the results of a
  n official TOEFL, IELTS, or Duolingo test as evidence of English proficiency unless they qualify for an exemption. The Graduate College details the accepted tests, proficiency requirements, and exemptions.

Ensure all your application materials have been submitted successfully and access your application status through the admissions portal.

Admissions Criteria
Minimum Requirements:

- Bachelor's in engineering or related sciences, such as chemistry, materials science, bioengineering, and biomedical engineering (Applicants without a chemical engineering degree are encouraged to take our program's technical core courses (https://chbe.illinois.edu/academics/masters/degree-requirements/#technicalcore), which comprise three courses / 11 credit hours).
- Minimum 3.0 GPA for the last two years of undergraduate study.
- Proof of English proficiency is not required for admission for domestic applicants. All international degree-seeking applicants are required to submit the results of an accepted test as evidence of English proficiency unless they qualify for an exemption. The Graduate College (https://grad.illinois.edu/admissions/apply/begin/international/) details the accepted tests, proficiency requirements, and exemptions.

Selection Criteria
The Admissions Committee carefully reviews and evaluates all complete applications holistically. Your personal essay, as well as your letters of recommendation, are important criteria for selection. We understand that there may be extenuating circumstances related to your credentials, which you are welcome to explain in your essay. The primary skills we look for are your potential to be a leader through your academic accomplishments, extracurricular activities, etc. We do not require any internship or work experience, but that is a bonus.

Admission Decisions
Applications are reviewed on a rolling basis. Prospective students are encouraged to submit their applications before the deadline. Admission decisions are communicated via email to the email address provided in the applicant's application.

Additional certification or documentation may be required from applicants who are recommended for admission in order to process the admission recommendation with the Graduate College Admission Office. Applicants who are recommended for admission will need to submit an official final transcript that shows completion of all courses and degrees awarded upon final review by the Graduate College Admission Office.

Financial Aid
Students in this degree program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois. More information about tuition and fees can be found on our website (https://chbe.illinois.edu/admissions/masters/tuition/).

Engineering: Digital Agriculture, MENG

for the degree of Master of Engineering in Engineering, Digital Agriculture Concentration (online)

The MEng in Engineering, Digital Agriculture Concentration is a professionally oriented degree program for students whose primary intent is a career in industry or government. This degree differs from the Master of Science degree in that it is a terminal degree and not a pathway to a doctoral program. Concentrations under the MEng in Engineering major include Aerospace Systems Engineering (p. 1377), Autonomy and Robotics (p. 1379), Digital Agriculture (p. 1386), Energy Systems (p. 1392), Instrumentation and Applied Physics (http://catalog.illinois.edu/graduate/engineering/engineering-meng/instrumentation-applied-physics/), and Plasma Engineering (p. 1394)..

Digital agriculture or digitization in agriculture presents a current challenge area in agriculture drawing upon practices such as Precision Agriculture, Digital farming, and advances in biotechnology and genomics, that delivers high-throughput complex data that requires processing and interpretation to become actionable.

Four main activity areas are commonly recognized:

1. Automation: Use of autonomous or semi-autonomous ground and aerial machinery and robots to perform agricultural operations.
2. Data Science in Agriculture: Extracting knowledge from complex agricultural data.
3. Spatial Agriculture:
   a. Precision agriculture: Use of high-resolution aerial imaging and ground sensors to optimize field management in real-time, with our without autonomy.
   b. Agricultural intelligence: Using long term climatic, environmental, and performance data for modeling and characterization of locations with geographic information systems.
4. Genomics, Breeding, and Biotechnology: Use of high-throughput molecular and physical analysis, such as sequencing and genotyping technologies, and image-analytics for crop improvement and management.

The common denominator for all these activity areas is collection(sensors), transmission(networks), storage & access (databases), integration & analysis (data science) of large volumes of data from various sources, including rural areas with low bandwidth for data transmission capacity. As the density of data sources and the frequency of data transmissions increase, it becomes increasingly challenging to perform these tasks without advanced computerization.

The Digital Agriculture core curriculum was tailored such that a generalist in digital agriculture would be able to operate in all of these activity areas at a level of basic competence.

Students who wish to be trained as specialists in a targeted digital agriculture activity area can choose collections of themes courses from the approved course list towards their degree completion requirements.

Requirement
A minimum of 20 credit hours must be taken from the University of Illinois Urbana-Champaign campus.
A minimum of 12 credit hours of 500-level course credit is required.
No courses used to fulfill any degree requirements may be taken using the "Credit/Not Credit" option.
The minimum program GPA required for the degree is 3.0.

for the degree of Master of Engineering in Engineering, Digital Agriculture Concentration (online)

Admission Requirements

The University of Illinois Urbana-Champaign policy requires applicants to hold at least a 3.0/4.0 or higher GPA in the last two years of their undergraduate study to be eligible for graduate studies. Applicants are not required to provide GRE scores; however, as per UIUC Graduate College Requirements, all applicants whose native language is not English are required to submit the TOEFL or IELTS results as evidence of English proficiency.

TOEFL or IELTS scores must be less than two years old from the first day of class at the proposed term of entry to be valid.

Applicants should hold a 4-year bachelor's degree (or equivalent). Applicants whose undergraduate degree is a three-year program may not be eligible for graduate-level admissions consideration at the University of Illinois. Eligibility depends on the country where the applicant received their degree -- please see the Graduate College's list of eligible degrees. The recommended undergraduate GPA for applicants applying is a 3.2/4.0 for the last two years of undergraduate study.

Applications for this Program do not require letters of recommendation. However, they will be considered if included, especially if used to justify experience in place of required coursework or other irregularities.

To succeed in graduate-level C.S. courses required for this Program, candidates must have prerequisite coursework or commensurate experience in object-oriented programming, data structures, algorithms, linear algebra, and statistics/probability. Applicants interested in pursuing automation and data science-related themes in this Program are strongly encouraged to complete courses in these areas at a local university, or via iCAN program, or as non-degree online courses from Campus Graduate Certificate Programs before enrolling to this Program. Applicants who can not present transcripted grades for the courses mentioned above would be required to pass the Data Structures Proficiency exam to be eligible for admission.

Financial Aid

Students in concentrations under the MEng in Engineering major are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the Illinois.

Data Structures Proficiency Exam Details

- The exam is hosted on PrairieLearn (an Illinois online assessment platform) and is proctored by ProctorU (an online third-party proctoring service).
- The exam is 3 hours long.
- A grade of B+ on the exam (in addition to a minimum 3.0/4.0 GPA in the last two years of the undergraduate degree) is required for the application to be considered in the admission process.
- A minimum of 30 calendar days' learning period is required between any two consecutive exam attempts.

Requirement	Description
No courses used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.	
Minimum GPA: 3.0	

for the degree of Master of Engineering in Engineering, Instrumentation and Applied Physics concentration

Instrumentation and Applied Physics M.Eng. graduates will:

1. Be able to conceive, propose, plan, and execute technical projects using a wide range of laboratory tools, instrumentation, and analysis techniques;
2. Understand the physical principles and mathematical foundations governing the behavior of some of the devices, tools, and techniques that might be relevant to execution of technical projects;
3. Develop an ability to work collaboratively with a diverse team;
4. Be able to propose an efficient (tool-dependent) sequencing of activities in a technical project, using standard project management tools;
5. Learn to consider the tradeoffs—balancing advantages and disadvantages—associated with technology downselects;
6. Be able to analyze measurement data and draw supportable conclusions, including the use of deep learning and machine learning techniques in the analysis of complex data sets drawn from fields that include physics, medicine, and agriculture;
7. Develop an ability to communicate—both orally and in writing—to present technical topics effectively to specialists and non-specialists; and
8. Develop an understanding of basic business principles and practices.

for the degree of Master of Engineering in Engineering, Instrumentation and Applied Physics concentration

Admission

Students with bachelor's or master's degrees in physics, astronomy, or related fields will be considered for admission for the fall term if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. Many students who have minored in physics will also be qualified for enrollment.

Before enrollment, students should have completed intermediate undergraduate level courses in classical mechanics (comparable to UIUC's Physics 325), electrodynamics (comparable to Physics 435), and quantum mechanics (comparable to Physics 485 or 486). A course in statistical and thermal physics (similar to Physics 427) is recommended, but not required. We also require students to have taken a course in multivariable calculus at a level appropriate for the intermediate physics courses mentioned above. Applicants for admission should already be familiar with at least one modern high-level programming language like Python, C++, or Java.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency requirements for full admission status. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Prospective students are not required to have take the Graduate Record Exam (GRE).

Financial Aid

Students in concentrations under the MEng in Engineering major are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois Urbana-Champaign. Students are encouraged to seek external funding for which they may be eligible, and refer to their program of interest's website to learn about potential funding resources.

Engineering: Energy Systems, MEng

for the degree of Master of Engineering in Engineering, Energy Systems Concentration

The MEng in Engineering, Energy Systems Concentration is a professionally oriented degree program for students whose primary intent is a career in industry or government. This degree differs from the Master of Science degree in that it is a terminal degree and not a pathway to a doctoral program. Concentrations under the MEng in Engineering major include Aerospace Systems Engineering (p. 1377), Autonomy and Robotics (p. 1379), Chemical Engineering Leadership (p. 1383), Digital Agriculture (p. 1386), Energy Systems (p. 1392), Instrumentation and Applied Physics (p. 1389), and Plasma Engineering (p. 1394).

for the degree of Master of Engineering, in Engineering, Energy Systems Concentration

For additional details and requirements refer to the program's website (https://energysystemsmeng.engineering.illinois.edu/curriculum/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; the requirements are listed below:

Requirements

Code	Title	Hours
Core Courses		**12**
ENG 471	Seminar Energy & Sustain Engrg	
ENG 571	Theory Energy & Sustain Engrg	
ABE 436	Renewable Energy Systems	
NPRE 480	Energy and Security	
or NPRE 481	Writing on Technol & Security	
Electives (approved by academic advisor)		**16**
Professional Development (choose from these 3 options):		**4**
ENG 572	Professional Practicum (4 hours)	
ENG 573	Capstone Project (4 hours)	
• Select a different course with professional development components in consultation with advisor		
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
A minimum of 20 credit hours must be taken from the University of Illinois Urbana-Champaign campus.	
A minimum of 12 500-level credit hours, with a minimum of 8 hours of ENG or NPRE 500-level coursework.	
A maximum of one 1-credit-hour course may be applied toward the minimum 12 500-level credit-hour requirement.	
No courses used to fulfill any degree requirement may be taken using the "Credit/No Credit" option.	
Minimum GPA:	3.0

for the degree of Master of Engineering in Engineering, Energy Systems Concentration

1. Develop an ability to analyze energy systems at a holistic level and perform lifecycle assessment.
2. Obtain an understanding (at the graduate level) of fundamental limits to energy production, transmission, storage and consumption due to physics and chemistry constraints.
3. Understand the concepts of engineering and economic optimization, and learn their application.
4. Develop an interdisciplinary breadth of understanding of the variety of approaches to development, deployment and sustainability of global energy resources.

5. Develop an understanding of the broader policy and decision-making context in which development of and deployment of energy systems takes place.
6. Complete a study of a particular problem relevant to energy systems in a manner analogous to a professional career assignment.

Engineering Technology and Management for Agricultural Systems, MS

for the degree of Master of Science in Engineering Technology and Management for Agricultural Systems

The Department of Agricultural and Biological Engineering offers a graduate degree program which is at the forefront of the application of engineering principles to solve problems of agricultural production, utilization, environmental control, and biological systems and to improve the quality of life. Students may concentrate study in one of the faculty research interest areas listed below. Supporting course work includes: mathematics; computer science; statistics; engineering mechanics; chemical, civil, electrical, and mechanical engineering; animal science; crop sciences; food science; and other appropriate fields. Opportunity also exists for specializing in

1. computational science and engineering and
2. energy and sustainability engineering within the department's graduate programs via the Computational Science and Engineering (CSE) Option (http://cse.illinois.edu/education/cse-educational-programs-overview/) and the Energy and Sustainability Engineering (EaSE) Option (http://ease.illinois.edu/)

Admission

Admission requirements for either master's program include completion of an undergraduate program equivalent to the Agricultural and Biological Engineering (ABE) curriculum (in the case of the ABE M.S.) or the Engineering Technology and Management for Agricultural Systems (ETMAS) curriculum (in the case of the ETMAS M.S.) with at least a 3.0 grade point average (A = 4.0) for the last two years of undergraduate course work.

Admission to the Ph.D. program is limited to individuals who have demonstrated exceptional ability through outstanding performance in obtaining a Master of Science degree and/or through a high degree of technical and professional accomplishment. Candidates must also satisfy entrance requirements for the M.S. degree program.

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org/) score of 88 (iBT), 230 (CBT) or 570 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org/) academic exam scores of 6.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. For those taking the TOEFL or IELTS, full admission status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for scores greater than 102 (TOEFL iBT), 253 (TOEFL CBT), 610 (TOEFL PBT), or 6.5 (IELTS). Limited status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for lesser scores and requires enrollment in English as a Second Language (ESL) courses (https://linguistics.illinois.edu/languages/english-second-language/) based on an ESL Placement Test (EPT) taken upon arrival to campus.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates in this program. For details of expectations, see the department's Graduate Handbook (http://abe.illinois.edu/graduate/handbook/).

Faculty Research Interests

Current research interests of the faculty include off-road equipment engineering (robotics and machinery automation, remote sensing and precision agriculture, machinery management systems, pesticide application technology, engines and biofuels); soil and water resources (hydrology, erosion and sediment transport, water management, wetlands, and water quality); bioenvironmental engineering (building environment and energy conservation, air quality, renewable energy, biomass to bioenergy conversion, structural analysis and facility design, building materials evaluation, environmental control and ergonomic design for plant, animal, and human housing systems and facilities); food and bioprocess engineering (engineering properties of foods, physical properties of biological products, grain drying, grain quality evaluation, dry-grind corn processing, wet and dry milling, modified bioprocesses for improved co-products, fuel and chemicals, fermentation, and transport phenomenon in biological materials); or electronic and electrical systems (biosensors and controls, energy systems, machine vision, near-infrared spectroscopy applications, bionanotechnology, microfabricated devices, bioconjugation techniques, transcriptional control, modeling life support systems, and multiscale biological processes). For more details, visit the department's graduate program website. (http://abe.illinois.edu/graduate/areas/)

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted. For all other students, fellowships, supported by University, College of Agricultural, Consumer and Environmental Sciences, and College of Engineering funds, are available on a competitive basis. A limited number of assistantships, providing both teaching and research experience, are often available on a half-time basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

English, MA

for the degree of Master of Arts in English

The Department of English offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. We welcome qualified students who wish to pursue their interests in English, American, and Anglophone language, literature and film beyond the undergraduate level. The Ph.D. program is, in general, designed to educate and train teacher-scholars who will take positions in colleges and universities throughout the country. We consider the Master of Arts program to be the first step toward the Ph.D. degree; we expect students admitted to the M.A. program to receive the M.A. and go on to complete a Ph.D. We therefore do not offer a formal terminal M.A. program.

Both the M.A. and Ph.D. may be earned with a specialization in Writing Studies. Also, doctoral students specializing in other fields may earn a graduate concentration in Writing Studies.

Admission

A student who wishes to be considered for admission to graduate studies in English must present the equivalent of at least 20 semester hours of undergraduate work in English and American literature, excluding required work in rhetoric or composition. Graduate Record Examination (GRE) scores are required for those applying for the Literary Studies and Writing Studies programs. The GRE subject test for literature in English is not required. **For the 2021-2022 application season, the English Department is not requiring the GRE general test, and such scores will not be considered by the readers of applications in their deliberations.** All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996). Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College. The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, knowledge of a foreign language, strong recommendations, and a compelling writing sample: in short, an academic record that shows promise of doing outstanding work in the field and earning degrees within a reasonable time. We do not admit part-time students. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is noon on December 2nd.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and all M.A. and Ph.D. candidates will have ample opportunity to teach undergraduate writing classes.

Financial Aid

Financial aid is available to students in the form of fellowships, teaching assistantships, research assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website (https://english.illinois.edu/admissions/graduate-admission/) or write to the above address.

for the degree of Master of Arts in English

A full-time student can complete this program in two academic years. Students must choose to complete a specialization in Literature or Writing Studies.

For additional details and requirements refer to the department's Graduate Studies in English (http://www.english.illinois.edu/graduate/) Website and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Core Requirements for Both Specializations

Requirement	Description
After finishing all MA requirements and during coursework and exam preparation for the PhD, students will be required to fulfill a “research competency,” which is defined as the acquisition of a language broadly construed (global languages, ASL, computer languages, etc.) or the development of a research method (digital methods, ethnography, oral history, linguistics, etc.).	
At least two semesters or the equivalent in residence	
Minimum Hours Overall Required Within the Unit:	24 (12 at 500-level)

Minimum 500-level Hours Required Overall:	16
Minimum GPA	3.0

Literature Specialization Requirements

Code	Title	Hours
Eight semester-long courses in Literature, Film, and Critical Theory, with 24 hours in the English Department, and at least 16 hours in 500-level graduate seminars, including the following:		
Two courses (4 hours each) in each of three areas (a course may fulfill two different areas):		12-24
Historical Period		
Form/Genre		
Geographic and Racial Difference		
ENGL 593	Professional Seminar in College Teaching	4
Electives		4-16
Total Hours		**32**

Writing Studies Specialization Requirements

Code	Title	Hours
Eight semester-long courses in Writing Studies, Literature, and Theory, of which 4 are at the 500-level, including:		
ENGL 505	Writing Studies	4
ENGL 582	Topics Research and Writing	4
or ENGL 583	Topics Writ Pedagogy & Design	
or ENGL 584	Topics Discourse and Writing	
Literature or Theory (2 courses)		8
ENGL 593	Professional Seminar in College Teaching	4
Electives approved by the Writing Studies advisor.		16
Total Hours		**32**

Course work listing for M.A. requirements for the Literature Specialization:

Eight semester-long courses in British and American Literature and Critical Theory.

Courses (worth four hours of credit each) must be taken in six of the following nine areas:

- Medieval British Literature (beginning to 1485)
- Renaissance British Literature (1485-1660)
- Restoration/Eighteenth-Century British Literature (1660-1800)
- Nineteenth-Century British Literature (1800-1900
- Twentieth-Century British Literature (1900-2000)
- Early American Literature (beginning to Civil War)
- Later American Literature(Civil War to present)
- Anglophone Literature (other than British and American)
- Critical Theory

Candidates may substitute another area (such as film) for one on the above list with the permission of the Director of English Graduate Studies. However, all students must take at least one course in a period before 1660, and one course in either Early or Later American Literature.

At least four of the eight courses must be in 500-level graduate seminars (limited to 14-18 students). The others may (but need not) be in 400-level courses (limited to 36 students) in which graduate students complete work beyond that expected of undergraduates.

In their first year of teaching, students are required to complete a Professional Seminar in the teaching of composition or business and technical writing for four hours of credit. (ENGL 593)

The Foreign Language Requirement may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways:

1. By completing the equivalent of three full years of undergraduate work
2. By passing a proficiency exam administered by an Illinois foreign language department
3. By passing a non-credit 501 language course with a grade of B or better

Course work listing for M.A. requirements for the Writing Specialization:
Eight semester-long courses in Writing Studies, Literature, and Theory.

Courses (worth four hours each) must be taken as follows:

At least 16 of the 32 required hours must be in 500-level courses. Eight of the 16 hours must be ENGL 505 and 1 course from the following list: ENGL 582, ENGL 583, ENGL 584. In addition, students must take two courses in Literature or Theory and four courses approved by the Writing Studies advisor.

At least four of the eight courses must be 500-level graduate seminars (limited to 14-18 students). The others may (but need not) be 400-level courses (limited to 36 students) in which graduate students complete work in addition to that expected of undergraduates.

In their first year of teaching, students are required to complete a Professional Seminar (ENGL 593) in the teaching of composition or the teaching of business and technical writing for four hours of credit.

The Foreign Language Requirement may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways:

1. By completing the equivalent of three full years of undergraduate work
2. By passing a proficiency exam administered by an Illinois foreign language department
3. By passing a non-credit 501 language course with a grade of B or better.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

English, PhD

for the degree of Doctor of Philosophy in English

The Department of English offers programs of study leading to the Master of Arts and the Doctor of Philosophy degrees. We welcome qualified students who wish to pursue their interests in English, American, and Anglophone language, literature and film beyond the undergraduate level. The Ph.D. program is, in general, designed to educate and train teacher-scholars who will take positions in colleges and universities throughout the country. We consider the Master of Arts program to be the first step toward the Ph.D. degree; we expect students admitted to the M.A. program to receive the M.A. and go on to complete a Ph.D. We therefore do not offer a formal terminal M.A. program.

Both the M.A. and Ph.D. may be earned with a specialization in Writing Studies. Also, doctoral students specializing in other fields may earn a graduate concentration in Writing Studies.

Admission

A student who wishes to be considered for admission to graduate studies in English must present the equivalent of at least 20 semester hours of undergraduate work in English and American literature, excluding required work in rhetoric or composition. Graduate Record Examination (GRE) scores are required for those applying for the Literary Studies and Writing Studies programs. The GRE subject test for literature in English is not required. **For the 2021-2022 application season, the English Department is not requiring the GRE general test, and such scores will not be considered by the readers of applications in their deliberations.** All applicants whose native language is not English are required to submit Test of English as a Foreign Language (TOEFL) scores. Currently, a minimum score of 550 on the paper-based test (213 on the computer-based test) is required. Before a teaching assistantship involving classroom instruction or student consultation can be awarded to a non-native speaker of English, the applicant must take the Test of Spoken English (TSE) and achieve a score of 50 or higher (230 or higher before 1996). Because applications for admission usually far exceed capacity, in recent years undergraduate grade point averages of students admitted have been significantly higher than the 3.0 (A = 4.0) required by the Graduate College. The committee on admissions tends to select those applicants who have a solid array of undergraduate courses, knowledge of a foreign language, strong recommendations, and a compelling writing sample: in short, an academic record that shows promise of doing outstanding work in the field and earning degrees within a reasonable time. We do not admit part-time students. Applicants are considered only in spring for fall admission, and the deadline for submitting applications is noon on December 2nd.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and all M.A. and Ph.D. candidates will have ample opportunity to teach undergraduate writing classes.

Financial Aid

Financial aid is available to students in the form of fellowships, teaching assistantships, research assistantships, and waivers of tuition and service fees. For complete information about the program, prospective applicants should consult our website (https://english.illinois.edu/admissions/graduate-admission/) or write to the above address.

for the degree of Doctor of Philosophy in English

Students in the program who have earned their master's degrees must apply formally to the Ph.D. program. Applicants who have completed their master's degrees elsewhere may also apply. Seldom are applicants accepted with graduate grade point averages below 3.5. Students must choose to complete a specialization in Literature or Writing Studies. In addition, students may choose to complete the graduate concentration in Writing Studies (http://catalog.illinois.edu/graduate/graduate-majors/writing-studies/).

Interdisciplinary work is encouraged. Students may take courses outside of English. The special field examination is taken as the student completes coursework and prepares to write the thesis. The student then goes on to complete and defend the thesis under the direction of a committee composed of four professors. A full-time student can complete this program in four years beyond the master's degree.

For additional details and requirements refer to the department's Graduate Studies in English (http://www.english.illinois.edu/graduate/) Website and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Total Minimum Hours: 64

Core Requirements for Both Specializations

Code	Title	Hours
ENGL 599	Thesis Research (32 max can be applied to the degree.)	32
Research Competency Requirement - defined as the acquisition of a language broadly construed (global languages, ASL, computer languages, etc.) or the development of a research method (digital methods, ethnography, oral history, linguistics, etc.).		
• This requirement can be fulfilled by demonstrating competency in a foreign language in one of the following ways:		
1. By completing the equivalent of three full years of undergraduate work in the relevant language or research method;		
2. By passing a proficiency exam administered by a UIUC department;		
3. By passing a non-credit 501 language course with a grade of B or better or via studying with a language institute on or beyond campus;		
4. By passing the Old English two-course sequence with a B or higher (ENGL 407 and ENGL 514 on an Old English topic);		
5. Native fluency in reading and writing;		
6. In consultation with an advisor in field, detailing a course of study which is reviewed by the DGS and can be fulfilled by building on previous training and showing competency through one 500-level course with a B grade or higher or taking a combination of two courses, one of which must be the equivalent of a 500 level course.		
The research competency must have been passed before a student sits for their Special Field Examination.		
Special Field Examination (oral, written, or both). See specialization requirements for more details.		
The special field examination is taken as the student completes coursework and prepares to write the thesis.		
Completion of a two-hour oral defense of a dissertation.		
Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.		
Masters Degree Required for Admission to PhD?		Yes
Qualifying Exam Required		No
Preliminary Exam Required		Yes
Final Exam/Dissertation Defense Required		Yes
Dissertation Deposit Required		Yes
Minimum GPA		3.0

Literature Specialization Requirements

Code	Title	Hours
ENGL 593	Professional Seminar in College Teaching (or act as a teaching assistant for two semesters in a large lecture course before they teach literature courses. Students are expected to teach at least one literature course during their Ph.D. work.)	0 to 4
Eight additional semester-long courses at the 400- and 500- level. These, selected in consultation with a faculty advisor, either focus on the proposed field of specialization and allied fields--in English or in other disciplines--or fill gaps in the student's background.		32
Special Field Examination (oral, written, or both)		
The exam, administered by a committee of four faculty members selected by the student, is based upon the student's approved Special Field list of primary and secondary sources, including a discussion of its rationale and relation to the proposed dissertation topic. Approved fields include historical periods, genres, film, and critical theory.		

Writing Studies Specialization Requirements

Code	Title	Hours
ENGL 593	Professional Seminar in College Teaching	0 to 4
Eight additional semester-long courses at the 400- and 500- level. These selected in consultation with a faculty advisor, focus on the proposed field of specialization and allied fields--in English or in other disciplines--or fill gaps in the student's background. If not taken at the MA level, they will include:		32
ENGL 505	Writing Studies	
ENGL 582	Topics Research and Writing	
In addition, students must take one course in Literature or Theory.		
A second methodology course should be approved by the advisor and typically will be approved by the Center for Writing Studies for the methodology requirement in its Writing Studies Graduate Concentration)		
Special Field Examination (oral, written, or both)		

This exam, administered by a committee of four faculty members selected by the student, is based upon the student's approved special field list--which includes a discussion of its rationale and relation to the proposed dissertation topic. Lists are representative of the field of Writing Studies and include two or three concentrations within it. Approved fields include: Cognition and Composition, Computers and Composition Studies, Classical Rhetoric, Critical Theory, Discourse Processes, Gender and Writing, Literacy Studies, Technical Communication, Writing Across the Curriculum, Writing in the Disciplines, and Writing Assessment. Other combinations of fields are possible, including those that combine disciplines (e.g. African-American Studies, women's studies, and literacy).

Course work listing for Ph.D. requirements for the Literature Specialization:

- Eight additional semester-long courses at the 400 and 500 level. These, selected in consultation with a faculty advisor, either focus on the proposed field of specialization and allied fields--in English or in other disciplines--or fill gaps in the student's background.
- Doctoral students in literature will either take a Professional Seminar in the teaching of literature or film or act as a teaching assistant for two semesters in a large lecture course before they teach literature courses. They are expected to teach at least one literature course during their Ph.D. work.
- The Foreign Language Requirement (if not already satisfied at the M.A. level) may be satisfied by demonstrating a reading knowledge of an appropriate foreign language in one of the following three ways: By completing the equivalent of three full years of undergraduate work; By passing a proficiency exam administered by an Illinois foreign language department; By passing a non-credit 501 language course with a grade of B or better.
- Completion of a Special Field Examination (oral, written, or both). The exam, administered by a committee of four faculty members selected by the student, is based upon the student's approved Special Field list of primary and secondary sources, including a discussion of its rationale and relation to the proposed dissertation topic. Approved fields include historical periods, genres, film, and critical theory.
- Completion and two-hour oral defense of a dissertation. Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.

Course work listing for Ph.D. requirements for the Writing Studies Specialization:

- Eight additional semester-long courses at the 400 and 500 level. These selected in consultation with a faculty advisor, focus on the proposed field of specialization and allied fields--in English or in other disciplines--or fill gaps in the student's background and include ENGL 505 and 2 methodology courses (at least one of which is an ENGL 582; the second methodology course should be approved by the advisor and typically will be approved by the Center for Writing Studies for the methodology requirement in its Writing Studies Graduate Concentration). In addition, students must take one course in Literature or Theory. Specific courses taken at the MA level (ENGL 505 and ENGL 582) are counted as fulfilling those specific requirements at the PhD level.
- Students who enter the Ph.D. program with an M.A. from another institution must show demonstrated reading knowledge of a foreign language.
- Completion of a Special Field Examination (oral, written, or both). This exam, administered by a committee of four faculty members selected by the student, is based upon the student's approved special field list--which includes a discussion of its rationale and relation to the proposed dissertation topic. Lists are representative of the field of Writing Studies and include two or three concentrations within it. Approved fields include: Cognition and Composition, Computers and Composition Studies, Classical Rhetoric, Critical Theory, Discourse Processes, Gender and Writing, Literacy Studies, Technical Communication, Writing Across the Curriculum, Writing in the Disciplines, and Writing Assessment. Other combinations of fields are possible, including those that combine disciplines (e.g. African-American Studies, women's studies, and literacy).
- Completion and two-hour oral defense of a dissertation. Students working on their dissertations are eligible for fellowship support or released time from teaching. All students in good standing and making good progress will ordinarily receive at least one semester free from teaching. A few students receive a year or more of fellowship aid to work full-time on their dissertations.

Entomology, MS

for the degree of Master of Science in Entomology

The Department of Entomology offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. The program is designed to accommodate incoming students with a wide range of entomological expertise. The goal of the program is to provide students with a strong background in basic biology as it relates to insects and to equip them with the specialized intellectual and technical skills to pursue a career in research, teaching, and service in entomology and related biological disciplines.

Major areas of specialization within the department include systematics, evolutionary biology, molecular genetics, genomics, chemical ecology, disease ecology, invasion biology, toxicology, pollinator health, social insect biology, insect-microbe interactions, conservation biology, and integrated pest management.

Admission

The Graduate Record Examination (GRE) general test scores are not required by our Department but can be submitted if they will support your application. A minimum Test of English as a Foreign Language (TOEFL) score of 550 (paper-based test), 213 (computer-based test), or 79 (internet-based test), or an International English Language Testing System (IELTS) score of 6.5, is required. Previous training in entomology is unnecessary. It is recommended that students who intend to study for advanced degrees in entomology gain a thorough grounding in the physical and biological sciences, mathematics, and the liberal arts. Spring admission is possible for special circumstances.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and serving as a teaching assistant for at least two semesters is required.

Financial Aid

Graduate student awards are available, including teaching and research assistantships. In addition, fellowships and traineeships are offered by the Graduate College and the School of Integrative Biology. A single application to the department is sufficient for consideration for all awards currently available.

for the degree of Master of Science in Entomology

A candidate for the M.S. degree is expected to become knowledgeable in entomology through coursework and independent research and to complete a research thesis in an area of interest chosen in consultation with an adviser.

For additional details and requirements refer to the department's Graduate Handbook (http://www.life.illinois.edu/entomology/handbook.html) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Science in Entomology

---

1. Synthesize and apply core knowledge related to the field of Entomology, particularly from the areas covered in the core courses and the advanced topic seminars.
2. Design and implement independent research, with the overarching goal to obtain mastery of relevant approaches for their area of research
3. Apply rigorous statistical/analytical methods that typify their area of study
4. Demonstrate effective communication skills
   a. Presentations
   b. Publications
5. Obtain teaching experience
6. Learn grant and fellowship application writing
7. Acquire other professional skills
   a. Data management
   b. Citation management
   c. Public Outreach/Science Communication
   d. Research and Professional Ethics

ENT 599	**Thesis Research (maximum of 69 hours applied toward degree)**	**69**
Core curriculum minimum 20 hours		**20**
Select at least 11 hours from the following courses:		
IB 433	Insect Physiology	
IB 444	Insect Ecology	
IB 468	Insect Classification and Evol	
IB 482	Insect Pest Management	
IB 504	Genomic Analysis of Insects	
One of the following Statistical or Analytical Skills courses:		
IB 494	Theoretical Biology + Models	
IB 501	Programming for Genomics	
IB 517	Analysis of Biological Data in R	
CHBE 571	Bioinformatics	
CPSC 440	Applied Statistical Methods I	
NRES 421	Quantitative Methods in NRES	
NRES 454	GIS in Natural Resource Mgmt	
NRES 595	Advanced Quantitative Techniques for Ecology and Conservation	
Seminar: must register for every term enrolled (6 hours minimum)		
IB 526	Seminar in Entomology	
Remaining hours to total 96 hours from the following list of courses:		
The first five courses are most recommended.		
IB 433	Insect Physiology	
IB 444	Insect Ecology	
IB 468	Insect Classification and Evol	
IB 482	Insect Pest Management	
IB 504	Genomic Analysis of Insects	
IB 416	Population Genetics	
IB 426	Env and Evol Physl of Animals	

IB 432	Genes and Behavior	
IB 439	Biogeography	
IB 452	Ecosystem Ecology	
IB 453	Community Ecology	
IB 481	Vector-borne Diseases	
IB 501	Programming for Genomics	
IB 517	Analysis of Biological Data in R	
IB 526	Seminar in Entomology	
FSHN 480	Basic Toxicology	
CPSC 437	Principles of Agroecology	
MCB 435	Evolution of Infectious Disease	
CHBE 571	Bioinformatics	
Total Hours		**96**

Other Requirements

Requirement	Description
Other requirements may overlap	
Preliminary Exam Required	Yes
Teaching required?	Yes (2 semester min)
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

for the degree of Doctor of Philosophy in Entomology

---

1. Synthesize and apply core knowledge related to the field of Entomology, particularly from the areas covered in the core courses and the advanced topic seminars.
2. Design and implement independent research, with the overarching goal to obtain mastery of relevant approaches for their area of research
3. Apply rigorous statistical/analytical methods that typify their area of study
4. Demonstrate effective communication skills
    a. Presentations
    b. Publications
5. Obtain teaching experience
6. Learn grant and fellowship application writing
7. Acquire other professional skills
    a. Data management
    b. Citation management
    c. Public Outreach/Science Communication
    d. Research and Professional Ethics

Environmental Engineering in Civil Engineering, MS

for the degree of Master of Science in Environmental Engineering in Civil Engineering (on campus & non-thesis online)

The Department of Civil and Environmental Engineering, consistently ranked as having one of the best graduate programs in the country, offers graduate work leading to master's and doctoral degrees. These are in a variety of specialized areas through departmental programs which are described on this page.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research

Areas of study and research pursued by our world-renowned faculty are focused in the following ten specializations:

- Construction Engineering Management
- Construction Materials
- Energy-Water-Environment Sustainability
- Environmental Engineering and Science
- Geotechnical Engineering
- Societal Risk and Hazard Mitigation
- Structural Engineering
- Sustainable and Resilient Infrastructure Systems
- Transportation Engineering
- Water Resources Engineering and Science

More information about these specialized areas may be found at the department's research website (https://cee.illinois.edu/areas/).

Through the research centers based in the department, CEE students participate in a wide range of groundbreaking research projects with immediate relevance to real-world engineering applications. For more information, see the department's research centers website (https://cee.illinois.edu/research/research-centers/).

CEE at Illinois is one of the nation’s best-equipped programs, with a broad range of facilities for civil and environmental engineering education and research. For more information, see the department's research facilities website (https://cee.illinois.edu/research/research-facilities/).

for the degree of Master of Science in Environmental Engineering in Civil Engineering (on campus & non-thesis online)

The degree requirements for the online programs are the same as for the on-campus non-thesis MS program—36 hours of course work—and the degree awarded to online students is the same degree awarded to resident students. Online students have five years to complete the program.

The MS degree in Environmental Engineering offered online includes five core courses in Environmental Engineering and electives chosen in Environmental Engineering, Hydrology and Hydraulic Engineering, or other areas of Civil Engineering to fulfill the degree requirements.

This degree program can be completed either on campus or online; with or without a thesis, the requirements are listed below:

Code	Title	Hours
Non-Thesis Option		
Elective courses	36 hours subject to Other Requirements and Conditions below	
Total Hours	**Non-Thesis Option**	**36**
Thesis Option		
CEE 599	Thesis Research (4 to 12 hours)	
Elective courses	20-28 hours subject to Other Requirements and Conditions below	
Total Hours	**Thesis Option**	**32**

Other Requirements

Requirement	Description
Other Requirements may overlap	
Individual programs are developed by the students in consultation with their academic advisors.	
A minimum of 16 hours of credit within the major field with 8 graded and at the 500 level.	
A minimum of 12 hours at the 500-level overall.	
A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement.	
At least half of the minimum hours required for the degree must be in Illinois courses meeting on the Urbana-Champaign campus or in courses meeting in other locations approved by the Graduate College for residency credit for the degree.	
Minimum program GPA	2.75

for the degree of Master of Science in Environmental Engineering in Civil Engineering (on campus & non-thesis online)

1. Ability to identify and utilize advanced mathematical, computational, design and/or experimental skills to solve complex problems in civil and environmental engineering
2. Demonstrate technical knowledge and depth in at least one or more CEE subject areas and breadth of knowledge in at least one additional area.
3. Demonstrate the ability to communicate effectively (written, oral presentation, and other media) technical ideas, design concepts, or research results.
4. Understanding of the student's professional and scientific ethical responsibilities;
5. Propose, plan, and execute original research idea that target current or future societal challenges related to civil and environmental engineering.
6. Demonstrate skills to teach technical subjects in CEE at the university level

for the degree of Master of Science in Environmental Engineering in Civil Engineering (on campus & non-thesis online)

Admission Requirements

The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

Admission to the Graduate College with full status in environmental engineering in civil engineering is granted to graduates of accredited institutions whose requirements for the bachelor's degree are substantially equivalent to those of the University of Illinois Urbana-Champaign and their cumulative grade point average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (https://www.ets.org/gre.html) is currently optional. CEE recommends the GRE test for MS applications, particularly for students applying from international universities, MS applicants looking for potential funding support, or MS applicants whose GPA falls below the average GPA of admitted students. If GRE scores are submitted, CEE does not have minimum scores for admission. GRE scores are only valid for five years prior to the proposed term of entry.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Financial Aid

Financial aid is available in the form of fellowships and research and teaching assistantships. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Environmental Engineering in Civil Engineering, PhD

for the degree of Doctor of Philosophy in Environmental Engineering in Civil Engineering

The Department of Civil and Environmental Engineering, consistently ranked as having one of the best graduate programs in the country, offers graduate work leading to master's and doctoral degrees. These are in a variety of specialized areas through departmental programs which are described on this page.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research

Areas of study and research pursued by our world-renowned faculty are focused in the following ten specializations:

- construction management
- environmental engineering and science
- environmental hydrology and hydraulic engineering
- geotechnical engineering
- materials
- structural engineering
- engineering materials and additive manufacturing Technologies
- transportation engineering
- sustainable and resilient infrastructure systems
- energy-water-environment sustainability
- societal risk and hazard mitigation

More information about these specialized areas may be found at the department's research website (https://cee.illinois.edu/areas/).

Through the research centers based in the department, CEE students participate in a wide range of groundbreaking research projects with immediate relevance to real-world engineering applications. For more information, see the department's research centers website (https://cee.illinois.edu/research/research-centers/).

CEE at Illinois is one of the nation's best-equipped programs, with a broad range of facilities for civil and environmental engineering education and research. For more information, see the department's research facilities website (https://cee.illinois.edu/research/research-facilities/).

for the degree of Doctor of Philosophy in Environmental Engineering in Civil Engineering

The degree of Doctor of Philosophy, primarily a research degree, requires from three to four years of graduate study beyond the master's degree. The major area of specialization encompasses courses and research that are closely related, but the courses need not be offered by a single major department. Candidates must demonstrate a capacity for independent research by preparing an original thesis on a topic within the major field of study, must meet the qualifying requirements or examination in the area of specialization, and must pass both preliminary and final examinations.

Qualifying exam information can be found here (https://cee.illinois.edu/academics/graduate-programs/phd-degree-and-curriculum/). For additional details and requirements refer to the department's Graduate Handbook (https://ws.engr.illinois.edu/sitemanager/getfile.asp?id=3334) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Entering with an approved Master's Degree:

Code	Title	Hours
CEE 599	Thesis Research (min-max applied toward degree)	32
Elective courses (subject to Other Requirements and Conditions below)		32
Total Hours		**64**

Other Requirements

Requirement	Description
Other Requirements and Conditions may overlap	
A maximum of 8 hours of CEE 597 (or other independent study) may be applied toward the elective course work requirement; approval required.	
There is no department-wide foreign language requirement. However, the faculties of some areas of specialization may require foreign language proficiency if essential to the conduct of research in that area.	
64 graduate hours must be completed in residence.	
A Masters degree is required for admission to the Ph.D. program.	
Ph.D. exam and dissertation requirements:	
Qualifying exam	
Preliminary exam	
Final exam or dissertation defense	
Dissertation deposit	
The minimum program GPA is 2.75.	

Entering with an approved Baccalaureate Degree:

Code	Title	Hours
CEE 599	Thesis Research	32-40
Elective Courses (subject to other requirements and conditions below)		56-64
Total Hours		96

for the degree of Doctor of Philosophy in Environmental Engineering in Civil Engineering

Admission Requirements

The Department of Civil & Environmental Engineering accepts applications for admission to the graduate program for both fall and spring semesters.

Admission to the Graduate College with full status in environmental engineering in civil engineering is granted to graduates of accredited institutions whose requirements for the master's degree are substantially equivalent to those of the University of Illinois, provided the applicant's preparation is appropriate for advanced study in his or her chosen major field and his or her cumulative grade point average is at least 3.00 (A = 4.00). The Graduate Record Examination (GRE) (https://www.ets.org/gre.html) is currently optional. However, it is strongly recommended that the GRE test be submitted to help faculty with admission and funding decisions for all PhD applicants. If GRE scores are submitted, CEE does not have minimum scores for admission. GRE scores are only valid for five years prior to the proposed term of entry. For additional information, see the departmental website (https://cee.illinois.edu/admissions/graduate/).

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Financial aid is available in the form of fellowships and research and teaching assistantships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://www.grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 or 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Environmental Geology, MS

for the degree of Master of Science in Environmental Geology (online)

The fully-online Environmental Geology M.S. degree program requires 32 credit hours (thesis not required), 12 of which must be at the 500-level (8 in GEOL). Students must work with their program advisor to individualize their program and the required capstone research project. Students must complete a minimum of 24 hours of coursework, 12 of which must be from within the unit. All students must maintain a minimum grade point average (GPA) of 3.0 (A = 4.0). If the GPA falls below this minimum after 12 graduate hours of graded coursework, it must be raised to 3.0 or above after the completion of 12 additional graduate hours of graded coursework and must be maintained at or above the minimum thereafter.

For additional details and requirements refer to the department's Graduate Degree Programs and the Graduate College Handbook.

Admission

The admission requirements of the Graduate College apply. In addition, at least one year each of study in college-level calculus, chemistry, and physics is required for admission to graduate work in geology. At least three letters of recommendation, preferably from academic recommenders. For more information, write to Dr. Cory Pettijohn, Online Programs Faculty Coordinator. Application deadlines: Fall semester - June 15; Spring semester - November 15; Summer term - March 15.

Financial Aid

This online program is self-supporting and DOES NOT accept the following tuition and fee waivers (TFWs): Non-Academic waivers (including Illinois employees and employees of other state institutions), Academic waivers from Illinois, UIC and UIS employees, Related Agency waivers, waivers granted through fellowships/assistantships as governed by the Graduate College at Illinois, or Retiree waivers. Students in these programs are not eligible to hold a waiver generating graduate appointment (Assistantship or Fellowship). Full time employees may be admitted to these programs, but their employee waiver is not eligible for use towards this program. This program accepts statutory waivers (veteran grants, etc.)

for the degree of Master of Science in Environmental Geology (online)

The fully-online Environmental Geology M.S. degree program requires 32 credit hours (thesis not required), 12 of which must be at the 500-level (8 in GEOL). Students must work with their program advisor to individualize their program and the required capstone research project. Students must complete a minimum of 24 hours of coursework, 12 of which must be from within the unit. All students must maintain a minimum grade point average (GPA) of 3.0 (A = 4.0). If the GPA falls below this minimum after 12 graduate hours of graded coursework, it must be raised to 3.0 or above after the completion of 12 additional graduate hours of graded coursework and must be maintained at or above the minimum thereafter. See approved elective course list (https://geology.illinois.edu/environmental-geology-online-ms-approved-courses/).

For additional details and requirements refer to the department's Graduate Degree Programs (https://esec.illinois.edu/academics/graduate-program/?_gl=1*bkbr8f*_ga*Mjk0NjM4MTYuMTcwMjY2ODU3MQ..*_ga_E1LFESM7DF*MTcwNTUwNzk2MC4yMS4xLjE3MDU1MDgxMTEuNTAuMC4w)and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

Code	Title	Hours
Complete 2 of the following core courses focusing on geodata science and analysis:		**7-8**
GGIS/GEOL 407	Foundations of CyberGIS & Geospatial Data Science	4
ATMS 421	Earth Systems Modeling (crosslist with GEOL 481)	
ATMS 404	Risk Analysis in Earth Science (crosslist with GEOL 485)	
ESE 486	Environmental Consulting (crosslist with GEOL 486)	
GEOL 507	GIS for Geology	
ATMS 517	Data Science for the Geosciences	
Complete 3 of the following courses focusing on advanced topics:		**10-12**
GEOL 450	Investigating the Earth's Interior	
GEOL 451	Environmental Geophysics	
GEOL 470	Introduction to Hydrogeology	
ESE 482	Challenges of Sustainability (crosslist with GEOL 483)	
GEOL 565	Water Chemistry & Bioremediation	
GEOL 572	Hydrogeology with Python	

Additional 400-500 level courses as needed to meet or exceed the minimum credit hour requirement of the program. Selected in consultation with the program advisor; chosen from courses in the Core and Advanced Topics lists (if not taken to meet those requirements) or from a list of electives maintained by the department.		**4-11**
GEOL 598	**Capstone Research Project**	**4 or 8**
Total Hours		**32**

Other Requirements

Code	Title	Hours
Proposed Requirement		
Other requirements may overlap.		
Successful completion of the program requires a written capstone report.		
At least 12 of the 32 required hours must be in GEOL (8 at the 500-level).		
At least 12 of the 32 required hours must be in 500-level courses.		
Course substitutions are permitted with the consent of the departmental advisor.		
A maximum of 2 elective courses may be taken CR/NC.		
All students must maintain a minimum grade point average (GPA) of 3.0 (A = 4.0). If the GPA falls below this minimum after 12 or more graduate hours of graded coursework, it must be raised to 3.0 or above after the completion of 12 additional graduate hours of graded coursework and must be maintained at or above the minimum thereafter.

Epidemiology, MPH

for the Master of Public Health in Epidemiology

The MPH in Epidemiology provides education and training in the course areas of public health with a focus on developing strong analytical skills to research the distribution and determinants of disease and other health-related events. The MPH in Epidemiology includes required Applied Practice Experience and Integrative Learning Experience components. Students typically complete the degree in 1.5-2 years of full-time study.

Illinois undergraduate students who major in Kinesiology, Community Health, or Interdisciplinary Health Sciences are eligible to apply for a 5.5 year joint BS-MPH degree program prior to their final year of undergraduate study. Students accepted to the BS-MPH program begin some MPH coursework in their final year of undergraduate study.

Admission

- Admissions & Requirements for MPH (https://hk.illinois.edu/admissions/graduate-admissions/)
- Admissions & Requirements for BS-MPH (https://hk.illinois.edu/academics/undergrad-programs/5-year-bs-mph-program/)

Financial Aid

Please contact the Office of Student Financial Aid directly at (217) 333-0100 or finaid@illinois.edu for any questions you may have related to financial aid.

Faculty Interests/Research

For information about specific faculty research interests, current grants, and publications, please visit our Faculty page (https://hk.illinois.edu/directory/).

for the Master of Public Health in Epidemiology

The MPH in Epidemiology degree program requires a minimum of 48 hours. The program includes:

1. Five required core courses in basic content areas of public health
2. Four required courses in the Epidemiology program as well as one additional course from an approved list
3. An Applied Practice Experience (practicum)
4. An Integrative Learning Experience (capstone)
5. Seminars and electives

The Integrative Learning Experience must be completed in the last term of study. There is no thesis requirement. The program generally takes 1.5 to 2 years to complete.

For additional details and requirements refer to the department's Graduate Handbook (http://kch.illinois.edu/kch-grad-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the Master of Public Health in Epidemiology

The MPH, Epidemiology is nationally accredited by CEPH, the Council for Education on Public Health. Extensive reporting, assessment, evaluation, and tracking occurs as part of being a nationally accredited program. Very detailed curriculum competency alignment, tracking, and reporting happen each year to ensure the program is meeting the 30+individual competencies CEPH requires. The MPH Program uses the following learning outcomes as a summary of the CEPH Competencies:

1. **Content Knowledge:** Students will demonstrate an advanced understanding of current and historically significant concepts, frameworks, methods, analytical tools and ideas related to public health and epidemiology.
2. **Critical Thinking and Discovery:** Students will demonstrate ethical practices while applying advanced quantitative and qualitative methods in collecting, analyzing, and interpreting data which could then be disseminated through publications and presentations.
3. **Awareness and Understanding:** Students will understand and appreciate the diverse environmental, biological, psychological, socioeconomic, sociocultural, philosophical, and historical factors that influence public health and epidemiology.
4. **Programming and Assessment:** Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to public health and epidemiology.
5. **Leadership and Engagement:** Students will demonstrate leadership and effective communication skills, while promoting effective public health practices as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

European Union Studies, MA

for the degree of Master of Arts in European Union Studies

The European Union Center administers an interdisciplinary program of language and area courses leading to a Master of Arts degree or a graduate minor open to students in other graduate programs across the university. The program is intended to serve three constituencies of students: those seeking to supplement their studies in another discipline with expertise in EU Studies; those proceeding to disciplinary-based doctoral work; and those seeking a stand-alone, applied degree with particular emphasis on European institutions and governance, combined with language and cultural studies.

Admission
Applicants for admission to the Master of Arts program should have completed at least two years of a language of the European Union and hold a bachelor's degree from an accredited institution of higher education. The Graduate Record Examination (GRE), or another post-secondary examination such as the LSAT, GMAT, MCAT, is recommended but not required, and international students are required to take the Test of English as a Foreign Language (TOEFL), with minimum scores set by the Graduate College. All admission requirements of the Graduate College also apply.

Applicants must submit the Graduate College application for admission, certified transcripts of all undergraduate and graduate work, a writing sample, and three letters of reference. Applicants must also submit to the European Union Center a statement of purpose showing how the MA degree in European Union Studies fits into their educational and career plans. This statement must show that the interdisciplinary nature of the MA in EU Studies will serve the student better than a disciplinary degree. Graduate Record Examination (GRE) scores (verbal, quantitative, and written) or other post-secondary examination scores are considered but not required. Admission is ordinarily limited to the fall semester, but exceptions are made for spring and summer admission.

for the degree of Master of Arts in European Union Studies

Students pursuing the thesis option are required to conduct an oral thesis defense before an MA thesis committee. The thesis committee must consist of at least two individuals, with a minimum of one individual drawn from the EU Center Executive Staff. The thesis advisor must be a member of the Graduate Faculty.

For additional details and requirements refer to the department's g (http://euc.illinois.edu/academic/degree.html)raduate degree requirements (https://europe.illinois.edu/graduate/master-arts-european-union-studies/degree-requirements/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
EURO 501 & EURO 502	EU Institutions and Governance and The EU in a Global Context	8
Language Requirement: A candidate must demonstrate proficiency in a language relevant to the study of Europe and the European Union other than English, at the advanced (third-year) level. Up to seven hours of advanced language (third or fourth-year) course work may be used toward the MA total hours. (Max 7)		7
EURO 599	Thesis Research (min/max applied toward degree)	0-8
Total Hours		**36**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required overall:	12
Coursework must come from at least three different academic units	
Up to twelve hours may be credited for MA-equivalent study abroad courses or eight hours for internship placement	
Up to twelve hours may be credited from graduate level courses taken as an undergraduate enrolled in participating partner departments at the University of Illinois Urbana Champaign as part of the European Union Center's 5-year BA/MA program	
Minimum GPA:	2.75

Non-Thesis Option

Code	Title	Hours
EURO 501 & EURO 502	EU Institutions and Governance and The EU in a Global Context	8
Language Requirement: A candidate must demonstrate proficiency in a language relevant to the study of Europe and the European Union other than English, at the advanced (third-year) level. Requirement	Description
Other Requirements may overlap	
Minimum 500-level Hours Required overall:	12
At least two substantial research papers (seminar length of 25-30 pages each) on European Union topics as part of course work, when relevant to the candidate's professional orientation, are required.	
Coursework must come from at least three different academic units	
Up to twelve hours may be credited for MA-equivalent study abroad courses or eight hours for internship placement	
Up to twelve hours may be credited from graduate level courses taken as an undergraduate enrolled in participating partner departments at the University of Illinois Urbana Champaign as part of the European Union Center's 5-year BA/MA program	
Minimum GPA:	2.75

for the degree of Master of Arts in European Union Studies

---

1. Knowledge of the primary institutions, history, and contemporary challenges of the European Union, as well as the predominant theories that scholars have developed and employed in research on topics found in EU Studies.
2. Understanding of the European Union's historical and contemporary relationships with other countries and regions of the world.
3. Application of thorough knowledge of appropriate research methods and the craft of argument toward the evaluation of the work of others and completion of a thesis (if applicable).
4. Practice of a working command of at least one non-English language relevant to European studies.
5. Ability to assess current events in regards to appropriate historical and theoretical frameworks.

Evolution, Ecology, and Behavior, MS

for the degree of Master of Science in Evolution, Ecology, and Behavior

The Department of Evolution, Ecology, and Behavior administers several graduate degree programs. Areas of training include the broadly defined disciplines of Animal Behavior, Biomechanics, Comparative Anatomy, Conservation Biology, Ecology, Evolution, Genetics/Genomics, and Physiology.

Admission

Acceptance for graduate study in the Department of Evolution, Ecology, and Behavior is based on the applicant's research potential and academic achievement. An undergraduate degree in the life sciences is the usual preparation, but students majoring in mathematics, computer science, or the physical and social sciences are also considered. Students should have taken courses in at least two of the following six areas: evolution, ecology, genetics, behavior, conservation, physiology/morphology. Students lacking one or more of these courses may be admitted with the provision that such deficiencies be completed in addition to the normal graduate course load. A grade point average of at least 3.0 (A = 4.0) for the last two years of undergraduate work in a four-year undergraduate degree program or the last three years of a five-year undergraduate program and for any graduate study is required or the candidate will have to petition for an exception. Considerable emphasis is placed on a student's interest and ability in research as demonstrated by previous work and letters of recommendation. Applications are typically only considered for fall admission unless special arrangements are made with the Department. A minimum paper-based Test of English as a Foreign Language (TOEFL) score of 613 (257 on the computer-based version, 103-104 on the internet-based version) is preferred for international applicants.

Financial Aid

Financial aid is available in the form of fellowships and teaching and research assistantships for qualified students.

For additional details and requirements refer to the Department and the Graduate College Handbook.

for the degree of Master of Science in Evolution, Ecology, and Behavior

1. Design and implement independent research which integrates and applies core knowledge of evolution, ecology and/or behavior. MS students take course work that is relevant to their studies and design/execute experiments in those areas.
2. Learn the rigorous statistical/analytical methods that typify their area of study. MS students are required to take a course in statistics and/or computational methods and apply those skills to their scientific studies.
3. Write and publish research. MS students present their work in the form of written manuscripts that can be submitted to scientific journals. A typical MS thesis involves 1-2 publishable studies.

4. Develop professional skills typical for researchers. Successful MS students learn how to use reference software and databases. They also learn about standards for the ethical practice of science. They often gain teaching and mentoring skills.
5. Apply for grants to support their independent research. MS students often apply for small grants from both internal and external sources.
6. Present research verbally at internal venues and at scientific conferences. MS students are required to present their work in a presentation (i.e., a talk) to the department.

Evolution, Ecology, and Behavior, PhD

for the degree of Doctor of Philosophy in Evolution, Ecology, and Behavior

The Department of Evolution, Ecology, and Behavior administers several graduate degree programs. Areas of training include the broadly defined disciplines of Animal Behavior, Biomechanics, Comparative Anatomy, Conservation Biology, Ecology, Evolution, Genetics/Genomics and Physiology. Students are expected to develop expertise in three of these six areas.

Admission

Acceptance for graduate study in the Department of Evolution, Ecology, and Behavior is based on the applicant's research potential and academic achievement. An undergraduate degree in the life sciences is the usual preparation, but students majoring in mathematics, computer science, or the physical and social sciences are also considered. Students should have taken courses in at least two of the following six areas: evolution, ecology, genetics, behavior, conservation, physiology/morphology. Students lacking one or more of these courses may be admitted with the provision that such deficiencies be completed in addition to the normal graduate course load. A grade point average of at least 3.0 (A = 4.0) for the last two years of undergraduate work in a four-year undergraduate degree program or the last three years of a five-year undergraduate program and for any graduate study is required or the candidate will have to petition for an exception. Considerable emphasis is placed on a student's interest and ability in research as demonstrated by previous work and letters of recommendation. Applications are typically only considered for fall admission unless special arrangements are made with the Department. The deadline for application materials is December 15. A minimum paper-based Test of English as a Foreign Language (TOEFL) score of 613 (257 on the computer-based version, 103-104 on the internet-based version) is preferred for international applicants.

Financial Aid

Financial aid is available in the form of fellowships and teaching and research assistantships for qualified students.

Master's degrees are not required for admission, but Master's level requirements must be met (additional 32 hours). No qualifying exam is required. Successful completion of a preliminary exam is required for candidacy. In addition, a written research proposal, a verbal scientific presentation to the department (in year 3-4), a written dissertation, an exit seminar presenting the dissertation research, and a final dissertation exam are required. Dissertation deposit is also required. Minimum hours for graduation is 64.

Experience in Teaching is required as part of the academic work of all PH.D. candidates in this program. The minimum GPA is 3.0. For additional details and requirements refer to the department and the Graduate College Handbook.

for the degree of Doctor of Philosophy in Evolution, Ecology, and Behavior

1. Design and implement independent research which integrates and applies core knowledge of evolution, ecology and/or behavior. PhD students take course work that is relevant to their studies and design/execute multiple experiments in those areas.
2. Learn the rigorous statistical/analytical methods that typify their area of study. PhD students are required to take a course in statistics and/or computational methods and apply those skills to multiple scientific studies.
3. Write and publish research. PhD students are required to submit at least one manuscript to a journal for peer review before defending. A typical PhD thesis involves at least three publishable studies.

4. Develop professional skills typical for researchers. PhD students gain skills in the areas of data management, citation management, mentoring, ethical conduct of research, and Networking.
5. Teach others (usually undergraduates) in the fields of evolution, ecology, and behavior. PhD students lead discussions/lab activities, present information/lecture, provide meaningful feedback to students, show concern for all students.
6. Apply for grants to support their independent research. PhD students apply for (and often receive) grants from both internal and external sources.
7. Present research verbally at internal venues and at scientific conferences. PhD students are required to give two verbal presentations to the department; one presentation is their public exit seminar; another is a presentation of work given at the EEB Colloquium or similar venue.

Finance, MS

for the Master of Science in Finance

Terminal masters: The Master of Science in Finance (terminal master's) is a 15 month program designed primarily for practitioners in finance-related positions. The program is designed to be completed in 15 months, beginning in August.

Admission requirements and other details about the program can be found on our website (https://giesbusiness.illinois.edu/msf/).

Admission

The minimum required grade point average for admission is 3.0 (A = 4.0). To be admitted without deficiencies, the applicant should have completed one undergraduate course each in computer science, financial accounting, managerial accounting, and principles of economics as well as two courses each in calculus, probability and statistics, and financial management. Courses to remove deficiencies may be taken after beginning the program, but such courses will not count toward the departmental requirements for graduation. All applicants are required to submit Graduate Management Admission Test (GMAT) or GRE scores. Most international applicants are also required to submit Test of English as a Foreign Language (TOEFL) IELTS or iBT scores. The test scores will be used by the Admissions Committee, along with other information, in evaluating the applicant's qualifications for graduate study.

For Students in the MSF Program

Students enrolled in the Master of Science in Finance as their primary degree program must fulfill the following requirements.

Code	Title	Hours
Core courses		
FIN 501	Financial Economics	4
FIN 511	Investments	4
Professional Development		**2**
FIN 581	Professional Development (Must take for 2 hours)	
or FIN 585	MSF Academy I	
Graduate Level Finance (FIN) Electives		**18**
Other Graduate Coursework		**12**
May include additional courses in finance (FIN).		
Minimum Hours for Degree		**40**

For Students in the Finance Ph.D. Program

Students enrolled in the Finance Ph.D. program as their primary degree program can earn a Master of Science in Finance with the approval of the Director of Graduate Studies by completing 32 graduate hours of Finance (FIN) courses. For additional details and requirements consult an advisor and/or refer to the Graduate College Handbook (https://www.grad.illinois.edu/academics/handbook-policies/).

Code	Title	Hours
Total Finance (FIN) Hours		**32**

Other Requirements

Requirement	Description
Other Requirements may overlap	
Minimum 500-level Hours Required Overall	12
Minimum GPA:	3.0

for the Master of Science in Finance

Upon graduation, students will be able to:

1. Demonstrate an in-depth understanding of the various functional areas of financial management in a global setting.
2. Apply core knowledge to new and unfamiliar circumstances and unpredictable environments.
3. Perform quantitative analysis and use mathematical and statistical analysis in finance problems.
4. Work effectively on team projects with people from a variety of professional and cultural backgrounds.
5. Demonstrate effective oral and written communication skills.

Finance: Quantitative Finance, MS

for the Master of Science in Finance, Quantitative Finance concentration

The Quantitative Finance Concentration is open to students enrolled in: Finance, MS.

The Quantitative Finance Concentration is designed to develop graduates who understand:
The fundamental characteristics of exchange traded and over-the-counter financial derivatives; understand the mathematical theorems and numerical algorithms required to value these financial securities; and, be able to assess the riskiness of these positions and be able to design trading strategies that include financial derivatives.

This concentration will not only provide a strong technical knowledge of data analytics topics, but also provide students multiple opportunities to apply this knowledge via valuation and analysis of real world products.

Admission

Candidates will apply to the Department of Finance for admission into the concentration. Students wishing to be admitted to the concentration should consult with their program advisor before applying.

for the Master of Science in Finance, Quantitative Finance concentration

Code	Title	Hours
Required		
FIN 512	Financial Derivatives	4
FIN 513	Advanced Financial Derivatives	4
Choose up to four credit hours from the following:		
FIN 514	Valuation of Complex Derivative Securities	2
FIN 515	Fixed Income Portfolios	2 or 4
FIN 516	Term Structure Models	2
FIN 517	Advanced Term Structure Models	2
FIN 537	Financial Risk Management	4
FIN 554	Algorithmic Trading Systems Design and Testing	4
FIN 556	Algorithmic Market Microstructure	4
Total Hours		**12**

for the Master of Science in Finance, Quantitative Finance concentration

As the concentration will be part of the Masters in Finance, the learning objectives are closely linked to the overall learning objectives for the program.

These relevant objectives for this concentration would be:

1. Students should be able to apply core knowledge to new and unfamiliar circumstances and unpredictable environments.
2. Ability to perform quantitative analysis and use mathematical and statistical analysis in finance problems.
3. Students should be able to work effectively on team projects with people from a variety of professional and cultural backgrounds.
4. Students will demonstrate effective oral and written communication skills.

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Finance, PhD

for the Doctor of Philosophy in Finance

The first stage toward the degree of Doctor of Philosophy ends when the candidate completes certain minimum coursework, fulfillment of other departmental requirements, and successful passing of a qualifying examination. The second stage requires successful completion and presentation of an initial research paper. The third stage includes research and preparation of the dissertation. Completion of this stage requires an oral preliminary thesis proposal defense and an oral final dissertation defense.

The minimum number of graduate hours required for all stages combined is 64. A student plans courses and research with his or her advisor. Consideration is given to previous academic training, career objective and the general requirements of the Graduate College and the Department. The student should become familiar with these requirements and satisfy them as soon as possible.

The Doctor of Philosophy is primarily a research degree, and the candidate must demonstrate the capacity for independent research by producing an original thesis on a topic within his or her major field of study. The subject of the thesis must be reported to the doctoral committee and to the Graduate College at the time of the preliminary examination (proposal defense). The candidate is admitted to the final oral examination by the dean of the Graduate College upon completion of the dissertation and the recommendation of the department.

The doctoral program generally begins in the fall semester. The application period typically runs October 1 through February 15.

Additional details on the program may be found on the PhD in Finance Admissions page (https://giesbusiness.illinois.edu/graduate-hub/doctoral/finance/phd-in-finance---admissions/).

Admission

The minimum required grade point average for admission is 3.0 (A = 4.0). All applicants are required to submit Graduate Management Admission Test (GMAT) or GRE scores. Most international applicants are also required to submit Test of English as a Foreign Language (TOEFL) IELTS or iBT scores. The test scores will be used by the Admissions Committee, along with other information, in evaluating the applicant's qualifications for graduate study.

for the Doctor of Philosophy in Finance

For additional details and requirements refer to the department's graduate programs (https://giesbusiness.illinois.edu/graduate-hub/doctoral/finance/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Economic Foundations		**0 to 12**
Students without appropriate graduate-level work in economics should take the following courses.		
ECON 532	Econometric Analysis I	
ECON 535	Econometric Analysis II	
FIN 597	Microeconomic Analysis	
Core Finance Courses		
FIN 591	Theory of Finance	4
FIN 592	Empirical Analysis in Finance	4
FIN 593	Seminar in Investments	4
FIN 594	Seminar in Corporate Finance	4
FIN 595	Empirical Corporate Finance	4
FIN 599	Thesis Research (min/max applied to the degree)	32 to 48
Additional graduate-level coursework in finance and related fields		16 to 44
Total Hours		96

Other Requirement

Requirement	Description
Other requirements may overlap	
Students who do not already hold a Master's degree or its equivalent prior to enrollment must also take additional finance courses to complete the requirements of the MS Finance degree	

Teaching experience	
Second-year paper	
Masters Degree Required for Admission to PhD?	No, earned during Ph.D.
Qualifying Exam Required	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

for the Doctor of Philosophy in Finance

Learning Outcomes

Learning Outcome #1: Foundational Knowledge in Financial Economics

Students should possess advanced knowledge of microeconomic theory, probability, statistics, and econometrics as they apply to financial research. This includes mastery of theoretical frameworks, empirical methodologies, and analytical tools essential for rigorous inquiry in finance.

Learning Outcome #2: Specialized Expertise in Finance Subfields

Students should demonstrate deep understanding of investments and corporate finance, including both theoretical foundations and empirical applications. This encompasses critical analysis of relevant literature, evaluation of methodologies, and synthesis of research findings in these domains.

Learning Outcome #3: Research Design and Scholarly Communication

Students should be capable of producing original, high-quality research that contributes to the finance discipline. This includes formulating research questions, selecting appropriate methodologies, analyzing data, and effectively presenting findings through written work and professional presentations.

Learning Outcome #4: Teaching Competence in Finance

Students should develop the knowledge and skills necessary to teach finance effectively at the undergraduate level. This involves designing course materials, delivering engaging instruction, creating meaningful assessments, and fostering student learning in both theoretical and applied finance topics.

Financial Engineering, MS

for the degree of Master of Science in Financial Engineering

Financial Engineering (FE) is the application of quantitative methods to the analysis of financial markets and financial products. The quantitative techniques may include Mathematics, Statistics, Computer Science, Machine Learning, Neural Nets, and generalized Data Analytics. The applications include searching for opportunities as well as deriving solutions to financial problems. All financial markets are a subject for FE, from public exchanges to private over-the-counter markets. Similarly, all financial products, from equities, bonds and derivatives to bitcoins are candidates for quantification. An overarching theme for FE involves balancing reward against techniques for the measurement, management, and mitigation of risk.

Admission

Applicants to the MSFE Program will have a Bachelor's degree with one year of calculus, one semester of linear algebra, one semester of programming (preferably in C/C++), and one semester of probability and statistics. Knowledge of basic finance and economics is helpful but not necessary. Given its technical emphasis, applicants to this program typically will have completed a Bachelor's degree in an engineering field, mathematics, physics, computer science, or economics that provides sufficient preparation to facilitate a fast-paced, in-depth learning environment.

All applicants are expected to have a minimum grade point average of at least 3.25 (A=4.00) for the last two years of undergraduate study and a 3.50 for any previous graduate work completed. Scores on the Graduate Record Examination (GRE) (http://www.ets.org/) general test are not required of applicants, but can be submitted. GMAT (https://www.gmac.com/gmat-other-assessments/about-the-gmat-exam/the-gmat-advantage/) scores will also be considered.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOEFL/IELTS requirement.

for the degree of Master of Science in Financial Engineering

Covering topics in finance, economics, numerical methods, stochastic calculus, and computer programming, the MSFE is a rigorous, three-semester, 48-credit, resident degree program with a summer internship opportunity. Twelve courses each of 4 graduate credits are required for graduation; they are expected to be taken in sequence in the respective semesters.

For additional details and requirements refer to the program's website (http://msfe.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Core Coursework		**28**
FIN 500	Introduction to Finance	4
FIN 512	Financial Derivatives	4

Financial Engineering: Automated Trading Practices, MS

for the degree of Master of Science in Financial Engineering, Automated Trading Practices concentration

Financial Engineering (FE) is the application of quantitative methods to the analysis of financial markets and financial products. The quantitative techniques may include Mathematics, Statistics, Computer Science, Machine Learning, Neural Nets, and generalized Data Analytics. The applications include searching for opportunities as well as deriving solutions to financial problems. All financial markets are a subject for FE, from public exchanges to private over-the-counter markets. Similarly, all financial products, from equities, bonds and derivatives to bitcoins are candidates for quantification. An overarching theme for FE involves balancing reward against techniques for the measurement, management, and mitigation of risk.

Graduate Degree Programs in Financial Engineering
The Master of Science in Financial Engineering (MSFE) degree program is jointly sponsored by the Department of Industrial and Enterprise Systems Engineering (ISE) (https://ise.illinois.edu) in The Grainger College of Engineering and the Department of Finance (https://giesbusiness.illinois.edu/finance/) in the Gies College of Business. Graduates from this program receive the MSFE degree awarded by the Graduate College. The MSFE program complements other graduate programs offered by the sponsoring departments. The Master of Science in Financial Engineering (terminal master's) can be completed in 18 months with an option to extend to 24 months, beginning in August each year. The second and subsequent semesters allow students the flexibility to pursue specialized tracks within the program, such as data analytics and electronic trading. A corporate-sponsored "practicum", provides students opportunities to address real world financial modeling problems and provides access to state-of-the-art analytic tools and software products.

Concentrations

- Advanced Analytics in Industrial & Enterprise Systems Engineering (p. 1995)
- Automated Trading Practices (p. 1451)
- Data Analytics in Finance (p. 2007)

Admission

Food Science and Human Nutrition, MS

for the Master of Science in Food Science and Human Nutrition (on campus & online)

On Campus:

Thesis track MS students are required to have a research advisor and applicants are encouraged to contact department faculty (https://fshn.illinois.edu/directory/faculty/graduate-advising-faculty/) in their areas of interest to inquire about possible research and funding opportunities.

Master of Science in Food Science and Human Nutrition, students are required to select a concentration:

- Clinical & Community Nutrition (p. 1456)
- Food Science (p. 1460)
- Human Nutrition (p. 1464)

Online:

The focus of the online Master of Science in Food Science and Human Nutrition (https://fshn.illinois.edu/online/) is Food Science.

Students are not required to select a concentration, an optional concentration is Clinical and Community Nutrition (https://fshn.illinois.edu/academics/graduate-degrees/clinical-community-nutrition-ms/).

Research Areas

In addition to receiving training in the general field of food science or human nutrition, students have the opportunity to conduct research in the following areas of specialization:

- Food processing, engineering, and biotechnology
- Food ingredients, properties, and interactions
- Food microstructures, micro-carriers, and nanotechnology
- Food chemistry
- Food microbiology and biomass conversion
- Food safety and security
- Sensory sciences
- Dietary quality and food and nutrition patterns for optimal health
- Nutrition and disease interactions, including cancer, metabolic disorders, and gastrointestinal health
- Nutrition across the life span
- Biochemical and molecular nutrition
- Clinical nutrition
- Community nutrition

For more information about our Graduate Degree Programs, please visit our website (https://fshn.illinois.edu/academics/graduate-degrees/).

Admission

In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose.

You can review all Food Science and Human Nutrition Admission requirements (https://fshn.illinois.edu/future-students/admissions/graduate-admissions/) online.

International Applicants

Please visit the Illinois Graduate College resources for further admission requirements.

- Admission requirements by country (https://grad.illinois.edu/admissions/countries/)
- Applicants whose native language is not English (https://grad.illinois.edu/admissions/instructions/04c/)

The Clinical Community and Nutrition, Food Science, and Human Nutrition MS are STEM-designated program.

Internship in Dietetics

The Department of Food Science and Human Nutrition offers a dietetic internship for master's and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program, please contact Dr. Jessica Madson (jamadson@illinois.edu).

Online Program

A non-thesis Master of Science in Food Science program is offered via live, synchronous online sessions using distance education technology. The program ensures the same degree of excellence, and courses are instructed by the same faculty, as the on-campus non-thesis program. Courses are typically offered in the evening. For requirements and contact information, please visit the Department of Food Science and Human Nutrition (https://fshn.illinois.edu/academics/graduate-degrees/food-science-ms-online-non-thesis/).

Graduate Teaching Experience

Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid

Financial aid for thesis track graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application.

Non thesis students are not eligible for fellowships, teaching, or research assistantships.

for the Master of Science in Food Science and Human Nutrition (on campus & online)

A FSHN graduate student:

1. Demonstrates knowledge in at least three areas of expertise (based upon required coursework; see FSHN graduate handbook for areas).
2. Displays effective and relevant written and oral communication skills.
3. Conducts methodical and logical research that addresses key issues in food science and/or human nutrition.
4. Displays professional ethics in scholarly achievements.

Courses are chosen in consultation with an advisor and the Advisory Committee to meet the minimum 32 hour credit requirement (subject to Other Requirements and Conditions)

for the Master of Science in Food Science and Human Nutrition, Clinical and Community Nutrition Concentration

---

A FSHN graduate student:

1. Demonstrates knowledge in at least three areas of expertise (based upon required coursework; see FSHN graduate handbook for areas).
2. Displays effective and relevant written and oral communication skills.
3. Conducts methodical and logical research that addresses key issues in food science and/or human nutrition.
4. Displays professional ethics in scholarly achievements.

Food Science & Human Nutrition: Food Science, MS

for the Master of Science in Food Science and Human Nutrition, Food Science Concentration (on campus and online)

The Food Science concentration can be completed as an on-campus program or an online program.

- **On-Campus MS Food Science Program information (https://fshn.illinois.edu/academics/graduate-degrees/food-science-ms-phd/)**
- **Online MS Food Science Program information (https://fshn.illinois.edu/academics/graduate-degrees/food-science-ms-online-non-thesis/)**

Research Areas

In addition to receiving training in the general field of food science or human nutrition, you have the opportunity to study a wide-variety of research areas related to food science, including these general focal areas of strength:

- food chemistry
- sensory science
- food microbiology

- chemical/microbial food safety
- food processing and engineering

Click here for more information about our Graduate Degree Programs (https://fshn.illinois.edu/academics/graduate-degrees/)

Admission

In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose.

Click here to Review all Food Science and Human Nutrition Admission requirements (https://fshn.illinois.edu/future-students/admissions/graduate-admissions/)

International Applicants

Please visit the Illinois Graduate College resources for further admission requirements.

- Admission requirements by country (https://grad.illinois.edu/admissions/countries/)
- Applicants whose native language is not English (https://grad.illinois.edu/admissions/instructions/04c/)

The Clinical Community and Nutrition, Food Science, and Human Nutrition MS are STEM-designated program.

Online Program

A non-thesis Master of Science in Food Science program is offered via live, synchronous online sessions using distance education technology. The program ensures the same degree of excellence, and courses are instructed by the same faculty, as the on-campus non-thesis program. Courses are typically offered in the evening. For requirements and contact information, visit the Department of Food Science and Human Nutrition (https://fshn.illinois.edu/academics/graduate-degrees/food-science-ms-online-non-thesis/).

Graduate Teaching Experience

Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid

Financial aid for thesis track graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application. Additional information on financial aid (https://fshn.illinois.edu/future-students/financial-support/graduate-financial-support/) for graduate students.

for the Master of Science in Food Science and Human Nutrition, Food Science Concentration (on campus and online)

Undergraduate training must include statistics (ACE 261, CPSC 241, ECON 202, MATH 161, PSYC 235, SOC 280, or STAT 100), nutrition (equivalent to FSHN 220), and systemic physiology (equivalent to MCB 246). These undergraduate courses are not required for admission, but must be completed early in the graduate program and do not count toward concentration requirements.

Additional courses may be required beyond the concentration minimum, per Advisory Committee recommendations, depending upon student/advisor learning objectives. If you have already taken a required course at the University of Illinois Urbana-Champaign, it is highly recommended that you do not retake it. If you have taken a very similar course at another university, you are strongly encouraged to petition for acceptance of that course in lieu of the required course. Courses should be selected to expand and strengthen your knowledge in core and related disciplines, and/or to increase your research capabilities. For additional advice on this topic, contact your advisor and faculty advisory committee.

Course selection is flexible beyond this list if decided in consultation with advisor/advisory committee.

For additional details and requirements refer to the department's graduate handbook (https://fshn.illinois.edu/academics/graduate-degrees/graduate-student-resources/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed with or without a thesis, with a total of 32 hours required.

This degree program can be completed with or without a thesis.

Food Science & Human Nutrition: Human Nutrition, MS

for the Master of Science in Food Science and Human Nutrition, Human Nutrition Concentration (on campus and online)

Research Areas

FSHN faculty address a wide-variety of research areas related to human nutrition. Clinical nutrition, community nutrition, nutritional biochemistry, nutrigenomics, and nutritional toxicology are the general areas of strength for the FSHN human nutrition faculty.

Students focusing on human nutrition will learn from interactions with faculty members whose laboratories focus on research in the following areas:

- pediatric nutrition
- geriatric nutrition
- effects of bioactive compounds naturally found in foods on chronic diseases
- energy metabolism
- epigenetics
- the functions of essential fatty acids
- the influence of diet on cancer development
- ingestive behavior
- molecular mechanisms of food ingredients in disease prevention
- molecular mechanisms of obesity and insulin resistance
- nutrition and exercise
- optimization of nutritional support through enteral and parenteral nutrition

Other research topics are related to nutrition education, dietetics, disease prevention and treatment, and general health and wellness practices.

For additional information click here to visit our website (https://fshn.illinois.edu/academics/graduate-degrees/human-nutrition-ms-phd/).

Admission

In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose.

Click here to review all Food Science and Human Nutrition Admission requirements (https://fshn.illinois.edu/future-students/admissions/graduate-admissions/).

International Applicants

Please visit the Illinois Graduate College resources for further admission requirements.

- Admission requirements by country (https://grad.illinois.edu/admissions/countries/)
- Applicants whose native language is not English (https://grad.illinois.edu/admissions/instructions/04c/)

The Clinical Community and Nutrition, Food Science, and Human Nutrition MS are STEM-designated program.

Internship in Dietetics

The Department of Food Science and Human Nutrition offers a dietetic internship for master's and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program, please contact Jessica Madson (jamadson@illinois.edu)

Graduate Teaching Experience

Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid

Financial aid for thesis track graduate students is available in the form of fellowships, teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application. Click here for additional information on financial aid for graduate students (https://fshn.illinois.edu/future-students/financial-support/graduate-financial-support/).

for the Master of Science in Food Science and Human Nutrition, Human Nutrition Concentration (on campus and online)

Undergraduate training must include statistics (ACE 261, CPSC 241, ECON 202, MATH 161, PSYC 235, SOC 280, or STAT 100), nutrition (equivalent to FSHN 220), and systemic physiology (equivalent to MCB 246). These undergraduate courses are not required for admission, but must be completed early in the graduate program and do not count toward concentration requirements. M.S. degrees require at least 12 hours of 500-level course work (including thesis research), and at least 8 of these 12 hours must be in the major field for graduation.

Additional courses may be required beyond the concentration minimum, per Advisory Committee recommendations, depending upon student/advisor learning objectives. A student whose prior education includes course work with identical or similar content to those specified above will be guided by their advisor and Advisory Committee regarding the selection of additional course work needed to meet the minimum hours of the HN concentration.

Students are encouraged to take new courses, rather than retake required courses they have already taken. If you have already taken a required course at the University of Illinois Urbana-Champaign, it is highly recommended that you do not retake it. No petition is required. If you have taken a very similar course at another university, you are strongly encouraged to petition for acceptance of that course in lieu of the required course. Courses should be selected to expand and strengthen your knowledge in core and related disciplines, and/or to increase your research capabilities. Retaking a course does not meet that objective. For additional advice on this topic, contact your advisor and faculty advisory committee.

Students are required to enroll in another seminar course if they have a conflict that precludes their enrollment in FSHN 597 or NUTR 500. The seminar course may be offered by another department.

Course selection is flexible beyond this list if decided in consultation with advisor/advisory committee.

For additional details and requirements refer to the department's graduate handbook (http://fshn.illinois.edu/graduate/student-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed with or without a thesis, with a total of 32 hours required.

This degree program can be completed with or without a thesis.

Admissions

Overview of Department Admissions & Requirements (https://fshn.illinois.edu/graduate/apply/)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Food Science and Human Nutrition, MS - Professional Science Master's

for the Master of Science in Food Science and Human Nutrition, Professional Science Master's Concentration

The PSM involves rigorous scientific training in the area of food science and/or human nutrition; additionally, instruction is provided in applied business knowledge and skills. This program is designed for those who seek careers in a science-based setting with significant managerial and leadership responsibilities. For additional information go to our website (https://fshn.illinois.edu/academics/graduate-degrees/food-science-human-nutrition-professional-science-masters/).

PSM students typically complete the program in 18 months consisting of 3 full-time, on-campus semesters and a summer internship. Graduates are awarded a master's degree in Food Science and Human Nutrition with the Professional Science Master's concentration.

Admission

In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose.

Review all Food Science and Human Nutrition Admission requirements (https://fshn.illinois.edu/future-students/admissions/graduate-admissions/).

International Applicants

Please visit the Illinois Graduate College resources for further admission requirements.

- Admission requirements by country (https://grad.illinois.edu/admissions/countries/)
- Applicants whose native language is not English (https://grad.illinois.edu/admissions/instructions/04c/)
- Visa Information and Funding Requirements (https://grad.illinois.edu/admissions/application-instructions/additional-instructions-international-applicants/#visa-information)

All Food Science and Human Nutrition degrees are STEM-designated programs.

Financial Aid

Illinois PSM students may not hold assistantships or other tuition and fee waiver-generating appointments; statutory waivers and tuition scholarships are accepted.

PSM 555	PSM Internship	0
Business courses prescribed by the Illinois PSM program		10

Other Requirements

Requirement	Description
Other requirements may overlap	
The PSM concentration is required.	
Minimum Hours Required Within the Unit:	8
Minimum 500-level Hours Required Overall:	12
A non-thesis degree requires an adivser.	
Additional courses may be required beyone the concentration minimum.	
Minimum GPA:	3.0

Graduate Degree Programs in Food Science & Human Nutrition

Graduate Majors:

- Food Science & Human Nutrition, MS (p. 1453)
  - Concentrations:
    - Clinical & Community Nutrition (p. 1456)
    - Food Science (p. 1460)
    - Human Nutrition (p. 1464)
    - Food Science & Human Nutrition, MS - Professional Science Master's (p. 1469)
- Food Science & Human Nutrition, PhD (p. 1472)
  - Concentrations:
    - Food Science (p. 1475)
    - Human Nutrition (p. 1478)

Joint Degree Program:

- Food Science & Human Nutrition, PhD and Master of Public Health, MPH (p. 2195)

for the Master of Science in Food Science and Human Nutrition, Professional Science Master's Concentration

1. Advanced knowledge in general components of food science & human nutrition including food chemistry, food microbiology, food processing, synthetic biology and nutrition, with an expertise in the chosen area of specialization.
2. Ability to apply basic scientific principles to solving real-world problems.
3. Students will acquire foundational business knowledge in concepts including project management, finance and accounting.
4. Students will acquire industry/internship experiences that will provide realistic experiences of job opportunities in their selected area of food or nutrition sciences.
5. PSM students will learn professional skills, job seeking skills and the successful elements of professional teamwork to begin a successful career in the food and nutrition related industries.

Admissions

Food Science & Human Nutrition Graduate Admissions (https://fshn.illinois.edu/graduate/apply/)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Food Science & Human Nutrition, PhD

Doctor of Philosophy in Food Science and Human Nutrition

The PhD Program in the Department of Food Science and Human Nutrition is a traditional on campus doctoral program. Students are required to have a research advisor and applicants are encouraged to contact department faculty (https://fshn.illinois.edu/directory/faculty/graduate-advising-faculty/) in their areas of interest to inquire about possible research and funding opportunities.

Students are required to select a concentration:

- Food Science (p. 1475)
- Human Nutrition (p. 1478)

Research Areas

In addition to receiving training in the general field of food science or human nutrition, students have the opportunity to conduct research in the following areas of specialization:

- Food processing, engineering, and biotechnology
- Food ingredients, properties, and interactions
- Food microstructures, micro-carriers, and nanotechnology
- Food chemistry
- Food microbiology and biomass conversion
- Food safety and security
- Sensory sciences
- Dietary quality and food and nutrition patterns for optimal health
- Nutrition and disease interactions, including cancer, metabolic disorders, and gastrointestinal health
- Nutrition across the life span
- Biochemical and molecular nutrition
- Clinical nutrition
- Community nutrition

More information about our Graduate Degree Programs (https://fshn.illinois.edu/academics/graduate-degrees/)

Admission

In addition to meeting the Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose.

Review all Food Science and Human Nutrition Admission requirements (https://fshn.illinois.edu/future-students/admissions/graduate-admissions/).

International Applicants

Please visit the Illinois Graduate College resources for further admission requirements.

Admission requirements by country (https://grad.illinois.edu/admissions/countries/)

Applicants whose native language is not English (https://grad.illinois.edu/admissions/instructions/04c/)

Internship in Dietetics

The Department of Food Science and Human Nutrition offers a dietetic internship for master's and doctoral students specializing in human nutrition. Completion of the degree and the internship qualifies the student to take the Academy of Nutrition and Dietetics registration examination administered by the Commission on Dietetic Registration. For information on our dietetic internship program, please contact Ms. Jessica Madson (jamadson@illinois.edu).

Graduate Teaching Experience

Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid

Financial aid for graduate students is available in the form of fellowships (Fall admission only), teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application.

Doctor of Philosophy in Food Science and Human Nutrition

For the Doctor of Philosophy in Food Science and Human Nutrition, students are required to select a concentration:

- Food Science Degree Requirements (p. 1476)
- Human Nutrition Degree Requirements (p. 1479)

Doctor of Philosophy in Food Science and Human Nutrition

A FSHN graduate student:

1. Demonstrates knowledge in at least three areas of expertise (based upon required coursework; see FSHN graduate handbook for areas).
2. Displays effective and relevant written and oral communication skills.
3. Conducts methodical and logical research that addresses key issues in food science and/or human nutrition.
4. Displays professional ethics in scholarly achievements.

Teaching is neither a Graduate College nor a FSHN requirement. A limited number of teaching assistantships are available to FSHN graduate students. Students are selected to be Graduate Teaching Assistants by the Department Head in consultation with the course instructor.

Financial Aid

Financial aid for graduate students is available in the form of fellowships (Fall admission only), teaching and research assistantships, and tuition and partial fee waivers. Qualified candidates are considered for financial support upon application.

for the Doctor of Philosophy in Food Science and Human Nutrition, Food Science Concentration

---

Doctoral degrees require successful completion of a minimum of 96 semester hours of graduate credit. Doctoral degree students, regardless of transfer credits or a master's degree completed elsewhere, must complete at least 64 hours of residence credit out of the total of 96 hours required for the doctoral degree. Thesis hours count toward residence credit.

In consultation with the advisor and advisory committee, the remainder of the 64 graduate hours required for the degree consists of courses selected from inside or outside the department that are appropriate for training in the student's field of specialization. Upon completion of all necessary formal courses and special options, the student is required to take an oral preliminary examination. After passage of the preliminary examination, the student's activities are primarily devoted to thesis research. Upon submission of the dissertation, the candidate is required to pass a final oral examination before a graduate faculty committee.

Undergraduate training must include statistics (ACE 261, CPSC 241, ECON 202, MATH 161, PSYC 235, SOC 280, or STAT 100), nutrition (equivalent to FSHN 220), and systemic physiology (equivalent to MCB 246). These undergraduate courses are not required for admission, but must be completed early in the graduate program and do not count toward concentration requirements.

Additional courses may be required beyond the concentration minimum, per Advisory Committee recommendations, depending upon student/advisor learning objectives. A student whose prior education includes course work with identical or similar content to those specified above will be guided by their advisor and Advisory Committee regarding the selection of additional course work needed to meet the minimum hours of the concentration.

Students are encouraged to take new courses, rather than retake required courses they have already taken. If you have already taken a required course at the University of Illinois Urbana-Champaign, it is highly recommended that you do not retake it. No petition is required. If you have taken a very similar course at another university, you are strongly encouraged to petition for acceptance of that course in lieu of the required course. Courses should be selected to expand and strengthen your knowledge in core and related disciplines, and/or to increase your research capabilities. Retaking a course does not meet that objective. For additional advice on this topic, contact your advisor and faculty advisory committee.

Students are required to enroll in another seminar course if they have a conflict that precludes their enrollment in FSHN 597 or NUTR 500. The seminar course may be offered by another department.

Course selection is flexible beyond this list if decided in consultation with advisor/advisory committee.

For additional details and requirements refer to the department's graduate handbook (https://fshn.illinois.edu/academics/graduate-degrees/graduate-student-resources/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Entering with approved M.S./M.A. degree

for the Doctor of Philosophy in Food Science and Human Nutrition, Food Science Concentration

---

- **Food chemistry and sensory science:** will study flavor chemistry, manipulation of storage components, food safety and toxicology, structure-function behavior, and chemical stability of foods.
- **Food microbiology:** research genetic and physiological manipulation of bacteria, growth conditions and their effects on microbes, and fermentation.

- **Chemical/microbial food safety:** will study safety, production, and preservation and relations to human health.
- **Food processing and engineering:** research the effects of thermal processing on fats and oils, bioprocessing, state-of-the-art novel processing technologies, heat and mass transfer analysis, rheology, the use of acoustic ultrasound in processing, production systems modeling and optimization, and development of bio-based, biodegradable resins, and plastics.

Food Science & Human Nutrition: Human Nutrition, PhD

Doctor of Philosophy in Food Science and Human Nutrition: Human Nutrition Concentration

The PhD Program in the Department of Food Science and Human Nutrition is a traditional on campus doctoral program. Students are required to have a research advisor and applicants are encouraged to contact department faculty (https://fshn.illinois.edu/directory/faculty/graduate-advising-faculty/) in their areas of interest to inquire about possible research and funding opportunities.

Research Areas for Human Nutrition Concentration

FSHN faculty address a wide-variety of research areas related to human nutrition. Clinical nutrition, community nutrition, nutritional biochemistry, nutrigenomics, and nutritional toxicology are the general areas of strength for the FSHN human nutrition faculty.

Students focusing on human nutrition will learn from interactions with faculty members whose laboratories focus on research in the following areas:

- pediatric nutrition
- geriatric nutrition
- effects of bioactive compounds naturally found in foods on chronic diseases
- energy metabolism
- epigenetics
- the functions of essential fatty acids
- the influence of diet on cancer development
- ingestive behavior
- molecular mechanisms of food ingredients in disease prevention
- molecular mechanisms of obesity and insulin resistance
- nutrition and exercise
- optimization of nutritional support through enteral and parenteral nutrition

Other research topics are related to nutrition education, dietetics, disease prevention and treatment, and general health and wellness practices.

For more information about our Graduate Degree Programs, please visit our website (https://fshn.illinois.edu/academics/graduate-degrees/).

Admission

In addition to meeting the Illinois Graduate College admission requirements, a student planning to pursue a graduate degree in the department should have a baccalaureate degree in a recognized field of biological, physical, agricultural, or engineering science. Background deficiencies may be removed with graduate credit courses designed for this purpose.

Admissions

Overview of Department Admissions & Requirements (https://fshn.illinois.edu/graduate/apply/)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

French, MA

for the degree of Master of Arts in French

The Department of French and Italian offers graduate programs leading to the Master of Arts and the Doctor of Philosophy degrees in French and in Italian. Candidates for the master's degree may specialize in French Studies, French Applied Linguistics, or Italian. Candidates for the doctoral degree in French may choose one of three specializations: French Studies, French Applied Linguistics, or Second Language Acquisition and Teacher Education (SLATE).

The following minors and certificates may be pursued: Cinema Studies (p. 2137), Gender & Women's Studies (p. 2151), Translation Studies (http://www.translation.illinois.edu), Criticism and Interpretive Theory (https://criticism.english.illinois.edu).

Admission

French

Students considering admission to the master's program should usually have had a college major in French. Applicants should apply online and submit an academic statement of purpose (maximum 1000 words), a personal statement (maximum 500 words), three letters of recommendation, and two writing samples (5-10 pages each), at least one of which must be in French. Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24. Admission for the spring semester is rare. Students seeking admission to the Ph.D. program with a Master of Arts degree earned elsewhere are expected to have a minimum 3.5 grade point average in graduate coursework. The master's degree should be in an equivalent of a degree in French Studies or French Applied Linguistics. Candidates seeking admission to the Ph.D. specialization in Second Language Acquisition and Teacher Education may hold a Master of Arts in Teaching degree.

See our website (https://frit.illinois.edu/admissions/french-graduate-admissions/) for more information about how to apply. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Italian

The normal prerequisite for a graduate major is an undergraduate major in Italian or consent of the department. Students doing graduate work for any advanced degree in Italian must possess a command of the language. Applicants should apply online and submit an academic statement of purpose (maximum 1000 words), a personal statement (maximum 500 words), three letters of recommendation, and a writing sample of approximately 10-20 pages in the form of one or two papers. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24. Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, the department requires Ph.D. candidates to do some teaching as part of their academic work because such experience is considered a vital part of graduate training and professionalization. Non-native English speakers must first pass a test of their oral English ability.

Teaching Assistants in French and Italian are required to take FR 505 or ITAL 505 respectively (4 hours) as part of their contractual obligation. The course does not count toward the graduate degrees.

Faculty Research Interests

Our faculty (https://frit.illinois.edu/directory/faculty/) possess strengths in literary interpretation, critical theory, the study of civilization, cinema, theoretical and applied linguistics, and computer-assisted teaching. Members of the faculty have received national and international recognition; graduates serve on the faculties of numerous colleges and universities both in this country and abroad. See also the faculty's areas of research (https://frit.illinois.edu/research/research-areas/).

Centers, Programs, and Institutes

Our faculty hold appointments with the Departments of African American Studies, Gender and Women's Studies, Linguistics, Media and Cinema Studies, as well as the European Union Center and the Center for South Asian and Middle Eastern Studies, the Program in Comparative and World

Literature, the Program in Jewish Culture and Society, the Program in Medieval Studies, and the Unit for Criticism and Interpretive Theory, broadening opportunities for interdisciplinary work.

Facilities and Resources

A language learning lab provides computer-based access to resources and audio-video services. The phonetics lab contains state-of-the-art equipment available to graduate student researchers. The Kolb-Proust Archive for Research, a unit of the Library, houses a wealth of information about Marcel Proust and his time, including the important collection of notes and materials assembled by Philip Kolb, who was a professor in the Department. Documents from the collection are accessible on the World-Wide Web through a searchable SGML-encoded Virtual Archive (https://www.library.illinois.edu/rbx/kolbproust/).

Financial Aid

All students who apply for admission are considered for financial aid. Subject to budgetary conditions, and assuming satisfactory academic and teaching performance, the Department offers two years of financial aid toward the M.A. degree and an additional four years of support toward completion of the Ph.D.

Teaching Assistantships are the most common form of graduate student support. The usual appointment requires teaching three courses during the academic year.

Research Assistantships require the recipient to assist with a faculty member's research for a specific number of hours per week. A research assistantship may be combined with a teaching assistantship.

Fellowships are offered for new and continuing students. No separate application form is required.

Tuition and Fee Waivers are included in waiver-generating fellowship, teaching assistantship, and research assistantship awards.

Graduate students in French may spend the academic year abroad under exchange agreements with universities in France, Belgium, and Canada, employed as teaching assistants.

for the degree of Master of Arts in French

Candidates in all programs are required to demonstrate, at the time of the master's examination, an ability to communicate effectively in both written and spoken French. Candidates in French Studies must take a written and an oral examination based on a reading list covering the fields of French and literature and culture. Candidates in French Applied Linguistics may be examined based on short essays or an extended research paper, and their oral examination includes a discussion of selected topics in French literature and culture.

For additional details and requirements refer to the department's graduate programs (https://frit.illinois.edu/academics/french/graduate-programs-french/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Arts in French

French Studies Concentration

1. **Language:** high level of proficiency in written and oral French. Strong command of written and spoken academic French.
2. **French Studies:** Acquisition of broad knowledge of French and francophone literature and cultures across several centuries. Development of research and interpretive skills. Familiarity with major research questions within the field and with different approaches to those issues. Introduction to major contemporary works of history, philosophy and/or cultural theory in French.

3. **Training in theory and methodologies:** Introduction to a variety of methodologies and theoretical approaches to texts and their interpretation in English and in French.
4. **Teaching:** Ability to teach the French language at the beginning and intermediate levels. Effective communication in French to groups of students with various abilities in the language. Work with faculty to design syllabi and appropriate assessment tools.
5. **The Profession:** Awareness and development of professional skills, including the ability to write and deliver academic conference presentations, generate syllabi, rework seminar papers, write fellowship applications; awareness of issues in the academic job market in French studies.

French Language Learning Concentration

1. **Language:** Students display an Advanced Mid to Advanced High proficiency in reading, writing, listening, and speaking in French, as per ACTFL (American Council on the Teaching of Foreign Languages) guidelines.
2. **Knowledge of Applied Linguistics:** Students can recall, relate, and explain facts and theories about the structure and the teaching and learning of French.
3. **Research theories and methodologies:** Students can understand, recall, relate, and explain foundational research theories and methodologies used in the field of applied linguistics.
4. **Teaching:** Students are able to comfortably teach elementary levels of French language courses and have basic skills teaching intermediate levels of French language courses, aligning with a communicative approach to teaching and learning, grounded in basic principles of proficiency-oriented curriculum and assessment design.
5. **Professionalism:** Students demonstrate awareness and development of ethical and professional skills relevant to research, teaching, and learning in the field of applied linguistics, including communicative skills for the profession, collegiate demeanor, participation in professional organizations or events, evaluation of standards, issues, and resources used in the field. Work with faculty to design syllabi and appropriate assessment tools.

French Linguistics Concentration

1. **Language:** Students display Advanced Mid to Advanced High proficiency in reading, writing, listening, and speaking in French, as per ACTFL (American Council on the Teaching of Foreign Languages) guidelines.
2. **French Linguistics:** Students acquire broad theoretical and factual knowledge of the structure, history, and contemporary usage of the French language in francophone societies. They learn to establish interdisciplinary connections to literature, film, and the teaching of French and show familiarity with major research questions and methodologies in the field. Among students' applied skills are: the ability to conduct research, translate, and interpret in French.
3. **Research theories and methods:** Students can understand, recall, relate, and explain in English and in French foundational research theories and methodologies used in the field of theoretical and applied linguistics.
4. **Teaching:** Students are able to comfortably teach elementary levels of French language courses and have basic skills teaching intermediate levels of French language courses, aligning with a communicative approach to teaching and learning and a proficiency-oriented curriculum and assessment design. Work with faculty to design syllabi and appropriate assessment tools.
5. **The Profession:** Awareness and development of professional skills, including ability to write and deliver academic conference presentations, generate syllabi, rework seminar papers, write fellowship applications; awareness of issues in the academic job market in French Linguistics and Language Learning/Teaching. Students demonstrate awareness and development of ethical and professional skills relevant to their field, including communicative skills for the profession, collegiate demeanor and participation in professional organizations or events.

Admissions

Overview of French Admissions & Requirements (https://frit.illinois.edu/admissions/french-graduate-admissions/)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

French, PhD

for the degree of Doctor of Philosophy in French

The Department of French and Italian offers graduate programs leading to the Master of Arts and the Doctor of Philosophy degrees in French and in Italian. Candidates for the master's degree may specialize in French Studies, French Linguistics, French Language Learning, or Italian. Candidates for the doctoral degree in French may choose one of three specializations: French Studies, French Linguistics, or Second Language Acquisition and Teacher Education (SLATE).

The following minors and certificates may be pursued: Cinema Studies (p. 2137), Gender & Women's Studies (p. 2151), Translation Studies (http://www.translation.illinois.edu), Criticism and Interpretive Theory.

Admission

French

Students considering admission to the master's program should usually have had a college major in French. Applicants should apply online (https://www.grad.illinois.edu/admissions/apply/) and submit an academic statement of purpose (maximum 1000 words), a personal statement (maximum 500 words), three letters of recommendation, and two writing samples (5-10 pages each), at least one of which must be in French. Original transcripts showing all undergraduate and graduate work completed should be sent to SLCL Graduate Student Services. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24. Admission for the spring semester is rare. Students seeking admission to the Ph.D. program with a Master of Arts degree earned elsewhere are expected to have a minimum 3.5 grade point average in graduate coursework. The master's degree should be in French literature, French studies, or French linguistics. Candidates seeking admission to the Ph.D. specialization in Second Language Acquisition and Teacher Education may hold a Master of Arts in Teaching degree instead.

See our website (https://frit.illinois.edu/admissions/french-graduate-admissions/) for more information about how to apply. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Italian

The normal prerequisite for a graduate major is an undergraduate major in Italian or consent of the department. Students doing graduate work for any advanced degree in Italian must possess a command of the language. Applicants should apply online (https://www.grad.illinois.edu/admissions/apply/) and submit an academic statement of purpose (maximum 1000 words), a personal statement (maximum 500 words), three letters of recommendation, and a writing sample of approximately 10-20 pages in the form of one or two papers. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are required of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the s (http://www.grad.illinois.edu/Admissions/instructions/04c.cfm)peaking sub-section of the iBT with a minimum score of 24. Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, the department requires Ph.D. candidates to do some teaching as part of their academic work because such experience is considered a vital part of graduate training and professionalization. Non-native English speakers must first pass a test of their oral English ability.

Teaching Assistants in French and Italian are required to take FR 505 or ITAL 505 respectively (4 hours) as part of their contractual obligation. The course does not count toward the graduate degrees.

Faculty Research Interests

Our faculty possess strengths in literary interpretation, critical theory, the study of civilization, cinema, theoretical and applied linguistics, and computer-assisted teaching. Members of the faculty have received national and international recognition; graduates serve on the faculties of numerous colleges and universities both in this country and abroad. See also the faculty's areas of research (https://frit.illinois.edu/research/research-areas/).

Centers, Programs, and Institutes

Our faculty hold appointments with the Departments of African American Studies, Gender and Women's Studies, Linguistics, Media and Cinema Studies, as well as the European Union Center and the Center for South Asian and Middle Eastern Studies, the Program in Comparative and World

Literature, the Program in Jewish Culture and Society, the Program in Medieval Studies, and the Unit for Criticism and Interpretive Theory, broadening opportunities for interdisciplinary work.

Facilities and Resources

A language learning lab provides computer-based access to resources and audio-video services. The phonetics lab contains state-of-the-art equipment available to graduate student researchers. The Kolb-Proust Archive for Research, a unit of the Library, houses a wealth of information about Marcel Proust and his time, including the important collection of notes and materials assembled by Philip Kolb, who was a professor in the Department. Documents from the collection are accessible on the World-Wide Web through a searchable SGML-encoded Virtual Archive (https://www.library.illinois.edu/rbx/kolbproust/).

Financial Aid

All students who apply for admission are considered for financial aid. Subject to budgetary conditions, and assuming satisfactory academic and teaching performance, the Department offers two years of financial aid toward the M.A. degree and an additional four years of support toward completion of the Ph.D.

Teaching Assistantships are the most common form of graduate student support. The usual appointment requires teaching three courses during the academic year.

Research Assistantships require the recipient to assist with a faculty member's research for a specific number of hours per week. A research assistantship may be combined with a teaching assistantship.

Fellowships are offered for new and continuing students. No separate application form is required.

Tuition and Fee Waivers are included in waiver-generating fellowship, teaching assistantship, and research assistantship awards.

Graduate students in French may spend the academic year abroad under exchange agreements with universities in France, Belgium, and Canada, employed as teaching assistants.

Specialization in French Studies

The doctoral program in French Studies is designed to prepare specialists in literature and culture. Candidates are required to include courses in textual criticism, linguistics or linguistically oriented textual theory, and French/Francophone literature and culture. Students are expected to demonstrate reading proficiency in one modern foreign language (other than French or English). They may fulfill this requirement by passing a fourth-semester reading course with a grade of B or better or by demonstrating an equivalent ability by examination. Students may choose to complete a minor in Cinema Studies, Gender and Women's Studies, or to obtain a certificate in Medieval Studies, Translation Studies or in Criticism, and Interpretive Theory.

Specialization in French Linguistics

The Ph.D. curriculum in linguistics offers training in French and Romance linguistics in cooperation with the Department of Spanish and Portuguese and the Department of Linguistics. Candidates selecting this option are required to complete course work in linguistic theory, advanced study of French language and culture, and French and Romance linguistics beyond the requirements of the M.A. in French Linguistics. Advanced course work related to the candidate's research area is chosen from courses offered by participating departments in consultation with the advisors in French and Romance Linguistics. Students are expected to demonstrate proficiency in at least one other Romance language and may select a concentration in Romance Linguistics.

Specialization in French Second Language Acquisition and Teacher Education (SLATE)

This Ph.D. curriculum in French SLATE combines advanced studies in French with a research focus on some aspect of second language learning and teaching. It is an inter-disciplinary Ph.D. concentration that offers training in a wide range of disciplines related to second language learning and teaching, with a focus on bilingualism, foreign, second, and heritage language teaching and learning. Courses are offered in collaboration with multiple departments and units in the School of Literatures, Cultures, and Linguistics, the College of Liberal Arts and Sciences, and the College of Education. Candidates in French selecting this option are required to complete course work in theories of language teaching and acquisition, linguistic theory, and French language and culture beyond the requirements of the M.A. in Language Learning. Advanced course work related to the candidate's research area is chosen in consultation with the French SLATE advisor.

for the degree of Doctor of Philosophy in French

French Studies Concentration

1. **Language:** Near native written and oral proficiency in French. Mastery of written and spoken academic French and English.
2. **French Studies:** Acquisition of broad knowledge of French and francophone literature and cultures across the centuries, with particular expertise in one area or more. Ability to evaluate the field of French Studies, assess the major issues of concern within the field, and evaluate different approaches to those issues. Familiarity with major contemporary works of history, philosophy and/or cultural theory in French.
3. **Training in theory and methodologies:** Strong command of a variety of methodologies and theoretical approaches to texts and their interpretation in English and in French.
4. **Teaching:** Ability to teach French language, literature and culture in a wide variety of undergraduate courses, from beginning to advanced, with broad historical, cultural and linguistic understanding. Effective communication in French to groups of students with various abilities in the language. Work with faculty to design syllabi and appropriate assessment tools.
5. **The Profession:** mastery of professional skills, including ability to write and deliver academic conference presentations, generate syllabi, rework and submit seminar papers for publication as articles, write book reviews and fellowship applications; readiness for academic job market in French studies, including ability to identify successful strategies and evaluate different types of institutions and their teaching and research needs.

French Linguistics Concentration

1. **Language:** Students display an Advanced High to Superior proficiency, as well as native likeness in reading, writing, listening, and speaking in both French and English (American Council on the Teaching of Foreign Languages) guidelines.
2. **French Linguistics:** Students can recall, relate, explain, discuss, and utilize theories in the field of French Linguistics to generate research. They acquire broad specialized knowledge in their subfield of specialization.
3. **Research theories and methods:** Students can understand, recall, relate, and explain in English and in French advanced research theories and methodologies used in the field of linguistics.
4. **Teaching:** Students are able to expertly teach a variety of French language and content courses in their field, grounded in principles of proficiency-oriented curriculum and assessment design, as well as in programmatic sequencing.
5. **Professionalism:** Students demonstrate knowledge and application of ethical and professional skills relevant to research, teaching, and learning in the field of applied linguistics, including communicative skills for the profession, collegiate demeanor, participation in professional organizations or events, evaluation of standards, issues, and resources used in the field, readiness for the job market, research publications, and presentations at nationally and internationally recognized research conferences.

Second Language Acquisition Concentration

1. **Language:** Students display an Advanced High to Superior proficiency, as well as native likeness in reading, writing, listening, and speaking in both French and English (American Council on the Teaching of Foreign Languages) guidelines.
2. **Expert knowledge in applied linguistics:** Students can recall, relate, explain, discuss, and utilize theories in the field of applied linguistics to generate research.
3. **Research theories and methodologies:** Students can understand, relate, explain, discuss, and defend their use of advanced and updated research theories and methodologies consistent with research in the field of applied linguistics.

4. **Teaching:** Students are able to expertly teach a variety of French language and content courses, aligning with a communicative approach to teaching and learning, as well as with the specificity of a major in French, grounded in principles of proficiency-oriented curriculum and assessment design, as well as in programmatic sequencing.
5. **Professionalism:** Students demonstrate knowledge and application of ethical and professional skills relevant to research, teaching, and learning in the field of applied linguistics, including communicative skills for the profession, collegiate demeanor, participation in professional organizations or events, evaluation of standards, issues, and resources used in the field, readiness for the job market, research publications, and presentations at nationally and internationally recognized research conferences.

Game Development, MS

for the degree of Master of Science in Game Development

The Master of Science in Game Development (MS in Game Development) degree provides technical training and practical experience for students interested in working in professional game studios, game-adjacent industries or other businesses where game-related skills are increasingly in demand. The program fosters critical skills in collaboration, communication, integration and professional business practices, along with technical skills in game design within one of the following five concentrations: Art, Design, Production, Programming, and Narrative. After the first year of coursework, students will shift the balance of their course work towards in-studio experiences within a professional game-development environment. The MS in Game Development will serve traditional graduate students as well as industry professionals who are interested in attaining a post-graduate degree while diversifying their professional skills.

for the degree of Master of Science in Game Development

The goal of the the MS in Game Development program is to provide practical, technical, critical, and ethical training, awareness, and experiences to students who are interested in working in professional game studios, game-adjacent industries, or in other work places where game-related skills are required. To this end, the program includes four shared objectives for students across all concentrations:

1. Practical Training: Understand the roles and specifications involved in the professional development of games and interactive media, using industry-standard practices for communication, collaboration, and process flow at every stage in the development process.
2. Technical Training: Demonstrate polished game development skills in a chosen specialization sufficient to create or significantly contribute to a publishable interactive experience.
3. Critical Training: Be knowledgeable about and conversant with social, psychological, economic, and technological contexts and impacts of games and simulations in society.
4. Ethical Training: Develop the ethical, relational, and collaborative skills necessary for working on a diverse and inclusive research or design team.

for the degree of Master of Science in Game Development: Narrative Concentration

---

The goal of the MS in Game Development program is to provide practical, technical, critical, and ethical training, awareness, and experiences to students who are interested in working in professional game studios, game-adjacent industries, or in other work places where game-related skills are required. To this end, the program includes four shared objectives for students across all concentrations:

1. Practical Training: Understand the roles and specifications involved in the professional development of games and interactive media, using industry-standard practices for communication, collaboration, and process flow at every stage in the development process.
2. Technical Training: Demonstrate polished game development skills in a chosen specialization sufficient to create or significantly contribute to a publishable interactive experience.
3. Critical Training: Be knowledgeable about and conversant with social, psychological, economic, and technological contexts and impacts of games and simulations in society.
4. Ethical Training: Develop the ethical, relational, and collaborative skills necessary for working on a diverse and inclusive research or design team.

Learning objectives for the Narrative concentration include:

1. Mastery of storytelling components such as plot, character development, worldbuilding.
2. Proficiency in the process of working with Design to turn a high level narrative into gameplay segments/missions that deliver the storytelling effectively.
3. Integrating narrative into interactive experiences through narrative design.
4. Mastery of at least 2 narrative engines.
5. Proficiency with a narrative engine that integrates with a major game engine such as Unity or Unreal.
6. Proficiency with studio processes such as design, organization, naming conventions.

Game Development: Production, MS

for the degree of Master of Science in Game Development: Production Concentration

---

The Production Concentration of the Master of Science in in Game Development (MS in Game Development) degree provides technical training and practical experience for students interested in working in professional game studios, game-adjacent industries or other businesses where game-related programming skills are increasingly in demand. The program fosters critical skills in collaboration, communication, integration and

professional business practices, along with technical skills in game production. After the first year of coursework, students will shift the balance of their course work towards in-studio experiences within a professional game-development environment. The Production concentration will serve traditional graduate students as well as industry professionals who are interested in attaining a post-graduate degree while diversifying their professional skills.

The goal of the MS in Game Development program is to provide practical, technical, critical, and ethical training, awareness, and experiences to students who are interested in working in professional game studios, game-adjacent industries, or in other work places where game-related skills are required. To this end, the program includes four shared objectives for students across all concentrations:

1. Practical Training: Understand the roles and specifications involved in the professional development of games and interactive media, using industry-standard practices for communication, collaboration, and process flow at every stage in the development process.
2. Technical Training: Demonstrate polished game development skills in a chosen specialization sufficient to create or significantly contribute to a publishable interactive experience.
3. Critical Training: Be knowledgeable about and conversant with social, psychological, economic, and technological contexts and impacts of games and simulations in society.
4. Ethical Training: Develop the ethical, relational, and collaborative skills necessary for working on a diverse and inclusive research or design team.

Learning objectives for the Game Production concentration include:

1. Ability to structure projects according to an industry-standard project management process such as Agile, or Scrum.
2. Mastery of at least 2 project management tools such as Jira, Github, Perforce, Slack, Trello. Project management tools will update as the industry evolves.
3. Demonstrated capacity to manage a studio-based project during an internship or other studio-based work experience, including proficiency in developing project staffing plans, project budgets, project schedules and Quality Assurance (QA) Test Plans.
4. Achievement of a critical understanding of the ethics and social contexts surrounding game production, including the importance of diversity, equity, and inclusion in the workplace.

Geography, MA

for the degree of Master of Arts in Geography

Admission

Students applying for admission to the master's program are expected to have a strong undergraduate background in geography and/or related disciplines. In addition to other Graduate College admission requirements, a grade point average of at least 3.0 (A = 4.0) in the undergraduate major is required.

GRE scores are no longer required or evaluated for admission to our graduate programs.

Assistantships and Fellowships

Geography graduate students generally receive tuition/fee waivers and monthly stipends from teaching assistantships, research assistantships, or fellowships.

Graduate Teaching Experience

Although teaching is not a Graduate College requirement, it is an important part of the graduate experience in this program. We have implemented a professionalization program where graduate students work with faculty members to receive advice and gain first-hand experience in teaching undergraduate courses. Several of our graduate students have also had the opportunity to serve as lead instructor for introductory-level geography courses.

Map and Geography Library

The University Library has a substantial collection of geography books and journals. Most of the new and more recent books are located in the Social Sciences, Health, and Education Library (SSHEL) (https://www.library.illinois.edu/sshel/); nearly all geography journals are available full-text through the University Library (https://www.library.illinois.edu/). The Map Library (https://www.library.illinois.edu/max/) holds a collection of over 626,000 maps and aerial photographs and houses an extensive collection of books on cartography and geographic information science. The University Library's Scholarly Commons (https://www.library.illinois.edu/sc/) staff can help students locate and collect geospatial data.

for the degree of Master of Arts in Geography

1. All graduate students will have a fundamental understanding of the history and philosophies of geography in all its diversity and breadth.
2. All graduate students will have knowledge of the latest trends and developments in geography as social science, a discipline increasingly rooted in geographic information science, and physical science.
3. All graduate students will have a deep and nuanced comprehension of the latest conceptual developments in their selected research areas.
4. All graduate students will have the ability to formulate a research problem, know the proper conceptual tools and methods to appropriately address it, and properly place it in evolving, relevant literature.
5. All graduate students will have a strong knowledge of proper ethical conduct in the performance and completion of advanced research.

Geography: Geographic Information Science - Professional Science Master's, MS

for the degree of Master of Science in Geography with Professional Science Master's and Geographic Information Science Concentrations

This program is designed for careers in business management using geospatial technologies. Students build a flexible, cross-disciplinary expertise around a strong Geographic Information Science core, while acquiring business knowledge and professional skills. The business curriculum includes technology management, marketing, entrepreneurship, finance, project and/or process management.

PSM students typically complete the program in 18 months consisting of 3 full-time, on-campus semesters and a summer internship. Graduates are awarded a **master's degree in geography** with the Professional Science Master's in GIS concentration. Please visit the GIS Overview page (https://psm.illinois.edu/gis/overview/) at Illinois PSM for more information.

Admission

Candidates for admission must have a bachelor's degree from an accredited U.S. institution, or comparable degree from a recognized institution abroad with a GPA or 3.0 (4.0 scale) for the last 60 hours of undergraduate or graduate coursework. Application requirements include: 3 letters of recommendation, proof of funding, and English language proficiency scores (https://grad.illinois.edu/admissions/instructions/04c/) for non-native English speakers. Transfer credit from Illinois or other institutions is not permitted. *GRE scores are no longer required or evaluated for admission to this program.*

Financial Aid

The PSM is a self-supported degree program, please visit their website (https://psm.illinois.edu/costs-and-financial-aid/) for tuition and fee estimations. Illinois PSM students are not eligible for assistantships or other tuition waiver-generating appointments but may take paid internships and graduate hourly appointments. Statutory waivers and tuition scholarships are accepted.

Illinois Professional Science Master's (PSM) - GIS Program overview

Admissions

Graduate College Admissions (https://grad.illinois.edu/admissions/apply/)

Geography, PhD

for the degree of Doctor of Philosophy in Geography

Students must complete the course requirements as determined by their individually planned program, initiate and complete research projects, and qualify for doctoral candidacy by passing both the departmental qualifying exam and the Graduate College preliminary exam. Although we do not have a foreign language requirement, students may choose to study a foreign language to aid in their research.

Admission

Students applying for admission to the PhD program are expected to have a strong undergraduate background in geography and/or related disciplines. In addition to other Graduate College admission requirements, a grade point average of at least 3.0 (A = 4.0) in the undergraduate major is required. PhD candidates are generally expected to have at least a 3.5 average in previous graduate work.

GRE scores are not required or evaluated for admission to our graduate programs.

Assistantships and Fellowships

Geography graduate students generally receive tuition/fee waivers and monthly stipends from teaching assistantships, research assistantships, or fellowships.

Graduate Teaching Experience

Although teaching is not a Graduate College requirement, it is an important part of the graduate experience in this program. We have implemented a professionalization program where graduate students work with faculty members to receive advice and gain first-hand experience in teaching undergraduate courses. Several of our graduate students have also had the opportunity to serve as lead instructor for introductory-level geography courses.

At least two graduate-level courses on analytical research methods (at least one of which must be in geographic information systems (GIS) or related geospatial techniques)		
GGIS 471	Modern Geographic Thought	4
GGIS 491	Research in Geography	2
Doctoral students are required to demonstrate competence in a specific research technique		
Students must fulfill program requirements specific to their specialty area		
GGIS 599	Thesis Research (4 min applied toward degree)	4
Total Hours		**96**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall:	12 (8 in GGIS)
Must complete a major research paper of publishable quality approved by the student's advisory committee.	
Qualifying Exam Required	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.0

Please refer to the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/) for additional details and requirements.

for the degree of Doctor of Philosophy in Geography

1. All graduate students will have a fundamental understanding of the history and philosophies of geography in all its diversity and breadth.
2. All graduate students will have knowledge of the latest trends and developments in geography as social science, a discipline increasingly rooted in geographic information science, and physical science.
3. All graduate students will have a deep and nuanced comprehension of the latest conceptual developments in their selected research areas.
4. All graduate students will have the ability to formulate a research problem, know the proper conceptual tools and methods to appropriately address it, and properly place it in evolving, relevant literature.
5. All graduate students will have a strong knowledge of proper ethical conduct in the performance and completion of advanced research.

Graduate Degree Programs in Geography:

- CyberGIS and Geospatial Data Science, MS (p. 1306) (online)
- Geography, MA (p. 1499)
- Geography, MS (p. 1502)

- **concentrations:**
  - Geographic Information Science - Professional Science Master's (p. 1505)
  - Computational Science & Engineering (p. 2000)
- Geography, PhD (p. 1508)
  - **concentration:**
    - Computational Science & Engineering (p. 2000)

We offer a program leading to the **Master of Science** degree in geography with the following specializations:

- **Geographic Information Science**
  - Geographic information systems; Dynamic modeling of ecological and social systems; Geocomputation and CyberGIS; Aerial photo analysis; Remote sensing; Inter-regional input-output modeling; Regional science; Spatial analysis
- **River, Watershed, and Landscape Dynamics**
  - Fluvial geomorphology; Watershed science and management; Aerial photo analysis; Ecosystem dynamics

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Geology, MS

for the degree of Master of Science in Geology

Students in the Master of Science program can follow the "standard" (or thesis) option or the "applied geology" (or non-thesis) option. The non-thesis option is intended as a terminal degree for students preparing for professional work in environmental and engineering geology or in applied geophysics and who have already been admitted to the program. We do not currently accept new students for the non-thesis master's degree. Admitted students must declare their intent to pursue the non-thesis option at least one semester prior to completing degree requirements.

Admission

The admission requirements of the Graduate College apply. Completion of at least one year each of study in college-level calculus, chemistry, and physics are required for admission to graduate work in geology. For more information, write to the department contact. Under special circumstances, students can be admitted at the beginning of the spring term.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Candidates for graduate degrees are usually supported through fellowships, research assistantships, teaching assistantships, or work-study programs. Fellowships and assistantships include tuition and service fee waivers. Awards for financial assistance are based principally on a candidate's academic record, statement of plans, and letters of reference. Continuation of financial aid depends on student performance and, in the case of teaching assistants, on the receipt of good evaluations. Some assistants are appointed by the State Geological Survey located on campus.

for the degree of Master of Science in Geology

Students in the Master of Science program can follow the "standard" (or thesis) option or the "applied geology" (or non-thesis) option. The non-thesis option is intended as a terminal degree for students preparing for professional work in environmental and engineering geology or in applied geophysics and who have already been admitted to the program. We do not currently accept new students for the non-thesis master's degree. Admitted students must declare their intent to pursue the non-thesis option at least one semester prior to completing degree requirements.

For additional details and requirements refer to the department's Graduate Degree Programs (https://esec.illinois.edu/academics/graduate-program/) and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

Thesis Option

Requires a written report	
400 level coursework is limited to 8 hours required in any of the options of the undergraduate curriculum in geology and geophysics at Urbana-Champaign	
All students must maintain a minimum grade point average (GPA) of 3.0 (A = 4.0). If the GPA falls below this minimum after 12 or more graduate hours of graded coursework, it must be raised to 3.0 or above after the completion of 12 additional graduate hours of graded coursework and must be maintained at or above the minimum thereafter.	

for the degree of Master of Science in Geology

1. All graduate students will have a broad understanding of basic foundational theories and phenomena that describe the makeup and functioning of the Earth, across the fields of geology and geophysics. Students should have mastered all areas at the level of GEOL 107 and 208, and should have mastered areas close to their area of specialty at the level of the core classes (e.g., 400-level) of our undergraduate curriculum.
2. All graduate students will have a high level of expertise(beyond the level of our undergraduate program)in their specialized research area within geoscience and any related sciences, and the ability to apply this expertise, along with theoretical and technical skills, to address new scientific questions in that area.
3. All graduate students will have knowledge of the recent development of their specialized area of research and current major research directions and questions.
4. All graduate students will have the ability to work independently to develop a research project and creatively answer the questions central to the project.
5. All graduate students will have ethically responsible and effective communication skills, written and verbal, at a professional scientific level.

Graduate Degree Programs in Geology

- Geology, MS (p. 1511)

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Geology, PhD

for the degree of Doctor of Philosophy in Geology

Ph.D. students are evaluated by two oral examinations: a preliminary examination, and a final examination. The objectives of the Preliminary Examination are to determine if the student is prepared to carry out original research at the Ph.D. level, the topic and scope of the proposed dissertation are appropriate, and if the student can communicate clearly. The final examination determines whether or not the dissertation and the student's defense of the research are of acceptable quality for the Ph.D.

Admission

The admission requirements of the Graduate College apply. Completion of at least one year each of study in college-level calculus, chemistry, and physics. For more information, write to the geology@illinois.edu (https://esec.illinois.edu/) email. Under special circumstances, students can be admitted at the beginning of the spring term.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid

Candidates for graduate degrees are usually supported through fellowships, research assistantships, teaching assistantships, or work-study programs. Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

German, MA

for the degree of Master of Arts in German

Admission

Applicants should apply online (https://germanic.illinois.edu/admissions/graduate/) and submit a statement of purpose, three letters of recommendation and a sample of their written work in English or German or both. For admission to the Master of Arts program, the writing sample might be a term paper, and for admission to the doctoral level, a master's thesis or seminar paper. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are required. The applicant should ask the ETS to submit scores to institution 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 79 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program, and all students teach. Non-native English speakers must first pass a test of their oral English ability.

Research Interests

The department faculty includes nationally and internationally recognized scholars in all areas of research within the field, from older and modern German language, literature, and culture to Scandinavian languages, literatures and cultures. Some of the current research areas of faculty encompass (but are not limited to) Arctic Studies, Literature and Music, Literature and Medicine, Migration and Multilingualism, Film and Visual Studies, Digital Humanities, Memory Studies, and Intersectional Studies of Race, Gender, and Sexuality. We offer courses on topics in German and Scandinavian languages, literatures, and cultures across all periods, including historical and synchronic Germanic linguistics, and German language pedagogy. The University Library has one of the nation's outstanding collections of works pertaining to study and research in Germanic literatures of all periods and in Germanic and general linguistics.

Financial Aid

All students accepted into the program have financial support, usually in the form of a Teaching Assistantship (https://germanic.illinois.edu/academics/graduate-programs/opportunities-and-fellowships/).

The department has contacts with a variety of universities and institutions in German-speaking countries; these cooperative endeavors also include arrangements for graduate students to study and teach abroad.

For continuing graduate students, the awarding of financial aid of all types is contingent upon making satisfactory progress toward a degree.

for the degree of Master of Arts in German

Applicants should have completed undergraduate studies similar to the concentration in German at the University of Illinois at Urbana-Champaign, have a grade point average of 3.0 (A = 4.0) for the last 60 hours of undergraduate coursework, and be able to follow lectures in the German language. Acquaintance with German history and culture in their relation to the general European background is desirable. Admission to the program is on a competitive basis.

Candidates for the Master of Arts degree may emphasize either German literature or linguistics. All candidates must take courses in both literature and linguistics.

For additional details and requirements refer to the department's website (http://www.germanic.illinois.edu/graduate/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Arts in German

1. **Disciplinary knowledge, both factual and analytical.** Ours is a very comprehensive graduate program in literature and culture of all periods, visual studies, and linguistics, in which we apply theoretical, digital, and historiographic methods and approaches. We require that students situate their disciplinary knowledge within an interdisciplinary and multicultural context. Graduates will have comprehensive factual knowledge of German literary-cultural periods, movements, authors, and linguistics, as well as the ability to use contemporary tools of analysis. They are able to position themselves within scholarly discourses: broadly at the M.A. level, and, at the Ph.D. level, within their specialties. They express this ability in writing and oral presentation (see outcomes #2 and #4). The program's foundational course (GER 510) covers learning to conduct research in a tier-one research library, techniques of literary analysis and critical approaches, conventions of scholarly writing, use of bibliographic tools, and learning about the profession. Each subsequent course in the program deepens this knowledge and is designed for students to familiarize themselves with methods of systematic literary study that can yield original findings and practice oral and written scholarly communication.

2. **Research and writing expertise.** Students are familiar with fundamental research tools in the humanities as well as tools specific to the study of German literature, culture, and linguistics. They can sustain a nuanced argument in academic writing and can produce well-written academic texts in English and in German. In their writing, they display an awareness of the audience and an understanding of how textual choices reflect coherent argumentation. Students know how to conduct research and understand the value of multiple-draft writing. They know how to use proper citation, how to evaluate print and online sources, and they understand and avoid plagiarism. Our students are thoroughly trained in theoretical, historical, and comparative methodologies of research and writing. From the start, students learn scholarly conventions, especially for footnotes and bibliography, including intensive library workshops to become acquainted with key research resources. Students learn and model critical approaches to a literary text through close readings, analysis, and interpretation of key passages in online posts, class presentations, and informal and formal writing; and students learn to develop several possible approaches to literary interpretation and criticism.
3. **Teaching preparedness and praxis.** Our graduate students participate in a thorough teacher-training program that includes a graduate seminar on teaching methodologies and approaches(GER 582), which trains students in pedagogical best practices as well as in current topics of interest in the field. Students receive ongoing, consistent mentorship from the Director of the Basic Language Program as well as from all faculty members, through a structured system of classroom observations and discussions. They teach across the curriculum, in German, and in English; they teach language as well as literature/culture courses. Students are acquainted with leading language teaching and learning theories, and consider the relationship of those theories to pedagogy. They understand the curricular and institutional contexts within which teaching and learning take place. Their German skills are at a near-native level, commensurate with the demands of the language classroom; in courses taught in English, our students are able to teach writing and argumentation at a very advanced level. Students leave our program ready to teach in any type of German curriculum or institutional context.
4. **Professional development.** Our students are able to submit and present conference papers successfully; they receive guidance in essential conference behavior, including acting as a respondent and handling question-answer sessions. They gain experience in presenting research by participating in our department lecture forum. They can write abstracts, apply for grants, and are aware of the relevant professional organizations and the advantages of membership. They receive training in professional ethics. They are mentored in preparation for the academic and non-academic job market and in interviewing for a variety of positions. Their German and English language skills are excellent. Ability in German is supported by participation in departmental exchange programs and help with grant applications to spend time researching and/or teaching in German-speaking countries. In the program's foundational course GER 510, students study the ethics of the profession, and they learn about the profession by writing a professional email, web page content, a CV, MA/PhD reading lists, a grant application, and a conference abstract.
5. **Mobility and academic exchange.** Students all have substantial experience abroad. They gain this experience by participating in one of our departmental exchanges with German universities and/or by spending time in a German-speaking country conducting research with the support of an external grant (e.g., Fulbright, German Academic Exchange Service). The faculty mentors students through the process of writing grant applications. Our exchanges are bidirectional—we host students here and send them abroad, which means that the graduate students here in Illinois have consistent opportunities to interact with German-speaking visitors.

Graduate Degree Programs in Germanic Languages & Literatures

- German, MA (p. 1517)

For continuing graduate students, the awarding of financial aid of all types is contingent upon making satisfactory progress toward a degree.

for the degree of Doctor of Philosophy in German

Applicants must meet the admission standards outlined for the Master of Arts and, in addition, hold a Master of Arts in German (or equivalent) with a graduate grade point average of 3.5 (A = 4.0). Admission to the program is on a competitive basis.

Candidates for the Ph.D. in German may specialize in older German literature, modern German literature, Germanic linguistics, or Scandinavian literature.

Students working toward the Ph.D. degree must have completed all requirements for the Master of Arts degree given above and must complete an additional 40 graduate hours of coursework approved by the graduate adviser. At least 32 graduate hours must be for courses in Germanic Languages and Literatures. No more than 8 hours of credit in 400 level courses beyond those presented for the M.A. will be counted toward these ten units. The 40 hours may include up to 4 hours of GER 593, but may not include any credit for GER 496 for work taken as independent study. Residence requirements are those of the Graduate College.

For additional details and requirements refer to the department's website (http://www.germanic.illinois.edu/graduate/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

They express this ability in writing and oral presentation (see outcomes #2 and #4). The program's foundational course (GER 510) covers learning to conduct research in a tier-one research library, techniques of literary analysis and critical approaches, conventions of scholarly writing, use of bibliographic tools, and learning about the profession. Each subsequent course in the program deepens this knowledge and is designed for students to familiarize themselves with methods of systematic literary study that can yield original findings and practice oral and written scholarly communication.
2. **Research and writing expertise.** Students are familiar with fundamental research tools in the humanities as well as tools specific to the study of German literature, culture, and linguistics. They can sustain a nuanced argument in academic writing and can produce well-written academic texts in English and in German. In their writing, they display an awareness of the audience and an understanding of how textual choices reflect coherent argumentation. Students know how to conduct research and understand the value of multiple-draft writing. They know how to use proper citation, how to evaluate print and online sources, and they understand and avoid plagiarism. Our students are thoroughly trained in theoretical, historical, and comparative methodologies of research and writing. From the start, students learn scholarly conventions, especially for footnotes and bibliography, including intensive library workshops to become acquainted with key research resources. Students learn and model critical approaches to a literary text through close readings, analysis, and interpretation of key passages in online posts, class presentations, and informal and formal writing; and students learn to develop several possible approaches to literary interpretation and criticism.
3. **Teaching preparedness and praxis.** Our graduate students participate in a thorough teacher-training program that includes a graduate seminar on teaching methodologies and approaches(GER 582), which trains students in pedagogical best practices as well as in current topics of interest in the field. Students receive ongoing, consistent mentorship from the Director of the Basic Language Program as well as from all faculty members, through a structured system of classroom observations and discussions. They teach across the curriculum, in German, and in English; they teach language as well as literature/culture courses. Students are acquainted with leading language teaching and learning theories, and consider the

relationship of those theories to pedagogy. They understand the curricular and institutional contexts within which teaching and learning take place. Their German skills are at a near-native level, commensurate with the demands of the language classroom; in courses taught in English, our students are able to teach writing and argumentation at a very advanced level. Students leave our program ready to teach in any type of German curriculum or institutional context.

4. **Professional development.** Our students are able to submit and present conference papers successfully; they receive guidance in essential conference behavior, including acting as a respondent and handling question-answer sessions. They gain experience in presenting research by participating in our department lecture forum. They can write abstracts, apply for grants, and are aware of the relevant professional organizations and the advantages of membership. They receive training in professional ethics. They are mentored in preparation for the academic and non-academic job market and in interviewing for a variety of positions. Their German and English language skills are excellent. Ability in German is supported by participation in departmental exchange programs and help with grant applications to spend time researching and/or teaching in German-speaking countries. In the program's foundational course GER 510, students study the ethics of the profession, and they learn about the profession by writing a professional email, web page content, a CV, MA/PhD reading lists, a grant application, and a conference abstract.
5. **Mobility and academic exchange.** Students all have substantial experience abroad. They gain this experience by participating in one of our departmental exchanges with German universities and/or by spending time in a German-speaking country conducting research with the support of an external grant (e.g., Fulbright, German Academic Exchange Service). The faculty mentors students through the process of writing grant applications. Our exchanges are bidirectional—we host students here and send them abroad, which means that the graduate students here in Illinois have consistent opportunities to interact with German-speaking visitors.

Graduate Degree Programs in Germanic Languages & Literatures

- German, MA (p. 1517)
  - concentration:
    - Medieval Studies (p. 2042)
- German, PhD (p. 1521)
  - concentration:
    - Medieval Studies (p. 2042)
    - Second Language Acquisition & Teacher Education (p. 2051)

The Department of Germanic Languages and Literatures offers graduate programs leading to the degrees of Master of Arts in German, and Doctor of Philosophy in German. Students in the department may choose an additional specialization in Cultural Studies and Interpretive Research (http://www.germanic.illinois.edu/graduate/) or a concentration in Medieval Studies. Candidates for the Ph.D. in German may additionally obtain a certificate in Second Language Acquisition and Teacher Education (https://slate.illinois.edu/) (SLATE Certificate).

Global Studies, MS

for the degree of Master of Science in Global Studies

The Center for Global Studies (CGS (https://cgs.illinois.edu/)), Center for the Study of Global Gender Equity (CSGGE (https://wggp.illinois.edu/)), and the Program in Arms Control and Domestic and International Security (ACDIS (https://acdis.illinois.edu/)), offer a Master of Science in Global Studies (MSGS (https://cgs.illinois.edu/graduate/masters-global-studies/)). This innovative program prepares students for careers that require knowledge of and an ability to work within areas related to international policy, global governance, security, and development by equipping them with the analytical and professional skills necessary to navigate an increasingly interconnected world. It emphasizes real-world, professional training and experience by enabling students to study, research, and work globally and with international universities and industry partners. The aim is to develop broadly educated and well-trained scholars, practitioners, and professionals who will become future leaders with a global impact.

Admission

Applicants to the MS in Global Studies (https://cgs.illinois.edu/graduate/masters-global-studies/?check_logged_in=1) degree must have completed or be pursuing a bachelor's degree from an accredited institution of higher learning [or have 10 or more years of related professional work experience]. Applicants must submit to the Graduate College an application for admission, certified transcripts of all undergraduate and graduate work, and three letters of reference. International students may be required to take the Test of English as a Foreign Language (TOEFL), with minimum scores set by the Graduate College. Graduate Record Examination or other post-secondary examinations are not required. Applicants must also submit a statement of purpose that describes their interest in the program. All admission requirements of the Graduate College (https://grad.illinois.edu/admissions/minimum-requirements/) also apply. Admission is available for Fall and Spring terms. Some financial aid is available.

for the degree of Master of Science in Global Studies

The MS in Global Studies is designed to be completed in three semesters and offers flexibility through multiple paths to the degree in consultation with the advisor (https://cgs.illinois.edu/graduate/masters-global-studies/program-overview/advising/). For specific questions and details, please visit the program website: Masters in Global Studies (https://cgs.illinois.edu/graduate/masters-global-studies/)

For the most up to date course availability, please visit the curriculum page of the program website: Curriculum.

Total Hours		**32**

Code	**Title**	**Hours**
Other Requirements and Conditions (may overlap):		
A minimum of 20 credit hours must be taken from the University of Illinois Urbana-Champaign campus.		
A minimum of 12 500-level credit hours.		
No courses used to fulfill any degree requirement may be taken using the “Credit/No Credit” option.		
The minimum program GPA is 3.0.		
Each Global Studies student will be required to demonstrate knowledge of a second language through at least the level of a third year of instruction, with non-native English speakers exempt from this requirement. For students not admitted with this level of second language knowledge, this requirement can be completed through an elective language course and/or reading and writing activities in association with meeting the professional development or professional skills requirement. Language courses will not count toward the degree.		

for the degree of Master of Science in Global Studies

The Master of Science in Global Studies provides knowledge and technical skills of practical use in private and public sectors dealing with challenges with international or global dimensions. The degree can also provide background for further graduate study in a related field. It is designed to equip graduates to:

1. Draw on the literature to develop an understanding of globalization and the framework of Global Studies;
2. Think critically about how globalization impacts global order, welfare and legitimacy;
3. Become familiar with the historical, ethical and philosophical questions underlying research in the field of Global Studies;
4. Gain practical experience of collecting, analyzing and evaluating data on a key global challenge of the 21st century;
5. Observe the analysis of and solutions to research problems that may arise when conducting research that is global in scale and scope;
6. Gain practical experience based on the understanding and application of theoretical knowledge in the field of Global Studies;
7. Translate the skills and knowledge students have gained in the classroom into professional experience exploring Global Studies phenomena or problems; and
8. Observe the analysis of and solutions to problems arising in professional work settings.

Health Administration, MHA

for the degree of Master of Health Administration in Health Administration

APPLICATIONS SHOULD BE SUBMITTED THROUGH HAMPCAS.
PLEASE SEE PROGRAM WEBSITE (https://ahs.illinois.edu/mha-apply/) FOR MORE INFORMATION.

The Master of Health Administration program is designed to prepare graduate students to become successful healthcare managers and administrators. Students will gain the knowledge and skills necessary to manage the complex United States healthcare system efficiently and effectively.

- Our mission is: Launching healthcare pioneers and lifelong leaders through innovative education and applied experiences.
- Our vision is: To be recognized as a regionally dominant program and national leader in innovative healthcare management education.

The Master of Health Administration program seeks students with a 3.0 GPA or higher from their bachelor's degree. Generally the degree is completed in two years. No undergraduate courses will satisfy courses for both an undergraduate and master's degree (i.e. "double dipping"). Students entering the program are encouraged to have completed undergraduate coursework in health, health administration, and other business related courses with all majors accepted.

Admissions

Applicants should have a grade point average of at least 3.0 (A = 4.0) for the last 60 semester hours of their undergraduate degree work (excluding fieldwork, student teaching, and physical activity courses).

International and some domestic students may be required to show proof of English Proficiency (https://grad.illinois.edu/admissions/instructions/04c/).

for the degree of Master of Health Administration in Health Administration

The Master of Health Administration (MHA) program requires completion of 52 hours of coursework including an internship. The courses are intended to provide overall knowledge of the United States healthcare system. The MHA at Illinois prepares students to become innovative, effective leaders in today's complex healthcare landscape. Through a blend of leadership training, strategic planning, financial management and organizational development, our graduates are equipped to drive meaningful change in the healthcare industry.

for the degree of Master of Health Administration in Health Administration

---

Upon completion of the Master of Health Administration program, students will:

1. Be prepared for healthcare leadership careers in the healthcare industry.
2. Leverage organizational data to assess strengths and shortcomings, capitalize on opportunities and attempt to minimize financial, economic, environmental and other organizational threats.
3. Incorporate best-practice techniques into leadership and management activities.
4. Successfully analyze and solve complicated healthcare problems from a lens of critical thinking.
5. Leverage a service orientation that will drive both their work ethic and attitude.

Health Communication, MS

for the degree of Master of Science in Health Communication (on campus & online)

The Department of Communication offers an online Master of Science degree (M.S.) in Health Communication. This program is tailored for professionals in healthcare, offering a 100% online and asynchronous learning schedules to accommodate students who work full time. Applications are accepted year-round on a rolling admission basis, with start dates in Fall and Spring semesters. The degree can take 1-2 years to complete. To learn more, visit our webpage (https://hcom.illinois.edu/).

The Health Communication Online Master of Science (HCOM) Program offers a broad curriculum in communication research, theory and application. Specialized focus in interpersonal, organizational and mediated health communication in applied contexts are a cornerstone of the program. For a complete course list with course descriptions, see our curriculum (https://hcom.illinois.edu/curriculum/).

Admission

An application must include scanned copies of official transcripts from every post-secondary institution the applicant has attended, a statement of purpose, and at least three letters of recommendation, preferably from academic or professional recommenders. GRE scores are not required. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. Follow this link (https://hcom.illinois.edu/admissions/) for more information about admission to HCOM.

Graduate Teaching Experience

No teaching experience is required for admission into this program.

Financial Aid

Financial aid is usually offered in the form of student loans; no scholarships or fellowships are available. HCOM students often secure financial support or reimbursement from their professional organizations. Tuition rates for the program can be found here (https://hcom.illinois.edu/admissions/). These rates include all tuition and fees and are the same for in- and out-of-state residents, including international students.

Certificates

The HCOM program also supports four 12-credit non-degree certificates in health communication. Click this link for more information about our online certificate programs (https://hcom.illinois.edu/certificates/).

Contact Us to Learn More:

If you have any questions about the HCOM program or the certificates, please contact Associate Director and Academic Advisor, Dr. Lauren Weiner. email: hcom@illinois.edu, phone: 224-484-0425, or connect via the chat feature on our website (https://hcom.illinois.edu/).

for the degree of Master of Science in Health Communication (on campus & online)

The Department of Communication offers an online Master of Science degree (M.S.) in in Health Communication. This program is not offered in a face to face format. Apply to the Master of Science program only; applications to the online Master of Arts in Communication are not being accepted. More information about the online program (https://hcom.illinois.edu/) is available.

For additional details and requirements refer to the department's Graduate Programs (http://www.communication.illinois.edu/prospective/grad/degrees/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online, the requirements are listed below:

Code	Title	Hours
Health Communication Research Methods I and II; Capstone Individual Study		8
Elective hours (24 min)		24
Independent Study Hours (4 max applied toward degree)		4
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum Hours Required Within the Unit:	28
Minimum 500-level Hours Required Overall:	12 (8 in CMN)
Minimum GPA:	2.75

for the degree of Master of Science in Health Communication (on campus & online)

Students who complete the HCOM program will be able to:

1. Understand the role of communication processes in the reception and delivery of health care services and information. They learn that communication is not only the transmission of messages but also the interaction between humans and non-human technologies in the creation of practical understandings of health processes.
2. Read and digest qualitative and quantitative research concerning health care services in order to assist practitioners and patients in the most effective delivery of health care messages and information.
3. Identify the effectiveness and limitations of persuasion strategies used to inform and influence audience's adoption of healthcare information and behaviors. This outcome includes dedicated health campaigns as well as the influence of media on health behaviors and beliefs.
4. Understand interpersonal communication behaviors in healthcare settings as well as in private and public life that lead to or prevent the adoption of healthy behaviors. This outcome includes social support and health outcomes, patient provider communication as well as family and support group communication related to health.
5. Understand the organizational setting in which health communication takes place, particularly with reference to inter-professional communication, managerial communication, and the policies that guide health care services.
6. Recognize the role of theory in understanding health communication processes and successfully utilize theoretical frameworks to explain breakdowns in health communication and propose methods for repairing communication problems in interpersonal, organizational and social/mediated fields.

Health Technology, MS

for the Master of Science in Health Technology

The MS in Health Technology is designed to educate the next generation of Health Technology Professionals in the development, testing, and use of technologies that promote health, rehabilitation, mitigate disability, and improve independence and quality of life. This includes bringing end-users (e.g., individuals with chronic conditions, older adults, persons with disabilities), industry professionals, and applied health professionals together with Illinois students and faculty in a multidisciplinary and inter-generational environment to identify existing problems and develop technologies to solve them.

Graduate Degree Programs in Health Technology

- Health Technology, MS (p. 1532)

Admissions

Students should have an undergraduate degree in a health or science related field or engineering. Applicants should have a minimum grade point average of 3.00 (A = 4.00) or equivalent for the last two years of undergraduate study and show evidence of strong quantitative skills and of serious interest in health technology through their personal statement. Students with less than a 3.0 GPA may be considered for a limited status admission.

International and some domestic students may be required to show proof of English Proficiency (https://grad.illinois.edu/admissions/instructions/04c/).

Program prerequisites* or equivalents include:

- Introduction to Computer Science (CS 125 or 105)
- Introduction to Health Data Analysis (HK 209 - formerly CHLH 244)
- Introduction to Psychology (PSYC 100)
- Intro to Public Health (HK 111 - formerly CHLH 101)
- Linear Algebra (MATH 125, or 225, 410, 415)
- Research Methods (HK 201 - formerly CHLH 201)

*Promising students might be admitted with a contingency that they complete the prerequisites before the start of the first semester.

Financial Aid

Students in the MS in Health Technology program are not eligible for tuition-waiver generating assistantships. Students may apply for scholarships available through the University.

History, MA

for the degree of Master of Arts in History

Students enrolled in the Ph.D. program can usually petition to earn a Master of Arts in History within three semesters.

The Department of History offers graduate courses leading to the Doctor of Philosophy degree, complete details of which may be found in the Graduate Studies section of the department's web site. Students are not normally admitted to a terminal master's degree program.

Admission
Applicants should have a minimum of 20 semester hours of undergraduate work in history and cognate disciplines with an overall GPA of 3.25 in the last two years. Applicants who have a master's degree should have a grade point average of 3.5 for previous graduate-level work. All applicants are required to submit Graduate Record Examination (GRE) scores (verbal, writing, and quantitative are mandatory; history is optional). All applicants are required to submit a writing sample. Language preparation may be weighted heavily, depending upon the field of specialization. International applicants from non-English-speaking countries must submit proof of English proficiency (https://grad.illinois.edu/admissions/instructions/04c/) to be eligible for admission. The department is not currently admitting to the Teaching of Social Studies program. For additional details refer to our website (https://history.illinois.edu/academics/graduate-studies-and-admissions/prospective-students/application-process-and-required/).

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Facilities and Resources
The extraordinary University Library is the department's main research facility; within it, the History, Philosophy & Newspaper Library, the Rare Book Room, and the area studies libraries (Slavic, Africana, Latin American, Asian Libraries) all serve faculty and students with expert bibliographers and focused collections. Among other special collections much used by historians are Afro-Americana and Women's Studies; the library is also a major repository for government documents.

Financial Aid
Financial aid is almost always awarded on an academic-year basis. Applications by incoming students are considered with admission applications. All fellowships and assistantships include a stipend plus tuition and service fee waiver.

Both University and department endowment fellowships are available to entering students and to advanced doctoral students embarked on their research or the writing of their dissertations. Foreign Language and Area Studies (FLAS) Fellowships may support first- and second-year students who have special interests in foreign area studies. Entering students from underrepresented groups may be awarded one- to three-year Graduate College Fellowships. The Illinois Consortium for Educational Opportunity Program (ICEOP) offers renewable fellowships to underrepresented minority students who are Illinois residents and plan academic careers within the state. Half-time teaching assistantships are the department's primary form of financial aid for graduate students in the Ph.D. program. Students who progress satisfactorily toward their degrees and demonstrate effective teaching will have their teaching assistantships renewed for a second, and usually a third, year.

for the degree of Master of Arts in History

For additional details and requirements refer to the department's g (http://www.history.illinois.edu/graduate/current/requirements/)raduate degree requirements (https://history.illinois.edu/academics/graduate-studies-and-admissions/current-students/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
HIST 598 (2 hours per term) is required of candidates who hold teaching assistantships, during each semester they hold an appointment		
HIST 593 & HIST 594	Approaches to History and Intro Historical Writing	8
Two additional 500-level courses in history		8
Two courses in each of two of the fields of specialization offered by the department.		16
Language Requirement: candidate must demonstrate ability to read one foreign language related to his or her field of interest as approved by the graduate advisers		
HIST 599	Thesis Research (8 max applied toward degree)	8
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall:	16
At least one research seminar (HIST 596) with a grade of B or better must be included.	
Students may take up to two of the required eight courses in departments other than History, if approved.	
Minimum GPA:	3.0

Non-Thesis Option

History, PhD

for the degree of Doctor of Philosophy in History

The Department of History offers graduate courses leading to the Doctor of Philosophy degree, complete details of which may be found in the Graduate Studies section of the department's web site. Students are not admitted to a terminal master's degree program.

Admission
Applicants should have a minimum of 20 semester hours of undergraduate work in history and cognate disciplines with an overall GPA of 3.25 in the last two years. Applicants who have a master's degree should have a grade point average of 3.5 for previous graduate-level work. Graduate Record Examination (GRE) scores (verbal, writing, and quantitative are mandatory; history is optional) are now optional. All applicants are required to submit a writing sample. Language preparation may be weighted heavily, depending upon the field of specialization. International applicants from non-English-speaking countries must submit proof of English proficiency (https://grad.illinois.edu/admissions/instructions/04c/) to be eligible for admission. The department is not currently admitting to the Teaching of Social Studies program. For additional details see our website (https://history.illinois.edu/academics/graduate-studies-illinois/).

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Facilities and Resources
The extraordinary University Library is the department's main research facility; within it, the History, Philosophy & Newspaper Library, the Rare Book Room, and the area studies libraries (Slavic, Africana, Latin American, Asian Libraries) all serve faculty and students with expert bibliographers and focused collections. Among other special collections much used by historians are Afro-Americana and Women's Studies; the library is also a major repository for government documents.

Financial Aid
Financial aid is almost always awarded on an academic-year basis. Applications by incoming students are considered with financial aid applications. All fellowships and assistantships include a stipend plus tuition and service fee waiver.

Both University and department endowment fellowships are available to entering students and to advanced doctoral students embarked on their research or the writing of their dissertations. Foreign Language and Area Studies (FLAS) Fellowships may support first- and second-year students who have special interests in foreign area studies. Entering students from underrepresented groups may be awarded a three-year Graduate College Fellowship. The Illinois Consortium for Educational Opportunity Program (ICEOP) offers renewable fellowships to underrepresented minority students who are Illinois residents and plan academic careers within the state. Half-time teaching assistantships are the department's primary form of financial aid for graduate students in the Ph.D. program. Students who progress satisfactorily toward their degrees and demonstrate effective teaching will have their teaching assistantships renewed for a second, and usually a third, year.

for the degree of Doctor of Philosophy in History

In certain circumstances, a student in British history may substitute courses in quantitative skills for the second language. For the preliminary examination, the candidate customarily offers three fields in history - one major and two minor fields. At least one of these must be a "geographical/chronological field" and one must be a "comparative/thematic" field. One must involve a period of time before 1815. At least two geographical areas must also be represented by the fields offered for the examination. One of the three fields may be in a specialization outside the Department of History or may be a "constructed" field specially designed by the candidate in consultation with field examiners and the major advisor.

For additional details and requirements refer to the department's graduate degree requirements (https://history.illinois.edu/academics/graduate-studies-and-admissions/prospective-students/degree-requirements-phd/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Entering with approved M.S./M.A. degree

Code	Title	Hours
HIST 598 (2 hours per term) is required of candidates who hold teaching assistantships during each semester they hold an appointment; students with research assistantships may enroll for HIST 596 for 2 hours credit per semester during the assistantship.		
HIST 593 & HIST 594	Approaches to History and Intro Historical Writing	8
Research seminars (or HIST 596), under the direction of at least two faculty members (may be reduced by one four-hour course at the discretion of the advisor)		8
Three additional courses at the 500 level		12

HIST 591	History and Social Theory	4
HIST 597	Reading Course (Oral History)	4
Another methods course in consultation with the Director of Graduate Studies		
To fulfill the minimum requirement of 64 or 96 graduate hours, 16 graduate hours in disciplines other than history may be applied.		0-16
Language Requirement: The department requires proven competence in two foreign languages for the Ph.D. degree, except for students of US History who must demonstrate competence in one foreign language. Language competence means the ability to read and comprehend a foreign language well enough to paraphrase a scholarly article in English. Students admitted into the Ph.D. program are expected to demonstrate competence in the second language within four semesters and always before they take their last prelim exam. A major advisor may require a student to acquire a reading knowledge of more than two languages, or more than one for US History students.		
HIST 599	Thesis Research (32 max applied toward degree)	32
Total Hours		**64**

for the degree of Doctor of Philosophy in History

1. **Field expertise:** broad, deep, and critical knowledge of key areas of chosen study, in both selected chronological-geographic fields and comparative thematic fields.
2. **Methodological knowledge:** understanding and mastery of disciplinary and interdisciplinary methods and concepts.
3. **Research, writing, and dissemination**: Experience and accomplishment in scholarly research based on primary sources, analytical writing, and presenting this work in print and oral presentation.
4. **Teaching:** Pedagogical training and experience.
5. **Professional development:** preparation for the diverse career expectations and possibilities in academia and varied institutions in the public and private sectors.

Human Development & Family Studies, MS

for the degree of Master of Science in Human Development & Family Studies

The HDFS doctoral program prepares students to be researchers and educators in the areas of positive development and resilience of diverse children, youth, and families in everyday life contexts, as well as policy developers, or professionals who develop, evaluate, and implement programs for children, families, and communities. Our doctoral concentration is interdisciplinary, drawing upon the canons of anthropology, economics, education, family studies, human development, psychology, and sociology. Further, we value qualitative, quantitative, and mixed methodologies. Students who enter the doctoral program without a master's will complete one as the first part of their doctoral requirements.

Admission

Admission is based upon both academic record and the applicant's fit with faculty research programs. We examine grade point average (GPA), letters of recommendation, writing sample, and a personal statement. GRE scores are optional. International applicants from non-English speaking countries must have an official paper Test of English as a Foreign Language (TOEFL) score of at least 103 on the internet based test. We will not admit anyone with a GPA less than 3.0 on a 4.0 scale. All applicants are required to have previous coursework in a relevant area of social or behavioral sciences. Test scores should be taken no more than two years prior to application. Our application deadline is December 15 for possible admission the following fall semester. We admit students for fall enrollment only. Please refer to our department website for further information.

Graduate Teaching Experience

We do not require our students to teach but recognize the importance of teacher development for their future marketability. Thus, we make teaching assistantships available and encourage students to pursue a variety of teaching experiences as well as mentorship from experienced instructors. We also encourage our students to utilize the variety of teacher training resources that are available across campus.

Faculty Research Interests

Faculty information is available on our department website (http://hdfs.illinois.edu/directory/faculty/).

Financial Aid

We are committed to funding all of our students who are making timely progress. The duration and amount of our commitment varies by program. Funding may include fellowships, research assistantships, and/or teaching assistantships. These opportunities typically include stipends and tuition waivers. In some cases, fees are also waived. All applicants are automatically considered for all department funding opportunities; there is no separate application process. Federal and state financial aid is completely separate from the support provided by our department. Visit the Office of Student Financial Aid (https://osfa.illinois.edu/) for information regarding federal and state financial aid.

HDFS Graduate Student Learning Outcomes

1. HDFS graduate students will demonstrate subject matter expertise, including theoretical and substantive expertise in a specialized area
   a. Recall key principles, theories, and concepts used in HDFS
   b. Apply key principles, theories, and concepts to the study of HDFS
   c. Critique current theories and empirical knowledge regarding HDFS
   d. Evaluate current knowledge in a specific substantive area using two distinct theories
   e. Identify knowledge gaps in a specific substantive area
   f. Pose questions to remedy said gap
2. HDFS graduate students will demonstrate social science methodology expertise
   a. Apply key principles, concepts and analytic strategies used in quantitative research
   b. Apply key principles, concepts and analytic strategies used in qualitative research
   c. Use data management and analysis software (e.g., SPSS, NVivo, MAXQDA; HLM, R)
   d. Evaluate the methodological strengths and limitations of empirical studies
   e. Design and defend a complete research project
   f. Complete an IRB application
   g. Complete an ethics certificate relevant to project
   h. Conduct a research project as per protocol and ethical standards
3. HDFS graduate students will demonstrate professional competence skills
   a. Identify career and professional goals
   b. Develop leadership skills (e.g., through formal positions; informal mentoring of undergraduates or new graduate students; representing the department; participation in class or lab teamwork)
   c. Develop professional network to support career and professional goals (e.g., relationships with mentors; participation in professional organizations)
   d. Create and maintain a CV and other job-related materials (e.g., cover letter; teaching philosophy; research statement)
   e. Exhibit professional and ethical behavior
   f. Make decisions and solve problems
   g. Collaborate to achieve group goals
4. HDFS graduate students will demonstrate scholarly communication skills in English
   a. Use effective written communication
      i. Use appropriate grammar and writing mechanics
      ii. Demonstrate a working knowledge of APA style

iii. Respond to constructive criticism (e.g., revision process, peer review)
iv. Produce written work that is organized, logical, and fully developed

b. Use effective oral communication
i. Clearly and logically present ideas aloud through presentation to class or group

c. Use effective visual communication
i. Use clear and logical charts, graphs, and other visual displays to present ideas

5. HDFS graduate students will demonstrate a critical and reflexive orientation toward and sensitivity to issues of diversity and inclusion
a. Critically examine one's own beliefs, assumptions, values, attitudes, and biases regarding diverse individuals and families
b. Reflect on one's own interconnected positions, privileges, and disadvantages across multiple contexts
c. Demonstrate awareness of and sensitivity to issues of diversity and inclusion in one's own work (written, oral, and visual communication)

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)
ACES College Admissions & Requirements (https://hdfs.illinois.edu/graduate/admissions/)

Human Resources & Industrial Relations, MHRIR

for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations (on campus & online)

The master's program can lead to a professional master's degree, or it can prepare students to continue their graduate study toward a Ph.D. or other doctoral degrees in law and other professional areas.

The master's degree requires 48 graduate hours of courses and usually takes three semesters to complete in the on-campus program and two years in the online program. The master's degree program has core requirements in human resources/industrial relations systems, and quantitative methods, and four subject distribution requirements.

The School of Labor and Employment Relations offers graduate work leading to both a master's and a doctoral degree. Graduate study in Human Resources and Industrial Relations (HRIR) is based on a multidisciplinary approach to human resources/industrial relations problems and a flexible curriculum. To achieve this, the School has joint faculty appointments or course cross-listings with economics, psychology, law, business administration, and history.

Admission

For the Master of Human Resources and Industrial Relations (MHRIR), students must meet the general admission requirements of the Graduate College, as well as the specific requirements of the School. Admission to the master's program in either the fall or spring semester is based on an applicant's undergraduate record, letters of reference, a resume, a personal statement and an academic statement. The minimum requirements for admission are a course in statistics and an average grade of B in the last two years of a four year undergraduate program. GRE/GMAT test scores are optional for both the on-campus and online programs. A deficiency in statistics may be made up by taking the required course without graduate credit during the first semester of graduate study. International applicants must meet the English Language Proficiency Requirements (https://grad.illinois.edu/admissions/instructions/04c/) as outlined by the Graduate College. It is recommended that applicants meet a minimum score of 96 on the internet-based TOEFL exam (iBT) or a 6.5 overall score on the IELTS Academic Exam.

Students applying to the online program will have the same admissions criteria as the on-campus MHRIR program, with the exception of the English Proficiency Requirements. Students applying to online programs must satisfy the full status admissions requirement for the English Proficiency Requirements. For full status, applicants meet a minimum score of 103 on the internet-based TOEFL exam (iBT) or a 7.5 overall score on the IELTS Academic Exam. Admission decisions for the online program are made in all semesters (Fall, Spring, and Summer).

Financial Aid

The School offers scholarships, and fellowships to graduate students with superior academic credentials in the on-campus MHRIR. Department research and teaching assistantships are available to Ph.D. students only. The Graduate College also has fellowships that carry stipends plus tuition and service fee waivers.

The online program is self-supporting and DOES NOT accept the following tuition and fee waivers (TFWs): Non-Academic waivers (including Illinois employees and employees of other state institutions), Academic waivers from Illinois, UIC and UIS employees, Related Agency waivers, waivers granted through fellowships/assistantships as governed by the Graduate College at Illinois, or Retiree waivers. This program DOES accept statutory waivers (veteran grants, etc.).

for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations (on campus & online)

For additional details and requirements refer to the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

This degree program can be completed either on campus or online. The non-thesis option is offered online, the requirements are listed below:

Thesis Option

Code	Title	Hours
LER 591	Employment Relations Systems	8

for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations (on campus & online)

The purpose of the MHRIR program is to educate students on the major areas of knowledge and to develop essential skill sets, both of which are crucial for becoming effective Human Resource Professionals in organizations. Upon successful completion of our 48-hour master's program, students will achieve the following intended learning outcomes.

1. **Gain fundamental knowledge of human resource management (HRM) and organizational behavior.**
2. **Develop intellectual reasoning and data-analytic skills to assess and solve problems in HRM and labor and employment relations.**
3. **Develop communication and negotiation skills.**
4. **Gain fundamental knowledge of the core principles and practices of labor management relations.**
5. **Gain foundational knowledge to understand labor economics and labor markets.**
6. **Develop an orientation toward an evidence-based approach to human resource management and labor and employment relations.**

Human Resources & Industrial Relations: Human Resources Data Analytics, MHRIR

for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations, Human Resources Data Analytics concentration

The Human Resources Data Analytics concentration is an optional program within the Masters in Human Resources and Industrial Relations (MHRIR) at Illinois. The purpose of this program is to equip students with knowledge and hands-on skills to conduct, understand, and communicate advanced analyses with HR Data. This expertise will better equip MHRIR graduates for the information economy and data revolution in HR practice, leveraging people-focused analytics to make better HR decisions for hiring, training, compensation, retention, and labor relations. Available courses cover topics like advanced prediction/regression models, applied measurement, spreadsheets, data visualization and presentation, machine learning/AI, workforce planning, and firm performance/finance for HR.

for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations, Human Resources Data Analytics concentration

Code	Title	Hours
Choose any three courses from the below list. 12 credit hours total.		
LER 510	HR Analytics: Methods & Data-Driven Prediction	4
LER 526	Machine Learning Applications in HR	4
LER 527	Applied HR Topics: Spreadsheet & Visualization Analysis	4
LER 568	Firm Performance and HR	4
Total Hours		**12**
A cumulative GPA of a 3.0 is required for the concentration courses.		
All students must complete the 48-hour degree requirements of the MHRIR curriculum. Concentration requirements will count as part of the 24-hour elective courework.		

for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations, Human Resources Data Analytics concentration

Upon completion of this concentration, students will be able to:

1. Demonstrate a practical understanding of key concepts in data analytics and advanced statistics. The concentration builds upon the statistical knowledge gained from the LER core required statistics course.
2. Use popular data analysis tools in the field of HR (e.g., Excel, R, Power BI) to visualize, summarize, and analyze organizational data.
3. Use findings from data analysis to better understand organizational phenomena, evaluate *HR initiatives, and inform HR decision making.
4. Effectively communicate data analysis and statistical findings to various organizational stakeholders.

for the degree of Master of Human Resources and Industrial Relations in Human Resources and Industrial Relations, Human Resources Data Analytics concentration

Human Resources & Industrial Relations, PhD

for the degree of Doctor of Philosophy in Human Resources and Industrial Relations

The Ph.D. is an in-residence, interdisciplinary degree, which typically leads to a career in teaching and research, especially at business schools or industrial relations schools. Research-oriented careers outside the academic world are also available. The program can be completed in six years beyond the baccalaureate degree or five years beyond the master's degree. Doctoral students are required to complete 96 graduate hours of credit beyond the baccalaureate degree. Coursework is usually completed in two years. There is a second year paper requirement, one examination that focuses on the candidate's selected area of specialization, and the preliminary and final exams. Examples of areas of specialization include the effects of technological change on the human resource function; motivation, morale, and job satisfaction; labor-management relations in the public sector; labor markets and employment; and international comparative labor problems. Each student's program of study is chosen in consultation with their advisor and the Ph.D. Advisory Committee at the School.

Graduate study in Human Resources and Industrial Relations (HRIR) is based on a multidisciplinary approach to human resources/industrial relations problems and a flexible curriculum. To achieve this, the School has joint faculty appointments or course cross-listings with economics, psychology, law, business administration, and history.

Admission

Students with outstanding academic credentials, with or without a master's degree, are encouraged to apply to the Ph.D. program. Students must meet the general admission requirements of the Graduate College, as well as the specific requirements of the School. Applicants to the doctoral program must submit an academic statement, personal statement, CV and submit evidence of research ability, such as a master's thesis, an undergraduate thesis, special reports, or published articles. Three letters of recommendation are required and the Ph.D. applicants are also required to submit either a GRE or GMAT general test score. International applicants must meet the English Language Proficiency Requirements (https://grad.illinois.edu/admissions/instructions/04c/) as outlined by the Graduate College. It is recommended that applicants meet a minimum score of 96 on the internet-based TOEFL exam (iBT) or a 6.5 overall score on the IELTS Academic Exam. Admission to the doctoral program is made for the fall semester only. An exception is made for current HRIR master's degree students at Illinois, who may submit an internal application in the spring.

Graduate Teaching Experience

Although the School has no teaching requirement, doctoral students are encouraged to gain teaching experience in this program.

Financial Aid

The School offers research assistantships, scholarships, and fellowships to graduate students with superior academic credentials in the Ph.D. programs. Department research and teaching assistantships are available to Ph.D. students only. A School research/teaching assistant receives a stipend plus waiver of resident or non-resident tuition and some fees (http://www.grad.illinois.edu/gradhandbook/). The Graduate College also has fellowships that carry stipends plus tuition and service fee waivers.

for the degree of Doctor of Philosophy in Human Resources and Industrial Relations

---

The purpose of the PhD in Human Resources and Industrial Relations is to train research competence (conducting and communicating research) and the writing of analytical papers of publishable quality. Toward this end, PhD courses and program milestones are designed to impart knowledge and skills that individuals may use to conduct world-class research, primarily in the academic subfields of Human Resources/Organizational Behavior, Industrial Relations, Economics, Psychology, and/or Sociology.

The following are intended student learning outcomes.

1. Develop skill in writing analytic papers of publishable quality, and publishing those papers.
2. Develop skill in publicly presenting analytical research of publishable quality.
3. Gain foundational knowledge in Human Resources Theory and Industrial Relations Theory.
4. Develop knowledge and skill in using statistics and research methods to conduct research and draw appropriate inferences.
5. Gain specialized knowledge in a social science discipline (e.g., economics, psychology, sociology).

Industrial Design, MDes

for the Master of Design in Industrial Design

Overview

The School of Art & Design and Industrial Design program are accepting applications for Fall 2026 admission to the MDes in Industrial Design.

The Industrial Design MDes program is a STEM-designated, professionally oriented graduate qualification that supports those intending to advance in the professional practice of Industrial Design. As a professionally focused graduate qualification, there are no funding opportunities available to students in this program.

Industrial Design is a human-centered design activity that determines the nature of products, services, and experiences produced by industry. This approach to design reconciles the needs of the user and the producer, combining desirability, viability, feasibility, and responsibility. Industrial Designers also champion the use of design thinking. This user-centered approach has broad application in many social and business contexts. Our definition of Industrial Design encompasses the design of products, interfaces, interactions, and user experiences.

The MDes program takes a broad view of professional design practice, embracing all aspects of human-centered design, including user interface and interaction design, with a primary focus on industrial and product design. The program involves a refined approach to design thinking and design practice, preparing graduates for work in varied sectors of activity. The program emphasizes project-based work, with an emphasis on hands-on creativity in both the physical and digital realms.

The MDes is suitable for students with undergraduate degrees in design. Mid-career designers, as well as those with degrees in Engineering or Business, will find that the degree and industry exposure the program offers will broaden their career options. Building on Illinois' long-standing MFA in Industrial Design, MDes students enroll in some of the same classes and studios as those in the MFA program. In contrast, other industry-focused studios are dedicated exclusively to MDes students. The program's location in the School of Art and Design facilitates connections with students and faculty from other programs within the School, as well as with colleagues and facilities across the university. These connections may include the Business, Medical, and Engineering Colleges, as well as the Siebel Center for Design.

Graduates of the program find employment in companies and consultancies, as well as in various roles that are now opening up for designers and design thinkers in business and community organizations. Design is now a global function in many organizations.

Individuals interested in pursuing a career in design who lack prior design education and/or relevant professional experience should consider the Graduate Certificate in Advanced Design Thinking (p. 2067). This certificate program provides an introduction to Design Thinking. It offers graduate credits that can be applied towards the MFA or MDES degree.

For additional details and requirements, refer to the department's graduate studies requirements and the Graduate College Handbook.

Admission

Applications are considered for Fall Semester admissions only. International applicants or applicants who are not native English speakers must meet the English Proficiency Requirements for Graduate Admission (https://grad.illinois.edu/admissions/application-instructions/additional-instructions-international-applicants/) for admission to the MFA in ID degree program.

Graduate Teaching Experience

No graduate teaching experience is available to students enrolled in the MDes in Industrial Design degree program.

for the Master of Design in Industrial Design

At the end of the program, you should demonstrate the following:

1. **INQUIRY AND INSIGHT:** The ability to select and use appropriate research and experimental methods, to access existing data or to generate new data, to analyze and draw insights, with a particular emphasis on user needs.
2. **IDEATION:** The ability to produce creative proposals to identified design opportunities, using design thinking, modelling, and prototyping strategies, with an appropriate integration of functional, technical, ergonomic and visual factors.

3. **IMPLEMENTATION:** The ability to select and use appropriate making and manufacturing processes with an understanding of the potential of new technologies, and the demands of sustainability.
4. **INFORMING:** The ability to use visual and verbal communication, to explain and persuade, as appropriate for different audiences.
5. **CONTEXTUALISATION:** The ability to locate your own activity within the multiple contexts of design practice, including the theoretical, professional, cultural, environmental and technological contexts.
6. **SELF DEVELOPMENT:** The ability to carry out independent learning and reflexive evaluation of your work, as well as to plan and implement action, effectively managing self and others.

Industrial Engineering, MS

for the degree of Master of Science in Industrial Engineering (on campus & online)

The Department of Industrial & Enterprise Systems Engineering offers both an MS with thesis and an MS non-thesis program. Students in the MS with thesis program are required to have a research advisor and applicants are encouraged to contact department faculty (https://ise.illinois.edu/directory/faculty.html) in their areas of interest to inquire about possible research and funding opportunities.

Opportunity exists for specializing in i) advanced analytics via the Advanced Analytics in Industrial & Enterprise Systems Engineering (p. 1995) optional graduate concentration and ii) computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research

Faculty research by ISE faculty is pursued in the following fields:

- computer-aided design
- data analytics
- optimization
- design systems
- manufacturing systems
- nondestructive testing and evaluation
- system dynamics and simulation
- control
- robotics
- real-time decision making
- reliability engineering
- financial engineering
- operations research
- management science
- biomechanics
- human factors
- supply chain logistics

Members of the ISE Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department's research laboratories website (https://ise.illinois.edu/research/labs/).

for the degree of Master of Science in Industrial Engineering (on campus & online)

The Department of Industrial and Enterprise Systems Engineering offers the non-thesis option in the Master of Science in Industrial Engineering in an online delivery format. Requirements mirror those for the on-campus non-thesis delivery format.

For additional details and requirements refer to the department's Graduate Programs website (http://ise.illinois.edu/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

This degree program can be completed with or without a thesis; either on campus or online, the requirements are listed below:

Thesis Option

Code	Title	Hours
IE 599	Thesis Research A maximum of 8 credit hours of IE 599 (or other approved thesis) may be counted toward the degree	8
IE 590	Seminar (registration for 0 hours every term while in residence)	0
500-level IE Courses		12
STEM course from outside of major STEM course must be approved and be from a College of Engineering department, including ABE and CHBE (or other approved department). Excludes TE and ENG courses.		4
Electives in consultation with advisor A maximum of 4 hours of IE 597 (or other approved independent study/project design) may be applied toward the elective coursework requirement.		8
Total Hours		**32**

Other Conditions and Requirements (may overlap)

Requirement	Description

Minimum GPA:	3.0

for the degree of Master of Science in Industrial Engineering (on campus & online)

Graduate-level students should be able to:

1. Apply theory and methodologies to areas of research that address areas within Industrial and Enterprise Systems Engineering.
2. Effectively relate and communicate their data findings to peers, faculty and possibly peer-reviewed journals.
3. Formulate and solve complex problems with ISE by applying appropriate techniques and tools.
4. Write and defend a thesis that is designed with scientifically accepted methods and can be applied to improve a design or other real-world issue.
5. Teach concepts critical to the discipline of Industrial and Enterprise Systems Engineering at the university level.

for the degree of Master of Science in Industrial Engineering (on campus & online)

Admission Requirements

Applicants who have completed degree requirements in an accredited engineering program or its equivalent are eligible to apply for admission. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required.

Based upon the previous preparation of the student for either program, prerequisite courses may be specified by the advisor, but the credit may not be applied toward a degree.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

Financial Aid

Qualified students may compete for financial assistance in the form of teaching/graduate/research assistantships, fellowships, grants, and tuition waiver scholarships. Under certain conditions, fellowships may be augmented by part-time assistantships.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the English Proficiency Interview (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) (EPI), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

for the degree of Master of Science in Industrial Engineering (on campus & online)

Admissions

Department of Industrial & Enterprise Systems Engineering Overview of Admissions & Requirements (https://ise.illinois.edu/graduate/admissions/)
Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Industrial Engineering, PhD

for the degree of Doctor of Philosophy in Industrial Engineering

The Department of Industrial & Enterprise Systems Engineering offers both a traditional doctoral program and a direct doctoral program. A Master's degree is not required for admission to the direct doctoral program. Students in both programs are required to have a research advisor and applicants are encouraged to contact department faculty (https://ise.illinois.edu/directory/faculty.html) in their areas of interest to inquire about possible research and funding opportunities.

Department Research

Faculty research by ISE faculty is pursued in the following fields:

- computer-aided design
- data analytics
- optimization
- design systems
- manufacturing systems
- nondestructive testing and evaluation
- system dynamics and simulation
- control
- robotics
- real-time decision making
- reliability engineering
- financial engineering
- operations research
- management science
- biomechanics
- human factors
- supply chain logistics

Members of the ISE Department have access to a wide range of excellent research facilities. These laboratories support a wide range of activity and are described at the department's research laboratories website (https://ise.illinois.edu/research/labs/).

The Department of Industrial and Enterprise Systems Engineering (ISE) offers graduate programs leading to degrees of Master of Science and Doctor of Philosophy in Industrial Engineering (IE) and Systems and Entrepreneurial Engineering (SEE), as well as (jointly with the Department of Finance) Master of Science in Financial Engineering. The ISE programs offers an approach to industrial engineering and systems engineering, engineering design, and entrepreneurial engineering that crosses disciplinary lines. The IE program is based in advanced studies that focus on operations research, optimization, supply chain management, financial engineering, quality and reliability engineering and production management, with the aim to advance modeling, simulation, analysis and decision making for complex engineering and economic systems. The SEE program is founded on the premise of dual competency in both traditional engineering and systems integration. The SEE program offers flexibility by permitting the student to select from a menu of advanced courses and take a wide range of electives to meet individual career goals. Graduates of these programs are prepared to enter academic and professional engineering positions in universities, industry, government, and private practice.

for the degree of Doctor of Philosophy in Industrial Engineering

For additional details and requirements refer to the department's Graduate Programs website (http://ise.illinois.edu/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Entering with approved M.S./M.A. degree

Code	Title	Hours
IE 599	Thesis Research A maximum of 32 credit hours of IE 599 (or other approved thesis) may be counted toward the degree	32
IE 590	Seminar (registration for 0 hours every term while in residence)	0
400/500-level IE Courses		20
STEM courses from outside of major STEM courses must be approved and be from a College of Engineering department, including ABE and CHBE (or other approved department). Excludes TE and ENG courses.		12
Total Hours		**64**

Other Requirements and Conditions (may overlap)

Requirement	Description
Minimum GPA:	3.25
Minimum 500-level credit hours applied toward the degree:	16
Independent study/project design courses do not count toward 500-level requirement.	
A maximum of 8 hours of IE 597 (or other approved independent study/project design) may be applied toward the elective course work requirement.	
Ph.D. exam and dissertation requirements:	
Qualifying exam	
Preliminary exam	
Final exam or dissertation defense	
Dissertation deposit	

Entering with approved B.S./B.A. degree

Code	Title	Hours
IE 599	Thesis Research A maximum of 40 credit hours of IE 599 (or other approved thesis) may be counted toward the degree	40

Dissertation deposit	

for the degree of Doctor of Philosophy in Industrial Engineering

---

Graduate-level students should be able to:

1. Apply theory and methodologies to areas of research that address areas within Industrial and Enterprise Systems Engineering.
2. Effectively relate and communicate their data findings to peers, faculty and possibly peer-reviewed journals.
3. Formulate and solve complex problems with ISE by applying appropriate techniques and tools.
4. Write and defend a thesis that is designed with scientifically accepted methods and can be applied to improve a design or other real-world issue.
5. Teach concepts critical to the discipline of Industrial and Enterprise Systems Engineering at the university level.

for the degree of Doctor of Philosophy in Industrial Engineering

Admission Requirements

Applicants who have completed degree requirements in an accredited engineering program or its equivalent are eligible to apply for admission. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required.

Scores on the Graduate Record Examination (GRE) (http://www.ets.org/) general test are recommended of all applicants. Based upon the previous preparation of the student for either program, prerequisite courses may be specified by the advisor, but the credit may not be applied toward a degree.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Qualified students may compete for financial assistance in the form of teaching/graduate/research assistantships, fellowships, grants, and tuition waiver scholarships. Under certain conditions, fellowships may be augmented by part-time assistantships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the English Proficiency Interview (http://cte.illinois.edu/testing/oral_eng/epi_overview.html) (EPI), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Informatics, PhD

for the degree of Doctor of Philosophy in Informatics

The Chair of the Governing Committee of Informatics
The Informatics Ph.D. Program will appoint a supervising committee to approve each student's program of study, which will be called the Advisory Committee (first half of studies) and then the Dissertation Committee (second half of studies). The membership of these committees should remain constant for each half of the student's studies, except in unusual circumstances, but may change when it is constituted for the dissertation. In any case, changes to the supervising committees must be approved by the Chair of the Informatics Ph.D. Governing Committee. The supervising committee must contain faculty with expertise in both the Applications area and the Foundations area chosen by the student, including at least four faculty members affiliated with the Informatics Program. The supervising committee will provide each student with a review of his or her progress in the spring of each academic year.

Admission
The admissions process will consist of a formal application specifying experiences, courses, interests, and letters of recommendation. The Informatics PhD Program will admit graduate students who are approved by the Governing committee in conjunction with representatives of the Areas. With the approval of the appropriate committees, students may be admitted to the program with only a Bachelor's degree. They will work with their Advisory Committee to define appropriate courses to fulfill the 32 hours of Masters-level work. If they wish to receive a Masters degree, they will need to apply to a relevant department and meet the department's existing Masters degree requirements. If they already hold a Masters degree approved by the Informatics Ph.D. Governing Committee, they will receive graduate credit for 32 hours. All applicants whose native language is not English must provide evidence of English proficiency as required by the Graduate College for admission (https://grad.illinois.edu/admissions/instructions/04c/).

Financial Aid
Fellowships, research assistantships, and teaching assistantships (all of which include tuition and partial fee waivers) are awarded on a competitive basis. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT, or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP (conditional pass) must be earned on the English Proficiency Interview test offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching conducted prior to the start of the semester.

for the degree of Doctor of Philosophy in Informatics

1. Students will acquire broad and deep knowledge of informatics including both foundation and application areas. Students are expected to become experts in their specialties, but also be knowledgeable about basic principles across the informatics domain.
2. Students will demonstrate the ability to conduct informatics research in their area of specialty through developing an original piece of scholarship.
3. Students will demonstrate skills in oral and written communication sufficient to publish and present work in their field and to prepare grant proposals.
4. Students will interact with people from diverse backgrounds as both leaders and team members with integrity and professionalism.
5. Students will be aware of ethical issues regarding research including the use of human subjects (if appropriate), research misconduct, and publication practice.

Information Management, MS

for the degree of Master of Science in Information Management (on-campus & online)

Information Management, MS online is not currently accepting applications; suspension of admissions effective Spring 2022.

The Master of Science (MS) in Information Management prepares students for professional roles in the design and management of information systems and services in organizations in a range of sectors. Areas of specialization include data science and analytics; knowledge management and information consulting.

Please visit our **MS in Information Management (https://ischool.illinois.edu/degrees-programs/graduate/ms-information-management/)** page for program and specific admissions information.

Admission

The general admission requirements of the Graduate College (https://grad.illinois.edu/admissions/apply/requirements/) apply. In addition to the Graduate College requirements, visit our page **MSIM admission requirements (https://ischool.illinois.edu/degrees-programs/graduate/ms-information-management/apply/)** for program specific information.

for the degree of Master of Science in Information Management (on campus & online)

Information Management, MS online is not currently accepting applications; suspension of admissions effective Spring 2022.

Minimum GPA:	2.75

for the degree of Master of Science in Information Management (on campus & online)

Upon completion of the MSIM program, students will be able to:

1. Manage information using best practices in management and policy; knowledge representation; human-centered design and systems; and data analytics.
2. Define and successfully address a tractable research question or real world problem in information management using the appropriate scientific and/or research methods.
3. Accurately convey the implications of analytical results (in both oral and written modalities) to diverse stakeholders.
4. Articulate and critique the range of values and of ethical standpoints within which complex sociotechnical design occurs.
5. Apply best practices for providing value, leadership, and team building.
6. Stay up-to-date by learning how to read, analyze, discuss, synthesize, and critique advances reported in the research literature.

Program and Admission Information

Applicants must meet general university requirements as well as those specified by the iSchool.

iSchool Website: MS in Information Management (https://ischool.illinois.edu/academics/graduate/ms-information-management/)
University of Illinois Urbana-Champaign - Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Information Sciences, PhD

for the degree of Doctor of Philosophy in Information Sciences

The Ph.D. program consists of the following components:

1. a history and foundations of IS seminar (4 graduate hours);
2. research methods (8 or more graduate hours);
3. electives (36 graduate hours);
4. field exam; and
5. thesis (32 or more graduate hours).

Thus, a minimum of 48 graduate hours of coursework plus 32 graduate hours of thesis credit are required.

The School of Information Sciences (iSchool) offers programs of study leading to the Master of Science (M.S.), the Certificate of Advanced Study (C.A.S), and the Doctor of Philosophy degrees. Three Master of Science (M.S.) degrees are available. The M.S. in Library and Information Science (L.I.S.) prepares students for professional careers in all types of information organizations, including libraries. The M.S. in Information Management (I.M.) will prepare the students for information-intensive professional roles in a broad range of sectors. The Library and Information Science concentration of the campus-wide M.S. in bioinformatics program emphasizes multidisciplinary skills that are required for a career developing and managing information systems for the biological sciences community. The C.A.S. program provides the opportunity

1. to study an aspect of information sciences in greater depth than is possible in the M.S. program,
2. to refresh and upgrade one's professional training several years after completing a M.S. program, or
3. to redirect one's career into a different area of library and information science.

School Librarian Licensure is available in conjunction with both the M.S. in L.I.S. and C.A.S. The Ph.D. is a research degree program.

Admission
The general admission requirements of the Graduate College apply. Consideration is also given to language study and computer skills, relevant work experience, letters of reference, and evidence of leadership. International students must score at least 620 on the paper-based Test of English as a Foreign Language (TOEFL) (260 on the computer-based test; 104 on the iBT version); or 7.5 on each section of the IELTS. The M.S. in bioinformatics requires a strong background in information science including undergraduate-level computing and mathematics. The C.A.S. requires a master's degree in library and information science and a grade point average of at least 3.0 (A = 4.0) in the master's program.

School Librarian Licensure
Candidates interested in the School Librarian Licensure program must first be admitted and enrolled as a degree-seeking student within the School of Information Sciences before their application to the School Librarian Licensure program is reviewed. Accepted students must successfully pass two Illinois State Board of Education testing requirements prior to registration for the final fieldwork experience.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in the Ph.D. program for those interested in faculty careers.

Facilities and Resources
Among the major areas of faculty research are:

- community informatics
- data analytics
- data curation
- digital humanities
- digital libraries
- history of information
- information retrieval
- organization of knowledge and information
- privacy, security, and trust

- ethics and values for information
- youth literature, culture, and services

The iSchool's Center for Informatics Research in Science and Scholarship (CIRSS) conducts research on information problems that impact scientific and scholarly inquiry. The Center for Children's Books (CCB) provides a review and research collection of the newest literature for children and young adults. The Communications Office produces two high-quality publications, Library Trends and The Bulletin of the Center for Children's Books. The staff of each of these units is available to students and faculty for consultation and guidance. A computer network with Internet connectivity is integral to teaching and learning activities. The University Library provides a vast reservoir of resources for all types of study and research in library and information science.

The School maintains an ongoing commitment to continuing education through conferences, institutes, workshops, and course offerings.

Financial Aid
Financial aid may be available from the iSchool, the University Library, and elsewhere in the University in the form of graduate assistantships, teaching assistantships, research assistantships, and hourly paid work. Area libraries may provide pre-professional or hourly positions. Also, the iSchool offers a limited number of fellowships for which doctoral students tend to be favored over C.A.S. and master's degree students. Students in the joint program that do not hold a FLAS fellowship are eligible for, but not guaranteed, fellowship or assistantship support in the semesters in which they are enrolled in the iSchool. Any assistantship awarded to these students provides a waiver of the base in-state tuition and service fee as well as a stipend. Non-Illinois residents must pay the difference between in- and out-of-state tuition.

for the degree of Doctor of Philosophy Major in Information Science

for the degree of Doctor of Philosophy Major in Information Science

1. Global Information Consciousness
   a. **Definition:** The iSchool's PhD students will discover how complex, interdependent global systems— including informational, social, and technical —affect and are affected by the characteristics and behavior of individuals, communities, and institutions.
2. Intellectual Reasoning and Knowledge
   a. **Definition:** The iSchool's PhD students will acquire broad and deep expertise, including knowledge and skills, across subfields of information science. This includes the ability to engage with, plan, and conduct interdisciplinary research.
3. Creative Inquiry and Discovery
   a. **Definition:** The iSchool's PhD students will apply their knowledge and skills to promote inquiry, discover solutions, generate new ideas, and communicate their research. This includes conducting independent and exemplary research, presenting their work in public settings, and publishing their work in peer-reviewed venue.
4. Social and Cultural Awareness and Understanding
   a. **Definition:** The iSchool's PhD students will develop a critical and reflective orientation toward such social and cultural differences as race, indigeneity, gender, class, sexuality, language, and disability. This includes the ability to conduct ethical and responsible research.
5. Effective Leadership and Community Engagement
   a. **Definition:** The iSchool's PhD students will build and sustain productive relationships to respond to information-centric, civic and social challenges at local, national, and global levels, creating positive impact in their communities. This includes the ability to convey their knowledge to others, e.g., by teaching or TA courses or workshops, and through outreach and service activities.

Integrative Biology, MS

for the degree of Master of Science in Integrative Biology

The Master of Science in Integrative Biology (MS in IB) provides students with a non-thesis, course-based degree program opportunity focused on interdisciplinary training for 21st-century scientific roles. Students explore how scales of life interact, from molecules through global cycles, to solve grand challenges such as addressing global change, improving human health, mitigating biodiversity loss, and contributing to ecosystem restoration and sustainable food and biofuel production. Students in the MS program have the ability to enhance their skill sets within IB upper-level courses through our world-class educational experiences, without having to invest in a required and timely research component for the degree. Students will thus be able to graduate in one year with a advanced degree making them more competitive for employment and future research opportunities.

This program primarily serves students who are in a gap year between undergraduate programs and either employment or future graduate-level programs. With the ability to hone skills in critical thinking, communication, laboratory practices, and scientific knowledge this program affords students the ability to make effective use out of such a year. The MS in IB program offers advanced coursework in fields such as organismal biology, behavioral ecology, anatomy and physiology, environmental science, bioinformatics, pathology, genomics, and mathematical modeling. These multi-disciplinary courses are grounded in active learning and highly transferable, higher-order processing skills such as application, interpretation, and evaluation. Students build laboratory skills spanning from tall grass prairie restoration to modern genome-editing techniques. Graduates are well-equipped for a broad range of careers in fields including healthcare, biotechnology, genetic counseling, wildlife management, and environmental sciences.

For additional details and requirements refer to the MS in IB (https://sib.illinois.edu/academics/graduate-programs/master-science-programs/master-science-integrative-biology/) program page and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

for the degree of Master of Science in Integrative Biology

The MS in IB program degree requires a minimum of two full-time semesters. Students may take up to two years to complete their degree.

Code	Title	Hours
Required Course List		
IB 592	Career and Skill Development in Integrative Biology	2
Core Curriculum		**12**
Select from the following three Areas. At least one course must be a lab and the courses must be in at least two different Areas.		
Area I: Organismal and Evolutionary Biology		
IB 401	Introduction to Entomology (lab)	
IB 407	Plant Diversity and Evolution (lab)	
IB 461	Ornithology (lab)	
IB 462	Mammalogy (lab)	
IB 463	Ichthyology (lab)	
IB 464	Herpetology (lab)	
IB 467	Principles of Systematics (lab)	
IB 468	Insect Classification and Evol (lab)	
IB 471	Fungal Diversity and Ecology (lab)	
Area II: Behavior, Ecology and the Environment		
IB 405	Evolution of Traits and Genomes	
IB 430	Animal Behavior Lab (lab)	
IB 431	Behavioral Ecology	
IB 432	Genes and Behavior	
IB 439	Biogeography	
IB 440	Plants and Global Change	
IB 444	Insect Ecology (lab)	
IB 451	Conservation Biology (lab)	
IB 452	Ecosystem Ecology	
IB 453	Community Ecology	

IB 455	Ecotoxicology and Human Health
IB 481	Vector-borne Diseases (lab)
IB 482	Insect Pest Management (lab)
IB 494	Theoretical Biology + Models (lab)
Area III: Integrative anatomy, Physiology and Molecular Biology	
IB 411	Bioinspiration
IB 420	Plant Physiology
IB 421	Photosynthesis
IB 426	Env and Evol Physl of Animals
IB 433	Insect Physiology
IB 435	Critical Evaluation of Herbal Remedies
IB 438	How Organisms Move (lab)
IB 460	Evol of Intelligent Systems (lab)
IB 465	Methods in Molecular Genetics and Genomics
Additional electives selected from the following list to meet the 32-hour minimum.	
Courses from the any of the Areas above that did not fulfill another requirement may also count toward elective credit.	
IB 416	Population Genetics
IB 436	Evolutionary Neuroscience
IB 442	Evolution of Infectious Disease
IB 454	Science Writing & Presentation
IB 476	Environmental Remote Sensing
IB 478	Advanced Plant Genetics
IB 479	Plant Growth and Development
IB 484	Paleoclimatology
IB 496	Special Courses
IB 497	Science Communication
IB 499	Discussions in Integrative Biology
IB 501	Programming for Genomics
IB 502	Biological Networks
IB 504	Genomic Analysis of Insects
IB 505	Bioinformatics & Systems Biol
IB 506	Applied Bioinformatics
IB 512	Plant Metabolomics
IB 513	Plant Science Seminar
IB 516	Ecosystem Biogeochemistry
IB 517	Analysis of Biological Data in R
IB 524	Plant Biochemistry
IB 526	Seminar in Entomology
IB 531	Emerging Infectious Diseases
IB 533	Human Genome & Bioinformatics
IB 534	Evolution and Medicine
IB 542	Environmental Plant Physiology
IB 546	Topics in Ecology & Evolution
IB 590	Individual Topics
Total Hours Required	**32**

Other Requirements:

Requirement	Description
Minimum GPA	3.0
Maximum hours of IB 590 allowed to count toward the MS in IB degree	6
Minimum hours at the 500-level within the unit	12

for the degree of Master of Science in Integrative Biology

1. Synthesize and apply core knowledge in interdisciplinary biological fields including anatomy, biochemistry, development, ecology, evolution, genetics, molecular biology, physiology, and/or systematics.
2. Apply predictive models to biological phenomena and engage with the process of scientific inquiry.
3. Critically evaluate and communicate complex, dynamic scientific information.
4. Employ curiosity, inquiry, quantitative reasoning, and critical thinking in problem solving.
5. Show leadership in using interdisciplinary strategies to solve global and local biological challenges.
6. Develop professional skills including ethics, proficiency in scientific writing and speaking, collaboration, and effective communication.

Italian, MA

for the degree of Master of Arts in Italian

MA students complete a course of study equivalent to the Italian laurea magistrale. The goal of the MA in Italian is to provide a linguistic, cultural, and critical foundation for specialized work in Italian Studies. Those who are interested in teaching Italian as a second language or in having the cultural competence to work in everything Italian should consider the MA either as a coronation of their learning experience or as a stepping stone for their future careers.

For Italy, globalization as a modern process is neither the beginning nor the end of the story. Italy has always been situated in a complex space, often best understood transnationally, post-nationally, and in a variety of cosmopolitan contexts, from Europe to the Mediterranean.

The graduate program in Italian Studies is committed to the interdisciplinary study of Italian literature and culture. Our faculty work on areas ranging from literature and cinema to medieval and early modern culture to history and critical theory. Recent and current graduate students working in Italian have written on topics ranging from the literature of extracomunitari in Italy, Dante's body in the context of pilgrimage texts, the acquisition of verb morphology, to postmodernism and detective fiction. Prospective graduate students should know that they will receive a training appropriate for an ever-more interdisciplinary profession, and that they will have the resources of a major university, ranging from the European Union Center to the largest public university library in the world, containing world-famous Dante, Tasso, and Italian Renaissance Plays collections.

In order to encourage innovative work that crosses disciplinary boundaries, the graduate program in Italian Studies requires students to pass exams on not only their dissertation topic and period, as well as a contiguous period, but also an outside field or chronological period. As a result, we strongly encourage students — while acquiring a solid foundation in Italian culture — to work outside the program during their stay here, particularly in those programs that offer graduate minors and certificates, such as the Unit for Criticism & Interpretive Theory, the Unit for Cinema Studies, the Medieval Studies Program and the program in Gender & Women's Studies. Italian at UIUC also has a strong connection with the Program in Comparative Literature, and the department of French and Italian encourages all graduate students to explore the many opportunities of collaboration within the Francophone and Italophone areas.

for the degree of Master of Arts in Italian

Areas of specialization offered in Italian are Italian literature and cultural studies and Italian linguistics. The M.A. in Italian requires a minimum of 32 graduate hours. Students must also successfully complete exams in four areas of Italian literature/cultural studies or three areas of Italian linguistics, chosen in consultation with their advisor.

For additional details and requirements refer to the department's guidelines for graduate students and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Requirement	Description
Other Requirements may overlap	
ITAL 505 is required of all teaching assistants	
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

for the degree of Master of Arts in Italian

1. **Language:** strong command of spoken and written Italian in all its registers; strong command of academic English, particularly in writing, but also spoken; ability to summarize and explain major issues in language teaching and learning.
2. **Critical Theory:** can outline major fields of theoretical inquiry current in the discipline, such as marxism, psychoanalysis, post-structuralism, feminism / queer studies, post-colonialism, biopolitics, environmental humanities and ecocriticism, and others. Ability to identify current trends and issues in critical theory of interest to the field, as well as the beginning capacity to critically evaluate different theoretical approaches.
3. **Italian Studies:** demonstrates an ability to outline the field of Italian Studies, summarize the major issues of concern within the field, and evaluate some approaches to those issues.

4. **Teaching:** ability to teach Italian language at the beginning and intermediate levels; to create and critically evaluate syllabi, exams, written assignments, and lectures. Ability to identify and assess successful classroom strategies; familiarity with current trends in pedagogy for literature and culture.
5. **The Profession:** awareness and development of professional skills, including the ability to create seminar papers that can serve as raw material for future articles, give in-class presentations as a prelude to academic talks, and create book reviews and fellowship applications.

Italian, PhD

for the degree of Doctor of Philosophy in Italian

PhD students train to become researchers in the field of Italian Studies, Mediterranean Studies and a variety of related fields. After two years of coursework to complete and refine their research projects, doctoral students conduct original research and prepare for a professional life in the academic or in fields that require specialized and developed research skills (NGOs, Think tanks, government agencies, etcetera).

For Italy, globalization as a modern process is neither the beginning nor the end of the story. Italy has always been situated in a complex space, often best understood transnationally, post-nationally, and in a variety of cosmopolitan contexts, from Europe to the Mediterranean.

The graduate program in Italian Studies is committed to the interdisciplinary study of Italian literature and culture. Our faculty work on areas ranging from literature and cinema to medieval and early modern culture to history and critical theory. Recent and current graduate students working in Italian have written on topics ranging from the literature of *extracomunitari* in Italy, Dante's body in the context of pilgrimage texts, the acquisition of verb morphology, to postmodernism and detective fiction. Prospective graduate students should know that they will receive a training appropriate for an ever-more interdisciplinary profession, and that they will have the resources of a major university, ranging from the European Union Center to the largest public university library in the world, containing world-famous Dante, Tasso, and Italian Renaissance Plays collections.

In order to encourage innovative work that crosses disciplinary boundaries, the graduate program in Italian Studies requires students to pass exams on not only their dissertation topic and period, as well as a contiguous period, but also an outside field or chronological period. As a result, we strongly encourage students, while acquiring a solid foundation in Italian culture, to work outside the program during their stay here, particularly in those programs that offer graduate minors and certificates, such as the Unit for Criticism & Interpretive Theory, the Unit for Cinema Studies, the Medieval Studies Program and the program in Gender & Women's Studies. Italian at Illinois also has a strong connection with the Program in Comparative Literature, and the department of French and Italian encourages all graduate students to explore the many opportunities of collaboration within the Francophone and Italophone areas. Doctoral students in Italian are eligible to pursue a Certificate in Second Language Acquisition and Teacher Education (SLATE).

We recognize that financial support is a crucial aspect of a graduate career, and we are committed to providing our continuing students with fellowships and teaching opportunities. All of our graduate students in Italian have received Graduate Teaching Assistantships, which include tuition and partial fee waivers. Before completing their degrees, our students have the opportunity to teach in their content area, in addition to language courses.

for the degree of Doctor of Philosophy in Italian

Areas of specialization offered in Italian are literary and cultural studies, Italian linguistics, and Romance linguistics.

Journalism, MS

for the degree of Master of Science in Journalism

The Master of Science (MS) in Journalism prepares students for professional roles in a wide variety of organizations, from online, print and broadcast news outlets to nonprofit, higher education and government communication offices where journalistic skills are highly valued. The course work includes reporting, writing, multimedia and emerging media skills and completion of a professional project. Students may opt to specialize in science and technology journalism and/or data journalism via certificates.

The program is designed to meet the educational goals of:

1. students who have recently earned a bachelor's degree in Journalism or a related field and want to explore a specific type of journalism in greater depth,
2. mid-career journalists and other professional communicators who want to expand their professional skills, and
3. students with a background in science, technology, engineering and math seeking to complement their expertise with journalistic skills for communicating it to the public.

This program is professional in nature and not intended for students interested in graduate study leading to the PhD. Students interested in pursuing a doctorate may want to consider applying to the PhD in Communications and Media offered in the Institute of Communications Research.

Admission

The M.S. program places a strong emphasis on journalism, and candidates who are accepted are most often those with a demonstrated interest in practicing journalism. It is imperative that all applicants supply writing samples.

Applicants to the M.S. program must have a 4-year bachelor's degree from an accredited U.S. institution or one of recognized standing abroad. A grade point average of 3.0 (A = 4.0) is the minimum requirement for admission to the Graduate College, with exceptions by petition only. Because the master's program has an enrollment ceiling, some applicants with grade point averages of 3.0 or higher may not be admitted. Ordinarily, students are admitted to begin graduate study in the fall semester.

Letters of recommendation are required for application. An interview with the head of the department or director of graduate studies is helpful but not required. Students whose native language is not English must present their official scores on the Test of English as a Foreign Language (TOEFL) examination as part of their applications. The department follows the Graduate College's recommendations for English proficiency. Detailed information about admissions and financial aid can be found on the department's website (https://media.illinois.edu/journalism/degrees-programs/masters/).

Financial Aid

Fellowships are available only for select M.S. students. Fellowships are awarded on a quarter-time basis and carry a waiver of tuition and most fees. A limited number of merit-based scholarships are available for M.S. students.

View all College of Media undergraduate (p. 2300) and graduate (p. 2300) degree programs.

for the degree of Master of Science in Journalism

The Director of Graduate Studies must approve any non-Journalism courses chosen as electives to meet the requirements below. For additional details and requirements, refer to the department and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Master of Science in Journalism

Code	Title	Hours
JOUR 505	Journalism Proseminar	4
JOUR 515	Master's Project	4

Minimum 500-level Hours Required Overall:	16
Minimum GPA:	3.0

for the degree of Master of Science in Journalism

1. Knowledge of principles of journalism and its history and trends.
2. Expertise in news gathering through documents and data, interviews, and field observation.
3. Expertise in one of the major presentations methods in journalism, choosing among text, audio or video presentation, with an understanding of all of these presentation methods include the use of mobile devices.
4. An understanding of professional journalism, including its changing business models, job descriptions and increasing cross-disciplinary collaborations.
5. An understanding of various qualitative and quantitative methods in data journalism.

Kinesiology, MS

for the degree of Master of Science in Kinesiology

Major areas of specialization at both the master's and doctoral degree levels include:

- Cultural, Interpretive and Science Studies
- Exercise Physiology
- Exercise Psychology
- Motor Control / Biomechanics
- Pedagogy & Physical Activity

Admissions

Students may apply to either the M.S. or the PhD program. Applications are due on **January 15** for Fall admissions. Applications are due on **October 1** for Spring admissions.

Admissions to the M.S. degree program requires a baccalaureate degree from an accredited institution of higher education, a minimum grade point average of 3.0 (A = 4.0) for the last two years of undergraduate study and any graduate work completed.

All applicants are required to submit three letters of recommendation, resume, official transcripts and a personal statement that addresses the following prompts:

- What developed your interest for graduate study.
- Who, from the designated faculty, would you like to work with.
- Why do you believe you would be a good fit with aforementioned faculty.
- What do you expect to gain from a graduate experience and how will this experience prepare you for your intended career.

Although the GRE scores are not required, the scores may provide helpful supporting information in some cases. Applicants who have taken the GRE and feel their scores would benefit their application are encouraged to submit the scores. If you would like to submit scores, we recommend you scan your official score report as a PDF file and attach it to your application. You do not need to submit official scores through ETS, but if you decide to, please use our University code of 1836.

- International and some domestic students may be required to show proof of English Proficiency (https://grad.illinois.edu/admissions/instructions/04c/).
- Students for whom English is not their native language and who wish to be considered for a teaching assistantship must achieve a score on the speaking sub-section of (TOEFL or IELTS) (https://grad.illinois.edu/admissions/taengprof.htm).

for the degree of Master of Science in Kinesiology

It is possible for a full-time student to complete this degree program in one academic year plus one summer session.

For additional details and requirements refer to the department's graduate programs (http://www.kch.illinois.edu/kines-grad-overview/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Minimum Hours Overall Required Within the Unit:	20 (not including 599)
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

for the degree of Master of Science in Kinesiology

1. **Content Knowledge:** Students will demonstrate an advanced understanding of current and historically significant theories, models, themes, and ideas in the biomechanical, physiological, psychological, behavioral, pedagogical, biological, socioeconomic, and sociocultural correlates of Kinesiology.
2. **Critical Thinking and Discovery:** Students will demonstrate ethical practices while applying advanced quantitative and/or qualitative methods in collecting, analyzing, and interpreting data which will then be disseminated through publications and/or oral presentations.
3. **Awareness and Understanding:** Students will understand and appreciate the diverse biological, psychological, socioeconomic, sociocultural, philosophical, and historical factors that influence health, physical activity, rehabilitation, and human movement.
4. **Programming and Assessment:** Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, physical activity adoption and adherence, and the prevention and treatment of diseases in culturally diverse populations.
5. **Leadership and Engagement:** Students will demonstrate leadership and effective communication skills, showcasing an appreciation and commitment to health and physical activity as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

Kinesiology, PhD

for the degree of Doctor of Philosophy in Kinesiology

Admissions

Students may apply to either the M.S. or the PhD program. Applications are due on **January 15** for Fall admissions. Applications are due on **October 1** for Spring admissions.

Admission to the PhD degree program requires a minimum of a baccalaureate degree from an accredited institution of higher education with a minimum grade point average of 3.5 (A = 4.0) for the last two years of undergraduate study. Applicants who have a master's degree should have a grade point average of 3.5 for previous graduate-level work. All applicants are required to submit three letters of recommendation, resume, official transcripts and a personal statement that addresses the following prompts:

- What developed your interest for graduate study.
- Who, from the designated faculty, would you like to work with.
- Why do you believe you would be a good fit with aforementioned faculty.
- What do you expect to gain from a graduate experience and how will this experience prepare you for your intended career.

Although the GRE scores are not required, the scores may provide helpful supporting information in some cases. Applicants who have taken the GRE and feel their scores would benefit their application are encouraged to submit the scores. If you would like to submit scores, we recommend you scan your official score report as a PDF file and attach it to your application. You do not need to submit official scores through ETS, but if you decide to, please use our University code of 1836.

- International and some domestic students may be required to show proof of English Proficiency (https://grad.illinois.edu/admissions/instructions/04c/).
- Students for whom English is not their native language and who wish to be considered for a teaching assistantship must achieve a score on the speaking sub-section of (TOEFL or IELTS). (https://grad.illinois.edu/admissions/taengprof.htm)

Major areas of specialization at both the master's and doctoral degree levels include:

- Cultural, Interpretive and Science Studies
- Exercise Physiology
- Exercise Psychology
- Motor Control / Biomechanics
- Pedagogy & Physical Activity

Landscape Architecture, MLA

for the degree of Master of Landscape Architecture in Landscape Architecture

The Department of Landscape Architecture offers the Master of Landscape Architecture (MLA) degree, the Master of Sustainable Urban Design degree (MSUD), and the PhD degree. The programs enable students to gain fresh insights and to conduct new research pertaining to land and its use by people. Courses and faculty research activities range from on-site to regional scales, and include environmental planning and design as well as community design, cultural heritage, and history.

In their final year of the program, MLA students may take one of two paths: advanced design studio sequence or thesis.

The MLA is an accredited first professional degree. Students may pursue specialized areas that reflect their interests and career aspirations. This may include ecological design, community design, and cultural heritage history and design. Joint MLA/MUP is available.

Admission

The Graduate College admission requirements apply. Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. MLA candidates from undergraduate design programs must submit portfolios with applications to the MLA program. Candidates without undergraduate preparation in landscape architecture will be admitted on limited status and must complete undergraduate prerequisite courses in addition to graduate work. All students must begin their studies in the fall semester.

Financial Aid

Students compete for fellowships, assistantships and tuition/service fee waivers. Some awards are determined during admissions review and students are informed through the acceptance letter. There are also some financial aid opportunities during the course of study (e.g., semester-long TA positions when available).

for the degree of Master of Landscape Architecture in Landscape Architecture

For additional details and requirements refer to the department's Graduate Handbook (http://www.landarch.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Post-Professional Master of Landscape Architecture
For students who have completed a BLA in an LAAB Accredited Program. Typically completed in 2 years.

for the degree of Master of Landscape Architecture in Landscape Architecture

---

Master of Landscape Architecture students will:

1. **Design Thinking.** Use a variety of processes to discover and frame opportunities, generate multiple possibilities, evaluate and refine ideas, rapidly prototype and test your proposal, and share your ideas in a compelling manner.
2. **Communicate with Skill.** Use a variety of digital tools to generate design proposals, test those proposals, and share your ideas with others.
3. **Tap into Existing Knowledge.** Incorporate our best understanding of natural resources, environmental systems, human development, social systems, professional practice and professional ethics into your work.
4. **Technical Competence.** Demonstrate the technical competence to translate design proposals into built work.
5. **Responsibility and Leadership.** Develop and demonstrate a sense of responsibility to the land and the people for whom we design.

Landscape Architecture, PhD

for the degree of Doctor of Philosophy in Landscape Architecture

The Department of Landscape Architecture offers the Master of Landscape Architecture (MLA) degree, the Master of Sustainable Urban Design degree (MSUD), and the PhD degree.

The programs enable students to gain fresh insights and to conduct new research pertaining to land and its use by people. The PhD program is jointly administered with the School of Architecture and emphasizes both interdisciplinary study and cross-disciplinary inquiry. Areas of concentration include history and theory; technology and environment; and behavioral and cultural factors in design. Before submitting an application, students should consult the department website for information regarding the specific areas of study and the time needed to complete the requirements.

Several faculty members in the department also participate in the doctoral program administered by the Department of Urban and Regional Planning. See the program description under Regional Planning, PhD (p. 1842) for more information.

Admission

The Graduate College admission requirements apply. Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. The doctoral program prefers candidates with master's degrees: MLA, MArch, or related fields such as art history, ecology, geography, or planning. All graduate students must begin their studies in the fall semester.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in the PhD program.

Financial Aid

Students compete for fellowships, tuition and service fee waivers, and assistantships. Selection is based on the academic achievement and qualifications of the student.

for the degree of Doctor of Philosophy in Landscape Architecture

For additional details and requirements refer to the department's Program Curriculum (http://www.landarch.illinois.edu/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

The requirements may vary slightly according to students' area of focus.

Students are required to defend their dissertation, Policies on format of the doctoral examination can be found in the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

96-hour program for students entering with a Baccalaureate Degree

Code	Title	Hours
All students are required to enroll in the PhD colloquium during the fall of their first year of course work.

for the degree of Doctor of Philosophy in Landscape Architecture

---

PhD students in the Department of Landscape Architecture will:

1. **Research Skills**. Develop and practice a variety of research skills. Students will design their research strategy; obtain and analyze evidence; develop evidence-based arguments; identify and evaluate the existing critical literature of the field; master languages in some cases, and in other cases master advanced computer programs.
2. **Communicate with Clarity.** Develop and demonstrate the ability to communicate complex and original ideas through clear writing supplemented by graphic representations and delivered as text (dissertation), speech (lecture presentations), and image (PowerPoint to accompany lectures). Doctoral students will gain an advanced level of written, visual, and technical literacy.
3. **Original Research.** Develop and carry out a major, original research investigation; develop it into an extended argument(the dissertation), the outcome of which might be a book, policy guidelines, a series of journal articles, or a patent.
4. **Design Research.** Use ideas and methods from design research to explore questions that advance knowledge that supports design.
5. **Pedagogy.** Demonstrate understanding of basic concepts about teaching and practice a range of instructional techniques in classrooms and studio contexts.

Latin American Studies, MA

for the degree of Master of Science in Latin American Studies

Including classroom and online courses in Quechua, the most spoken native language in the American continent.

Specializations in Latin American and Caribbean Studies are administered by the director of the Center for Latin American and Caribbean Studies.

Candidates for the master's degree who elect a specialization in Latin American and Caribbean Studies must complete 8 graduate hours from the courses prescribed by the center. Doctoral candidates who elect a specialization in this area must complete 16 graduate hours for one specialization or 8 graduate hours for a split specialization. Courses must be taken in at least two departments; a list of courses fulfilling the specialization is available from the center. A specialization in agricultural economics and foreign areas studies (in this case, Latin American and Caribbean Studies) is also available. A high level of proficiency in one or more languages of the region (Spanish, Portuguese, and Amerindian Indian languages) is required. For course information, requirements, and methods used to establish the level of proficiency, contact the center's academic programs coordinator.

Students in technical and professional colleges and schools of the University of Illinois Urbana-Champaign who seek knowledge of the Latin American and Caribbean region and languages are invited to consult with the director of the center or with their adviser in order to develop programs suited to their individual needs. Such a program may often be adopted as a specialization under existing regulations if the student so desires. These courses are of particular value to students who intend to undertake technical or professional work in the Latin American and Caribbean area for government, private business, publishing, or religious organizations.

Language Instruction

The Center offers 3 levels of Quechua, the most spoken language in the American continent, with approximately 13 million of speakers in 6 countries. The Center also offers Quechua online courses, free access to the publication Correo de Linguistica Andina, and free exercises on Quechua (https://clacs.illinois.edu/graduate/quechua/).

Other languages in the university that fulfill the M.A. requirements are Spanish and Portuguese, both offered at the School Literatures, Cultures, and Linguistics.

Faculty Research Interests

More than 100 faculty throughout the university are currently affiliated with the Center. The Center's faculty devote all or a portion of their teaching and research to Latin American subjects, from agriculture to politics, culture and linguistics. Their expertise spans every important discipline and sub-region of Latin America and the Caribbean, with particular strength in the Andean countries, the Caribbean, lowland South America, Mexico, and Brazil.

See a complete list of our affiliated faculty and their research (http://www.clacs.illinois.edu/about/people/faculty.aspx) and teaching interests.

Facilities and Resources

Latin American Library Collection (LALC)

The Center assist the Latin American Collection (http://www.library.illinois.edu/lat/) at the University Library in purchasing teaching and research materials to develop a strong collection that supports teaching and research in those programs sponsored and coordinated by the Center as well as interdisciplinary courses with Latin American subject matter offered by other departments.

The LACL collection ranks among the six largest in the country and is the largest collection in the Midwest region in purchasing teaching and research materials to develop a strong collection that supports teaching and research in those programs sponsored and coordinated by the Center as well as interdisciplinary courses with Latin American subject matter offered by other departments. It is located in the third floor of the main Illinois library in room 324 and while the Library itself does not house a circulating collection, our knowledgeable staff is available to help locate relevant materials, answer reference questions, and assist you in developing effective searching strategies.

The Latin American and Caribbean Library collection includes:

- More than 400,000 monograph titles;
- Newspapers and magazines from over 20 Latin American and Caribbean countries;
- A strong collection of journals in the humanities and social sciences, as well as publications of professional associations, government agencies, central banks, and non-governmental organizations;

- Access to HAPI Online (Hispanic American Periodicals Index), the Handbook of Latin American Studies (http://lcweb2.loc.gov/hlas/), and other online databases;
- An extensive collection of videos available at the Media Center in the Undergraduate Library;
- over 32,000 maps of Latin America (housed in the Map and Geography Library);
- comprehensive holdings of Brazilian and Andean materials;
- Extensive holdings by and about Gabriel Garcia Marquez;
- Publications from the Archivo General de la Nacion de Mexico; and
- A comprehensive Latin American music collection.

List-serv

The Center administers a listserv with more than 500 subscribers. Weekly mass messages "CALCS/Lemann Institute this Week" contain information on activities in campus related to Latin America and the Caribbean region (conferences, workshops, movies), new courses and job positions as well as future conferences in other Universities. To subscribe contact: Angelina Cotler (cotler@illinois.edu).

CLACS Brownbags

Every Thursday at Noon in Room 101 International Studies Building (910 S. Fifth Street in Champaign) CLACS presents a lecture offered by a faculty, graduate student or outside faculty on topics relevant to the region. These are open and free brownbag lectures. For complete list of presentations during the semester visit our website on the events section.

Opportunities and Events

The Center keeps updated a complete list of jobs, grants, conferences, and fellowships (http://www.clacs.illinois.edu/news/opportunities.aspx) in the U.S. and abroad for graduate students and faculty. Check it at **Outreach Program (http://www.clacs.illinois.edu/outreach/default.aspx).**

One of the goals of our mission is to increase knowledge and awareness of Latin America and the Caribbean in the educational community and the general public by promoting language and area studies in their broadest sense. Outreach at CLACS is a service-oriented program funded through a Title VI Federal Area Studies grant. It is designed to increase public knowledge about Latin America and the Caribbean and Latin American and Caribbean peoples and cultures. All our services are free!

Services include:

- Speakers Bureau composed by graduate students and faculty for presentations in schools on Latin American topics.
- Outreach Library for k-14 teachers and instructors that includes books and DVDs.
- Collaborates with the Illinois International Review, the Illinois' new international publication; produces CLACS this Week, a weekly Calendar of Events; and an annual newsletter on Quechua instruction, Correo de Linguistica Andina.
- Publishes several curriculum development workbooks including: Columbus: Beyond the Myth, A Teacher's Workbook on Tropical Rain Forests, and Historia Oral: The Latina/o Experience in the United States.
- Organizes the Latin American Brownbag Colloquium, a weekly series of noon seminars in which faculty, students, and visiting scholars present current research and speak on topics of special interest. Additionally, the Center sponsors many cultural events, such as Latin American music and dance ensembles, and art exhibitions.
- Maintains links to Web based curriculum-related materials on its outreach Web pages as a means of facilitating access to curriculum resources and research materials on Latin America and the Caribbean.

See our website (http://www.clacs.illinois.edu/outreach/default.aspx) for more information.

Links

Links to local museums, units and clubs that offer Latin American and Caribbean services (http://catalog.illinois.edu/graduate/las/latin-american-studies-ma/www.clacs.illinois.edu/resources/) as well as external links to institutions abroad and in the U.S. are posted.

Financial Aid

The Center is a recipient of Federal Government Title VI Foreign Language and Area Studies (FLAS) Fellowships for Graduate Studies in any discipline that includes a specialization in Latin American Studies and an intensive program of language instruction. Academic year language courses and

summer fellowships for intensive language courses abroad or in the United States are available. Information on how to apply, requirements and datelines are posted (http://publish.illinois.edu/illinoisflas/).

The Center offers Tinker Summer Fellowship Research Grants for graduate students in any department wishing to do research during the summer in Latin America, the Caribbean and the Iberian Peninsula. Both these programs depend on outside funding and thus cannot be guaranteed in any given year. Information on how to apply, requirements and datelines are posted (http://www.clacs.illinois.edu/academics/fellowships/tinker.aspx).

for the degree of Master of Science in Latin American Studies

---

1. **Advanced Proficiency in a Latin American Language (Spanish, Portuguese, Indigenous)** - This will be assessed through completion of appropriate level course work and through OPI or equivalent testing.
2. **Diverse Perspectives**
   a. Students will partake in interdisciplinary inquiry that engages multiple disciplinary lenses and theoretical frameworks.
   b. Students should be able to apply these frameworks to multiple contexts (spatial, temporal, cultural etc.) within Latin American Studies.
3. **Critical and Applied Learning**
   a. Students should be able to critically and reasonably evaluate and apply their knowledge to current debates within Latin American Studies.
   b. Students will be able to apply interdisciplinary learning across multiple contexts, integrating knowledge and practice.
4. **Interdisciplinary Research**

a. Students should be able to apply their knowledge to the design and implementation of a long-term independent research project that uses both primary and secondary sources and articulates with current debates within Latin American Studies.
b. They should be able to effectively communicate the results of that research in written form by producing a MA thesis.

5. **Effective Communication**
   a. Students should be able to identify research problems, approach these problems with appropriate methodologies and effectively communicate the results. They should be able to apply their knowledge to real-world situations.
   b. Students should be able to effectively communicate in written and oral form their knowledge of Latin American culture and language to a broad non-specialist audience.

Graduate Degree Programs in Latin American & Caribbean Studies

- Latin American Studies, MA (p. 1595)
- Graduate Minor in Latin American & Caribbean Studies (p. 2159)

The Center for Latin American and Caribbean Studies administers a program of language and area courses leading to an interdisciplinary Master of Arts degree. The master's program facilitates studies in the languages, cultures, and affairs of the region for three constituencies of students: those seeking to match area expertise with professional training; those proceeding to disciplinary-based doctoral work; and those for whom the degree would stand on its own. The center also administers graduate specializations in Latin American and Caribbean Studies with various departments. The center is a Title VI National Resource Center. The center houses the Lemann Institute for Brazilian Studies.

Law, JSD

for degree of the Doctor of the Science of Law in Law

The Doctor of the Science of Law (J.S.D.) degree provides students who primarily intend to pursue an academic career an opportunity for extended study, research, and scholarly writing. Those admitted to the program must have demonstrated analytic and research ability, possess outstanding academic credentials, and have completed the LL.M. or other law degree from the University of Illinois or other accredited American law school. In exceptional cases, consideration will be given to applicants who have completed programs of study in common law countries. All candidates must provide evidence of excellent reading and writing skills in English. The J.S.D. program normally takes a minimum of three years. Two years must be completed in residence at the College of Law and must include two semesters of course work. J.S.D. candidates are assigned a primary faculty advisor with expertise in the student's research area and an additional three faculty members, who form the student's doctoral committee. Each student must pass a qualifying examination demonstrating general proficiency in the student's field of study and a preliminary examination on the research proposal. The student's faculty committee then will assess the student's thesis research and writing progress, make recommendations, and conduct an oral examination on the final draft of the dissertation. The final dissertation will then be completed and deposited with the Graduate College.

Admission

The Graduate College admission requirements (http://www.grad.illinois.edu/admissions/apply/) and English language proficiency requirements (http://www.grad.illinois.edu/admissions/instructions/04c/) apply. In addition for the J.S.D. program, the Test of English as a Foreign Language (TOEFL) requirement is 95 internet-based. Students are not required to take the general Graduate Record Examination (GRE). Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. Admission is generally made for the fall semester only.

Financial Aid

Applicants to the College of Law graduate programs are welcome to apply for scholarship assistance. Scholarships typically are awarded to applicants with a combination of excellent academic and professional credentials and proven financial need. Awards usually provide part of tuition and do not cover living expenses. There are always more qualified applicants than there are funds available. Therefore, applicants are strongly encouraged to explore alternative sources of funding.

for degree of the Doctor of the Science of Law in Law

1. Demonstrate basic knowledge of American substantive and procedural law. This requires:
   a. The foundational rules governing liability for civil and criminal wrongdoing.
   b. The foundational rules that regulate the transaction of business among individuals and the ownership of property.
   c. The constitutional rules that shape the American legal system.
   d. The procedural rules that govern court adjudication.
   e. Several advanced areas of substantive or procedural law or both.
2. Use legal reasoning and legal analysis. This requires:
   a. The ability to identify, formulate, and apply legal rules.
   b. The ability to read and analyze judicial opinions.
   c. The ability to parse and interpret statutes, regulations, contracts, and other similar legal texts.
   d. The ability to construct legal arguments and evaluate critically one's own and others' legal arguments.
   e. The ability to identify and evaluate the practical consequences of various legal rules and to formulate policy arguments for and against those rules.
3. Develop practical legal skills. This requires:
   a. The ability to write clearly and effectively in a wide range of legal contexts and for various audiences, such as courts, clients, opposing counsel and academics.
   b. The ability to articulate one's thoughts verbally in a clear and effective manner.
   c. Knowledge of and ability to use tools of legal research.
   d. The ability to identify and gather factual information relevant to the application of legal rules.
   e. The ability to work collaboratively with others, including others with opposing interests.
4. Conduct themselves professionally and in keeping with the highest standards of civic virtue. This requires:
   a. Knowledge and appreciation of the ethical rules governing legal practice and/or academic research.
   b. The ability to learn and grow professionally through self-reflection and continuing education.
   c. An understanding of the lawyer's distinctive role in society and of the lawyer's concomitant responsibility to contribute to society through public service and pro bono representation.
   d. The ability to understand and be understood across various social, economic, cultural, political, national, racial, gender, and ethnic backgrounds.
5. Produce a substantial piece of original academic research. This requires:
   a. Mastery of literature in a particular area.
   b. Mastery of the sub-field in which a thesis will be written.
   c. Acquisition of expertise in the subject area of one's thesis.

Law, LLM

for the degree of Master of Laws in Law

The Illinois LL.M. is designed to prepare students with or without any prior legal training to excel in their professional careers. Foreign-educated students in the LL.M. program are introduced to the U.S. legal system and provided the opportunity to specialize in their own area of academic or professional interest. U.S.-trained lawyers can also enhance their legal expertise to meet their professional and career goals in the LL.M. program.

Admission
The Graduate College admission requirements (http://www.grad.illinois.edu/admissions/apply/) and English language proficiency requirements (http://www.grad.illinois.edu/admissions/instructions/04c/) apply. In addition for the LL.M. program, the Test of English as a Foreign Language (TOEFL) requirement is 80 internet-based. Students are not required to take the general Graduate Record Examination (GRE). Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. Admission is made for both the fall and spring semesters.

Financial Aid
Applicants to the College of Law graduate programs are welcome to apply for scholarship assistance. Scholarships typically are awarded to applicants with a combination of excellent academic and professional credentials and proven financial need. Awards usually provide part of tuition and do not cover living expenses. There are always more qualified applicants than there are funds available. Therefore, applicants are strongly encouraged to explore alternative sources of funding.

for the degree of Master of Laws in Law

The Master of Laws (LL.M.) degree is designed to prepare students with or without any prior legal training to enhance their professional development by adding familiarity with U.S law. Applicants must hold a bachelor's degree (or equivalent degree) from an approved school listed on the International Association of Universities List of Higher education Institutions. Full consideration for admission to the LL.M. program will be given to applicants holding a bachelor’s degree in law or a bachelor’s degree in a subject outside law.

The LL.M. degree requires the completion of at least 32 College of Law hours of credit and is normally completed in one academic year. All candidates are required to pass Professional Responsibility (LAW 501), a four hour graduate course and LL.M. Legal Research and Writing (LAW 500) a two hour graduate course. The remaining graduate hours are selected from any College of Law course.

Code	Title	Hours
LAW 500	LLM Legal Writing and Research	2

for the Master of Laws in Law, Corporate Law, Commercial Law, & Trade Concentration

Each Concentration offers a directed, optional program of study for LL.M. students in an increasingly important field of global legal practice. Each Concentration provides (1) specialized training in the Concentration field of law, (2) guidance to students in developing a program of study with the courses deemed most useful and relevant to the Concentration, and (3) a Concentration designation on their transcripts that will better allow them to market their expertise. Students interested in remaining in residence for a third semester to complete their program of study must apply by the listed deadline at the start of the second semester of the LL.M. degree. The Concentrations require students to complete a minimum of fourteen credit hours in topics integral to each Concentration. Courses taken toward a Concentration will count toward the student's LL.M. degree.

For additional details and requirements refer to the College of Law's graduate degree requirements (https://law.illinois.edu/academics/degree-programs/llm-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Intellectual Property & Technology Law Concentration Requirements

Courses taken toward the Concentration will count toward the student's LL.M. degree, and must be selected with the program advisor. In some instances, a Dual Concentration (i.e., in Intellectual Property and Justice, Democracy and Legal Rights) is available to eligible students. Eligible students must apply to pursue the Dual Concentration and may stay in residence an additional semester so that the 14-credit requirements of the second Concentration can be independently met. In the case of the Dual Concentration, credits used to satisfy one Concentration cannot be used to satisfy the requirements for a second Concentration.

Law: International & Comparative Law, LLM

for the Master of Laws, International & Comparative Law Concentration

The Illinois LL.M. is designed to prepare students with or without any prior legal training to excel in their professional careers. Foreign-educated students in the LL.M. program are introduced to the U.S. legal system and provided the opportunity to specialize in their own area of academic or professional interest. U.S.-trained lawyers can also enhance their legal expertise to meet their professional and career goals in the LL.M. program.

Admission

The Graduate College admission requirements (http://www.grad.illinois.edu/admissions/apply/) and English language proficiency requirements (http://www.grad.illinois.edu/admissions/instructions/04c/) apply. In addition for the LL.M. program, the Test of English as a Foreign Language (TOEFL) requirement is 80 internet-based. Students are not required to take the general Graduate Record Examination (GRE). Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. Admission is generally made for the fall semester only.

Financial Aid

Applicants to the College of Law graduate programs are welcome to apply for scholarship assistance. Scholarships typically are awarded to applicants with a combination of excellent academic and professional credentials and proven financial need. Awards usually provide part of tuition and do not cover living expenses. There are always more qualified applicants than there are funds available. Therefore, applicants are strongly encouraged to explore alternative sources of funding.

for the Master of Laws, International & Comparative Law Concentration

Each Concentration offers a directed, optional program of study for LL.M. students in an increasingly important field of global legal practice. Each Concentration provides (1) specialized training in the Concentration field of law, (2) guidance to students in developing a program of study with the courses deemed most useful and relevant to the Concentration, and (3) a Concentration designation on their transcripts that will better allow them to market their expertise. Students interested in remaining in residence for a third semester to complete their program of study must apply by the listed deadline at the start of the second semester of the LL.M. degree. The Concentrations require students to complete a minimum of fourteen credit hours in topics integral to each Concentration. Courses taken toward a Concentration will count toward the student's LL.M. degree.

For additional details and requirements refer to the College of Law's graduate degree requirements (https://law.illinois.edu/academics/degree-programs/llm-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Law: U.S. Legal Practice Skills, LLM

for the degree of Master of Laws in Law, U.S. Legal Practice Skills Concentration

The Illinois LL.M. is designed to prepare students with or without any prior legal training to excel in their professional careers. Foreign-educated students in the LL.M. program are introduced to the U.S. legal system and provided the opportunity to specialize in their own area of academic or professional interest. U.S.-trained lawyers can also enhance their legal expertise to meet their professional and career goals in the LL.M. program.

Admission
The Graduate College admission requirements (http://www.grad.illinois.edu/admissions/apply/) and English language proficiency requirements (http://www.grad.illinois.edu/admissions/instructions/04c/) apply. In addition for the LL.M. program, the Test of English as a Foreign Language (TOEFL) requirement is 80 internet-based. Students are not required to take the general Graduate Record Examination (GRE). Students are admitted on an individual basis according to a review of their prior accomplishments with an emphasis on academic achievement. Admission is generally made for the fall semester only.

Financial Aid
Applicants to the College of Law graduate programs are welcome to apply for scholarship assistance. Scholarships typically are awarded to applicants with a combination of excellent academic and professional credentials and proven financial need. Awards usually provide part of tuition and do not cover living expenses. There are always more qualified applicants than there are funds available. Therefore, applicants are strongly encouraged to explore alternative sources of funding.

for the degree of Master of Laws in Law, U.S. Legal Practice Skills Concentration

This concentration requires students to complete a minimum of 12 credit hours in topics integral to U.S. Legal Practice Skills in a third semester. The 12 credit hours for the concentration many not count towards the LL.M. degree or other concentration credit hours and must be completed in addition to the LL.M. or other concentration credit hours.

This concentration will be open to students in the LL.M. degree program at the College of Law. Students are expected to be in good standing and have a minimum overall GPA of 3.0 to be eligible for the concentration. This concentration is only available as a third-semester concentration. Interested students must apply by the listed deadline at the start of the second semester of the LL.M. degree.

For additional details and requirements refer to the College of Law's graduate degree requirements (https://law.illinois.edu/academics/degree-programs/llm-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Studies in Law in Law

1. Demonstrate basic knowledge of American substantive and procedural law. This requires
   a. The foundational rules governing liability for civil or criminal wrongdoing.
   b. The foundational rules that regulate the transaction of business among individuals and the ownership of property.
   c. The constitutional rules that shape the American legal system.

   d. The procedural rules that govern court adjudication.
   e. Several advanced areas of substantive or procedural law or both.
2. Use legal reasoning and legal analysis. This requires:
   a. The ability to identify, formulate, and apply legal rules.
   b. The ability to read and analyze judicial opinions.
   c. The ability to parse and interpret legal texts such as statutes, regulations, contracts.
3. Bring practical legal skills. This requires:
   a. The ability to write clearly and effectively in a wide range of legal contexts and for various audiences, such as courts, clients, opposing counsel and academics.
   b. The ability to articulate one's thoughts verbally in a clear and effective manner.
   c. Knowledge of and ability to use tools of legal research.
   d. The ability to identify and gather factual information relevant to the application of legal rules.
   e. The ability to work collaboratively with others, including others with opposing interests.
4. Conduct himself or herself professionally and in keeping with the highest standards of civic virtue. This requires:
   a. Knowledge and appreciation of the ethical rules governing legal practice.
   b. The ability to learn and grow professionally through self-reflection and continuing education.
   c. An understanding of the lawyer's distinctive role in society and of the lawyer's concomitant responsibility to contribute to society through public service and pro bono representation.
   d. The ability to understand and be understood across various social, economic, cultural, political, national, racial, gender, and ethnic backgrounds.
5. Produce a substantial piece of substantial research and analysis

Library & Information Science, CAS

for the Certificate of Advanced Study in Library & Information Science (on campus or online)

Students and faculty advisers work closely together in selecting appropriate courses of study to meet individual needs. Possible areas of focus include digital libraries, management, and youth services.

On-Campus or Online
The CAS may be completed on-campus or through the online scheduling option.

School Librarian Licensure (https://ischool.illinois.edu/academics/graduate/school-librarian-licensure/): available in conjunction with both the MS in LIS and CAS in LIS

The School of Information Sciences (iSchool) offers programs of study leading to the Master of Science (M.S.), the Certificate of Advanced Study (C.A.S), and the Doctor of Philosophy degrees. Three Master of Science (M.S.) degrees are available.

- The M.S. in Library and Information Science (L.I.S.) prepares students for professional careers in all types of information organizations, including libraries.
- The M.S. in Information Management (I.M.) will prepare the students for information-intensive professional roles in a broad range of sectors.
- The Library and Information Science concentration of the campus-wide M.S. in bioinformatics program emphasizes multidisciplinary skills that are required for a career developing and managing information systems for the biological sciences community.

The C.A.S. program provides the opportunity

1. to study an aspect of information sciences in greater depth than is possible in the M.S. program,
2. to refresh and upgrade one's professional training several years after completing a M.S. program, or
3. to redirect one's career into a different area of library and information science.

School Librarian Licensure is available in conjunction with both the M.S. in L.I.S. and C.A.S. The Ph.D. is a research degree program.

Admission
The general admission requirements of the Graduate College apply. Consideration is also given to language study and computer skills, relevant work experience, letters of reference, and evidence of leadership. International students must score at least 620 on the paper-based Test of English as a Foreign Language (TOEFL) (260 on the computer-based test; 104 on the iBT version); or 7 on each section of the IELTS. The M.S. in bioinformatics requires a strong background in information science including undergraduate-level computing and mathematics. The C.A.S. requires a master's degree in library and information science and a grade point average of at least 3.0 (A = 4.0) in the master's program.

School Librarian Licensure
Candidates interested in the School Librarian Licensure program must first be admitted and enrolled as a degree-seeking student within the School of Information Sciences before their application to the School Librarian Licensure program is reviewed. Accepted students must successfully pass two Illinois State Board of Education testing requirements prior to registration for the final fieldwork experience.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in the Ph.D. program for those interested in faculty careers.

Facilities and Resources
Among the major areas of faculty research are:

- community informatics
- data analytics
- data curation
- digital humanities
- digital libraries
- history of information

- information retrieval
- organization of knowledge and information
- privacy, security, and trust
- ethics and values for information
- youth literature, culture, and services

The iSchool's Center for Informatics Research in Science and Scholarship (CIRSS) conducts research on information problems that impact scientific and scholarly inquiry. The Center for Children's Books (CCB) provides a review and research collection of the newest literature for children and young adults. The Communications Office produces two high-quality publications, Library Trends and The Bulletin of the Center for Children's Books. The staff of each of these units is available to students and faculty for consultation and guidance. A computer network with Internet connectivity is integral to teaching and learning activities. The University Library provides a vast reservoir of resources for all types of study and research in library and information science.

The School maintains an ongoing commitment to continuing education through conferences, institutes, workshops, and course offerings.

Financial Aid
Financial aid may be available from the iSchool, the University Library, and elsewhere in the University in the form of graduate assistantships, teaching assistantships, research assistantships, and hourly paid work. Area libraries may provide pre-professional or hourly positions. Also, the iSchool offers a limited number of fellowships for which doctoral students tend to be favored over C.A.S. and master's degree students. Students in the joint program that do not hold a FLAS fellowship are eligible for, but not guaranteed, fellowship or assistantship support in the semesters in which they are enrolled in the iSchool. Any assistantship awarded to these students provides a waiver of the base in-state tuition and service fee as well as a stipend. Non-Illinois residents must pay the difference between in- and out-of-state tuition.

Additional Information
Please visit our CAS page (https://ischool.illinois.edu/academics/graduate/certificate-advanced-study/) for more information.

for the Certificate of Advanced Study in Library & Information Science (on campus or online)

For additional details and requirements, refer to the unit's Graduate Programs of Study (https://ischool.illinois.edu/degrees-programs/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; the requirements are listed below:

Code	Title	Hours
IS 593	Advanced Topics in Preservation & Tech Services	8
Elective hours (max. of 8 hours of Independent Study)		32
Total Hours		**40**

Other Requirements (may overlap)

Requirement	Description
Masters Degree in Library and Information Science is required for admission	
A concentration is not required.	
Minimum Hours Required Within the Unit:	24
Minimum 500-level Hours Required Overall:	12
The credit-no credit option can only be applied to courses taken outside the library and information science curriculum and courses taken with this option can not be applied to the degree.	
Minimum GPA:	3.25

for the Certificate of Advanced Study in Library & Information Science (on campus or online)

---

1. Identify a problem or challenge facing a precisely defined professional community.
2. Articulate current community understanding of and practice with respect to the challenge or problem.
3. Explain the challenge and its broad implications to an audience of professional peers
4. Design a plan of action for engaging with the challenge.
5. Develop and communicate a demonstration of the plan and its execution.

Library & Information Science, MS

for the degree of Master of Science in Library & Information Science (on campus & online)

The MS in LIS is accredited by the American Library Association (ALA). Two scheduling options are available to students pursuing the MS degree: On-Campus or Online.

On-campus or Online

The on-campus option serves students who are in residence at Urbana-Champaign, as well as part-time, commuting students. The online scheduling option is an online education option that uses the Internet and other information technologies for delivery.

School Librarian Licensure
School Librarian Licensure is available in conjunction with both the MSLIS and Certificate of Advanced Study (CAS). Candidates interested in the School Librarian Licensure program must first be admitted and enrolled as a degree-seeking student within the School of Information Sciences before their application to the School Librarian Licensure program is reviewed. Accepted students must successfully pass two Illinois State Board of Education testing requirements prior to registration for the final fieldwork experience.

Admission
The general admission requirements of the **Graduate College** apply. n addition to the Graduate College requirements, visit our page **MSLIS admission requirements (https://ischool.illinois.edu/degrees-programs/graduate/ms-library-and-information-science/apply/)** for program specific information.

for the degree of Master of Science in Library & Information Science (on campus & online)

For additional details and requirements, refer to the unit's Graduate Programs of Study (https://ischool.illinois.edu/degrees-programs/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

This degree program can be completed with or without a thesis, either on campus or online; the requirements are listed below:

Thesis Option

Code	Title	Hours
IS 505	Information Organization and Access	4
IS 510	Libraries, Information and Society	2 or 4
Research/Project/Independent Study Hours (4 max applied toward degree)		4
IS 599	Thesis Research	8
Total Hours		40

Non-Thesis Option

Code	Title	Hours
IS 505	Information Organization and Access	4
IS 510	Libraries, Information and Society	2 or 4
Research/Project/Independent Study Hours (4 max applied toward degree)		4
Total Hours		40

Other Requirements for both Thesis and Non-Thesis

Requirement	Description

Minimum Hours Required Within the Unit:	28

Minimum 500-level Hours Required Overall:	12
A C grade or better in required courses.	
The credit-no credit option can only be applied to courses taken outside the library and information science curriculum and courses taken with this option can't be applied to the degree.	
Minimum GPA:	2.75

for the degree of Master of Science in Library & Information Science (on campus & online)

Graduates of the Illinois MS/LIS program will be able to:

1. Apply foundational concepts, theories, and principles to problems of information organization and access.
2. Communicate capably with diverse stakeholders, promoting not just access to but also effective use of information services and systems in specific contexts.
3. Use evidence to help address information problems, meet information needs, and create relationships in their institutions, communities, profession, and the world.
4. Compare and critique contemporary information practices, structures, and standards in relation to historical and global alternatives.
5. Apply core ethical principles to professional practice.

Linguistics, MA

for the degree of Master of Arts in Linguistics

Admission

Students are not admitted to the Linguistics MA program directly. When Stage 1 of the Linguistics Ph.D. program is completed doctoral students may earn the MA.

for the degree of Master of Arts in Linguistics

The aim of the master's program is to instruct students in the major areas of linguistic theory and the methods of linguistic analysis. Candidates for this degree must earn at least 40 graduate hours with a minimum grade point average of 3.0 (A = 4.0) and satisfy other department and Graduate College requirements.

Code	Title	Hours
Core Courses:		**20**
Select one course each from two of the following four areas, for a total of two courses (8 hours): (a) sociolinguistics; (b) computational linguistics; (c) psycholinguistics/acquisition; (d) second language studies/applied linguistics		
LING 501	Syntax I	
LING 502	Phonology I	
LING 507	Formal Semantics I	
One course in quantitative and/or qualitative research methods		4
LING 590	Special Topics in Linguistics	2
LING 504	Practicum	2
Elective Courses		12
Total Hours	**Master's - Stage 1**	**40**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall:	16
Stage 1 qualifying paper and examination, with a grade of Pass or High Pass	
Language Requirement: Students must have proficiency in one language other than their native tongue.	
Minimum GPA:	3.0

for the degree of Master of Arts in Linguistics

1. Students will receive grounding in core areas of language and linguistics.
2. Students will receive grounding in their area of linguistic specialization.
3. Students will learn the research methodology appropriate for their subfield of linguistics.
4. Students will gain academic oral communication and presentation skills.
5. Students will gain academic writing skills.

Linguistics, PhD

for the degree of Doctor of Philosophy in Linguistics

The aim of the PhD program in Linguistics is to instruct students in the major areas of linguistic theory and the methods of linguistic analysis, and to prepare students to become independent researchers in one or more linguistic subfields.

Admission

Applicants to the PhD program in Linguistics must have completed a bachelor's degree.

For the PhD program in Linguistics, undergraduate preparation should include the study of at least one foreign language; a course equivalent to LING 400 on this campus; and a broad background in the humanities, social sciences, or mathematics.

Students may be admitted to the PhD program in Linguistics with or without a prior master's degree in linguistics or a related field. Depending on the student's prior preparation, they may be admitted either into Stage 1 of the PhD or into Stage 2 of the PhD. Students who who have completed a master's degree in linguistics or a closely related field may be considered for admission to Stage 2 of the PhD program. Students without an approved prior master's degree will only be considered for admission to Stage 1 of the PhD program. Students admitted to Stage 1 must complete 40 credit hours in the areas listed on the department website, maintain a GPA of 3.5 or better in all core courses, and earn a grade of High Pass on the qualifying examination in order to advance to Stage 2. Students who are admitted directly to Stage 2, but lack any of the core courses required for Stage 1, must complete Stage 1 requirements immediately on entry into the program; the courses will not count toward the 64 hours required for Stage 2 of the PhD.

Applicants to all Linguistics graduate programs should apply online and submit a statement of purpose, three letters of recommendation and a writing sample of 10-20 pages in length. Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should be sent to:

SLCL Graduate Student Services
3070 Foreign Languages Bldg.
707 S. Mathews Ave.
Urbana, IL 61801

Graduate Record Examination (GRE) scores are optional. The applicant should ask the ETS to submit scores to institution 1836. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 88 (100 preferred) on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (see www.grad.illinois.edu/Admissions/instructions/04c). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Financial Aid

The Linguistics department aims to provide financial aid for all graduate students in the Ph.D. program in Linguistics for up to five years (with the possibility of a sixth) for students who begin in Stage 1 of the Ph.D., and up to four years (with the possibility of a fifth) for students who begin in Stage 2 of the Ph.D. Financial aid can take the form of fellowships, teaching assistantships, research assistantships, or departmental assistantships.

To hold a teaching assistantship non-native English speakers must first pass a test of their oral English ability. Some students receive aid through other units in the university. New applicants receive automatic consideration for financial aid within the department, including teaching assistantships for the non-Western languages taught in its programs. For details and applications, write to the above address.

for the degree of Doctor of Philosophy in Linguistics

The aim of the PhD program in Linguistics is to instruct students in the major areas of linguistic theory and the methods of linguistic analysis, and to prepare students to become independent researchers in one or more linguistic subfields. Candidates entering with an approved master's degree must complete 64 graduate hours with a minimum grade point average of 3.0 (A = 4.0) and satisfy other department and Graduate College requirements. Candidates entering without an approved master's degree must complete 104 graduate hours with a minimum grade point average of 3.0 (A = 4.0) and satisfy other department and Graduate College requirements.

Stage 1

(Entering WITHOUT an approved Master's. Students are not admitted to the MA program directly. When Stage 1 of the doctoral program is completed doctoral students may earn the MA.)

Code	Title	Hours

Livestock Systems Health, MVS

for the degree of Master of Veterinary Science in Livestock Systems Health (on campus & online)

The primary goal of the MVS degree program is to develop critical thinking skills, instill the desire to be life-long learners, and increase the depth and breadth of veterinary professional knowledge for food-producing animal industries. It aims to develop the skills needed to thrive in multiple career paths including specialized clinical practice, academia, industry, government, and clinical research. The Master of Veterinary Science with a major in Livestock Systems Health is a 32-hour program that will take approximately two years to complete. Design of the program focused on students currently in the workforce.
Elective courses will include but are not limited to the following subject areas:

- Pathogen biology
- Immunology and Medical Microbiology
- Epidemiology and animal health economics
- Infectious disease control and management
- Systems management and systematic approaches to problem solving

Management, MS

for the Master of Science in Management (on-campus & online)

The Master of Science in Management can be completed either on campus or online.

The Master of Science in Management is a 36 graduate hour master's program. It is designed to provide a foundation for practitioners leading and managing teams, units, or organizations. It provides a general management foundation and an opportunity to focus on a particular area of specialization.

Students in this program are not eligible for tuition and fee waivers, except for those that are statutory.

Admission

Admission to the MS in Management program requires an undergraduate degree with a scholastic average of at least B for the last 60 hours and for any previous graduate work completed along with completion of at least one college-level quantitative methods class. For additional details, please refer to the program's website. All applicants whose native language is not English must submit a minimum Test of English as a Foreign Language (TOFEL) score of at least 102 (iBT), 253 (CBT), or 610 (PBT); or minimum International English Language Testing System (IELTS) academic exam scores of 6.5 overall and 6.0 in all subsections.

Faculty Research Interests

Faculty research interests are in the areas of marketing, organizational behavior, organization theory, decision sciences, information systems, strategic management, risk analysis, judgment under uncertainty, international business, production and operations management, accounting, economics, entrepreneurship, and finance. The Gies College of Business houses computer facilities, a behavioral science laboratory, and a separate library. The college maintains contacts with industry and government through its Survey Research Laboratory, Illinois Business Consulting, the Academy for Entrepreneurial Leadership and several professional and scholarly journals edited by its faculty.

Financial Aid

The M.S. in Business Administration, the M.S. in Management, the M.S. in Strategic Brand Communication, and the M.S. in Technology Management, do not provide assistantships. Tuition and fee waivers are not available for this program.

for the Master of Science in Management (on-campus & online)

The MS in Management requires a minimum of 36 hours. Students are required to take at least 2 credit hours in each of the six courses listed under General Management Foundation Courses (12+ hours). Any remaining credit hours of the 24 credit hour core requirement need to be fulfilled by taking General Management Elective Courses. Students also need 12 credit hours of Graduate General Elective courses, which provide flexibility for individualization. Students with sufficient demonstrated background in one or more general management areas may, with permission of the program, replace General Management Foundation courses with additional General Management Elective or Graduate General Electives.

For additional details and requirements, refer to the department's Program Curriculum (https://giesbusiness.illinois.edu/msm/curriculum/) and the Graduate College Handbook (https://grad.illinois.edu/gradhandbook/).

Code	Title	Hours
General Management Foundation Courses		**12-24**
ACCY 503	Managerial Accounting	
FIN 500	Introduction to Finance	
BADM 508	Leadership and Teams	
BADM 520	Marketing Management	
BADM 544	Strategic Management	
BADM 567	Operations Management	
General Management Electives		**0-12**

ACCY 500	Accounting Measurement, Reporting, and Control	
BADM 502	Communicating with Data and Decision Making	
BADM 513	Communication Strategy in Bus	
BADM 550	Business Practicum	
BADM 588	Business Practice Immersion	
Graduate General Electives - up to 12 hours of general graduate electives as needed to meet the minimum number of hours required.		**12**
Total Hours		**36**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall	24
Minimum GPA:	2.75
International students with TOEFL scores below 613 (paper-based), 257 (computer-based), or 103 (internet-based), or IELTS score below 7.0, are required to take the English Placement Test (EPT) when they arrive on campus. After taking the EPT, most students are required to take a Business English course sequence. For these students, completion of the ESL course sequence is mandatory but does not count towards the 36 hour degree requirement.	

for the Master of Science in Management (on-campus & online)

Upon graduation, students will be able to:

1. Learn to combine knowledge, problem solving skills, and integrative thinking across areas such as economics, finance, marketing, operations and project management, management and accounting, and international business.
2. Enhance development of critical "managerial skills" of leadership, entrepreneurship innovation, teamwork, ethics and communication. A project component of the degree promotes a team orientation as well as integrative thinking across these areas.
3. Obtain a sound understanding of management strategy. Students will gain a deep appreciation for using business tools for creative problem solving, decision making and formulating strategy.
4. Enrich the capacity to learn new business concepts, think critically about management and ethical issues, and respond to new technologies, emerging global changes, and market trends.

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Materials Engineering, MENG

for the degree of Master of Engineering in Materials Engineering

This program is not accepting applications for academic year(s) 2022-2027.

Admission
Students with bachelor's or master's degrees in the natural sciences or engineering will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. The general test of the Graduate Record Examination (GRE) (http://www.ets.org/) is required. Admission is possible for the spring semester, but most admissions are for the fall semester. Full details of admission requirements are on the department's graduate admissions Web site (http://www.matse.illinois.edu/admissions/graduate.html).

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org/) score of 104 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org/) academic exam scores of 7.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. Full admission status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for those taking the TOEFL or IELTS since the scores required for admission to MatSE are above the minimum scores demonstrating an acceptable level of English language proficiency.

For the M.Eng. degree program students must have had a B.S. degree in MatSE or a related field (e.g., B.S. degrees in Metallurgy, Polymers or Ceramics, or with concentrations in Materials Chemistry, Condensed Matter Physics, etc.). Students in the program are not expected to continue in and do not have automatic admission to the Ph.D. program in MatSE. The M.Eng. degree is a professional degree.

Financial Aid
Financial aid is available in the form of research assistantships, teaching assistantships, and partial fellowships for students in the Ph.D. programs. Except for special circumstances, MatSE does not provide financial aid to students in the M.S. and M.Eng. programs. All applicants, regardless of U.S. citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 50 on the Test of Spoken English (TSE), 24 on the speaking subsection of the TOEFL iBT, or 8 on the speaking subsection of the IELTS. For students who are unable to take the TSE, iBT, or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (http://cte.illinois.edu/programs/ta_train.html) conducted prior to the start of the semester.

–>

The Department of Materials Science & Engineering (MatSE) offers graduate programs leading to degrees of Master of Science and Doctor of Philosophy in Materials Science & Engineering. The department is consistently ranked among the top programs in the nation (undergraduate and graduate) by U.S. News and World Report. It offers opportunities to specialize in Nanoscale Science and Technology, Materials for Energy and the Environment, Materials for Medicine, and Mechanical Properties and Materials for Extreme Conditions with strong research programs in all of the areas.

for the degree of Master of Engineering in Materials Engineering

For additional details and requirements, please refer to the department's Graduate Degree Requirements Handbook (https://matse.illinois.edu/academics/graduate-programs/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Code	Title	Hours
MSE 492	Lab Safety Fundamentals (credit does not apply toward the degree)	0
MSE 585	Materials Engrg Practicum (The equivalent of two semesters of industrial internships or co-ops (30 weeks total; one of the semesters can be during the B.S. program or prior to enrollment).)	2

Two MSE area specialty courses in the student's chosen area of specialization.	6
MSE area specialty courses in one area outside the student's chosen area of specialization (subject to Other Requirements and Conditions below)	3-6
Technical elective course - Chosen from list appropriate for the student's area of specialization	3
Elective courses – At least 10 hours of these elective courses shall be College of Engineering courses in one or more of the areas of business, technology management, and entrepreneurship as listed on an approved list available from the department. There is the possibility of obtaining one of the Technology Entrepreneur Center Certificates.	13-20
Total Hours	**36**

Other Requirements and Conditions

Requirement	Description
Other Requirements and Conditions may overlap	
Minimum hours of MSE course work	11
Minimum of 500-level credit hours overall applied toward the degree.	12
MSE 595 (0 or 1 hour) must be taken every semester in the first two years of residence. A maximum of 2 hours may be applied toward the degree.	
A maximum of 2 hours of MSE 529 or MSE 559 in combination may be applied toward the degree. Students will be expected to present an oral report on their internship in either course, as appropriate, the semester following completion of the internship.	Ceramics, Electronic Materials, and Metallurgy area majors take MSE 529 every semester in residence; Polymer and Biomaterials area majors take MSE 559 every semester in residence
One or two MSE area specialty courses in one area outside the student's chosen area of specialization are required (two if one was not taken as part of the B.S. program)	
Minimum GPA:	3.0

Students who are admitted to the M. Eng. program are responsible for finding a suitable internship. Department or college staff may be able to help students in their search for a suitable placement suitable internship but the department does not guarantee a placement. The MSE 585 *internship requires approval by the departmental Director of Graduate Studies to insure that it matches the student's individual career objectives and meets the learning goals of the program. Students taking an internship as part of their undergraduate B.S program should also check with the Director of Graduate Studies; his/her approval is required if the student is already accepted in the combined B.S./M.Eng. Program. Students returning to the university after having had materials engineering employment experience, if it is deemed appropriate, may use that as their internship and base their report on that experience*

for the degree of Master of Engineering in Materials Engineering

1. The ability of students to function as independent scientists and engineers.
2. A deep understanding of the underlying principles of the appropriate theories in their subject area.
3. A deep understanding of the underlying principles of the synthesis and preparation of their subject materials.
4. A deep understanding of the underlying principles of characterization of their subject materials.
5. A deep understanding of the underlying principles of processing of their subject materials.
6. A deep understanding of interrelationships of structure, processing and properties of their subject materials.
7. A broad knowledge of the preparation, characterization and processing of all types of materials.

for the degree of Master of Engineering in Materials Engineering

Admission

Students with bachelor's or master's degrees in the natural sciences or engineering will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. The general test of the Graduate Record Examination (GRE) (http://www.ets.org/) is required. Admission is possible for the spring semester, but most admissions are for the fall semester. Full details of admission requirements are on the department's graduate admissions Web site (http://www.matse.illinois.edu/admissions/graduate.html).

All applicants whose native language is not English must submit a minimum TOEFL (http://www.toefl.org/) score of 104 (iBT), 257 (CBT), or 613 (PBT); or minimum International English Language Testing System (IELTS) (http://www.ielts.org/) academic exam scores of 7.5 overall and 6.0 in all subsections. Applicants may be exempt from the TOEFL if certain criteria (http://grad.illinois.edu/admissions/instructions/04c/) are met. Full admission status (http://grad.illinois.edu/admissions/instructions/04c/) is granted for those taking the TOEFL or IELTS since the scores required for admission to MatSE are above the minimum scores demonstrating an acceptable level of English language proficiency.

For the M.Eng. degree program students must have had a B.S. degree in MatSE or a related field (e.g., B.S. degrees in Metallurgy, Polymers or Ceramics, or with concentrations in Materials Chemistry, Condensed Matter Physics, etc.). Students in the program are not expected to continue in and do not have automatic admission to the Ph.D. program in MatSE. The M.Eng. degree is a professional degree.

Materials Science & Engineering, MS

for the degree of Master of Science in Materials Science & Engineering

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

The Department of Materials Science & Engineering (MatSE) offers graduate programs leading to degrees of Master of Science and Doctor of Philosophy in Materials Science & Engineering. The department is consistently ranked among the top programs in the nation (undergraduate and graduate) by U.S. News and World Report. It offers opportunities to specialize in Advanced Manufacturing, Data-Driven Materials Discovery, Energy and the Environment, Electronic, Quantum and Communications, Health and Medicine, and Infrastructure and Extreme Conditions with strong research programs in all of the areas.

Department Research

The backgrounds of faculty members vary widely within the broad areas of Advanced Manufacturing, Data-Driven Materials Discovery, Energy and the Environment, Electronic, Quantum and Communications, Health and Medicine, and Infrastructure and Extreme Conditions. In addition, research collaborations with other faculty outside the department are frequent. For a detailed list of faculty research interests and publications, view the MatSE department's faculty biographies. (https://matse.illinois.edu/directory/faculty/)

The MatSE department has an outstanding array of facilities available for materials research. These facilities, in addition to laboratories in the department's buildings, include, among others, the Materials Research Laboratory, Center for Microanalysis of Materials, Beckman Institute for Advanced Science and Technology, and Micro and Nanotechnology Laboratory. The National Center for Supercomputing Applications and the MRL Center for Computation are readily available. Information about these facilities may be found at the MatSE department's facilities information website (http://www.matse.illinois.edu/research/facilities.html).

for the degree of Master of Science in Materials Science & Engineering

For additional details and requirements, please refer to the department's Graduate Degree Requirements Handbook (https://matse.illinois.edu/academics/graduate-programs/graduate-handbook/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
MSE 599	Thesis Research (min-max applied toward the degree)	8
MSE 492	Lab Safety Fundamentals (credit does not apply toward the degree)	0
MSE 595	Materials Colloquium	0-2
Advisor group meetings (MSE 590) and area seminars (MSE 529, MSE 559) (subject to Other Requirements and Conditions below)		0-4
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		18-24
Total Hours		**32**

Other Requirements

Requirement	Description
Other Requirements and Conditions may overlap	
Minimum hours of MSE course work	18
Minimum of 500-level credit hours overall applied toward the degree.	14
MSE 595 (0 or 1 hour) must be taken every semester in the first two years of residence. A maximum of 2 hours may be applied toward the degree.	
MSE 529 or MSE 559 (0 or 1 hour) must be taken every semester. A maximum of 4 hours may be applied toward the degree.	
The completed master's thesis must be approved by the advisor and the department head.	
Miminum GPA:	3.0

Non-Thesis Option

Code	Title	Hours
MSE 492	Lab Safety Fundamentals (credit does not apply toward the degree)	0
MSE 595	Materials Colloquium	0-2
Advisor group meetings (MSE 590) and area seminars (MSE 529, MSE 559) (subject to Other Requirements and Conditions below)		0-4
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		30-36
Total Hours		**36**

Other Requirements

Requirement	Description

for the degree of Doctor of Philosophy in Materials Science & Engineering

---

PhD graduates in Materials Science and Engineering will have:

1. A deep understanding of the underlying principles relevant to their subject area of study.
2. The ability to define, articulate, and propose creative and original solutions to complex problems in science and engineering of materials.
3. The ability to carry out advanced scientific research with ethics and integrity.
4. An understanding of global/societal benefit of their thesis research.
5. The ability to effectively communicate results of research through scientific publications, presentations, and/or data repositories.

for the degree of Doctor of Philosophy in Materials Science & Engineering

---

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Admission Requirements

Students with bachelor's or master's degrees in the natural sciences or engineering will be considered for admission if they have a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate study. The general test of the Graduate Record Examination (GRE) (http://www.ets.org/) is optional. Admission is possible for the spring semester under special circumstances, but most admissions are for the fall semester.

Full details of admission requirements are on the department's graduate admissions website (https://matse.illinois.edu/admissions/graduate-admissions/).

All applicants whose native language is not English are required to submit the results of the TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) as evidence of meeting the English proficiency requirements for full admission status (http://grad.illinois.edu/admissions/instructions/04c/). Under certain circumstances applicants may be exempt (https://grad.illinois.edu/admissions/instructions/04c/) from the TOELF/IELTS requirement.

Financial Aid

Financial aid is available in the form of research assistantships, teaching assistantships, and partial fellowships for students in the PhD programs. All applicants to the MatSE PhD program are automatically considered for financial support in the form of a research assistantship. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the TOEFL iBT or IELTS, a minimum score of 4CP, 5 or 6 is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Mathematics, MS

for the Master of Science in Mathematics

The MS in Mathematics program allows students a wide range of course choices and can offer good preparation either for a job in industry or for pursuit of a doctorate in mathematics at another university. It is rare, though not impossible, for students to enter the PhD program at the University of Illinois after finishing the MS in Mathematics. The degree requires 32 credit hours and can normally be completed in 18 months. A master's thesis is optional. Applications are accepted for Fall semester each year. Financial aid is generally not available.

for the Master of Science in Mathematics

For additional details and requirements refer to the department's Guide to Graduate Studies (https://math.illinois.edu/academics/graduate-program/forms-guidebooks-handbooks-life-resources/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
Select one of the following:		3-4
MATH 448	Complex Variables	
MATH 540	Real Analysis	
MATH 542	Complex Variables I	
Select one of the following:		3-4
MATH 418	Intro to Abstract Algebra II	
MATH 500	Abstract Algebra I	
MATH 501	Abstract Algebra II	
MATH 599	Thesis Research (min/max applied toward degree)	4
Total Hours Required: 32		

Other Requirements

Requirement	Description
Other requirements may overlap	
MATH 405, MATH 415, MATH 444, and MATH 499 cannot be counted toward this graduate degree.	
Minimum Hours Required Within the Unit:	24
Minimum 500-level Hours Required Overall:	12 (in MATH)
Minimum GPA:	3.0

Non-Thesis Option

Code	Title	Hours
Select one of the following:		3-4
MATH 448	Complex Variables	
MATH 540	Real Analysis	
MATH 542	Complex Variables I	
Select one of the following:		3-4
MATH 418	Intro to Abstract Algebra II	
MATH 500	Abstract Algebra I	
MATH 501	Abstract Algebra II	
Total Hours Required: 32

Minimum Hours Required Within the Unit:	24
Minimum 500-level Hours Required Overall:	12 (in MATH)
Minimum GPA:	3.0

for the Master of Science in Mathematics

---

1. Students will be able to explain central definitions and theorems of abstract algebra.

2. Students will be able to explain central definitions and theorems of real analysis.

3. Students will apply concepts of abstract algebra and real analysis to solve mathematical problems.

4. Students will be able to develop and write rigorous mathematical proofs.

5. For thesis track: Students will be able to effectively communicate extended mathematical arguments in written form.

for the Doctor of Philosophy in Mathematics

Students working toward a Ph.D. degree usually require from four to six years to complete the requirements. Each student must pass the comprehensive examinations (testing the student's knowledge of basic graduate-level mathematics in algebra, analysis, and other areas) and the preliminary examination (testing the student's ability to begin or continue research in a chosen field). Students must also write and defend a research thesis in their field of mathematics.

For additional details and requirements refer to the department's Guide to Graduate Studies (https://math.illinois.edu/academics/graduate-program-mathematics/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Requirements

Code	Title	Hours
Students must demonstrate competence in five core courses including the following:		
To demonstrate competence, a student must receive a B+ or higher in the course, or pass a written exam on the topic.		
MATH 500	Abstract Algebra I	4
MATH 540	Real Analysis	4
Plus choose three of the following:		12
ASRM 563	Risk Modeling and Analysis	
MATH 511	Intro to Algebraic Geometry	
MATH 518	Differentiable Manifolds I	
MATH 525	Algebraic Topology I	
MATH 530	Algebraic Number Theory	
MATH 531	Analytic Theory of Numbers I	
MATH 542	Complex Variables I	
MATH 550	Dynamical Systems I	
MATH 553	Partial Differential Equations	
MATH 561	Theory of Probability I	
MATH 570	Mathematical Logic	
MATH 580	Combinatorial Mathematics	
Master's equivalency		32
MATH 599	Thesis Research (0 min applied toward degree)	0
Total Hours:		96

Mathematics: Actuarial Science & Risk Analytics, PhD

for the Doctor of Philosophy in Mathematics, Actuarial Science and Risk Analytics Concentration

The Concentration attracts students with strong interest in financial risk analytics and actuarial applications of mathematics, and equips them with advanced analytical tools for professional and academic careers. Students in the Concentration complete coursework or professional exams in Probability, Risk Modeling and Analysis, Mathematical Statistics, Theory of Finance, and Actuarial Models for Life Contingencies or Financial Economics.

for the Doctor of Philosophy in Mathematics, Actuarial Science and Risk Analytics Concentration

Students working toward a Ph.D. degree usually require four to six years to complete the requirements. Each student must pass the comprehensive examinations/courses and the preliminary examination (testing the student's ability to begin or continue research in a chosen field). Students must also write and defend a research thesis in their field of mathematics.

For additional details and requirements refer to the department's Guide to Graduate Studies (https://math.illinois.edu/academics/graduate-program/forms-guidebooks-handbooks-life-resources/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Mechanical Engineering, MENG

for the degree of Master of Engineering in Mechanical Engineering (on campus & online)

The MEng in Mechanical Engineering is a coursework-based, non-thesis program that provides advanced knowledge and experiential opportunities beyond that of a bachelor's degree. Students may choose to design their curriculum around six tracks of study: Design & Mechanics, Manufacturing, Controls & Robotics, Fluid & Thermal Sciences, Energy, and Biomechanics, or they may create a customized plan of study, taking classes from more than one track. Students will receive guidance from an academic advisor when selecting their courses.

for the degree of Master of Engineering in Mechanical Engineering (on campus & online)

For additional details and requirements refer to the department's graduate program requirements (http://mechanical.illinois.edu/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Degree Requirements

Code	Title	Hours
Technical Core		**16-24**
ME and TAM coursework selected in consultation with advisor.		
Professional Development Coursework		**4-8**
Select from the following:		
ENG 572	Professional Practicum	
ENG 573	Capstone Project	
ME 597	Independent Study	
TE 401, TE 450, TE 460, TE 461, TE 466, TE 498, TE 510, TE 565, TE 566, TE 567, TE 598		
Elective Coursework		**4-12**
A minimum of 4 elective hours must be completed outside the ME rubric.		
Total required hours		**32**

Other Requirements and Conditions (may overlap)

Requirement	Description
A minimum of 12 500-level credit hours applied toward the degree, 8 of which must be in ME or TAM.	
A maximum of 4 hours of independent study may be applied toward degree requirements.	
No credit given towards degree for S/U or CR/NC graded classes.	
The minimum program GPA is 3.0.	

for the degree of Master of Engineering in Mechanical Engineering (on campus & online)

1. Apply quantitative skills and engineering principles to propose novel and practical solutions to mechanical engineering problems in fields such as biomechanics, energy, fluid and thermal sciences, manufacturing and design, and robotics and control.
2. Demonstrate mastery of the mechanical design and problem-solving process including defining the problem and implementing the solutions, while taking into consideration the needs of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors.
3. Employ the highest standards of academic, professional, and ethical responsibility in the design of products, industry processes, and research and development processes.
4. Effectively communicate (both orally and in writing) real-world industry and scientific problems with a bigger vision and offer solutions, as well as their impact, to a diverse audience and stakeholders.
5. Develop practical project management skills, as well as effective leadership, organizational, communication, and other professional skills.
6. Develop an ability to work collaboratively with a diverse team.
7. To be able to function as an engineer in industry or government.

for the degree of Master of Engineering in Mechanical Engineering (on campus & online)

Admission Requirements

An applicant for admission to the MEng program at the Department of Mechanical Science and Engineering must:

1. Be a graduate of an institution awarding a baccalaureate degree equivalent to that granted by the University of Illinois at Urbana-Champaign in engineering or a related field;
2. Be adequately prepared for advanced study as demonstrated by his or her previous program of study and scholastic record; and
3. Be recommended for admission by the Department of Mechanical Science and Engineering. A minimum grade point average of 3.00 (A = 4.00) for the last two years of undergraduate study is required.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

The Department of Mechanical Science and Engineering accepts MEng applications for both Spring and Fall terms.

Financial Aid

Students in the MEng in Mechanical Engineering program are not eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois.

Mechanical Engineering, MS

for the degree of Master of Science in Mechanical Engineering (on campus & online)

The MS in Mechanical Engineering is available for both on-campus and online students. Prospective students planning to continue for the PhD should apply to the PhD program.

Opportunity exists for an optional graduate concentration in computational science and engineering via the Computational Science & Engineering (p. 2000) concentration.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in both the ME and TAM MS programs.

Department Research

A new paradigm in research is being created in the department by integrating basic sciences such as biology, chemistry, applied mathematics, and applied physics with the traditional mechanical engineering and engineering mechanics disciplines of fluid mechanics/thermal sciences, solid mechanics/materials and controls/dynamics. This integration is fostering new directions and discoveries in nanomechanics, nanomanufacturing, biomechanics and computational science and engineering.

The goal of all research in the department is to address critical societal problems in the areas of health, security/defense, energy/environment, manufacturing, and transportation. While the basic function of departmental research is generation of new knowledge, a growing number of projects are prompted by current needs of the state of Illinois, the United States, and the world. For more information, see the department's research website (https://mechanical.illinois.edu/research/).

MechSE faculty are major participants in activities at the department, college, and university level via research centers and programs that are integral to the MechSE graduate program. For more information, see the department's research centers website (https://mechanical.illinois.edu/mechse-research-centers/).

MechSE's wealth of research laboratories allows faculty, graduate and undergraduate research assistants, and postdoctoral and visiting scholars to conduct theoretical and experimental investigations of phenomena related to materials behavior, combustion, micro- and nanomechanical systems, controls and dynamics, thermodynamics, biomechanics, and much more. For more information, see the department's research laboratories website (https://mechanical.illinois.edu/research/mechse-laboratories/).

for the degree of Master of Science in Mechanical Engineering (on campus & online)

The online MSME degree program offers both a thesis (32 credit hours) and non-thesis (36 credit hours) option. Online students have five years to complete the degree requirements. The degree awarded through our online program is the exact same degree awarded to on-campus MSME students.

For additional details and requirements refer to the department's graduate program requirements (http://mechanical.illinois.edu/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
ME 599	Thesis Research (min-max applied toward the degree)	4-8
MSE 492	Lab Safety Fundamentals (credit does not apply toward the degree)	0
ME 590	Seminar (registration for 1 hour every term while in residence; credit does not apply toward the degree)	0
Elective courses (formal graded coursework) – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		24-28
Total Hours		**32**

Other Requirements and Conditions (may overlap)

Requirement	Description
A minimum of 8 ME or TAM credit hours with 4 at the 500 level.	
A minimum of 12 500-level credit hours applied toward the degree.	
For the thesis option, a maximum of 4 hours of ME 597 or TAM 597 (or other approved independent study) may be applied toward the elective course work requirement.	
No ME 599 credit may be applied toward the elective course work requirement (599 is not formal graded coursework).	
Minimum GPA:	3.0

Non-Thesis Option

Code	Title	Hours
MSE 492	Lab Safety Fundamentals (credit does not apply toward the degree)	0
ME 590	Seminar (registration for 1 hour every term while in residence; credit does not apply toward the degree)	0
ME 597	Independent Study	4
or TAM 597	Advanced Independent Study	
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		32
Total Hours		**36**

Other Requirements and Conditions (may overlap)

Requirement	Description
A minimum of 8 ME or TAM credit hours with 4 at the 500 level.	
A minimum of 12 500-level credit hours applied toward the degree.	
Departmental approval is required to pursue the non-thesis option.	
Minimum GPA:	3.0

for the degree of Master of Science in Mechanical Engineering (on campus & online)

Illinois MechSE ME graduates will have:

1. A deep understanding of at least one core area of Mechanical engineering (e.g., mechanics of materials, combustion, controls and dynamics, manufacturing, fluid mechanics, solid mechanics). [MS/PhD]
2. A broader understanding of at least 1-2 areas of Mechanical Engineering that are different from the area of research of the student's thesis. [MS/PhD]
3. Ability to think critically and creatively in defining research questions and to outline strategies of inquiry. [MS/PhD]
4. Ability to document research outcomes comprehensively for publication. [MS/PhD]
5. Ability to communicate research results to scientific audience in conferences. [PhD]
6. Ability to work collaboratively with other peers. [MS/PhD]

for the degree of Master of Science in Mechanical Engineering (on campus & online)

Admission Requirements

An applicant for admission to the MS program in Mechanical Engineering in the Department of Mechanical Science and Engineering must:

1. Be a graduate of an institution awarding a baccalaureate degree equivalent to that granted by the University of Illinois at Urbana-Champaign;
2. Be adequately prepared for advanced study as demonstrated by his or her previous program of study and scholastic record; and
3. Be recommended for admission by the Department of Mechanical Science and Engineering. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required, and a minimum grade point average of 3.50 (A = 4.00) is required for any previous graduate work completed.

Currently the Graduate Record Examination (GRE) (http://www.ets.org/) is not required for the admissions application, but a student may elect to submit their scores.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College. Students applying to the online program must satisfy the full status admissions requirement.

The Department of Mechanical Science and Engineering accepts MS applications for both Spring and Fall terms.

For detailed information, please see our admissions requirements webpage (https://mechse.illinois.edu/graduate/applying-mechse-graduate-programs/).

Financial Aid

Students admitted to the MS program are eligible for Board of Trustees (BOT) tuition-waiver generating assistantships at the University of Illinois. All applicants whose native language is not English, regardless of US citizenship, who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8.0 on the speaking subsection of the IELTS. Students who are already at Illinois may request to take the on-campus EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), for which the minimum passing score for TA eligibility is 4CP. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) prior to the start of their first semester as a teaching assistant.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Mechanical Engineering, PhD

for the degree of Doctor of Philosophy in Mechanical Engineering

The Department of Mechanical Science & Engineering offers both a traditional doctoral program (for students with a previous master's degree) and a direct doctoral program (for students with only a bachelor's degree) in Mechanical Engineering.

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in both the ME and TAM PhD programs.

Department Research

A new paradigm in research is being created in the department by integrating basic sciences such as biology, chemistry, applied mathematics, and applied physics with the traditional mechanical engineering and engineering mechanics disciplines of fluid mechanics/thermal sciences, solid mechanics/materials and controls/dynamics. This integration is fostering new directions and discoveries in nanomechanics, nanomanufacturing, biomechanics and computational science and engineering.

The goal of all research in the department is to address critical societal problems in the areas of health, security/defense, energy/environment, manufacturing, and transportation. While the basic function of departmental research is generation of new knowledge, a growing number of projects are prompted by current needs of the state of Illinois, the United States, and the world. For more information, see the department's research website (https://mechanical.illinois.edu/research/).

MechSE faculty are major participants in activities at the department, college, and university level via research centers and programs that are integral to the MechSE graduate program. For more information, see the department's research centers website (https://mechanical.illinois.edu/mechse-research-centers/).

MechSE's wealth of research laboratories allows faculty, graduate and undergraduate research assistants, and postdoctoral and visiting scholars to conduct theoretical and experimental investigations of phenomena related to materials behavior, combustion, micro- and nanomechanical systems, controls and dynamics, thermodynamics, biomechanics, and much more. For more information, see the department's research laboratories website (https://mechanical.illinois.edu/research/mechse-laboratories/).

for the degree of Doctor of Philosophy in Mechanical Engineering

For the Ph.D. program, a preliminary examination is taken after the qualifying examination. A minimum of six months should elapse between the successful completion of the doctoral preliminary examination and the doctoral final examination (oral dissertation defense).

For additional details and requirements refer to the department's graduate program requirements (http://mechanical.illinois.edu/graduate/) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Entering with approved M.S. or M.A. degree

Code	Title	Hours
ME 599	Thesis Research (min-max applied toward the degree)	44
MSE 492	Lab Safety Fundamentals (1 hour if not taken while completing the Master's degree; credit does not apply toward the degree)	0
ME 590	Seminar (registration for 1 hour every term while in residence; credit does not apply toward the degree)	0
Advanced math requirement from an approved list (https://mechse.illinois.edu/graduate/graduate-degree-programs/phd-programs/phd-mechanical-engineering/)		3-4
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		16-17
Total Hours		**64**

Other Requirements and Conditions (may overlap)

Requirement	Description
Minimum 500-level credit hours applied toward the degree	16
Maximum hours of ME 597 or TAM 597 (or other approved independent study) which may be applied only toward the elective course work requirement	4
A maximum of 4 hours of ME 597 or TAM 597 (or other approved independent study) may be applied toward the elective course work requirement.	
No ME 599 credit may be applied toward the elective course work requirement.	
Minimum GPA:	3.0
Continuous registration is required after the preliminary exam and until dissertation deposit, while on campus and during semester of final defense.	
Ph.D. exam and dissertation requirements:	
Qualifying Exam: Qualifying examinations should be taken no later than the second calendar semester after initial enrollment.	
Preliminary exam	
Final exam or dissertation defense	
Dissertation deposit	

Entering with approved B.S. or B.A. degree

A student entering with a bachelor's degree has the option of a direct Ph.D. program. It does not award an M.S. degree.

Code	Title	Hours
ME 599	Thesis Research (min-max applied toward the degree)	52
MSE 492	Lab Safety Fundamentals (1 hour if not taken while completing the Master's degree; credit does not apply toward the degree)	0
ME 590	Seminar (registration for 1 hour every term while in residence; credit does not apply toward the degree)	0
Advanced math requirement from an approved list (https://mechse.illinois.edu/graduate/graduate-degree-programs/phd-programs/phd-mechanical-engineering/)		3-4
Elective courses – chosen in consultation with advisor (subject to Other Requirements and Conditions below)		40-41
Total Hours		**96**

Other Requirements and Conditions (may overlap)

Requirement	Description
Minimum 500-level credit hours applied toward the degree	24
Maximum hours of ME 597 or TAM 597 (or other approved independent study) which may be applied only toward the elective course work requirement	8
A maximum of 4 hours of ME 597 or TAM 597 (or other approved independent study) may be applied toward the elective course work requirement.	
No ME 599 credit may be applied toward the elective course work requirement.	
Continuous registration is required after the preliminary exam and until dissertation deposit, while on campus and during semester of final defense.	
Ph.D. exam and dissertation requirements:	
Qualifying Exam: Qualifying examinations should be taken as early as possible, generally no later than the third semester.	
Preliminary exam	
Final exam or dissertation defense	

Dissertation deposit	
Minimum GPA:	3.0

for the degree of Doctor of Philosophy in Mechanical Engineering

---

Illinois MechSE ME graduates will have:

1. A deep understanding of at least one core area of Mechanical engineering (e.g., mechanics of materials, combustion, controls and dynamics, manufacturing, fluid mechanics, solid mechanics). [MS/PhD]
2. A broader understanding of at least 1-2 areas of Mechanical Engineering that are different from the area of research of the student's thesis. [MS/PhD]
3. Ability to think critically and creatively in defining research questions and to outline strategies of inquiry. [MS/PhD]
4. Ability to document research outcomes comprehensively for publication. [MS/PhD]
5. Ability to communicate research results to scientific audience in conferences. [PhD]
6. Ability to work collaboratively with other peers. [MS/PhD]

for the degree of Doctor of Philosophy in Mechanical Engineering

---

Admission Requirements

An applicant for admission to the PhD program in Mechanical Engineering in Department of Mechanical Science and Engineering must:

1. Be a graduate of an institution awarding a baccalaureate degree equivalent to that granted by the University of Illinois at Urbana-Champaign;
2. be adequately prepared for advanced study as demonstrated by his or her previous program of study and scholastic record; and
3. be recommended for admission by the Department of Mechanical Science and Engineering. A minimum grade point average of 3.25 (A = 4.00) for the last two years of undergraduate study is required, and a minimum grade point average of 3.50 (A = 4.00) is required for any previous graduate work completed.

Currently the Graduate Record Examination (GRE) (http://www.ets.org/) is not required for the admission application, but a student may elect to submit their scores.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

The Department of Mechanical Science and Engineering accepts PhD applications for both Spring and Fall terms.

For detailed information, please see our admissions requirements webpage (https://mechse.illinois.edu/graduate/applying-mechse-graduate-programs/).

Financial Aid

Students admitted to the PhD program are eligible for Board of Trustees (BOT) tuition-waiver generating appointments at the University of Illinois, including research assistantships, teaching assistantships, and fellowships. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants whose native language is not English, regardless of US citizenship, who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8.0 on the speaking subsection of the IELTS. Students who are already at Illinois may request to take the on-campus EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), for which the minimum passing score for TA eligibility is 4CP. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) prior to the start of their first semester as a teaching assistant.

Mental Health Counseling, MS

for the degree of Master of Science in Mental Health Counseling

The Master's of Science in Mental Health Counseling is a two-year, 61-credit hour program. The face-to-face program emphasizes training in psychological science and cultural diversity in practice across the lifespan. Students receive extensive preparation in applied psychology and complete a 100 hour (about 7 hours per week) practicum during the first year and a 600 hour (about 18 hours per week) internship during the second year. Graduates from the mental health counseling and career counseling tracks are Illinois Licensed Professional Counselor (LCP) licensure eligible. Graduates may wish to seek further training at the doctoral level in an applied psychology area or to enter the counseling field as a Master's level professional.

Admission

Interested applicants should start at the College of Education Graduate Programs website (http://education.illinois.edu/programs/grad/). In addition to the application, the applicant is required to submit the following information: a statement of purpose, updated resume, official transcripts from all colleges attended, and three letters of recommendation. A scholarly writing sample in English (e.g., a master's thesis, article, or academic paper) is required for application to a doctoral program.

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirement for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Applications

Applicants must submit a complete application for university admission, including three letters of reference, transcripts from all schools where undergraduate and graduate degrees were awarded or expect to be awarded prior to the application enrollment term, and other items listed on the college website (https://education.illinois.edu/programs/grad/how-to-apply/?url=/programs/grad). Applicants to our doctoral program and M.S. in Mental Health Counseling apply for fall enrollment. Current deadlines are posted on our application deadlines page (https://education.illinois.edu/programs/grad/how-to-apply/deadlines/).

Grade Point Average

The preferred department standard for grade point average is 3.0 on a 4.0 scale. The University calculates undergraduate GPAs on the last two years of grades for degreed applicants and in the last one year for students who have not yet completed their bachelor's degree. Graduate GPAs are calculated on the total of all graduate level courses taken beyond the undergraduate degree.

Test of English as a Foreign Language (TOEFL)

International applicants must demonstrate English Language Proficiency for admission. Please see the English Proficiency Requirements for Admission (https://grad.illinois.edu/admissions/instructions/04c/) for additional information on this requirement.

Area of Study Affiliation

Mental Health Counseling M.S. students must choose one of three areas of study for their practicum experience:

- Mental Health Counseling
- Career Counseling
- Counseling and Developmental Sciences

Faculty Research Interests

To learn more about our faculty's research areas, current grants, and recent publications, please visit our department homepage (https://education.illinois.edu/edpsy/) and/or visit the Faculty Finder (https://education.illinois.edu/about/directory/?displaytype=Profile+View&jobtypes=Faculty). Our faculty pursue a wide range of research interests, offering graduate students many opportunities to collaborate and participate in meaningful research projects.

Center, Programs, and Institutes

Department faculty are affiliated with both research centers and institutes in the College of Education and across the university. These include The Beckman Institute, the Technology Innovation in Educational Research and Design initiative (TIER-ED), the Center for Culturally Responsive Evaluation and Assessment (CREA), the Center for the Study of Reading (CSR), the Center for Social and Behavioral Science (CSBR), and others.

Financial Aid

The Master's program is a self-funded program with limited options available for financial aid through the university. For more information about financial aid options at Illinois, please contact our financial aid office (https://www.osfa.illinois.edu/). It should be noted that on-campus employment opportunities that are available as assistantships for Ph.D. level students, are NOT available for Master's level students. Other types of on-campus work opportunities are possible.

Microbiology, MS

for the degree of Master of Science in Microbiology

The Department of Microbiology does not admit students to the Microbiology MS degree program. Admission to graduate study is only through the PhD degree program. Information about the Microbiology PhD program can be found here (p. 1671).

Graduate Degree Program in Microbiology

Microbiology, PhD (p. 1671)

The Department of Microbiology at Illinois offers unique opportunities for graduate students to become skilled and creative microbiologists. Our graduate program of study leads to the doctor of philosophy degree (PhD). Students interested in the Microbiology PhD program must apply directly to the School of Molecular and Cellular Biology (http://mcb.illinois.edu/). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December and formally join the appropriate graduate program at that time.

Admission

Applicants interested in the Microbiology PhD program will need to apply directly to the School of Molecular and Cellular Biology (MCB) PhD program (https://mcb.illinois.edu/academics/phd-programs/apply-our-mcb-phd-program/). The MCB PhD program is an umbrella program that requires admitted students to spend their first semester rotating among three different labs to explore their interests before joining one of our four departments.

MCB Admission requirements include a bachelor's degree in biological or physical sciences, a grade point average of a 3.0 or higher (A = 4.0), prior research experience and three letters of recommendation from individuals who can attest to the applicant's academic and research background. The Graduate Record Examination (GRE) is **not** required. Applicants interested in pursuing a PhD in Microbiology should have a total of at least 15 credit hours of physical or biology sciences, including general biology, or microbiology, chemistry through organic chemistry and biochemistry, and mathematics through calculus. In addition to these requirements, non-native English speaking applicants must attain a minimum Test of English as a Foreign Language (TOEFL) overall score of 96, with a score of at least 22 on the speaking section. MCB does **not** accept the International English Language Testing System (IELTS) to show English proficiency. Graduate College requirements also apply.

for the degree of Master of Science in Microbiology

The Department of Microbiology does not admit students to the Microbiology MS degree program. Admission to graduate study is only through the PhD degree program. Information about the Microbiology PhD program can be found here (p. 1671).

For specific information, refer to the Department's Graduate Student Handbook (https://mcb.illinois.edu/media/761/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
Coursework (not including MICR 590)		8
Research/Project Hours (4 min applied toward degree)		4
MICR 599	Thesis Research (0 min applied toward degree)	0
Total Hours		**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum Hours Required Within the Unit:	8 (500 level)
Minimum Number of 500-level Hours Required Overall in Program:	12

Completion of one of the following and approval by the research advisor and head of the department: a research thesis; submission of a manuscript with the candidate as first author and to which the candidate has made the major contribution; the successful passing of the departmental preliminary exam.	
Minimum GPA:	3.0

Non-Thesis Option

Code	Title	Hours
Coursework (not including MICR 590)		8
Research/Project Hours (4 min applied toward degree)		4
Total Hours		**32**

for the degree of Master of Science in Microbiology

1. Effective oral communication skills that are developed via one or more of the following tasks: group discussions in courses; presentations in departmental seminar courses; discussion of scientific topics in courses; defending their work in a preliminary exam; acting as a teaching assistant for at least 2 semesters; giving yearly student seminars.
2. Effective written communication skills that are developed via one or more of the following tasks: writing at least one original, full-length manuscript that has been accepted for publication in a refereed journal; writing a dissertation; writing an NIH-style grant for the preliminary exam.
3. A level of competency and research independence commensurate with the degree, such that they can obtain an initial science-related placement in a job that uses critical thinking components.
4. Demonstrated ability to organize and execute a research project that uses critical-thinking components and problem-solving expertise, hypothesis-driven, and fills a gap in knowledge.
5. Knowledge of the discipline and acquired technical skills in general Microbiology and in their specialized Microbiology research area.

Microbiology, PhD

for the degree of Doctor of Philosophy in Microbiology

The requirements for a PhD from the Department of Microbiology include successful completion of course work, teaching, one to two first-author manuscripts in peer-reviewed journals, passing a preliminary examination, and writing and depositing a research thesis.

Graduate Degree Program in Microbiology

- Microbiology, PhD (p. 1671)

The Department of Microbiology at Illinois offers unique opportunities for graduate students to become skilled and creative microbiologists. Our graduate program of study leads to the doctor of philosophy degree (PhD.) We have outstanding resources in our internationally recognized faculty, graduate students, and research facilities. This exposes our students to the latest research techniques and fosters their development as independent scientists. The program has particular strengths in the areas of microbial physiology, metabolism, genetics, evolution, and pathogenesis. For an application and departmental materials that provide greater detail on programs, offerings, admission, degree requirements, and financial aid, visit our website (https://mcb.illinois.edu/departments/microbiology/).

Graduates from the Department of Microbiology are employed in colleges and universities, industry, and government. Scientific advances in genetic engineering and biotechnology provide many opportunities in pharmaceutical, chemical, and genetic engineering companies.

The Department of Microbiology is a part of the School of Molecular and Cellular Biology (MCB), which also includes the Departments of Biochemistry, Cell and Developmental Biology, and Molecular and Integrative Physiology. The Department is part of an umbrella program in MCB that encompasses over 70 different research laboratories. Students admitted into any of these departmental graduate programs can select faculty thesis advisors from these active research laboratories in the School. Close ties are also maintained with the School of Integrative Biology, the School of Chemical Sciences, the Carle Illinois College of Medicine, and the College of Veterinary Medicine.

Admission

Applicants interested in the Microbiology PhD program will need to apply directly to the School of Molecular and Cellular Biology (MCB) PhD program (https://mcb.illinois.edu/academics/phd-programs/apply-our-mcb-phd-program/). The MCB PhD program is an umbrella program that requires admitted students to spend their first semester rotating among three different labs to explore their interests before joining one of our four departments.

MCB Admission requirements include a bachelor's degree in biological or physical sciences, a grade point average of a 3.0 or higher (A = 4.0), prior research experience and three letters of recommendation from individuals who can attest to the applicant's academic and research background. The Graduate Record Examination (GRE) is **not** required. Applicants interested in pursuing a PhD in Microbiology should have a total of at least 15 credit hours of physical or biology sciences, including general biology, or microbiology, chemistry through organic chemistry and biochemistry, and mathematics through calculus. In addition to these requirements, non-native English speaking applicants must attain a minimum Test of English as a Foreign Language (TOEFL) overall score of 96, with at least a score of 22 on the speaking section. MCB does **not** accept the International English Language Testing System (IELTS) to show English proficiency. Graduate College requirements also apply.

Graduate Teaching Experience

Experience in teaching is considered to be a vital part of the graduate program and is required as part of the academic work of all PhD degree candidates. For the Department of Microbiology, a minimum of two semesters of teaching experience is a degree requirement.

Faculty Research Interests

Major areas of research interest include gene expression and regulation in bacteria, archaea, and eukaryotes; virus pathogenesis and host-cell interactions; viruses of bacteria and archaea; membrane biogenesis; lipid and polysaccharide synthesis in bacteria and yeast; cell wall biogenesis; bacterial pathogenesis and bacteria-host interactions; immunology; DNA replication, recombination, and repair; anaerobic microbiology; the biochemistry and physiology of methane formation; mechanisms of oxygen toxicity; bacterial and archaeal genomics, ecology, and evolution. For further details, please consult the Department of Microbiology's website (https://mcb.illinois.edu/departments/microbiology/).

Facilities and Resources

The Microbiology Department is located in the modern Chemical and Life Sciences Laboratory (CLSL). Central to main campus, the CLSL houses all of the major equipment and expertise necessary for research in microbiology, cell biology, molecular biology, genomics, and biochemistry.

The University of Illinois Urbana-Champaign has excellent core facilities to aid in scientific research, many of which are located in buildings adjacent to CLSL. Each core facility has full-time salaried support staff for training and support. The Roy J. Carver Biotechnology Center (http://

biotech.illinois.edu/) includes core research facilities supporting genomics, proteomics, metabolomics, flow cytometry, bioinformatics and translational medical research. The Center for Microscopic Imaging is a campus-wide service center for electron, confocal, and light microscopy.

Several services are available to graduate students for support outside of the classroom and laboratory. The University of Illinois Urbana-Champaign library is the nation's third largest university library, allowing access to reference books and on-line scientific journals. The Writers Workshop offers free, personal writing assistance for class assignments, scientific manuscripts, and theses. Please visit the School of Molecular and Cellular Biology (http://mcb.illinois.edu) to learn about these and other resources available to graduate students.

Financial Aid

All students admitted into the PhD program receive financial support throughout their graduate training. Incoming graduate students are supported by the School of Molecular and Cellular Biology. Several University Fellowships are awarded to outstanding applicants on a competitive basis. Financial support is usually in the form of a research assistantship, teaching assistantship, and/or fellowship. In addition to this stipend, we offer a tuition and service fee waiver. A health insurance fee and other miscellaneous fees, must be paid by the student.

for the degree of Doctor of Philosophy in Microbiology

The requirements for a PhD from the Department of Microbiology include successful completion of course work, teaching, two first-author manuscripts in peer-reviewed journals, passing a preliminary examination and annual assessments of progress thereafter, and writing and depositing a research thesis.

For specific information, visit the Department's Graduate Student Handbook (https://mcb.illinois.edu/media/761/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours

Molecular & Cellular Biology, MS

for the degree of Master of Science in Molecular & Cellular Biology

Graduate Degree Programs in Molecular & Cellular Biology

The Master of Science in Molecular and Cellular Biology (MS in MCB) at Illinois provides a non-thesis, course-based degree program for those students interested in additional advanced preparation for professional or graduate school or for future careers in industry, government or academia. The goal of the program is to provide students with a strong and broad educational background and problem-solving skill set in molecular and cellular biology at the advanced level without requiring a research thesis component. While the MS in MCB program is suitable as preparation for a PhD program in MCB or related areas, it is uncommon for students to enter the MCB PhD program at the University of Illinois after finishing this degree.

The MS in MCB degree program primarily serves two different audiences:

- Those students who wish to obtain a master's degree during a post-baccalaureate gap year, but prior to admission to professional or graduate school, by deepening and broadening their scientific knowledge base to better prepare for the next degree program.
- Those students who plan to obtain employment in industry, government, or nongovernmental organizations, where additional coursework at the advanced level would enhance their competitiveness, and in particular, where their laboratory skills could be bolstered through advanced laboratory courses without the necessity of conducting a research-based thesis project.

Students will take foundation and advanced courses from an approved list in the School of Molecular and Cellular Biology, choosing from a wide range of course topics, including biochemistry, molecular genetics, cell biology, microbiology, neurobiology, systems and computational biology, and advanced laboratory methods. Students will take advanced lecture, discussion, and seminar courses that hone scientific critical reading, analytical thinking, and communication skills that are highly desirable for advanced degree programs and future employers.

The MS in MCB degree requires a minimum of two full-time semesters of 16 credit hours each. Many students elect to take three semesters to finish the degree program. Some students may choose to take up 4 semesters to complete the program, particularly if they are employed part-or full-time. To maintain active status in the program, students must register for a minimum of 12 credit hours in 400- or 500-level MCB courses per semester.

Students entering the MS in MCB program will be expected to have completed a Bachelor's degree from an accredited 4-year college or university with undergraduate coursework in biology, chemistry, physics, calculus and English composition. Applicants must have completed the last 60 hours of coursework with grades of B (3.0 on a scale of 1 to 4) or better. Deficiencies in these areas will require additional coursework, as necessary, for successful completion of the degree.

for the degree of Master of Science in Molecular & Cellular Biology

Minimum required major and supporting course work: To maintain active status in the program students must register for a minimum of 12 credit hours in 400- or 500-level MCB courses per semester. A course-based master's degree requires a minimum of two full-time semesters. Consult the List of Approved Courses for the MS in MCB Program (https://mcb.illinois.edu/MS%20in%20MCB%20Approved%20Course%20List/) for the most up-to-date information. For additional details and requirements refer to the MS MCB Program Handbook and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Core Curriculum

---

After completing the MS in MCB degree, students will be able to:

- demonstrate a more comprehensive understanding and knowledge base of the departmental disciplines found in MCB (biochemistry, cell and developmental biology, microbiology and molecular and integrative physiology).
- employ critical thinking and problem-solving strategies to understand molecular mechanisms of biological processes involved in health and disease and other topics that pose research challenges.
- assess the quality and value of bioscience research and clinical literature.
- analyze primary scientific literature in terms of result and data interpretation and drawn conclusions.
- propose future research questions and avenues for exploration.
- communicate scientific knowledge effectively with both scientists and the general population.

Molecular & Integrative Physiology, MS

for the degree of Master of Science in Molecular & Integrative Physiology

The Department of Molecular & Integrative Physiology (MIP) does not admit students to the Molecular & Integrative Physiology MS degree program. Admission to graduate study is only through the PhD degree program. Information about the Molecular & Integrative Physiology degree PhD program can be found on the program's catalog page (p. 1679).

Graduate Degree Program in Molecular & Integrative Physiology

- Molecular & Integrative Physiology, PhD (p. 1679)

The PhD program in molecular and integrative physiology is designed to provide individualized training in preparation for research and teaching careers in molecular, cellular, and integrative physiology. The objective of the training is to produce scientists who are technically competent and broadly educated. Students interested in the MIP PhD program must apply directly to the School of Molecular and Cellular Biology (https://mcb.illinois.edu/departments/molecular-integrative-physiology/pursue-phd-molecular-integrative-physiology/). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December and formally join the appropriate graduate program at that time.

Admission

Applicants interested in the Molecular & Integrative Physiology PhD program will need to apply directly to the School of Molecular and Cellular Biology (MCB) PhD program (https://mcb.illinois.edu/departments/molecular-integrative-physiology/pursue-phd-molecular-integrative-physiology/). The MCB PhD program is an umbrella program that requires admitted students to spend their first semester rotating among three different labs to explore their interests before joining one of our four departments.

MCB Admission requirements include a bachelor's degree in biological or physical sciences, a grade point average of a 3.0 or higher (A = 4.0), prior research experience, and three letters of recommendation from individuals who can attest to the applicant's academic and research background. The Graduate Record Examination (GRE) is **not** required. Applicants interested in pursuing a PhD in Molecular & Integrative Physiology should have a strong background in biology, chemistry, and mathematics. In addition to these requirements, non-native English speaking applicants must attain a minimum Test of English as a Foreign Language (TOEFL) overall score of 96, with a score of at least 22 on the speaking section. MCB does **not** accept the International English Language Testing System (IELTS) to show English proficiency. Graduate College requirements also apply.

for the degree of Master of Science in Molecular & Integrative Physiology

The Department of Molecular & Integrative Physiology does not admit students to the Molecular & Integrative Physiology MS degree program. Admission to graduate study is only through the PhD degree program. Information about the Molecular & Integrative Physiology degree PhD program can be found here (p. 1679). For additional details and requirements refer to the Department's Student Guide (http://mcb.illinois.edu/departments/mip/gradstudentguide.html)and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

for the degree of Master of Science in Molecular & Integrative Physiology

1. Acquire in-depth, leading-edge knowledge of physiological function at multiple levels of biological organization spanning molecular, cellular, tissue and organismal levels.
2. Learn the skills and methodologies of scientific inquiry necessary to conduct original, independent research in physiology that expands the frontiers of knowledge in the field.
3. Develop the professional skills for responsible conduct of research and embody the ethical principles necessary to behave with honesty, integrity, objectivity, and respect in all professional interactions.

4. To develop effective scientific literacy skills necessary to read, write, critique, and analyze a wide range of written materials, including primary scientific literature, review articles, grant proposals, and teaching materials.
5. To become an effective oral communicator of scientific information in multiple settings, including individual and small group discussions, seminars, classroom instruction, and public engagement.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Molecular & Integrative Physiology, PhD

for the degree of Doctor of Philosophy in Molecular & Integrative Physiology

The doctoral program uses a flexible approach to curriculum requirements. Students are required to take two core courses, three laboratory rotations (five weeks each), and electives. The students in consultation with a faculty advisory committee choose additional courses in chemistry, biochemistry, immunology, molecular biology, mathematics, and cell biology. Students are encouraged to begin research as soon as they identify an area of research interest. The department has a particularly strong focus in cell physiology, comparative physiology, computational biology, neurophysiology, and endocrinology. Courses and lab research are supplemented by a weekly seminar series. Toward the end of the second year, students must submit a report describing their initial research and pass an oral qualifying examination in order to continue in the PhD program. One year after their qualifying examinations, and no later than the end of their eighth semester in the program, students are expected to take their preliminary examinations in which they present their thesis topic and preliminary research to a faculty committee. Finally, a thesis, which is based on original work in one area of physiology and which demonstrates a thorough knowledge of underlying theories and experimental approaches, must be defended at the final examination. Most students complete their PhD training in four to five years.

Graduate Degree Program in Molecular & Integrative Physiology

- Molecular & Integrative Physiology, PhD (p. 1679)

The PhD program in Molecular and Integrative Physiology (MIP) is designed to provide individualized training in preparation for research and teaching careers in molecular, cellular, and integrative physiology. The objective of the training is to produce scientists who are technically competent and broadly educated. Students interested in the MIP PhD program must apply directly to the School of Molecular and Cellular Biology (http://mcb.illinois.edu/). During the first semester, students perform three laboratory rotations, choosing from any laboratory in the School. Students select a laboratory for their thesis research in December and formally join the appropriate graduate program at that time.

Admission

Applicants interested in the Molecular & Integrative Physiology PhD program will need to apply directly to the School of Molecular and Cellular Biology (MCB) PhD program (https://mcb.illinois.edu/departments/molecular-integrative-physiology/pursue-phd-molecular-integrative-physiology/). The MCB PhD program is an umbrella program that requires admitted students to spend their first semester rotating among three different labs to explore their interests before joining one of our four departments.

MCB Admission requirements include a bachelor's degree in biological or physical sciences, a grade point average of a 3.0 or higher (A = 4.0), prior research experience, and three letters of recommendation from individuals who can attest to the applicant's academic and research background. The Graduate Record Examination (GRE) is **not** required. Applicants interested in pursuing a PhD in Molecular & Integrative Physiology should have a strong background in biology, chemistry, and mathematics. In addition to these requirements, non-native English speaking applicants must attain a minimum Test of English as a Foreign Language (TOEFL) overall score of 96, with at least a score of 22 on the speaking section. MCB does **not** accept the International English Language Testing System (IELTS) to show English proficiency. Graduate College requirements also apply.

Graduate Teaching Experience

Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all PhD candidates in this program. Minimum teaching requirement is 50% for one semester. However, it is strongly recommended that students gain experience equivalent to 50% for at least two semesters.

Financial Aid

Financial support is guaranteed for all students who remain in good academic standing.

MIP Seminars in Physiology		

for the degree of Doctor of Philosophy in Molecular & Integrative Physiology

A student awarded a doctorate in Molecular and Integrative Physiology should be able to:

1. Demonstrate mastery in inquiry and analysis. This is defined as a process of exploring a scientific question in physiology through collection and analysis of data that results in logical conclusions. It also encompasses the ability to break down a question into parts and design experiments to address it.
2. Construct and deliver oral presentations on topics in physiology that are well-prepared and purposeful, using clear, spoken language and polished delivery that is engaging to an audience. Presentation materials should be well-organized and appropriately reference information necessary for the listener to understand and learn from the presentation. Importantly, the presentations need to increase knowledge and foster understanding of the listener.

3. Compose written documents describing topics and research in physiology using correct English grammar that are clear, complete and well-referenced from credible and relevant sources of research literature. Writing must also be audience-appropriate and include the use of figures, tables, and equations as applicable to support the text.
4. Demonstrate critical thinking by critiquing literature, presentations and one's own data before drawing logical conclusions.
5. Practice integrative and applied learning. For our discipline, this is defined as making connections between classroom learning, seminars (on campus or at a scientific meeting), and one's own research. This includes synthesizing the knowledge one has gained and applying it to new situations and applying concepts from other areas of science to questions in physiology.

Music Education, MME

for the degree of Master of Music Education in Music Education

The Master of Music Education degree program is designed to meet the needs and interests of individuals who are already certified to teach music and who seek to continue their careers as public school music educators or music administrators. It is also possible to structure a program that will enable individuals interested in seeking careers in education-related fields or as a step in preparation for eventual college teaching.

Although prior teaching experience is not required for this degree program, the graduate study will be more meaningful if teaching experience in the field has first been gained. Therefore, individuals considering pursuing the MME are urged to plan to teach one to three years before initial enrollment or completing the degree. Students interested in gaining certification to teach music as part of the MME should refer to the MME+certification website for information about the MME+Certification Program.

The School of Music has been accredited by the National Association of Schools of Music since 1933.

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois at Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the Master of Music in Education (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;
3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;
4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the Doctor of Musical Arts programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music.

See the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:

Students who do not meet the language requirement at the time of entrance may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

Music Education, PhD

for the degree of Doctor of Philosophy in Music Education

The doctoral program in music education consists of the Doctor of Philosophy in Music Education. The Ph.D. is tailored to meet the varying needs and interests of individuals seeking a terminal degree in Music Education. The Ph.D. is appropriate for students with a strong background and interest in research. The Ph.D. places emphasis on research and research methodology training. Students entering the Ph.D. program must have already completed a substantial thesis or research project as part of their master's degree.

Admission

For the Doctor of Philosophy in Music Education degree program, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Doctor of Philosophy in Music Education

The PhD in Music Education at Illinois emphasizes professional preparation for careers as researchers, music teacher educators, and leaders in the field. Doctoral students enroll in courses that provide depth and breadth in research approaches, theoretical and scholarly analysis, and opportunities to conduct research studies under the guidance of faculty members in music education and across campus. Participation in the MOSAIC Consortium, an ongoing scholarly community of doctoral students and faculty, is a critical part of the doctoral experience at Illinois.

1. Students in the PhD Program in Music Education will demonstrate knowledge of rigorous methods for conducting scholarly inquiry related to music teaching and learning. [Research]
2. Students in the PhD program in Music Education will contribute to the discovery of new evidence or the exercise of critical judgment in research and scholarship, applying and synthesizing key methodological and theoretical perspectives from their research course preparation. [Research]
3. Students in the PhD Program in Music Education will develop a research agenda for primary and secondary research emphases.[Research]
4. Students in the PhD Program in Music Education will demonstrate their ability to plan, implement, and reflect on college-level teaching. [Music Teacher Education]
5. Students in the PhD Program in Music Education will apply understanding of educational philosophy, curriculum design, methods of teaching and evaluation, and supervision of study teaching to undergraduate music teacher preparation.[Music Teacher Education]
6. Students in the PhD Program in Music Education will exhibit leadership in areas of vital importance to the field, such as curricular reform, music teacher education, community music, and social justice. [Professional Leadership]

Music, AD

for the Artist Diploma in Music

The fields of specialization for the Artist Diploma are keyboard, voice, and orchestra/band instruments. The degree is intended only for musicians at the highest level of artistic accomplishment and potential, and the entrance audition must reflect this exceptional standard. Upon completion of the Artist Diploma, students are expected to be ready for entrance into the music profession as a solo artist, member of an orchestra or chamber or jazz ensemble, or as an apprentice in an opera company, and should be prepared to compete effectively in international competition.

The University of Illinois Urbana-Champaign's School of Music complies with the U.S. Department of Education's Gainful Employment requirements by disclosing information to applicants regarding our Artist Diploma program.

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the Master of Music in Education (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;
3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;
4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the Doctor of Musical Arts programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music.

See the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:

Students who do not meet the language requirement at the time of entrance may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the Artist Diploma in Music

Code	Title	Hours

Music, DMA

for the degree of Doctor of Musical Arts in Music

The School of Music offers comprehensive musical training for students who seek to combine their artistic and academic interests through pursuit of the Doctoral of Musical Arts.

Students must choose a concentration:

- Choral Music (p. 1697)
- Collaborative Piano (p. 1700)
- Instrumental Conducting - Orchestra (p. 1703)
- Instrumental Conducting — Wind Band (p. 1706)
- Jazz Performance (p. 1710)
- Music Composition (p. 1714)
- Performance & Literature (p. 1717)
- Vocal Coaching & Accompanying (p. 1721)

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the **Master of Music in Education** (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;
3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;

4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the complete English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the **Doctor of Musical Arts** programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music.

See the complete English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:

Students who do not meet the language requirement at the time of entrance may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Doctor of Musical Arts in Music

Learning Outcomes

Collaborative Piano

Students in the Doctor of Musical Arts program, with a concentration in Collaborative Piano will be able to do the following at the outcome of the program:

1. Develop performance skills in their major area at the highest professional level, using creative and critical thinking to inform stylistic choices and artistic expression while demonstrating spontaneity and collaboration as appropriate, and will communicate their artistry to diverse audiences.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.
3. Demonstrate an ability to summarize, synthesize, and critique disciplinary content (including pedagogical material) in relation to their major and secondary (cognate) areas of study.
4. Demonstrate effective analytical and interpretative skills in music theory and musicology, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral forms.

5. Pursue additional, specialized studies, to develop expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. 6) Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written, oral, and performative forms.
7. Additionally, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, gaining insights into studio and/or classroom teaching and appropriate methods of evaluation.

Instrumental Conducting (Orchestra or Wind band) and Choral Music

Students in the Doctor of Musical Arts program, with a concentration in Instrumental Conducting (orchestra) or Instrumental Conducting (wind band) or Choral Music [which is a degree in choral conducting], will:

1. Develop conducting skills at the highest professional level, using creative and critical thinking to inform stylistic choices and artistic expression, while demonstrating appropriate spontaneity, and will communicate their artistry to diverse audiences; in addition, students will demonstrate effective, musical, and efficient rehearsal techniques.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.
3. Demonstrate an ability to summarize, synthesize and critique disciplinary content in relation to their major and secondary (cognate) areas of study; in the major area, students will demonstrate a thorough knowledge of the core repertoire.
4. Demonstrate effective analytical and interpretative skills in music theory, musicology and/or performance practice, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral forms.
5. Pursue specialized studies, to develop expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written, oral, and performative forms.
7. In addition, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, also gaining insights into rehearsal strategies for large ensemble in the major area, and appropriate methods of student evaluation.

Jazz Performance

Students in the Doctor of Musical Arts program, with a concentration in Jazz Performance, will:

1. Develop performance skills in their major area at the highest professional level, using critical thinking and analysis to inform stylistic choices and individual artistic expression while demonstrating spontaneity and collaboration with others, and will communicate their creativity to diverse audiences.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.
3. Demonstrate an ability to summarize, synthesize and critique disciplinary content (including pedagogical material) in relation to their major and secondary (cognate) areas of study.
4. Demonstrate effective analytical and interpretative skills in music theory and musicology, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral form.
5. Pursue specialized studies, to demonstrate expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written, oral, and performative forms.
7. In addition, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, gaining insights into studio and/or classroom teaching and appropriate methods of evaluation.

Music Composition

Students in the Doctor of Musical Arts program, with a concentration in Music Composition will:

1. Develop their musical craft and creativity at the highest professional level, using critical thinking, analysis and technology to inform stylistic choices and artistic expression, and will communicate their creativity to diverse audiences through performances of their music.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.
3. Demonstrate an ability to summarize, synthesize and critique disciplinary content (including pedagogical material) in relation to their major and secondary (cognate) areas of study.
4. Demonstrate effective analytical and interpretative skills in music theory and musicology, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral forms.

5. Pursue specialized studies, to demonstrate expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. Exhibit their musical creativity through the production of an original, large-scale composition and will demonstrate their ability to communicate the conceptual and artistic framework for their work clearly and professionally in written and/or oral forms.
7. Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written or oral forms.
8. In addition, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, gaining insights into studio and/or classroom teaching and appropriate methods of evaluation.

Performance & Literature and Vocal Coaching & Accompanying

Students in the Doctor of Musical Arts program, with a concentration in Performance and Literature, or Vocal Coaching and Accompanying will:

1. Develop performance skills in their major area at the highest professional level, using creative and critical thinking to inform stylistic choices and artistic expression while demonstrating spontaneity and collaboration as appropriate, and will communicate their artistry to diverse audiences.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.
3. Demonstrate an ability to summarize, synthesize, and critique disciplinary content (including pedagogical material) in relation to their major and secondary (cognate) areas of study.
4. Demonstrate effective analytical and interpretative skills in music theory and musicology, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral forms.
5. Pursue additional, specialized studies, to develop expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written, oral, and performative forms.
7. Additionally, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, gaining insights into studio and/or classroom teaching and appropriate methods of evaluation.

Music: Choral Music, DMA

for the degree of Doctor of Musical Arts in Music, Choral Music Concentration

The School of Music has been an accredited member of the National Association of Schools of Music since 1933.

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree in music performance.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the **Master of Music in Education** (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;
3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;
4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the **Doctor of Musical Arts** programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:

Students who do not meet the language requirement at the time of entrance may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Doctor of Musical Arts in Music, Choral Music Concentration

---

Students in the Doctor of Musical Arts program, with a concentration in **Instrumental Conducting (orchestra) or Instrumental Conducting (wind band) or Choral Music** [which is a degree in choral conducting], will:

1. Develop conducting skills at the highest professional level, using creative and critical thinking to inform stylistic choices and artistic expression, while demonstrating appropriate spontaneity, and will communicate their artistry to diverse audiences; in addition, students will demonstrate effective, musical, and efficient rehearsal techniques.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.
3. Demonstrate an ability to summarize, synthesize and critique disciplinary content in relation to their major and secondary (cognate) areas of study; in the major area, students will demonstrate a thorough knowledge of the core repertoire.
4. Demonstrate effective analytical and interpretative skills in music theory, musicology and/or performance practice, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral forms.
5. Pursue specialized studies, to develop expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written, oral, and performative forms.
7. In addition, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, also gaining insights into rehearsal strategies for large ensemble in the major area, and appropriate methods of student evaluation.

Music: Collaborative Piano, DMA

for the degree of Doctor of Musical Arts in Music, Collaborative Piano Concentration

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources page (https://music.illinois.edu/graduate-academic-affairs/) for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the Master of Music in Education (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;
3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;
4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Urbana-Champaign Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the Doctor of Musical Arts programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources page (https://music.illinois.edu/resources/) for more information.

Applicants to the **DMA** or **PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the **Doctor of Musical Arts** programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including 1 year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:

For those students who do not meet the language requirement at the time of entrance, it may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or by satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Doctor of Musical Arts in Music, Instrumental Conducting Wind Band Concentration

---

Students in the Doctor of Musical Arts program, with a concentration in **Instrumental Conducting (orchestra) or Instrumental Conducting (wind band) or Choral Music** [which is a degree in choral conducting], will:

1. Develop conducting skills at the highest professional level, using creative and critical thinking to inform stylistic choices and artistic expression, while demonstrating appropriate spontaneity, and will communicate their artistry to diverse audiences; in addition, students will demonstrate effective, musical, and efficient rehearsal techniques.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.
3. Demonstrate an ability to summarize, synthesize and critique disciplinary content in relation to their major and secondary (cognate) areas of study; in the major area, students will demonstrate a thorough knowledge of the core repertoire.
4. Demonstrate effective analytical and interpretative skills in music theory, musicology and/or performance practice, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral forms.
5. Pursue specialized studies, to develop expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written, oral, and performative forms.
7. In addition, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, also gaining insights into rehearsal strategies for large ensemble in the major area, and appropriate methods of student evaluation.

Music: Jazz Performance, DMA

for the degree of Doctor of Musical Arts in Music, Jazz Performance Concentration

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology

and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the **Master of Music in Education** (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;
3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;
4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the **Doctor of Musical Arts** programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:

Students who do not meet the language requirement at the time of entrance may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Doctor of Musical Arts in Music, Music Composition Concentration

Students in the Doctor of Musical Arts program, with a concentration in Music Composition will:

1. Develop their musical craft and creativity at the highest professional level, using critical thinking, analysis and technology to inform stylistic choices and artistic expression, and will communicate their creativity to diverse audiences through performances of their music.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.

3. Demonstrate an ability to summarize, synthesize and critique disciplinary content (including pedagogical material) in relation to their major and secondary (cognate) areas of study.
4. Demonstrate effective analytical and interpretative skills in music theory and musicology, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral forms.
5. Pursue specialized studies, to demonstrate expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. Exhibit their musical creativity through the production of an original, large-scale composition and will demonstrate their ability to communicate the conceptual and artistic framework for their work clearly and professionally in written and/or oral forms.
7. Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written or oral forms.
8. In addition, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, gaining insights into studio and/or classroom teaching and appropriate methods of evaluation.

Music: Performance & Literature, DMA

for the degree of Doctor of Musical Arts in Music, Performance & Literature Concentration

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the **Master of Music in Education** (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;
3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;
4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the **Doctor of Musical Arts** programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:
Students who do not meet the language requirement at the time of entrance may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Doctor of Musical Arts in Music, Performance & Literature Concentration

---

Students in the Doctor of Musical Arts program, with a concentration in Performance and Literature, or Vocal Coaching and Accompanying will:

1. Develop performance skills in their major area at the highest professional level, using creative and critical thinking to inform stylistic choices and artistic expression while demonstrating spontaneity and collaboration as appropriate, and will communicate their artistry to diverse audiences.
2. Develop a secondary area of expertise to demonstrate discipline-related breadth at an advanced level, and/or the acquisition of new professional skills.
3. Demonstrate an ability to summarize, synthesize, and critique disciplinary content (including pedagogical material) in relation to their major and secondary (cognate) areas of study.
4. Demonstrate effective analytical and interpretative skills in music theory and musicology, as well as an ability to communicate an advanced understanding and evaluation of musical knowledge and ideas in written and/or oral forms.
5. Pursue additional, specialized studies, to develop expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. Utilize and apply appropriate research methods to explore a focused research topic and to contribute original perspectives to discipline-related knowledge, communicating their research findings clearly and professionally in written, oral, and performative forms.
7. Additionally, many Illinois DMA students will develop experience and expertise in instruction, pedagogy, and student assessment in at least one area of musical study, gaining insights into studio and/or classroom teaching and appropriate methods of evaluation.

Music, MMUS

for the degree of Master of Music in Music

Students must choose a concentration:

- Choral Music (p. 1727)
- Collaborative Piano (p. 1729)
- Instrumental Conducting - Band (p. 1732)
- Instrumental Conducting - Orchestra (p. 1734)
- Jazz Performance (p. 1736)
- Music Composition (p. 1738)
- Musicology (p. 1740)
- Performance & Literature (p. 1743)
- Piano Pedagogy (p. 1745)
- Vocal Coaching & Accompanying (p. 1747)

The School of Music has been accredited by the National Association of Schools of Music since 1933.

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the Master of Music in Education (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;

3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;
4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the complete English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the Doctor of Musical Arts programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music.

See the complete English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:

Students who do not meet the language requirement at the time of entrance may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

- Vocal Coaching & Accompanying (p. 1747)

The School of Music has been an accredited member of the National Association of Schools of Music since 1933.

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/). Fall admission only.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

Applicants to the **MM** must present an iBT score of 90 for the Master of Music (MM). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

For all Graduate Degrees:

For those students who do not meet the language requirement at the time of entrance, it may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester, or by satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Master of Music in Music, Choral Music Concentration

---

Students in the Master of Music (MM) program, with concentrations in Instrumental Conducting (Wind Band), Instrumental Conducting (Orchestra), and Choral Music will:

1. Develop conducting skills at a high professional level, using creative and critical thinking to inform stylistic choices and artistic expression while demonstrating appropriate spontaneity, and will communicate their artistry to diverse audiences; in addition, students will demonstrate effective, musical, and efficient rehearsal techniques.
2. Exhibit an ability to summarize, synthesize, and discuss disciplinary content in relation to their major area of study (including a thorough knowledge of core repertoire), and to communicate their findings, using appropriate academic conventions, in written, oral and/or performative form.
3. Demonstrate an understanding of appropriate methods for library-based musical research and scholarly writing, and a facility in handling print and technology sources.
4. Demonstrate effective analytical and interpretative skills in music theory, musicology, or performance practice, as well as an ability to communicate an advanced understanding of that knowledge and ideas in written and/or oral form.
5. Pursue specialized studies, to develop expertise and an ability to synthesize knowledge in areas of interest that enhance their required curriculum and/or professional goals.
6. In addition, some Illinois MM students will develop experience and expertise in instruction, pedagogy, and student assessment in one or more areas of musical study, also gaining insights into rehearsal strategies for large ensemble, and appropriate methods of student evaluation.

Music: Music Composition, MMUS

for the degree of Master of Music in Music, Music Composition Concentration

---

Students must choose a concentration:

- Choral Music (p. 1727)
- Collaborative Piano (p. 1729)
- Instrumental Conducting - Band (p. 1732)
- Instrumental Conducting - Orchestra (p. 1734)
- Jazz Performance (p. 1736)
- Music Composition (p. 1738)

- Musicology (p. 1740)
- Performance & Literature (p. 1743)
- Piano Pedagogy (p. 1745)
- Vocal Coaching & Accompanying (p. 1747)

The School of Music has been accredited by the National Association of Schools of Music since 1933.

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/). Fall admission only

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies in addition to fulfilling all requirements for the graduate degree.

The School of Music requires all new MM students to complete entrance examinations in music theory and musicianship. These exams take place the week before the fall term begins.

Applicants to the MM whose native language is not English must present an iBT score of 90 for the Master of Music (MM). A TOEFL iBT score of 103 or higher is required for full-status admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Master of Music in Music, Musicology Concentration

---

Students in the Master of Music with a concentration in (1) Musicology (thesis option) and (2) Musicology (non-thesis option) will:

1. Acquire a familiarity with the methodological and interpretative conventions of the discipline (such as historiography, source study, theory, ethnography, analysis & aesthetics), while developing a foundational knowledge of specific areas of musicological study.
2. Develop an independent research topic, demonstrating fluency with primary sources and secondary scholarship, as well as showing appropriate skills in foreign language(s), communicating research objectives, methods, and conclusions in oral and written forms, and making a contribution to musicological knowledge and understanding.
3. Pursue specialized studies, developing expertise and synthesizing knowledge and ideas in areas of interest that enhance their required curriculum and/or professional goals.
4. Develop skills in musical performance by participating in a musical ensemble, demonstrating spontaneity and collaboration as appropriate.
5. Develop experience in university-level instruction and assessment in at least one area of musicology, gaining insights into classroom teaching, syllabus design, appropriate methods of evaluation, and current pedagogical issues within the discipline.
6. Gain experience of the workings of the profession and develop a foundational understanding of how to function successfully as a musicologically-trained scholar in a variety of career paths.

Musicology, PhD

for the degree of Doctor of Philosophy in Musicology

The Ph.D. in Musicology is intended for those whose interests lie in research in the history of music, systematic musicology, or ethnomusicology.

The School of Music has been accredited by the National Association of Schools of Music since 1933.

Admission

For all degree programs, consult the admission requirements stated on the School of Music's website (https://music.illinois.edu/prospective-students/).

Requirements for admission to the **Master of Music (MM)** programs are a Bachelor of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution. Students holding other degrees may be admitted but will be expected to make up for any deficiencies and fulfill all requirements for the graduate degree.

Applicants to choral music, instrumental conducting (wind band or orchestra), jazz performance, piano pedagogy, performance and literature, and vocal accompanying and coaching must pass a qualifying audition for their major area or submit satisfactory recordings. Applicants in musicology and composition must present writings or other evidence of their ability to pursue work at the graduate level. The Graduate Record Examination (GRE) is not required.

The School of Music requires all-new MM students to complete entrance examinations in music theory and musicianship (excluding Musicology). These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/graduate-academic-affairs/) page for more information.

A prerequisite for admission to the **Artist Diploma** is a bachelor's degree.

Applicants to the **MM and the Artist Diploma (AD)** whose native language is not English must present an iBT score of 79 for admission to the Artist Diploma (AD), 90 for the Master of Music (MM), excluding Musicology; MM in Musicology requires an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. Please see the full English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/). Fall admission only; other terms of entry by departmental petition approval only.

Requirements for admission to the **Master of Music in Education** (MME) are:

1. Undergraduate degree in music education from an accredited institution;
2. An overall grade average for the last 60 credit hours of undergraduate work of at least 3.0 (on a 4.0 scale). The grade average for Music Education and Education courses, when averaged separately, must also be at least 3.0 (on a 4.0 scale);
3. Recommendations from three individuals who can discuss the applicant's musicianship, ability to undertake graduate-level study, and teaching ability/potential.
4. The Graduate Record Exam (GRE) is not required for application to the MME, nor do MME students take placement tests in music theory or music history.

For MME applicants with public school experience:

1. recommendation from a principal or supervisor who speaks primarily to the quality of the applicants teaching experience;
2. recommendation from an individual who speaks primarily to the quality of the applicant's musicianship;
3. recommendation from an individual who speaks primarily to the applicant's potential for completion of graduate-level study;
4. applicants who wish to be considered for a Teaching Assistantship should ensure that at least one of their references provides specific comments on their potential to engage in university-level teaching duties associated with such an appointment.

For MME applicants without public school experience:

1. recommendation from a music education professor;
2. recommendation from an applied or ensemble music professor;
3. recommendation from an individual who can speak to the applicant's potential for completion of graduate study.

Applicants seeking admission to the MME + Licensure program should review the online requirements (https://music.illinois.edu/prospective-students/).

Applicants to the **MME** whose native language is not English must present an iBT score of 96 for the Master of Music Education (MME). A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the complete English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

The School of Music offers an academic year program and a Summers-only MME. For academic year applications, the School of Music offers Fall admission only; spring term of entry by departmental petition approval only.

Requirements for admission to the **Doctor of Musical Arts** and the **Doctor of Philosophy** in Musicology programs are the Master of Music degree from the University of Illinois Urbana-Champaign or an equivalent degree from another accredited institution.

Applicants to the **Doctor of Musical Arts** programs must have:

1. a high level of proficiency in composition, conducting, or performance - candidates in composition must submit original scores for review, and candidates in performance and literature must pass a qualifying audition or submit satisfactory recordings; and
2. appropriate experience in ensemble performance and/or score reading. Candidates in voice and vocal accompanying and coaching must have fulfilled all foreign language requirements considered prerequisites for the Master of Music degree, including one year of college-level study in Italian, French, and German.

The School of Music requires all new **DMA** students to complete entrance examinations in music theory, musicianship, and score reading. These exams take place the week before the fall term begins. See the School of Music's Graduate Resources (https://music.illinois.edu/resources/) page for more information.

Applicants to the **DMA or PhD** whose native language is not English must submit an iBT score of 96. A TOEFL iBT of 103 or higher is required for Full Status Admission to the University of Illinois Graduate College and School of Music. See the complete English proficiency requirements (https://music.illinois.edu/english-proficiency-requirement/).

See information about admission to the MME and PhD in Music Education (https://music.illinois.edu/admissions/graduate/graduate-degrees/).

Language Requirements

For the Master of Music program, applicants in voice and vocal accompanying and coaching must have had at least one year each of college-level French, German, and Italian or the equivalent. Applicants in other applied music areas, composition, conducting, and musicology must have had one year of any language at the college level or the equivalent.

All Doctor of Musical Arts candidates must demonstrate proficiency in at least one language other than English. Each area may specify which language is required or may require proficiency in more than one language. Please review the current Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/) for more details.

Proficiency is required in two languages, depending on the proposed field of specialization, for candidates in the Doctor of Philosophy in Musicology program. This may be demonstrated through two years of undergraduate study in each language.

For all Graduate Degrees:

Students who do not meet the language requirement at the time of entrance may be satisfied by evidence of two years of undergraduate study or the equivalent, or by completion of a two-semester or satisfactory test scores. For up-to-date information regarding the language requirements of the School of Music, please see the Graduate Music Handbook (https://music.illinois.edu/graduate-handbooks/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an essential part of the graduate experience.

Financial Aid

Fellowships, teaching, graduate, and research assistantships are awarded on a one-year basis, with continuation dependent upon success in the program. Specific information on application procedures is available from the Music Admissions Office, by phone (217) 244-7899, or by email (musicadmissions@illinois.edu).

for the degree of Doctor of Philosophy in Musicology

For additional details and requirements refer to the department's Graduate Handbook (https://music.illinois.edu/graduate-handbooks/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours
Minimum of 8 hours selected from:		8
MUS 516	Fieldwork and Ethnography	
MUS 519	Analytical Methods: Musicology	
MUS 520	Social Theory in Ethnomusicology	
MUS 523	Seminar in Musicology	
Supporting Coursework		24

Students are expected to take courses in fields outside music that are appropriate to the proposed area of thesis research	
Masters Degree Required for Admission to PhD?	Yes
Qualifying Exam Required:	No
Preliminary Exam Required (taken after all coursework is completed):	Yes
Final Exam/Dissertation Defense Required:	Yes
Dissertation Deposit Required:	Yes
Minimum GPA:	3.0

for the degree of Doctor of Philosophy in Musicology

Students in the PhD in Musicology program will:

1. Acquire a familiarity with the methodological and interpretative conventions of the discipline (e.g. historiography, theory, ethnography, source studies, analysis & aesthetics), while developing an in-depth and discriminating knowledge of specific areas of musicological study.
2. Develop an independent area of research, demonstrating command of primary sources and secondary scholarship, as well as appropriate skills in foreign language(s), and making an original contribution to musicological knowledge and understanding at the highest professional level.
3. Develop expertise in areas of scholarship outside of musicology and apply that expertise to individual research projects.
4. Exhibit a sophisticated ability to communicate their research objectives, methods, and conclusions in written, oral, and other formats to a variety of audiences.
5. Develop experience in university-level instruction and assessment in at least one area of musicology, gaining insights into classroom teaching, syllabus design, appropriate methods of evaluation, and current pedagogical issues within the discipline.
6. Gain experience of the workings of the profession and develop a multi-faceted understanding of how to function successfully as a musicologically-trained scholar in a variety of career paths.

Natural Resources & Environmental Sciences, MS

for the degree of Master of Science in Natural Resources & Environmental Sciences (on campus & online)

The Department of Natural Resources and Environmental Sciences is a broad and diverse department offering flexible M.S. and Ph.D. degrees. The mission of the department is to establish and implement research and educational programs that enhance environmental stewardship in the management and use of natural, agricultural, and urban systems in a socially responsible manner. The department is composed of approximately 24 faculty, 60 affiliates, and 160 graduate students. Offering education and research in a variety of disciplines, the department provides a systems-level perspective that few other departments can offer. Further illustrating the breadth of natural resources and environmental sciences, research areas include but are not limited to:

- agronomy/agroecology
- aquatic chemistry
- conservation ecology
- ecosystem science
- environmental education
- fish and wildlife ecology and management
- forest ecology
- humans dimensions of the environment
- landscape ecology
- microbial ecology
- natural resource economics
- natural resource policy
- plant ecology
- physiology and genetics
- restoration ecology
- quantitative and spatial analysis
- soil science and conservation
- sustainability

Admission

Thesis Program (on campus)

NRES graduate advisers are seeking students with strong letters of reference, evident motivation to undertake graduate study, relevant experience, and good preparation in prerequisite courses. Graduate applicants must have an undergraduate grade point average (GPA) of 3.0 (A = 4.0) calculated on the last 2 years of undergraduate coursework to be admitted with full status. Ph.D. applicants must have earned an M.S. (or expect to be awarded the degree before beginning the NRES program) with a grade point average of at least 3.5. Applicants should have adequate preparation in the fundamental sciences and courses appropriate to their proposed field of study (applicants should talk with prospective advisers about the background they expect). Those without the necessary prerequisites may be accepted conditionally, and the undergraduate courses must be completed before the degree will be awarded. The Graduate Record Exam (GRE) is not required of M.S. and Ph.D. applicants. However, consideration for some fellowships does require GRE scores. Students whose native language is not English are required to submit the results of the TOEFL or IELTS as evidence of English proficiency. Official scores are required to be submitted directly from TOEFL/ETS or IELTS to the University. Please see Minimum English test scores (https://grad.illinois.edu/admissions/apply/begin/international/) and other information for international applicants. Applicants who are not U.S. citizens must also submit evidence that they have sufficient financial support for their program of study. Prospective graduate students are urged to apply for admission to the degree program as early as possible, preferably six to ten months before the beginning of the semester in which they expect to enroll. Prospective students must review important application information (https://nres.illinois.edu/academics/graduate-degrees/graduate-student-resources/). Applicants to the campus programs wishing to be considered for a university-level fellowship must apply for admission to the fall semester by December 15th, and, to be considered for any college or departmental funding, the application deadline is January 1st.

Non-Thesis Program (online)

Requirements and processes for application to the NRES Online M.S. program are available here (https://nres.illinois.edu/future-students/admissions/online-graduate-admissions/). The following application deadlines apply:

- Fall semester - June 15
- Spring semester - November 15
- Summer term - March 15

Graduate Teaching Experience

Although teaching is not a Graduate College requirement, experience in teaching is considered an important part of this graduate program, particularly for Ph.D. students.

Faculty Research Interests

Graduate degree programs in NRES are informed by the major areas of faculty research, which include:

- agronomy/agroecology
- conservation ecology
- ecosystem science
- fish and wildlife ecology and management
- forest ecology
- global environmental change
- human dimensions of natural resources and ecology
- landscape ecology
- microbial ecosystems
- natural resource policy
- plant ecology
- physiology and genetics
- quantitative and spatial methods
- restoration ecology
- soil science and conservation
- sustainability
- water/biogeochemistry
- wetland ecology

Financial Aid

For full-time students pursuing the thesis option on campus, several sources of financial aid are available within the department:

- research assistantships, supported by federal and grant funds made available to the natural resources and environmental sciences faculty
- teaching assistantships
- departmental fellowships
- University fellowships
- College of Agricultural, Consumer and Environmental Sciences Jonathan Baldwin Turner Fellowships
- waivers of tuition and fees

Most NRES graduate students with financial support have a research assistantship provided by the adviser. Appointments as research and teaching assistants and fellows provide a stipend and waive tuition and some fees.

Financial aid is granted on a competitive basis. Applicants are judged for academic potential based on past performance, experience, motivation, dedication to the designated area of interest and, where applicable, the potential to satisfy the objectives of a donor. Some fellowships have minimum GPA and GRE score requirements. Information about the current availability of financial aid can be obtained from the graduate coordinator or, in the case of research assistantships, directly from faculty members working in the area of interest.

for the degree of Master of Science in Natural Resources and Environmental Sciences (on campus & online)

Two options are open to students who wish to pursue a Master of Science degree in the Department of Natural Resources and Environmental Sciences. The M.S. Thesis Option program helps students develop into researchers. Coursework is no longer the primary focus, and students learn how to create, plan, and carry out independent research. The M.S. Non-Thesis Option program guides students in the acquisition of professional expertise beyond the undergraduate degree. The program requires a culminating/capstone experience, which may be satisfied in one of three ways: an individual investigative project, a collaborative, possibly interdisciplinary, group project, or a professional internship experience. The Non-Thesis Option may also be appropriate in special cases where a student executes a major special project which is equivalent to a M.S. thesis, but which does not lend itself to the thesis format. Students on campus are admitted into the thesis option and, under certain conditions, may be allowed to transfer into the non-thesis option by petitioning the Department. In contrast, all students in the online M.S. program are admitted into the non-thesis option and, under certain conditions, may be allowed to transfer into the thesis option by petitioning the Department.

The thesis option requires that the student satisfactorily complete a minimum of 32 hours of graduate coursework, of which a minimum of 12 graduate hours are 500- level courses. This coursework shall include NRES Seminar (500) each semester, minus one, that the student is enrolled, Professional Orientation (594) and 4 to 12 graduate hours of Thesis Research (599), which culminates in the completion and oral defense of a thesis.

A non-thesis option student must satisfactorily complete a minimum of 32 hours of graduate coursework, of which a minimum of 12 graduate hours are 500- level courses, Professional Orientation (594), and 3 to 8 hours of capstone experience in the form of a Capstone Research Project (503), Capstone Internship Experience (505), or Capstone Group Research Project (507). The student must prepare and submit a report analyzing the capstone learning experience and perform satisfactorily on written and oral final examinations.

The online M. S. graduate program in NRES enables students to continue their education in disciplines related to natural resources and environmental sciences through part-time study at locations away from the Urbana-Champaign campus. This program meets the needs of persons currently working or wanting to work in the areas of conservation, ecology, restoration ecology, soil science, sustainable development, urban ecology, urban forestry, urban wildlife management, and water resources management. Students can enroll in individual courses for professional and/or academic advancement, or apply for admission to the M.S. degree program. All online M.S. students are admitted to the non-thesis option, though, under certain conditions, a degree-seeking online student may petition the Department to transfer to the thesis option. Application deadlines and other important information are available online (https://nres.illinois.edu/future-students/admissions/graduate-admissions/).

For additional details and requirements refer to the department's Graduate Handbook (https://nres.illinois.edu/academics/graduate-degrees/graduate-student-resources/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

This degree program can be completed either on campus or online; with or without a thesis, the requirements are listed below:

Thesis Option

Code	Title	Hours
Thesis Option:		
NRES 594	NRES Professional Orientation	1
Electives		19-27
NRES 599	Thesis Research (min/max applied toward degree)	4-12
Completion, defense and deposit of thesis		
Total Hours	**Thesis Option**	**32**
Non-Thesis Option:		
NRES 594	NRES Professional Orientation	1
Select one of the following:		
NRES 503	Capstone Research Project	
NRES 505	Capstone Internship Experience	
Electives		23-28
Written final examination; preparation, presentation, oral exam, and approval of a capstone project report		
Total Hours	**Non-Thesis Option**	**32**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

for the degree of Master of Science in Natural Resources and Environmental Sciences (on campus & online)

Thesis

1. Student has ability to design and implement research that integrates core knowledge related to their discipline.
2. Student can apply the research tools and techniques, data analysis techniques, and professional skills necessary for their subject matter.
3. Student has written and oral communication skills appropriate for their disciplinary field.
4. Student exhibits professionalism through leadership, well#developed problem solving abilities, and ethical thinking.
5. Student has skills necessary for effective teaching and/or mentoring.

Non-Thesis

Completing the non-thesis M.S. program requires a broad grasp of current scholarly understanding of natural resources and environmental sciences. In particular, students are responsible for demonstrating adequate mastery in four core areas of study:

1. Statistics and Research Design,
2. Spatial Analysis and Modeling,
3. Ecosystem Science and Conservation Biology, and
4. Human Dimensions of the Environment, Stewardship, and Management.

Students must take at least one course in each of these four areas and pass a final written exam that covers them.

In order to graduate, students must demonstrate, at a masters level, the following learning objectives:

1. Broad grasp of current scholarly understanding of natural resources and environmental sciences,
2. Understanding and application of the scientific process,
3. Skills in the analysis and interpretation of relevant scientific information, and
4. Proficiency in communicating scientific information

Progress of each student is evaluated through course performance, a written final examination, the capstone paper, and a final oral examination.

for the degree of Doctor of Philosophy in Natural Resources & Environmental Sciences

---

The Ph.D. program prepares students to be an expert in their fields. Earning a Ph.D. involves mastering a field of study and increasing the knowledge and understanding in that field through the completion of a dissertation that makes a contribution to existing research. Students working toward the Ph.D. degree are required demonstrate competency in at least three content areas by passing a general examination (the preliminary examination) before admission to candidacy for the doctoral degree. Students consult with their advisers to identify their competency content areas and the courses they will take, which are recorded on the Doctoral Plan of Study. The NRES Ph.D. program requires students to register for NRES Seminar (500) each semester, minus two, that the student is enrolled. To earn the doctorate, students must successfully complete a final oral examination (thesis defense). In most cases, students earn a M.S. before starting work on a Ph.D. However, in certain cases, it is possible to take the coursework required for the M.S. as part of a Ph.D. program. Details of the B.S. to Ph.D. program are available from the graduate coordinator.

For additional details and requirements refer to the department's Graduate Handbook (https://nres.illinois.edu/academics/graduate-degrees/graduate-student-resources/)and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Neuroscience, PhD

for the degree of Doctor of Philosophy in Neuroscience

Because of the breadth of the fields in this program, the coursework is tailored to the student's fields of interest as declared by a major and at least two minor areas of concentration. A faculty committee of representatives from the major and minor areas will then meet regularly with the student to plan coursework and research experience. The goal of this plan is to allow maximum flexibility while providing students with close guidance. Courses and laboratory research experience are supplemented by weekly seminars in neuroscience.

Graduate Degree Programs in Neuroscience

- Neuroscience, PhD (p. 1762)

The Neuroscience Program is an interdisciplinary and highly individualized Ph.D. program. Students have varied backgrounds but typically have undergraduate degrees in psychology, biology, electrical engineering, or computer science. The Neuroscience Program guides students to become productive, scholarly neuroscientists with access to careers in academic research, medicine, industry or non-research careers such as law, policy, or journalism. The faculty have broad and diverse research interests; areas of particular strength include aging, brain plasticity, cognitive functions, neurogenomics, molecular bases of development and disease and neuroengineering. Integrative and collaborative studies that bridge two or more labs are encouraged.

Admission

Applications are considered individually by the admissions committee, for the fall semester and subject to final approval by the Graduate College. Graduate Record Examination (GRE) scores are optional. International applicants must meet the minimum English Language requirements as set by the Graduate College at https://grad.illinois.edu/admissions/instructions/04c. Admission and financial aid are considered together.

Financial Aid

The Neuroscience Program is committed to supporting its students and makes every effort to ensure that students who remain in good academic standing receive full support including tuition waiver and stipend throughout their tenure in the program. Support may come in the form of fellowships, traineeships, research assistantships, or teaching assistantships according to the student's qualifications.

for the degree of Doctor of Philosophy in Neuroscience

Because of the breadth of the fields in this program, the coursework is tailored to the student's fields of interest as declared by a major and at least two minor areas of concentration from among those listed above. A faculty committee of representatives from the major and minor areas will then meet regularly with the student to plan coursework and research experience. The goal of this plan is to allow maximum flexibility while providing students with close guidance. Courses and laboratory research experience are supplemented by weekly seminars in neuroscience.

For additional details and requirements refer to the department's Program for Graduate Study (https://neuroscience.illinois.edu/academics/graduate-program/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Code	Title	Hours

NEUR 500	Topics in Neuroscience	2
NEUR 520	Advanced Topics in Neuroscience (Section 2, Professional Development Program.)	1
NEUR 599	Thesis Research (0 min applied toward degree)	0
Total Hours		**96**

Other Requirements

Requirement	Description
Other requirements may overlap	
All students must complete a minimum of one semester of service as a teaching assistant (one semester @50% or 2 semesters @25% appointment) or the requirement may be met by education outreach activity under the supervision of a Neuroscience Program faculty member.	
Masters Degree Required Before Admission to Ph.D.?	No

Information listed in this catalog is current as of 02/2026

Qualifying Exam Required:	Yes
Preliminary Exam Required:	Yes
Final Exam/Defense Required:	Yes
Disseration Deposit Required:	Yes
Minimum GPA:	3.0

for the degree of Doctor of Philosophy in Neuroscience

1. Synthesize, understand, and critically evaluate core neuroscientific principles, particularly within their chosen fields of study
2. Apply knowledge of neuroscientific methods and techniques to evaluate, create, design and carry out experiments.
3. Analyze and interpret scientific data and draw conclusions from it.
4. Effectively communicate (both orally and in writing) to professional and lay audiences.
5. Successfully teach neuroscience courses and mentor students in the discipline.
6. Conduct research ethically and professionally.
7. Develop effective leadership and interpersonal skills to foster collaborations.

Nuclear, Plasma & Radiological Engineering, MS

for the degree of Master of Science in Nuclear, Plasma & Radiological Engineering

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research

Research activities in the Department of NPRE encompass a diverse range of investigation and challenge areas as described on the department's research area website (https://npre.illinois.edu/research/areas/), these include but are not limited to: nuclear science and engineering, radiation processes and transport, materials science, thermal sciences, systems engineering, energy conversion processes and systems, plasma sciences and processing, fusion energy, radiation-based medical imaging and therapy, dosimetry and radiation protection, radiation detection analysis, reliability and risk analysis, energy systems, and international security. Graduate students in the Department are active participants and contributors to these areas of education and research and typically pursue careers in one of these areas. Graduate students in the Department are also encouraged to take part in course work and research activities in other engineering and science departments to complement their professional development in the nuclear engineering field. Faculty in other related fields are available to supervise research for students through formal "affiliate faculty" appointments.

A wide range of major research resources are available for nuclear engineering research. These are described at the department's research facilities website (https://npre.illinois.edu/research/facilities/).

for the degree of Master of Science in Nuclear, Plasma & Radiological Engineering

The MS degree takes at least two semesters and a summer session to complete and normally takes three semesters and a summer session. The curriculum requires courses covering the fundamentals of nuclear engineering and interaction of radiation with matter, plus additional courses in an area of concentration chosen by the student in consultation with an advisor. Typical areas are:

- fission engineering including reactor physics and radiation transport
- reactor analysis, thermal hydraulics, and reactor safety
- fuel cycles, radiation effects, and radioactive waste management
- fusion engineering and technology
- plasma engineering and processing
- nuclear materials, corrosion, and irradiation damage
- neutron scattering
- nuclear nonproliferation and public policy issues
- radiation detector development and homeland security applications
- biomedical imaging, MRI applications, radiation protection, radiation-based therapy, and health physics
- reliability and risk analysis and probabilistic risk assessment
- computational methods including Lie Group, integral-differential equation, Monte Carlo, big data and fuzzy logic applications.

For additional details and requirements refer to the department's printed handbook and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Requirements

Code	Title	Hours
NPRE 599	Thesis Research (min-max applied toward degree)	4-8
NPRE 501 & NPRE 521	Fundamentals of Nuclear Engrg and Interact of Radiation w/Matter	8
NPRE 596	Seminar in Nuclear Sci & Engrg (registration for 1 hour every semester while in residence; credit does not apply toward the degree.)	0
Two or more NPRE courses in an area of concentration		8
Additional 500-level courses		8
Elective courses (subject to Other Requirements and Conditions below)		0-4
Total Hours		**32**

Other Requirements and Conditions

Requirement	Description
Other Requirements and Conditions may overlap	
Credit in NPRE 402 or NPRE 446 does not count toward the degree.	
Minimum GPA:	2.75

for the degree of Master of Science in Nuclear, Plasma & Radiological Engineering

1. Ability to apply knowledge of mathematics, science and engineering
2. Ability to design and conduct experiments and/or computational projects; analyze and interpret data
3. Ability to communicate effectively
4. Demonstrate ability to conduct independent research in a nuclear, plasma or radiological field
5. Ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety

for the degree of Master of Science in Nuclear, Plasma & Radiological Engineering

Admission Requirements

Application for admissions to the master's and doctoral degree programs is open to all graduates in engineering, mathematics, and the physical sciences with a grade point average of at least 3.00 (A = 4.00) for the last two years of undergraduate work and any graduate work completed. Prerequisites for admission include a course in ordinary differential equations plus one other mathematics course beyond calculus; an intermediate course in atomic and nuclear physics or interaction of radiation with matter; a course in electrical circuit theory; a course in thermodynamics; a course in fluid mechanics or continuum mechanics; and a course introducing nuclear engineering. A student may be admitted before completion of these prerequisites, but he or she must allow additional time to make up for these deficiencies; courses taken to make up such deficiencies will not count toward the number of units required for the graduate degree. Transcripts and letters of recommendation are required. Information such as undergraduate class rank is recommended.

For full consideration of fall admission with financial aid, application receipt deadline is December15th. The final deadline for fall admission is February 15th. Students who wish to enter in the spring term should contact the Department before applying. For full consideration of spring admission with financial aid, application receipt deadline is October 15th.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

Financial Aid

Most graduate students receive some form of financial aid. Fellowships (https://grad.illinois.edu/fellowships/about/) are available to support the best applicants. Other students are supported on teaching or research assistantships (https://grad.illinois.edu/assistantships/). Financial aid includes federally sponsored traineeships and fellowships and University and industry fellowships. The University is approved for several fellowships including those from the Department of Energy, Nuclear Regulatory Commission, the National Science Foundation, the Hertz Foundation and others. Part- and full-time assistantships include tuition and partial fee waivers.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Nuclear, Plasma & Radiological Engineering, PhD

for the degree of Doctor of Philosophy in Nuclear, Plasma & Radiological Engineering

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

The Department of Nuclear, Plasma and Radiological Engineering offers both a traditional doctoral program and a direct doctoral program. The traditional doctoral program requires candidates enter with an approved master's degree. The direct doctoral program allows highly qualified applicants with a baccalaureate degree to be admitted directly into the PhD program without an MS degree. The direct PHD program has the same coursework requirements as the MS plus PhD route, however students in the direct PhD do not write an MS thesis and do not receive an MS degree.

Department Research

Research activities in the Department of NPRE encompass a diverse range of investigation and challenge areas as described on the department's research area website (https://npre.illinois.edu/research/areas/), these include but are not limited to: nuclear science and engineering, radiation processes and transport, materials science, thermal sciences, systems engineering, energy conversion processes and systems, plasma sciences and processing, fusion energy, radiation-based medical imaging and therapy, dosimetry and radiation protection, radiation detection analysis, reliability and risk analysis, energy systems, and international security. Graduate students in the Department are active participants and contributors to these areas of education and research and typically pursue careers in one of these areas. Graduate students in the Department are also encouraged to take part in course work and research activities in other engineering and science departments to complement their professional development in the nuclear engineering field. Faculty in other related fields are available to supervise research for students through formal "affiliate faculty" appointments. For a detailed list of current research interests of the faculty, visit the department's Research website (https://npre.illinois.edu/research/).

A wide range of major research resources are available for nuclear engineering research. These are described at the department's Research Facilities website (https://npre.illinois.edu/research/facilities/).

for the degree of Doctor of Philosophy in Nuclear, Plasma & Radiological Engineering

The doctoral candidate must complete course work, pass a qualifying examination, a preliminary doctoral examination, write a doctoral thesis, and successfully defend the thesis at a final examination before a doctoral faculty committee. A doctoral student typically takes several courses in NPRE plus additional courses that support a specialized research area and provide background in mathematics and science. Under exceptional circumstances and by approved petition, doctoral research may be undertaken off campus.

For additional details and requirements refer to the department's printed handbook and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/). Learn more on the Qualifying Exam (http://npre.illinois.edu/academics/graduate-program/qualifying-examination/).

Entering with an approved Master's Degree:

Code	Title	Hours
NPRE 599	Thesis Research (min-max applied toward degree)	40
NPRE 501 & NPRE 521	Fundamentals of Nuclear Engrg and Interact of Radiation w/Matter (if not taken while completing the M.S. degree)	0-8
NPRE 596	Seminar in Nuclear Sci & Engrg (registration for 1 hour every semester while in residence; credit does not apply toward the degree.)	0
Elective Courses (subject to Other Requirements and Conditions below)		16
8 hours of 500-level courses (not including NPRE 501 and NPRE 521)		
4-8 hours of NPRE graduate level courses, not counting 402, 446, 501, 521, 596, or 599		
Total Hours		**64**

Other Requirements and Conditions

Nutritional Sciences, MS

for the Master of Science in Nutritional Sciences

The Division of Nutritional Sciences is the interdisciplinary program for graduate education in nutrition at the University of Illinois Urbana-Champaign. More than 60 faculty, representing 15 different departments in seven colleges on the Urbana and Chicago campuses, are members of the Division. The Division is a comprehensive program of study leading to the M.S. and Ph.D. degrees, alone or in combination with either the M.D. or M.P.H. degrees or the registration in dietetics (R.D.). Flexible graduate programs of study enable students to individualize their coursework and professional training. In addition, extensive research opportunities are available that address the spectrum from research at the level of the genome and proteome to clinical and population-based intervention studies. Specialties are classified into six broad theme areas in which our faculty and students are most active (see Research Interests (http://nutrsci.illinois.edu/research/)). These themes best reflect the areas of nutrition research for which the Division is recognized both nationally and internationally.

Admission

Applicants are expected to have an admission grade point average of 3.0 (A = 4.0) for the last two years of coursework and basic courses in chemistry, biology and mathematics. Deficiencies in these subjects must be removed during the first year of graduate study. The Graduate Record Examination (GRE) is required. Applicants whose native language is not English must achieve a minimum paper-based Test of English as a Foreign Language (TOEFL) score of 550, 213 on the computer-based test or 79 on the iBT TOEFL. Admission in the fall, spring or summer will be considered.

Internship in Dietetics

Students in the Division of Nutritional Sciences can participate in an Academy of Nutrition and Dietetics (AND) accredited graduate dietetic internship program administered through the Department of Food Science and Human Nutrition. The program includes defined graduate course requirements and a six-month dietetic clinical internship. In order to be eligible for the graduate internship program, students must complete all undergraduate course competencies required by the AND for the Registration in Dietetics (R.D.). Students are accepted into the internship by computer matching through the standard dietetic internship application process. More information on the graduate dietetic internship program can be obtained from the Department of Food Science and Human Nutrition (260 Bevier Hall; (217)-244-4498) or online (https://fshn.illinois.edu/academics/graduate-degrees/dietetics-internship/).

Graduate Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Faculty Research Interests

The Division is composed of faculty whose research interests cover many disciplines within nutrition. Descriptions of faculty research interests and a listing of recent publications are available at the Division website. Six broad theme areas are:

- Animal Nutrition
- Biochemical and Molecular Nutrition
- Community Nutrition, Nutrition Education and Consumer Acceptance
- Dietary Bioactive Components
- Food Safety and Toxicology
- Human and Clinical Nutrition

Facilities and Resources

The Division (http://www.nutrsci.illinois.edu/) office is located in room 240 Edward R. Madigan Laboratory. Office and research laboratory facilities utilized by graduate students in Nutritional Sciences are administered by the home department of the student's adviser.

Financial Aid

Financial assistance is available in the form of assistantships, scholarships and fellowships. Applicants seeking fall admission and expecting to be considered for financial assistance should file their applications before the preceding December 15th. Later applications may be considered, depending on the space and support available.

for the Master of Science in Nutritional Sciences

Additional courses are available in:

- human and animal nutrition
- biochemistry
- physiology
- immunology
- endocrinology
- food science
- education
- anthropology
- psychology
- sociology
- statistics
- agricultural economics

The non-thesis degree also requires an oral final exam. Students are not admitted directly into the non-thesis program.

For additional details and requirements refer to the department's Graduate Programs information (http://nutrsci.illinois.edu/about_us/program_description/degree_types/) and the Graduate College Handbook (https://grad.illinois.edu/handbooks-policies/).

Minimum GPA:	3.0
Oral final exam	

for the Master of Science in Nutritional Sciences

1. MS students in the Division of Nutritional Sciences will develop specialized knowledge and advanced training in a signature interdisciplinary research area that will equip them to identify and help solve the complex issues facing the highly interdisciplinary field of nutritional sciences.
2. MS students in the Division of Nutritional Sciences will be able to analyze and interpret data from research and scientific literature and apply experimental results to improve health and well-being.
3. MS students in the Division of Nutritional Sciences will develop an understanding of professional and scientific ethics and the impact of nutritional sciences research methods and outcomes in a societal and global context.
4. MS students in the Division of Nutritional Sciences will develop strong oral and written communication skills to facilitate the dissemination of scientific knowledge or interdisciplinary research findings to technical and non-technical audiences.
5. MS students in the Division of Nutritional Sciences will combine interdisciplinary research with robust professional development and leadership training, distinguishing themselves from other students with a nutritional sciences degree and facilitating a highly successful transition to a career as a leader in academia, industry or policy.

Other requirements may overlap	
Coursework total: with M.S. degree in Nutritional Science (16) or with MS in other field (24)	
Masters Degree Required for Admission to PhD?	No, but Masters level requirements must be met (32 additional hours min)
Qualifying Exam Required	Yes
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Final Exam/Dissertation Defense Required	Yes
Minimum GPA:	3.0

for the Doctor of Philosophy in Nutritional Sciences

1. Doctoral students in the Division of Nutritional Sciences will integrate scientific reasoning and advanced knowledge of the principles of nutritional sciences to effectively explain key concepts of nutrition and metabolism and discuss a broad range of nutritional sciences issues.
2. Doctoral students in the Division of Nutritional Sciences will develop expert level knowledge and training in a signature interdisciplinary research area that will equip them to identify and solve the complex issues facing the highly interdisciplinary field of nutritional sciences.
3. Doctoral students in the Division of Nutritional Sciences will be able to analyze and interpret data from research and scientific literature and apply experimental results to improve health and well-being at the local, national and international levels.
4. Doctoral students in the Division of Nutritional Sciences will develop an understanding of professional and scientific ethics and the impact of nutritional sciences research methods and outcomes in a societal and global context.
5. Doctoral students in the Division of Nutritional Sciences will develop outstanding oral and written communication skills to facilitate effective dissemination of scientific knowledge or interdisciplinary research findings to technical and non-technical audiences.
6. Doctoral students in the Division of Nutritional Sciences will combine interdisciplinary research with robust professional development and leadership training, distinguishing themselves from other students with a nutritional sciences degree and facilitating a highly successful transition to a career as a leader in academia, industry or policy.

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Philosophy, MA

for the degree of Master of Arts in Philosophy

The normal program of graduate study in philosophy is directed toward the Ph.D. The M.A. degree is awarded after completing Stage One. Only under exceptional circumstances and without any commitment of financial aid, students may be allowed to seek only the Master of Arts degree. This happens only rarely. Students seeking solely an M.A. degree are encouraged to apply elsewhere.

Admission
The Graduate College admission requirements apply. Applicants should have had a course in symbolic logic and general courses in the history of ancient and early modern philosophy. Students deficient in these areas may be admitted, but they are required to remedy their deficiencies by taking such courses in their first year. Applicants should also have done some coursework in such central areas of philosophical inquiry as ethics and the theory of knowledge. All applications for admission must be supported by three letters of recommendation from persons qualified to comment on the applicant's aptitude for graduate study in philosophy. They are further required to submit a sample of their written work in philosophy (10-20 pages). International applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL) and submit their scores; a score of at least 600 on the paper-based test (115 on the computer-based test) is required for regular admission. In addition, these students must demonstrate competence in oral English before they will be allowed to assist as preceptors for the department, as described in the information for teaching assistants. (http://cte.illinois.edu/testing/oral_eng/main.html)

The deadline for applications is January 1 for admission in the following fall semester. Students are not normally permitted to start the program in the spring semester. For additional information see the department's information for prospective graduate students (http://philosophy.illinois.edu/grad/admissions/).

Language Requirement
Every student must demonstrate competence in one of the four basic philosophical languages (French, German, Latin, or Greek) or else satisfy an alternative requirement (as described below), before advancing to the Third Stage of the program. In the case of French this may be done by passing with a grade of B or better or by passing an examination administered by the Department of French. In the case of German this may be done by passing with a grade of B or better or by passing an examination administered by the Department of German. In the case of Latin this may be done by passing with a grade of B or better any LAT course at the 300-, 400-, or 500-level. In the case of Greek this may be done by passing with a grade of B or better any GRK course at the 400- or 500-level (with the exception of and). Alternatively students may pass a proficiency examination in Latin or Greek administered by the Department of the Classics, the form of which must be approved by the Director of Graduate Studies.

To substitute a language other than one of the basic four, a student must first obtain approval of his or her adviser and of the Graduate Program Committee. Such approval normally will be granted only where the language is directly relevant to the student's work in philosophy.

The student may petition the Graduate Program Committee to replace the language requirement by an approved program of study in her or his area of research. This petition must include a written justification by the student or the advisor. If written by the student, the justification must be approved by the student's advisor. This program of study should be deemed more useful to the student's research than a study of one the philosophical languages. It may, for example, involve intensive study of specific methods that will greatly enhance the student's research, such as scientific, mathematical, or statistical methods, or it may involve obtaining crucial knowledge of some field outside of philosophy, such as concentrated studies in law, psychology, or religion.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program.

Financial Aid
Students admitted to the Ph.D. program are offered financial aid, in the form of fellowships or assistantships, which cover living expenses and include a waiver of tuition and service fees. This aid will usually be continued for up to five years provided the student is making normal progress. Further details are qualifications are given in the department's graduate regulations (http://philosophy.illinois.edu/grad/regulations/).

for the degree of Master of Arts in Philosophy

The M.A. degree is awarded after completing Stage I. Students may not apply to the M.A. degree program. Students qualify for the M.A. degree by earning at least 32 hours of graduate credit with at least a 3.25 grade point average (A = 4.0), as specified below.

For additional details and requirements refer to the department's Graduate Program Regulations (http://www.philosophy.illinois.edu/grad/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

A one-year residence requirement	
Submission of a substantial essay and passing an oral examination on this essay OR admission to Stage II.	
Minimum GPA:	3.25

for the degree of Master of Arts in Philosophy

The Philosophy Department aims to produce four main learning outcomes.

1. **Philosophical Knowledge:** Students will have advanced familiarity with major figures and movements in the history of western philosophy; with central topics, theories, and debates in epistemology and metaphysics, in ethics and value theory, and in logic; and with current developments in professional philosophy.
2. **Philosophical Reading:** Students will develop advanced ability to analyze persuasive and argumentative prose: identifying the main claims asserted, the reasons alleged to support those claims, and the logical relations between the claims and the reasons, including identifying any gaps in the arguments.
3. **Philosophical Inquiry:** Students will have advanced ability to formulate abstract principles in epistemology and metaphysics, in ethics and value theory, in logic, and in related special topic areas in philosophy; they will have advanced ability to identify consequences of the principles they formulate, and they will have advanced ability to construct arguments for those principles and compare them to competing principles.
4. **Philosophical Writing**: Students will have advanced ability to write clearly and with logical precision on a wide range of important issues, including (but not limited to): civic and social challenges at local, national, and global levels; social and cultural issues related to race, indigeneity, gender, class, sexuality, language, and disability; and the ways that complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are affected by the local identities and ethical choices of individuals and institutions.

Code	Title	Hours
A course distribution requirement: Two graduate-level courses must be taken in each of the department's main areas of concentration: value theory, history of philosophy, and metaphysics-epistemology-philosophy of mind. (Some hours may be completed during Stage I)		0-24
Students must demonstrate competence in symbolic logic, either by passing an approved course in the subject or by passing a proficiency examination administered by the department.		0-4
Regular Seminars (Some hours may be completed during Stage I)		12-24
Graduate-level study outside of Philosophy: Max hours allowed 8 (see department page for details)		0-8
Language Requirement: Students must demonstrate competence in one of the four basic philisophical languages: German, French, Greek, or Latin. See the department for details.		0
PHIL 599	Thesis Research (16 min applied toward degree)	16
Total Hours		**64**

Other Requirements

Requirement	Description
Other requirements may overlap	
Minimum Hours Required Within the Unit:	88

The max. limit of PHIL 583 (Independent Study) hours that can be used to satisfy Ph.D. requirements:	12
Participation in a dissertation seminar is required each term in the Third Stage, as is participation in one regular seminar per year.	
Masters Degree Required for Admission to PhD?	No, but Masters level requirements must be met (32 hours)
Qualifying Exam Required	No
Preliminary Exam Required	Yes
Final Exam/Dissertation Defense Required	Yes
Dissertation Deposit Required	Yes
Minimum GPA:	3.25

The Ph.D. program has three stages. The first stage is completed when a student has earned 32 hours of graduate credit. The second stage is completed when the student has earned 32 additional hours (or, having received a master's degree previously, has earned and has been allowed transfer credit for a total of 64 hours) and has satisfied the preliminary examination requirement, a course distribution requirement, a foreign language requirement, and a logic requirement (see department website for details). Of the 64 hours required for the Ph.D. (beyond the MA level requirements), only 12 can be in Independent Study courses (PHIL 583), and at least 20 must be earned in regular seminars. The third stage is completed when the student has earned another 32 hours of graduate credit (usually in seminars and thesis research) and has satisfied the thesis and doctoral oral examination requirements (see below). Also required in the Third Stage is participation in a dissertation-writing seminar each term and participation in one regular seminar per year. Third-stage regular seminar participation is typically for 2 hours credit, thus totaling 4 hours beyond the 20 hours (min) of seminars required for Stage 2. A minimum grade point average of 3.25 (A = 4.0) is required for the Ph.D. degree. Candidates must also satisfy the Graduate College residence requirement.

Candidates need not take work in a minor field outside the department. In cases in which advanced study in philosophy would be enhanced by study in a related discipline, students may use such related coursework to satisfy the credit requirements for the degree, limited to 8 hours. If a student wishes the work to count as an extra-departmental minor, the minimum number of hours accepted is 8 and the maximum is 16. Courses applied toward the completion of a minor may not be applied toward the completion of the Course Distributions Requirement for the Philosophy Ph.D.

After satisfying these requirements, a candidate for the Ph.D. must submit an acceptable dissertation and pass a final, oral examination on the thesis. The acceptability of the thesis is judged and the final examination administered by the candidate's doctoral committee.

Ph.D. candidates who wish simultaneously to pursue advanced degrees in other disciplines (e.g., medicine or law) are permitted to do so.

for the degree of Doctor of Philosophy in Philosophy

The Philosophy Department aims to produce five main learning outcomes.

1. **Philosophical Knowledge:** Students will have expert-level familiarity with major figures and movements in the history of western philosophy; with central topics, theories, and debates in epistemology and metaphysics, in ethics and value theory, and in logic; and with current developments in professional philosophy.
2. **Philosophical Reading:** Students will have expert-level ability to analyze persuasive and argumentative prose: identifying the main claims asserted, the reasons alleged to support those claims, and the logical relations between the claims and the reasons, including identifying any gaps in the arguments.
3. **Philosophical Inquiry**: Students will expert-level ability to formulate abstract principles in epistemology and metaphysics, in ethics and value theory, in logic, and in related special topic areas in philosophy; they will have expert-level ability to identify consequences of the principles they formulate, and they will have expert-level ability to construct arguments for those principles and compare them to competing principles.
4. **Philosophical Writing:** Students will have expert-level ability to write clearly and with logical precision on a wide range of important issues, including (but not limited to): civic and social challenges at local, national, and global levels; social and cultural issues related to race, indigeneity, gender, class, sexuality, language, and disability; and the ways that complex, interdependent global systems—natural, environmental, social, cultural, economic, and political—affect and are affected by the local identities and ethical choices of individuals and institutions.
5. **Professional Development:** Students are familiar with conference norms, journal publication standards, and venues, and the requirements for teaching college-level courses in philosophy.

Physics, MS

for the degree of Master of Science in Physics

The Department of Physics offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy in Physics and Master of Science in Teaching Physics. The Department is actively developing a new paradigm for graduate physics education and research for the 21st century, aimed at enhancing interdisciplinary interactions and creating an integrated approach to educational and research training. Outstanding graduate research opportunities are available in many subdisciplines of physics, including condensed matter physics, high energy and nuclear physics, astrophysics, atomic physics, molecular and optical physics, complex systems, quantum information, biological physics, physics education research.

Students may select experimental, theoretical, or computational thesis projects. Multidisciplinary projects are especially encouraged, and, with the consent of other departments, students may earn master's degrees in areas such as materials science and engineering, or computer science, simultaneously with their PhD degrees in physics.

- optional concentrations:
  - Computational Science and Engineering (p. 2000)

for the degree of Master of Science in Physics

The M.S. degree is usually completed in 1.5 years of full-time study by students entering in full standing. Students entering with deficiencies may require up to two years to complete the degree requirements.

For additional details and requirements refer to the department's Degree Requirements (http://physics.illinois.edu/grad/degree-requirements.asp) and the Graduate College Handbook (http://grad.illinois.edu/gradhandbook/).

Opportunity exists for specializing in computational science and engineering via the Computational Science & Engineering (p. 2000) optional graduate concentration.

Department Research
The research specialties of Physics faculty fall into the broad categories described in the graduate programs section of this document. Details of each individual's specific interests are available at the department's faculty research Web site. (http://physics.illinois.edu/research/) Included are faculty whose primary appointments are in other departments but who supervise Physics students.

The Department of Physics offers world-class research facilities in traditional areas of physics, including condensed matter, nuclear, particle, and optical physics, as well as state-of-the-art instruments for quantum information, nanoscale science and engineering, and biological physics. For a complete description of physics facilities, please consult the department's research facilities Web site (https://physics.illinois.edu/research/facilities/).

for the degree of Doctor of Philosophy in Physics

Illinois Physics PhD graduates will have:

1. a firm foundation in core physics, math, and current physics research topics;
2. an ability to design and conduct original experiments, model physical phenomena, and analyze and interpret data;
3. an ability to work collaboratively with a diverse team;
4. a mastery of the concepts, techniques, and literature associated with the student's specific research subfield (e.g., theoretical condensed matter physics, experimental high energy physics, etc.);

5. an ability to teach and mentor others effectively;
6. an ability to communicate—both orally and in writing—scientific topics effectively to specialists in the student's research subfield, to scientifically literate non-specialists, and to the general public(outreach);
7. an understanding of the student's professional and scientific ethical responsibilities;
8. an ability to identify important scientific problems and to use modern experimental, computational, and/or analytical techniques to solve scientifically and societally relevant problems.

for the degree of Doctor of Philosophy in Physics

Admission Requirements

Admission to the physics graduate program requires an outstanding record of accomplishment in an undergraduate physics program and clear evidence of considerable academic promise, as judged by test scores, letters of recommendation, and strong intellectual achievements. A bachelor's degree or its equivalent from an accredited college or university in the U.S. or an approved institution of higher learning abroad, with at least 20 semester hours (30 quarter hours) of intermediate and advanced undergraduate physics course work, is required for admission. Course preparation in electricity and magnetism, optics, mechanics, atomic and nuclear physics, quantum mechanics, mathematical physics, differential equations, and analysis is essential. Any deficiency in these areas may delay degree completion by as much as a year. (Students are expected to make up deficiencies during the first graduate year.)

A minimum GPA of 3.00 (A = 4.00) for the last two years of undergraduate work is required; however, because of space limitations, applicants with GPAs below 3.50 are rarely admitted. Students with prior graduate course work must have a minimum GPA of 3.50 for those courses. Applicants may provide test scores from the General GRE Graduate Record Examination (GRE) (http://www.ets.org/). Both the Physics GRE subject test and the GRE general test are optional for admission to our program.

Graduates of curricula in the physical and biological sciences, mathematics, or computer science may be admitted with limited standing if they are judged to have the necessary aptitudes to profit from graduate work in physics. Such students are admitted to full standing after completing course work to remove deficiencies in physics preparation.

All applicants whose native language is not English are required to submit TOEFL (http://www.toefl.org/) or International English Language Testing System (IELTS) (http://www.ielts.org/) scores as evidence of English proficiency. Minimum admission requirements (https://grad.illinois.edu/admissions/instructions/04c/) are set by the Graduate College.

A few applicants may be admitted for the spring semester, in addition to the customary fall semester admissions. See the Physics graduate admissions website (https://physics.illinois.edu/admissions/graduates/apply/) for lists of deadlines and application materials.

Financial Aid

Fellowships, research assistantships, and teaching assistantships (all of which include waivers of tuition and some fees) are available for the majority of admitted students. Starting in Fall 2020, Grainger Engineering PhD students in their first five years of enrollment who meet the minimum eligibility requirements (https://grainger.illinois.edu/academics/graduate/phd-funding-guarantee/) are guaranteed a funded appointment for fall and spring that includes a full tuition waiver, a partial fee waiver, and a stipend.

All applicants, regardless of US citizenship, whose native language is not English and who wish to be considered for teaching assistantships must demonstrate spoken English language proficiency (http://grad.illinois.edu/admissions/taengprof.htm) by achieving a minimum score of 24 on the speaking subsection of the TOEFL iBT or 8 on the speaking subsection of the IELTS. For students who are unable to take the iBT or IELTS, a minimum score of 4CP is required on the EPI test (http://cte.illinois.edu/testing/oral_eng/epi_overview.html), offered on campus. All new teaching assistants are required to participate in the Graduate Academy for College Teaching (https://citl.illinois.edu/citl-101/teaching-learning/grad-academy-for-college-teaching/) conducted prior to the start of the semester.

Plant Biology, MS

for the degree of Master of Science in Plant Biology

The Department of Plant Biology offers two graduate degrees, the Master of Science and the Doctor of Philosophy. There are two paths to completing the Master of Science degree, the traditional thesis and a non-thesis option. Students accepted directly into the MS program are expected to complete an MS thesis. The department also participates in the interdepartmental graduate program: the Program in Ecology, Evolution and Conservation Biology (http://sib.illinois.edu/peec/).

The Department teaches and conducts foundational research in plant biology. Its focus is integrative. Biological processes are investigated at multiple levels of organization using molecular, biochemical, physiological, morphological, and ecological approaches.

Areas of specialization within the department include:

- biochemistry
- biodiversity
- bioinformatics
- cell biology
- conservation biology
- development
- ecology
- environmental physiology
- evolution
- genetics
- genomics
- modeling
- molecular biology
- mycology
- paleobotany
- paleoecology
- photosynthesis
- phytochemistry
- population biology
- biotechnology
- systems biology
- systematics

Graduate students receive broad biological and professional training and acquire expertise in their areas of specialization.

The Plant Biology Departmental website (http://www.life.illinois.edu/plantbio/) provides additional information about the department, its admissions procedures, degree requirements, facilities, and the research interests of its faculty.

Admission

Prospective students are encouraged to identify faculty member(s) whose research specialty(ies) most closely coincide(s) with their interests and to correspond directly with them. Acceptance the Master of Science graduate program is based on the applicant's academic achievement and research potential. While departmental requirements do not specify particular courses as prerequisites for admission, applicants should have had undergraduate coursework in biology or related sciences. Admission to the graduate program requires an undergraduate grade point average of at least 3.0 (A = 4.0). Graduate Record Examination (GRE) scores (or approved equivalent) are not required but may be submitted to strengthen application package; however no minimum scores are specified for admission. International students should have a Test of English as a Foreign Language (TOEFL) score of 600 or above on the paper-based test, or 102 or above on the internet-based test (iBT). The IELTS exam is also accepted, and applicants should have a score of 7.0 or higher.

Facilities and Resources

The Plant Biology Department's diverse state-of-the-art research laboratories are located in Morrill Hall, Edward R. Madigan Laboratory, and the Institute for Genomic Biology. In addition, the department maintains extensive plant growth-chamber facilities, environmentally controlled greenhouses, a conservatory with live teaching and research collections, herbaria, a center for paleobotanical collections, and diverse local and remote

field sites including SoyFACE (http://soyface.illinois.edu/). The University also offers exceptional research support services including the Roy J. Carver Biotechnology Center (http://www.biotech.illinois.edu/), service laboratories in the Institute for Genomic Biology (http://www.igb.illinois.edu/facilities-services/), the Beckman Institute (http://www.beckman.illinois.edu/), and the University Library (http://www.library.illinois.edu/), one of the world's largest.

Financial Aid

Fellowships, teaching assistantships, and research assistantships are available for qualified MS and PhD students in Plant Biology. Fellowships are awarded on a competitive basis.

for the degree of Master of Science in Plant Biology

Thesis Option

Plant Biology Thesis option: The requirement of a thesis for the M.S. degree in Plant Biology is determined in consultation with the candidate's adviser. The program is normally completed within two years. Candidates are expected to complete at least 32 semester hours of graduate coursework and research agreed upon with a faculty adviser.

For additional details and requirements, please refer to the Plant Biology Department's online Graduate Handbook (http://www.life.illinois.edu/plantbio/gradhandbook.htm) and the University's Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Thesis Option

Code	Title	Hours
Course hours distributed among three of the following areas: anatomy, biochemistry, development, ecology, evolution, genetics, molecular biology, physiology, and systematics (4 of these hours must be outside the immediate research interests of the student)		12

Plant Biology, PhD

for the degree of Doctor of Philosophy in Plant Biology

The Department of Plant Biology offers two graduate degrees, the Master of Science and the Doctor of Philosophy. The department also participates in the interdepartmental graduate program: the Program in Ecology, Evolution and Conservation Biology (http://sib.illinois.edu/peec/).

The Department teaches and conducts foundational research in plant biology. Its focus is integrative. Biological processes are investigated at multiple levels of organization using molecular, biochemical, physiological, morphological, and ecological approaches.

Areas of specialization within the department include:

- biochemistry
- biodiversity
- bioinformatics
- cell biology
- conservation biology
- development
- ecology
- environmental physiology
- evolution
- genetics
- genomics
- modeling
- molecular biology
- mycology
- paleobotany
- paleoecology
- photosynthesis
- phytochemistry
- population biology
- biotechnology
- systems biology
- systematics

Graduate students receive broad biological and professional training and acquire expertise in their areas of specialization.

The Plant Biology Departmental website (http://www.life.illinois.edu/plantbio/) provides additional information about the department, its admissions procedures, degree requirements, facilities, and the research interests of its faculty.

Admission

Prospective students are encouraged to identify faculty member(s) whose research specialty(ies) most closely coincide(s) with their interests and to correspond directly with them. Acceptance to the Doctor of Philosophy graduate program is based on the applicant's academic achievement and research potential. While departmental requirements do not specify particular courses as prerequisites for admission, applicants should have had undergraduate coursework in biology or related sciences. Admission to the graduate program requires an undergraduate grade point average of at least 3.0 (A = 4.0). Graduate Record Examination (GRE) scores (or approved equivalent) are not required but may be submitted to strengthen application package; however no minimum scores are specified for admission. International students should have a Test of English as a Foreign Language (TOEFL) score of 600 or above on the paper-based test, or 102 or above on the internet-based test (iBT). The IELTS exam is also accepted, and applicants should have a score of 7.0 or higher.

Facilities and Resources

The Plant Biology Department's diverse state-of-the-art research laboratories are located in Morrill Hall, Edward R. Madigan Laboratory, and the Institute for Genomic Biology. In addition, the department maintains extensive plant growth-chamber facilities, environmentally controlled greenhouses, a conservatory with live teaching and research collections, herbaria, a center for paleobotanical collections, and diverse local and remote field sites including SoyFACE (http://soyface.illinois.edu/). The University also offers exceptional research support services including the Roy J. Carver Biotechnology Center (http://www.biotech.illinois.edu/), service laboratories in the Institute for Genomic Biology (http://www.igb.illinois.edu/facilities-

services/), the Beckman Institute (http://www.beckman.illinois.edu/), and the University Library (http://www.library.illinois.edu/), one of the world's largest.

Financial Aid

Fellowships, teaching assistantships, and research assistantships are available for qualified MS and PhD students in Plant Biology. Fellowships are awarded on a competitive basis.

for the degree of Doctor of Philosophy in Plant Biology

Candidates for the Ph.D. are expected to complete a minimum of 96 hours of graduate coursework and research. A formal evaluation (the Two-Year Review) of the student's academic progress is made prior to the end of the second year of study (end of Stage I). Departmental approval must be obtained at this juncture in order to continue in the graduate program. A Preliminary Examination is taken during the second year (if the student entered with an M.S. degree) or the third year (if the student entered with a B.S. degree) (end of Stage 2). This consists of an oral examination of general knowledge in three of nine broadly-defined areas of plant biology and defense of a written research proposal on the thesis research topic prepared by the student. Experience in teaching is considered a vital part of the graduate program and is required as part of the academic work of all Ph.D. candidates. The final stage (Stage 3) of the program consists of preparing an acceptable thesis based on independent research designed in consultation with a faculty advisor and approved by a graduate faculty thesis committee. A final oral examination, in which the student defends the thesis, a public seminar, and deposit of an approved thesis complete the program. The Ph.D. degree program is expected to be completed within five years. See the Plant Biology Department's online Graduate Student Handbook (http://www.life.illinois.edu/plantbio/gradhandbook.htm) for a detailed description of the Stages and Requirements of the Ph.D. program.

For additional details and requirements, please refer to the Plant Biology Department's online Graduate Handbook (http://www.life.illinois.edu/plantbio/gradhandbook.htm) and the University's Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Admissions

Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Political Science, MA

for the degree of Master of Arts in Political Science

Admission to the Ph.D. Program
The Graduate College admission requirements apply. The student should have a minimum of 20 hours of undergraduate work in political science and cognate disciplines such as economics, psychology, finance, sociology, or history. All applicants are required to submit an application and fee, academic statement of purpose, personal statement, and sample of written work. Applicants whose native language is not English must submit the TOEFL iBT or IELTS score. The Ph.D. program typically admits students for the fall semester. Application deadline is December 1st.

Admission to the Master of Arts with Concentration in Civic Leadership
Admission is restricted to students who were accepted to the Civic Leadership Program as undergraduates at the University of Illinois. Application deadline is December 1st. Applicants who wish to obtain a joint MA-JD degree program must apply separately for admission to the Law School.

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program and is essential for students whose career goals include college teaching.

Financial Aid
Students accepted into the department's Ph.D. program are eligible to apply for financial aid. Most incoming students with good credentials and continuing students demonstrating satisfactory progress will receive some type of financial aid, but the type and amount will vary. The Department of Political Science provides, on a competitive basis, aid packages up to $22,000, plus waivers of tuition and some fees. Financial aid is usually a combination of fellowship money and assistantships. Limited amounts of aid are also available for dissertation field research, internships, and the presentation of papers at professional meetings.

for the degree of Master of Arts in Political Science

Students enrolled in the Ph.D. program can usually earn a Master of Arts in Political Science within three semesters. It entails the completion of 32 graduate hours and the achievement of a 3.0 GPA in all courses taken. A master's paper is required.

For additional details and requirements refer to the department's graduate handbook (https://pol.illinois.edu/academics/graduate-program/graduate-handbook/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Political Science: Civic Leadership, MA

for the degree of Master of Arts in Political Science, Civic Leadership Concentration

Students who have completed undergraduate coursework in the Civic Leadership Program and are admitted into the Graduate College can usually earn a Master of Arts in Political Science, with a Concentration in Civic Leadership within one year. It entails the completion of 32 graduate hours and the achievement of a 3.0 GPA in all courses taken. A master's paper is required, which is fulfilled by the completion of a collaborative project undertaken as part of the Practicum in Civic Leadership.

Only Illinois students who have participated in the undergraduate portion of the Civic Leadership Program are eligible for admission in the graduate concentration in Civic Leadership. For information contact the Director, Civic Leadership Program, Department of Political Science.

Political Science, PhD

for the degree of Doctor of Philosophy in Political Science

The course of study leading to a Ph.D. in Political Science requires a minimum of three years of full-time study, culminating in the successful defense of a doctoral dissertation. A minimum of 96 graduate hours of academic credit is required, 32 of which may be graduate hours of dissertation research. At least 64 of the 96 graduate hours must be taken in residence. A grade of B or better is required in all courses.

In addition to meeting Graduate College requirements, the Department of Political Science requires that students complete a "scope and methods" sequence, acquire proficiency in analytic skills, and demonstrate expertise in several subfields within the discipline. The progress of doctoral candidates is monitored at various points in the program. In addition to an interim evaluation, students must pass a set of qualifying examinations and present a dissertation proposal. Once the doctoral dissertation is completed, the candidate must successfully complete an oral final defense.

Admission to the Ph.D. Program

The Graduate College admission requirements apply. The student should have a minimum of 20 hours of undergraduate work in political science and cognate disciplines such as economics, psychology, finance, sociology, or history. All applicants are required to submit Graduate Record Examination (GRE) scores, a personal statement, and an example of written work. for the degree of Doctor of Philosophy in Political Science

The Political Science doctoral program is designed to produce broadly educated and well-trained scholars and teachers. Our aim is to produce Ph.D.s who have the breadth and vision to grapple with large questions, the training to make original contributions to research that addresses those questions, and the ability to communicate research results to students, their peers, and society at large. We thus strive to strike an appropriate balance between:

1. Exposure to theoretical models in political and social research,
2. Sophisticated training in the methods and techniques of social science,
3. The development of expertise within a student's primary area of interest,
4. Exposure to classroom teaching, and
5. Exposure to the discipline's professional norms and practices.

More specifically, every Illinois Ph.D. should:

1. Be well-grounded in the social sciences. This includes familiarity with the philosophy of science issues that underlie social scientific inquiry. It also includes exposure to or an acquaintance with the literature and approaches of at least one other discipline as they pertain to inquiries in political science and specifically to students' particular areas of interest.
2. Be familiar with the breadth and diversity of models, approaches, and intellectual traditions within a student's major subfield of expertise (major fields in the department are American politics, comparative politics, international relations, and political theory).
3. Be competent in at least a second substantive area of political science(minor fields in the department are the same as the four major fields, with the addition of political methodology).
4. Be highly competent in research skills appropriate to his or her research endeavors. An Illinois Ph.D. should be exposed to a broad range of methodologies (including both quantitative and qualitative approaches) and have some deeper familiarity with particular sets of research skills (e.g. statistical analysis, formal modeling, game theory, the comparative case study method).
5. Fully understand the research enterprise. This includes an ability to critique others' work and an ability to be a contributing scholar by producing original research.
6. Be prepared to teach graduate courses in his or her primary subfield and undergraduate courses in at least two subfields of the discipline, and understand best practices for student engagement.
7. Be familiar with disciplinary norms and standards, including understanding issues related to ethical practices in research, professional and public engagement, and instruction.

Portuguese, MA

for the degree of Master of Arts in Portuguese

The Department of Spanish and Portuguese offers work leading to the Master of Arts and Doctor of Philosophy in Spanish and Portuguese, and to a Concentration in Second Language Acquisition and Teacher Education (SLATE).

Fields of specialization are:

- Spanish linguistics
- Romance linguistics
- Spanish literature and cultural studies
- Latin American literature and cultural studies
- Brazilian Studies
- Luso-Brazilian literature and cultural studies

A graduate course in Catalan literature is also available. Additionally, the department is affiliated with the Latina/Latino Studies Program. Students in the area of Latina/Latino studies may be able to work with experts in the other disciplines in Latina/Latino studies such as anthropology, history, political science, sociology, and so forth in order to design and complete a program of studies in a particular area.

We also teach Catalan and Basque.

Admission
The normal prerequisite for a graduate major is an undergraduate major in the corresponding Romance language or consent of the department. Students doing graduate work for any advanced degree in Spanish or Portuguese must possess a command of the language. Applicants should apply online (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/admissions/apply/) and submit a personal purpose, an academic statement, three letters of recommendation and a writing sample of approximately 10-20 pages in the form of one or two papers, at least one of which must be written in Spanish or Portuguese (as applicable). Original transcripts (with English translations if applicable) showing all undergraduate and graduate work completed should also be uploaded. Graduate Record Examination (GRE) scores are recommended (although not required) of all domestic applicants and should be submitted to institution code 1836. International applicants who have taken the GRE are encouraged to submit their scores as well. Applicants whose native language is not English are required to take the Test of English as a Foreign Language (TOEFL) and must score at least 88 on the internet-based test (iBT); they must also pass the speaking sub-section of the iBT with a minimum score of 24 (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/Admissions/instructions/04c/). Applications are accepted for fall admission only. Application questions may be directed to SLCL Graduate Student Services (slclgradservices@illinois.edu).

Centers, Programs, and Institutes
The option to pursue a concentration in SLATE (Second Language Acquisition and Teacher Education) is available to doctoral students in the department's programs in linguistics. Candidates selecting this option are required to complete courses in linguistics, psycholinguistics/sociolinguistics, second language studies, and research methodology in addition to advanced study in linguistics of the particular language. See information about SLATE (http://catalog.illinois.edu/graduate/las/portuguese-ma/www.slate.illinois.edu).

Graduate Teaching Experience
Although teaching is not a general Graduate College requirement, this department requires degree candidates to teach as part of their academic work. Such experience is considered a vital part of the graduate program. Non-native English speakers must first pass a test of their oral English ability (http://catalog.illinois.edu/graduate/las/spanish-phd/www.grad.illinois.edu/admissions/taengprof.htm).

Financial Aid
The department offers financial aid (in the form of fellowships, teaching assistantships, and research assistantships) to all of the students it admits. Other kinds of fellowships and research support are also available on a competitive basis to qualified candidates; they include dissertation research and travel grants, conference travel grants, and summer fellowships.

for the degree of Master of Arts in Portuguese

The M.A. in Portuguese is administered through the Department of Spanish and Portuguese. Its goal is to provide to provide breadth in the various areas of Luso-Brazilian Studies as well as develop the student's ability to interpret and analyze literature, culture, and history. It requires a minimum of 32 graduate hours. Students must also successfully complete a master's thesis, developed in consultation with their advisor.

For additional details and requirements refer to the department's guidelines (https://spanport.illinois.edu/academics/graduate-program/graduate-guidelines/#degrees) for graduate students and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Degree Requirements:

Code	Title	Hours
Coursework in Luso-Brazilian literature/cultural studies selected in consultation with advisor.		24
PORT 595	Special Topics Port & Braz Lit	4
PORT 599	Thesis Research	4
Total Hours		**32**

Requirement	Description
Other requirements may overlap	
PORT 571 is required of all teaching assistants	4 hours
Minimum 500-level Hours Required Overall:	12
Minimum GPA:	3.0

for the degree of Master of Arts in Portuguese

1. Students will possess a breadth of knowledge about social, cultural, and historical issues in Brazil and the Portuguese-speaking world, as well as a depth of knowledge about a cluster of research questions corresponding to students' individual interests.
2. Students will develop a familiarity with multiple disciplinary approaches to the study of Brazil specifically and social, cultural, and historical phenomena more generally.
3. Students will possess the ability to identify research questions, develop a research project, and see that project (MA thesis) to completion through sustained engagement with both existing scholarship and novel research.
4. Students will acquire the ability to communicate research findings in a variety of academic venues in spoken and written English and Portuguese.
5. Students will acquire knowledge and experience of teaching methodologies and will be able to teach at the undergraduate level.

- Portuguese, MA (p. 1802)
  - concentration:
    - Brazilian Studies (p. 1807)
- Portuguese, PhD (p. 1805) (*Please note: Until further notice, we are accepting applications only to the M.A. in Portuguese, not to the Ph.D.)*

The Department of Spanish and Portuguese offers work leading to the Master of Arts and Doctor of Philosophy in Spanish and Portuguese, and to a Concentration in Second Language Acquisition and Teacher Education (SLATE).

Fields of specialization are:

- Spanish linguistics
- Romance linguistics
- Spanish literature and cultural studies
- Latin American literature and cultural studies
- Brazilian Studies
- Luso-Brazilian literature and cultural studies

A graduate course in Catalan literature is also available. Additionally, the department is affiliated with the Latina/Latino Studies Program. Students in the area of Latina/Latino studies may be able to work with experts in the other disciplines in Latina/Latino studies such as anthropology, history, political science, sociology, and so forth in order to design and complete a program of studies in a particular area.

We also teach Catalan and Basque.

for the degree of Master of Arts in Portuguese, Brazilian Studies Concentration

---

In the MA program in Portuguese with a concentration in Brazilian Studies, students broaden and deepen their knowledge of Brazil-related topics and themes, working closely with core and affiliated faculty members in Portuguese. Students draw on the many upper-level course offerings across departments and disciplines to create an individualized plan of study. All students must take SPAN 572 on theory and criticism or an equivalent course. Students with TAships are also required to complete PORT 571, the pro-seminar for language teaching required of all TAs in the department. Beginning in their second semester, students will enroll in PORT 595 with one of the Portuguese faculty members or affiliate faculty to develop a master's thesis. In their third or fourth semester(s), students can then sign up for PORT 599 (repeatable for up to 16 hours), to produce the thesis, which will be of publishable quality, working with Portuguese core and affiliated faculty. Four independent study hours in PORT 595 and four thesis research hours in PORT 599 count toward the 20 required hours in the Department of Spanish and Portuguese.

For additional details and requirements refer to the department's guidelines (https://spanport.illinois.edu/academics/graduate-program/graduate-guidelines/#degrees) for graduate students and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Admissions

Overview of Graduate College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Predictive Analytics and Risk Management, MS

for the Master of Science in Predictive Analytics and Risk Management

Concentrations for this program include:

- Enterprise Risk Management (p. 1811)
- Financial and Insurance Analytics

Designed to respond to a large and growing demand for professionals with expertise in modern statistical techniques combined with an understanding of risk management in a wide range of industries including insurance, consulting, investment, pension, healthcare, banking and financial services. This program combines training in modern statistical methods with actuarial science principles and financial risk management. The coursework is intended for students who have the prerequisite quantitative background to train for careers in predictive analytics for insurance and other financial settings by providing a multidisciplinary and integrated program.

Core requirements include courses from three disciplines, a course in financial risk management, courses in risk management and predictive analytics from an actuarial science perspective, and training in statistical machine learning, big data techniques, and Bayesian statistical methods. Related courses from the three disciplines may then be chosen as electives for students to reach their individualized educational goals.

Courses will be scheduled so that students may complete the 32-hour program in one academic year. Each concentration requires 12 hours of common core courses, organized around three broad areas of expertise, including a case study course. Each concentration also requires 12 hours of related area coursework specific to the concentration, plus an additional 8 hours of electives from a prescribed list included in this proposal. At least 12 hours must be taken at the 500 level.

Graduate Degree Programs in Mathematics

Predictive Analytics and Risk Management: Enterprise Risk Management, MS

for the Master of Science in Predictive Analytics and Risk Management, Enterprise Risk Management concentration

---

Prepares students for the nascent profession of predictive analytics; it provides background and skill sets for data analytics with focus on financial and insurance industries. A student successfully finishing the program will typically have acquired a broad foundation of machine learning and predictive modeling techniques to forecast outcomes and glean valuable insights that can lead to better-informed business and investment decisions.

The assessment of the above-stated learning objectives will include:

- the job placement/graduate school acceptance rates
- feedback from employers
- graduate satisfaction surveys

These assessments will be conducted on an annual basis. We conduct exit surveys on all students each year, which should provide data on graduate students' job placement and graduate school acceptance rates. On the survey we will design questions to assess student's overall evaluation of these learning objectives. The curriculum was developed in close collaboration with industry partners. We expect to maintain close relationship with them and seek their feedback on the quality of our graduates on a regular basis.

Overview of Program Admissions & Requirements (https://predictive-analytics.illinois.edu/admission-requirement/)

Psychological Science, MS

for the Master of Science in Psychological Science

A two-year, in-person research-based program designed for students who want research experience augmented by advanced courses in experimental techniques and professional development within a top-rated department at a world-class university. Each student admitted to the program is paired with a faculty advisor/mentor based on research interests. A Master's thesis is not required.

Graduate Degree Programs in Psychology

- Psychology, MS (p. 1819)
- Psychological Science, MS (p. 1816)
- Psychology, PhD (p. 1823)

  optional concentrations:

  - Developmental Psychopathology (p. 1826)
  - Ecological Community Psychology (p. 1828)
  - Second Language Acquisition & Teacher Education (p. 2051)

Admission

The Graduate College admission requirements apply for all programs. All candidates for admission must have a minimum grade point average of 3.0 (or B) on a 4.0 scale in courses representing the last 60 hours of work completed for the bachelor's degree. The candidate for admission to the graduate program should ordinarily have the following preparation: a minimum of 15 semester hours in psychology, a laboratory research methods course in psychology, and a course in statistics. Departmental committees also consider Graduate Record Examination (GRE) scores and letters of recommendation. Preference is given to students who have taken mathematics beyond college algebra and to those who have some research experience. Students are accepted only for fall admission. For deadlines and additional application information, please visit the department's website (https://psychology.illinois.edu/academics/ms-psychological-science/msps-application-information/).

In addition to the aforementioned criteria, applicants are evaluated on their supporting documents, career goals, career promise, and research interests. Additional weight is given to the quality and extent of prior research and other relevant experience.

All applicants whose native language is not English or who are from any country other than the US, the United Kingdom, Canada, Australia, or New Zealand (even if they are native English speakers) are required by the University to submit the results of an English language proficiency test. The university will accept the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) to determine admission eligibility.

- The minimum total TOEFL iBT score for admission (including all four sections): 79
- Minimum total TOEFL iBT score for exemption from the English as a Second Language Placement Test (EPT) for admission (including all four sections): 103
- Minimum total IELTS score for admission: 6.5, including a minimum subscore of 6 on all four modules. Students receiving scores below 7 will be required to take the EPT for placement in English as Second Language courses.

Refer to the Department of Psychology's website (https://psychology.illinois.edu/) (MS in Psychological Science) for additional information about the Department of Psychology's admission requirements.

Faculty Research Interests

The program is designed to prepare students for academic and research-oriented careers. Students become actively involved in research throughout the program.

For the most part, we view graduate education as an apprenticeship. Our task is to provide an environment where mature young scholars can gain experience in research as they collaborate with faculty and with other graduate students. Faculty research interests can be viewed here (https://psychology.illinois.edu/directory/faculty/).

Facilities and Resources

Students have designated work and study areas, access to research, library, and computing services. In some cases, student may collaborate with the Psychological Services Center, Illinois NeuroBehavioral Assessment Laboratory, Beckman Institute for Advanced Science and Technology, Educational Psychology, and the School of Labor and Employee Relations.

Financial Aid
The M.S. in Psychological Science program is self-supporting. The program does not accept non-statutory tuition waivers, and students enrolled in this program are ineligible to hold waiver-generating appointments.

Please refer to the Office of the Registrar's website (https://registrar.illinois.edu/tuition-fee-rates/) for the current graduate tuition and fees.

Enrollment for this program spans 4 semesters. Credit hours will range from 6–12 (or more) each semester, depending on course availability, international/domestic status, and student goals. International students are required to register for 8 credit hours to maintain F-1/J-1 student status.

Information regarding fees depends on the individual applicant. Fees are explained on the Office of the Registrar's website (http://registrar.illinois.edu/fee-info/). Please note that these costs do not include housing, transportation or other costs of living expenses.

for the Master of Science in Psychological Science

For additional details and requirements refer to the department's graduate handbook (https://psychology.illinois.edu/department-psychology-master-science-psychological-science-handbooks/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Requirement	Description
Other requirements may overlap.	
Minimum 500-level Hours Required Overall	12
Minimum GPA	2.75

for the Master of Science in Psychological Science

1. Students will acquire and apply in-depth knowledge of essential topics in psychological science. Essential topics include current debates in the field, current methods and measurement practices, and new issues in research ethics.
2. As active participants in specialized research laboratories and through elective coursework, students will acquire in-depth knowledge of topics and methods in their sub-field to prepare for doctoral programs or jobs in industry that value specific methods. Sub-fields include attention and perception, cognitive neuroscience, behavioral neuroscience, social-personality, industrial/organizational, developmental, clinical-community, and quantitative psychology. Demonstrations of sub-field knowledge entail critically evaluating published research in sub-fields, generating new research questions, and using sub-field methods and technologies appropriately.
3. Students will identify and apply appropriate data analytic methods, interpret statistical results, and create data visualizations. Skills are acquired through coursework and laboratory work and applied in independent and collaborative research projects.
4. Students will Identify and communicate independent research interests through collaborative study and research with their advisors. Students demonstrate communication skills through successful participation in a program-wide research fair, which includes academic poster presentations, oral presentations, and samples of academic writing.
5. Students will develop masters-level academic writing skills. Written works include graduate seminar papers, pre-registered research reports, IRB submissions, literature reviews, and manuscripts submitted for publication.
6. Students will set goals, design action plans, and create professional materials to prepare for doctoral programs or jobs in industry. Professional development materials include curriculum vitae, resumes, cover letters, professional profiles, research statements, and individual development plans.

Admissions
Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Psychology, MS

for the Master of Science in Psychology

This degree is not designed to prepare a student for a professional position. As part of the doctoral program, students must earn the Master of Science in Psychology degree or submit a master's-level research report to the department.

Graduate Degree Programs in Psychology

- Psychology, MS (p. 1819)
- Psychological Science, MS (p. 1816)
- Psychology, PhD (p. 1823)
  - optional concentrations:
  - Developmental Psychopathology (p. 1826)
  - Ecological Community Psychology (p. 1828)
  - Second Language Acquisition & Teacher Education (p. 2051)

The Department of Psychology offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. Doctor of Philosophy programs are offered in the following areas of psychology:

- Attention & Perception
- Behavioral Neuroscience
- Clinical-Community
- Cognitive Neuroscience
- Cognitive
- Developmental
- Industrial-Organizational
- Quantitative
- Social-Personality

An optional Master of Science in Psychology degree is awarded to students in the doctoral program as an intermediate degree.

Admission

The Graduate College admission requirements apply for all programs. All candidates for admission must have a minimum grade point average of 3.0 (or B) on a 4.0 scale in courses representing the last 60 hours of work completed for the bachelor's degree. The candidate for admission to the graduate program should ordinarily have the following preparation: a minimum of 15 semester hours in psychology, a laboratory research methods course in psychology, and a course in statistics. Departmental committees also consider letters of recommendation. Graduate Record Examination (GRE) scores are required for application to the Industrial-Organizational and Quantitative areas, but optional for all others. Preference is given to students who have taken mathematics beyond college algebra and to those who have some research experience. Applications for admission to part-time study are usually not approved. Students are accepted only for fall admission. For deadlines and additional application information, please visit the department's website (https://psychology.illinois.edu/academics/phd-psychology/psychology-phd-application-information/).

In addition to the aforementioned criteria, applicants are evaluated on their supporting documents, career goals, career promise, and research interests. Substantial additional weight is given to the quality and extent of prior research and other relevant experience.

All applicants whose native language is not English or who are from any country other than the US, the United Kingdom, Canada, Australia, or New Zealand (even if they are native English speakers) are required by the University to submit the results of an English language proficiency test. The university will accept the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) to determine admission eligibility.

- The minimum total TOEFL iBT score for admission (including all four sections): 79
- Minimum total TOEFL iBT score for exemption from the English as a Second Language Placement Test (EPT) for admission (including all four sections): 103

- Minimum total IELTS score for admission: 6.5, including a minimum subscore of 6 on all four modules. Students receiving scores below 7 will be required to take the EPT for placement in English as Second Language courses.

In addition to the general requirement for English proficiency testing described above, the University of Illinois is also required by state law and University policy to give teaching appointments only to international graduate students who have more specifically passed an English language SPEAKING proficiency test. Applicants have the following options to satisfy this requirement:

- Minimum score of 24 on the speaking section of the TOEFL iBT
- Minimum score of 8 on the speaking section of the IELTS
- Minimum score of 3 on the OEAI (Oral English Assessment Interview). This option is only available for current University of Illinois students.

International applicants to the Ph.D. program must present documentation for one of the above-listed tests of spoken English at the time of application to the Psychology Department. The teaching English proficiency requirements do not apply to the M.S. in Psychological Science applicants.

Refer to our department website (https://psychology.illinois.edu/) (Graduate Program) for additional information about the Department of Psychology's admission requirements.

Graduate Teaching Experience

The department requires Ph.D. candidates to gain teaching experience as part of their academic work. Such experience is considered a vital part of the graduate program and usually takes the form of a teaching assistantship. Students have the option of teaching two class sections (50% TA) for one semester or one class section (25% TA) for two semesters in order to meet the requirement.

Faculty Research Interests

The program is designed to prepare students for academic and research-oriented careers. Students become actively involved in research during their first semester, devoting an increasing percent of time toward independent research throughout their graduate careers.

For the most part, we view graduate education as an apprenticeship. Our task is to provide an environment where mature young scholars can gain experience in research as they collaborate with faculty and with other graduate students. The program encourages interdisciplinary study both within psychology and between psychology and other fields. Faculty research interests can be viewed here (https://psychology.illinois.edu/directory/faculty/).

Facilities and Resources

Students have everything they need, including personal office space and full access to research, library, and computing services, as well as to a large pool of research participants. The excellent cooperation between program areas in the department and with other units in the University provides access to expertise and methodology in a variety of areas including but not limited to:

- the Psychological Services Center
- the Counseling Center
- the Beckman Institute for Advanced Science and Technology
- the Center for the Study of Reading
- the Institute of Communications Research
- the School of Labor and Employee Relations
- the Family Resiliency Program
- the Neuroscience Program
- the Institute for Genomic Biology
- the Departments of Computer Science
- Educational Psychology
- Linguistics
- Molecular and Cellular Biology and Statistics
- the Colleges of Law and Medicine

Financial Aid

Students generally complete the doctoral degree in 4-6 years, and the Psychology Department makes financial support available to all Ph.D. students in good standing for up to 6 years. The University application form and supplemental application materials provide all the information that is required by the committees administering various funding sources, which include teaching assistantships, research assistantships, and fellowships.

The M.S. in Psychological Science program is self-supporting. The program does not accept non-statutory tuition waivers, and students enrolled in this program are ineligible to hold waiver-generating appointments.

for the Master of Science in Psychology

For additional details and requirements refer to the department's graduate handbook (https://psychology.illinois.edu/admissions/current-students/doctoral/archives/handbooks/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Minimum 500-level Hours Required Overall:	12
Minimum GPA:	2.75

for the Master of Science in Psychology

Students will:

1. Have the requisite knowledge to conduct independent research in academic and/or applied settings, including:
   a. Knowledge of research methodology appropriate to a specific area of study
   b. Knowledge of data analytic techniques
   c. Knowledge of a specific area of study within the field of psychology
2. Have effective written communication skills to disseminate research and scholarship and/or pursue funding opportunities.
3. Have effective oral communication skills to disseminate research and scholarship (e.g., as instructors, as conference presenters)
4. Have the knowledge to adhere to professional standards and expectations. Specifically, this learning outcome will attend to the degree to which students:
   a. Develop the knowledge and skills to engage diversity and inclusion in psychological science (as researchers, teachers, practitioners when applicable, and mentors)

b. Develop the knowledge and skills to engage in ethical research and practice (when applicable)
c. Develop the knowledge and skills to remain abreast of “cutting edge” issues in their respective program areas (e.g., replicability)

Admissions

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Psychology, PhD

for the Doctor of Philosophy in Psychology

The Doctor of Philosophy degree is awarded to candidates who complete an approved program in their area of specialization and meet departmental and Graduate College requirements for the degree. These must include at least 64 or 96 graduate hours of graduate work; satisfactory performance in courses or examinations dealing with quantitative methods and chosen areas of specialization; a master's thesis or equivalent; appropriate advanced courses and seminars in the area of specialization and in related and supporting areas; satisfactory performance on a doctoral qualifying examination; satisfactory performance on an oral preliminary examination; completion of an acceptable Ph.D. thesis; and satisfactory performance on an oral examination in defense of the thesis.

The Department of Psychology offers graduate programs leading to the degrees of Master of Science and Doctor of Philosophy. Doctor of Philosophy programs are offered in the following areas of psychology:

- Attention & Perception
- Behavioral Neuroscience
- Clinical-Community
- Cognitive
- Cognitive Neuroscience
- Developmental
- Quantitative
- Social-Personality
- Industrial-Organizational

An optional Master of Science in Psychology degree is awarded to students in the doctoral program as an intermediate degree.

Admission

The Graduate College admission requirements apply for all programs. All candidates for admission must have a minimum grade point average of 3.0 (or B) on a 4.0 scale in courses representing the last 60 hours of work completed for the bachelor's degree. The candidate for admission to the graduate program should ordinarily have the following preparation: a minimum of 15 semester hours in psychology, a laboratory research methods course in psychology, and a course in statistics. Departmental committees also consider letters of recommendation. Graduate Record Examination (GRE) scores are required for application to the Industrial-Organizational and Quantitative areas, but optional for all others. Psychology: Developmental Psychopathology, PhD

for the Doctor of Philosophy in Psychology, Developmental Psychopathology Concentration

This concentration is available to students in the developmental and clinical-community areas within the Psychology PhD program. The field of developmental psychopathology has grown exponentially in the past twenty years to become a major area of interest in the field of Psychology. This concentration will provide specialized training and professional development guidance within the field of developmental psychopathology; provide exposure to multiple theoretical perspectives and research methods that are used across different labs; facilitate opportunities to be involved in research with multiple faculty, broadening the scope of training and allowing for stronger letters of recommendation when entering the job market; facilitate successful job searches in this area of specialization, for which specific certification in the field would be of benefit.

Students wishing to pursue the concentration should contact the Psychology Graduate Studies Office (http://catalog.illinois.edu/graduate/las/psychology-phd/developmental-psychopathology/psych-grad@illinois.edu).

EPSY 574	Quasi-Experimental Design	
EPSY 575	Mixed Method Inquiry	
EPSY 578	Qualitative Inquiry Methods	
EPSY 581	Applied Regression Analysis	
EPSY 584	Multivar Anlys in Psych and Ed	

EPSY 587	Hierarchical Linear Models	
EPSY 589	Categorical Data Analysis in Educational Psychology	
EPSY 590	Advanced Seminar in Educational Psychology (For this course, only sections approved by the concentration coordinator will count toward the concentration, i.e., sections related to research methodology and data analytic methods relevant to ecological community psychology.)	
GWS 550	Feminist Theories & Methods	
HDFS 591	Qualitative Methods	
HDFS 595	Seminar (For this course, only sections approved by the concentration coordinator will count toward the concentration, i.e., sections related to research methodology and data analytic methods relevant to ecological community psychology.)	
HDFS 597	Advanced Statistical Analysis	
PSYC 501	Best Psych Research Practices (For this course, only sections approved by the concentration coordinator will count toward the concentration, i.e., sections related to research methodology and data analytic methods relevant to ecological community psychology.)	
PSYC 588	Covar Struct and Factor Models	
Other courses approved by the concentration coordinator		
Interdisciplinary:		**4**
Select one course approved by the concentration coordinator		
Applied Work:		**8**
PSYC 546	Intervention & Assessment	
This capstone will entail community-based work where students develop a partnership, propose and execute community-based work with this partner, contribute a research-informed solution to a complex "real-world" problem, and integrate and advance scholarship through this work. As pre-requisite to enrollment in the capstone, students must have completed at least 1 year of applied experience. Applied experience may be achieved through any practicum taught by our clinical-community program faculty, an independent study with a focus on applied experiences, or other applied experiences that are approved by the concentration coordinator.		
Advanced Independent Research:		**8**
PSYC 590	Individual Research	
PSYC 599	Thesis Research	
The advanced independent research will culminate in a written research-based product for dissemination that in some way connects to ecological community psychology. This research may or may not be related to the partnership formed in the capstone, and may or may not be related to a student's dissertation work. Overall, the research needs to be connected to ecological community psychology and must be approved by the concentration coordinator.		
Total Hours		**36**

Other Requirements

Requirement	Description
Other requirements may overlap	
Students must meet all requirements for their PhD program within Psychology and must earn a B or better in each concentration course.

Overview of Grad College Admissions & Requirements (https://grad.illinois.edu/admissions/apply/)

Public Health, MPH

for the Master of Public Health in Public Health

Public health is an interdisciplinary field rooted in science and social justice that focuses on preventing disease and injury. Public health practitioners identify needs, craft interdisciplinary solutions to problems, and implement meaningful change to impact populations and make a real impact in the lives of others. Our nationally accredited MPH program provides training in the foundational principles of public health with a concentration in Health Behavior and Promotion or Physical Activity and Health. All students in the program gain hands-on experience in real-world public health settings, preparing them for successful careers after graduation.

University of Illinois Urbana-Champaign undergraduate students who major in Kinesiology, Community Health, or I-Health are eligible to apply for a 5 year joint BS-MPH degree program prior to their final year of undergraduate study. Students accepted to the BS-MPH program begin some MPH coursework in their final year of undergraduate study.

Admission

- Admissions & Requirements for MPH (https://hk.illinois.edu/admissions/graduate-admissions/)
- Admissions & Requirements for BS-MPH (https://hk.illinois.edu/academics/undergrad-programs/5-year-bs-mph-program/)

Financial Aid

Please contact the Office of Student Financial Aid directly at (217) 333-0100 or finaid@illinois.edu for any questions you may have related to financial aid.

Faculty Interests/Research

For information about specific faculty research interests, current grants, and publications, please visit our Faculty page (https://hk.illinois.edu/directory/).

for the Master of Public Health in Public Health

The MPH degree program requires a minimum of 48 hours. The program includes:

1. Five required core courses in basic content areas of public health
2. Four required courses in the selected concentration, as well as one additional concentration course from an approved list
3. An Applied Practice Experience (practicum)
4. An Integrative Learning Experience (capstone)
5. Seminars and electives

The integrative learning experience must be completed in the last term of study. There is no thesis requirement. The program generally takes 1.5 to 2 years to complete.

For additional details and requirements refer to the department's Graduate Handbook (https://hk.illinois.edu/academics/advising/graduate-advising/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

The MPH Program is nationally accredited by CEPH, the Council for Education on Public Health. Extensive reporting, assessment, evaluation, and tracking occurs as part of being a nationally accredited program. Very detailed curriculum competency alignment, tracking, and reporting happen each year to ensure the program is meeting the 30+ individual competencies CEPH requires. The MPH Program uses the following learning outcomes as a summary of the CEPH Competencies:

1. **Content Knowledge:** Students will demonstrate an advanced understanding of current and historically significant theories, models, themes, and ideas related to health promotion, the prevention of chronic illnesses, and the reduction of health disparities.
2. **Critical Thinking and Discovery:** Students will demonstrate ethical practices while applying advanced quantitative and/or qualitative methods in collecting, analyzing, and interpreting data which could then be disseminated through publications and/or oral presentations.
3. **Awareness and Understanding:** Students will understand and appreciate the diverse environmental, biological, psychological, socioeconomic, sociocultural, philosophical, and historical factors that influence health promotion, chronic illness prevention, and the reduction of health disparities.
4. **Programming and Assessment:** Students will apply best practices in developing, implementing, assessing, and evaluating programs and interventions related to health promotion, chronic illness prevention, and the reduction of health disparities within culturally diverse populations.
5. **Leadership and Engagement:** Students will demonstrate leadership and effective communication skills, while promoting effective public health practices as they develop and sustain productive relationships and work for the common good at local, national, and global levels.

Recreation, Sport & Tourism, MS

for the degree of Master of Science in Recreation, Sport & Tourism (on campus & online)

The M.S. degree may be undertaken as a terminal professional track program or serve as the first step toward the Ph.D. program.

The Department of Recreation, Sport & Tourism offers programs of study leading to the Master of Science and Doctor of Philosophy degrees. The Master of Science program educates students about leisure behavior, public parks and recreation systems, sport and tourism, in various private, public and semi-public settings providing leisure services. The Ph.D. program is designed to develop researchers and educators in the study of leisure behavior, the management of recreation, tourism, and sport systems that provide leisure services, or both.

Admission

The Graduate College admission requirements apply. Specifically, the admission requirements are a minimum grade point average of 3.0 (A = 4.0) for the last two years of undergraduate work and any graduate work completed. In accordance with Graduate College requirements, applicants must receive a minimum score on the TOEFL of 103 and on the IELTS a minimum score of 7.5. Students are also required to provide an academic statement of purpose, a personal statement, and three letters of reference (at least one should be an academic reference). Campus-based MS students may be admitted for the fall or spring semesters. Online MS students may be admitted for the fall, spring, or summer semesters.

for the degree of Master of Science in Recreation, Sport & Tourism (on campus & online)

A candidate for the M.S. degree must spend at least one semester on campus. A full-time student can complete the program in three or four semesters.

Students in the online program complete the Non-Thesis option. See below.

For additional details and requirements for all degrees, please refer to the department's website (http://rst.illinois.edu/grad-overview/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Specifically, the admission requirements are a minimum grade point average of 3.0 (A = 4.0) for the last two years of undergraduate work and any graduate work completed. In accordance with Graduate College requirements, applicants must receive a minimum score on the TOEFL of 103 and on the IELTS a minimum score of 7.5. Students are also required to provide an academic statement of purpose, a personal statement, a writing sample, and three letters of reference (at least one should be an academic reference). A video interview (e.g. Skype, Zoom) is required for Ph.D. and thesis-based MS applicants who do not speak English as their first language. Ph.D. students may be admitted for the fall or spring semesters.

Teaching Experience

Although teaching is not a general Graduate College requirement, experience in teaching is considered an important part of the graduate experience in this program. It is also anticipated that doctoral students will engage in research activities and scholarly communication under the guidance of their advisor.

Financial Aid

The department offers quarter-time and half-time assistantships in teaching, administration, and research, as well as tuition and fee waivers and the opportunity to apply for fellowships.

for the degree of Doctor of Philosophy in Recreation, Sport and Tourism

Departmental requirements include satisfactory performance on the written preliminary examination at the completion of formal coursework, the oral preliminary examination on the proposed research for the thesis, and a final examination in defense of the doctoral thesis. For additional details and requirements for all degrees, please refer to the department's website (https://rst.illinois.edu/academics/graduate-programs/) and the Graduate College Handbook (http://www.grad.illinois.edu/gradhandbook/).

Regional Planning, PhD

for the degree of Doctor of Philosophy in Regional Planning

Students, together with their faculty adviser and program committee, select theory, methods, and specialization courses to meet the Ph.D. requirements and prepare for a successful career of advanced research and teaching.

A successful dissertation in planning reports original research on a subject appropriate to the field, the results of which produce significant advances in knowledge. Each student takes a Preliminary Examination, which is an oral examination based on the dissertation proposal and is administered by the student's dissertation committee. Upon approval of the dissertation proposal, the candidate can proceed with the research, written analysis, and findings. When the candidate and the supervisor agree that the research and writing are complete, the candidate is ready for the final examination, which is a defense of the dissertation before the committee.

Please consult the department's website (https://urban.illinois.edu/) for additional information about doctoral requirements.
